In other words, small businesses would not be able to submit offers on multiyear contracts by prorating nonrecurring "start up" costs which, for a 1-year contract, would preclude these businesses from competing.

The prospective uses of multiyear contracting for civilian agencies are varied and numerous. The GSA, for example, anticipates that multiyear contracting could be used for recurring support services, such as janitorial, maintenance and repair of real and personal property, protection, trash and snow removal services. GSA would also consider using such authority selectively in the procurement of certain common use supplies and ADP and telecommunications equipment. Multiyear contracting could also be used for small demand items which, when bought in larger quantities, might encouraging age increased competition.

To ensure effective and uniform implementation, the Governmental Affairs Committee recommended last year in its report to accompany S. 2300 (98-417) that the Office of Federal Procurement Policy—the central procurement policy office in the executive branch—should take the lead in monitoring the use of this new authority and fostering the exchange of ideas and experiences between the agencies. The OFPP should consider establishing an inter-agency task group on multiyear contracting for these purposes.

The committee also recommended that the OFPP, working together with the GSA, should incorporate management controls in the Federal acquisition regulation to ensure proper use of this broadened authority. Proposed management controls should: First, require a determination and finding for using multiyear contracting, and second, require that multiyear contracts above an established threshold be reviewed by the agency's procurement executive.

Taken together, statutory guidance, regulatory controls, and management oversight should go far to ensure effective and uniform implementation. Government contracting, however, comprises a series of judgment calls which cannot always be legislated, regulated, or managed. Appropriate use of multiyear contracting, therefore, will also depend on improved training of the procurement workforce. After all, we should not only focus upon the reforms in the process, but the personnel who will implement these reforms.

The committee recommended that the Federal Acquisition Institute, now a part of GSA, should coordinate this training program to instruct agency procurement personnel how to: First, select candidates for multiyear contracting; second, conduct the initial market research which precedes the formulation of solicitations; third, obtain comparative quotations based on single-year and multiyear quantities; fourth, provide incentives for greater competition both at the prime and subcontractor levels; and fifth, assess what would constitute a reasonable cancellation charge in the event the contract cannot be continued.

For many civilian agencies, multiyear contracting is new and untested. While the potential benefits are great, inexperience may also lead to potential problems. The committee therefore recommends that those agencies inexperienced in multiyear contracting should first conduct pilot programs to ensure appropriate use of this new authority.

In closing, Mr. President, considering the support throughout the procurement community for extending multiyear contracting authority Governmentwide, the potential benefits to be gained, and the prospective uses, I am pleased that this provision was included in the package, and I hope that my colleagues in the House will lend their support.

Mr. SPECTER. Mr. President, I share the concern of my colleagues over the Senate Finance Committee's amendment to the reconciliation bill. As you know, on September 19, 1985, the Finance Committee adopted an amendment which would preclude any further borrowing by the Black Lung Trust Fund from general revenues after September 30, 1986. This approach risks that the trust fund will be without adequate funds to meet its statutory obligations for the payment of benefits to victims of black lung disease, as well as administrative costs, and interest.

The Black Lung Program represents an important commitment made by our Government to provide for the health and welfare of miners affected by the debilitating black lung disease. Our Nation's coal miners, their families, and their dependents may suffer if the Senate Finance proposal is passed into law. Adequate funding is an absolute necessity to continue to provide black lung benefits. Without funding, the program cannot continue to exist.

I am extremely concerned that changes in the Black Lung Program could jeopardize the ability of people to obtain benefits fully, equitably, and

in a timely fashion. Although it may be necessary to seek changes in the financial composition of the Black Lung Trust Fund to ensure that it retains fiscal stability, I do not see how disallowing borrowing will help to solve the long-term questions surrounding the fund.

Mr. President, I hope that my colleagues will join me now and in the future to ensure the protection of the victims of black lung disease.

COMMERCE, JUSTICE, AND STATE, THE JUDICIARY, AND RELATED AGENCIES APPROPRIATIONS, 1986

Mr. DOLE. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of the Commerce, Justice, State appropriations bill, H.R. 2965.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senate continued with consideration of the bill.

SCHEDULE

Mr. DOLE. Mr. President, let me indicate very briefly, if I may have the attention of my colleagues, what we hope to do.

Now that the State-Justice-Commerce appropriations bill is back before the Senate, there will be an amendment by the distinguished Senator from North Carolina. I do not know the contents of that amendment; but after some debate of that amendment, there will be a motion to table the amendment.

Depending on the disposition of the amendment, that will determine what happens for the remainder of the evening. So I cannot tell Members now whether there will be one vote. There could be as many as three votes this evening. That is this bill.

There will also be a unanimous consent request, before we start an amendment, that the distinguished Senator from Oklahoma [Mr. NICKLES] be permitted to bring up a matter that has been cleared on both sides with reference to the Garcia decision.

I will say this: We are shopping for Members, and we need the cooperation of Members or it will not work—we are shopping for Members to indicate that they will be here tomorrow and that they will offer amendments to the farm bill. Some probably can be accepted. We have gone over a list with the distinguished chairman of the committee. Others might require rollcall votes.

We need the cooperation of Members. If a rollcall vote is needed, obviously we will ask for the yeas and nays; but we would postpone the vote until Tuesday, if we can do the same on Monday—in other words, continue to work on the farm bill, have Members agree that they are going to be here Monday, get consent to order the yeas and nays, and have the vote on Tuesday.

This is an effort to accommodate about eight of our colleagues who would like to attend a meeting at Geneva with reference to arms control. It is a very important session. Both the distinguished minority leader and I would like to accommodate those Senators, but let us face it: Many Senators would like to complete action in the Senate sometime late next month, if not early in December. We do not want to lose 2 days by saying we have this all worked out and no one shows up to offer amendments; or they say, "I don't want to offer mine if I can't vote today." That loses 2 days.

So we are in the process of contacting Members personally on each side of the aisle to see if we can have a substantial number of amendments tomorrow and on Monday. If we can have the assurance of Members that they will offer those amendments, they may be accepted. If not, they can ask for the yeas and nays or they can be disposed of on a voice vote. Then we would do the rollcall votes Tuesday afternoon.

That is where we are. If we cannot do it, we will be in tomorrow with votes and on Monday with votes.

Mr. BYRD. Mr. President, I hope that Senators on both sides of the aisle, particularly on my side of the aisle, will attempt to cooperate in this matter, because we have the observer group going to Geneva.

I am told by Mr. NUNN and Mr. STEVENS that this is a very important weekend there, for reasons which they can best state. In other words, they feel that progress is possibly going to be made there and that for them to be there will benefit the Senate, rather than for them not to be there.

So, in view of the fact that the majority leader is bending over backward in an attempt to stack votes over to Tuesday on the farm bill in order to allow the observer group to go to Geneva, I hope Members will be able to come up with amendments and will be here tomorrow and Monday, and I will do everything I can to cooperate.

Mr. DOLE. I thank the distinguished minority leader.

I indicate that this is not for accommodation of the leadership but primarily an accommodation for Members on both sides of the aisle who are deeply interested in this matter and who do not want to miss a number of important votes tomorrow and Monday.

Mr. METZENBAUM. Mr. President, will the Senator yield for a question?

Mr. DOLE. I yield.

Mr. METZENBAUM. Do I correctly understand from the manner in which the majority leader presented the question that those of us who have amendments and concerns about budget reconciliation need not concern themselves about that subject until sometime Tuesday or Wednesday? Is that the plan of the majority leader?

Mr. DOLE. I would say Tuesday or Wednesday. That would be up to the distinguised Senator from New Mexico and the distinguished Senator from Florida.

Mr. METZENBAUM. But not on Friday?

Mr. DOLE. Not tomorrow or Monday.

Mr. METZENBAUM. And we could leave without any concern about the matter?

Mr. DOLE. You could leave, unless you have an amendment to the farm bill.

Mr. METZENBAUM. That is not my interest.

Mr. MOYNIHAN. Mr. President, will the majority leader yield?

Mr. DOLE. I yield.

Mr. MOYNIHAN. Is it the intention to finish the Justice-Commerce bill tonight?

Mr. DOLE. It is my hope and my intention.

Mr. EXON. Mr. President, will the Senator yield for a question?

Mr. DOLE. I yield.

Mr. EXON. I think the majority leader knows that I am delighted to hear that we are finally getting to the farm bill.

Unfortunately, I can tell from what is happening that there probably will not be a lot of Members around on Friday or Monday. I will be here, whether I offer amendments or not. If I have one, I will offer it.

Let me ask this question: Is it the intention of the majority leader then to finish the farm bill on Friday or on Tuesday? Is that his plan?

Mr. DOLE. No.

Mr. EXON. Or Wednesday, or Thursday?

Mr. DOLE. I would hope to be able to conclude it next Wednesday, but I am realistic enough to know that if all of the amendments that I have heard about were offered it could take maybe all next week.

Mr. EXON. Since we are moving in an area of trying to accommodate each other, might this be a good time, since I think whatever kind of a farm bill we pass we should pass it and make the decision, since this is a time when the majority leader is asking some people to be here on extraordinary duty on Friday and Monday, that we could maybe set some time now for those who may want to wait until Thursday, or Friday, or Saturday, or the following Monday to offer amendments? Is it possible that we could have a unanimous-consent agreement now that we would limit the time in some way on the farm bill so we could move ahead?

Mr. DOLE. The Senator will not have any problem with the majority leader in limiting the time.

Again, I would say it is immaterial to the majority leader, but it is not. I think they are important sessions in Geneva. I am only trying to accommodate a number of my colleagues on either side. But if it is obvious that no one will offer amendments tomorrow or Monday, then we will just be here tomorrow and Monday without any special disposition for anyone.

Mr. HEFLIN. Mr. President, if the majority leader will yield, is it the majority leader's intention to stay with the farm bill until it is disposed of or to lay it aside, double track it with other measures? I do not mean to ask for a hard and fast answer. But is it the overall intention to dispose of the farm bill on a priority basis over other pending legislation which we have half done or partially done.

Mr. DOLE. The Senator is correct. It might be, if we can reach an agreement on reconciliation, we might have to interrupt discussion of the farm bill, say, Wednesday or Thursday of next week, and it could result if we cannot get an agreement, we could have 100 and some votes under the reconciliation process, but I do believe that with that one caveat, and again there is always a possibility that the textile amendment should come off reconciliation, there might be some agreement to offer it to some other bill, but the general intention is to finish the farm bill, and I know it is very important to farmers just as it was in July when we tried to bring it up.

Mr. HEFLIN. I thank the majority leader.

Mr. BYRD. Mr. President, will the distinguished majority leader yield?

Mr. DOLE. I yield.

Mr. BYRD. Mr. President, I state a caveat here for the benefit of Members on my side in particular.

Mr. DOLE. Sure.

Mr. BYRD. As I understand the distinguished majority leader, he has not yet said that there will be no votes tomorrow.

Mr. DOLE. That is true.

Mr. BYRD. He has not yet said there will be no votes Monday unless we did not understand him, and start making our plans to be away Friday and Monday. The majority leader's statement, as with respect to Friday and Monday will depend upon the assurances that he gets tonight as to what amendments will be called up tomorrow and what sponsors will be here to call up those amendments, so that he indeed is assured there will be measures that are ready for a vote on Tuesday.

Am I correct?

Mr. DOLE. The Senator is absolutely correct.

Again, I know it is difficult for some to make commitments, but it is a farm bill. There are a number of us from farm States who have a greater interest than other Senators, and it would seem to me it gives us an opportunity, with not much else going on but the farm bill tomorrow and Monday, to offer our amendments. Some may be accepted. On some, rollcalls may be required. We could postpone rollcalls.

But the worst thing that could happen would be to lose the 2 days, if we are looking at getting out of here sometime later this year.

Mr. PRESSLER. Mr. President, will the Senator yield?

Mr. DOLE. I am happy to yield.

Mr. PRESSLER. Mr. President, I have seven amendments, of which I think three will be accepted on both sides. I am willing to offer those tomorrow if we are on the farm bill. If I could offer them tomorrow that would be perfectly agreeable.

Mr. DOLE. I would be very happy to suggest that I need to clear it with the chairman and the ranking minority member, but as far as I am concerned if there are amendments—these are amendments to the farm bill?

Mr. PRESSLER. Yes, amendments to the farm bill. But I have additional amendments that I wish to offer next week at a point that will require rollcall votes.

These will not require a rollcall vote. It would be possible the amendments will be adopted tomorrow. They do not require rollcall votes. Both sides have agreed. Or is there only going to be a debate tomorrow?

Mr. DOLE. No. If the amendments are agreeable and we want to dispose of them, we will accept them.

It is my understanding from the chairman as to amendments where amendments can be accepted he is prepared to be here tomorrow, prepared to be here on Monday, and if the Senator has three amendments, I am not certain if they have been cleared on both sides. Then they can do business.

Mr. STAFFORD. Mr. President, will the majority leader yield?

Mr. DOLE. And if there is a rollcall ordered, of course, we would not do that tomorrow.

Mr. PRESSLER. If they are not agreeable then I can ask for the yeas and nays, if there are Senators here to get the yeas and nays ordered.

Mr. DOLE. Yes, If we do that, they will be stacked and voted on on Tuesday in the order in which they were brought up. In other words, the first one ordered would be the first one voted upon. If there are other Senators who could indicate they would be willing to help us out tomorrow and Monday with amendments that would be all right.

Mr. STAFFORD. Mr. President, if the majority leader will yield, I may have an amendment to the farm bill. I will be here both Friday and Monday. I would prefer to bring it up Monday rather than Friday, but I will be here both days.

Mr. MATHIAS. Mr. President, if the majority leader would yield, I advised the majority leader that I have an amendment with respect to killer bees and the great damage that killer bees are doing to American agriculture, and I will bring it up on Monday.

Mr. HELMS. All right.

Mr. DOLE. How about Friday?

Mr. MATHIAS. Monday.

Mr. DOLE. That will give us something to go on. That is not much. We do not want to get stung in the process.

Mr. PRESSLER. Mr. President, I have a plane to take later in the day. I would like to do it in the morning. At what time will we start tomorrow morning?

Mr. DOLE. It depends. We can start fairly early if we have something to do. It will probably be 9 a.m. when we are on the bill.

Mr. BYRD. Mr. President, if the majority leader will yield, so Senators on my side will understand clearly before they leave this evening or not there are going to be rollcall votes on tomorrow and Monday, and they may make their plans accordingly, could we take an hour, the majority leader and I, while the action is going forward on the appropriations bill and determine from our respective cloakrooms as to what Senators definitely will be here tomorrow and call up amendments and then the majority leader can make a decision and everyone will know what they will do?

Mr. DOLE. Yes. We have been working at the staff level all day, and we have had a great deal of cooperation on each side. I think we will take that time to see what we can produce.

Mr. President, I understand the distinguished Senator from Oklahoma [Mr. NICKLES] has cleared on each side a unanimous-consent request, and I ask unanimous consent that he be recognized for that purpose.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Oklahoma is recognized.

Mr. NICKLES. I thank the majority leader.

FAIR LABOR STANDARDS PUBLIC EMPLOYEE OVERTIME COMPENSATION ACT

Mr. NICKLES. Mr. President, I ask unanimous consent that the Senate now turn to the consideration of Calendar Order No. 348, Senate Bill 1570, the Fair Labor Standards Act.

The PRESIDING OFFICER. The bill will be stated by title.

The legislative clerk read as follows:

A bill (S. 1570) to amend the Fair Labor Standards Act of 1938 to exclude the employees of States and political subdivisions of States from the provisions of that Act relating to maximum hours, to clarify the application of that Act to volunteers, and for other purposes.

There being no objection, the Senate proceeded to consider the bill, which had been reported from the Committee on Labor and Human Resources, with an amendment to strike out all after the enacting clause, and insert the following:

That this Act may be cited as the "Fair Labor Standards Public Employee Overtime Compensation Act".

SEC. 2. Section 7 of the Fair Labor Standards Act of 1938 (29 U.S.C. 207) is amended by adding at the end thereof the following new subsection:

"(o)(1) Employees of a public agency that is a State, a political subdivision of a State, or an interstate governmental agency may receive overtime compensation in the form of compensatory time off at a rate not less than one and one-half hours for each hour of employment for which overtime compensation is required by subsection (a) of this section pursuant to—

"(A) applicable provisions of a collective bargaining agreement, memorandum of understanding, or any other agreement between the public agency and representative of such employees; or

"(B) in the case of employees not covered by clause (A), an agreement or understanding arrived at between the employer and employee before the performance of the work.

"(2) In the case of employees described in clause (B) of paragraph (1) hired prior to April 15, 1986, the regular practice in effect on April 15, 1986, with respect to compensatory time off in lieu of the receipt of overtime compensation, shall constitute an agreement or understanding under such clause (B).

"(3) In determining eligibility for overtime compensation under this section, compensatory time off taken during any workweek or work period shall not be counted as hours worked during that workweek or work period.

"(4)(A) No overtime compensation in the form of compensatory time off may be accrued by any employee of a public agency that is a State, a political subdivision of a State, or an interstate governmental agency, in excess of 480 hours for hours worked after April 15, 1986.

"(B) Any employee of a public agency that is a State, a political subdivision of a State, or an interstate governmental agency who has accrued 480 hours of compensatory time off shall, for additional overtime hours of work, receive overtime compensation in accordance with subsection (a) of this section.

"(C) If any employee of a public agency that is a State, a political subdivision of a State, or an interstate governmental agency terminates employment with a particular public agency, the employee shall receive overtime compensation in accordance with the provisions of subsection (a) of this section.

"(D) Any employee of a public agency that is a State, a political subdivision of a State, or an interstate governmental agency who—

"(i) has accrued compensatory time off, and

"(ii) has requested the use of such compensatory time off,

shall be permitted to use such compensatory time off within a reasonable period after the request, if the use of such compensatory time off does not unduly disrupt the operations of the public agency.

"(E) In making a determination under subparagraph (B) or (C) of this paragraph, the rate of compensation of the employee shall be the rate of compensation earned by the employee at the time the employee receives compensation for overtime.".

SEC. 3. Section 7 of the Fair Labor Standards Act of 1938 (as amended by section 2) is amended by adding at the end thereof the following new subsection:

"(p) In determining the hours of employment to which the rate prescribed by subsection (a) of this section applies, the hours worked by an employee of a public agency which is a State, a political subdivision of a State, or an interstate governmental agency, may be excluded by the agency in the calculation of the hours for which the employee is entitled to overtime compensation under this section if—

"(1) the hours worked are solely at the employee's option; and

"(2) the hours are worked—

"(A) on an occasional or sporadic part-time basis for such public agency in a different capacity from the capacity in which the employee is primarily employed;

"(B) by any employee engaged in fire protection or law enforcement activities (including security personnel in correctional institutions), on a special detail for a separate and independent employer, if the public agency by whom the employee is employed requires that its fire protection or law enforcement personnel be hired by the separate and independent employer for the work, otherwise facilitates the employment, or affects the condition of employment of employees of the separate and independent employer; or

"(C) by any employee engaged in fire protection or law enforcement activities (including security personnel in correctional institutions), for another employee who was scheduled to work such hours if the employees have agreed, with the approval of the employer, to substitute scheduled work hours.".

SEC. 4. Section 3(e) of the Fair Labor Standards Act of 1938 is amended—

(1) by striking out "paragraphs (2) and (3)" in paragraph (1) and by inserting in lieu thereof "paragraphs (2), (3), and (4)"; and

(2) by adding at the end thereof the following new paragraph:

"(4)(A) The term 'employee' does not include any individual who is a volunteer for a public agency that is a State, a political subdivision of a State, or an interstate governmental agency, even if the individual is paid expenses, reasonable benefits, or a nominal fee to perform the services for which the individual volunteered, except that an individual who is otherwise employed by the same public agency for which the individual volunteered to perform the same type of services is not a volunteer for the purposes of this paragraph.

"(B) The hours in which an employee of a public agency that is a State, a political subdivision of a State, or an interstate governmental agency performs services on a volunteer basis for a public agency, other than the public agency which is the employee's employer, shall not be considered hours worked for the principal public agency for purposes of sections 6, 7, and 11 of this Act, even if the principal public agency has an agreement for mutual aid with the agency for which the employee volunteers.".

SEC. 5. Section 3(e)(2)(C)(ii) of the Fair Labor Standards Act of 1938 is amended—

(1) by striking out "or" at the end of division (III);

(2) by striking out "who" in division (IV);

(3) by striking out the period at the end of division (IV) and inserting in lieu thereof a comma and the word "or"; and

(4) by adding at the end thereof the following:

"(V) is an employee of the legislative branch or legislative body of a State, political subdivision, or agency and is not employed by the legislative library of such State, political subdivision, or agency.".

SEC. 6. Notwithstanding the provisions of section 8, an employee of a public agency who asserts rights under the Fair Labor Standards Act of 1938 between February 19, 1985, and April 14, 1986, shall be accorded the same protection against discharge or discrimination as is available under section 15(a)(3) of the Fair Labor Standards Act of 1938.

SEC. 7. (a) The Secretary of Labor shall promulgate regulations to carry out paragraph (4) of section 3(e) of the Fair Labor Standards Act of 1938, as added by section 4 of this Act, by March 15, 1986.

(b) Prior to April 15, 1986, the practice of a public agency that is State, a political subdivision of a State, or an interstate governmental agency with respect to the definition of volunteers shall, for the purpose of the amendment made by section 4 of this Act, be controlling.

SEC. 8. (a) Except as provided in subsections (b) and (c) of this section, the amendments made by this Act shall take effect on April 15, 1986.

(b)(1)(A) There shall be no liability under section 16 of the Fair Labor Standards Act of 1938 for any violation arising under sections 7 or 11(c) (as it relates to section 7) of the Fair Labor Standards Act of 1938 occurring prior to April 15, 1986, with respect to any employee of a public agency that is a State, a political subdivision of a State, or an interstate governmental agency who would not have been covered by such Act under the special enforcement policy of the Secretary of Labor concerning States and political subdivisions of States on January 1, 1985.

(B) With respect to any employee described in subparagraph (A) of this paragraph a public agency may defer until August 1, 1986 the payment of overtime compensation under section 7 of the Fair Labor Standards Act of 1938 for overtime hours worked after April 14, 1986.

(2) This Act and the amendments made by this Act shall not affect whether a public agency that is a State, a political subdivision of a State, or an interstae governmental agency is liable under section 16 for a violation of section 6, 7, or 11 of the Fair Labor Standards Act of 1938 occurring prior to April 15, 1986 with respect to any employee of such public agency who would have been covered by the Fair Labor Standards Act of 1938 under the special enforcement policy of the Secretary of Labor concerning States and political subdivisions of States on January 1, 1985.

(3) The amendments made by section 2 of this Act shall apply to any collective bargaining agreement, memorandum of understanding, or other agreement between the public agency and recognized representative of such employees in effect on the date of enactment of this Act.

(c) The provisions of sections 6 and 7 shall take effect on the date of enactment of this Act.

AMENDMENT NO. 881

(Purpose: To make certain technical and minor conforming changes)

Mr. NICKLES. Mr. President, I send an amendment to the desk on behalf of myself and Senator METZENBAUM and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Oklahoma [Mr. NICKLES] for himself, Mr. METZENBAUM, and Mr. BENTSEN proposes an amendment numbered 881.

Mr. NICKLES. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

SHORT TITLE; REFERENCE TO ACT

SECTION 1. (a) SHORT TITLE.—This Act may be cited as the "Fair Labor Standards Amendments of 1985".

(b) REFERENCE TO ACT.—Whenever in this Act an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be a reference to a section or other provision of the Fair Labor Standards Act of 1938.

COMPENSATORY TIME

SEC. 2. (a) COMPENSATORY TIME.—Section 7 (29 U.S.C. 207) is amended by adding at the end the following:

"(o)(1) Employees of a public agency which is a State, a political subdivision of a State, or an interstate governmental agency may receive, in accordance with this subsection and in lieu of overtime compensation, compensatory time off at a rate not less than one and one-half hours for each hour of employment for which overtime compensation is required by this section.

"(2) A public agency may provide compensatory time under paragraph (1) only—

"(A) pursuant to—

"(i) applicable provisions of a collective bargaining agreement, memorandum of understanding, or any other agreement between the public agency and representative of such employees; or

"(ii) in the case of employees not covered by subclause (i), an agreement or understanding arrived at between the employer and employee before the performance of the work; and

"(B) if the employee has not accrued compensatory time in excess of the limit applicable to the employee prescribed by paragraph (3).

In the case of employees described in clause (A)(ii) hired prior to April 15, 1986, the regular practice in effect on April 15, 1986, with respect to compensatory time off for such employees in lieu of the receipt of overtime compensation, shall constitute an agreement or understanding under such clause (A)(ii). Except as provided in the previous sentence, the provision of compensatory time off to such employees for hours worked after April 14, 1986, shall be in accordance with this subsection.

"(3)(A) No overtime compensation in the form of compensatory time off may be accrued by any employee of a public agency which is a State, a political subdivision of a State, or an interstate governmental agency, in excess of 480 hours for hours worked after April 15, 1986. Any such employee who, after April 15, 1986, has accrued 480 hours of compensatory time off shall, for additional overtime hours of work, be paid overtime compensation.

"(B) If compensation is paid to an employee for accrued compensatory time off, such compensation shall be paid at the regular rate of compensation earned by the employee at the time the employee receives such payment.

"(4) An employee who has accrued compensatory time off authorized to be provided under paragraph (1) shall, upon termination of employment, be paid for the unused compensatory time at the regular rate of compensation earned by the employee at the time the employee receives compensation for overtime.

"(5) An employee of a public agency which is a State, political subdivision of a State, or an interstate governmental agency—

"(A) who has accrued compensatory time off authorized to be provided under paragraph (1), and

"(B) who has requested the use of such compensatory time,

shall be permitted by the employee's employer to use such time within a reasonable period after making the request if the use of the compensatory time does not unduly disrupt the operations of the public agency.

"(6) For purposes of this subsection—

"(A) the term 'overtime compensation' means the compensation required by subsection (a), and

"(B) the term 'compensatory time' or 'compensatory time off' means hours during which an employee is not working and which are not counted as hours worked during the applicable workweek or other work period for purposes of overtime compensation, and for which the employee is compensated at the employee's regular rate.".

(b) EXISTING COLLECTIVE BARGAINING AGREEMENTS.—A collective bargaining agreement which is in effect on April 15, 1986, and which permits compensatory time off in lieu of overtime compensation shall remain in effect until its expiration date unless otherwise modified, except that compensatory time shall be provided after April 14, 1986, in accordance with section 7(o) of the Fair Labor Standards Act of 1938 (as added by subsection (a)).

(c) LIABILITY AND DEFERRED PAYMENT.—(1) No State, political subdivision of a State, or interstate governmental agency shall be liable under section 16 of the Fair Labor Standards Act of 1938 for a violation of section 7 or 11(c) (as it relates to section 7) of such Act occurring before April 15, 1986, with respect to any employee of the State, political subdivision, or agency who would not have been covered by such Act under the Secretary of Labor's special enforcement policy on January 1, 1985, and published in sections 775.2 and 775.4 of title 29 of the Code of Federal Regulations.

(2) A State, political subdivision of a State, or interstate governmental agency may defer until August 1, 1986, the payment of overtime compensation under section 7 of the Fair Labor Standards Act of 1938 for hours worked after April 14, 1986.

SPECIAL DETAILS, OCCASIONAL OR SPORADIC EMPLOYMENT, AND SUBSTITUTION

SEC. 3. (a) SPECIAL DETAIL WORK FOR FIRE PROTECTION AND LAW ENFORCEMENT EMPLOYEES.—Section 7 (29 U.S.C. 207) is amended by adding after subsection (o) (added by section 2) the following:

"(p)(1) If an individual who is employed by a State, political subdivision of a State, or an interstate governmental agency in fire protection or law enforcement activities (including activities of security personnel in correctional institutions) and who, solely at such individual's option, agrees to be employed on a special detail by a separate or independent employer in fire protection, law enforcement, or related activities, the hours such individual was employed by such separate and independent employer may be excluded by the public agency employing such individual in the calculation of the hours for which the employee is entitled to overtime compensation under this section if the public agency—

"(A) requires that its employees engaged in fire protection, law enforcement, or security activities be hired by a separate and independent employer to perform the special detail,

"(B) facilitates the employment of such employees by a separate and independent employer, or

"(C) otherwise affects the condition of employment of such employees by a separate and independent employer.".

(b) OCCASIONAL OR SPORADIC EMPLOYMENT.—Section 7(p) (29 U.S.C. 207), as added by subsection (a), is amended by adding at the end the following:

"(2) If an employee of a public agency which is a State, political subdivision of a State, or an interstate governmental agency undertakes, on an occasional or sporadic basis and solely at the employee's option, part-time employment for the public agency which is in a different capacity from any capacity in which the employee is regularly employed, the hours such employee was employed in performing the different employment may be excluded by the public agency in the calculation of the hours for which the employee is entitled to overtime compensation under this section.".

(c) SUBSTITUTION.—(1) Section 7(p) (29 U.S.C. 207), as amended by subsection (b), is amended by adding at the end the following:

"(3) If an individual who is employed by a public agency which is a State, political subdivision of a State, or an interstate governmental agency agrees, with the approval of the public agency and solely at the option of such individual, to substitute during scheduled work hours for another individual who is employed by such agency in the same activities, the hours such employee worked as a substitute may be excluded by the public agency in the calculation of the hours for which the employee is entitled to overtime compensation under this section.".

(2) Section 11(c) (29 U.S.C. 211(c)) is amended by adding at the end the following: "The employer of an employee who performs substitute work described in section 7(p)(4) may not be required under this subsection to keep a record of the hours of the substitute work.".

VOLUNTEERS

SEC. 4. (a) DEFINITION.—Section 3(e) (29 U.S.C. 203(e)) is amended—

(1) by striking out "paragraphs (2) and (3)" in paragraph (1) and inserting in lieu thereof "paragraphs (2), (3), and (4)", and

(2) by adding at the end the following:

"(4)(A) The term 'employee' does not include any individual who is a volunteer for a public agency which is a State, a political

subdivision of a State, or an interstate governmental agency, if (i) the individual receives no compensation or is paid expenses, reasonable benefits, or a nominal fee to perform the services for which the individual volunteered and (ii) such services are not the same type of services which the individual is employed to perform for such public agency.

"(B) An employee of a public agency which is a State, political subdivision of a State, or an interstate governmental agency may volunteer to perform services for any other State, political subdivision, or interstate governmental agency, including a State, political subdivision or agency with which the employing State, political subdivision, or agency has a mutual aid agreement.".

(b) REGULATIONS.—Not later than March 15, 1986, the Secretary of Labor shall issue regulations to carry out paragraph (4) of section 3(e) (as added by subsection (a) of this section).

(c) CURRENT PRACTICE.—If before April 15, 1986, the practice of a public agency was to treat certain individuals as volunteers, such individuals shall until April 15, 1986, be considered, for purposes of the Fair Labor Standards Act of 1938, as volunteers and not as employees. No public agency which is a State, a political subdivision of a State, or an interstate governmental agency shall be liable for a violation of section 6 occurring before April 15, 1986, with respect to services deemed by that agency to have been performed for it by an individual on a voluntary basis.

STATE AND LOCAL LEGISLATIVE EMPLOYEES

SEC. 5. Clause (ii) of section 3(e)(2)(C) (29 U.S.C. 203(e)(2)(C) is amended—

(1) by striking out "or" at the end of subclause (III),

(2) by striking out "who" in subclause (IV),

(3) by striking out the period at the end of subclause (IV) and inserting in lieu thereof ", or", and

(4) by adding after subclause (IV) the following:

"(V) is an employee in the legislative branch or legislative body of that State, political subdivision, or agency and is not employed by the legislative library of such State, political subdivision, or agency.".

EFFECTIVE DATE

SEC. 6. The amendments made by this Act shall take effect April 15, 1986. The Secretary of Labor shall before such date promulgate such regulations as may be required to implement such amendments.

EFFECT OF AMENDMENTS

SEC. 7. The amendments made by this Act shall not affect whether a public agency which is a State, political subdivision of a State, or an interstate governmental agency is liable under section 16 of the Fair Labor Standards Act of 1938 for a violation of section 6, 7, or 11 of such Act occurring before April 15, 1986, with respect to any employee of such public agency who would have been covered by such Act under the Secretary of Labor's special enforcement policy on January 1, 1985, and published in section 775.3 of title 29 of the Code of Federal Regulations.

DISCRIMINATION

SEC. 8. An employee of a public agency who asserts coverage under the Fair Labor Standards Act of 1938 between February 19, 1985, and April 14, 1986, shall be accorded the same protection against discharge or discrimination as is available under section 15(a)(3) of the Fair Labor Standards Act of 1938.

Mr. NICKLES. Mr. President, the amendment that I am offering on behalf of myself and Senator METZENBAUM is an amendment to a bill which was cosponsored by Senator THURMOND and over 50 other Senators that addresses the Supreme Court decision of February 19, 1985, the so-called Garcia decision.

I wish to thank my colleagues for their cooperation in working with us. We have had a multitude of meetings, trying to alleviate a lot of the concerns and also some of the problems that that Supreme Court decision has brought about for some of the cities and counties and States.

Mr. President, we have been working on this for months. It has been a difficult process, but one on which I think everyone has been cooperating, I believe we have had a successful conclusion. I believe we have brought about a product which alleviates most of the problems that have been addressed to this committee.

Mr. President, I am pleased that we are today considering S. 1570, a bill to amend the Fair Labor Standards Act of 1938 to allow the use of compensatory time off—"comp" time—in lieu of overtime for certain public agency employees and to provide other clarifications in the application of that act to employees and volunteers for State and local governments.

The Labor Subcommittee, which I chair, held a 3-day hearing on the impact of the Supreme Court's ruling in Garcia versus San Antonio Metropolitan Transit Authority on State and local governments. This ruling upheld the 1974 congressional extension of the FLSA to these public agencies. The financial impact on State and local governments was disputed by the parties but one theme seemed to dominate the hearings. That message was that both State and local government employees and employers liked the use of comp time and did not want to lose it as an option. This bill restores comp time while providing some reasonable restraints on its use.

In addition, there was concern over the treatment of volunteers under the FLSA. The joint employment concept under FLSA presented similar problems to State and local governments. The bill addresses these areas and provides clarity.

The bill we are considering today is different from the bill I originally introduced and represents a compromise among the affected parties. In my opinion, it is an extremely fair balance among all of the competing interests. I am pleased that this compromise retains the support of the U.S. Conference of Mayors, the National League of Cities, the National Association of Counties, the National Conference of State Legislators, the AFL-CIO, and the Fraternal Order of Police. I ask unanimous consent that copies of letters from these organizations be printed in the RECORD.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

OCTOBER 9, 1985.

Hon. DON. NICKLES,
Hon. HOWARD METZENBAUM,
Committee on Labor and Human Resources, U.S. Senate, Washington, DC.

DEAR SENATORS: The National Association of Counties, National Conference of State Legislators, National League of Cities and United States Conference of Mayors commend you both for the leadership you have shown in resolving the difficulties faced by state and local governments across the nation as a result of the Supreme Court's decision in the *Garcia* v. *the San Antonio Mass Transit Authority* case.

The legislation you have introduced, S. 1570 as amended, the Nickles-Metzenbaum bill, provides a solution to the problems created by *Garcia* which is balanced and equitable for all parties. It maintains the principles of the Fair Labor Standards Act and at the same time recognizes the special circumstances faced by public employers and public employees.

Be assured that you have the strong support of all of our organizations for your bill and that we will provide whatever assistance is needed to achieve its passage in its current form.

Sincerely,

JOHN J. GUNTHER,
Executive Director, U.S. Conference of Mayors.
MATT COFFEY,
Executive Director, National Association of Counties.
ALAN BEALS,
Executive Director, National League of Cities.
EARL MACKEY,
Executive Director, National Conference of State Legislators.

AMERICAN FEDERATION OF LABOR AND CONGRESS OF INDUSTRIAL ORGANIZATIONS,
Washington, DC, October 10, 1985.

Hon. DON NICKLES,
Hon. HOWARD METZENBAUM,
Subcommittee on Labor, Committee on Labor and Human Resources, U.S. Senate, Washington, DC.

DEAR SENATORS: On behalf of the AFL-CIO, I want to express our support for the revised version of S. 1570. Your joint efforts to obtain the approval of the full Committee are appreciated.

In the AFL-CIO's judgment, S. 1570, as revised, reflects a balanced approach that resolves the questions raised by the U.S. Supreme Court's decision in *Garcia* v. *San Antonio Metropolitan Transit Authority*. The bill preserves the integrity of the Fair Labor Standards Act which is so vital to the interests of employees while addressing the concerns of public employers.

The AFL-CIO will provide whatever assistance is needed to achieve passage of the bill in its current form.

Sincerely,

RAY DENISON,
Director, Department of Legislation.

STATEMENT OF RICHARD A. BOYD, NATIONAL PRESIDENT, FRATERNAL ORDER OF POLICE, 171,000 MEMBERS IN 42 STATES.

The Fraternal Order of Police, the nation's largest law enforcement organization, supports the amended version of the Nickles/Wilson S. 1570. Due to the tough, down in the trenches work of Senator Nickles, public employee organizations and public employer groups came together to work out an acceptable alternative to the current language of the Fair Labor Standards Act, as interpreted by the U.S. Supreme Court, to allow public agencies to reduce their financial liability in the payment of overtime compensation. This proposed compromise then met the scrutiny of Senate staff, representing the varied views of their respective U.S. Senators and their jurisdictions.

What everyone has come up with is a bill which incorporates most of the problems experienced by public employees and public employers alike. Specifically, law enforcement received most of what it asked of the Congress:

1. Public employees will not be removed from the guarantees of overtime compensation under the Fair Labor Standards Act (FLSA);

2. Public employees will be given pay or compensatory time off, based on a collective bargaining agreement, or the recognized past practice of the agency as of April 1986;

3. Overtime pay, and overtime compensatory time off, will be earned at the premium rate; 1.5X;

4. There is a 480 hour cap on accumulated compensatory time, so if an employee reaches that limit, the employer is either going to have to pay or give the time off; but this is not to say that an employee cannot ask for the time off prior to the maximum accumulation, and that employee will receive the time off as it can best be scheduled; and

5. Takes public agencies out of any requirement to pay overtime to the officer working an extra job, even if that job is required security by the agency.

Of course, in any compromise, there are things which public employees did not ask for, none of which, in the spirit of this working compromise, will hold up support of the Fraternal Order of Police.

The Fraternal Order of Police across this nation, and myself personally, thank U.S. SENATOR DON NICKLES for his work on this important proposal. Without Don Nickles the legislation would not be at this stage, because he alone, and his capable staff, established the tone for PUBLIC EMPLOYEES and PUBLIC EMPLOYERS alike. We think that this legislation will pass the test of Congress and the scrutiny of the President.

Mr. NICKLES. Mr. President, I wish to thank Senator METZENBAUM for his assistance in negotiating this final bill and Senator WILSON for his help in focusing attention on the problems resulting from the Garcia decision. The administration has also provided invaluable assistance both in negotiating this bill and in facilitating its passage.

It is my understanding that the House of Representatives will consider legislation very similar to S. 1570 on Monday, October 28, 1985. I hope that a final bill can be agreed to by both the House and the Senate and sent to the President before November 1, 1985, the day the Department of Labor will begin enforcing the FLSA as it applies to State and local governments. It is also my hope that a conference will not be necessary and that differences in the two versions can be resolved in the same spirit of cooperation that has prevailed so far.

Mr. President, again I really do wish to thank my colleagues who have had the willingness to work with us in trying to resolve these issues. Senator METZENBAUM and his staff have worked long and hard. Senator STAFFORD and his staff have had a good deal of input. Senator WILSON was instrumental in bringing this issue to the forefront in the Senate. I compliment them. I believe, together, we have been able to come up with a positive package. I hope that the Senate will adopt the conference report tonight.

Mr. METZENBAUM. Mr. President, I am pleased to be a principal cosponsor of the Fair Labor Standards Public Employee Overtime Compensation Act of 1985. State and local governments across the country have expressed serious budgetary concerns in having to comply with the overtime provisions of the FLSA ever since the Supreme Court—in its Garcia decision issued in February of this year—reinstated the FLSA amendments of 1974. The budgetary problems faced by public employers could affect millions of taxpayers, forcing them to endure a loss in vital public services, or a burdensome increase in taxes, or both. For months, we all have been aware that this potential fiscal crisis cried out for the attention of Congress.

At the same time, it is equally clear to me that 7 million State and local government employees deserve the protection of the FLSA. That protection has been afforded to workers in the private sector since the new deal, and to employees of the Federal Government since 1974. State and local employees should not be treated as second class citizens.

This bill, which reflects the considerable efforts of many individuals, represents a fair and equitable compromise. I am very pleased that Senator NICKLES and I, along with other committee members, were able to develop a piece of legislation which is both responsive to the concerns of affected groups and responsible from the vantage point of the public at large. I wish to thank Senator NICKLES and his staff for their fine work in helping to craft a bill that accommodates the interests of all sides. The bill is in many respects a textbook example of how the legislative process should work.

It is significant that this compromise has been enthusiastically endorsed by the National League of Cities, the U.S. Conference of Mayors, the National Associations of Counties, and the National Conference of State Legislators. These public employer groups have praised the bill as "provid[ing] a solution to the problems created by Garcia which is balanced and equitable for all parties. It maintains the principles of the Fair Labor Standards Act and at the same time recognizes the special circumstances faced by public employers and public employees." The AFL-CIO has praised the bill in similar terms, stating that it "Preserves the integrity of the Fair Labor Standards Act which is so vital to the interests of employees while addressing the concerns of public employers."

I also consider it significant that the bill vindicates the Supreme Court's faith in the role of Congress as a cornerstone of our Federal system of government. As expressed by the Garcia court, our Constitution contemplates that the proper protection for the sovereign interests of States and their political subdivisions lies not in directives issued by the Federal Judiciary but rather in the give-and-take of our federal system—especially the role of the States and cities in the political process. In responding to the concerns expressed so strongly by public employers, we have confirmed that the political process works, and works in the responsible fashion envisioned by our Founding Fathers.

The bill, S. 1570 as amended, will give State and local governments the flexibility they need to operate without going into the red. By negotiating with their employees for compensatory time in lieu of overtime pay. At the same time, by requiring that compensatory time be made available at the premium rate and that employees be able to use, preserve or cash out this time under appropriate conditions, the bill provides public employees with meaningful FLSA protections for any overtime worked. The bill also creates flexibility for public employers and employees in other areas, such as volunteer services and joint employment. Finally, by deferring enforcement of the FLSA overtime provisions until April 15, 1986—1 year after the Garcia decision—the bill provides ample time for State and local governments that have not already done so to achieve full compliance with the requirements of the law.

In addition to the work done by Senator NICKELS and his staff, I also would like to thank Senators KENNEDY, MATSUNAGA, PELL, and STAFFORD, who were influential in resolving this matter constructively at the committee stage.

Mr. President, the Secretary of Labor has made it clear that he will

enforce the FLSA with respect to State and local government employees beginning on November 1, unless Congress acts to modify the requirements of the act. It is imperative that this bill—which has the support of both parties and all major affected groups—reach the President's desk in time to become law prior to November 1. I am gratified that the bill is being approved promptly in this Chamber, and I hope that it receives the same expedited review and approval in the House of Representatives.

Mr. President, this legislation is going to pass, I would guess, unanimously or, if not unanimously, almost unanimously. And it will pass on the basis that it has been agreed upon after a Herculean effort by the staff of Senator NICKLES, my own staff, and the staffs of others who have been previously mentioned.

Were that not to be the case, you might be assured of the fact that this would be a knock-down, drag-out battle on the floor of the Senate, because we had here a situation where, in the Garcia decision, the Court provided that public employees of State, counties, and cities were entitled to be paid overtime under the Fair Labor Standards Act. So the local governmental agencies suddenly recognized that they were faced with a retroactive obligation to their employees which could run up into the millions of dollars.

The question then came before us: Well, how do we handle a matter of that kind? How do we get the employees to agree? How do we get the unions that represent them to agree and how do we get the States, counties, and municipalities to agree?

I am proud of the fact that, through the efforts of Senator NICKLES, myself, and others, we have come to that agreement which is more particularly spelled out in the legislative proposal. I will not burden the Senate with the specifics of that understanding, but I will say to my colleagues that it very well might have been otherwise. I believe it is a tribute to the fact that we can legislate when necessary, we can move forward in a positive way when necessary, and we need not always find ourselves in the position of bickering or differing over details.

In this instance, we have agreed upon the result. It is a good result. I hope that there will be a unanimous vote for the result that has been achieved.

Mr. THURMOND. Mr. President, I commend Senator WILSON, who first brought this matter up, and I joined him on a bill. I also wish to commend Senator NICKLES, and I joined him on a bill.

In my opinion, I think the Garcia decision was an unfortunate decision, because it required overtime pay when policemen and firemen worked overtime, whereas before they could give compensation time, time off. I think that was a good arrangement. It worked well.

But since this Garcia decision was handed down, it was a question of whether we were going to try to reverse it entirely or reach a compromise, as has been done here. I think it is unfortunate that we have to reach this compromise, because this is going to work a hardship on some of the counties and some of the cities.

On the other hand, it seemed it might have been a drawn-out affair here and we might not get anything done. In view of that, I am willing to go along with this compromise that has been reached here and worked out chiefly by Senator NICKLES and Senator METZENBAUM. I hope the Senate will see fit to pass it.

Again, I wish to pay my respects deeply to Senator WILSON, who did such a fine job on this, and congratulate Senator NICKLES and Senator METZENBAUM.

Mr. WILSON. Mr. President, first let me express my gratitude for the very gracious tribute from my friend from South Carolina, the senior Senator, Senator THURMOND. Let me also commend Senator NICKLES, the distinguished chairman of the subcommittee, for shepherding this legislation through his subcommittee and through the full committee chaired by our friend, the Senator from Utah, Mr. HATCH.

Mr. President, I am going to be something of a wet blanket, because I am not able to say that this is a statesmanlike compromise. I am not criticizing for one moment any of those that participated in it, certainly not Chairman NICKLES.

But I must tell you that while this is an improvement over what would occur were there no such legislation—and a significant improvement—it is still but half a loaf. It, by no means, corrects Congress' terrible transgression committed many years ago when we passed the overtime provisions of the Fair Labor Standards Act. A decade ago, Mr. President, the Supreme Court of the United States, in a correct decision, the Usery decision, told Congress that we had been guilty of terrible overreaching, in flagrant derogation of the 10th amendment. We had decided that we would act as a city council for the cities of America and that we would substitute our judgment for theirs as to how they should budget their resources.

Unhappily, Mr. President, recently a member of the majority on that Court woke up and, for no apparent reason, changed his mind and we have a five to four reversal of the Usery decision in the Garcia decision. The effect of that is we have been told to mandate State and local governments to pay overtime in cash. It knocks out what had been the almost universal and successful practice of State and local government in paying what is called comp time, compensatory time, off in lieu of cash.

We have come to this compromise, Mr. President, for two reasons: First, the municipal employee unions recognized that a great many of their people, particularly the safety members, policemen and firemen, very much preferred having the option of comp time, compensatory time, off because in many cases they needed it and desired it far more than cash. Second, they awakened to the terrible financial burden that would have been visited upon State and local governments across this land. Literally hundreds of millions of dollars annually would have been expended for no additional service. And the fact is it would have imposed upon State and local governments the terrible choice as to whether they would increase taxes substantially to maintain exactly the same level of service or, failing to do that, would suffer a marked reduction in the level of service that they provided to their citizenry. That was the reason that the municipal employee unions sought to enter into this compromise.

But, of course, what we have not dwelt upon, Mr. President, is the fact that their pound of flesh in this was that they are now guaranteed, by a statutory guarantee, that the right of overtime will not be what it is as the result of collective bargaining. No, the irony is that they have eschewed collective bargaining in favor of a statutory guarantee that it will be at time and one-half. Now, the result of that, Mr. President, is, of course, that those same State and local governments will receive some degree of relief under this compromise, but that they will still experience significant added costs as a result, not of the Garcia decision, but as a result of this statutory guarantee.

What has happened in the past, Mr. President, is that State and local governments, particularly those operating under revenue limitations who are unable to raise taxes, have bargained collectively with their employees.

They have in most instances agreed to pay some overtime in cash, most of them at time and one-half. Some have agreed that they would pay compensatory time off, some at time and one-half, and others lacking those resources have agreed that after a certain point they would give compensatory time off at the rate of so-called straight time—a day off for a day worked, an hour for an hour.

Mr. President, the reason that the State and local governments have agreed to this compromise is very simply because they had no choice. The municipal employee unions had

them over a barrel because we are facing a deadline, a deadline of November 1. That is the drop-dead date upon which the Department of Labor is required to implement new regulations under the Court decision in the Garcia case.

Mr. President, I suggest that this compromise is going to come back to haunt those who have struck this hard bargain because they are going to find out that as State and local governments face the unpleasant fiscal reality of having to accommodate this legislation, it is going to result in precisely what I described earlier, the unpleasant choice between reducing service and increasing taxes.

In those jurisdictions where they may not increase taxes, as in my home State of California, they have no choice. They will simply reduce services, or to avoid it, they will allocate from other desirable programs moneys for their support so that they can maintain even more essential services of police and fire protection. But what they will undoubtedly do is avoid overtime like the plague because they simply will be unable to afford it. That means they will reduce the level of service. What it means, in addition to the employees, is that they will seek ways to reduce their force levels. There will be people who lose jobs as a result of this legislation. That is unfortunate not only for the employees but obviously for the citizens who depend upon them for essential services.

Mr. President, one day a new court, a court sworn to uphold the Constitution including the amendments to it, will recognize that the 10th amendment should not be treated by the Congress as a dead letter. They will in fact say that it is their prerogative, in fact their duty, to honor not just the spirit but the letter of the law as expressed in the 10th amendment, and give it the kind of protection from the Congress that it has not had certainly in this decision.

I only hope that there will be a very few employees who lose their employment because of this legislation. I hope that no tragedy will occur as a result of reductions in service levels by State and local government. And I hope that one day, Mr. President, not only the Supreme Court but the Congress of the United States once again recognizes that the 10th amendment was a mandate to reserve to the States those powers not specifically delegated under the Constitution to this Federal Union. It is a rather central proposition. It is not just ironic. It is a bitter irony that we are ignoring that mandate.

Mr. President, I do not celebrate this as a triumph. I commend the good, hard work by Chairman NICKLES and by others who have sought to make the best of a very bad situation. They have taken this situation and forged a compromise that will in fact, to be fair, provide significant relief but it is a significant way from what should have occurred. There should be total exemption for State and local governments from the operation of the Federal Fair Labor Standards Act in this area of overtime.

So congratulating Chairman NICKLES on his hard work, I look forward to the day when we can really set right this miscarriage of justice, and this flagrant disregard of the 10th amendment to the U.S. Constitution. I am not going to ask for a rollcall, Mr. President, because like those who have spoken before, for the reasons that I have indicated, I hope that this measure passes. I do not wish to engage in the kind of irresponsibility that would result if we pass November 1 without this action. I would love to have that knock-down, drag-out fight that my friend from Ohio talked about. But frankly, it is a luxury that we cannot afford. We simply cannot require the State and local governments and those citizens whom they serve to experience the tremendous financial burden, and the loss of services that would otherwise ensue if we were to go forward, allow the Garcia decision to become law, and to govern the operation of State and local governments.

Mr. President, I thank my colleagues for their patience. This is a night on which we are seeking to do the business as expeditiously as possible, but I have taken these minutes of my colleagues' time because I guess it is clear I speak from deep conviction about this. I spent 5 years in State government, 11 as the mayor of a large city bargaining collectively in good faith with municipal employees. That process worked, Mr. President. It would work again if Congress would keep its hands off. We have no business intruding in this area. We should not have passed the first instance that provision of the Fair Labor Standards Act that seeks to set wages by statute rather than by collective bargaining.

Mr. President, I thank the Chair.

Mr. MATSUNAGA addressed the Chair.

Mr. NICKLES addressed the Chair.

The PRESIDING OFFICER. The Senator from Oklahoma.

Mr. NICKLES. Mr. President, I again want to commend my good friend and colleague from California. The Senator speaks with conviction. The Senator has spoken with me and other Senators off and on on this issue. As former mayor of the city of San Diego, the Senator has had personal, firsthand experience on administering city affairs and has dealt with some of these issues firsthand. I think the contribution of the Senator has been very, very significant to this legislation.

I might just quickly say that the bill does provide many benefits. We do offer the flexibility for State and local governments to offer compensatory time off in lieu of overtime having to be paid for only by cash. The comp time is calculated at time and a half. And one of the major, most important things is we have an effective date of April 15 of next year. So we basically eliminate all the potential liability which is in the billions. We also exempt volunteers, which is extremely important for all the cities, all the counties, and all the States. So it is a very significant piece of legislation, one that I think will help.

Mr. President, we have over 50 cosponsors.

Also, I ask unanimous consent that Senator CHAFEE and Senator LAUTENBERG be added as cosponsors.

The PRESIDING OFFICER. Without objection, it is so ordered.

PUBLIC EMPLOYMENT COVERAGE UNDER THE FAIR LABOR STANDARDS ACT

Mr. KASTEN. Mr. President, I rise in support of the legislation before us today which will address a serious situation for public employers and employees throughout the Nation. This carefully crafted compromise will relieve State and local governments and their employees from the inflexible overtime pay requirements of the Fair Labor Standards Act [FLSA] and ensure the continuation of vital community services across America.

There are few in this body who have not heard about the devastating potential of the Supreme Court's decision on Garcia versus San Antonio Metropolitan Transit Authority. In that ruling, the court determined that State and local governments, which were traditionally exempt from the maximum hours provisions of FLSA, must comply with those provisions by April 15, 1985. Department of Labor enforcement of the new pay requirements was to begin on October 15 of this year.

The "Garcia" ruling would prohibit public employers from allowing its employees to use compensatory time in lieu of overtime pay. It would require overtime pay for regular employees as well as volunteers.

In effect, this decision would require that public employees receive overtime pay instead of comp time whether they want it or not. Likewise, volunteers who perform community services would have to be paid overtime whether they want it or not. This situation is particularly troubling for employees who prefer or even require the flexibility of comp time to meet their particular needs. It is no more desirable to volunteers who might be prevented from participating in the community due to the added costs of their services. It is ironic that the new pay requirements designed to benefit public

workers may actually work to their disadvantage.

The impact of the pay provisions on financially strapped State and local governments is equally troubling. One conservative estimate sets the cost of the "Garcia" requirements at $12 million a year for the State of Wisconsin. Consider, for example, an estimated cost of at least $4 million in additional costs a year for Wisconsin State government. Or about $1.5 million more per year for the city of Milwaukee, and roughly $200,000 a year for the city of Oshkosh. The list goes on and on for jurisdictions from one end of the State to the other.

Ultimately, what the new pay requirements mean are increased costs to taxpayers or outright elimination of jobs and crucial commmunity services. The greatest irony of the "Garcia" requirements is that they fly in the face of collective bargaining and limit the employees' ability to negotiate agreeable work benefits.

Fortunately, Secretary Brock delayed implementation of the overtime pay requirements until November 1. This means Congress has time to address the ruling before it goes into effect. But we must act quickly to avert a potentially disastrous situation for State and local governments and their employees.

Mr. President, I believe that the measure we are considering today effectively addresses the needs of public employers and employees and works to the advantage of both. This legislation allows compensatory time in lieu of overtime at time and a half rates, up to 480 hours per year. This will allow workers with erratic work periods more flexibility in meeting their needs. Along with the elimination of retroactive payments, it provides State and local governments more financial breathing room.

This legislation also exempts volunteers from the overtime pay requirements. In addition, it allows public employees to work part time or as volunteers for the same employer in a different capacity with only the primary job counting toward overtime due. These two provisions will resolve major legal tangles for State and local governments and ensure the continuation of numerous community services.

It is important to note that this measure will not exempt State and local government from any other provisions of the FLSA such as minimum wage requirements, the Equal Pay Act or child labor prohibitions.

As a cosponsor of S. 1570, the original bill to address the problems resulting from the Garcia decision, I am pleased that we now have the opportunity to act on this compromise package. I know that many would have preferred some changes in the compromise package, such as comp time in lieu of overtime at an equal time exchange rate. But we must recognize that these provisions were carefully crafted over a series of long, difficult negotiations. To undo a thread of this compromise could unravel the entire package.

Mr. President, I believe that this package resolves some critical State and local issues and it does so in a fair and equitable manner. I urge my colleagues to join in support of this bill for the benefit of State and local employers and employees and taxpayers throughout the Nation.

Mr. SYMMS. Mr. President, I want the RECORD to show that I oppose S. 1570 as amended and reported by the Committee on Labor and Human Resources.

What is before us today as a compromise is, in reality, a major defeat for America's cities and municipalities and most importantly for our Constitution.

On July 15, I joined Senator WILSON in introducing S. 1434, a bill to amend the Fair Labor Standards Act [FLSA] of 1938 to exclude the employees of States and their political subdivisions from the provisions of that act relating to maximum hours. On August 1, I joined Senator NICKLES, the chairman of the Labor Subcommittee, Senator WILSON, and others as an original cosponsor of a similar measure designed to overturn a Supreme Court decision, *Garcia* v. *San Antonio Metropolitan Transit Authority* 105 S.Ct. 105, February 19, 1985, which my fellow cosponsors and I termed "disastrous." Senator NICKLES said on that day:

I am convinced that Federal intrusion into the employer-employee relationship at the State and local level is totally unwarranted.

As introduced, this measure heeded the cries and outrage of our cities' officials who were faced with one of the most preposterous reversals in case law ever handed down by our Supreme Court. In 1984, following *Maryland* v. *Wirtz* 392 U.S. 183, 1968, Congress moved to extend Fair Labor Standards Act [FLSA] coverage to virtually all State and local government employees. In 1976, however, the Supreme Court ruled that this congressional action could not withstand constitutional muster. In *National League of Cities* v. *Usery* 426 U.S. 833, 1976, the Court held that the Commerce Clause did not empower Congress to enforce the FLSA requirements against the States "in areas of traditional government functions." 426 U.S. at 852.

National League of Cities was a victory for the States, for our cities, and for the 10th amendment to the Constitution. Mr. President, as my colleagues are well aware, the 10th amendment reserves to the States all powers "not delegated to the United States by the Constitution, nor prohibited by it to the States." I cosponsored the original version of this bill because I had faith that when the Supreme Court, in which "The Judicial Power of the United States—is—vested * * *," neglected to read the 10th amendment, my colleagues in this Congress would heed the call of States rights.

I have always believed; and believe even more so in the present instance, that Congress must act to protect States rights and restore meaning to the words of the 10th amendment. As reported by the Committee on Labor and Human Resources, S. 1570 does nothing to protect these rights and for that reason, I cannot support this legislation.

I appreciate the statement of Assistant Attorney General for Civil Rights, William Bradford Reynolds, who testified before Senator NICKLES subcommittee regarding the impact of Garcia. I will not attempt to summarize his remarks, but I want to quote from two sections of Mr. Reynold's testimony for the benefit of those Senators who have not focussed in the constitutional questions associated with the Garcia decisions.

The decision essentially reads the Tenth Amendment out of the Constitution as an effective limitation on the power of Congress to regulate the states under the Commerce Clause. . . . The Court's decision goes beyond the misinterpretation of an isolated constitutional provision; it misapprehends the fundamental role of the states in our system of government. . . . [States] are now held as nothing more sovereign than ordinary private entities when Congress seeks to flex the awesome muscle of its power to regulate commerce.

By recognizing the states' sovereignty and preserving their ability to govern, we better secure our ultimate goal of political liberty for all Americans through decentralized government. Let there be no mistake on one point, however. The Administration does not advocate "states' rights" in any narrow negative sense; we advocate states' responsibilities. And in the vast majority of the cases; state and local governments have managed their affairs in a fully responsible fashion by reaching agreements with their workers, by providing services to their citizens at costs acceptable to their taxpayers, and by securing justice for their inhabitants.

While the damage to judicial application of the Constitutional doctrine of federalism caused by Garcia will likely remain until the Supreme Court can be persuaded to remedy it, the Court's reliance upon Congress as the sole bulwark against federal encroachments means that the direct, practical harm of the Garcia holding can be undone by legislation. Even if not constitutionally required to do so, Congress should for sound policy reasons preserve to state and local governments the authority they need to manage their own affairs.

Mr. President, under the original version of S. 1570, this Congress could have shown that it can be the "sole bulwark against Federal encroachments." This compromise bill is perhaps the best example of Congress' inability to restrain its ever-increasing power to interfere. This essentially new bill extends FLSA coverage to tra-

ditional employees of State and local governments, an extension which the language of the 10th amendment, given any meaning at all, clearly prohibits.

With the decision by both Houses of Congress to follow this path, and with the political fallout much too weighty for even the strongest objector to work against this so-called "compromise," I can only ask: Are there any powers which remain the exclusive domain of State governments and have not been unsurped by the Federal Government? The answer, Mr. President, in light of the Court's ruling and the passage of this bill, is a resounding no.

I do not want to close without complimenting the diligent efforts of my good friends Senator NICKLES and Senator WILSON. These men had the courage to act immediately to introduce the original versions of this legislation. Like me, they believe the language of the 10th amendment has meaning today just as it had meaning nearly 200 years ago. I am pleased to have worked with them in this battle to protect our cities and municipalities from the disastrous effects of the Garcia decision.

Mr. HATCH. Mr. President, I rise in support of S. 1570, as amended. I want to commend Senator NICKLES for his diligence in bringing us this compromise measure. Without his perseverance, and leadership, as chairman of the Senate Labor Subcommittee, we may not have been able to provide adequate relief to State and local governments which are currently struggling to provide essential public services to citizens with limited resources.

I do, however, wish to express my continuing concern that coverage of State and local government employees in the Fair Labor Standards Act is beyond the limit of necessary Federal intervention in the affairs of States and localities under the 10th amendment. The bill we are considering today does not fully address this concern. I do not want my support for this bill to be construed as approval of the FLSA provision it modifies, or of the Court's acceptance of it in Garcia. This is not a question of protecting worker rights. This is a question of defining the proper responsiblities of the Federal Government.

Nearly every State has a labor standards statute of its own. If States had wanted State and local government employees to have time and a half for overtime instead of compensatory time, they could have authorized it. Both Congress and the Supreme Court should take another look at the constitutional aspects of the Garcia decision lest we allow it to make federalism a thing of the past.

It is my hope that the States, counties, cities, and townships which participated in the making of this legislation will not be satisfied with only the economic relief provided in this bill. If they do not challenge the underlying basis for the Garcia decision they will be abdicating their own political prerogatives as members of a union of States in exchange for what could be only the temporary easing of financial hardship.

I am supporting the compromise proposal because it is necessary to prevent the taxpayers in every single city in America from suffering reduced services and higher taxes to pay for burdensome, federally imposed requirements. These is no question that immediate action by the Congress is essential before the Department of Labor begins enforcement of mandated overtime pay regulations on November 1, 1985, less than 2 weeks away. Even though I believe this is an incomplete solution to the issue, and the principle of federalism deserves to be held up in this debate, prudence suggests that we should go forward with the legislation.

I appreciate the cooperation that has been exhibited on this matter by the members of the Labor and Human Resources Committee, particularly Senators NICKLES, STAFFORD, PELL, METZENBAUM, and our very fine legislative staffs. The bill, S. 1570, represents a true bipartisan compromise. I also wish to commend the efforts of Senator WILSON in effectively dealing with this issue and his help in bringing this bill to the floor.

Once again, I urge the expeditious enactment of this measure.

Mr. FORD. Mr. President, I had intended to offer an amendment to this bill, similar to the language of a bill I have introduced in the last two Congresses, which would exempt State law enforcement officials from provisions of the Age Discrimination in Employment Act [ADEA] dealing with mandatory retirement.

Since 1947, Congress has recognized the need for early retirement benefits for Federal law enforcement personnel and has provided special early retirement benefits to those Federal employees whose duties are primarily investigating, apprehending, or detaining persons suspected or convicted of committing Federal crimes. These Federal employees include personnel in the Bureau of Prisons, the FBI, the Internal Revenue Service, the Immigration and Naturalization Service, the Secret Service, the Customs Service, and the Postal Service. Congress has consistently maintained that the need for early retirement policies for these employees has been to improve and maintain the quality, efficiency, and productivity of Federal law enforcement activities.

Similarly, State law enforcement agencies have long recognized early retirement as necessary to attracting and maintaining a quality force capable of physically and emotionally meeting the hazards of the job. However, in recent years, the EEOC, under provisions of the ADEA, have brought suit against several States, including Kentucky, challenging early retirement policies. Most recently, the Supreme Court reviewed this issue in the case of Johnson against Mayor and City Council of Baltimore in which it held that the age 55 retirement age for Federal firefighters does not represent a determination by Congress that age 55 is a bona fide occupational qualification [BFOQ] to the requirements of ADEA. This decision, and a subsequent decision in Western Airlines against Criswell jeopardizes the ability of our States and communities to structure retirement policies which meet their specific needs.

The amendment that I sought to offer to this legislation, S. 1570, would have attempted to deal with this growing problem. However, I recognize that this bill represents the result of long and tedious negotiations between the primary sponsors, my distinguished colleague from Oklahoma, Senator NICKLES, and my distinguished colleague from Ohio, Senator METZENBAUM, and any move to amend it might jeopardize the good work they have done in reaching a consensus on a response to another Supreme Court decision in Garcia against San Antonio Metropolitan Transit Authority.

In order to accommodate my colleagues, I have agreed not to offer my amendment at this time, with the understanding that the chairman of the Labor Subcommittee, Senator NICKLES, will hold hearings on this important issue early next year. The good Senator has been most accommodating to me, and I appreciate his consideration of my request, and I thank him for his courtesy.

Mr. NICKLES. Mr. President, I appreciate the words of the Senator from Kentucky and I am grateful to him for not pressing his amendment at this time. We have worked long and hard to arrive at the bill before us, and any attempt to amend it at this time could derail the agreement we have reached.

I share the Senator's concern that it is time to address this issue and as chairman of the Labor Subcommittee, I have agreed to schedule a hearing on this matter next year. I thank my colleague from Kentucky, Senator FORD, for withholding his amendment, and I look forward to working with him on this issue.

Mr. METZENBAUM addressed the Chair.

The PRESIDING OFFICER. The Senator from Ohio.

Mr. METZENBAUM. Mr. President, I think we all want to proceed forward promptly to a vote, but because there were some comments made by the dis-

tinguished Senator from California that might cause some to have a misunderstanding of the facts, I think it is important that we point out that there is nothing in the Fair Labor Standards Act, nor anything in the court decision that would provide for the setting of wages. All Congress did was provide that they have to pay time and a half over 40 hours. What happened was about 10 years ago the courts said that was not applicable to public employees. More recently, in February 1985, the court reversed itself and said it was applicable to all employees. If it is applicable to all employees, therefore, they are entitled to time and a half compensation.

What Congress is doing in this effort is we are not legislating what people are going to get paid. We are trying to make it possible to amend the law so that law passed maybe almost 50 years ago, which has been interpreted by the courts to mean to be applicable to State and county and other public employees, will not create an unreasonable burden on the State, counties, and municipalities.

We are not saying that something is new. This is not anything new. This is a matter of ameliorating a problem that exists. You say that Congress should not involve itself in a matter of this kind, that we ought not to be involved and let collective bargaining take place.

I do not have to spell it out for my colleague from California that there are many employees who do not have a collective bargaining agent, and, therefore, there is a concern about them.

The fact is at this instant, to the surprise of many of us, through the able efforts of many of our staffs as well as ourselves we were able to affect a compromise, a compromise that the public bodies and the public employees are all satisfied with.

I would have hoped that the Senator from California would be on the floor recognizing that without this bill, without this legislation, there would be a very, very large burden placed upon the public bodies of this country. Because this legislation hopefully will be signed into law before November 1, that will not occur. Therefore, rather than be critical, I think he might very well have been in the position, having been a former mayor, to say that we have provided this, and the representatives of all the State, county, local and municipal employees are saying this is a great solution. I am sorry that the former mayor of San Diego in this instance does not see fit to join the chorus. If he feels strongly that he wants to vote no, of course, this is his privilege, but I think an eloquent result has been obtained and I am sorry he does not see it that way.

Mr. WILSON. Mr. President, it is true, and I think I have indicated that already, that without this legislation a far greater burden would befall the cities and States of this Nation. But if the Senator from Ohio wonders why I do not join in declaring victory, it is because of the numerous mayors I have talked to, not just in my own State but all across the country who say, "It is the best we can get. We do not like it. It is going to cost us money but if we do not pass it, of course, it will cost us far more."

That is why I do not celebrate with the Senator. It is half a loaf, I hope, but it is a serious mistake. I must say that when Congress dictates that there will be premium overtime, time-and-a-half, that, in my judgment, is setting wages. We may not have set the scale, but we have said that whatever is overtime shall be guaranteed to be time-and-a-half whether it be in cash or compensatory time off.

I will tell you what people have told me, and that is that people in the State of Ohio as well as mine will suffer as a result because those charged with delivering service to them will be unable to deliver the same level of service without raising taxes or without reallocating resources. Many of them will not do it. They will take the way out of cutting service. There is simply no avoidance.

I must say that with respect to the universal joy described among those who participated in the bargaining process, that is an exaggeration as well. Frankly, I am not pleased at all with the performance of those who purported to represent the city and State governments. I do not think they did a very good job in bargaining. But to be fair, I will say that because of the November 1 deadline and the calamity that awaits them without some action, that, in fact, they were over a barrel.

I will have to tell him that if he is sorry I cannot join him in celebrating, I am sorrier than he is, but I would be a fool in celebrating this. It is a far better thing than would occur without it.

May I address a question to the distinguished chairman of the subcommittee?

Mr. President, the question I address is this: It is my understanding that the compromise which has been described in such glowing terms has been embodied in this legislation on the Senate side. However, I understand that in the markup on the House side some liberty has been taken with this compromise and that in addition to the 480-hour cap after which cash must be paid instead of compensatory overtime, on the House side they have amended the provision to include an 180-hour cap for other than safety employees. Is that correct?

Mr. NICKLES. If I understand the question, the Senator is exactly correct. In our bill that we have before us we do have a compensatory time bank of 480 hours. That is what I hope they will adopt in the House provision. We will be working with Chairman HAWKINS and other Members of the House, hoping they will adopt an identical bill to what we are passing at this time.

Mr. WILSON. I would only say if we are going to compromise, I expect it to be honored in the other body as well, both in terms of a possible conference or in terms of a bill coming to us from the House. I think we should make clear to the House that we are going to honor the compromise and not allow amendments to it that derogate that number.

Mr. NICKLES. I appreciate the Senator's comments and we will do the best we can to keep the 480 figure.

Mr. WILSON. I am not talking about that figure. I am talking about an entirely different provision, that anything contained in the compromise that relates to nonsafety employees being assigned the 180-hour cap.

Mr. NICKLES. The Senator is correct. We will do everything we can to keep all employees at the 480-hour cap and not have a separate category for others.

Mr. MATSUNAGA. Mr. President, as a cosponsor of the proposed amendment and as a member of the Subcommittee on Labor, I rise in strong support of the proposal.

As a member of the subcommittee I sat in on the hearings and had occasion to confer with mayors and Governors. I must give due credit and I must commend both the chairman of the subcommmittee and the ranking member of the subcommittee for having worked up this compromise.

Having been in the intitial negotiations, I think what we have here is something which I myself never expected to come before the Senate. I had expected a bloody battle on the floor if the bill had come in the form in which it was first introduced.

Concerning the statements of the Senator from California, rather than having the ruling go into effect on November 1, we have a date here that this act will take effect April 15, which means that States, cities, counties, and municipalities will have a period of 5½ months to make the adjustments rather than immediately having to comply with the decision arrived at here this evening.

So I join in commending the two managers of the measure and I am in strong support of it.

Mr. METZENBAUM. Mr. President, I do want to acknowledge publicly the assistance that Senator MATSUNAGA and his staff have given us in connection with this matter. He was very much involved in this entire issue and we are grateful for his support along the way as well as his support this evening.

I also wish to have printed in the RECORD two letters, both of which are directed to Senator NICKLES and myself, one of which says:

The National Association of Counties, National Conference of State Legislators, National League of Cities, and United States Conference of Mayors commend you both for the leadership you have shown in resolving the difficulties faced by state and local governments across the nation as a result of the Supreme Court's decision in the *Garcia v. the San Antonio Mass Transit Authority* case.

That is signed by the executive director of each of those agencies.

Then we have another letter, also addressed to both of us, which says:

On behalf of the AFL-CIO, I want to express our support for the revised version of S. 1570. Your joint efforts to obtain the approval of the full committee are appreciated.

I ask unanimous consent that both of these letters be printed in the RECORD in their entirety.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

October 9, 1985.

Hon. DON NICKLES,
Hon. HOWARD METZENBAUM,
Committee on Labor and Human Resources, U.S. Senate, Dirksen Senate Office Building, Washington, DC.

DEAR SENATORS: The National Association of Counties, National Conference of State Legislators, National League of Cities, and United States Conference of Mayors commend you both for the leadership you have shown in resolving the difficulties faced by state and local governments across the nation as a result of the Supreme Court's decision in the *Garcia v. the San Antonio Mass Transit Authority* case.

The legislation you have introduced, S. 1570 as amended, the Nickles-Metzenbaum bill, provides a solution to the problems created by *Garcia* which is balanced and equitable for all parties. It maintains the principles of the Fair Labor Standards Act and at the same time recognizes the special circumstances faced by public employers and public employees.

Be assured that you have the strong support of all of our organizations for your bill and that we will provide whatever assistance is needed to achieve its passage in its current form.

Sincerely,

JOHN J. GUNTHER,
Executive Director, U.S. Conference of Mayors.
MATT COFFEY,
Executive Director, National Association of Counties.
ALAN BEALS,
Executive Director, National League of Cities.
EARL MACKEY,
Executive Director, National Conference of State Legislators.

AMERICAN FEDERATION OF LABOR AND CONGRESS OF INDUSTRIAL ORGANIZATIONS,
October 10, 1985.

Hon. DON NICKLES,
Hon. HOWARD METZENBAUM,
Subcommittee on Labor, Committee on Labor and Human Resources, U.S. Senate, Washington, DC.

DEAR SENATORS: On behalf of the AFL-CIO, I want to express our support for the revised version of S. 1570. Your joint efforts to obtain the approval of the full committee are appreciated.

In the AFL-CIO's judgment, S. 1570, as revised, reflects a balanced approach that resolves the questions raised by the U.S. Supreme Court's decision in Garcia v. San Antonio Metropolitan Transit Authority. The bill preserves the integrity of the Fair Labor Standards Act which is so vital to the interests of employees while addressing the concerns of public employers.

The AFL-CIO will provide whatever assistance is needed to achieve passage of the bill in its current form.

Sincerely,

RAY DENISON,
Director, Department of Legislation.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

Mr. BUMPERS. Mr. President, are we under a time agreement?

Mr. METZENBAUM. We are through. We are ready to vote.

Mr. BUMPERS. I commend the Senator from Ohio and the Senator from Oklahoma for their work on this matter in the subcommittee. I am certainly impressed with the letters of the Senator from Ohio to all the Members who will be affected by this. I have answered perhaps as much mail on this issue ever since the Garcia decision was rendered as on any item I can think of.

I was wondering if the subcommittee did any computations on what the total cost of this is in excess, for example, of what the cost would have been had the Garcia decision never been rendered.

Mr. NICKLES. To respond to the question, there is a variety of estimates that have been floating around. the figure we heard that is more prevalent than anything is, if we did not address the Garcia decision, we were probably talking of in excess of $3 billion per year that would go to the cities, counties, and States. Again, those estimates are hard to compute, but that is in the ball park.

Mr. BUMPERS. Can the Senator tell me how much that figure would be reduced by passing this bill, assuming the House accepts it as it is?

Mr. NICKLES. Again, it is hard to calculate and I would be trying to pull a figure from the air, but since we have allowed the option of comp time, there is no question in my mind that we have saved well over, I am going to say over two-thirds, because when we allowed the comp time option and we have eliminated the past liability. Also, we have allowed and have exempted volunteers and the volunteer category is impossible to calculate. But its effect economically would be dramatic.

Mr. METZENBAUM. Will the Senator yield to me?

Mr. NICKLES. I am happy to yield.

Mr. METZENBAUM. I might say the CBO advised us that most of the expenses which otherwise would have been incurred by reason of the Garcia decision have been alleviated by reason of this amendment. I am sorry I cannot define more accurately for the Senator what CBO means by "most," but I think my own guesstimate would be that it is somewhere between 66⅔ percent and 90 percent because it makes possible the use of comp time which otherwise would not be possible. I think the comp time will pretty much cover almost all of the expenses.

Mr. McCLURE. Will the Senator yield on that point?

Mr. BUMPERS. Yes, I am happy to yield.

Mr. McCLURE. I do not mean to prolong this debate, but I think we ought to get the facts on the table. The only way comp time reduces the cost is by elimination of services because it means people who would otherwise be on the job providing services are permitted time off. Either you eliminate services that way or you hire somebody else to perform the service while the person is taking the comp time off.

Mr. METZENBAUM. Mr. President, I point out to my colleague that there is lots of time taken off where people do not fill in for the time taken off. If he wants to check the facts, he can just look in his own office, my office, or Senator NICKLES' office. People do take time off and the same people at other times also work overtime. This is a way to see that it does not provide a financial burden.

Mr. NICKLES. Will the Senator yield?

Mr. BUMPERS. I am happy to yield.

Mr. NICKLES. I thank the Senator from Arkansas.

Just to give a little different answer to the question of the Senator from Idaho, to give an example, the city police force in Tulsa, OK, right now offers comp time at time-and-a-half or pay at time-and-a-half. The Garcia decision said, no, you cannot do that, you have to pay cash. The Garcia decision was going to cost the city more money. Now we are allowing them to have the option that we had before at no additional cost to the city. We are just giving them that flexibility.

Mr. President, I had mentioned when I took the floor that I thought this would take just a few minutes. That is one of the ways I was able to interject this amendment at that time. I hope we can conclude this in short

order and I can somewhat keep my commitment to our majority leader.

Mr. BUMPERS. We can finish it up from my standpoint by just answering one more question.

Prior to Garcia, in a case, for example, where a State trooper worked 60 hours a week in the past—for example, in my State, we had a comp time rule where he got an additional 20 hours off at some time and he was not paid time-and-a-half for that extra 20 hours he put in. As I understand it, what the Senator from Oklahoma just said is that that will be the sense of the rule here. He will be entitled to time-and-a-half pay, but it can also be paid with comp time as it was in the past if comp time were recomputed at time-and-a-half rates. Is that correct?

Mr. NICKLES. The Senator is correct, comp time would be computed at time-and-a-half so if he worked 20 extra hours, he would receive 30 hours of comp time.

Mr. BUMPERS. That certainly ought to reduce the cost of this dramatically. That has been the primary concern of my State, county, and city officials. I am going to vote for this and I thank the Senators again for it. It answers what is obviously a knotty problem. It may not be the best of all possible worlds but it will help the counties in my State, who are already so hard hit by the loss of revenue sharing and what may be perhaps a loss from the deductibility of state and local taxes.

Mr. NICKLES. Mr. President, I ask unanimous consent that Senators WALLOP and HOLLINGS be added as cosponsors.

The PRESIDING OFFICER. Without objection, it is so ordered.

The question is on agreeing to the amendment.

The amendment (No. 881) was agreed to.

The PRESIDING OFFICER. The question is on agreeing to the committee substitute, as amended.

The committee substitute, as amended, was agreed to.

Mr. DOLE. Mr. President, I am pleased to support this legislation and I commend the efforts of the Senator from Oklahoma, Senator NICKLES, and others who have worked so hard to bring this much-needed relief to our States and communities.

I have heard from many Kansas officials over the past few months who are truly desperate for an alternative to the Garcia decision. Those officials have shown me their budgets, their current levels of service and, finally, the impossible financial burdens they would suffer under the recent Supreme Court ruling.

It is doubtful that many of us would question the need for Fair Labor Standards Act [FLSA] wage and hour standards in most work situations, but it is clear that the unique services provided by local, county, and State governments do not reasonably conform to the requirements of the FLSA. In many small communities, emergency services are provided by a handful of people—too few to maintain a 24-hour state of readiness. It is unrealistic to expect that personnel in that sort of circumstance can work 8 hours and call it a day. That would mean drastically reduced protection in the event of a real emergency. Few localities could afford to comply with FLSA requirements without the necessary revisions provided by the proposed legislation.

In my view, this is a sensible, uncomplicated solution to what might otherwise be a disastrous situation for our States and communities. I can sympathize with the view that we should not exempt government employees from a wage-and-hour standard that is almost universally applied in the private sector, but I believe that providing the option of comptime will adequately address the somewhat unique requirements of public service. This legislation will ensure that public sector employees—and those who rely on their service—will be treated fairly.

Mr. President, on behalf of the many Kansans who are looking to the Congress for a solution to their dilemma, I sincerely hope that my colleagues in the Senate will see fit to pass the legislation that is now before us.

Mr. BINGAMAN. Mr. President, I rise in support of S. 1570, the Fair Labor Standards Public Employee Overtime Compensation Act. The enactment of this legislation is a necessary response to the U.S. Supreme Court's decision in Garcia versus San Antonio Metropolitan Transit Authority. The Court in Garcia held that the 10th amendment provides no protection for State and local governments from Federal regulation under the Fair Labor Standards Act [FLSA], thereby making State and local government employees eligible for overtime compensation.

The Garcia decision will have significant consequences for State and local governments. The immediate impact of the decision is to impose unanticipated costs and extreme administrative burdens on these governments. The amendment offered today will provide State and local governments the flexibility they need to operate, while providing public employees with premium compensation for any overtime worked. It also excludes volunteers from the definition of the term "employee."

I am deeply concerned about the immediate burden on State and local taxpayers of hundreds of million of dollars in FLSA compliance costs if we do not pass this amendment. The greatest cost and most significant burden on government will be paying time and a half for overtime instead of providing compensatory time off for overtime hours worked.

I commend the distinguished Senators from Oklahoma and Ohio, Senators NICKLES and METZENBAUM, for their efforts to resolve the difficulties faced by State and local governments across the Nation as a result of the Supreme Court's decision in Garcia. After much negotiation a workable compromise was reached in the form of this legislation. It has been praised by the U.S. Conference of Mayors, the National Association of Counties, the National League of Cities, and the National Conference of State Legislators, as well as the AFL-CIO.

The bill modifies the overtime provisions of FLSA to make compensation time available in lieu of overtime pay for employees of State and local governments. Under this legislation, public works could be compensated for overtime in time off, rather than cash, if provided in collective bargaining agreements or individual agreements between employers and employees. Such compensation, however, must be at a rate of time and one-half for each overtime hour worked. Employees could bank up to 480 hours of compensating time, and they must be allowed to use their compensatory time within a reasonable period of requesting it, as long as the employer's operation is not unduly disrupted. The legislation would be effective April 15, 1986, thus allowing States and local governments ample time to comply with the stated regulations.

The compensatory time system, in contrast to the FLSA system of time and a half pay for overtime, recognizes the need for public employees to work flexible schedules. For example, forest firefighters or State legislative staff may be required to work round the clock for days and weeks during peak periods of paid leave. The compensatory time system, thus, balances the seasonal and unpredictable nature of the work with the need to maintain a trained, organized, and stable work force. This system will also save States millions of dollars in comptime pay, and therefore will not restrict the capacity of State and local governments to effectively provide public services and respond to emergencies.

Mr. President, I believe this bill embodies an extremely workable compromise which must be approved. It recognizes the financial hardships to cities and counties in avoiding these costs, but it also protects the rights of employees to be compensated for overtime. I applaud the work of the Labor Committee in reaching this agreement and I urge my colleagues to support the measure as amended.

Thank you, Mr. President.

Mr. QUAYLE. Mr. President, I am proud to be a cosponsor of S. 1570, a

bill to amend the effect of the recent Supreme Court decision in Garcia versus San Antonio Metropolitan Transit Authority. This bill, introduced and expertly sheparded to the floor by my distinguished colleague from Oklahoma, Senator DON NICKLES, has prevented municipal disasters that almost certainly would have resulted from the impact of the decision in Garcia.

Senator NICKLES instantly understood the threat that Garcia presented to State and local governments, especially in this time of severe economic constraints. He put his finger in the dike, and by doing so he prevented not only a flood of lawsuits, but he saved States and local governments from being inundated by excess overtime payments, or from having to convince their residents to pay extra taxes to support the same level of services as they had enjoyed in past years.

Mr. President, the fact of the matter is, the Garcia decision would have had a very unfortunate impact on the State of Indiana. Town mayors and county officials have been burning my ear about what the Garcia decision will do to their budgets this year. Indiana municipalities are worried about budgeting for thousands of dollars more than they had planned for. This bill will allow them to stay within their budget because it permits State and local governments to give employees 1½ hours of compensatory time off for each hour of overtime worked. Those employees will be covered by the Fair Labor Standards Act, but their employers will have the option to reward their employees who work overtime with compensatory time off rather than be required to pay penalty wages.

In addition to permitting State and local governments to use compensatory time off in lieu of paying overtime, S. 1570 will exempt volunteers, such as firefighters, from coverage, even if the volunteers are paid expense money. State and local legislative employees, except library employees would be exempted from coverage. This bill will also, nullify pending lawsuits against the States or municipalities. Finally, the bill provides that firefighters and law enforcement employees who voluntarily do part-time work different from their regular jobs will be considered as working two separate jobs. Thus, hours worked at the second job would not be counted toward the overtime limit at the main job. This provision is intended to cover, for example, a firefighter who also works at a community youth center.

This bill is the result of an agreement worked out between labor unions representing public employees and public employer organizations such as the National League of Cities, the U.S. Conference of Mayors, and the National Association of Counties. The International City Management Association estimated that the costs of compliance with the Garcia decision would be more that $1 billion per year. Other groups have estimated in the $2 to $4 billion range. The city of Indianapolis has estimated that an additional $400,000 will be needed to maintain services if the Garcia decision is permitted to stand unchanged. Shelbyville, IN, will have to pad its budget by $50,000 to comply. In Zionsville, an extra $15,000 would be needed to cover the cost of police and street department overtime. In Carmel, an additional $15,000 for police and another $15,000 for firefighters would be needed to comply with Garcia. In Lebanon, IN, an extra $7,000 is planned for police and fire overtime payments and in Martinsville, the city's budget will have to be increased by $33,700 to comply with the Garcia decision. I can go on and on about the letters and the phone calls I have received about this Supreme Court decision, and I feel certain that my colleagues can do the same.

Again, I am delighted to support S. 1570, I know that my colleagues will join me in supporting this bill that was reported out of the Labor and Human Resources Committee unanimously.

I would like to note that, by passing this bill in a timely fashion, the Senate will have beaten the November 1, 1985, deadline, the date on which Secretary Brock has promised the Congress that he will begin enforcing the Department of Labor's regulations with respect to State and local employees. I understand that the Education and Labor Committee has reported its bill, H.R. 3530. I am told that they plan to go to the House floor next week. Because the two bills are very similar, I hope that the conference report will be considered quickly and the bill will be on the President's desk by November 1, 1985. Again, I commend Senator NICKLES for his leadership during this emergency.

The PRESIDING OFFICER. The question is on the engrossment of the amendments and third reading of the bill.

The bill was ordered to be engrossed for a third reading and to be read a third time.

The bill was read the third time.

Mr. McCLURE. Mr. President, I do not think there is any opportunity for a rollcall vote. The only thing left is to register our opinion. I take this time to say I think it is a bad compromise and I am opposed to it.

The PRESIDING OFFICER. The bill having been read the third time, the question is, shall it pass.

So the bill (S. 1570) as amended was passed as follows:

S. 1570

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE; REFERENCE TO ACT

SECTION 1. (a) SHORT TITLE.—This Act may be cited as the "Fair Labor Standards Amendments of 1985".

(b) REFERENCE TO ACT.—Whenever in this Act an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be a reference to a section or other provision of the Fair Labor Standards Act of 1938.

COMPENSATORY TIME

SEC. 2. (a) COMPENSATORY TIME.—Section 7 (29 U.S.C. 207) is amended by adding at the end the following:

"(o)(1) Employees of a public agency which is a State, a political subdivision of a State, or an interstate governmental agency may receive, in accordance with this subsection and in lieu of overtime compensation, compensatory time off at a rate not less than one and one-half hours for each hour of employment for which overtime compensation is required by this section.

"(2) A public agency may provide compensatory time under paragraph (1) only—

"(A) pursuant to—

"(i) applicable provisions of a collective bargaining agreement, memorandum of understanding, or any other agreement between the public agency and representative of such employees; or

"(ii) in the case of employees not covered by subclause (i), an agreement or understanding arrived at between the employer and employee before the performance of the work; and

"(B) if the employee has not accrued compensatory time in excess of the limit applicable to the employee prescribed by paragraph (3).

In the case of employees described in clause (A)(ii) hired prior to April 15, 1986, the regular practice in effect on April 15, 1986, with respect to compensatory time off for such employees in lieu of the receipt of overtime compensation, shall constitute an agreement or understanding under such clause (A)(ii). Except as provided in the previous sentence, the provision of compensatory time off to such employees for hours worked after April 14, 1986, shall be in accordance with this subsection.

"(3)(A) No overtime compensation in the form of compensatory time off may be accrued by any employee of a public agency which is a State, a political subdivision of a State, or an interstate governmental agency, in excess of 480 hours for hours worked after April 15, 1986. Any such employee who, after April 15, 1986, has accrued 480 hours of compensatory time off shall, for additional overtime hours of work, be paid overtime compensation.

"(B) If compensation is paid to an employee for accrued compensatory time off, such compensation shall be paid at the regular rate of compensation earned by the employee at the time the employee receives such payment.

"(4) An employee who has accrued compensatory time off authorized to be provided under paragraph (1) shall, upon termination of employment, be paid for the unused compensatory time at the regular rate of compensation earned by the employee at the time the employee receives compensation for overtime.

"(5) An employee of a public agency which is a State, political subdivision of a State, or an interstate governmental agency—

"(A) who has accrued compensatory time off authorized to be provided under paragraph (1), and

"(B) who has requested the use of such compensatory time,

shall be permitted by the employee's employer to use such time within a reasonable period after making the request if the use of the compensatory time does not unduly disrupt the operations of the public agency.

"(6) For purposes of this subsection—

"(A) the term 'overtime compensation' means the compensation required by subsection (a), and

"(B) the term 'compensatory time' or 'compensatory time off' means hours during which an employee is not working and which are not counted as hours worked during the applicable workweek or other work period for purposes of overtime compensation, and for which the employee is compensated at the employees regular rate.".

(b) EXISTING COLLECTIVE BARGAINING AGREEMENTS.—A collective bargaining agreement which is in effect on April 15, 1986, and which permits compensatory time off in lieu of overtime compensation shall remain in effect until its expiration date unless otherwise modified, except that compensatory time shall be provided after April 14, 1986, in accordance with section 7(o) of the Fair Labor Standards Act of 1938 (as added by subsection (a)).

(c) LIABILITY AND DEFERRED PAYMENT.—(1) No State, political subdivision of a State, or interstate governmental agency shall be liable under section 16 of the Fair Labor Standards Act of 1938 for a violation of section 7 or 11(c) (as it relates to section 7) of such Act occurring before April 15, 1986, with respect to any employee of the State, political subdivision, or agency who would not have been covered by such Act under the Secretary of Labor's special enforcement policy on January 1, 1985, and published in sections 775.2 and 775.4 of title 29 of the Code of Federal Regulations.

(2) A State, political subdivision of a State, or interstate governmental agency may defer until August 1, 1986, the payment of overtime compensation under section 7 of the Fair Labor Standards Act of 1938 for hours worked after April 14, 1986.

SPECIAL DETAILS, OCCASIONAL OR SPORADIC EMPLOYMENT, AND SUBSTITUTION

SEC. 3. (a) SPECIAL DETAIL WORK FOR FIRE PROTECTION AND LAW ENFORCEMENT EMPLOYEES.—Section 7 (29 U.S.C. 207) is amended by adding after subsection (o) (added by section 2) the following:

"(p)(1) If an individual who is employed by a State, political subdivision of a State, or an interstate governmental agency in fire protection or law enforcement activities (including activities of security personnel in correctional institutions) and who, solely at such individual's option, agrees to be employed on a special detail by a separate or independent employer in fire protection, law enforcement, or related activities, the hours such individuals was employed by such separate and independent employer may be excluded by the public agency employing such individual in the calculation of the hours for which the employee is entitled to overtime compensation under this section if the public agency—

"(A) requires that its employees engaged in fire protection, law enforcement, or security activities be hired by a separate and independent employer to perform the special detail,

"(B) facilitates the employment of such employees by a separate and independent employer, or

"(C) otherwise affects the conditions of employment of such employees by a separate and independent employer.".

(b) OCCASIONAL OR SPORADIC EMPLOYMENT.—Section 7(q) (29 U.S.C. 207), as added by subsection (a), is amended by adding at the end the following:

"(2) If an employee of a public agency which is a State, political subdivision of a State, or an interstate governmental agency undertakes, on an occasional or sporadic basis and solely at the employee's option, part-time employment for the public agency which is in a different capacity from any capacity in which the employee is regularly employed, the hours such employee was employed in performing the different employment may be excluded by the public agency in the calculation of the hours for which the employee is entitled to overtime compensation under this section.".

(c) SUBSTITUTION.—(1) Section 7(p) (29 U.S.C. 207), as amended by subsection (b), is amended by adding at the end the following:

"(3) If an individual who—

Is employed by a public agency which is a State, political subdivision of a State, or interstate government agency,

agrees, with the approval of the public agency and solely at the option of such individual, to substitute during scheduled work hours for another individual who is employed by such agency in the same activities, the hours such employee worked as a substitute may be excluded by the public agency in the calculation of the hours for which the employee is entitled to overtime compensation under this section.".

(2) Section 11(c) (29 U.S.C. 211(c)) is amended by adding at the end the following: "The employer of an employee who performs substitute work described in section 7(p)(4) may not be required under this subsection to keep a record of the hours of the substitute work.".

VOLUNTEERS

SEC. 4. (a) DEFINITION.—Section 3(e) (29 U.S.C. 203(e)) is amended—

(1) by striking out "paragraphs (2) and (3)" in paragraph (1) and inserting in lieu thereof "paragraphs (2), (3), and (4)", and

(2) by adding at the end the following:

"(4)(A) The term 'employee' does not include any individual who is a volunteer for a public agency which is a State, a political subdivision of a State, or an interstate governmental agency, if (i) the individual receives no compensation or is paid expenses, reasonable benefits, or a nominal fee to perform the services for which the individual volunteered and (ii) such services are not the same type of services which the individual is employed to perform for such public agency.

"(B) An employee of a public agency which is a State, political subdivision of a State, or an interstate governmental agency may volunteer to perform services for any other State, political subdivision, or interstate governmental agency, including a State, political subdivision or agency with which the employing State, political subdivision, or agency has a mutual aid agreement.".

(b) REGULATIONS.—Not later than March 15, 1986, the Secretary of Labor shall issue regulations to carry out paragraph (4) of section 3(e) (as added by subsection (a) of this section).

(c) CURRENT PRACTICE.—If before April 15, 1986, the practice of a public agency was to treat certain individuals as volunteers, such individuals shall until April 15, 1986, be considered, for purposes of the Fair Labor Standards Act of 1938, as volunteers and not as employees. No public agency which is a State, a political subdivision of a State, or an interstate governmental agency shall be liable for a violation of section 6 occurring before April 15, 1986, with respect to services deemed by that agency to have been performed for it by an individual on a voluntary basis.

STATE AND LOCAL LEGISLATIVE EMPLOYEES

SEC. 5. Clause (ii) of section 3(e)(2)(C) (29 U.S.C. 203(e)(2)(C)) is amended—

(1) by striking out "or" at the end of subclause (III),

(2) by striking out "who" in subclause (IV),

(3) by striking out the period at the end of subclause (IV) and inserting in lieu thereof ", or", and

(4) by adding after subclause (IV) the following:

"(V) is an employee in the legislative branch or legislative body of that State, political subdivision, or agency and is not employed by the legislative library of such State, political subdivision, or agency.".

EFFECTIVE DATE

SEC. 6. The amendments made by this Act shall take effect April 15, 1986. The Secretary of Labor shall before such date promulgate such regulations as may be required to implement such amendments.

EFFECT OF AMENDMENTS

SEC. 7. The amendments made by this Act shall not affect whether a public agency which is a State, political subdivision of a State, or an interstate governmental agency is liable under section 16 of the Fair Labor Standards Act of 1938 for a violation of section 6, 7, or 11 of such Act occurring before April 15, 1986, with respect to any employee of such public agency who would have been covered by such Act under the Secretary of Labor's special enforcement policy on January 1, 1985, and published in section 775.3 of title 29 of the Code of Federal Regulations.

DISCRIMINATION

SEC. 8. An employee of a public agency who asserts coverage under the Fair Labor Standards Act of 1938 between February 19, 1985, and April 14, 1986, shall be accorded the same protection against discharge or discrimination as is available under section 15(a)(3) of the Fair Labor Standards Act of 1938.

The title was amended so as to read:

"A bill to amend the Fair Labor Standards Act of 1938 to provide rules for overtime compensatory time off for certain public agency employees, to clarify the application of that Act to volunteers, and for other purposes.".

Mr. METZENBAUM. I move to reconsider the vote by which the bill was passed.

Mr. NICKLES. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

STATE, JUSTICE AND COMMERCE, THE JUDICIARY AND RELATED AGENCIES APPROPRIATIONS, 1986

The Senate continued consideration of the bill.

The PRESIDING OFFICER. The question now occurs on the committee amendment to H.R. 2965.

The Senator from New Hampshire.

Mr. RUDMAN. Mr. President, I am first going to tell my colleagues what we are facing this evening. We are going to have, possibly, five rollcall votes unless there is a possibility that some of the amendments will be accepted thus ending rollcall votes.

Second, I want to say that we have an agreement of an informal nature to keep debate relatively short on all of these amendments. It is the intention of the managers to move first to an amendment—because we think it would be most efficient—to be offered by the Senator from North Carolina [Mr. HELMS] and the Senator from Colorado [Mr. ARMSTRONG] which relates to abortions in Federal prisons. I want to make it clear that the Senator from North Carolina has been most cooperative in saying that he would offer that amendment any time we wish and would be willing to agree to an informal time agreement or a formal one.

I suggest to my distinguished friend from South Carolina that it would be better if we had an informal agreement, because to get a unanimous-consent agreement cleared at this time might take more time than we have. And I inquire of both my friend from South Carolina and my colleague and friend from Ohio whether or not they believe we might be able to agree to an informal arrangement of about 20 minutes equally divided.

Mr. HOLLINGS. We do have on this side an amendment by the Senator from New York [Mr. MOYNIHAN], an amendment by the Senator from New Jersey [Mr. LAUTENBERG], an amendment by the distinguished Senator from Illinois [Mr. DIXON], and one other one, but let me yield to the distinguished Senator from Ohio.

Mr. METZENBAUM. I would like to suggest to the distinguished manager of the bill that rather than an informal agreement, which I could not agree to, either as an informal or formal agreement, it might be more appropriate for the Senator from New Hampshire to offer a tabling motion which achieves the same objective in that it brings the matter to a close, but I could not agree to a time agreement.

Mr. RUDMAN. I want to say to my friend from Ohio, obviously you cannot get anything formally agreed so I was not suggesting anybody agree to it. I was simply suggesting informally that is precisely what I intended to do, I hope, that both sides would find 10 minutes would be agreeable prior to that motion. I do not see the Senator from North Carolina on the floor.

Mr. HOLLINGS. Mr. President, the distinguished Senator from Illinois has an amendment relative to the personnel within embassies. His amendment admonishing the Department of State to use American nationals in these secure positions. I am looking at this amendment in the light of the Leahy-Cohen initiative about proportionately bringing down the number between the Soviet Embassy, and particularly the international facilities, and ours in the Soviet Union itself.

I yield to the distinguished Senator from Illinois.

The PRESIDING OFFICER. The Senator from Illinois.

AMENDMENT NO. 882

Mr. DIXON. Mr. President, I offer an amendment and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report the amendent.

The assistant legislative clerk read as follows:

The Senator from Illinois [Mr. DIXON] proposes an amendment numbered 882.

Mr. DIXON. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

SECTION . (a) The Congress finds that:

(1) there are more than 200 Soviet nationals employed at U.S. diplomatic posts in the Soviet Union;

(2) State Department officials have confirmed that most, if not all, of the Soviets report to the KGB in one way or another;

(3) retaining Soviets to work in our mission is an invitiation to easy espionage;

(4) the reports of radically increased Soviet use of the chemical compound NPPD, a known cancer causing agent, which is used to track Americans are alarming;

(5) NPPD may jeopardize the health and well-being of our diplomatic personnel and their families in the Soviet Union;

(6) the United States must strive continually to safeguard our foreign service officers and their dependents;

(7) Soviet citizens employed at our diplomatic posts in the Soviet Union pose greater risks to our national security than American citizens would; and

(8) reliable reports assert that Secretary of State Shultz endorses a plan to replace Soviets with Americans.

(b) it is the sense of the Congress that:

(1) the State Department should take steps to improve security and protect American lives at our Soviet missions by replacing the maximum number of Soviet citizens possible with Americans, at the earliest available opportunity; and

(2) the employment of a reduced number of Soviet nationals should be continued only if:

(A) such Soviet nationals do not pose a significant threat to the security of the United States;

(B) the employment of such Soviet nationals is necessary to provide usual and customary services to United States nationals, and the employment of a United States national as a replacement for such Soviet national would reduce to a significant extent the efficiency of operations at a United States diplomatic mission or consular post; or

(C) such Soviet nationals are employed in an occupation which precludes entry into the facilities of a United States diplomatic mission or consular post in the Soviet Union.

Mr. DIXON. My amendment is very simple, Mr. President. It states the sense of the Congress that the State Department should take steps to improve security and protect American lives at our Soviet missions by, among other things, replacing Soviet citizens with Americans at the earliest available opportunity.

There are more than 200 Soviet citizens working in our Moscow Embassy, and the State Department has confirmed that most, if not all, report to the KGB in one way or another. Most of the Soviets are in a position to spy on our diplomatic corps on a daily basis.

I am worried about that, Mr. President, and I think something needs to be done.

Hiring Soviets to work in our Embassy is an invitation to easy espionage. What really irritates me is the fact that the Soviets, as a general rule, do not hire Americans to work at their Washington and San Francisco missions. I believe it's about time we start playing the game by the same rules.

I am also alarmed by revelations of stepped-up Soviet use of the chemical compound NPPD, a tracking agent used on individuals under KGB surveillance. This chemical is a known cancer-causing agent, and it may jeopardize the health and well-being of our diplomatic personnel in the Soviet Union.

The United States asks a great deal from its Foreign Service officers. But, Mr. President, it is certainly a matter of extreme concern when KGB methods place American Foreign Service officers and their dependents at a significant health risk. And this is exactly what has happened in Moscow.

For these reasons, I offer this amendment today. In case anyone believes I intend to tie the Secretary's hands in knots with this amendment, let me state as plainly as I can—it just isn't so. First of all, a recent article in the New York Times states that the Secretary personally approved a plan to replace Soviets with Americans some months ago. Second of all, my amendment merely states the sense of the Congress—it doesn't force action on legal grounds. Third, the amendment specifically creates three different exemptions from the "hire American" policy:

If the Soviet citizen does not pose a significant threat to American security;

If the Soviet employee is necessary to provide usual and customary services to Americans, and an American replacement would greatly reduce efficiency at the Embassy; or,

If the Soviet worker is engaged in an occupation which precludes his or her entry into American diplomatic and consular missions in the Soviet Union.

There are probably more than 200 Soviet agents employed in our diplomatic mission in Moscow. This represents a threat to our national security, and it's a situation we should avoid. I believe we must focus more attention on Embassy security in the Soviet Union and Eastern-bloc nations. Several weeks ago, I introduced legislation, S. 1630, which is almost identical to this amendment, to do just that. We must pay greater attention to our Embassy security in Eastern-bloc nations. Reducing Soviet accessibility to American diplomatic and consular missions represents a step in the right direction.

Mr. President, this amendment has been cleared on both sides, with the majority and minority managers.

The PRESIDING OFFICER. The question occurs on the amendment.

Mr. RUDMAN. Mr. President, the amendment offered by the Senator from Illinois is acceptable on this side, I understand it has been cleared on the other side as well.

Mr. HOLLINGS. It has been cleared.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 882) was agreed to.

Mr. RUDMAN. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. HOLLINGS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 883

Mr. McCLURE. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report the amendment.

The assistant legislative clerk read as follows:

The Senator from Idaho [Mr. McCLURE] proposes an amendment numbered 883.

Mr. McCLURE. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Add at the end of the bill the following new Section:

"SEC. . (a) Since: the Communist government of the Union of Soviet Socialist Republics since it seized power in Russia on November 7, 1917, has never submitted its rule to the consent of the governed through free elections; has designated the anniversary of this seizure "Revolution Day" as a national holiday; has held power since November 7, 1917 only through unrestrained secret police terror, and an extensive network of forced labor Gulag camps; denies its subject Peoples the most basic human rights of free speech, free religion, free press, free assembly, free personal movement, and personal property; this Soviet repression has cost the Peoples of the Soviet Union tens of millions of deaths and has resulted in great damage to the culture, religion, and material well being of these Peoples; this repression violates the Universal Declaration of Human Rights and the 1975 Helsinki Final Act; the Soviet Union is actively seeking to subject other countries to the Communist system and is currently waging a genocidal war to subjugate the people of Afghanistan, making use of the most inhumane weapons of scientific barbarism against defenseless civilians, including the use of toxin weapons the possession of which is outlawed by international conventions to which the USSR is a signatory.

(b) Since: inexplicably, the annual "Revolution Day" message from the United States State Department on behalf of the American People congratulates the Communist Government of the USSR on its violent and undemocratic seizure of power on the anniversary of November 7, 1917; the annual message also congratulates the people of the Soviet Union on their ruler's seizure of power; such U.S. congratulations are displayed before the Soviet Peoples as a demonstration of the legitimacy of the Bolshevik Government in the eyes of the Democratic government of the United States of America and are perceived as the cruelest mockery of these Peoples:

(c) None of the funds appropriated by this Act shall be used in any fashion or manner whatsoever to continue the practice of the Department of State of congratulating or in any way referring to such an anniversary as a holiday or cause for celebration, the Soviet Union, the Communist Party of the Soviet Union, or the People of the Soviet Union on the anniversary of the Communist Revolution of 1917; provided further that the amounts appropriated by this Act for the Department of State shall be reduced by 10 percent on November 4, 1985 unless the Secretary of State shall have submitted before the date of enactment of this Act a report describing his plan for proclaiming the sympathy of the American People for the bondage of the enslaved Peoples of the Soviet Empire and the hope that they will soon recover their freedom and national integrity."

Mr. McCLURE. Mr. President, the U.S. State Department annually congratulates the Soviet Government and its captive peoples on the anniversary of the Communist seizure of power in Russia on November 7, 1917. This "Revolution Day" congratulation is made over the President's signature, and on behalf of the American people. But because the captive Soviet peoples have little to celebrate, it is totally inappropriate for the State Department to congratulate them or to help celebrate the Bolshevik Revolution.

The Soviet Government has never submitted its rule to the consent of the governed in free election. Since 1917, it has relied on secret police terror and forced labor Gulag camps to stay in power. It has killed millions of its subjects. A 1971 Senate Judiciary Committee Report entitled "The Human Cost of Soviet Communism," by the respected British historian Robert Conquest estimated a death toll of "nearly 35 million human lives as a minimum estimate and 45 million as a more probable estimate." Solzhenitsyn has estimated a total of 66 million murdered by the Soviet Communists since 1917. Today, nothing has changed. The Kremlin conducts a genocidal war in Afghanistan; it behaves as an international outlaw by attempting to assassinate the Pope and by shooting down KAL-007.

Why should the State Department consider the anniversary of the 1917 Bolshevik Revolution a matter for congratulation or celebration? How do the captive peoples of the U.S.S.R. react to the State Department's annual message of congratulation? Vladimir Bukovsky believes these cheers from the State Department are comparable to sending Jews congratulations on the anniversary of the founding of Hitler's Third Reich. Such congratulations are perceived as a cruel mockery by those peoples who resist, suffer, and perish at the hands of the barbarous Soviet totalitarian regime.

Mr. President, this amendment requires the State Department to stop congratulating the enslaved peoples of the Soviet Union on the anniversary of their bondage. The amendment instead requires a message to the Soviet peoples expressing the hopes of the American people for their eventual freedom. I urge my colleagues to support my amendment.

The amendment has been discussed with the managers on both sides of the aisle. I know of no objection to the amendment.

Mr. RUDMAN. Mr. President, we have looked at the language and find it agreeable.

Mr. DANFORTH. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. DANFORTH. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. RUDMAN Mr. President, I ask for consideration of the pending amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 883) was agreed to.

Mr. RUDMAN. I move to reconsider the vote by which the amendment was agreed to.

Mr. McCLURE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. RUDMAN. Mr. President, I would now ask unanimous consent that the pending committee amendment be temporarily laid aside for the purposes of an amendment to be offered, I understand, by the Senator from North Carolina.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 884

Mr. HELMS. Mr. President, I thank the distinguished manager of the bill, I thank the Chair, and I send to the desk an amendment and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report the amendment.

The assistant legislative clerk read as follows:

The Senator from North Carolina [Mr. HELMS] proposes an amendment numbered 884.

Mr. HELMS. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 24, between lines 21 and 22, insert the following:

"SEC. . None of the funds appropriated under this Act shall be used to pay for abortions for which Federal funds are not available under the Medicaid program (title XIX of the Social Security Act).".

Mr. HELMS. Mr. President, this amendment is cosponsored by the distinguished Senator from Colorado [Mr. ARMSTRONG].

This amendment adds a restriction against using funds appropriated under this bill for abortions. It is necessary because the Bureau of Prisons, under the jurisdiction of the Attorney General and the Justice Department, is now funding abortions among the inmates without any congressional restrictions.

In other words, the taxpayers are paying for abortion on demand in the Federal prison system.

Mr. President, this problem was brought to my attention when I received a letter from a constituent complaining about the abortion practices of the Bureau of Prisons. In light of past congressional action to stop Federal funding of abortion, I was surprised to learn that such funding was still going on.

According to information provided my office by the Medical Director of the Federal prison system, Dr. Robert L. Brutsché, abortions have been provided in Federal prisons as follows:

	Abortion elective	Spontaneous or therapeutic
Fiscal year:		
1984	33	8
1983	41	7
1982	21	5
1981	21	5
1980	14	9

It is further my understanding that for fiscal year 1985 the figures are not complete, but that incomplete figures indicate 37 elective abortions and 8 spontaneous or therapeutic abortions.

Mr. President, this classification is a little bit odd in that spontaneous abortions are lumped in with procured abortions. Obviously, spontaneous abortions, or miscarriages, are not the concern of those of us in Congress alarmed over the tax-funding of direct, procured abortion.

Mr. President, the Bureau of Prisons needs to be brought into conformity with the rest of the Federal Government on this matter of tax-funding of abortions. In the Medicaid Program, in health insurance for Federal employees, and in other areas, Congress has firmly established the principle that U.S. taxpayers are not going to be forced to pay for the deliberate termination of innocent human life with their tax dollars.

It is no less important that this principle apply in prisons than that it apply elsewhere. In every case, what is at stake is the same: an innocent unborn child with a God-given right to life.

Mr. President, the precise form of my amendment is as follows:

None of the funds appropriated under this Act shall be used to pay for abortions for which Federal funds are not available under the Medicaid program (title XIX of the Social Security Act).

This language has the effect of incorporating by reference the Hyde amendment which governs abortion funding restrictions under Medicaid.

Mr. President, the Hyde amendment has been the law since 1981 and was unanimously agreed to by the Senate on October 21 in connection with consideration of the Labor-HHS-Education appropriations bill for fiscal year 1986, H.R. 3424. I am hopeful that my pending amendment, incorporating this same Hyde amendment, will meet with similar approval today.

Mr. President, as someone who has taken an active interest in this Hyde amendment over the years, I now offer a few comments on it. These comments apply with equal force to the pending amendment inasmuch as it incorporates the Hyde amendment.

The motivation for the Hyde amendment—on the part of Congressman HYDE, myself, and others—has been a recognition that abortion takes the life of a living unborn child with a God-given right to life. Accordingly, our purpose has been and is to make sure that Federal taxpayers are never forced to participate with their tax dollars in the crime of taking innocent human life.

In the early years of the Hyde amendment debates, we were not successful—or we were only partially successful—in persuading Congress to go along with our view. Since June 1981 and the enactment of Public Law 97-12, however, we have been successful, and Congress has adopted the Hyde amendment undiluted.

This undiluted Hyde amendment language is the same as the language the Senate adopted on October 21 in connection with consideration of H.R. 3424. It is as follows:

None of the funds contained in this Act shall be used to perform abortions except where the life of the mother would be endangered if the fetus were carried to term.

Our specific intent in offering this language was and is to stop all taxpayer funding for abortion. At the same time, however, we have never sought to bar funding of medical procedures necessary to save the life of the mother where bona fide, physical life-threatening conditions occur in connection with pregnancy. That is why the exception clause has been included since 1981.

Given our general purpose and specific intent, the application of the Hyde amendment should always proceed on the basis that with every pregnancy there are two human lives involved, the mother and her unborn child—or fetus. "Child" and "fetus" are taken as being synonymous. Therefore, if exceptional cases occur where funding would be permitted, it is important that every reasonable effort be made to preserve not only the mother's life but also that of her unborn child. In other words, authorizing the funding of medical procedures to save the mother's life is not intended to sanction abandonment of the unborn child. In keeping with the principles embodied in the Hyde amendment, equal care should be extended to both the mother and child.

Mr. President, it is by no means clear that the Hyde amendment has been applied by the Department of Health and Human Services since 1981 with these understandings. I am hopeful that this situation will change, and that the Justice Department, should this amendment become law, will strictly enforce the Hyde amendment ab initio.

With respect to the life of the mother exception, we should not overlook the fact that with advances in modern obstetrics the cases of bona fide, physical life-threatening conditions for a mother in connection with her pregnancy are exceedingly rare.

Mr. President, I urge adoption of this amendment.

Mr. President, I yield to the Senator from Colorado.

The PRESIDING OFFICER. The Senator from Colorado.

Mr. ARMSTRONG. Mr. President, there are many complex legal and cultural issues which swirl around the whole abortion controversy, but it seems to me that there is one central question. The central issue is whether or not the fetus is a living human being, a living though yet unborn human baby. That is the central question.

Over the years, a lot of Senators and others have wandered in and out of various intellectual cul de sacs, trying to explore legal issues. Whether you are for or against the Supreme Court, there are a handful of Senators, especially the Senator from North Carolina, who have consistently focused on the main question: it is a human life or is it not?

I congratulate the Senator from North Carolina for once again taking the lead in attempting to close one more loophole which has permitted Federal funding to be used for this surgical procedure which Congress has rightly and wisely decided should not be our normal practice.

The issue is simply one of human life. I think there are few who believe the fetus is a baby who object to legal protection for the unborn child. While recognizing the very strong presumption against interfering with the privacy and right of personal choice of individual women, few persons, perhaps none in this Chamber, who acknowledge the fetus is a baby would nonetheless object to legal protection for the unborn child. If, as advocates of antiabortion legislation contend, a fetus is a human being, it is very hard, it seems to me—impossible, logically—to dispute the claim that an unborn child is entitled to the same human compassion and legal protection afforded other human beings, particularly helpless and dependent humans.

Mr. President, that is the issue. It is an issue which the Senate has often considered before and wisely decided that we do not want to be in the business of funding the termination of human life.

So, Mr. President, as the evidence continues to mount—the moral evidence, the scientific evidence, the conviction in the human hearts of increasing numbers of people around the country—that it is wrong to perform abortions in almost all circumstances, perhaps in some rare circumstances, that it is morally wrong, it follows naturally that Congress would find increasingly that it is unwise and improper to fund abortions with taxpayer dollars.

I compliment the Senator from North Carolina for his amendment.

Prochoice advocates oppose antiabortion legislation because of their concern for the freedom of choice of the woman and, in most instances, precisely because they deny the humanity of the fetus which they view as prehuman or as having human potential. They do not agree that a fetus is a true human being in the normal sense and, therefore, they deny that the fetus, or unborn child, as prolife persons prefer to say, is entitled to either the compassion or legal protection accorded to true human beings.

To a large extent, the Supreme Court sidestepped this issue when it struck down State antiabortion statutes in the case of Roe against Wade. In that decision, the Court ruled that the 14th amendment right of personal privacy precludes the State from interfering with a woman's right to terminate pregnancy through abortion. The Court indicated that a fetus is not a "person" within the meaning of the 14th amendment and is, therefore, not entitled to constitutional protections. Significantly, however, the Court did not attempt to determine the humanity of the fetus nor to define when human life begins. The Court characterized this issue as "sensitive and difficult" and noted "wide divergence of thinking" on this question and that the judiciary "is not in a position to speculate as to the answer."

But for individual persons who must decide the moral permissibility of abortion and for the Congress, faced with a momentous policy issue, this fundamental question may not be avoided.

The exact instant at which life begins remains the subject of some disagreement. Not everyone would agree with Prof. Hymie Gordon, chairman of the Department of Medical Genetics at the Mayo Clinic who stated: "The question of when human life begins is an established fact. All life, including human life, begins at the moment of conception." However, it does appear that the great preponderance of evidence, as well as expert testimony and opinion, support Professor Gordon's view.

Dr. Francis A. Schaeffer, a leading philosopher and theologian, and Dr. C. Everett Koop, U.S. Surgeon General and well-known author in the field of medical ethics, have persuasively summarized the life-begins-at-conception argument:

THE GROWTH OF HUMAN LIFE

Our reasons against abortion are logical as well as moral. It is impossible for anyone to say when a developing fetus becomes viable, that is, has the ability to exist on its own. Smaller and smaller premature infants are being saved each year! There was a day when a 1000-gram preemie had no chance, now 50 percent of preemies under 1000 grams are being saved. Theoretically, there once was a point beyond which technology could not be expected to go in salvaging premature infants—but with further technological advances, who knows what the limits may be! The eventual possibilities are staggering.

The logical approach is to go back to the sperm and the egg. A sperm has twenty-three chromosomes; even though it is alive and can fertilize an egg, it can never make another sperm. An egg also has twenty-three chromosomes, and it can never make another egg. Thus, we have sperm that cannot reproduce and eggs that cannot reproduce unless they get together. Once the union of a sperm and an egg occurs and the twenty-three chromosomes of each are brought together into one cell that has forty-six chromosomes, that one cell has all the DNA (the whole genetic code) that will, if not interrupted, make a human being.

Our question to a pro-abortion doctor who would not kill a newborn baby is this: "Would you then kill this infant a minute before he was born, or a minute before that, or a minute before that, or a minute before that?" At what point in time can one consider life to be worthless and the next minute precious and worth saving?

Having already mentioned the union of sperm and egg to give forty-six chromosomes, let us briefly review the development of a baby. At twenty-one days, the first irregular beats occur in the developing heart, long before the mother is sure she is pregnant. Forty-five days after conception, electroencephalographic waves can be picked up from the baby's developing brain.

By the ninth and tenth weeks, the thyroid and the adrenal glands are functioning. The baby can squint, swallow, and move his tongue. The sex hormones are already present. By twelve or thirteen weeks, he has fingernails; he sucks his thumb and will recoil from pain. His fingerprints, on the hand which have already formed, will never change throughout his lifetime except for size. Legally, it is understood that an individual's fingerprints distinguish him as a separate identity and are the most difficult characteristic to falsify.

In the fourth month the growing baby is eight to ten inches long. The fifth month is a time of lengthening and strengthening. Skin, hair, and nails grow. Sweat glands come into being; oil glands excrete. This is the month in which the mother feels the infant's movements.

In the sixth month the developing baby responds to light and sound. He can sleep and awaken. He gets hiccups and can hear the beat of his mother's heart. Survival outside the womb is now possible. In the seventh month the nervous system becomes much more complex. The infant is about sixteen inches long and weighs about three pounds. The eighth and ninth months see a fattening of the baby.

We do not know how anyone who has seen the remarkable films of the intrauterine development of the human embryo can still maintain that the product of an abortion consists of just some membranes or a part of the woman's body over which she has complete control—or indeed anything other than a human life within the confines of a tiny body. At the very least we must admit that an embryo is not simply an extension of another person's body; it is something separate and uniquely irreplaceable. Another good reason we should not view the unborn baby as an extension of the woman's body is that it did not originate only from the woman. The baby would not exist without the man's seed.

We are convinced that the reason the Supreme Court decision for abortion-on-demand never came to grips with the issue of the viability of the human fetus is that its viability (that is, ability to live outside the womb on its own) is really not the important point.

Viable or not, the single-celled fertilized egg will develop into a human being unless some force destroys its life. We should add that biologists take the uniform position that life begins at conception; there is no logical reason why the pro-abortionist should try to arrive at a different definition when he is talking about people, the highest form of all biological creatures. After conception, no additional factor is necessary at a later time. All that makes up the whole adult is present as the ovum and the sperm are united—the whole genetic code!

The reasoning of Dr. Schaeffer and Dr. Koop seems to me not only solid and convincing but also directly pertinent to the Roe against Wade decision. In that case, the Court held that only a "compelling State interest" could justify limiting a woman's 14th amendment right to abortion. The "compelling" point with respect to the State's interest in the potential life of the fetus "is at viability." Following viability, the State's interest permits it to regulate and even proscribe an abortion except when necessary, in appropriate medical judgment, for preservation of the life or health of the mother.

The Schaeffer-Koop observations about medical viability are especially impressive in view of Dr. Koop's vast experience and expertise. He is the former surgeon-in-chief of the Children's Hospital in Philadelphia where the entire surgical center is named in his honor. A pacesetter in the field of pediatric surgery, Dr. Koop has developed many new and highly successful procedures in surgery on the newborn. He is a well-known author in the field of medical ethics and the founder and editor-in-chief of the Journal of Pediatric Surgery.

If doubt yet remains, the strong pro-life presupposition of heritage strenuously argues for resolving doubt in favor of caution and restraint when human life is at stake. And so on this point I must agree with the Schaeffer-Koop observation that:

We do not know how anyone who has seen the remarkable films of the intrauterine development of the human embryo can still maintain that the product of an abortion consists of just some membranes or a part of the woman's body over which she has conplete control—or indeed anything other than a human life within the confines of a tiny body.

In brief, Mr. President, it is plain to me that a fetus is a human life and that willful termination of that life, except under compelling circumstances to the contrary is per se, morally wrong. Whether or not it is a proper subject for legislation, however, is an entirely separate question which I would like to briefly address at this time.

Recognizing the great diversity of our Nation and the divergence of opinion about this controversial issue, as well as our longstanding tradition of State jurisdiction in such matters, a strong case can be made against Federal intrusion in his area. Our Federal system leaves to the States vast areas of complete independence. The States define, adjudicate and punish most crimes; protect the safety, welfare, and property of their citizens; establish licensing standards for physicians, lawyers, and other professional persons; regulate health and provide education. Indeed, the States provide the legal framework within which most of life's day-to-day activity takes place, More to the point, State law, not national law, governed abortion until the Roe against Wade decision of 1973.

Unfortunately, however, Roe against Wade has precisely the effect of overruling the States and recasting the abortion controversy as a truly national issue for the first time. On purely legal grounds, the Supreme Court's decision is highly questionable. In his dissent, Justice White termed the Court's action "an exercise in raw judicial power" and "an improvident and extravagant exercise of the power of judicial review." Pointing out the impropriety of overturning long standing State statutes, as a matter of constitutional interpretation, Justice White observed:

At the heart of the controversy in these cases are those recurring pregnancies that pose no danger whatsoever to the life or health of the mother but are nevertheless unwanted for any one or more of a variety of reasons—convenience, family planning, economics, dislike of children, the embarrassment of illegitimacy, etc. The common claim before us is that for any one of such reasons, or for no reason at all, and without asserting or claiming any threat to life or health, any woman is entitled to an abortion at her request if she is able to find a medical advisor willing to undertake the procedure.

The Court for the most part sustains this position: During the period prior to the time the fetus becomes viable, the Constitution of the United States values the convenience, whim or caprice of the putative mother more than the life or potential life of the fetus; the Constitution, therefore, guarantees the right to an abortion as against any state law or policy seeking to protect the fetus from an abortion not prompted by more compelling reasons of the mother.

With all due respect, I dissent. I find nothing in the language or history of the Constitution to support the Court's judgment. The Court simply fashions and announces a new constitutional right for pregnant mothers and, with scarcely any reason or authority for its action, invests that right with sufficient substance to override most existing State abortion statutes. The upshot is that the people and the legislatures of the 50 States are constitutionally disentitled to weigh the relative importance of the continued existence and development of the fetus on the one hand against a spectrum of possible impacts on the mother on the other hand. As an exercise of raw judicial power, the Court perhaps has authority to do what it does today; but in my view its judgment is an improvident and extravagant exercise of the power of judicial review which the Constitution extends to this Court.

The Court apparently values the convenience of the pregnant mother more than the continued existence and development of the life or potential life which she carries. Whether or not I might agree with that marshalling of values, I can in no event join the Court's judgment because I find no constitutional warrant for imposing such an order of priorities on the people and legislatures of the States. In a sensitive area such as this, involving as it does issues over which reasonable men may easily and heatedly differ, I cannot accept the Court's exercise of its clear power of choice by interposing a constitutional barrier to state efforts to protect human life and by investing mothers and doctors with the constitutionally protected right to exterminate it. This issue, for the most part, should be left with the people and to the political processes the people have devised to govern their affairs.

Many legal scholars share Justice White's skepticism about Roe against Wade. But whatever one may think of the legal scholarship on which this decision rests, it remains the law of the land. With the States preempted, what was formerly an issue of State jurisdiction must now be considered at the national level even for the minimal purpose of restoring State jurisdiction by overturning Roe against Wade. This is exactly the purpose of Senate Joint Resolution 3.

A second objection to antiabortion legislation is the oft-repeated contention "you can't legislate morality." At one level, this notion is demonstrably true. Human nature does not seem to change from one millennia to the next; despite legislative intervention, character flaws which humans exhibit today are not noticeably different from those observed at the dawn of history.

Nonetheless, the purpose of much legislation is precisely to make moral judgments—in effect, to legislate morality. Laws are the means by which civilized societies protect and foster that which is right and forbid what is wrong. Underlying legal prohibitions against murder, theft, fraud, and perjury are moral judgments. It is the collective decision of society that such actions are wrong. Murder, fraud, perjury, and the like are deemed not merely inconvenient, untimely, or useless, but actually wrong in the sense that they violate fundamental principles upon which our civilization rests.

As Russell Kirk points out:

At the heart of every culture is a body of ethics, of distinctions between good and evil.

Within the Judeo-Christian heritage, the sanctity of life is among the foremost of values cherished by civilized persons and nations. Protection of human life has traditionally been recognized as one of the paramount functions of government within a civilized society. Indeed, history largely judges prior civilizations by the extent to which human life is valued and protected.

Nonetheless, critics who contend that "you can't legislate morality" have a point. The human impulse to

brutalize and exploit other human beings remains just below the surface in even the most civilized persons and societies.

What is significant, however, is the extent to which wise legislation can curb the expression of such impulses. Legislation implementing moral judgments ended slavery, protect freedom of speech, publication, and worship, assure voting rights, and so forth.

This is not to say that every moral judgment ought to be the subject of legislation. On the contrary, Congress and the States are wise to exercise restraint in making fundamental changes based on moral judgments.

Moral issues are, by their very nature, highly emotional. Debates that disturb the spiritual and ethical foundations of a person's concept of the purpose and meaning of life arouse powerful passions, and it is our experience that decisions reached in highly emotional circumstances are decisions that we frequently regret.

Moreover, moral issues do not readily lend themselves to compromise, which is a distinctive strength of the American system. Our Nation derives much of its resiliency and unity from the very fact that we are able to compromise differences on many issues. Ordinarily, decisions within our political process are not so one-sided that those who are defeated at the polls or in a legislative battle are left utterly without consolation. More commonly, the views of the minority are accommodated, in greater or lesser degree, and there is a general recognition that those who form a political majority today will be in the minority at some future time, thereby fostering an attitude of tolerance and compromise. Obviously, however, it is much easier to work out a compromise on matters of purely practical application, such as budgets and taxes, than on fundamental moral questions about which notions of right and wrong leave less room for conscientious maneuvering.

The need for restraint in implementing moral judgments through legislation is also emphasized by the fact that moral issues often bring fundamental values into conflict. The delicate balance between moral order and personal liberty must be preserved.

Nonetheless, abortion is a proper subject for legislation because of the 15 million or more abortions which have occurred since—and in many instances because of—Roe against Wade are not mere surgical procedures. They are human lives lost. In this perspective, abortion is the greatest human rights issue of our time. I agree with Prof. John T. Noonan's observation:

> Of all the subjects relating to the erosion of the sanctity of human life, abortion is the keystone. It is the first and crucial issue that has been overwhelming in changing attitudes toward the value of life in general.

This amendment represents another in a series of steps toward restricting Federal funding for abortions. It is in my opinion a commendable restriction. I urge adoption of the amendment.

In conclusion, I wish to acknowledge my gratitude to the literally thousands of persons throughout Colorado, and others as well, who have shared their views with me. This is an issue about which thoughtful persons do not agree. And because of its sensitivity, the prospect of abortion legislation tests the intellectual humility and patience of all who care deeply about the outcome. I am gratified that the vast majority of those with whom I have had contact about this matter have expressed their opinions in a serious and dispassionate manner and in a way that is respectful of differing opinions. I have tried to explain my own thinking in the same spirit.

Mr. METZENBAUM. Mr. President, earlier today I indicated that I thought we had enough abortion amendments over the past several years. Just as a matter of curiosity, I had a study made today, and I found that since the 95th Congress, we have had 431 separate abortion proposals. That is quite a few. Four-hundred and thirty-one in the last 9 years.

It seem to me that there are a few other things that the Senate ought to be addressing itself to besides that issue, notwithstanding the fact that I recognize that many feel that it is a very important issue.

I hope we might dispose of this amendment and any other abortion amendments and get on with the underlying bill.

Mr. RUDMAN. Mr. President, first, I thank my friend from North Carolina for being willing to discuss this in a relatively brief period of time. I know that this is a very important issue to the Senator from North Carolina and the Senator from Colorado. I appreciate their courtesy in being forthcoming and doing nothing to delay this bill.

I do not want to address the issue of abortion here tonight, because this is really a different issue we are facing. I say to the Senator from Colorado and the Senator from North Carolina that in this amendment they are talking about people who are in the custody of the U.S. Government. They are in custody as Federal prisoners.

I submit, without getting into any of the moral issues involved, that there is a long line of Federal cases that absolutely mandate a level of medical care for anyone in Federal custody.

There is no doubt in my mind that since abortion is legal in America, whether you like it or not, a women in Federal custody has a right to receive that abortion from her Government, if she needs it.

We are not dealing with people who have an option. We are not talking about people who are freely living in society who may be denied Federal funds from one program, but can find private funds for such purposes. We are talking about prisoners who have become pregnant, either on furloughs, before they arrived in the prison, or in some cases while in the prison.

Mr. President, this is not a debate over whether or not we are for or against abortion. This is a debate over whether or not we are going to observe the minimum standards that the Federal courts have set forth for the medical care of prisoners.

I do not make general declarations about the constitutionality of an issue; that is up to the Supreme Court. From my experience, however, I say that this is on the thin edge, and in my view may be unconstitutional, but I would not want to make a definitive statement.

Before I make a motion, I yield the floor.

Mr. ARMSTRONG. Mr. President, it would be foolhardy in the extreme for me to position myself to discuss the constitutionality of this legislation or any other legislation with the Senator from New Hampshire. We all know that he is a distinguished lawyer and that he served his State with great distinction in a variety of capacities and is a recognized authority on the law, and I certainly am not. But I know enough about the Supreme Court's attitude toward abortion to recognize that the decision which got us into this jam, the Roe versus Wade decision, was extraordinarily controversial at the time.

One of the most distinguished members of that Court wrote a dissenting opinion in which he described it not only as improvident, but really spoke of it in scathing terms as an unnecessary invasion of the rights of States, which all through history, until a few years ago, had the essential jurisdiction to regulate this surgical procedure.

It is also clear to me that people on and off the Federal bench are having a lot of second thoughts and that what seemed clear-cut a decade ago, even among judges, does not seem so clear-cut anymore.

I do not think it is a certainty at all that this language would be declared unconstitutional. In fact, people who know a lot more about constitutional law and the practices of the appellate courts and the Supreme Court, tell me that the judges are shopping around, looking for an excuse to reverse Roe versus Wade, as well they should, for medical, scientific, moral, and legal reasons.

So I do not think we should wander into another intellectual cul de sac, as I characterized it earlier. This is not primarily a question of constitutional law. It is a question primarily of

whether the Federal Government should be in the business of funding abortions. If you think it is all right, you would vote "no" on this amendment. If you think it is not a good idea, you would vote "yes."

Mr. President, I think the Senator is entertaining the ideas of a tabling motion, but I know of no other Senator seeking recognition, so I say let us proceed to the vote.

I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. RUDMAN. Mr. President, I move to table the amendment.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. RUDMAN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. RUDMAN. Mr. President, I ask for the yeas and nays on the motion to table.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. RUDMAN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The question is on agreeing to the motion of the Senator from New Hampshire [Mr. RUDMAN] to table the amendment of the Senator from North Carolina [Mr. HELMS]. The yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from North Carolina [Mr. EAST], the Senator from Arizona [Mr. GOLDWATER], the Senator from Oregon [Mr. HATFIELD], the Senator from Kentucky [Mr. MCCONNELL], and the Senator from South Dakota [Mr. PRESSLER] are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Missouri [Mr. EAGLETON], the Senator from Illinois [Mr. SIMON], and the Senator from Mississippi [Mr. STENNIS] are necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 46, nays 46, as follows:

[Rollcall Vote No. 255 Leg.]

YEAS—46

Baucus	Hart	Pell
Bentsen	Heinz	Pryor
Bingaman	Hollings	Riegle
Bradley	Inouye	Rockefeller
Bumpers	Kassebaum	Roth
Burdick	Kennedy	Rudman
Byrd	Kerry	Sarbanes
Chafee	Lautenberg	Sasser
Cochran	Leahy	Simpson
Cohen	Levin	Specter
Cranston	Mathias	Stafford
Dodd	Matsunaga	Stevens
Evans	Metzenbaum	Warner
Glenn	Moynihan	Weicker
Gorton	Nunn	
Harkin	Packwood	

NAYS—46

Abdnor	Ford	Mattingly
Andrews	Garn	McClure
Armstrong	Gore	Melcher
Biden	Gramm	Mitchell
Boren	Grassley	Murkowski
Boschwitz	Hatch	Nickles
Chiles	Hawkins	Proxmire
D'Amato	Hecht	Quayle
Danforth	Heflin	Symms
DeConcini	Helms	Thurmond
Denton	Humphrey	Trible
Dixon	Johnston	Wallop
Dole	Kasten	Wilson
Domenici	Laxalt	Zorinsky
Durenberger	Long	
Exon	Lugar	

NOT VOTING—8

Eagleton	Hatfield	Simon
East	McConnell	Stennis
Goldwater	Pressler	

So the motion to lay on the table amendment No. 884 was rejected.

Mr. METZENBAUM. Mr. President, I think we ought to understand what is before us on this measure. We are now discussing the 431st opportunity that the Members of Congress have had to act on an abortion amendment or motion during the last 9 years. It seems to me that anytime you get involved in any one of the host of issues there is a determination that somehow, some way, regardless of what the legislation is, we are going to have another abortion amendment.

Before the evening is over, I expect to share with my colleagues a copy showing some of the amendments which have been offered over the years, and there are many of them. I think you are entitled to know. I want to refresh your recollection. There are plenty of amendments to talk about, 431 in the last 9 years.

It just seems to me that enough is enough.

Mr. HELMS. Mr. President, will the Senator yield?

Mr. METZENBAUM. I yield for a question without losing my right to the floor.

Mr. DOLE. Mr. President, I would like to make an announcement about tomorrow and the weekend.

Mr. METZENBAUM. Mr. President, I certainly yield to the majority leader.

Mr. DOLE. Mr. President, I ask unanimous consent that I might proceed for 5 minutes without the Senator from Ohio losing his right to the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, there will be no more votes this evening, but there will be votes tomorrow and Monday. We tried hard to bring together a group of Senators who were willing to offer amendments on the farm bill tomorrow, but we came up with about 13 on this side and 3 on that side. Most of those on both sides, I might say, were ones that could be disposed of in about 30 seconds each.

It seems to me that if we really want to go to work on the farm bill, we ought to start that tomorrow. I can promise that there will be votes tomorrow.

I would hope you would judge your activities accordingly. We did make a real effort.

I want to thank the distinguished minority leader and the staff on each side. I apologize to those observers who want to go to Geneva. They can still go, of course, but we cannot protect them on votes on tomorrow, Monday, and most of Tuesday. That will be nearly 3 days. Without some agreement to take up meaningful amendments on the agriculture bill, I just do not think the majority leader, with Members on both sides wanting to complete the year as quickly as possible, believes that would be a very good idea.

It also seems to me that we are not going to complete action on this bill tonight so I think the best thing to do is to go home and watch the World Series and come back tomorrow morning.

Mr. BYRD. Mr. President, will the Senator yield to me without the Senator from Ohio losing his right to the floor?

Mr. METZENBAUM. Yes, without losing my right to the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BYRD. Mr. President, as the distinguished majority leader stated, we on this side made a good-faith effort to see if amendments could be brought up tomorrow. The best we could do was as the majority leader stated. I thank my staff for diligently trying to assist. I appreciate very much the majority leader's decision based on the record.

Mr. METZENBAUM. Mr. President, if the majority leader has intentions of recessing at this point until tomorrow, I have no particular desire to speak. I will have plenty of opportunity for that next week.

Mr. DOLE. Mr. President, let me indicate we will come in about 8:30 in the morning and be on the farm bill, hopefully, by 9:30.

ROUTINE MORNING BUSINESS

Mr. DOLE. Mr. President, I ask unanimous consent that there now be a period for the transaction of routine morning business, not to extend beyond the hour of 9:15.

Mr. MOYNIHAN. Mr. President, is it the intention of the majority leader to have further action this evening?

Mr. DOLE. We will not have further action this evening. It seems to me that returning to the bill at this point would be an exercise in futility. I am advised by the distinguished Senator from Ohio that he will talk at length on this bill.

Mr. RUDMAN. Mr. President, will the majority leader yield for a moment?

Mr. DOLE. Yes.

Mr. RUDMAN. Mr. President, I would like to inquire of the Senator from North Carolina and the Senator from Ohio. We do have a number of amendments that we can actually complete action on. The bill cannot be finished tonight. We will eventually go to a conference with the House of Representatives, but at the moment it looks to me like there will be a continuing resolution.

There are some enormously important things in this bill. There are a lot of people who have worked hard on this bill for about 7 months. Everybody has the right to offer amendments. I do not have a problem about that. But I do have a problem about getting more action on this bill.

I wonder if there is some way to get the cooperation of the Senator from North Carolina and the Senator from Ohio where we might be able to lay aside the amendment and accept some other amendments where we will not have rollcall votes.

Mr. HELMS. Mr. President, the Senator will recall that I was willing to have a 10- or 20-minute time limitation on mine.

Let me ask my distinguished friend from Ohio a question. How many times did he say there had been abortion votes in the Senate?

You mentioned some number over a period of years. Would you repeat that?

Mr. METZENBAUM. I said there were 431 amendments or motions having to do with abortions in the last 9 years, according to a computer printout that I have in my possession.

Mr. HELMS. Did the printout have the number of unborn children that have been slaughtered through abortion during the same period?

Mr. METZENBAUM. I thought the Senator from North Carolina had a serious question. Now he has raised it to a point that I do not believe it advisable to answer.

Mr. HELMS. The question I asked was perfectly serious. I thank the Senator.

Mr. DOLE. Mr. President, we have already gone into morning business. We will try to work out something on this bill and bring it up next week. We should be on the farm bill by 9:30 tomorrow morning.

NATIONAL LUPUS AWARENESS WEEK

Mr. DOLE. Mr. President, the week of October 20-26 has been designated as Lupus Awareness Week, and I would like to take this time to call attention to this tragic disease.

WHAT IS LUPUS?

Lupus is an inflammatory autoimmune disease of unknown origin, with unpredictable symptoms that vary in intensity. Little is known about this capricious disease which may disguise itself as a milk skin rash, but often results in death. Although lupus affects more than 500,000 people in the United States, and claims 5,000 lives every year, victims are often misdiagnosed and consequently treated with inappropriate drugs.

THE LUPUS FOUNDATION OF AMERICA

The Lupus Foundation of America, the largest of the national organizations, is dedicated to raising funds for lupus research and educating the public about this disease. Their goal is to address the problems of the lupus patient with understanding, compassion and concern.

THE SUN IS MY ENEMY

Henrietta Aladjem is a founder of the Lupus Foundation, as well as a victim of lupus. In her book, "The Sun Is My Enemy," she recounts her own personal struggle with lupus:

With lupus, you can get worse and then get better without obvious cause . . . there are times when you are the only person who is sure that you are really sick, but don't know what the illness is. You can't name the type of discomforts you are experiencing, and somehow you can't make sense of them to describe them to the doctor. The more you try to explain, the more you feel disturbed . . . you keep struggling against pain, dizziness, nausea and fatigue to maintain your relationship with the world on even a minimal level. If you have a job, you live under the constant fear that you might lose your employment because of poor performance. You worry about your children, your husband or wife, you worry about death and dying. You feel the need to understand your illness, you want to know why you feel the way you do, and you want to find ways to deal with your plight.

THE FUTURE

Fortunately, Ms. Aladjem's disease has been in remission for over 20 years. Yet, there are many others who are still suffering and dying from lupus. Mr. President, I commend the Lupus Foundation of America for its work over the years, and I am hopeful that their efforts will help us to solve the mystery of this dreaded disease.

TRIBUTE TO JACK PARADEE

Mr. ROTH. Mr. President, last Thursday a very special friend of mine, Jack Paradee, died in Wilmington. Jack was not only a representative of the United Transportation Union, he was also someone who helped others overcome their all too human frailties. The night of his death, Jack was responding to the needs of a person recovering from alcoholism, something he had been doing for over 25 years.

During the time he worked on legislation for the UTU, Jack was very effective because he had an intimate knowledge of rail transportation and he knew what was in the best interests of the people who worked in that industry. Whenever I had any questions about how a particular provision would affect the rail workers, Jack had an answer. After his retirement from the UTU in 1982, Jack stayed active in community affairs as well as helping Norfolk Southern Corp. in its effort to purchase Conrail.

Perhaps what will best keep Jack in our thoughts will be his great sense of himself and his marvelous sense of humor. He never looked back and cheerful thoughts were the hallmark of a Jack Paradee conversation.

Many individuals leave their lives little noted and vaguely remembered; but Jack's efforts will endure in such programs as progressive alcohol abuse programs, rail safety, railroad retirement and others. We shall miss him and we offer our condolences to his family and many friends.

MESSAGES FROM THE HOUSE

At 4 p.m., a message from the House of Representatives, delivered by Ms. Goetz, one of its reading clerks announced that the following are appointed as additional conferees in the conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 2419) entitled "An Act to authorize appropriations for fiscal year 1986 for intelligence and intelligence-related activities of the U.S. Government, the Intelligence Community Staff, and the Central Intelligence Agency Retirement and Disability System, and for other purposes": Mr. RODINO and Mr. LUNGREN, for consideration of matters within the jurisdiction of the Committee on the Judiciary under clause 1(m) of House rule X; and Mr. ASPIN, Mr. STRATTON, and Mr. DICKINSON, for consideration of matters within the jurisdiction of the Committee on Armed Services under clause 1(c) of House rule X.

The message also announced that the House has passed the following bill, in which it requests the concurrence of the Senate:

51-059 O-87-17 (Pt. 21)

H.R. 3003. An act to authorize the Secretary of the Interior to convey certain land located in the State of Maryland to the Maryland-National Capital Park and Planning Commission.

At 4:51 p.m. a message from the House of Representatives, delivered by Mr. Berry, one of its reading clerks, announced that the House has passed the following bill, in which it requests the concurrence of the Senate:

H.R. 3605. An act to provide that the authority to establish and administer flexible and compressed work schedules for Federal Government employees be extended through December 31, 1985.

MEASURES REFERRED

The following bill was read the first and second times by unanimous consent, and referred as indicated:

H.R. 3003. An act to authorize the Secretary of the Interior to convey certain land located in the State of Maryland to the Maryland-National Capital Park and Planning Commission; to the Committee on Energy and Natural Resources.

MEASURES PLACED ON THE CALENDAR

The following bill was read the first and second times by unanimous consent, and referred as indicated:

H.R. 3605. An act to provide that the authority to establish and administer flexible and compressed work schedules for Federal Government employees be extended through December 31, 1985.

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC-1907. A communication from the Director of the Defense Security Assistance Agency transmitting, pursuant to law, a report on a foreign military assistance sale to Jordan; to the Committee on Armed Services.

EC-1908. A communication from the Director of the Defense Security Assistance Agency transmitting, pursuant to law, a report on a foreign military assistance sale to Jordan; to the Committee on Armed Services.

EC-1909. A communication from the Chairman of the National Advisory Committee on Oceans and Atmosphere transmitting, pursuant to law, a report entitled "Shipping, Shipyards, and Sealift: Issues of National Security and Federal Support"; to the Committee on Commerce, Science and Transportation.

EC-1910. A communication from the Secretary of Energy transmitting, pursuant to law, the 1985 Automotive Technology Development Program report; to the Committee on Energy and Natural Resources.

EC-1911. A communication from the Special Counsel of the Merit Systems Protection Board transmitting, pursuant to law, a report on allegations of mismanagement, waste of funds, and danger to public safety at the Lower Fort Mason Complex, Golden Gate National Recreation Area, National Park Service, San Francisco, CA; to the Committee on Governmental Affairs.

EC-1912. A communication from the Special Counsel, Merit Systems Protection Board, transmitting, pursuant to law, a report on allegations of a violation of law and regulation, and abuse of authority, by officials at Rock Island Arsenal, IL, to the Committee on Governmental Affairs.

EC-1913. A communication from the Secretary of Labor transmitting, pursuant to law, a report on a change in a Privacy Act system of records; to the Committee on Governmental Affairs.

EC-1914. A communication from the Assistant Secretary of the Interior transmitting, pursuant to law, a proposed plan for the use and distribution of judgment funds awarded the Fort Mojave Indian Tribe; to the Select Committee on Indian Affairs.

EC-1915. A communication from the Secretary of Education transmitting, pursuant to law, final regulations for State grants for strengthening the skills of teachers and instruction in mathematics, science, foreign languages, and computer learning and for increasing the access of all students to that instruction; to the Committee on Labor and Human Resources.

EC-1916. A communication from the Deputy Assistant Secretary of Health and Human Services transmitting, pursuant to law, a report on the financial condition of a Government pension plan; to the Committee on Labor and Human Resources.

EC-1917. A communication from the Administrator of the Veterans Administration transmitting a draft of proposed legislation to modify the structure of the office of the Chief Medical Director, to clarify procedures for removal for cause of certain employees, to authorize use of Director pay grade within VA central office; to the Committee on Veterans' Affairs.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. LUGAR, from the Committee on Foreign Relations, without amendment:

S. Res. 244. An original resolution authorizing the printing of background information on the Committee on Foreign Relations as a Senate document (Rept. No. 99-164); referred to the Committee on Rules and Administration.

By Mr. THURMOND, from the Committee on the Judiciary, without amendment and with a preamble:

H.J. Res. 308. A joint resolution designating the week beginning on October 20, 1985, as "Benign Essential Blepharospasm Awareness Week".

H.J. Res. 322. A joint resolution to provide for the designation of the week beginning October 6, 1985, as "National Sudden Infant Death Syndrome Awareness Week".

S. Res. 96. A resolution relating to the centennial observance of the University of Arizona.

By Mr. LUGAR, from the Committee on Foreign Relations, without amendment and with a preamble:

S. Res. 237. A resolution supporting the intent of the President to discuss with leaders of the Soviet Union American concerns with the Soviet Union presence in Afghanistan, and for other purposes.

By Mr. THURMOND, from the Committee on the Judiciary, without amendment and with a preamble:

S.J. Res. 207. A joint resolution to designate November 1, 1985 as "National Philanthropy Day".

By Mr. LUGAR, from the Committee on Foreign Relations, without amendment and with a preamble:

S.J. Res. 227. An original joint resolution to commend the people and the sovereign confederation of the neutral nation of Switzerland for their contributions to freedom, international peace, and understanding on the occasion of the meeting between the leaders of the United States and the Soviet Union on November 19-20, 1985, in Geneva, Switzerland.

By Mr. LUGAR, from the Committee on Foreign Relations, without amendment and with a preamble:

S. Con. Res. 76. A concurrent resolution asking that the President bring the rights of the Polish people to the attention of the Soviet Government.

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. THURMOND, from the Committee on the Judiciary: Laurence H. Silberman, of the District of Columbia, to be U.S. circuit judge for the District of Columbia;

John S. Rhoades, Sr., of California, to be U.S. district judge for the Southern District of California;

Lyle E. Strom, of Nebraska, to be U.S. district judge for the District of Nebraska;

Jose Antonio Fuste, of Puerto Rico, to be U.S. district judge for the District of Puerto Rico;

Richard H. Battey, of South Dakota, to be U.S. district judge for the District of South Dakota;

Roy C. Hayes, Jr., of Michigan, to be U.S. attorney for the Eastern District of Michigan for the term of 4 years; and

Donald R. Brookshier, of Illinois, to be U.S. marshal for the Southern District of Illinois for the term of 4 years.

By Mr. GARN, from the Committee on Banking, Housing, and Urban Affairs:

Roger A. Yurchuck, of Ohio, to be a Director for the Securities Investor Protection Corporation for a term expiring December 31, 1987.

(The above nomination was reported from the Committee on Banking, Housing, and Urban Affairs with the recommendation that it be confirmed, subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. MATHIAS (for himself, Mr. SIMON, Mr. KENNEDY, Mr. BURDICK, and Mr. HART):

S. 1787. A bill to amend the Federal Election Campaign Act of 1971 to provide for the public financing of Senate general election campaigns; to the Committee on Rules and Administration.

By Mr. MURKOWSKI (for himself and Mr. THURMOND):

S. 1788. A bill to amend title 38, United States Code, to increase the rates of disability compensation for disabled veterans and the rates of dependency and indemnity compensation for surviving spouses and children of veterans, to improve veterans' education benefits, and to improve the Veterans' Administration home loan guaranty program; to amend titles 10 and 38, United States Code to improve national cemetery programs; to redesignate, improve, and extend the Emergency Veterans' Job Training Act of 1983; and for other purposes; to the Committee on Veterans' Affairs.

By Mr. KERRY:

S. 1789. A bill to amend the Federal Election Campaign Act of 1971 to provide for the public financing of Senate general election campaigns by eliminating the tax credit for political contributions; to the Committee on Finance.

By Mr. LUGAR, from the Committee on Foreign Relations:

S.J. Res. 227. An original joint resolution to commend the people and the sovereign confederation of the neutral nation of Switzerland for their contributions to freedom, international peace, and understanding on the occasion of the meeting between the leaders of the United States and the Soviet Union on November 19-20, 1985, in Geneva, Switzerland; placed on the calendar.

By Mr. LUGAR (for Mr. DOLE) (for himself, Mr. BYRD, Mr. LUGAR, Mr. PELL, Mr. DENTON, Mr. TRIBLE, Mr. BOSCHWITZ, Mr. PRESSLER, Mr. SARBANES, Mr. KENNEDY, Mr. KASTEN, Mrs. KASSEBAUM, Mr. EVANS, Mr. HEINZ, Mr. METZENBAUM, Mr. LAUTENBERG, Mr. JOHNSTON, Mr. WILSON, Mr. HEFLIN, Mr. MURKOWSKI, Mr. INOUYE, Mr. SIMON, Mr. PROXMIRE, Mr. BAUCUS, Mr. HARKIN, Mr. BRADLEY, Mr. MITCHELL, Mr. LEVIN, Mr. ZORINSKY, Mr. FORD, Mr. SPECTER, Mr. ROCKEFELLER, Mr. ABDNOR, Mr. WARNER, Mr. BOREN, Mr. DOMENICI, Mr. EAGLETON, Mrs. HAWKINS, and Mr. STEVENS):

S.J. Res. 228. A joint resolution relating to the proposed sales of arms to Jordan; considered and passed.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. LUGAR, from the Committee on Foreign Relations:

S. Res. 244. An original resolution authorizing the printing of background information on the Committee on Foreign Relations as a Senate document; to the Committee on Rules and Administration.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. MATHIAS (for himself, Mr. SIMON, Mr. KENNEDY, Mr. BURDICK, and Mr. HART):

S. 1787. A bill to amend the Federal Election Campaign Act of 1971 to provide for the public financing of Senate general election campaigns; to the Committee on Rules and Administration.

SENATORIAL ELECTION CAMPAIGN ACT

● Mr. MATHIAS. Mr. President, I am introducing today, with my distinguished colleague from Illinois, Senator SIMON, the Senator from Massachusetts [Mr. KENNEDY], and the Senator from North Dakota [Mr. BURDICK], a bill to provide for public financing of Senate general election campaigns. It is similar to legislation I have supported in the past and reflects my belief that public funding of congressional campaigns is essential to complete the task of campaign finance reform begun by Congress over a decade ago. The first day of hearings on this proposed legislation will be held on Election Day, November 5, 1985, before the Committee on Rules and Administration.

I introduce this legislation because I continue to believe that public finance offers the best means to remedy the ills of the current system. Campaign finance legislation has sought to protect equality of access to the political arena and to insure that the system itself, in both fact and appearance, is free from the corrupting influence of money. The flood of campaign dollars in recent years has made it increasingly difficult to achieve these goals.

Candidates and office holders alike increasingly have had to devote themselves to the pursuit of campaign contributions in a way detrimental to the interests of their constituencies and to the functioning of government. I suspect, too, that many qualified men and women are kept out of the process altogether because of the personal and financial sacrifice that running for public office entails. The Federal Election Commission reports that spending in 1984 Senate races increased 23 percent over 1982. These figures suggest that no relief is in sight.

In our effort to regulate campaign finance, we are faced with what I believe is the misguided holding of the Supreme Court in Buckley versus Valeo, that the expenditure of money in campaigns is a constitutionally protected form of speech. Unless and until the Court can be persuaded to change its mind, the Buckley decision leaves us little alternative if we wish to place some reasonable limits on campaign spending. Such limits are constitutionally permissable only in the context of a system of publicly funded elections.

To those who would say that in an era of record deficits, we cannot afford to place additional demands on the Treasury, I would say we will pay a far greater price if we do not reform the way in which campaigns for elective office are financed. My colleague, the distinguished Senator from Arizona, Senator GOLDWATER, has called the current state of campaign finance a crisis of liberty. Our response to this crisis will determine the kind of government we have in the years to come: whether it rightfully enjoys the confidence of the people, and whether it is able to respond boldly and rationally to the challenges of the coming decades.

My bill would provide that any major or minor party candidate would be eligible to receive public funds for his or her general election campaign, if at least two major party candidates, or a major and a minor party candidate, have qualified for the general election ballot in that State. Candidates other than a major or minor party candidate could receive postelection funding if they received 5 percent or more of the vote.

A major party is defined as one whose candidate in any one of the three preceding Senatorial elections in a State has received 25 percent or more of the vote; a minor party is one whose candidate has received at least 5 percent but less that 25 percent of the vote.

Eligible candidates who elect to receive public funds would be subject to an expenditure limit in the general election period equal to $500,000 in each State with a voting age population of 1 million or less, 50 cents times the voting age population in each State with a voting age population greater than 1 million but less than 3 million, and 30 cents times the voting age population in each State with a voting age population of 3 million or more—but not less than $1½ million.

Major party candidates could receive public funds in an amount equal to the expenditure limit in that State; minor party candidates would be eligible for partial public funding. Major party candidates who receive full public funding could accept no private contributions for their general election campaign. Candidates accepting public funding could not make expeditures from personal funds in excess of $20,000.

An eligible candidate whose opponent elected not to accept public funding would be entitled to additional public funds in an amount equal to the amount by which his or her opponent exceeded the expenditure limits.

Funding would be derived from the voluntary taxpayer check-off on individual tax returns.

I ask unanimous consent that a section-by-section summary of the bill, a chart showing the State-by-State expenditures limits, and a copy of the bill be printed in the RECORD at this point.

S. 1787

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Senatorial Election Campaign Act".

SEC. 2. The Federal Election Campaign Act of 1971 is amended by adding at the end thereof the following new subchapter:

"Subchapter III—Public Financing of Senate General Election Campaigns

"DEFINITIONS

"SEC. 501. For purposes of this subchapter—

"(1) unless otherwise provided in this subchapter the definitions set forth in section 301 of this Act apply to this subchapter;

"(2) 'authorized committee' means, with respect to any candidate for election to the United States Senate, any political committee which is authorized in writing by such candidate to accept contributions, incur expenses, or make expenditures on behalf of such candidate to further the election of such candidate. Such authorization shall be addressed to the chairman of the political committee, and a copy of such authorization shall be filed by each candidate with the Commission. A withdrawal of any authorization shall be in writing and shall be addressed and filed in the same manner as the authorization;

"(3) 'candidate' means an individual who has been nominated for election to the office of United States Senator by a major or minor party or who has qualified to have his or her name on the general election ballot;

"(4) 'eligible candidate' means a candidate who is eligible, under section 502, for payments under this subchapter;

"(5) 'expenditure report period' with respect to an election means—

"(A) in the case of a major party candidate, the period beginning on the date such candidate becomes an eligible candidate and ending 30 days after the date of the election or the date such candidate is no longer an eligible candidate, whichever date is earlier; or

"(B) in the case of a candidate other than a candidate of a major party, the same period as the expenditure report period of the major party which has the shortest expenditure report period for such election;

"(6) 'election' means any regularly scheduled general, special, or runoff election, other than a primary election, held to elect a candidate to the United States Senate;

"(7) 'fund' means the Senate General Election Campaign Fund maintained by the Secretary of the Treasury in the Presidential Election Campaign Fund established by section 9006(a) of the Internal Revenue Code of 1954;

"(8) 'major party' means with respect to any election, a political party whose candidate for the office of United States Senator in any of the three preceding elections received, as the candidate of such party, 25 percent or more of the total number of popular votes received by all candidates for such office;

"(9) 'minor party' means with respect to any election, a political party whose candidate for the office of Senator in any of the three preceding elections received, as the candidate of such party 5 percent or more, but less than 25 percent of the total number of popular votes received by all candidates for such office;

"(10) the term 'qualified campaign expense' means an expense—

"(A) incurred by the candidate or the authorized committee of the candidate for the office of United States Senator to further his or her election to such office,

"(B) incurred within the expenditure report period, or incurred before the beginning of such period to the extent such expense is for property, services, or facilities used during such period, and

"(C) neither the incurring nor paying of which constitutes a violation of any law of the United States or of the State in which such expense is incurred or paid.

An expense shall be considered as incurred by a candidate or an authorized committee if it is incurred by a person authorized by such candidate or such committee, as the case may be, for expenses on behalf of such candidate or such committee.

"CONDITION FOR ELIGIBILITY FOR PAYMENTS

"SEC. 502. (a) In order to be eligible to receive any payments under this subchapter, the candidate shall agree, in writing—

"(1) to obtain and furnish to the Commission such evidence as it may request of the qualified campaign expenses and contributions of such candidate,

"(2) to keep and furnish to the Commission such records, books, and other information as it may request, and

"(3) to an audit and examination by the Commission under section 507 and to pay or repay any amounts required under such section.

"(b) To be eligible to receive payments under section 503, the candidate of a major party shall certify to the Commission, under penalty of perjury, that—

"(1) such candidate is seeking election to the United States Senate and such candidate and at least one other major party or minor party candidate have qualified for the election ballot under the law of the State involved,

"(2) such candidate and the authorized committees of such candidate will not incur qualified campaign expenses in excess of the aggregate payments to which they are entitled under section 503, unless otherwise provided in this subchapter,

"(3) no contributions to defray qualified campaign expenses have been or will be accepted by such candidate or any of the authorized committees of such candidate except to the extent necessary to make up any deficiency in payments received out of the fund because of the application of section 506(c), and

"(4) no contributions have been or will be accepted by such candidate or any authorized committees of such candidate to defray expenses which are not qualified campaign expenses.

"(c) In order to be eligible to receive any payments under this subchapter, a candidate other than a candidate of a major party shall certify to the Commission under penalty of perjury, that—

"(1) such candidate is seeking election to the United States Senate and such candidate and at least one other candidate of a major party have qualified for the election ballot under the law of the State involved,

"(2) such candidate and the authorized committees of such candidate will not incur qualified campaign expenses in excess of the aggregate payments to which an eligible candidate of a major party is entitled under section 503, unless otherwise provided in this subchapter, and

"(3) such candidate and the authorized committees of such candidate will accept and expend or retain contributions to defray qualified campaign expenses only to the extent that the qualified campaign expenses incurred by such candidate and the authorized committees of such candidate certified to under paragraph (2) exceed the aggregate payments received by such candidate out of the fund pursuant to section 506.

"(d) Certification for payment to a candidate shall be made by the Commission within 5 days after the date the Commission receives a certification from such candidate, pursuant to this section. Such certification shall be in such form and filed as the Commission shall prescribe by rule or regulation.

"(e)(1) To be eligible to receive any payment under this subchapter, a candidate shall certify to the Commission, under penalty of perjury, that such candidate will not knowingly make expenditures from his or her personal funds, or the personal funds of his or her immediate family in connection with such candidate's campaign for election in excess of, in the aggregate, $20,000.

"(2) For purposes of this subchapter, the term 'immediate family' means the spouse, any child, parent, grandparent, brother, halfbrother, sister, or halfsister of the candidate, and the spouses of such persons.

"(f) If an individual ceases to be a candidate such individual—

"(1) shall no longer be eligible to receive any payments under this subchapter, except that such individual shall be eligible to receive payments to defray qualified campaign expenses incurred while such person was an eligible candidate actively seeking election to the Senate; and

"(2) shall pay to the Secretary, as soon as practicable after the date upon which such individual ceases to be a candidate, an amount equal to the amount of payments received by such individual under this subchapter if such payments are not used to defray qualified campaign expenses.

"ENTITLEMENT OF ELIGIBLE CANDIDATES TO PAYMENTS

"SEC. 503. (a) Subject to the provisions of this chapter—

"(1) each eligible candidate of a major party in an election shall be entitled to equal payments under this subchapter in an amount which, in the aggregate, shall not exceed—

"(A) in each State with a voting-age population of 1,000,000 or less: $500,000";

"(B) in each State with a voting-age population greater than 1,000,000 but less than 3,000,000: an amount equal to 50 cents times such voting-age population; and

"(C) in each State with a voting-age population of 3,000,000 or over: an amount equal to 30 cents times such voting-age population, but not less than $1,500,000.

"(2) An eligible candidate of a minor party in an election shall be entitled to a payment under this subchapter equal in the aggregate to an amount which bears the same ratio to the amount allowed under paragraph (1) for a major party as the number of popular votes received by the candidate for Senator of the minor party, as such candidate, in the preceding election bears to the average number of popular votes received by the candidates for Senator of the major parties in the preceding election.

"(3) An eligible candidate, other than a candidate of a major or minor party, who receives 5 percent or more of the total number of popular votes cast for the office of United States Senate in such election shall be entitled to payments pursuant to this subchapter equal in the aggregate to an amount which bears the same ratio to the amount allowed under paragraph (1) for a major party as the number of popular votes received by such candidate in such election bears to the average number of popular votes received in such election by the candidates for Senator of the major parties. All such payments shall be made at such time after the election as the Commission determines the amount of payments such candi-

date is eligible for pursuant to this subparagraph. The Commission shall certify such amount to the United States Treasury for payment.

"(b) The aggregate payments to which an eligible candidate shall be entitled under paragraph (2) or (3) of subsection (a), shall not exceed an amount equal to the lesser of—

"(1) the amount of qualified campaign expenses incurred by an eligible candidate and the authorized committees of such candidate, reduced by the amount of contributions allowed to defray qualified campaign expenses received and expended or retained by an eligible candidate and such committees, or

"(2) the aggregate payments to which an eligible candidate of a major party is entitled under subsection (a)(1), reduced by the amount of contributions described in paragraph (1) of this subsection.

"(c) An eligible candidate shall be entitled to payments only—

"(1) to defray qualified campaign expenses incurred by an eligible candidate or the authorized committees of such candidate, or

"(2) to repay loans the proceeds of which were used to defray such qualified campaign expenses, or otherwise to restore funds (other than contributions to defray qualified campaign expenses received and expended by such candidate or such committees) used to defray such qualified campaign expenses.

"ADDITIONAL ENTITLEMENT OF OPPONENTS OF NONPUBLICLY FINANCED CANDIDATES

"SEC. 504. (a) Within 5 days after nomination by a major or minor party, and under such regulations as the Commission may prescribe, each candidate nominated by a major or minor party shall notify the Commission in writing of his or her intention to accept or not accept the funds to which he or she is entitled under section 503.

"(b)(1) A candidate of a major party who has elected to accept the funds for which he or she has qualified under section 503 and who is opposed by a major party candidate who has elected not to accept public funding shall be entitled to receive additional funds from the general fund of the United States Treasury, pursuant to paragraph (2).

"(2)(A) Subject to the provisions of subparagraph (B), a major party candidate eligible to receive funds pursuant to paragraph (1), shall receive additional funds in the amount of one dollar for every dollar of contributions or expenditures raised, incurred, or expended by the candidate not accepting funding.

"(B) Such additional funds shall only match those contributions or expenditures raised, incurred, or expended by the candidate not accepting funding which are in excess of the entitlement of such eligible candidate.

"(c) For purposes of implementing subsection (b), a candidate who elects not to accept public funding shall report his or her receipts and expenditures to the Commission—

"(1) monthly for contributions or expenditures received, incurred, or expended prior to 60 days prior to the date of the election;

"(2) weekly for contributions or expenditures received, incurred, or expended from 59 to 11 days prior to the date of the election; and

"(3) daily for contributions or expenditures received, incurred, or expended during the 10 days prior to the date of the election.

"(d) Notwithstanding the provisions of section 505—

"(1) if a major party candidate is eligible, pursuant to subsection (b), to receive additional funding because of contributions or expenditures received, incurred, or expended by such opponent between the date 59 days prior to the date of the election and the date of the election which are required to be reported by paragraph (2) or (3) of subsection (c), and

"(2) such eligible candidate files a request with the Commission stating that such candidate is eligible to receive such additional funds,

the Commission, within 24 hours after such request is filed, shall certify to the Secretary of the Treasury for payments to such eligible candidate.

"CERTIFICATION BY COMMISSION

"SEC. 505. (a) Except as otherwise provided in section 504(d), not later than 5 days after a candidate files a request with the Commission stating that he or she has met all applicable conditions for eligibility to receive payments under this subchapter, the Commission shall certify to the Secretary of the Treasury (hereafter in this subchapter referred to as the 'Secretary') for payment to such eligible candidate, payment in full of amounts to which such candidate is entitled under section 503, unless the provisions of section 506(c) apply.

"(b) Initial certifications by the Commission under subsection (a), and all determinations made by it under this chapter shall be final and conclusive, except to the extent that they are subject to examination and audit by the Commission under section 507 and judicial review under section 511.

"PAYMENTS TO ELIGIBLE CANDIDATES

"SEC. 506. (a) The Secretary shall maintain in the Presidential Election Campaign Fund established by paragraph 9006(a) of the Internal Revenue Code of 1954, in addition to any accounts maintained under such section, a separate account to be known as the 'Senate General Election Campaign Fund'. The Secretary shall deposit into such fund, for use by a candidate eligible for payments under this subchapter, the amount available after the Secretary determines that amounts in the fund necessary for payments under subtitle H of the Internal Revenue Code of 1954 are adequate. The moneys designated for such account shall remain available without fiscal year limitation.

"(b) Upon receipt of a certification from the Commission under section 505, the Secretary shall promptly pay to the candidate, out of the fund, the amount certified by the Commission. Amounts paid to any such candidate shall be under the control of such candidate.

"(c) If at the time of a certification by the Commission under section 505 for payment to an eligible candidate, the Secretary determines that the moneys in the fund are not, or may not be, sufficient to satisfy the full entitlement of such eligible candidate, he shall withhold from such payment such amount as he determines to be necessary to assure that an eligible candidate will receive his or her pro rata share of his or her full entitlement. Amounts so withheld shall be paid when the Secretary determines that there are sufficient moneys in the fund to pay such amounts, or portions thereof, to all eligible candidates from whom amounts have been withheld, but, if there are not sufficient moneys in the fund to satisfy the full entitlement of an eligible candidate, the amounts so withheld shall be paid in such manner that each eligible candidate receives his or her pro rata share of his or her full entitlement.

"EXAMINATIONS AND AUDITS; REPAYMENTS

"SEC. 507. (a) Notwithstanding the provisions of section 311(b), after each election, the Commission shall conduct a thorough examination and audit of the qualified campaign expenses of each candidate for the United States Senate who received payments under this subchapter.

"(b)(1) If the Commission determines that any portion of the payments made to a candidate under this subchapter was in excess of the aggregate payments to which such candidate was entitled, it shall so notify such candidate, and such candidate shall pay to the Secretary an amount equal to the excess.

"(2) If the Commission determines that a candidate or any authorized committee of such candidate incurred qualified campaign expenses in excess of the aggregate payments to which the candidate was entitled under section 503, it shall notify such candidate of the amount of such excess and such candidate shall pay to the Secretary an amount equal to such amount.

"(3) If the Commission determines that a candidate or any authorized committee of such candidate accepted contributions, other than contributions to make up deficiencies in payments out of the fund because of the application of section 506(c) to defray qualified campaign expenses, other than qualified campaign expenses with respect to which payment is required under paragraph (2), it shall notify such candidate of the amount of the contributions so accepted, and such candidate shall pay to the Secretary an amount equal to such amount.

"(4) If the Commission determines that any amount of any payment made to a candidate under section 506 was used for any purpose other than—

"(A) to defray the qualified campaign expenses with respect to wnich such payment was made, or

"(B) to repay loans the proceeds of which were used to defray qualified campaign expenses,

it shall notify such candidate of the amount so used, and such candidate shall pay to the Secretary an amount equal to such amount.

"(5) No payment shall be required from a candidate under this subsection to the extent that such payment, when added to other payments required from such candidate under this subsection, exceeds the amount of payments received by such candidate under this subchapter.

"(c) No notification shall be made by the Commission under subsection (b) with respect to an election more than 3 years after the date of such election.

"(d) All payments received by the Secretary under subsection (b) shall be deposited in the Senate General Election Campaign Fund established in section 506.

"CRIMINAL PENALTIES

"SEC. 508. (a)(1) It shall be unlawful for an eligible candidate of a political party in an election or for any authorized committee of such candidate to knowingly and willfully incur qualified campaign expenses in excess of the aggregate payments to which an eligible candidate of a major party is entitled with respect to such election.

"(2) Any person who violates paragraph (1) shall be fined not more than $5,000, or imprisoned not more than one year, or both.

In the case of a violation by any authorized committee, any officer or member of such committee who knowingly and willfully consents to such violation shall be fined not more than $5,000, or imprisoned not more than one year, or both.

"(b)(1) It shall be unlawful for an eligible candidate of a major party in an election or for any authorized committee of such candidate to knowingly and willfully accept any contribution to defray qualified campaign expenses, except to the extent necessary to make up any deficiency in payments received out of the fund because of the application of section 506 or to defray expenses which would be qualified campaign expenses but for subparagraph (C) of section 501(10).

"(2) It shall be unlawful for an eligible candidate of a political party (other than an eligible candidate of a major party) in an election or for any authorized committee of such candidate to knowingly and willfully accept and expend or retain contributions to defray qualified campaign expenses in an amount which exceeds the qualified campaign expenses incurred with respect to such election by such eligible candidate and an authorized committee of such candidate.

"(3) Any person who violates paragraph (1) or (2) shall be fined not more than $5,000, or imprisoned not more than one year, or both. In the case of a violation by any authorized committee, any officer or member of such committee who knowingly and willfully consents to such violation shall be fined not more than $5,000, or imprisoned not more than one year, or both.

"(c)(1) It shall be unlawful for any person who receives any payment under section 506, or to whom any portion of any payment received under such section is transferred, knowingly and willfully to use, or authorize the use of, such payment or such portion for any purpose other than—

"(A) to defray the qualified campaign expenses with respect to which such payment was made, or

"(B) to repay loans the proceeds of which were used, or otherwise to restore funds (other than contributions to defray qualified campaign expenses which were received and expended) which were used, to defray such qualified campaign expenses.

"(2) Any person who violates paragraph (1) shall be fined not more than $10,000, or imprisoned not more than five years, or both.

"(d)(1) It shall be unlawful for any person knowingly and willfully—

"(A) to furnish any false, fictitious, or fraudulent evidence, books, or information to the Commission under this subchapter, or to include in any evidence, books, or information so furnished any misrepresentation of a material fact, or to falsify or conceal any evidence, books, or information relevant to a certification by the Commission or an examination and audit by the Commission under this subchapter; or

"(B) to fail to furnish to the Commission any records, books, or information requested by it for purposes of this subchapter.

"(2) Any person who violates paragraph (1) shall be fined not more than $10,000, or imprisoned not more than five years, or both.

"(e)(1) It shall be unlawful for any person knowingly and willfully to give or accept any kickback or any illegal payment in connection with any qualified campaign expense of an eligible candidate or any authorized committee of such candidate.

"(2) Any person who violates paragraph (1) shall be fined not more than $10,000, or imprisoned not more than five years, or both.

"(3) In addition to the penalty provided by paragraph (2), any person who accepts any kickback or illegal payment in connection with any qualified campaign expense of an eligible candidate or any authorized committee of such candidate shall pay to the Secretary of the Treasury, for deposit in the general fund of the Treasury, an amount equal to 125 percent of the kickback or payment received.

"(f)(1) It shall be unlawful for any individual to disclose any information obtained under the provisions of this subchapter except as may be required by law.

"(2) Any person who violates paragraph (1) shall be fined not more than $5,000, or imprisoned not more than one year, or both.

"REPORTS TO CONGRESS; REGULATIONS

"SEC. 509. (a) The Commission shall, as soon as practicable after each election, submit a full report to the Senate setting forth—

"(1) the qualified campaign expenses (shown in such detail as the Commission determines necessary) incurred by a candidate and the authorized committees of such candidate;

"(2) the amounts certified by it under section 505 for payment to each eligible candidate; and

"(3) the amount of payments, if any, required from such candidate under section 507, and the reasons for each payment required.

Each report submitted pursuant to this section shall be printed as a Senate document.

"(b) The Commission is authorized to prescribe such rules and regulations in accordance with the provisions of subsection (c), to conduct such examinations and audits (in addition to the examinations and audits required by section 507), to conduct such investigations, and to require the keeping and submission of such books, records, and information, as it deems necessary to carry out the functions and duties imposed on it by this subchapter.

"(c) Thirty days before prescribing any rule or regulation under subsection (b), the Commission shall transmit a statement with respect to such rule or regulation to the Senate, setting forth the proposed rule or regulation. The statement shall contain a detailed explanation and justification of such rule or regulation.

"PARTICIPATION BY COMMISSION IN JUDICIAL PROCEEDINGS

"SEC. 510. (a) The Commission is authorized to appear in and defend against any action filed under section 511, either by attorneys employed in its office or by counsel whom it may appoint without regard to the provisions of title 5, United States Code, governing appointments in the competitive service, and whose compensation it may fix without regard to provisions of chapter 51 and subchapter III of chapter 53 of such title.

"(b) The Commission is authorized to appear, through attorneys and counsel described in subsection (a), in the district courts and other appropriate courts of the United States to seek recovery of any amounts determined to be payable to the Secretary of the Treasury as a result of any examination and audit made pursuant to section 507.

"(c) The Commission is authorized to petition the courts of the United States for declaratory or injunctive relief concerning any civil matter arising under this subchapter, through attorneys and counsel described in subsection (a). Upon application of the Commission, an action brought pursuant to this subsection shall be heard and determined by a court of three judges in accordance with the provisions of section 2284 of title 28, United States Code, and any appeal from the determination of such court shall lie to the Supreme Court of the United States. Judges designated to hear the case shall assign the case for hearing at the earliest practicable date, participate in the hearing and determination thereof, and cause the case to be in every way expedited.

"(d) The Commission is authorized on behalf of the United States to appeal from, and to petition the Supreme Court of the United States for certiorari to review judgments or decrees entered with respect to actions in which it appears pursuant to the authority provided in this section.

"JUDICIAL REVIEW

"SEC. 511. (a) Any certification, determination, or other action by the Commission made or taken pursuant to the provisions of this subchapter shall be subject to review by the United States Court of Appeals for the District of Columbia Circuit upon petition filed in such court by any interested person. Any petition filed pursuant to this section shall be filed within thirty days after such certification, determination, or other action by the Commission.

"(b)(1) The Commission, the national committee of any political party, or any individual eligible to vote for a candidate is authorized to institute an action under this section, including an action for declaratory judgment or injunctive relief, as may be appropriate to implement or construe any provision of this subchapter.

"(2) The district courts of the United States shall have jurisdiction of proceedings instituted pursuant to this subsection and shall exercise such jurisdiction without regard to whether a person asserting rights under the provisions of this subsection has exhausted administrative or other remedies provided by law. Such proceedings shall be heard and determined by a court of three judges in accordance with the provisions of section 2284 of title 28, United States Code, and any appeal shall lie to the Supreme Court of the United States. Judges designated to hear the case shall assign the case for hearing at the earliest practicable date, participate in the hearing and determination thereof, and cause the case to be in every way expedited.".

SEC. 3. (a) Section 315(c) of the Federal Election Campaign Act of 1971 is amended by striking out "subsection (b) of this section and subsection (d) of this section" and inserting in lieu thereof "subsections (b) and (d) of this section and subsection (a) of section 503".

(b) Section 315(c)(2)(B) of the Federal Election Campaign Act of 1971 is amended by inserting before the period at the end thereof the following: ", except that with respect to the limitations established by subchapter III of this Act, the term 'base period' means the calendar year 1985".

SEC. 4. This Act and the amendments made by this Act shall become effective on January 1, 1987, and shall apply to campaigns for election to the Senate after such date.

Section-by-Section Summary

SENATORIAL ELECTION CAMPAIGN ACT

MATHIAS-SIMON BILL TO PROVIDE FOR PUBLIC FUNDING OF U.S. SENATE GENERAL ELECTION CAMPAIGNS

Title: "Senatorial Election Campaign Act."

SECTION TWO

Amends the Federal Election Campaign Act of 1971 and creates a new subchapter titled "Public Financing of Senate General Election Campaigns."

SEC. 501. DEFINITIONS

The definitions in this section supplement those used in Section 301 of the Federal Election Campaign Act.

"Candidate" means the Senate candidate nominated by a major or minor party or a candidate who has qualified for the general election ballot.

"Eligible candidate" is one who has met all the eligiblity requirements of Section 502.

"Election" includes any general, special, or runoff election held to elect a candidate to the U.S. Senate but does not include a primary.

The "expenditure report period" begins on the date of eligibility for a major party candidate. For all other eligible candidates, it is the same as the shortest expenditure report period of a major party candidate.

A "major party" is a political party whose Senatorial candidate in any of the three preceding elections received 25 percent or more of the popular votes.

A "minor party" is a party whose Senatorial candidate in any of the three preceding elections received 5 percent or more but less than 25 percent of the popular votes.

The "fund" is the Senate General Election Fund maintained by the Secretary of the Treasury as a part of the Presidential Election Campaign Fund.

SEC. 502. CONDITIONS FOR ELIGIBILITY FOR PAYMENTS

To become eligible, a candidate must agree and certify in writing to the Federal Election Commission (FEC), under penalty of perjury:

502(a).—To provide evidence of the qualified campaign expenses and contributions of such candidate, to keep and furnish such records to the Commission as it may require, to an audit and examination by the Commission following the election, and to repay such funds as may be required.

502(b).—A major party candidate must certify that he or she and at least one other major or minor party candidate have qualified for the general election ballot. A major party candidate must agree not to incur qualified campaign expenses in excess of payments to which he or she is entitled under the Act. Such major party candidate may not accept contributions except to the extent necessary to make up any deficiency in payments from the fund.

502(c).—A candidate, other than a major party candidate, must certify that he or she along with at least one major party candidate have qualified for the general election ballot. The candidate must agree not to incur qualified campaign expenses in excess of the limit (which is the amount of a major party candidate's entitlement) and to accept contributions only to the extent that public funds are not sufficient to cover such qualified campaign expenses.

503(d).—The FEC shall certify funds within five days after an application has been received.

502(e).—Any candidate accepting public funds may not make expenditures of personal funds or personal funds of the candidate's immediate family in excess of $20,000.

502(f).—Provides that an individual is no longer eligible to receive payments if he or she ceases to be a candidate.

SEC. 503. ENTITLEMENT OF ELIGIBLE CANDIDATES TO PAYMENTS

503(a).—(1) An eligible candidate of a major party is entitled to receive payments not to exceed:

(A) $500,000 in each state with a voting age population of 1,000,000 or less.

(B) Fifty cents multiplied by the voting age population in states with a voting age population between 1,000,000 and 3,000,000.

(C) Thirty cents multiplied by the voting age population, but not less than $1,500,000, in states with a voting age population of 3,000,000 or over.

(2) Minor party candidates receive an amount that bears the same ratio to the payments received by the major party candidates as the minor party's vote in the preceding Senatorial election bears to the average of the votes received by both major party candidates in the preceding election.

(3) An eligible candidate, other than a major or minor party candidate, who receives 5% or more of the popular votes cast in the election is entitled to post election funding. The amount is equal to an amount which bears the same ratio to the payments allowed major party candidates as the ratio of votes received by the candidate bears to the average vote of the major party candidates.

503(b).—An eligible candidate of a minor party or an eligible candidate qualifying under the 5% threshold is entitled to receive the lesser of (1) the amount of qualified campaign expenses reduced by contributions received or (2) the equivalent of payments allowed a major party candidate reduced by contributions received.

503(c)—Eligible candidates may not receive payments in excess of qualified campaign expenses. Payments may be used for qualified campaigns expenses or to repay loans the proceeds of which were used to defray qualified campaign expenses.

SEC. 504. ADDITIONAL ENTITLEMENT OF OPPONENTS OF NON-PUBLICLY FINANCED CANDIDATES

504(a).—Within five days after nomination by a major or minor party, a Senate candidate must notify the FEC in writing of his or her intention to accept or not accept public funds.

504(b).—A publicly funded major party candidate opposed by a major party candidate who elects not to accept public funds will be entitled to additional public funds equal to the amount by which his or her opponent exceeds the expenditure limits.

504(c).—For purposes of authorizing additional payments under this section, a non-publicly funded major party candidate will be subject to additional reporting requirements, including daily reports of contributions and expenditures in the 10 days preceding the election.

504(d).—The Commission must certify entitlement to additional payments under this section within 24 hours of an eligible candidate's application.

SEC. 505. CERTIFICATION BY COMMISSION

Certification by the FEC for payment of funds is required within five days of an eligible candidate's submission of a request. Initial certifications and other determinations by the Commission are final except to the extent that they are subject to later examination and audit by the Commission and to judicial review.

SEC. 506. PAYMENTS TO ELIGIBLE CANDIDATES

506(a).—After setting aside adequate funds for the presidential general election, national party conventions, and presidential primary accounts, the Secretary of the Treasury shall deposit any remaining funds in the Senate General Election Campaign Fund.

506(b).—The Secretary shall promptly pay out funds upon receipt of the Commission's certification. Amounts paid are expressly under the control of the candidate.

506(c).—When funds are insufficient to satisfy full entitlements, pro rata payments will be made.

SEC. 507. EXAMINATIONS AND AUDITS: REPAYMENTS

507(a).—After each election the FEC shall conduct an audit of each candidate receiving payments.

507(b).—Repayments are required if the Commission determines that a candidate or authorized committee:

(1) Received payments to which the candidate was not entitled.

(2) Incurred qualified campaign expenses in excess of the spending limit.

(3) Accepted contributions other than contributions permitted to make up deficiencies in payments.

(4) Used payments for purposes other than to defray qualified campaign expenses or to repay loans which were used for qualified campaign expenses.

No payment will be required from a candidate in excess of the total amount of public funds received.

507(c).—The FEC may not notify candidates of repayments more than 3 years after the election.

507(d).—Repayments under this section are deposited into the Senate General Election Campaign Fund.

[Sections 508 through 511 parallel provisions of the Presidential Election Campaign Fund Act.]

SEC. 508. CRIMINAL PENALTIES

508(a).—It is unlawful for an eligible candidate, the authorized committee of an eligible candidate, or any officer or member of such authorized committee to knowingly and willfully incur qualified campaign expenses in excess of the aggregate payments to which an eligible candidate of a major party is entitled with respect to an election. Violators shall be fined not more than $5,000 or imprisoned not more than one year, or both.

508(b).—It is unlawful for an eligible candidate of a major party or the authorized committee of such candidate to knowingly and willfully accept any contribution with respect to an election except to the extent necessary to make up for any deficiency in payments from the fund, or to accept contributions in an amount which exceeds qualified campaign expenses. Violators shall be fined not more than $5,000, or imprisoned not more than 5 years, or both.

508(c).—It is unlawful for any person receiving payments under the Act to knowingly and willfully use or authorize the use of payments for any purpose other than to defray qualified campaign expenses or to repay loans which were used for qualified campaign expenses. Violators shall be fined not more than $10,000, or imprisoned not more than 10 years, or both.

508(d).—It is unlawful for any person to knowingly and willfully furnish any false, fraudulent or fictitious information to the Commission, or to fail to furnish any records or information requested by the Commission for purposes of this chapter. Violators shall be fined not more than $10,000, or imprisoned not more than five years, or both.

508(e).—It is unlawful for any person to knowingly and willfully give or accept any kickback or any illegal payment in connection with any qualified campaign expense. Violators shall be subject to a fine of not more than $10,000, or imprisonment for not more than five years, or both. Any person receiving such a kickback or illegal payment shall be required to pay to the Secretary an amount equal to 125 per cent of the illegal payment.

508(f).—It is unlawful for any person to disclose information obtained under the provisions of this chapter, except as provided by law. Violators shall be fined not more than $5,000, or imprisoned not more than one year, or both.

SEC. 509. REPORT TO CONGRESS; REGULATIONS

509(a).—The Commission is required after each election to report to the Senate on the qualified campaign expenses of candidates receiving payments, amounts certified by it under section 505, and the amount of and reasons for any repayments required under the Act.

508(b).—The Commission is given authority to prescribe regulations, to conduct examinations, audits, and investigations, and to require the keeping and submission of such books and records as the Commission deems necessary.

SEC. 510. PARTICIPATION BY COMMISSION IN JUDICIAL PROCEEDINGS

The Commission is authorized through its attorneys or by appointed counsel to seek recovery of any amounts found payable as a result of an audit or examination, and to seek declaratory or injunctive relief concerning any civil matter arising under the Act. Such actions shall be heard by a three judge court on an expedited basis, and any appeal shall lie to the U.S. Supreme Court.

SEC. 511. JUDICIAL REVIEW

511(a).—Commission certifications and other actions taken pursuant to the Act are subject to review by the United States Court of Appeals for the District of Columbia.

508(b).—The Commission, the national committee of a political party, and any eligible voter may pursue declaratory or injunctive remedies to implement or construe the Act's provisions. Such actions shall be heard before a three judge court on an expedited basis with an appeal to the Supreme Court.

SECTION THREE

The amount of payments under the bill are subject to cost of living increases with 1985 designated as the base year.

SECTION FOUR

The bill applies to Senate elections held after January 1, 1987, the effective date of the legislation.●

By Mr. MURKOWSKI (for himself and Mr. THURMOND):

S. 1788. A bill to amend title 38, United States Code, to increase the rates of disability compensation for disabled veterans and the rates of dependency and indemnity for surviving spouses and children of veterans, to improve veterans' education benefits, and to improve the Veterans' Administration Home Loan Guaranty Program; to amend titles 10 and 38, United States Code, to improve national cemetery programs; to redesignate, improve, and extend the Emergency Veterans' Job Training Act of 1983; and for other purposes; to the Committee on Veterans' Affairs.

VETERANS' COMPENSATION AND BENEFITS IMPROVEMENTS ACT

Mr. MURKOWSKI. Mr. President, when the Senate adopted the First Concurrent Budget Resolution we made a commitment to the Nation's veterans suffering from service-connected disabilities. We made a commitment that they would receive a cost-of-living adjustment equal to that provided to the recipients of Social Security and other Federal programs.

I rise today to introduce legislation to fulfill that commitment. This bill S. 1788, the proposed Veterans' Compensation and Benefits Act of 1985, would provide a cost-of-living adjustment of up to 3.7 percent for service-connected disability compensation paid to veterans and for the related benefits paid to the survivors of individuals who die in service or due to a service-connected cause.

In addition to a COLA for those with service-connected disabilities, my legislation is designed to improve and refine a number of veterans' benefits programs. At this time, I would like to summarize the major provision of my bill.

A major component of this proposed legislation is a section designed to streamline and improve the management of the VA's Home Loan Program.

Since 1944, the VA has been guaranteeing loans made to veterans for the purpose of purchasing homes. Over $230 billion in loans for approximately 11.3 million veterans have been guaranteed. I am happy to say that the program is a worthwhile one, but I also must tell you that it is not without its problems. High rates of foreclosure and a growing inventory of foreclosed loans threatens the integrity of the program. For the 2 fiscal years, 1984 and 1985, the VA requested a total of $566.6 million in supplemental appropriations to cover the deficit in the loan guaranty revolving fund. This deficit is the result of a number of factors.

First of all, prior to 1981, the direct loan fund provided a source of financing to keep the program afloat, second, the VA is experiencing an extremely high rate of foreclosure on properties it has guaranteed. Foreclosures continue to run at the average rate of 2,500 per month. The VA is responsible for either paying the guaranty on those pieces of property or taking title to them. If the VA pays the guaranty, it immediately writes off up to $27,500. For this reason the VA takes title to over 85 percent of the foreclosed properties under the assumption that it will be able to turn around and sell the property for, at best, a loss no greater than the value of the guaranty for which the VA was liable. As a result of this policy, the VA's inventory has grown to almost 20,000 homes. The stark reality is that the VA loses on the average, $14,496 on each foreclosed property.

In July of this year alone, the VA paid 2,156 claims filed against it for property it had guaranteed. At an average of $14,496 per property, the VA lost over $31 million in that one month. We would have hoped that the economic upswing would have reduced the number of foreclosures on VA guaranteed properties, but that has not been the case. I am sure that my colleagues realize that this Government cannot afford hundreds of millions of dollars in losses annually under a single program. I am proposing, therefore, that a number of long overdue reforms be made in the administration and management of the program which would bring the program toward solvency in order to pro-

tect this important benefit for eligible veterans.

The VA's Office of the Inspector General released a report on September 30, which addresses the loan approval practices of the VA. The information contained in the report is shocking. The IG found that 14.1 percent of the loans made in fiscal year 1982 should not have been guaranteed by the VA because the veterans receiving those loans were not satisfactory credit risks. Half of those loans have already been foreclosed. That means that approximately 7,293 VA guaranteed loans made during fiscal year 1982 have been foreclosed. The VA has already lost $105.7 million on loans it guaranteed during fiscal year 1982. That is unacceptable. Can we truly believe that veterans—individually or as a group—are well served by such practices.

Therefore, I believe that the method in which the loan guaranty program is now being administered is adversely affecting many veterans. This program is meant to be a veterans benefit. Allowing a veteran to purchase a home he/she cannot afford does not benefit the veteran for whom the program was designed. My bill would require the Administrator of the VA to set and use a maximum debt-to-income ratio as a guideline for determining whether the veteran is a satisfactory credit risk. This type of credit underwriting is more in line with that used by the private lending institutions, and its use will reduce the number of foreclosures. The bill would also hold lending institutions liable for knowingly making loans to veterans who did not meet the credit underwriting standards. In addition, the Administrator would be permitted to waive the basic standard in the event that a veteran could demonstrate that an unusual or extraordinary case exists which warrants approval. A reduction in the number of bad loans will result in reduced losses within the loan guaranty revolving funding and in the fund analysis in the best interests of all veterans.

A second audit report by the VA inspector General addressed the VA appraisal system, and concluded that quality appraisals are not always being conducted by the fee based appraisers. Between October 1981 and January 1985, the VA paid claims on approximately 63,000 loans. The IG found that 42 percent of those foreclosed properties had declined in value. There are many factors which cause property value to decline, but the IG felt that an unacceptable number had been poorly appraised to begin with. Every time a VA guaranteed property receives an inflated initial appraisal, and later ends in foreclosure, the VA loses additional money. This bill would relieve the VA of its duty of determining the value of properties it guarantees, and turn that responsibility over to the industry which practices it on a day-to-day basis. The mortgage bankers are now accepting a greater portion of the risk involved in making these low to no downpayment loans and have every incentive, therefore, to ensure that quality appraisals are made. My bill would require that those same bankers be responsible for designating the appraiser who will determine the value of the property.

Another major problem within the loan guaranty system is the inordinate length of time it takes the VA to dispose of property it has acquired through foreclosure. The VA presently holds on to property an average of 10½ months. This bill would direct the VA to better utilize local realtors to dispose of their inventory of property in a more timely manner. The bill would also provide for the establishment of a pilot program under which a representative sample of the VA inventory of property would be managed and disposed of by a private company, which would also utilize the local real estate industry. The purpose of the program wolud be to enable the VA to determine the cost effectiveness of contracting with the private sector the property management functions of this program. I am very interested in knowing whether the average length of time it takes to resell a VA foreclosed property could be substantially reduced by contracting with a major firm with expertise in managing and disposing of residential properties.

Finally, the bill I am introducing would raise the limit of the amount of guaranty that could be paid on conventional property from $27,500 to $32,500. This would allow veterans greater purchasing power, especially in areas of high housing costs, and help to offset the rate of inflation since the last increase.

Mr. President, I feel that these changes are necessary if we are to continue to provide our veterans with a sound home loan guaranty program.

This legislation would also address the needs of Vietnam veterans who have not yet established themselves in steady, suitable employment. In 1983 Vietnam veterans faced an employment emergency. Their national unemployment rate was over 9 percent, significantly higher than the rate for their nonveteran peers. This situation was unacceptable and the Congress addressed it by enacting the Emergency Veterans' Job Training Act, an 18-month program to reimburse employers for the costs of training veterans on the job.

In September 1985, the unemployment rate for Vietnam veterans aged 30 to 45 was 4.6 percent, the same rate as nonveteran men the same age. For the Nation we can now say the "emergency" is over. The legislation I am introducing today would acknowledge the end of the emergency but would also respond to the need to continue the program for another year to be sure that the job we started during the unemployment emergency is fully carried out. I have proposed that for the duration of the program it be renamed the "Veterans' Job Training Act."

The Commitee on Veterans' Affairs, in hearings and through information provided by the interested organizations, has documented that, for many veterans and some areas of the country, the end of the national emergency has not resulted in an acceptable level of veterans' employment in stable, long-term jobs. Therefore, my bill would address these continuing needs by extending the renamed Veterans' Job Training Act for 1 year and authorizing an additional $55 million for the program. It would reduce the waiting time for unemployed veterans who wish to utilize this program by reducing the unemployment requirement from 15 to 10 of the 20 weeks prior to the veterans' application for benefits.

This legislation would also look to the future by directing an evaluation of the costs and benefits of integrating employer training cost reimbursement, the heart of the Veterans' Job Training Act, into the veterans' employment programs now administered by the Veterans' Employment and Training Service of the Department of Labor as a permanent program under part IV-c of the Joint Training Partnership Act. This evaluation would assess the advisability of continuing reimbursement to employers with the funds to be held and "triggered" by geographic or specific employment deficiencies.

Mr. President, there are two other provisions of my bill that I would like to outline at this time. One is a provision which would require the VA to collocate five regional offices on the grounds of VA medical centers by September 30, 1987. Currently the VA has nine regional offices which are located on the grounds of VA medical centers. This has proved to be a very efficient and worthwhile initiative and I understand that the VA Administrator has identified up to 25 other regional offices which could be colocated over the next several years. There might be some costs associated with the renovation of existing office space or even the need to build additional space. However, the benefits of collocating medical and benefits programs as well as the savings of the GSA rental costs clearly outweigh the disadvantages. The VA has estimated GSA leasing costs for its regional offices of $46,786,000 in fiscal year 1986 rising to $57,324,000 in fiscal year 1990.

A veteran who needs medical treatment and also benefits counseling or other services provided at a regional

office is inconvenienced by the need to go to two locations and deal with the same agency in two totally separate bureaucratic environments. I expect that over the next 5 years, the VA will move to collocate as many regional offices on the grounds or as close to the medical center as possible in order to streamline the benefits and medical care delivery system and become more cost efficient.

The last provision I would like to highlight is one that would provide an opportunity for veterans buried in national cemeteries to have upright markers at their gravesites. Over the past few years, the VA has established a policy that future gravesites will be marked with flat markers. The VA cites the trend toward adoption of flat markers in the private sector, as well as substantial cost savings as reasons to abandon upright markers. Some veterans and their families attach substantial significance to the use of upright markers. Besides the symbolic and aesthetic value of upright markers, there is a practical consideration as well. In cases where veterans are interred in national cemeteries located in northern tier States, upright markers are more easily seen in deep snow. Thus, when family members in such States visit the cemetery, they can better locate the graves of their loved ones. Therefore, my bill would provide that a veteran or the veteran's family could request an upright marker in all national cemeteries with the exception of those already established for the sole use of flat markers.

Mr. President, a cost-of-living adjustment for service-connected disabled veterans and their survivors, reform of the home loan guaranty program and veterans' employment are important issues requiring action by this body. I urge my colleagues to join me in supporting this legislation.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1788

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE AND REFERENCES

SECTION 1. (a) This Act may be cited as the "Veterans' Compensation and Benefits Improvements Act of 1985".

(b) Except as otherwise expressly provided, whenever in this Act an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of title 38, United States Code.

TITLE I—DISABILITY COMPENSATION AND DEPENDENCY AND INDEMNITY COMPENSATION RATE INCREASES

SEC. 101. (a) Section 314 is amended—

(1) by striking out "$66" in subsection (a) and inserting in lieu thereof "$68";

(2) by striking out "$122" in subsection (b) and inserting in lieu thereof "$127";

(3) by striking out "$185" in subsection (c) and inserting in lieu thereof "$192";

(4) by striking out "$266" in subsection (d) and inserting in lieu thereof "$276";

(5) by striking out "$376" in subsection (e) and inserting in lieu thereof "$390";

(6) by striking out "$474" in subsection (f) and inserting in lieu thereof "$492";

(7) by striking out "$598" in subsection (g) and inserting in lieu thereof "$620";

(8) by striking out "$692" in subsection (h) and inserting in lieu thereof "$718";

(9) by striking out "$779" in subsection (i) and inserting in lieu thereof "$808";

(10) by striking out "$1,295" in subsection (j) and inserting in lieu thereof "$1,343";

(11) by striking out "$1,609" and "$2,255" in subsection (k) and inserting in lieu thereof "$1,669" and "$2,338", respectively;

(12) by striking out "$1,609" in subsection (l) and inserting in lieu thereof "$1,669";

(13) by striking out "$1,774" in subsection (m) and inserting in lieu thereof "$1,840";

(14) by striking out "$2,017" in subsection (n) and inserting in lieu thereof "$2,092";

(15) by striking out "$2,255" each place it appears in subsections (o) and (p) and inserting in lieu thereof "$2,338";

(16) by striking out "$968" and "$1,442" in subsection (r) and inserting in lieu thereof "$1,004" and "$1,495", respectively;

(17) by striking out "$1,449" in subsection (s) and inserting in lieu thereof "$1,503"; and

(18) by striking out "$280" in subsection (t) and inserting in lieu thereof "$290".

(b) The Administrator of Veterans' Affairs may adjust administratively, consistent with the increases authorized by this section, the rates of disability compensation payable to persons within the purview of section 10 of Public Law 85-857 who are not in receipt of compensation payable pursuant to chapter 11 of title 38, United States Code.

ADDITIONAL COMPENSATION FOR DEPENDENTS

SEC. 102. Section 315(1) is amended—

(1) by striking out "$79" in clause (A) and inserting in lieu thereof "$82";

(2) by striking out "$132" and "$42" in clause (B) and inserting in lieu thereof "$137" and "$44", respectively;

(3) by striking out "$54" and "$42" in clause (C) and inserting in lieu thereof "$56" and "$44", respectively;

(4) by striking out "$64" in clause (D) and inserting in lieu thereof "$66";

(5) by striking out "$143" in clause (E) and inserting in lieu thereof "$148"; and

(6) by striking out "$120" in clause (F) and inserting in lieu thereof "$124".

CLOTHING ALLOWANCE FOR CERTAIN DISABLED VETERANS

SEC. 103. Section 362 is amended by striking out "$349" and inserting in lieu thereof "$362".

DEPENDENCY AND INDEMNITY COMPENSATION FOR SURVIVING SPOUSES

SEC 104 Section 411 is amended—

(1) by striking out the table in subsection (a) and inserting in lieu thereof the following:

"Pay grade	Monthly rate	Pay grade	Monthly rate
E-1	$494	W-4	$707
E-2	508	O-1	624
E-3	521	O-2	644
E-4	555	O-3	690
E-5	569	O-4	729
E-6	582	O-5	804
E-7	611	O-6	905
E-8	644	O-7	979
E-9	[1]673	O-8	1,073
W-1	624	O-9	1,152
W-2	649	O-10	[2]1,262
W-3	668		

"[1] If the veteran served as sergeant major of the Army, senior enlisted advisor of the Navy, chief master sergeant of the Air Force, sergeant major of the Marine Corps, or master chief petty officer of the Coast Guard, at the applicable time designated by section 402 of this title, the surviving spouse's rate shall be $726.

"[2] If the veteran served as Chairman of the Joint Chiefs of Staff, Chief of Staff of the Army, Chief of Naval Operations, Chief of Staff of the Air Force, Commandant of the Marine Corps, or Commandant of the Coast Guard, at the applicable time designated by section 402 of this title, the surviving spouse's rate shall be $1,353.";

(2) by striking out "$55" in subsection (b) and inserting in lieu thereof "$57";

(3) by striking out "$143" in subsection (c) and inserting in lieu thereof "$148"; and

(4) by striking out "$70" in subsection (d) and inserting in lieu thereof "$73".

DEPENDENCY AND INDEMNITY COMPENSATION FOR CHILDREN

SEC. 105. Section 413 is amended—

(1) by striking out "$240" in clause (1) and inserting in lieu thereof "$249";

(2) by striking out "$345" in clause (2) and inserting in lieu thereof "$358";

(3) by striking out "$446" in clause (3) and inserting in lieu thereof "$463"; and

(4) by striking out "$446" and "$90" in clause (4) and inserting in lieu thereof "$463" and "$93", respectively.

SUPPLEMENTAL DEPENDENCY AND INDEMNITY COMPENSATION FOR CHILDREN

SEC. 106. Section 414 is amended—

(1) by striking out "$143" in subsection (a) and inserting in lieu thereof "$148";

(2) by striking out "$240" in subsection (b) and inserting in lieu thereof "$249"; and

(3) by striking out "$122" in subsection (c) and inserting in lieu thereof "$127".

EFFECTIVE DATE

SEC. 107. Except as provided in section 108 of this Act, the amendments made by sections 101 through 106 of this Act shall take effect on December 1, 1985.

ALTERNATIVE RATE INCREASES

SEC. 108. (a)(1) If the percentage of the increase in benefit amounts under title II of the Social Security Act that will take effect on December 1, 1985, as a result of a determination under section 215(i) of such Act is not 3.7 percent—

(A) sections 101 through 106 of this Act shall not take effect; and

(B) the Administrator of Veterans' Affairs shall (i) compute alternative increased rates and limitations that are equal to those that would be arrived at by increasing, by the same percentage as the percentage by which such benefit amounts will thus be increased, each dollar amount that would have been increased by the amendments that would have been made by such sections, and (ii) effective December 1, 1985, pay benefits under chapters 11 and 13 of title 38, United States Code, in accordance with such alternative increased rates and limitations.

(2) In the computation of alternative increased rates and limitations pursuant to

paragraph (1)(B), amounts of $0.50 or more shall be rounded to the next higher dollar amount and amounts of less than $0.50 shall be rounded to the next lower dollar amount.

(b) The Administrator may adjust administratively, consistent with the increases authorized by this section, the rates of disability compensation payable to persons within the purview of section 10 of Public Law 85-857 who are not in receipt of compensation payable pursuant to chapter 11 of title 38, United States Code.

(c) If, under subsection (a) of this section, the Administrator is required to compute alternative increased rates and limitations, the Administrator shall publish in the Federal Register such alternative increased rates and limitations and the dollar amounts which would have been increased by the amendments which, but for subsection (a)(1) of this section, would have been made by sections 101 through 106 of this Act. The Administrator shall publish such rates and limitations at the same time as the material required by section 215(i)(2)(D) of the Social Security Act (42 U.S.C. 415(i)(2)(D)) is published by reason of a determination under section 215(i) of such Act.

TITLE II—EDUCATIONAL ASSISTANCE PROGRAM IMPROVEMENTS

DURATION AND LIMITATIONS ON ENTITLEMENT TO POST-VIETNAM ERA VETERANS' EDUCATIONAL ASSISTANCE

SEC. 201. Section 1632 is amended to read as follows:

"(a) Educational assistance benefits shall not be afforded an eligible veteran under this chapter more than 10 years after the date of such veteran's last discharge or release from active duty. In the case of any eligible veteran who was prevented from initiating or completing such veteran's chosen program of education during the delimiting period determined under the first sentence because of a physical or mental disability which was not the result of such veteran's own willful misconduct, such veteran shall, upon application made within 1 year after (1) the last date of the delimiting period otherwise applicable under this section, or (2) the termination date of the period of such mental or physical disability, whichever is later, be granted an extension of the applicable delimiting period for such period as the Administrator determines, from the evidence, that such veteran was so prevented from initiating or completing such program of education. When an extension of the applicable delimiting period is granted a veteran under the preceding sentence, the delimiting period with respect to such veteran shall again begin to run on the first day after such veteran's recovery from such disability on which it is reasonably feasible, as determined in accordance with regulations prescribed by the Administrator, for such veteran to initiate or resume pursuit of a program of education with educational assistance under this chapter.

"(b) In the event an eligible veteran has not utilized any or all of such veteran's entitlement by the end of the 10-year period applicable to the veteran under subsection (a) of this section, such eligible veteran is automatically disenrolled and any contributions made by such veteran remaining in the fund shall be refunded to the veteran after notice of disenrollment is transmitted to the veteran and the veteran applies for such refund. If no application is received within 1 year after the date the notice is transmitted to the veteran, it shall be presumed, for the purposes of section 1322(a) of title 31, that the individual's whereabouts is unknown and the funds shall be transferred as provided in such section.".

EDUCATIONAL AND VOCATIONAL COUNSELING UNDER THE VETERANS' EDUCATIONAL ASSISTANCE PROGRAM

SEC. 202. Section 1663 is amended by inserting immediately after the first sentence the following: "Such counseling shall be required prior to the selection of a program of education or training in any case in which the Administrator, having considered all pertinent evidence of record (including any court adjudication finding the veteran mentally incompetent), has rated the veteran as being incompetent.".

PERIODS OF ELIGIBILITY UNDER THE SURVIVORS' AND DEPENDENTS' EDUCATIONAL ASSISTANCE PROGRAM

SEC. 203. Section 1712(b) is amended by adding at the end thereof the following new paragraph (3):

"(3)(A) Notwithstanding the provisions of paragraph (1) of this subsection, in the case of any eligible person (as defined in clause (B), (C), or (D) of section 1701(a)(1) of this title) who was prevented from initiating or completing such person's chosen program of education within the delimiting period determined under subsection (a) of this section because of a delay in determining such person's eligibility, such person shall, subject to the approval of the Administrator, be permitted to elect a date referred to in subparagraph (B) of this paragraph to commence receiving educational assistance benefits under this chapter.

"(B) The date which an eligible person may elect for the purposes of subparagraph (A) of this paragraph is any date during the period beginning on the date the person became an eligible person within the meaning of clause (B), (C), or (D) of section 1701(a)(1) of this title and ending on the date determined under subparagraph (A), (B), or (C) of paragraph (1) of this subsection to be applicable to such person.".

EDUCATIONAL AND VOCATIONAL COUNSELING UNDER THE SURVIVORS' AND DEPENDENTS' EDUCATIONAL ASSISTANCE PROGRAM

SEC. 204. (a) Section 1720 is amended to read as follows:

"§ 1720. Educational and vocational counseling

"The Administrator may, upon request, arrange for educational or vocational counseling for persons eligible for benefits under this chapter to assist such persons in selecting their educational, vocational, or professional objectives and in developing their programs of education.".

(b)(1) Section 1721 is amended by—

(A) striking out "finally";

(B) striking out clause (1); and

(C) redesignating clauses (2), (3), (4), and (5) as clauses (1), (2), (3), and (4), respectively; and

(2) The catchline of such section is amended to read as follows:

"§ 1721. Approval of application".

(c) The items relating to sections 1720 and 1721 in the table of sections at the beginning of chapter 35 are amended to read as follows:

"1720. Educational and vocational counseling.
"1721. Approval of application.".

EDUCATIONAL ASSISTANCE FOR NONDEGREE PROGRAMS

SEC. 205. (a)(1) Section 1780(a) is amended—

(A) in clause (1), by inserting ", or enrolled in a course which does not lead to a standard college degree if the educational institution offering the course offers courses leading to a standard college degree and courses not leading to a standard college degree and is a fully accredited institution of higher learning," after "college degree"; and

(B) in clause (2), by inserting ", if the educational institution offering the course is not a fully accredited institution of higher learning or does not offer courses leading to a standard college degree and courses not leading to a standard college degree," after "title)".

(2) The third sentence of section 1788(a) is amended by inserting before the period at the end thereof the following: "unless the educational institution offering the course offers courses leading to a standard college degree and courses not leading to a standard college degree and is a fully accredited institution of higher learning".

(b)(1) The amendments made by subsection (a) of this section shall take effect September 1, 1986.

(2) Benefits shall not accrue by reason of such amendments for periods before September 1, 1986.

PAYMENT OF EDUCATIONAL ASSISTANCE

SEC. 206. Section 1780(f) is amended to read as follows:

"(f) Payment of educational assistance allowance in the case of any eligible veteran or eligible person pursuing a program of education at an educational institution on less than a half-time basis shall be made in an amount computed for the entire quarter, semester, or term at the rate provided in section 1682(b) or 1732(a)(2) of this title, as applicable. Such lump-sum payment shall be made only after the Administrator receives certification from the educational institution that such veteran or person has enrolled in and is pursuing a program at such institution.".

PROHIBITION ON BENEFITS UNDER MORE THAN ONE EDUCATIONAL ASSISTANCE PROGRAM

SEC. 207. Section 1781(b) is amended by striking out "for the pursuit of the same program of education".

DELAY OF CERTAIN REPORTS

SEC. 208. Section 1784(a) is amended—

(1) by striking out "(a) The" and inserting in lieu thereof "(a)(1) Except as provided in paragraph (2) of this subsection, the"; and

(2) by adding at the end thereof the following new paragraph (2):

"(2) In the case of a program of independent study pursued on a less than half-time basis in an educational institution, the Administrator may, upon request by the educational institution, approve a delay by the institution in reporting the enrollment or reenrollment of an eligible veteran or eligible person until the end of the term, quarter, or semester.".

REPEAL OF EDUCATION LOAN PROGRAM

SEC. 209. (a) Section 1662(a) is amended by—

(1) striking out paragraph (2); and

(2) redesignating paragraph (3) as paragraph (2).

(b) Section 1682A is repealed.

(c) Section 1686 is repealed.

(d) Section 1712 is amended by—

(1) striking out subsection (f); and

(2) redesignating subsection (g) as subsection (f).

(e) Section 1737 is repealed.

(f) Section 1738 is repealed.

(g) Subchapter III of chapter 36 is repealed.

TECHNICAL AMENDMENTS

SEC. 210. (a)(1) The catchline at the beginning of section 1631 is amended to read as follows:

"§ 1631. Entitlement; payment of benefits".

(2) The table of sections at the beginning of chapter 32 is amended by striking out the item relating to section 1631 and inserting in lieu thereof the following:

"1631. Entitlement; payment of benefits.".

(b) The table of sections at the beginning of chapter 34 is amended by striking out the items relating to sections 1682A and 1686.

(c) The table of sections at the beginning of chapter 35 is amended by striking out the items relating to sections 1737 and 1738.

(d) The table of sections at the beginning of chapter 36 is amended by striking out the items relating to subchapter III and sections 1798 and 1799.

SAVINGS PROVISION

SEC. 211. Notwithstanding the provisions of section 209(g) of this Act—

(1) the Administrator is authorized, with respect to education loans made prior to the date of enactment of this Act, to continue to collect loan principal and interest due, and to declare and recover (or discharge) overpayments, pursuant to the provisions of section 1798, as such section was in effect on the day before the effective date of this Act; and

(2) the Veterans' Administration Education Loan Fund, established by former section 1799(a), shall continue to be maintained in the Treasury of the United States for deposit of the collections referred to in clause (1) of this section, and the Administrator is authorized to transfer all or any part of the sums contained therein to the appropriation for readjustment benefits, from time to time, to be used for the purposes of that appropriation.

TITLE III—HOME LOAN GUARANTY PROGRAM IMPROVEMENTS

CREDIT UNDERWRITING STANDARD

SEC. 301. (a) Section 1810(b)(3) is amended by inserting ", as determined in accordance with the credit underwriting standards prescribed pursuant to subsection (g) of this section" before the semicolon at the end.

(b) Section 1810 is further amended by adding at the end thereof the following new subsections:

"(g)(1) For the purposes of this subsection, the term 'veteran', when used with respect to a loan guaranteed or to be guaranteed under this chapter, includes the veteran's spouse if the spouse is jointly liable with the veteran under the loan.

"(2) For the purpose of determining whether a veteran meets the standards set out in subsection (b)(3) of this section and section 1819(e)(2) of this title, the Administrator shall prescribe in regulations—

"(A) credit underwriting standards to be used in evaluating loans to be guaranteed under this chapter; and

"(B) standards to be used by lenders in obtaining credit information and processing loans to be guaranteed under this chapter.

"(3) In carrying out paragraph (2)(A) of this subsection, the Administrator shall prescribe standards that—

"(A) establish—

"(i) a maximum debt-to-income ratio to apply in the case of the veteran receiving the loan;

"(ii) criteria for evaluating the reliability and stability of the income of the veteran receiving the loan; and

"(iii) procedures for ascertaining the monthly income required by the veteran to meet the anticipated loan payment terms; and

"(B) are designed—

"(i) to assure that, to the maximum extent practicable, a loan guaranteed or made under this chapter will be repaid by the veteran receiving the loan in accordance with the loan agreement;

"(ii) reflect the loan underwriting principles generally accepted and used by commercial lending institutions.

"(4)(A) In carrying out paragraph (2)(B) of this subsection, the Administrator shall prescribe standards that reflect the loan underwriting procedures that are generally accepted and used by commercial lending institutions and are designed to assure that the lender obtains accurate information on prospective veteran borrowers.

"(B) The standards prescribed under paragraph (2)(B) of this subsection as provided in subparagraph (A) of this paragraph shall include—

"(i) procedures for obtaining verifications of the income, employment, and debts of the veteran; and

"(ii) criteria for acceptable credit reports.

"(5)(A) Any lender submitting a loan to the Administrator to be guaranteed under this chapter shall certify, in such form as the Administrator shall prescribe, that the lender has complied with the credit information and loan processing standards prescribed pursuant to paragraph (2)(B) of this subsection, and that, to the best of the lender's knowledge and belief, the proposed loan meets the underwriting standards prescribed pursuant to paragraph (2)(A) of this subsection.

"(B) Any lender who knowingly makes a false certification with respect to a loan under subparagraph (A) of this paragraph shall be liable for a civil penalty equal to two times the amount of the Administrator's loss on such loan or $10,000, whichever is greater. All determinations necessary to carry out this subparagraph shall be made by the Administrator.

"(6) The Administrator may waive the application of the credit underwriting standards prescribed pursuant to this subsection in extraordinary circumstances. The Administrator shall prescribe restrictive guidelines specifying the criteria under which a waiver may be made under this paragraph.

"(h) The Administrator shall require each veteran who applies for a loan to be guaranteed under this chapter to certify whether the veteran has or has not been previously rejected for a loan for which the property which was to be used as the security is the same property which is to be used as security for the loan to be guaranteed under this chapter.".

(c) Section 1819(e)(2) is amended by inserting "as determined in accordance with the credit underwriting standards prescribed pursuant to section 1810(g) of this title and" after "credit risk,".

LOAN GUARANTY AMOUNT

SEC. 302. (a) Section 1810(c) is amended by striking out "$27,500" and inserting in lieu thereof "$32,500".

(b) Section 1811(d)(2)(A) is amended by striking out "$27,500" each place it appears and inserting in lieu thereof "$32,500".

DEFAULT NOTIFICATION AND FORECLOSURE PROCEDURES; FORECLOSURE INFORMATION

SEC. 303. (a) The first sentence of section 1816(a)(1) is amended to read as follows: "The holder of a loan guaranteed under this chapter shall promptly notify the Administrator of any failure of the debtor under the loan to make two consecutive monthly payments due on the loan.".

(b) Section 1816(a)(2) is amended by inserting before the first sentence the following: "Within 15 days after the first date on which a veteran has failed to make four consecutive monthly payments due on any loan guaranteed under this chapter, the holder of the loan shall initiate foreclosure.".

(c) Section 1816 is further amended by adding at the end thereof the following new subsections:

"(e) If a holder of a loan guaranteed under this chapter fails to initiate foreclosure on the loan as required by paragraph (2) of this subsection, other than during a period of forebearance approved by the Administrator under such paragraph, the Administrator shall not be liable under the guarantee for interest accruing on such loan during the period beginning on the date the holder should have initiated the foreclosure and ending on the date the holder initiates the foreclosure.

"(f)(1) The Administrator shall identify and compile information on common factors which contribute to foreclosures on loans guaranteed under this chapter.

"(2) The Administrator shall transmit to the Committees on Veterans' Affairs of the Senate and the House of Representatives an annual report on the Administrator's findings under paragraph (1) of this subsection.".

FORECLOSED LOANS PROPERTY MANAGEMENT PILOT PROGRAM

SEC. 304. (a) Subchapter II of chapter 37 is amended by adding at the end thereof the following new section:

"§ 1819A. Foreclosed loans property management pilot program

"(a) In order to evaluate the effectiveness, feasibility, and desirability of contracting with commercial organizations to perform the functions of management and disposal of property acquired by the Veterans' Administration under this chapter, the Administrator of Veterans' Affairs, during the period beginning April 1, 1986, and ending September 30, 1987, shall conduct a pilot program to contract with commercial organizations for the performance of such functions.

"(b) In order to carry out the pilot program under this section, the Administrator shall—

"(1) designate a representative nationwide sample of 10 percent of the inventory of properties held by the Veterans' Administration and referred to in subsection (a) of this section; and

"(2) enter into contracts with commercial organizations which would utilize local real estate brokers and other real estate sales professionals to manage and dispose of the properties in the designated sample.

"(c) Not later than March 3, 1988, the Administrator shall transmit to the Committees on Veterans' Affairs of the Senate and the House of Representatives a report on the experience under the pilot program. The report shall include—

"(1) the Administrator's assessment of—

"(A) the effectiveness of the program in providing quality management and timely disposition of properties acquired by the Veterans' Administration under this chapter; and

"(B) the cost-effectiveness of the program determined by comparing the cost of the program to the cost of management and dis-

posal of properties by the Veterans' Administration;

"(2) a description of the effects, if any, which the program had on the functions and duties performed by employees of the Veterans' Administration; and

"(3) any recommendations for legislation which the Administrator considers appropriate.".

(b) The analysis at the beginning of such chapter is amended by inserting after the item relating to section 1819 the following new item:

"1819A. Foreclosed loans property management pilot program.".

USE OF ATTORNEYS IN HOME LOAN FORECLOSURES

SEC. 305. The second sentence of section 1830(a) is amended by striking out "With the concurrence of the Attorney General of the United States, the" and inserting in lieu thereof "The".

DETERMINATIONS OF REASONABLE VALUE

SEC. 306. (a)(1) Subchapter III of chapter 37 is amended by adding at the end thereof the following new section 1831:

"§ 1831. Determination of reasonable value

"Whenever the reasonable value of any property, construction, repairs, or alterations is required to be made for the purposes of this chapter in connection with a loan guaranteed or proposed to be guaranteed under this chapter, the reasonable value shall be determined by an appraiser designated by the lender of such loan.".

(2) The chapter analysis at the beginning of such chapter is amended by inserting after the item relating to section 1830 the following new item:

"1831. Determination of reasonable value.".

(b) Section 1810(b)(5) is amended by striking out "as determined by the Administrator".

(c) Section 1819(e)(4) is amended by striking out ", as determined by the Administrator" in subclauses (B) and (C).

USE OF REAL ESTATE PROFESSIONALS TO DISPOSE OF FORECLOSED PROPERTY

SEC. 307. (a) Subchapter III of chapter 37, as amended by section 306 of this Act, is further amended by adding at the end thereof the following new section 1832:

"§ 1832. Use of real estate professionals to dispose of foreclosed property

"(a) The Administrator shall furnish to real estate brokers and other real estate professionals information on the availability of real property for disposition under this chapter and the procedures used by the Veterans' Administration to dispose of such property.

"(b) The Administrator shall, to the maximum extent practicable—

"(1) coordinate with real estate brokers and other real estate sales professionals for the purpose of expeditiously disposing of property acquired by the Veterans' Administration under this chapter; and

"(2) allocate sufficient resources to carry out the purpose specified in clause (1) of this subsection.".

(b) The chapter analysis at the beginning of such chapter is amended by inserting after the item relating to section 1831, as added by section 306(a)(2) of this Act, the following new item:

"1832. Use of real estate professionals to dispose of foreclosed property.".

TASK FORCE ON MANAGEMENT AND DISPOSITION OF PROPERTY

SEC. 308. (a) Subchapter III of chapter 37, as amended by sections 306 and 307 of this Act, is further amended by adding at the end thereof the following new section 1833:

"§ 1833. Task Force on Management and Disposition of Property

"(a)(1) The Administrator shall establish a task force to be known as the Task Force on Management and Disposition of Property (hereafter in this section referred to as the "Task Force").

"(2) The purposes of the Task Force are—

"(A) to exchange information between the Veterans' Administration and the real estate industry on efficient real property management and disposition practices and current developments in such practices; and

"(B) to advise the Administrator on ways to improve the manner in which the Veterans' Administration manages and disposes of real property acquired under this chapter.

"(3) The members of the Task Force shall be appointed by the Administrator and shall include—

"(A) appropriate representatives of the Veterans' Administration;

"(B) real estate brokers and other real estate sales professionals; and

"(C) representatives of residential real property management businesses.

"(4) The Administrator shall designate one member of the Task Force to be the Chairman.

"(5) The Administrator shall prescribe the number and terms of service (not to exceed 3 years) of members of the Task Force and the pay and allowances payable for service on the Task Force in the case of members of the Task Force who are not employees of the Federal Government.

"(b) The Administrator shall, on a regular basis, consult with and seek the advice of the Task Force with respect to matters relating to the purposes of the Task Force.

"(c)(1) Not later than July 1, 1986, and not later than July 1 of each second year thereafter, the Task Force shall submit to the Administrator a report on the activities of the Task Force during the preceding year and such recommendations relating to the purposes of the Task Force as the Task Force considers appropriate.

"(2) The Task Force may also submit to the Administrator such other reports relating to the purposes of the Task Force as the Task Force considers appropriate and may include recommendations with respect to matters relating to such purposes in such reports.

"(d)(1) Not later than 30 days after the date the Administrator receives an annual report required by subsection (c)(1) of this section, the Administrator shall submit such report to the Committees on Veterans' Affairs of the Senate and the House of Representatives. The Administrator shall include with such report any comments concerning the report that the Administrator considers appropriate.

"(2) The Administrator shall submit with each annual report submitted to the Congress pursuant to section 214 of this title—

"(A) a summary of all reports and recommendations submitted by the Task Force pursuant to subsection (c) of this section since the date on which the previous annual report was submitted under such section 214; and

"(B) a summary of all actions taken by the Administrator since such date to implement any recommendations made to the Administrator by the Task Force under subsection (c) of this section before, on, or after such date.

"(e) The Administrator shall furnish the Task Force such administrative services as is necessary for the Task Force to carry out its functions under this section.".

(b) The chapter analysis at the beginning of such chapter is amended by inserting after the item relating to section 1832, as added by section 307(a) of this Act, the following new item:

"1833. Task Force on Management and Disposition of Property.".

EFFECTIVE DATES

SEC. 309. (a) The amendments made by sections 301, 302, and 303 shall take effect 180 days after the date of enactment of this Act.

(b) The amendment made by section 306 shall take effect with respect to loans guaranteed under chapter 37 more than 180 days after the date of enactment of this Act.

TITLE IV—MISCELLANEOUS PROVISIONS

NATIONAL CEMETERY GRAVE MARKERS

SEC. 401. (a) Section 1004(c) is amended—

(1) by inserting "(1)" after "(c)"; and

(2) by adding at the end thereof the following new paragraphs (2) and (3):

"(2)(A) The Administrator shall designate a section in each national cemetery in which a person eligible for interment may be buried in a grave to be marked with an upright grave marker.

"(B) Subparagraph (A) shall not apply to a national cemetery established before the date of enactment of the Veterans' Compensation and Benefits Improvements Act of 1985 if the Administrator has never authorized graves in such cemetery to be marked with upright markers.

"(3)(A) Except as provided in subparagraph (B) of this paragraph, each marker in a national cemetery shall be flat.

"(B) If the person to be buried in a national cemetery (or the survivor or the legal representative of the person to be buried) has requested that the person's grave be marked with an upright marker, the person shall be buried in a cemetery section designated for graves marked with upright markers, and an upright marker shall be used to mark the grave of such person.".

(b) The amendments made by subsection (a) shall apply with respect to markers for the graves of persons who die on or after January 1, 1986.

MEMORIAL AREAS IN ARLINGTON NATIONAL CEMETERY

SEC. 402. (a) Chapter 75 of title 10, United States Code, is amended by adding at the end thereof the following new section 1491:

"§ 1491. Memorial areas in Arlington National Cemetery

"(a) The Secretary of the Army may set aside, when available, suitable areas in Arlington National Cemetery, Virginia, to honor the memory of members of the armed forces and veterans (as defined in section 101(2) of title 38)—

"(1) who are missing in action;

"(2) whose remains have not been recovered or identified;

"(3) whose remains were buried at sea, whether by the member's or veteran's own choice or otherwise;

"(4) whose remains were donated to science; or

"(5) whose remains were cremated and whose ashes were scattered without interment of any portion of the ashes.

"(b) Under regulations prescribed by the Secretary, appropriate memorials or markers may be erected in Arlington National Cemetery to honor the memory of those individuals, or group of individuals, referred to in subsection (a).".

(b) The table of sections at the beginning of such chapter is amended by adding at the end thereof the following new item:

"1491. Memorial areas in Arlington National Cemetery.".

ESTATE LIMITATIONS RELATING TO INCOMPETENT INSTITUTIONALIZED VETERANS

SEC. 403. Section 3203(b)(1)(A) is amended—

(1) by striking out "$1,500" and inserting in lieu thereof "$8,000"; and

(2) by striking out "$500" and inserting in lieu thereof "$2,000".

EVALUATION OF THE NEEDS OF NATIVE AMERICAN VETERANS

SEC. 404. (a)(1) The Administrator of Veterans' Affairs shall conduct an evaluation to determine the extent to which the programs and other activities of the Veterans' Administration meet the needs of veterans who are Native Americans, including Alaska Natives (as defined in section 3(b) of the Alaska Native Claims Settlement Act (85 Stat. 689; 43 U.S.C. 1602(b)).

(2) The evaluation required by paragraph (1) shall include—

(A) an assessment of the needs of the veterans referred to in such paragraph for health care, rehabilitation, readjustment counseling, drug and alcohol counseling, outreach services, and other benefits and assistance under programs administered by the Veterans' Administration; and

(B) a review of the manner in which and the extent to which the programs and other activities of the Veterans' Administration meet such needs.

(b) In conducting the evaluation required by subsection (a), the Administrator may utilize information or studies which have been obtained or completed by other departments, agencies, or instrumentalities of the Federal Government or by any State or local government, as the Administrator considers appropriate.

(c) Not later than October 1, 1987, the Administrator shall transmit to the Committees on Veterans' Affairs of the Senate and the House of Representatives a report of the Administrator's findings resulting from the evaluation required by subsection (a).

COLLOCATION OF REGIONAL OFFICES AND MEDICAL CENTERS; CONSOLIDATION OF REGIONAL OFFICES

SEC. 405. (a)(1) Not later than September 30, 1987, the Administrator of Veterans' Affairs shall collocate at least 5 regional offices of the Veterans' Administration described in paragraph (3) with Veterans' Administration medical centers.

(2)(A) Not later than September 30, 1986, the Administrator shall report to the Committees on Veterans' Affairs of the Senate and the House of Representatives on the feasibility of collocating more than 5 regional offices of the Veterans' Administration described in paragraph (3) with Veterans' Administration medical centers.

(B) The report required by subparagraph (A) shall include—

(i) an analysis of the estimated costs and savings which would result from the collocations; and

(ii) the benefits and costs of furnishing personnel, supply, administration, and finance services and other supporting services jointly to regional offices of the Veterans' Administration and Veterans' Administration medical centers.

(3) The regional offices referred to in paragraphs (1) and (2) are regional offices of the Veterans' Administration which are not located at Veterans' Administration medical centers on the date of the enactment of this Act.

(b)(1) The Administrator of Veterans' Affairs shall assess the benefits and costs of combining regional offices of the Veterans' Administration which, on the date of enactment of this Act, are located near each other.

(2) The Administrator shall include the results of the assessment required by paragraph (1) in the report required by subsection (a)(2).

REDESIGNATION AND EXTENSION OF THE EMERGENCY VETERANS' JOB TRAINING ACT OF 1983

SEC. 406. (a)(1) The first sentence of section 1 of Public Law 98-77 (29 U.S.C. 1721 note) is amended to read as follows: "This Act may be cited as the 'Veterans' Job Training Act of 1983'.".

(2) Any reference in any Federal law to the Emergency Veterans' Job Training Act of 1983 shall be deemed to refer to the Veterans' Job Training Act of 1983.

(b) Section 16 of such Act is amended by inserting "and $55,000,000 for fiscal year 1986" in the first sentence after "and 1985".

(c) Section 17 of such Act is amended—

(1) in clause (1), by striking out "after February 28, 1985" and inserting in lieu thereof "more than one year after the date of enactment of the Veterans' Compensation and Benefits Improvements Act of 1985";

(2) in clause (2), by striking out "after July 1, 1986" and inserting in lieu thereof "more than 18 months after the date of enactment of the Veterans' Compensation and Benefits Improvements Act of 1985";

(3) by inserting "(a)" after "Sec. 17."; and

(4) by adding at the end thereof the following new subsection:

"(b) Notwithstanding subsection (a), if funds are not appropriated for fiscal year 1986 pursuant to the authorization contained in section 16 and made available by the Director of the Office of Management and Budget on or before January 1, 1986, for the purpose of making payments to employers under this Act, assistance may be paid to an employer under this Act on behalf of a veteran if the veteran—

"(1) applies for a program of job training under this Act within one year after the date on which funds so appropriated are made available to the Veterans' Administration by the Director; and

"(2) begins participation in such program within 18 months after such date.".

(d) Section 5(a)(1)(B) of such Act is amended by striking out "fifteen of the twenty" and inserting in lieu thereof "10 of the 20".

EVALUATION OF VETERANS' JOB TRAINING

SEC. 407. (a) For the purposes of this section:

(1) The term "private industry council" means a private industry council established pursuant to section 102 of the Job Training Partnership Act (29 U.S.C. 1512).

(2) The term "service delivery area" means a service delivery area established pursuant to section 101 of the Job Training Partnership Act (29 U.S.C. 1511).

(b)(1) The Secretary of Labor shall evaluate the feasibility and advisability of establishing and administering, under part C of title IV of the Job Training Partnership Act, a program described in paragraph (2).

(2) The program referred to in paragraph (1) is a program under which, upon the Secretary's determination and declaration of a severe State or regional employment deficiency or a veterans' employment deficiency in a State or service delivery area, grants are made from a veterans' job training grant fund to a State or appropriate private industry council to fund an on-the-job training program which is similar in structure and purpose to the job training program established under the Veterans' Job Training Act of 1983 (as redesignated by section 405(a)(1)) and is to be conducted in such State or service delivery area.

(c) Not later than 90 days after the date of enactment of this Act, the Secretary of Labor shall transmit to the Committees on Veterans' Affairs of the Senate and the House of Representatives a report on the evaluation made under subsection (b). The report shall include—

(1) recommended definitions, standards, and implementation procedures for declaring and determining the duration of a severe State or regional employment deficiency and a veterans' employment deficiency in a State or service delivery area;

(2) recommended procedures for commencing a job training program in a State or service delivery area and for making financial assistance and other resources available for such job training program when a veterans employment emergency is declared with respect to the State or service delivery area;

(3) recommended procedures for administering an emergency veterans' job training grant fund, including recommended minimum and maximum amounts to be maintained in such grant fund, and appropriate amounts to be authorized;

(4) recommended limits on the amounts of grants to be made to any grantee;

(5) recommended veteran and employer eligibility criteria and entry and completion requirements;

(6) a description of the support and counseling services that are necessary to carry out a State or service delivery area job training program;

(7) the recommended division or divisions of the Department of Labor which would be appropriate—

(A) to administer a grant program described in subsection (b), including the contracting and monitoring functions;

(B) to determine the eligibility criteria for applicants for training and for employer certifications;

(C) to establish findings of veterans' employment deficiencies in States and service delivery areas; and

(D) to verify the level of compliance of grantees, veterans, and employers with the requirements of the grant program and the job training programs funded by the grant program;

(8) the estimated costs of administering and monitoring a job training grant program to be established under part C of title IV of the Job Training Partnership Act; and

(9) such other findings and recommendations, including any recommendations for legislation, which the Secretary considers appropriate.

Mr. THURMOND. Mr. President, I am pleased to join Senator MURKOWSKI in sponsoring this legislation to improve the benefits provided to our Nation's veterans. I have always felt that the highest obligation of American citizenship is to provide for the defense of the freedoms and ideals inherent to our great land. We as a grateful Nation, in turn, have the responsibility to see that those who have given of

themselves for their country are provided adequate compensation for their losses. I believe that we will continue to do just that through this legislation.

The bill we have introduced includes a number of provisions which I feel are especially necessary. It provides for a cost-of-living adjustment of up to 3.7 percent for the veterans who receive compensation for their service-connected disabilities. The wounds and injuries suffered by these men and women are silent testimony of their devotion to their country. We cannot allow inflation to erode the compensation that represents our most tangible recognition of their sacrifice.

This bill also includes a provision addressing the employment situation of our Vietnam veterans. This has long been an issue of utmost importance to me. The Emergency Veterans' Job Training Act should be extended and the eligibility requirements made less strict. This bill meets both of those objectives. The program, to be called the Veterans' Job Training Act, would be extended for 1 year. It would have less stringent eligibility requirements, and additional funding would be provided in order that more veterans could be assisted in their effort to gain employment.

This bill also incorporates the provisions of S. 1207, which I introduced earlier in this Congress. These provisions address the problem of the inequities faced by veterans who pursue vocational education as opposed to a traditional academic degree. The legislation which I proposed, and which is now included in this bill, would permit credit hour measurement of vocational training pursued at fully accredited institutions of higher learning, and would establish parity in attendance reporting and payment requirements for both standard college degree and nondegree vocational courses offered by those institutions.

Mr. President, I urge my colleagues to join me in supporting this bill which will benefit those Americans who have done so much. The veterans of our Armed Forces continue to look to those of us in Congress to ensure that their service and sacrifice will be recognized, acknowledged and rewarded.

By Mr. KERRY:

S. 1789. A bill to amend the Federal Election Campaign Act of 1971 to provide for the public financing of Senate general election campaigns by eliminating the tax credit for political contributions; to the Committee on Finance.

DEFICIT REDUCTION CAMPAIGN FINANCE REFORM ACT

● Mr. KERRY. Mr. President, I am today introducing a bill to provide for full public financing of Senate general election campaigns. Under this amendment, public financing would replace contributions by both individuals and political action committees not merely without cost to the Treasury, but with deficit reduction. For this reason, I have entitled this bill the "Deficit Reduction Campaign Finance Reform Act."

All of us have experienced first hand the burden that massive increases in the cost of running for elective office have placed on our political system. We have seen increased reliance on interest groups for campaign funds at the same time that candidates for public office have been forced to devote more and more of their time on raising funds for campaigns—time better spent on carrying out their work as public officials and as candidates.

At the same time, calls for public financing of campaigns have been met by the justifiable concern that public financing of congressional elections would be too costly, especially in a period when we are seeking to reduce the Federal deficit, rather than increase it.

To meet these concerns, the Deficit Reduction Campaign Finance Reform Act provides for public financing of congressional elections by eliminating the current tax credit for political contributions by individuals—50 percent of contributions up to $100 credit per individual, and applying that previously foregone revenue to a newly created Senate general election campaign fund.

As a result, Senate races would be funded in the general election without increasing the Federal deficit either now or in the future, but, in fact, lowering the Federal deficit.

The relevant statistics are as follows:

In recent years, the Government has spent an average of $265 million annually on foregone tax revenues to individuals making political contributions. Recent available figures are: $269.4 million, 1980; $262 million, 1981; $269.8 million, 1982; $256.9 million, 1983. This amounts to at least $520 million per election cycle.

Only 5 to 5.5 percent of the American public has taken this tax credit annually.

Total congressional election campaign expenditures in the 1984 cycle amounted to $377 million. CRS analysts estimate that half of this money is attributable to primaries, and half to the general election campaign. Thus, this fund could pay for all election campaign costs, if it were funded by the foregone credit. Revenues from the foregone credit are clearly more than adequate to fund general election public financing.

The specific calculations are as follows: $530 million available each election cycle; $85 million necessary for full funding of Senate general election; $103 million necessary for full funding of House general election; and $342 million available for deficit reduction.

This legislation encompasses a number of concepts first developed by Philip M. Stern, cochairman of the organization Citizens Against PAC's, and incorporated by Senators MATHIAS and SIMON in their campaign finance legislation, which unfortunately does not contain a funding mechanism. With this new mechanism, the legislation can both provide full funding of Senate general elections while reducing the Federal budget deficit.

We may have an opportunity to act swiftly to engage in this fundamental reform of campaign finance law. I urge my colleagues to support this reform bill, and ask unanimous consent that the text of the bill be inserted in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1789

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Deficit Reduction Campaign Finance Reform Act."

SEC. 2. The Federal Election Campaign Act of 1971 is amended by adding at the end thereof the following new subchapter:

"SUBCHAPTER III—PUBLIC FINANCING OF SENATE GENERAL ELECTION CAMPAIGNS

"DEFINITIONS

"SEC. 501. For purposes of this subchapter—

"(1) unless otherwise provided in this subchapter the definitions set forth in section 301 of this Act apply to this subchapter;

"(2) 'authorized committee' means, with respect to any candidate for election to the United States Senate, any political committee which is authorized in writing by such candidate to accept contributions, incur expenses, or make expenditures on behalf of such candidate to further the election of such candidate. Such authorization shall be addressed to the chairman of the political committee, and a copy of such authorization shall be filed by each candidate with the Commission. A withdrawal of any authorization shall be in writing and shall be addressed and filed in the same manner as the authorization;

"(3) 'candidate' means an individual who has been nominated for election to the office of United States Senator by a major or minor party or who has qualified to have his or her name on the general election ballot;

"(4) 'eligible candidate' means a candidate who is eligible, under section 502, for payments under this subchapter;

"(5) 'expenditure report period' with respect to an election means—

"(A) in the case of a major party candidate, the period beginning on the date such candidate becomes an eligible candidate and ending 30 days after the date of the election or the date such candidate is no longer an eligible candidate, whichever date is earlier; or

"(B) in the case of a candidate other than a candidate of a major party, the same period as the expenditure report period of

the major party which has the shortest expenditure report period for such election;

"(6) 'election' means any regularly scheduled general, special, or runoff election, other than a primary election, held to elect a candidate to the United States Senate;

"(7) 'fund' means the Senate General Election Campaign Fund maintained by the Secretary of the Treasury pursuant to section 506;

"(8) 'major party' means with respect to any election, a political party whose candidate for the office of United States Senator in any of the three preceding elections received, as the candidate of such party, 25 percent or more of the total number of popular votes received by all candidates for such office;

"(9) 'minor party' means with respect to any election, a political party whose candidate for the office of Senator in any of the three preceding elections received, as the candidate of such party, 5 percent or more, but less than 25 percent of the total number of popular votes received by all candidates for such office;

"(10) the term 'qualified campaign expense' means an expense—

"(A) incurred by the candidate or the authorized committee of the candidate for the office of United States Senator to further his or her election to such office,

"(B) incurred within the expenditure report period, or incurred before the beginning of such period to the extent such expense is for property, services, or facilities used during such period, and

"(C) neither the incurring nor paying of which constitutes a violation of any law of the United States or of the State in which such expense is incurred or paid.

An expense shall be considered as incurred by a candidate or an authorized committee if it is incurred by a person authorized by such candidate or such committee, as the case may be, for expenses on behalf of such candidate or such committee.

"CONDITION FOR ELIGIBILITY FOR PAYMENTS

"SEC. 502. (a) In order to be eligible to receive any payments under this subchapter, the candidate shall agree, in writing—

"(1) to obtain and furnish to the Commission such evidence as it may request of the qualified campaign expenses and contributions of such candidate,

"(2) to keep and furnish to the Commission such records, books, and other information as it may request, and

"(3) to an audit and examination by the Commission under section 507 and to pay or repay any amounts required under such section.

"(b) To be eligible to receive payments under section 503, the candidate of a major party shall certify to the Commission, under penalty of perjury, that—

"(1) such candidate is seeking election to the United States Senate and such candidate and at least one other major party or minor party candidate have qualified for the election ballot under the law of the State involved,

"(2) such candidate and the authorized committees of such candidate will not incur qualified campaign expenses in excess of the aggregate payments to which they are entitled under section 503, unless otherwise provided in this subchapter,

"(3) no contributions to defray qualified campaign expenses have been or will be accepted by such candidate or any of the authorized committees of such candidate except to the extent necessary to make up any deficiency in payments received out of the fund because of the application of section 506(c), and

"(4) no contributions have been or will be accepted by such candidate or any authorized committees of such candidate to defray expenses which are not qualified campaign expenses.

"(c) In order to be eligible to receive any payments under this subchapter, a candidate other than a candidate of a major party shall certify to the Commission under penalty of perjury, that—

"(1) such candidate is seeking election to the United States Senate and such candidate and at least one other candidate of a major party have qualified for the election ballot under the law of the State involved,

"(2) such candidate and the authorized committees of such candidate will not incur qualified campaign expenses in excess of the aggregate payments to which an eligible candidate of a major party is entitled under section 503, unless otherwise provided in this subchapter, and

"(3) such candidate and the authorized committees of such candidate will accept and expend or retain contributions to defray qualified campaign expenses only to the extent that the qualified campaign expenses incurred by such candidate and the authorized committees of such candidate certified to under paragraph (2) exceed the aggregate payments received by such candidate out of the fund pursuant to section 506.

"(d) Certification for payment to a candidate shall be made by the Commission within 5 days after the date the Commission receives a certification from such candidate, pursuant to this section. Such certification shall be in such form and filed as the Commission shall prescribe by rule or regulation.

"(e)(1) To be eligible to receive any payment under this subchapter, a candidate shall certify to the Commission, under penalty of perjury, that such candidate will not knowingly make expenditures from his or her personal funds, or the personal funds of his or her immediate family in connection with such candidate's campaign for election in excess of, in the aggregate, $20,000.

"(2) For purposes of this subchapter, the term 'immediate family' means the spouse, any child, parent, grandparent, brother, halfbrother, sister, or halfsister of the candidate, and the spouses of such persons.

"(f) If an individual ceases to be a candidate such individual—

"(1) shall no longer be eligible to receive any payments under this subchapter, except that such individual shall be eligible to receive payments to defray qualified campaign expenses incurred while such person was an eligible candidate actively seeking election to the Senate; and

"(2) shall pay to the Secretary, as soon as practicable after the date upon which such individual ceases to be a candidate, an amount equal to the amount of payments received by such individual under this subchapter if such payments are not used to defray qualified campaign expenses.

"ENTITLEMENT OF ELIGIBLE CANDIDATES TO PAYMENTS

"SEC. 503. (a) Subject to the provisions of this chapter—

"(1) each eligible candidate of a major party in an election shall be entitled to equal payments under this subchapter in an amount which, in the aggregate, shall not exceed—

"(A) in each State with a voting-age population of 1,000,000 or less: $500,000";

"(B) in each State with a voting-age population greater than 1,000,000 but less than 3,000,000: an amount equal to 50 cents times such voting-age population; and

"(C) in each State with a voting-age population of 3,000,000 or over: an amount equal to 30 cents times such voting-age population, but not less than $1,500,000.

"(2) An eligible candidate of a minor party in an election shall be entitled to a payment under this subchapter equal in the aggregate to an amount which bears the same ratio to the amount allowed under paragraph (1) for a major party as the number of popular votes received by the candidate for Senator of the minor party, as such candidate, in the preceding election bears to the average number of popular votes received by the candidates for Senator of the major parties in the preceding election.

"(3) An eligible candidate, other than a candidate of a major or minor party, who receives 5 percent or more of the total number of popular votes cast for the office of United States Senate in such election shall be entitled to payments pursuant to this subchapter equal in the aggregate to an amount which bears the same ratio to the amount allowed under paragraph (1) for a major party as the number of popular votes received by such candidate in such election bears to the average number of popular votes received in such election by the candidates for Senator of the major parties. All such payments shall be made at such time after the election as the Commission determines the amount of payments such candidate is eligible for pursuant to this subparagraph. The Commission shall certify such amount to the United States Treasury for payment.

"(b) The aggregate payments to which an eligible candidate shall be entitled under paragraph (2) or (3) of subsection (a), shall not exceed an amount equal to the lesser of—

"(1) the amount of qualified campaign expenses incurred by an eligible candidate and the authorized committees of such candidate, reduced by the amount of contributions allowed to defray qualified campaign expenses received and expended or retained by an eligible candidate and such committees, or

"(2) the aggregate payments to which an eligible candidate of a major party is entitled under subsection (a)(1), reduced by the amount of contributions described in paragraph (1) of this subsection.

"(c) An eligible candidate shall be entitled to payments only—

"(1) to defray qualified campaign expenses incurred by an eligible candidate or the authorized committees of such candidate, or

"(2) to repay loans the proceeds of which were used to defray such qualified campaign expenses, or otherwise to restore funds (other than contributions to defray qualified campaign expenses received and expended by such candidate or such committees) used to defray such qualified campaign expenses.

"ADDITIONAL ENTITLEMENT OF OPPONENTS OF NONPUBLICLY FINANCED CANDIDATES

"SEC. 504. (a) Within 5 days after nomination by a major or minor party, and under such regulations as the Commission may prescribe, each candidate nominated by a major or minor party shall notify the Commission in writing of his or her intention to accept or not accept the funds to which he or she is entitled under section 503.

"(b)(1) A candidate of a major party who has elected to accept the funds for which he or she has qualified under section 503 and who is opposed by a major party candidate who has elected not to accept public funding shall be entitled to receive additional funds from the general fund of the United States Treasury, pursuant to paragraph (2).

"(2)(A) Subject to the provisions of subparagraph (B), a major party candidate eligible to receive funds pursuant to paragraph (1), shall receive additional funds in the amount of one dollar for every dollar of contributions or expenditures raised, incurred, or expended by the candidate not accepting funding.

"(B) Such additional funds shall only match those contributions or expenditures raised, incurred, or expended by the candidate not accepting funding which are in excess of the entitlement of such eligible candidate.

"(c) For purposes of implementing subsection (b), a candidate who elects not to accept public funding shall report his or her receipts and expenditures to the Commission—

"(1) monthly for contributions or expenditures received, incurred, or expended prior to 60 days prior to the date of the election;

"(2) weekly for contributions or expenditures received, incurred, or expended from 59 to 11 days prior to the date of the election; and

"(3) daily for contributions or expenditures received, incurred, or expended during the 10 days prior to the date of the election.

"(d) Notwithstanding the provisions of section 505—

"(1) if a major party candidate is eligible, pursuant to subsection (b), to receive additional funding because of contributions or expenditures received, incurred, or expended by such opponent between the date 59 days prior to the date of the election and the date of the election which are required to be reported by paragraph (2) or (3) of subsection (c), and

"(2) such eligible candidate files a request with the Commission stating that such candidate is eligible to receive such additional funds,

the Commission, within 24 hours after such request is filed, shall certify to the Secretary of the Treasury for payments to such eligible candidate.

"CERTIFICATION BY COMMISSION

"SEC. 505. (a) Except as otherwise provided in section 504(d), not later than 5 days after a candidate files a request with the Commission stating that he or she has met all applicable conditions for eligibility to receive payments under this subchapter, the Commission shall certify to the Secretary of the Treasury (hereafter in this subchapter referred to as the 'Secretary') for payment to such eligible candidate, payment in full of amounts to which such candidate is entitled under section 503, unless the provisions of section 506(c) apply.

"(b) Initial certifications by the Commission under subsection (a), and all determinations made by it under this chapter shall be final and conclusive, except to the extent that they are subject to examination and audit by the Commission under section 507 and judicial review under section 511.

"PAYMENTS TO ELIGIBLE CANDIDATES

"SEC. 506. (a) The Secretary of the Treasury shall maintain in the Treasury of the United States a separate account known as the 'Senate General Election Campaign Fund'. The Secretary shall deposit into such fund, for use by a candidate eligible to receive payments under this subchapter, an amount equal to $265,000,000 for each fiscal year. Moneys designated for such account which are in excess of amounts needed for the Senate General Election Campaign Fund in any fiscal year shall be returned to the General Fund of the United States Treasury.

"(b) Upon receipt of a certification from the Commission under section 505, the Secretary shall promptly pay to the candidate, out of the fund, the amount certified by the Commission. Amounts paid to any such candidate shall be under the control of such candidate.

"(c) If at the time of a certification by the Commission under section 505 for payment to an eligible candidate, the Secretary determines that the moneys in the fund are not, or may not be, sufficient to satisfy the full entitlement of such eligible candidate, he shall withhold from such payment such amount as he determines to be necessary to assure that an eligible candidate will receive his or her pro rata share of his or her full entitlement. Amounts so withheld shall be paid when the Secretary determines that there are sufficient moneys in the fund to pay such amounts, or portions thereof, to all eligible candidates from whom amounts have been withheld, but, if there are not sufficient moneys in the fund to satisfy the full entitlement of an eligible candidate, the amounts so withheld shall be paid in such manner that each eligible candidate receives his or her pro rata share of his or her full entitlement.

"EXAMINATIONS AND AUDITS; REPAYMENTS

"SEC. 507. (a) Notwithstanding the provisions of section 311(b), after each election, the Commission shall conduct a thorough examination and audit of the qualified campaign expenses of each candidate for the United States Senate who received payments under this subchapter.

"(b)(1) If the Commission determines that any portion of the payments made to a candidate under this subchapter was in excess of the aggregate payments to which such candidate was entitled, it shall so notify such candidate, and such candidate shall pay to the Secretary an amount equal to the excess.

"(2) If the Commission determines that a candidate or any authorized committee of such candidate incurred qualified campaign expenses in excess of the aggregate payments to which the candidate was entitled under section 503, it shall notify such candidate of the amount of such excess and such candidate shall pay to the Secretary an amount equal to such amount.

"(3) If the Commission determines that a candidate or any authorized committee of such candidate accepted contributions, other than contributions to make up deficiencies in payments out of the fund because of the application of section 506(c) to defray qualified campaign expenses, other than qualified campaign expenses with respect to which payment is required under paragraph (2), it shall notify such candidate of the amount of the contributions so accepted, and such candidate shall pay to the Secretary an amount equal to such amount.

"(4) If the Commission determines that any amount of any payment made to a candidate under section 506 was used for any purpose other than—

"(A) to defray the qualified campaign expenses with respect to which such payment was made, or

"(B) to repay loans the proceeds of which were used to defray qualified campaign expenses,

it shall notify such candidate of the amount so used, and such candidate shall pay to the Secretary an amount equal to such amount.

"(5) No payment shall be required from a candidate under this subsection to the extent that such payment, when added to other payments required from such candidate under this subsection, exceeds the amount of payments received by such candidate under this subchapter.

"(c) No notification shall be made by the Commission under subsection (b) with respect to an election more than 3 years after the date of such election.

"(d) All payments received by the Secretary under subsection (b) shall be deposited in the Senate General Election Campaign Fund established in section 506.

"CRIMINAL PENALTIES

"SEC. 508. (a)(1) It shall be unlawful for an eligible candidate of a political party in an election or for any authorized committee of such candidate to knowingly and willfully incur qualified campaign expenses in excess of the aggregate payments to which an eligible candidate of a major party is entitled with respect to such election.

"(2) Any person who violates paragraph (1) shall be fined not more than $5,000, or imprisoned not more than one year, or both. In the case of a violation by any authorized committee, any officer or member of such committee who knowingly and willfully consents to such violation shall be fined not more than $5,000, or imprisoned not more than one year, or both.

"(b)(1) It shall be unlawful for an eligible candidate of a major party in an election or for any authorized committee of such candidate to knowingly and willfully accept any contribution to defray qualified campaign expenses, except to the extent necessary to make up any deficiency in payments received out of the fund because of the application of section 506 or to defray expenses which would be qualified campaign expenses but for subparagraph (C) of section 501(10).

"(2) It shall be unlawful for an eligible candidate of a political party (other than an eligible candidate of a major party) in an election or for any authorized committee of such candidate to knowingly and willfully accept and expend or retain contributions to defray qualified campaign expenses in an amount which exceeds the qualified campaign expenses incurred with respect to such election by such eligible candidate and an authorized committee of such candidate.

"(3) Any person who violates paragraph (1) or (2) shall be fined not more than $5,000, or imprisoned not more than one year, or both. In the case of a violation by any authorized committee, any officer or member of such committee who knowingly and willfully consents to such violation shall be fined not more than $5,000, or imprisoned not more than one year, or both.

"(c)(1) It shall be unlawful for any person who receives any payment under section 506, or to whom any portion of any payment received under such section is transferred, knowingly and willfully to use, or authorize the use of, such payment or such portion for any purpose other than—

"(A) to defray the qualified campaign expenses with respect to which such payment was made, or

"(B) to repay loans the proceeds of which were used, or otherwise to restore funds

(other than contributions to defray qualified campaign expenses which were received and expended) which were used, to defray such qualified campaign expenses.

"(2) Any person who violates paragraph (1) shall be fined not more than $10,000, or imprisoned not more than five years, or both.

"(d)(1) It shall be unlawful for any person knowingly and willfully—

"(A) to furnish any false, fictitious, or fraudulent evidence, books, or information to the Commission under this subchapter, or to include in any evidence, books, or information so furnished any misrepresentation of a material fact, or to falsify or conceal any evidence, books, or information relevant to a certification by the Commission or an examination and audit by the Commission under this subchapter; or

"(B) to fail to furnish to the Commission any records, books, or information requested by it for purposes of this subchapter.

"(2) Any person who violates paragraph (1) shall be fined not more than $10,000, or imprisoned not more than five years, or both.

"(e)(1) It shall be unlawful for any person knowingly and willfully to give or accept any kickback or any illegal payment in connection with any qualified campaign expense of an eligible candidate or any authorized committee of such candidate.

"(2) Any person who violates paragraph (1) shall be fined not more than $10,000, or imprisoned not more than five years, or both.

"(3) In addition to the penalty provided by paragraph (2), any person who accepts any kickback or illegal payment in connection with any qualified campaign expense of an eligible candidate or any authorized committee of such candidate shall pay to the Secretary of the Treasury, for deposit in the general fund of the Treasury, an amount equal to 125 percent of the kickback or payment received.

"(f)(1) It shall be unlawful for any individual to disclose any information obtained under the provisions of this subchapter except as may be required by law.

"(2) Any person who violates paragraph (1) shall be fined not more than $5,000, or imprisoned not more than one year, or both.

"REPORTS TO CONGRESS; REGULATIONS

"SEC. 509. (a) The Commission shall, as soon as practicable after each election, submit a full report to the Senate setting forth—

"(1) the qualified campaign expenses (shown in such detail as the Commission determines necessary) incurred by a candidate and the authorized committees of such candidate;

"(2) the amounts certified by it under section 505 for payment to each eligible candidate; and

"(3) the amount of payments, if any, required from such candidate under section 507, and the reasons for each payment required.

Each report submitted pursuant to this section shall be printed as a Senate document.

"(b) The Commission is authorized to prescribe such rules and regulations in accordance with the provisions of subsection (c), to conduct such examinations and audits (in addition to the examinations and audits required by section 507), to conduct such investigations, and to require the keeping and submission of such books, records, and information, as it deems necessary to carry out the functions and duties imposed on it by this subchapter.

"(c) Thirty days before prescribing any rule or regulation under subsection (b), the Commission shall transmit a statement with respect to such rule or regulation to the Senate, setting forth the proposed rule or regulation. The statement shall contain a detailed explanation and justification of such rule or regulation.

"PARTICIPATION BY COMMISSION IN JUDICIAL PROCEEDINGS

"SEC. 510. (a) The Commission is authorized to appear in and defend against any action filed under section 511, either by attorneys employed in its office or by counsel whom it may appoint without regard to the provisions of title 5, United States Code, governing appointments in the competitive service, and whose compensation it may fix without regard to provisions of chapter 51 and subchapter III of chapter 53 of such title.

"(b) The Commission is authorized to appear, through attorneys and counsel described in subsection (a), in the district courts and other appropriate courts of the United States to seek recovery of any amounts determined to be payable to the Secretary of the Treasury as a result of any examination and audit made pursuant to section 507.

"(c) The Commission is authorized to petition the courts of the United States for declaratory or injunctive relief concerning any civil matter arising under this subchapter, through attorneys and counsel described in subsection (a). Upon application of the Commission, an action brought pursuant to this subsection shall be heard and determined by a court of three judges in accordance with the provisions of section 2284 of title 28, United States Code, and any appeal from the determination of such court shall lie to the Supreme Court of the United States. Judges designated to hear the case shall assign the case for hearing at the earliest practicable date, participate in the hearing and determination thereof, and cause the case to be in every way expedited.

"(d) The Commission is authorized on behalf of the United States to appeal from, and to petition the Supreme Court of the United States for certiorari to review judgments or decrees entered with respect to actions in which it appears pursuant to the authority provided in this section.

"JUDICIAL REVIEW

"SEC. 511. (a) Any certification, determination, or other action by the Commission made or taken pursuant to the provisions of this subchapter shall be subject to review by the United States Court of Appeals for the District of Columbia Circuit upon petition filed in such court by any interested person. Any petition filed pursuant to this section shall be filed within thirty days after such certification, determination, or other action by the Commission.

"(b)(1) The Commission, the national committee of any political party, or any individual eligible to vote for a candidate is authorized to institute an action under this section, including an action for declaratory judgment or injunctive relief, as may be appropriate to implement or construe any provision of this subchapter.

"(2) The district courts of the United States shall have jurisdiction of proceedings instituted pursuant to this subsection and shall exercise such jurisdiction without regard to whether a person asserting rights under the provisions of this subsection has exhausted administrative or other remedies provided by law. Such proceedings shall be heard and determined by a court of three judges in accordance with the provisions of section 2284 of title 28, United States Code, and any appeal shall lie to the Supreme Court of the United States. Judges designated to hear the case shall assign the case for hearing at the earliest practicable date, participate in the hearing and determination thereof, and cause the case to be in every way expedited.".

SEC. 3. Section 315(c) of the Federal Election Campaign Act of 1971 is amended by striking out "subsection (b) of this section and subsection (d) of this section" and inserting in lieu thereof "subsections (b) and (d) of this section and subsection (a) of section 503".

SEC. 4. Section 315(c)(2)(B) of the Federal Election Campaign Act of 1971 is amended by inserting before the period at the end thereof the following: ", except that with respect to the limitations established by subchapter III of this Act, the term 'base period' means the calendar year 1985".

SEC. 5. This section and the amendments made by this section shall become effective on January 1, 1987, and shall apply to campaigns for election to the Senate after such date.

SEC. 6. (1) Section 24 of the Internal Revenue Code of 1954 (relating to contributions to candidates for public office) is hereby repealed.

(2)(A) The table of sections for subpart A of part IV of subchapter A of chapter 1 of the Internal Revenue Code of 1954 is amended by striking out the item relating to section 24.

(B) Subsection (a) of section 642 of such Code (relating to credits against tax) is amended to read as follows:

"(a) CREDITS AGAINST FOREIGN TAXES.—An estate or trust shall be allowed the credit against tax for taxes imposed by foreign countries and possessions of the United States, to the extent allowed by section 901, only in respect of so much of the taxes described in such section as is not properly allocable under such section to the beneficiaries.".

(C) Paragraph (3) of section 901(i) of such code (relating to cross references) is amended by striking out "section 642(a)(1)" and inserting in lieu thereof "section 642(a)".

(D) Section 7871(a)(6) of such Code (relating to the treatment of Indian tribal governments) is amended by striking out subparagraph (A) and by redesignating subparagraphs (B) through (F) as subparagraphs (A) through (E), respectively.

(3) The amendments made by this subsection shall apply to contributions made after December 31, 1985, in taxable years ending after such date.●

ADDITIONAL COSPONSORS

S. 288

At the request of Mr. GORTON, the name of the Senator from Idaho [Mr. SYMMS] was added as a cosponsor of S. 288, a bill to provide Federal coordination for the continued development and commercialization of food irradiation through the establishment of a Joint Operation Commission for Food Irradiation in the Department of Agriculture and through other means.

S. 524

At the request of Mr. ARMSTRONG, the names of the Senator from New

Hampshire [Mr. HUMPHREY], and the Senator from New Hampshire [Mr. RUDMAN] were added as cosponsors of S. 524, a bill to recognize the organization known as the Retired Enlisted Association, Inc.

S. 571

At the request of Mr. D'AMATO, the name of the Senator from Georgia [Mr. MATTINGLY] was added as a cosponsor of S. 571, a bill to amend subchapter II of chapter 53 of title 31, United States Code, relating to currency reports.

S. 678

At the request of Mr. COHEN, the name of the Senator from Nebraska [Mr. ZORINSKY] was added as a cosponsor of S. 678, a bill to amend the Federal Property and Administration Services Act of 1949 to authorize multiyear contracts in certain cases.

S. 827

At the request of Mrs. HAWKINS, the name of the Senator from Minnesota [Mr. BOSCHWITZ] was added as a cosponsor of S. 827, a bill to amend the Public Health Service Act to provide for the compensation of children and others who have sustained vaccine-related injuries, and for other purposes.

S. 1026

At the request of Mr. PRESSLER, the name of the Senator from Pennsylvania [Mr. HEINZ] was added as a cosponsor of S. 1026, a bill to direct the cooperation of certain Federal entities in the implementation of the Continental Scientific Drilling Program.

S. 1181

At the request of Mr. HATCH, the names of the Senator from Connecticut [Mr. WEICKER], and the Senator from Wyoming [Mr. WALLOP] were withdrawn as cosponsors of S. 1181, a bill to establish a program for the provision of home and community based services to elderly individuals.

S. 1223

At the request of Mr. ARMSTRONG, the names of the Senator from Nevada [Mr. LAXALT], the Senator from Virginia [Mr. WARNER], and the Senator from Kansas [Mr. DOLE] were added as cosponsors of S. 1223, a bill to authorize the erection of a memorial on Federal land in the District of Columbia or its environs to honor members of the Armed Forces of the United States who served in the Korean war.

S. 1292

At the request of Mr. BAUCUS, the names of the Senator from Arkansas [Mr. BUMPERS], and the Senator from South Dakota [Mr. PRESSLER] were added as cosponsors of S. 1292, a bill to amend title VII of the Tariff Act of 1930 in order to apply countervailing duties with respect to resource input subsidies.

S. 1305

At the request of Mr. TRIBLE, the name of the Senator from North Carolina [Mr. EAST] was added as a cosponsor of S. 1305, a bill to amend title 18, United States Code, to establish criminal penalties for the transmission by computer of obscene matter, or by computer or other means, of matter pertaining to the sexual exploitation of children, and for other purposes.

S. 1570

At the request of Mr. NICKLES, the name of the Senator from New Mexico [Mr. BINGAMAN] was added as a cosponsor of S. 1570, a bill to amend the Fair Labor Standards Act of 1938 to exclude the employees of States and political subdivisions of States from the provisions of that act relating to maximum hours, to clarify the application of that act to volunteers, and for other purposes.

S. 1618

At the request of Mr. GORE, the name of the Senator from Nevada [Mr. LAXALT] was added as a cosponsor of S. 1618, a bill to amend the Communications Act of 1934 to clarify policies regarding the right to view satellite-transmitted television programming, and for other purposes.

S. 1639

At the request of Mr. EXON, the name of the Senator from Nevada [Mr. LAXALT] was added as a cosponsor of S. 1639, a bill to authorize the minting of gold bullion coins.

S. 1700

At the request of Mr. PRESSLER, the name of the Senator from South Carolina [Mr. HOLLINGS] was added as a cosponsor of S. 1700, a bill to amend chapter 106 of title 10, United States Code, to extend the educational assistance program for members of the Selected Reserve to additional programs of education.

S. 1734

At the request of Mr. COCHRAN, the names of the Senator from Georgia [Mr. MATTINGLY], the Senator from Georgia [Mr. NUNN], and the Senator from South Carolina [Mr. THURMOND] were added as cosponsors of S. 1734, a bill to prevent distortions in the reapportionment of the House of Representatives caused by the use of census population figures which include illegal aliens.

S. 1774

At the request of Mr. GRASSLEY, the name of the Senator from Georgia [Mr. MATTINGLY] was added as a cosponsor of S. 1774, a bill to amend section 1951 of title 18 of the United States Code, and for other purposes.

S. 1775

At the request of Mr. D'AMATO, the name of the Senator from Hawaii [Mr. INOUYE] was added as a cosponsor of S. 1775, a bill to authorize a multifamily housing preservation loan program.

SENATE JOINT RESOLUTION 102

At the request of Mr. ZORINSKY, the name of the Senator from Michigan [Mr. LEVIN] was added as a cosponsor of Senate Joint Resolution 102, a joint resolution to establish a National Commission on Illiteracy.

SENATE JOINT RESOLUTION 130

At the request of Mr. QUAYLE, the name of the Senator from Illinois [Mr. SIMON] was added as a cosponsor to Senate Joint Resolution 130, a joint resolution designating the week beginning on November 10, 1985, as "National Blood Pressure Awareness Week."

SENATE JOINT RESOLUTION 181

At the request of Mrs. HAWKINS, the names of the Senator from Illinois [Mr. SIMON], the Senator from Washington [Mr. GORTON], the Senator from California [Mr. WILSON], the Senator from New York [Mr. D'AMATO], the Senator from Pennsylvania [Mr. HEINZ], and the Senator from Maine [Mr. COHEN] were added as cosponsors of Senate Joint Resolution 181, a joint resolution to designate the week beginning September 1, 1985, as "National School-Age Child Care Awareness Week."

SENATE JOINT RESOLUTION 198

At the request of Mr. MATHIAS, the names of the Senator from West Virginia [Mr. ROCKEFELLER], and the Senator from Nebraska [Mr. ZORINSKY] were added as cosponsors of Senate Joint Resolution 198, a joint resolution to designate the year of 1986 as the "Sesquicentennial Year of the National Library of Medicine."

SENATE JOINT RESOLUTION 199

At the request of Mr. MURKOWSKI, the names of the Senator from Wisconsin [Mr. KASTEN], the Senator from Ohio [Mr. GLENN], and the Senator from Ohio [Mr. METZENBAUM] were added as cosponsors of Senate Joint Resolution 199, a joint resolution to designate the month of November 1985 as "National Elks Veterans Remembrance Month."

SENATE JOINT RESOLUTION 203

At the request of Mr. MURKOWSKI, the names of the Senator from Illinois [Mr. SIMON], the Senator from Michigan [Mr. RIEGLE], the Senator from Tennessee [Mr. GORE], and the Senator from Oregon [Mr. HATFIELD] were added as cosponsors of Senate Joint Resolution 203, a joint resolution designating November 6, 1985, as "Ignacy Jan Paderewski Day."

SENATE JOINT RESOLUTION 208

At the request of Mr. COCHRAN, the names of the Senator from West Virginia [Mr. BYRD], and the Senator from Minnesota [Mr. BOSCHWITZ] were added as cosponsors of Senate Joint Resolution 208, a joint resolution to designate the week of October 27, 1985, through November 2, 1985, as "National Alopecia Awareness Week."

SENATE JOINT RESOLUTION 211

At the request of Mr. DURENBERGER, the name of the Senator from Indiana

[Mr. LUGAR] was added as a cosponsor of Senate Joint Resolution 211, a joint resolution to provide for the designation of the week of October 6, 1985, as "National Sudden Death Syndrome Awareness Week."

SENATE JOINT RESOLUTION 213

At the request of Mr. FORD, the names of the Senator from Iowa [Mr. GRASSLEY], and the Senator from Utah [Mr. GARN] were added as cosponsors of Senate Joint Resolution 213, a joint resolution to designate January 19-25, 1986, "National Jaycee Week."

SENATE CONCURRENT RESOLUTION 59

At the request of Mr. TRIBLE, the names of the Senator from North Dakota [Mr. ANDREWS], and the Senator from Oklahoma [Mr. BOREN] were added as cosponsors of Senate Concurrent Resolution 59, a concurrent resolution expressing the sense of the Congress that food producers who permit gleaning of their fields and nonprofit organizations which glean fields and distribute the resulting harvest to help alleviate hunger should be commended for their efforts, and for other purposes.

SENATE CONCURRENT RESOLUTION 69

At the request of Mr. DANFORTH, the names of the Senator from Florida [Mrs. HAWKINS], and the Senator from Arizona [Mr. DECONCINI] were added as cosponsors of Senate Concurrent Resolution 69, a concurrent resolution to recognize the National Camp Fire Organization for 75 years of service.

SENATE CONCURRENT RESOLUTION 76

At the request of Mr. HART, the names of the Senator from New Jersey [Mr. BRADLEY], the Senator from Wisconsin [Mr. PROXMIRE], the Senator from California [Mr. WILSON], the Senator from Georgia [Mr. MATTINGLY], the Senator from West Virginia [Mr. ROCKEFELLER], the Senator from Ohio [Mr. GLENN], and the Senator from Maine [Mr. COHEN] were added as cosponsors of Senate Concurrent Resolution 76, a concurrent resolution asking that the President bring the rights of the Polish people to the attention of the Soviet Government.

SENATE RESOLUTION 81

At the request of Mr. ARMSTRONG, the name of the Senator from Alaska [Mr. MURKOWSKI] was added as a cosponsor of Senate Resolution 81, a resolution to establish regulations to implement television and radio coverage of proceedings of the Senate.

SENATE RESOLUTION 244—ORIGINAL RESOLUTION REPORTED AUTHORIZING THE PRINTING OF INFORMATION ON THE COMMITTEE ON FOREIGN RELATIONS

Mr. LUGAR, from the Committee on Foreign Relations, reported the following original resolution; which was referred to the Committee on Rules and Administration:

S. RES. 244

Resolved, That there be printed with illustrations as a Senate document background information relating to the history of the Senate Committee on Foreign Relations in connection with its one hundred and seventieth anniversary (1816-1986); and that there be printed for the use of the committee additional copies of such document not to exceed the cost of $1,200.

AMENDMENTS SUBMITTED

COMMERCE, JUSTICE, STATE, THE JUDICIARY, AND RELATED AGENCIES APPROPRIATION, 1986

STAFFORD (AND OTHERS) AMENDMENT NO. 862

Mr. STAFFORD (for himself, Mr. BENTSEN, and Mr. MOYNIHAN) proposed an amendment to the bill (H.R. 2965) making appropriations for the Departments of Commerce, Justice, and State, the Judiciary, and related agencies for the fiscal year ending September 30, 1986, and for other purposes; as follows:

On page 42, line 24 strike "$136,000,000" and insert in lieu thereof "$135,000,000"; on page 43, line 7 strike "$148,000,000" and insert in lieu thereof "$147,000,000"; and on page 40, after line 10 insert the following:

CONSTRUCTION

For necessary expenses of the Architect of the Capitol to carry out, in cooperation with the Union Station Redevelopment Corporation, feasibility studies, design, and engineering for the construction of a builidng on the United States Capitol Grounds to provide office space for the judicial branch of the Federal Government and for other purposes, to become available upon enactment of S. 1706 or similar legislation authorizing such appropriations, $2,000,000, to remain available until September 30, 1986.

HATFIELD AMENDMENT NO. 863

Mr. HATFIELD proposed an amendment to the bill H.R. 2965, supra; as follows:

On page 66 after line 17 insert the following:

"SEC. 503. Both the United States and Soviet Union, as signatories of the United Nations Declaration of Human Rights and the Helsinki Accords, are pledged to allow information to flow freely across their national boundaries;

Whereas allowing information to flow freely across their national boundaries is in the best interest of the people of the United States and the Soviet Union, and is a necessary response to the times;

Increased communications between the United States and the Soviet Union reduces the risk that misunderstandings will cause conflict; and

The Director of the United States Information Agency, Charles Z. Wick, has extended to the Chief of International Information Department of the Soviet Union, Mr. Leonid M. Zamyatin, an invitation to participate in reciprocal exchanges using the medium of television: Now, therefore, be it

Declared by the Senate (the House of Representatives concurring), That the Congress, recognizing the significant potential for improving communications, enhancing mutual understanding, and aiding the free flow of information through the medium of television, supports the initiative of the Director of the United States Information Agency to

(1) arrange for a high level official of the Soviet Union to appear on American television if the Soviet Union reciprocates by arranging for a high level official of the United States to appear for an equal time on Soviet television; and

(2) plan for participation by the United States and the Soviet Union in a worldwide discussion using the WORLDNET international satellite television transmission network, and giving journalists an opportunity to ask uncensored questions of such officials."

THURMOND (AND BIDEN) AMENDMENT NO. 864

Mr. THURMOND (for himself and Mr. BIDEN) proposed an amendment to the bill H.R. 2965, supra; as follows:

On page 16, line 1, strike "$31,000,000" and insert in lieu thereof "$29,900,000"; on page 16, line 2, strike "$24,366,000" and insert in lieu thereof "$23,266,000"; and on page 66, after line 17, insert the following:

UNITED STATES SENTENCING COMMISSION

SALARIES AND EXPENSES

For the salaries and expenses necessary to carry out the provisions of chapter 58 of title 28, United States Code, $1,100,000, to remain available until expended.

HATFIELD (AND OTHERS) AMENDMENT NO. 865

Mr. HATFIELD (for himself, Mr. MOYNIHAN, Mr. WEICKER, and Mr. SIMON) proposed an amendment to the bill H.R. 2965, supra; as follows:

On page 34, line 20, before the period insert a colon and the following: "*Provided further*, That none of the funds appropriated under this heading may be made available while the United States is not subject to the compulsory judisdiction of the International Court of Justice (as described in Article 36(2) of the Statute of the International Court of Justice and in the United States declaration thereto)".

WILSON AMENDMENT NO. 866

Mr. WILSON proposed an amendment to the bill H.R. 2965, supra; as follows:

On page 35, line 7, strike "$6,839,000" and insert in lieu thereof "$6,039,000"; on page 35, line 25, strike "$10,340,000" and insert in lieu thereof "$11,340,000"; on page 36, restore the matter stricken on line 10 through line 15, amended to change the appropriation on line 11 to "$1,200,000"; and on page 37, line 22, strike "$10,000,000" and insert in lieu thereof "$9,800,000".

CHILES (AND HEFLIN) AMENDMENT NO. 867

Mr. CHILES (for himself and Mr. HEFLIN) proposed an amendment to the bill H.R. 2965, supra; as follows:

On page 8 at the end of line 6 insert:

In addition, $3,000,000 for payments under section 4(b) of the Commercial Fisheries Research and Development Act of 1964 for commercial fisheries failures and disruptions to be derived by transfer from the "Disaster loan fund, Small Business Administration".

MURKOWSKI AMENDMENT NO. 868

Mr. MURKOWSKI proposed an amendment to the bill H.R. 2965, supra; as follows:

On page 69, after line 4, add the following:

SEC. 607. (a) Not later than January 15, 1986, the Secretary of State, in consultation with the Secretary of Commerce and the United States Trade Representative, shall prepare and transmit to the Committee on Appropriations and the Committee on Foreign Affairs of the House of Representatives and the Committee on Appropriations and the Committee on Foreign Relations of the Senate a report which—

(1) assesses the advisability of imposing a boycott against any country that supports or harbors international terrorists;

(2) describes the diplomatic and economic consequences of imposing an economic boycott against such a country; and

(3) assesses the potential for gaining international or multilateral cooperation in imposing an economic boycott against such a country.

(b) For purposes of making the assessment required by subsection (a)(1), the Secretary of State shall consider the adequacy of existing laws imposing economic sanctions against a country described in such subsection.

(c) For purposes of this section, the term "economic boycott", with respect to a country, means a prohibition on imports and exports from such country and a termination of United States assistance for such country.

LUGAR (AND SIMON) AMENDMENT NO. 869

Mr. LUGAR (for himself and Mr. SIMON) proposed an amendment to the bill H.R. 2965, supra; as follows:

On page 33, line 5 strike "$336,600,000" and insert in lieu thereof "$331,800,000" and on page 38, restore the matter stricken on line 1 through line 7, amended to appropriate "$4,800,000".

PRESSLER AMENDMENT NO. 870

Mr. PRESSLER proposed an amendment to the bill H.R. 2965, supra; as follows:

On page 7, line 6, after "expended," insert "of which $600,000 shall be for enhancements to the EROS Data Center in Sioux Falls, South Dakota".

HEFLIN AMENDMENT NO. 871

Mr. HEFLIN proposed an amendment to the bill H.R. 2965, supra; as follows:

On page 31, after line 5, add the following new section:

SEC. 27. (a) Notwithstanding any other provision of law, the Department of Justice shall—

(1) make available to the Birmingham Public Library located in Birmingham, Alabama the twenty-five thousand seven hundred and eleven releasable pages of documents, requested by such Library on August 22, 1984, relating to files on Dr. Martin Luther King and racist hate groups; and

(2) waive the duplication fee of $2,571.10 for such documents.

(b) Nothing in the provisions of subsection (a) may be construed to affect any determination of the Department of Justice pursuant to section 552(a)(4)(A) of title 5, United States Code, relating to any other request for such documents.

LUGAR AMENDMENT NO. 872

Mr. LUGAR proposed an amendment to the bill H.R. 2965, supra; as follows:

On page 63, line 20, strike out "$2,000,000 shall be available" and insert in lieu thereof "$1,200,000 in addition to the base shall be available only".

DOMENICI AMENDMENT NO. 873

Mr. RUDMAN (for Mr. DOMENICI) proposed an amendment to the bill H.R. 2965, supra; as follows:

On page 12, line 5 after "$71,200,000" insert: , of which $500,000 shall remain available until expended to reimburse private litigants for legal fees incurred in the United States v. Abousleman, the United States v. Bluewater-Toltec Irrigation District, and the State of New Mexico ex rel. Reynolds v. Aamodt water adjudication suits

---

OMNIBUS BUDGET RECONCILIATION ACT

THURMOND (AND OTHERS) AMENDMENT NO. 874

(Ordered to lie on the table.)

Mr. THURMOND (for himself, Mr. HOLLINGS, Mr. MOYNIHAN, Mr. HELMS, Mr. HEFLIN, Mr. HEINZ, Mr. COHEN, Mr. WARNER, Mr. KENNEDY, Mr. MITCHELL, Mr. EAGLETON, Mr. SPECTER, Mr. EAST, Mr. COCHRAN, Mr. TRIBLE, Mr. DENTON, Mr. D'AMATO, Mr. SASSER, Mr. HATCH, Mr. PELL, Mr. MATTINGLY, Mr. ROCKEFELLER, Mrs. HAWKINS, Mr. GORE, Mr. DIXON, Mr. DODD, Mr. SIMON, Mr. FORD, Mr. DECONCINI, Mr. PRYOR, Mr. MATHIAS, Mr. LONG, Mr. LEAHY, Mr. METZENBAUM, Mr. RIEGLE, Mr. WEICKER, Mr. MCCONNELL, Mr. KASTEN, Mr. GLENN, Mr. BUMPERS, Mr. NUNN, and Mr. BYRD) proposed an amendment to the bill intended to be proposed by them to the bill (S. 1730) to provide for reconciliation pursuant to section 2 of the first concurrent resolution on the budget for fiscal year 1986 (S. Con. Res. 32, Ninety-ninth Congress); as follows:

In the pending amendment, strike "provisions", and insert:

ENFORCEMENT

"SEC. 1201. SHORT TITLE.

"This title may be cited as the 'Textile and Apparel Trade Enforcement Act of 1985'.

"SEC. 1202. POLICY.

"The policy of this title is—

"(1) to prevent further disruption of the United States textiles and textile products markets, damage to United States textile and apparel manufacturers, and loss of jobs by United States workers by providing for orderly and nondisruptive growth of imports of textiles and textile products; and

"(2) to implement the objectives of the Multi-Fiber Arrangement by requiring the effective enforcement of import levels of textiles and textile products contemplated by the Multi-Fiber Arrangement.

"SEC. 1203. FINDINGS.

"The Congress finds that—

"(1) the United States and most major textile producing countries are parties to the Multi-Fiber Arrangement, the purpose of which is to ensure the orderly growth of imports of textiles and textile products and to avoid disruption of the markets for textiles and textile products in importing nations;

"(2) the Multi-Fiber Arrangement, which first entered into force on January 1, 1974, and which was most recently extended in December, 1981, through July 1986, contemplates a 6 per centum annual rate of growth for imports for most exporting countries and provides for a lower rate of growth for imports from significant exporting countries;

"(3) since 1980, the objective of orderly growth of imports of textiles and textile products for in the Multi-Fiber Arrangement has not been achieved; from 1981 through 1984 imports of textiles and textile products into the United States have grown at an annual rate of 19 centum, far in excess of the 1 per centum growth rate of the United States market for textiles and textile products during the same period and far in excess of the annual rate of import growth of less than 2 per centum that prevailed during the period 1974 through 1980;

"(4) the disruptive surge in imports of textiles and textile products which occurred from 1981 through 1984 resulted from the failure of the United States to enforce adequately its rights under the Multi-Fiber Arrangement and to extend coverage of the Multi-Fiber Arrangement to imports made of competing fibers;

"(5) import growth of apparel products has substantially outstripped the growth of the domestic market so that import penetration of the domestic market has more than doubled in the last six years, reaching a level of 50 per centum in 1984;

"(6) based on a nationwide audit of major retail outlets, the import penetration of such major items of apparel as trousers, blouses, shirts, suits, skirts and sweaters exceeds 50 per centum of domestic consumption;

"(7) since the most recent extension of the Multi-Fiber Arrangement, certain exporting countries have sharply increased their exports of textiles and textile products made in whole or in part from fibers not subject to the Multi-Fiber Arrangement with the effect of circumventing restraints agreed to under the Arrangement; the increased imports of these textiles and textile products have caused disruption of the United States market for textiles and textile products and

have seriously undercut the effectiveness of the Multi-Fiber Arrangement;

"(8) imports of textiles and textile products into the United States are predominantly the product of significant exporting countries, with five large exporting countries now accounting for more than 50 per centum of all imports of textiles and textile products;

"(9) the domination of import trade by producers in the significant producing countries has limited participation in the United States market by other producing countries, many of which share important trade and other national interests, and encourage mutually beneficial trade and investment, with the United States;

"(10) a change in United States textile trade policy to afford the smaller producing countries and countries in the Caribbean region a relatively greater share of imports of textiles and textile products would promote the national economic interests of the United States;

"(11) the textile and apparel trade deficit of the United States was more than $16,200,000,000 in 1984, an increase of 53 per centum over 1983, and accounted for 13 per centum of the Nation's overall merchandise trade deficit;

"(12) the current level of imports of textiles and textile products, ten billion square yard equivalents in 1984, represents over one million job opportunities lost to United States workers;

"(13) imported textiles and textile products now account for 38 per centum (the equivalent of three million two hundred thousand bales of cotton) of the annual cotton consumption in the United States; only one of five of the bale equivalents included in imported textiles and textile products is grown in the United States; the result of the massive increases in cotton textile and apparel imports has been a declining market share for, and a $1,000,000,000 loss to, domestic cotton producers in 1983 alone, which was only partially offset by Federal cotton program benefits; another result is that United Stats cotton producers, who are spending about $20,000,000 annually in research and promotion efforts, have built markets not for themselves but for foreign growers;

"(14) imports of wool products have doubled since 1980, creating major disruptions among domestic wool products producers and seriously depressing the price of United States produced raw wool; the Multi-Fiber Arrangement recognizes that imports of certain products, such as wool products, in certain countries, including the United States, pose particular problems for certain industries, such as, the wool products industries in those countries and import growth rates of 1 per centum or less have been permitted in such cases;

"(15) as a result of this increased penetration and the very limited growth of the domestic market, the United States companies producing textiles and textile products identical, or similar, to those imported have been seriously damaged, many of them have been forced out of business, many have closed plants or curtailed operations, workers in such companies have lost employment and have been otherwise materially and adversely affected, and serious hardship has been inflicted on hundreds of impacted communities causing a substantial reduction in economic activity and lost revenues to local governments;

"(16) the increase in imports and increased import penetration of the United States domestic market have occurred notwithstanding the fact that, through extensive modernization programs and investment in more modern equipment, productivity, as measured by output per man hour, in the textile mill products sector has increased in the last ten years at the average annual rate of 4.2 per centum and in the apparel sector at the average annual rate of 3.4 per centum; as compared with the lower productivity growth of all manufacturing in the same period of 1.9 per centum;

"(17) the factors described above are causing serious damage, or the actual threat thereof, to domestic producers of textiles and textile products; as a result, market disruption exists in the United States requiring the new measures established under this Title;

"(18) based on experience during the past ten years and on other factors, the growth of the United States market for textiles and textile products is unlikely to exceed an average annual rate of 1 per centum during the next several years;

"(19) if the rate of growth of imports of textiles and textile products into the United States that occurred since 1980 continues, plant closings will continue to accelerate, leaving the United States market with reduced domestic competition for imported products;

"(20) in order to avoid further market disruption and deterioration of the situation confronting the United States industry producing textiles and textile products, which is already seriously damaged, it is essential—

"(A) to require the establishment of import levels for textiles and textile products supplied by major producing countries that reflect—

"(i) the import level that would have occurred had imports from these countries grown since 1980 by the 6 per centum annual growth rate contemplated by the Multi-Fiber Arrangement, or 1 per centum in the case of wool products, or

"(ii) the actual import level resulting from restraints under a bilateral agreement with the United States providing for an annual import growth rate of less than 6 per centum, whichever is the lesser,

"(B) to require the establishment of import levels for textiles and textile products supplied by producing countries that reflect their 1984 import levels,

"(C) to require the establishment of import levels for textiles and textile products supplied by small producing countries that provide a significant increase in their market shares to meet their development needs and to permit future growth in such shares consistent with the Multi-Fiber Arrangement, and

"(D) to limit the future growth rate of imports of textiles and textile products into the United States to levels which reflect orderly growth as provided for in the Multi-Fiber Arrangement and the most recent Protocol extending the Multi-Fiber Arrangement;

"(21) the establishment of import levels, and limitation on future import growth to levels, that reflect effective enforcement of the Multi-Fiber Arrangement and that also reflect the expected growth rate of the United States market for textiles and textile products will fulfill announced policy objectives of the United States regarding trade in textiles and apparel;

"(22) as the Department of Defense has long recognized, a strong, viable and efficient domestic textiles and textile products industry is essential in order to avoid impairment of the national security of the United States;

"(23) the developments that have led to the sharp increase in imports of textiles and textile products since 1980 may not have been foreseeable; nevertheless, the rights of the United States under international agreements should have been invoked in order to prevent increased quantities of textiles and textile products from being imported under such conditions as to cause or threaten serious damage to domestic producers of textiles and textile products in the United States; and

"(24) the sharp increase in imports of textiles and textile products since 1980, and the effect of this increase on the United States textiles and apparel industry and its workers, constitutes exceptional circumstances within the meaning of the Milti-Fiber Arrangement and its Protocol.

"SEC. 1204. DEFINITIONS.

"For purposes of this title—

"(1) The term "Textiles and textile products" includes, but is not limited to, all tops, yarns, piece goods, made-up articles, apparel, manmade fibers, and other textile manufactured products (which derive their chief characteristics from their textile components) made in whole or in part from any natural or manmade fiber, or blend thereof, that are classified under schedule 3, part 6 of schedule 6, part 1, 4, 5 (except subpart E), 7, or 13 of schedule 7, or part 1 of schedule 8 of the Tariff Schedules of the United States or part 1 of the Appendix to the Tariff Schedules of the United States;

"(2) The term "category" means, with respect to textiles and textile products that are the product of a country, each of the following—

"(A) each category of textiles and textile products identified by a three-digit textile category number in the Department of Commerce publication "Correlation: Textile and Apparel Categories with Tariff Schedules of the United States Annotated", dated January 1985 and, subsequently, in the first edition of such document that is revised to reflect the adoption by the United States of the Nomenclature Structure of the Harmonized System;

"(B) with respect to each country with which the United States has (i) an agreement on the date of enactment of this title limiting exports of textiles and textile products to the United States that includes specific limitations on subdivisions of a category described in subparagraph (A), or (ii) taken unilateral action to limit products entered under such a subdivision, each such subdivision;

"(C) a category consisting of the manmade fiber products classified under subpart E of part 1 of schedule 3 to the Tariff Schedules of the United States; and

"(D) each category consisting of each of the following products when, because of fiber content, that product is not subject to the Multi-Fiber Arrangement:

"(i) yarn,

"(ii) fabric,

"(iii) apparel, and

"(iv) other textile products;

"(3) The term "import sensitive category" means—

"(A) a category (other than a category applicable to textiles and textile products that are a product of a country in the Caribbean region) for which the ratio of imports to domestic production, as reported in the Department of Commerce publication "U.S. Production, Imports and Import/Production

Ratios for Cotton, Wool and Man-Made Fiber Textiles and Apparel", equals or exceeds 40.0 for the preceding calendar year; and

"(B) a category covering wool products;

"(4) The term "country" means a foreign country (other than Canada and the Member States of the European Economic Community as constituted on December 31, 1984), a foreign territory, an insular possession of the United States, or any other territory, possession, colony, trusteeship or political entity, whether affiliated with the United States or not, that is outside the customs territory of the United States;

"(5) The term "major producing country" means a country the annual aggregate quantity of textiles and textile products of which that entered under the categories referred to in paragraph (2)(A) during calendar year 1984 equalled or exceeded 10 percent of all textiles and textile products under such categories that entered from all countries and from Canada and the Member States of the European Economic Community during calendar year 1984;

"(6) The term "producing country" means a country (other than a major producing country and a country in the Carribean region) the annual aggregate quantity of textiles and textile products of which that entered under the categories referred to in paragraph (2)(A) during calendar year 1984 equalled or exceeded 1.25 per centum of all textiles and textile products under such categories that entered from all countries and from Canada and the Member States of the European Economic Community during calendar year 1984;

"(7) the term "small producing country" means a country other than a major producing country and a producing country;

"(8) The term "country in the Caribbean region" means Mexico and a country eligible for designation as a beneficiary country under section 212 of the Caribbean Basin Economic Recovery Act (19 U.S.C 2702);

"(9) The term "wool product" means an article containing over 17 per centum by weight of wool;

"(10) The term "cotton, wool and man-made fiber sweaters" means articles classified under categories 345, 445, 446, 645 or 646 as defined in the Department of Commerce publication "Correlation Textile and Apparel Categories with Tariff Schedules of the United States Annotated," dated January 1985;

"(11) The term "entered" means entered, or withdrawn from warehouse, for consumption in the customs territory of the United States; and

"(12) The term "Multi-Fiber Arrangement" means the Arrangement Regarding International Trade in Textiles, as extended by the Protocol done at Geneva, December 22, 1981.

"SEC. 1205. LIMITS ON TEXTILE AND APPAREL IMPORTS.

"(a) CALENDAR YEAR 1985.— Notwithstanding any other provision of law, the aggregate quantity of textiles and textile products classified under a category that is entered during calendar year 1985 shall not exceed—

"(1) in the case of textiles and textile products that are a product of a major producing country, other than textile luggage and textile flat goods subject (as of the date of enactment of this Title) to a specific limitation under an agreement with a major producing country, the lesser of an amount equal to 101 per centum—

"(A) of the aggregate quantity of such products of such country classified under such category that would have entered during calendar year 1984 if the aggregate quantity of such products of such country classified under such category entered during calendar year 1980 had increased by 6 per centum annually, or 1 per centum annually in the case of a category covering a wool product, during calendar years 1981, 1982, 1983, and 1984, or

"(B) If the United States has an agreement with such country providing for an annual growth rate for such category of less than 6 per centum, of the aggregate quantity of such products of such country classified under such category that entered during calendar year 1984;

"(2) in the case of textile luggage and textile flat goods subject (as of the date of enactment of this Title) to specific limitation under an agreement with a major producing country, the specific limitation quantity in effect as of the date of enactment of this Title;

"(3) in the case of textiles and textile products that are a product of a producing country, an amount equal to the aggregate quantity of—

"(A) such products from such country classified under such category that entered during calendar year 1984, or

"(B) in the case of textile luggage and textile flat goods subject (as of the date of enactment of this Title) to specific limitation under an agreement with a producing country, the specific limitation quantity in effect as of the date of enactment of this Title;

"(4) in the case of textiles and textile products that are a product of a small producing country (other than cotton, wool, and man-made fiber sweaters described in paragraph (5)), an amount equal to the sum of—

"(A) the aggregate quantity of such products of such country classified under such category that entered during calendar year 1984, plus

"(B) an amount equal to—

"(i) 15 per centum of such quantity, in the case of a category that is not an import sensitive category, or

"(ii) 1 per centum of such quantity, in the case of a category that is an import sensitive category; and

"(5) in the case of cotton, wool and man-made fiber sweaters that are—

"(A) the product of substantial assembly operations in Guam from otherwise completed knit-to-shape component parts, an aggregate amount equal to 160,000 dozen; and

"(B) the product of substantial assembly operations in the Commonwealth of the Northern Mariana Islands from otherwise completed knit-to-shape component parts, an aggregate amount equal to 70,000 dozen.

"If application of paragraph (1) would result in the aggregate quantity of textiles and textile products of a major producing country classified under all categories permitted to enter during calendar year 1985 to be less than 70 per centum of the aggregate quantity of such products of such country that entered during calendar year 1984, then, notwithstanding paragraph (1), the aggregate quantity of textiles and textile products of such country that may be entered under each category during calendar year 1985 shall not be less than 40 per centum of the aggregate quantity of such products of such country that entered under such category during calendar year 1984.

"(b) GROWTH ADJUSTMENT.—For calendar years after 1985, the aggregate quantity of textiles and textile products classified under each category that may be entered during each such calendar year shall—

"(1) in the case of such products that are a product of a major producing country or of a producing country, be increased by an amount equal to 1 per centum of the aggregate quantity that could be entered under such category during the preceding calendar year; and

"(2) in the case of such products that are a product of a small producing country, be increased by an amount equal to—

"(A) in the case of a category (other than an import sensitive category), 6 per centum of the aggregate quantity that could be entered under that category during the preceding calendar year, and

"(B) in the case of an import sensitive category, 1 per centum of the aggregate quantity that could be entered under that category during the preceding calendar year.

"If the aggregate quantity that could be entered under a category for a calendar year after 1985 is reduced under section 1210(b), than in the first calendar year in which there is no such reduction, this subsection shall be applied as if there had been no reduction under section 1210(b) in previous calendar years.

"(c) MINIMUM QUANTITIES.—If, under subsection (a) or (b), the aggregate quantity of textiles and textile products of a country that may be entered during a calendar year under a category is—

"(1) less than one million square yard equivalents, in the case of a category covering yarn, fabric, made-ups, and miscellaneous products, other than wool products;

"(2) less than seven hundred thousand square yard equivalents, in the case of a category covering apparel, other than wool products apparel; or

"(3) less than one hundred thousand square yard equivalents, in the case of a category covering wool products,

"then, notwithstanding subsection (a) or (b), the aggregate quantity of textiles and textile products that may be entered from such country under such category during the calendar year shall be one million, seven hundred thousand, or one hundred thousand square yard equivalents, respectively. The amount prescribed in the preceding sentence shall be accorded growth subject to the provisions of subsection (b) beginning the first calendar year after the aggregate quantity of imports from such country under such category equals the minimum quantity prescribed under this subsection.

"(d) SPECIAL RULE.—For purposes of this section, if during any calendar year after 1984, the aggregate quantity of textiles and textile products that are the product of a small producing country, other than a country in the Caribbean region, and that are entered under the categories referred to in paragraph (2)(A) of section 1204 equals or exceeds 1.25 per centum of all textiles and textile products entered under such categories from all countries and from Canada and the Member States of the European Economic Community during such calendar year, then such small producing country shall be considered to be a producing country for all succeeding calendar years.

"(e) ENFORCEMENT.—The Secretary of Commerce shall prescribe such regulations governing the entry, or withdrawal from warehouse, for consumption of textiles and

textile products as may be necessary to carry out this title.

"SEC. 1206. IMPORT LICENSING.

"In order to ensure the equitable and efficient administration of section 1205 of this title, the Secretary of Commerce shall, within six months after the date of enactment of this title, establish and administer an import licensing system under which an importer of any textiles and textile products from any country and from Canada and the Member States of the European Economic Community, will be required to present an import permit as a condition of entry. The Secretary shall charge a fee for import licenses in such amount as may be necessary to cover the cost of administration of the system. The Secretary of the Treasury shall make all determinations regarding classification under the Tariff Schedules of the United States, appraisement, and valuation of products subject to licensing under this section.

"SEC. 1207. ANNUAL REPORT.

"Not later than March 15, 1986, and March 15 each calendar year thereafter, the President shall submit to the Congress a report on the administration of this title during the preceding calendar year. Such report shall include detailed information about the implementation and operation of the limitations established under section 1205. All departments and agencies shall cooperate in preparation of this report, as requested by the President.

"SEC. 1208. REVIEW.

"The Secretary of Commerce shall commence ten years after the date of enactment of this title a formal review of the operation of the Textile Import Control Program under the provisions of this title. The Secretary shall consult members and committees of Congress, representatives of the labor unions and the industries affected by the program, and appropriate government agencies. Within six months after the commencement of the study, the Secretary shall submit to Congress his findings as well as his recommendations for the future conduct of the program.

"SEC. 1209. DUTY FREE ENTRY OF CERTAIN SWEATERS FROM GUAM AND THE NORTHERN MARIANAS.

"Subpart A of part 7, schedule 3 of the Tariff Schedules of the United States (19 U.S.C. 1202) is amended by adding at the end thereof the following new item:

"'385.97	Cotton, wool and man-made fiber sweaters that are entitled to enter under the quotas established under section 205(a)(5) of the Textile and Apparel Trade Enforcement Act of 1985 or the increased quotas under section 205(b) of such Act that adjust the quotas under such section 205(a)(5) and that do not contain foreign materials to the value of more than 50 percent of their total value as this standard is applied pursuant to Headnote 3(a) of the General Headnotes and Rules of Interpretation.	Free

"SEC. 1210. EFFECTIVE DATE.

"(a) IN GENERAL.—Subject to the provisions of subsection (b), the provisions of this title shall apply to textiles and textile products entered, or withdrawn from warehouse, for consumption on or after the date of enactment of this Act.

"(b) CALENDAR YEARS 1985 AND 1986.—The Secretary of Commerce shall determine, and publish in the Federal Register, the aggregate quantity, if any, of textiles and textile products that may be entered under section 1205 (a) or (c) of this title from each country under each category during the period beginning on the date of enactment of this title and ending December 31, 1985. Notwithstanding subsection (a), to the extent that the aggregate quantity of imports of textiles and textile products from a country under a category entered after December 31, 1984, and before the date of enactment of this title exceeds the quantity permitted entry for such country and such category during calendar year 1985 under subsection (a) or (c) of section 1205, then the limit that would otherwise apply under section 1205 (b) or (c) for such category for such country for calendar year 1986 shall be reduced by the amount of such excess quantity. If such excess quantity exceeds the limit that would otherwise apply under section 1205(b) or (c) for such category for such country for calendar year 1986, then the limit for such category and country for calendar years after 1986 shall be reduced until such excess is accounted for.

"TITLE XIII—FOOTWEAR

"SEC. 1301. SHORT TITLE

"This title may be cited as the 'American Footwear Industry Recovery Act of 1985'.

"SEC. 1302. FINDINGS AND PURPOSE.

"(a) The Congress finds that—

"(1) The domestic nonrubber footwear industry is important to the national economy, and footwear firms are vital to the economic health of small towns throughout the United States.

"(2) The domestic nonrubber footwear industry is highly labor intensive, and low capital requirements for entry into footwear production make it a primary target for industrializing on newly industrialized countries. As a consequence, footwear is produced in virtually every footwear consuming country in the world.

"(3) Tremendous competitive pressure has been created in the world footwear market in the last decade as a result of rapidly growing production and capacity in numerous developing and developed countries. This development has resulted in the widespread erection of tariff and nontariff barriers by foreign countries designed to protect their domestic footwear industries.

"(4) The United States has historically resisted the protectionist trends of other producing nations and has instead maintained a market distinguished by its accessibility. As a result, the United States market has become a focal point for world trade in nonrubber footwear.

"(5) The diversion of international trade to the United States market has resulted in serious injury to domestic producers as manifested by—

"(A) the loss of 155,000 footwear jobs since 1968,

"(B) a decline in domestic production and production capacity, and

"(C) the permanent closure of over 500 plants during the same period.

"(6) The serious injury to domestic producers poses a significant danger to the industry's supplier base as well.

"(7) The domestic nonrubber footwear producers have made a significant commitment to the future of the industry through substantial capital investment.

"(8) Since the termination of temporary import relief in 1981, capital investment in the domestic nonrubber footwear industry has declined as the industry struggled to battle the massive surge in imports which increased the percentage share of imported footwear in the United States market from 51 percent in 1981 to 77 percent in 1985.

"(9) Without the restriction of import levels, capital investment in this domestic industry will continue to decrease.

"(10) The domestic nonrubber footwear industry has thrice been judged by the International Trade Commission, as recently as May 1985, to be seriously injured by imports.

"(11) Since the termination of the two, four-year orderly marketing agreements in 1981, the harm to the domestic industry is even more critical than the serious injury which triggered the Commission's unanimous findings in 1976 and 1977.

"(12) The domestic nonrubber footwear industry has not been afforded adequate and appropriate relief from imports; therefore, the Congress concludes that—

"(A) the administrative process under sections 201, 202, and 203 of the Trade Act of 1974 has proven inadequate; and

"(B) in the absence of and effective remedy under such process, legislative relief is essential.

"(b)(1) It is the purpose of Congress in enacting this section to—

"(A) promote and expend the economic health of the United States nonrubber footwear industry,

"(B) preserve the jobs of American workers, and

"(C) prevent the further decline of this important domestic industry.

"(2) It is declared to be the policy of Congress that access to the United States market for foreign-produced nonrubber footwear should be on an equitable basis to ensure orderly trade in nonrubber footwear, reduce unfair trade in nonrubber footwear, and address United States balance-of-payments problems, of which footwear is the seventh largest component. In order to accomplish these objectives, it is deemed necessary and appropriate to limit imports of nonrubber footwear into the United States market.

"SEC. 1303. DEFINITIONS.

"For purposes of this title—

"(1) The term 'entered' means entered, or withdrawn from warehouse, for consumption in the customs territory of the United States.

"(2) The term 'Secretary' means Secretary of Commerce.

"(3) The term 'nonrubber footwear' means the following categories of nonrubber footwear products, identified by reference to the following item numbers of the Tariff Schedules of the United States (as in effect on January 1, 1985): 700.05 through 700.45; 700.56; 700.72 through 700.83; and 700.95.

"(4) The term 'apparent domestic consumption' means, with respect to any 1-year period, the sum of imports plus domestic production less exports.

"SEC. 1304. QUANTITATIVE LIMITATION ON NONRUBBER FOOTWEAR.

"(a)(1) During the 8-year period beginning on the date of enactment of this title, the aggregate number of pairs of nonrubber footwear which may be entered during any 1-year period shall not exceed 60 percent of the estimated apparent domestic consumption of nonrubber footwear for such period.

"(2) The quantitative limitation imposed by paragraph (1) for any 1-year period shall be distributed among the following categories of nonrubber footwear so that the aggregate number of pairs of nonrubber footwear in such category which may be entered during any 1-year period shall not exceed the quantity equal to—

"(A) in the case of nonrubber footwear with a customs value that does not exceed $1.25 per pair, 10 percent of apparent do-

mestic consumption of nonrubber footwear for such period,

"(B) in the case of nonrubber footwear with a customs value that exceeds $1.25 per pair but does not exceed $2.50 per pair, 5.4 percent of apparent domestic consumption of nonrubber footwear for such period, and

"(C) in the case of nonrubber footwear with a customs value that exceeds $2.50 per pair, 44.6 percent of apparent domestic consumption of nonrubber footwear for such period.

"(b) Within sixty days after the effective date of this title, and on the first day of the fourth quarter of each 1 year period thereafter, the Secretary shall determine on the basis of the best information available, including his own or independent forecasts, the expected apparent domestic consumption of nonrubber footwear for, in the case of the initial determination, the remainder of the current 1 year period and in the case of the first day of the fourth quarter of each 1 year period thereafter, the next succeeding 1 year period. On each such date, the Secretary shall determine and publish in the Federal Register the allocation for the next succeeding 1 year period of permissible imports of nonrubber footwear as required by this section.

"(c) On the first days of the first, second, and third quarters of each 1 year period, the Secretary shall revise the determinations of expected apparent domestic consumption made under subsection (b) for the current 1 year period on the basis of the best information then available and shall make such adjustments in the quantity of nonrubber footwear permitted to be imported under this section as indicated by the revision. All revisions and adjustments made under this subsection shall be published in the Federal Register.

"(d) If the revised determination of expected apparent domestic consumption published in the Federal Register under subsection (c) on the first day of the third quarter in any 1 year period for nonrubber footwear varies from the actual apparent domestic consumption of nonrubber footwear for such 1 year period, the Secretary shall publish in the Federal Register on the first day of the second quarter of such succeeding 1 year period a revision to the determination of expected apparent domestic consumption for such 1 year period made under subsection (c) of this section. The revision shall be in the amount of such variance and shall be in addition to any other revision that would be made on any such first day of the second quarter under subsection (c) of this section.

"(e)(1) The Secretary and the Secretary of the Treasury shall take such actions within their respective jurisdictions as may be necessary or appropriate to enforce the provisions of this section, including without limitation, the issuance of orders to customs officers to bar entry to merchandise if the entry of such merchandise would cause the limitations established under this section to be exceeded.

"(2)(A) The Secretary and the Secretary of the Treasury are each authorized to issue such implementing regulations, including the issuance of import licenses, as may be necessary or appropriate to effect the purposes of this section and to enforce the provisions of this section.

"(B) Before prescribing any regulations under subparagraph (A), the Secretary or the Secretary of the Treasury, as the case may be, shall—

"(i) consult with interested domestic parties,

"(ii) afford an opportunity for such parties to comment on the proposed regulations, and

"(iii) consider all such comments before prescribing final regulations.

"SEC. 1305. COMPENSATION AUTHORITY.

"For purposes of section 123 of the Trade Act of 1974 (19 U.S.C. 2133), the imposition of the quantitative limitation under section 204 shall be treated as action taken under section 203 of the Trade Act of 1974 (19 U.S.C. 2253).".

HOLLINGS (AND THURMOND) AMENDMENT NO. 875

Mr. HOLLINGS (for himself and Mr. THURMOND) proposed an amendmen to the bill S. 1730, supra; as follows:

At the appropriate place, insert the following:

TEXTILE AND APPAREL TRADE ENFORCEMENT

"SEC. 201. SHORT TITLE.

"This title may be cited as the 'Textile and Apparel Trade Enforcement Act of 1985'.

"SEC. 202. POLICY.

"The policy of this title is—

"(1) to prevent further disruption of the United States textiles and textile products markets, damage to United States textile and apparel manufacturers, and loss of jobs by United States workers by providing for orderly and nondisruptive growth of imports of textiles and textile products; and

"(2) to implement the objectives of the Multi-Fiber Arrangement by requiring the effective enforcement of import levels of textiles and textile products contemplated by the Multi-Fiber Arrangement.

"SEC. 203. FINDINGS.

"The Congress finds that—

"(1) the United States and most major textile producing countries are parties to the Multi-Fiber Arrangement, the purpose of which is to ensure the orderly growth of imports of textiles and textile products and to avoid disruption of the markets for textiles and textile products in importing nations;

"(2) the Multi-Fiber Arrangement, which first entered into force on January 1, 1974, and which was most recently extended in December, 1981, through July 1986, contemplates a 6 per centum annual rate of growth for imports for most exporting countries and provides for a lower rate of growth for imports from significant exporting countries;

"(3) since 1980, the objective of orderly growth of imports of textiles and textile products for in the Multi-Fiber Arrangement has not been achieved; from 1981 through 1984 imports of textiles and textile products into the United States have grown at an annual rate of 19 centum, far in excess of the 1 per centum growth rate of the United States market for textiles and textile products during the same period and far in excess of the annual rate of import growth of less than 2 per centum that prevailed during the period 1974 through 1980;

"(4) the disruptive surge in imports of textiles and textile products which occurred from 1981 through 1984 resulted from the failure of the United States to enforce adequately its rights under the Multi-Fiber Arrangement and to extend coverage of the Multi-Fiber Arrangement to imports made of competing fibers;

"(5) import growth of apparel products has substantially outstripped the growth of the domestic market so that import penetration of the domestic market has more than doubled in the last six years, reaching a level of 50 per centum in 1984;

"(6) based on a nationwide audit of major retail outlets, the import penetration of such major items of apparel as trousers, blouses, shirts, suits, skirts and sweaters exceeds 50 per centum of domestic consumption;

"(7) since the most recent extension of the Multi-Fiber Arrangement, certain exporting countries have sharply increased their exports of textiles and textile products made in whole or in part from fibers not subject to the Multi-Fiber Arrangement with the effect of circumventing restraints agreed to under the Arrangement; the increased imports of these textiles and textile products have caused disruption of the United States market for textiles and textile products and have seriously undercut the effectiveness of the Multi-Fiber Arrangement;

"(8) imports of textiles and textile products into the United States are predominantly the product of significant exporting countries, with five large exporting countries now accounting for more than 50 per centum of all imports of textiles and textile products;

"(9) the domination of import trade by producers in the significant producing countries has limited participation in the United States market by other producing countries, many of which share important trade and other national interests, and encourage mutually beneficial trade and investment, with the United States;

"(10) a change in United States textile trade policy to afford the smaller producing countries and countries in the Caribbean region a relatively greater share of imports of textiles and textile products would promote the national economic interests of the United States;

"(11) the textile and apparel trade deficit of the United States was more than $16,200,000,000 in 1984, an increase of 53 per centum over 1983, and accounted for 13 per centum of the Nation's overall merchandise trade deficit;

"(12) the current level of imports of textiles and textile products, ten billion square yard equivalents in 1984, represents over one million job opportunities lost to United States workers;

"(13) imported textiles and textile products now account for 38 per centum (the equivalent of three million two hundred thousand bales of cotton) of the annual cotton consumption in the United States; only one of five of the bale equivalents included in imported textiles and textile products is grown in the United States; the result of the massive increases in cotton textile and apparel imports has been a declining market share for, and a $1,000,000,000 loss to, domestic cotton producers in 1983 alone, which was only partially offset by Federal cotton program benefits; another result is that United Stats cotton producers, who are spending about $20,000,000 annually in research and promotion efforts, have built markets not for themselves but for foreign growers;

"(14) imports of wool products have doubled since 1980, creating major disruptions among domestic wool products producers and seriously depressing the price of United States produced raw wool; the Multi-Fiber Arrangement recognizes that imports of certain products, such as wool products, in cer-

tain countries, including the United States, pose particular problems for certain industries, such as, the wool products industries in those countries and import growth rates of 1 per centum or less have been permitted in such cases;

"(15) as a result of this increased penetration and the very limited growth of the domestic market, the United States companies producing textiles and textile products identical, or similar, to those imported have been seriously damaged, many of them have been forced out of business, many have closed plants or curtailed operations, workers in such companies have lost employment and have been otherwise materially and adversely affected, and serious hardship has been inflicted on hundreds of impacted communities causing a substantial reduction in economic activity and lost revenues to local governments;

"(16) the increase in imports and increased import penetration of the United States domestic market have occurred notwithstanding the fact that, through extensive modernization programs and investment in more modern equipment, productivity, as measured by output per man hour, in the textile mill products sector has increased in the last ten years at the average annual rate of 4.2 per centum and in the apparel sector at the average annual rate of 3.4 per centum; as compared with the lower productivity growth of all manufacturing in the same period of 1.9 per centum;

"(17) the factors described above are causing serious damage, or the actual threat thereof, to domestic producers of textiles and textile products; as a result, market disruption exists in the United States requiring the new measures established under this Act;

"(18) based on experience during the past ten years and on other factors, the growth of the United States market for textiles and textile products is unlikely to exceed an average annual rate of 1 per centum during the next several years;

"(19) if the rate of growth of imports of textiles and textile products into the United States that occurred since 1980 continues, plant closings will continue to accelerate, leaving the United States market with reduced domestic competition for imported products;

"(20) in order to avoid further market disruption and deterioration of the situation confronting the United States industry producing textiles and textile products, which is already seriously damaged, it is essential—

"(A) to require the establishment of import levels for textiles and textile products supplied by major producing countries that reflect—

"(i) the import level that would have occurred had imports from these countries grown since 1980 by the 6 per centum annual growth rate contemplated by the Multi-Fiber Arrangement, or 1 per centum in the case of wool products, or

"(ii) the actual import level resulting from restraints under a bilateral agreement with the United States providing for an annual import growth rate of less than 6 per centum,

whichever is the lesser,

"(B) to require the establishment of import levels for textiles and textile products supplied by producing countries that reflect their 1984 import levels,

"(C) to require the establishment of import levels for textiles and textile products supplied by small producing countries that provide a significant increase in their market shares to meet their development needs and to permit future growth in such shares consistent with the Multi-Fiber Arrangement, and

"(D) to limit the future growth rate of imports of textiles and textile products into the United States to levels which reflect orderly growth as provided for in the Multi-Fiber Arrangement and the most recent Protocol extending the Multi-Fiber Arrangement;

"(21) the establishment of import levels, and limitation on future import growth to levels, that reflect effective enforcement of the Multi-Fiber Arrangement and that also reflect the expected growth rate of the United States market for textiles and textile products will fulfill announced policy objectives of the United States regarding trade in textiles and apparel;

"(22) as the Department of Defense has long recognized, a strong, viable and efficient domestic textiles and textile products industry is essential in order to avoid impairment of the national security of the United States;

"(23) the developments that have led to the sharp increase in imports of textiles and textile products since 1980 may not have been foreseeable; nevertheless, the rights of the United States under international agreements should have been invoked in order to prevent increased quantities of textiles and textile products from being imported under such conditions as to cause or threaten serious damage to domestic producers of textiles and textile products in the United States; and

"(24) the sharp increase in imports of textiles and textile products since 1980, and the effect of this increase on the United States textiles and apparel industry and its workers, constitutes exceptional circumstances within the meaning of the Milti-Fiber Arrangement and its Protocol.

"SEC. 204. DEFINITIONS.

"For purposes of this title—

"(1) The term "Textiles and textile products" includes, but is not limited to, all manmade fibers, tops, yarns, piece goods, made-up articles, apparel, and other textile manufactured products (which derive their chief characteristics from their textile components) made in whole or in part from any natural or manmade fiber, or blend thereof, that are classified under schedule 3, part 6 of schedule 6, part 1, 4, 5 (except subpart E), 7, or 13 of schedule 7, or part 1 of schedule 8 of the Tariff Schedules of the United States or part 1 of the Appendix to the Tariff Schedules of the United States;

"(2) The term "category" means, with respect to textiles and textile products that are the product of a country, each of the following—

"(A) each category of textiles and textile products identified by a three-digit textile category number in the Department of Commerce publication "Correlation: Textile and Apparel Categories with Tariff Schedules of the United States Annotated", dated January 1985 and, subsequently, in the first edition of such document that is revised to reflect the adoption by the United States of the Nomenclature Structure of the Harmonized System;

"(B) with respect to each country with which the United States has (i) an agreement on the date of enactment of this title limiting exports of textiles and textile products to the United States that includes specific limitations on subdivisions of a category described in subparagraph (A), or (ii) taken unilateral action to limit products entered under such a subdivision, each such subdivision;

"(C) a category consisting of the manmade fiber products classified under subpart E of part 1 of schedule 3 to the Tariff Schedules of the United States; and

"(D) each category consisting of each of the following products when, because of any fiber content, that product is not subject to the Multi-Fiber Arrangement:

"(i) yarn,

"(ii) fabric,

"(iii) apparel, and

"(iv) other textile products;

"(3) The term "import sensitive category" means—

"(A) a category (other than a category applicable to textiles and textile products that are a product of a country in the Caribbean region) for which the ratio of imports to domestic production, as reported in the Department of Commerce publication "U.S. Production, Imports and Import/Production Ratios for Cotton, Wool and Man-Made Fiber Textiles and Apparel", equals or exceeds 40.0 for the preceding calendar year; and

"(B) a category covering wool products;

"(4) The term "country" means a foreign country (other than Canada and the Member States of the European Economic Community as constituted on December 31, 1984), a foreign territory, an insular possession of the United States, or any other territory, possession, colony, trusteeship or political entity, whether affiliated with the United States or not, that is outside the customs territory of the United States;

"(5) The term "major producing country" means a country the annual aggregate quantity of textiles and textile products of which that entered under the categories referred to in paragraph (2)(A) during calendar year 1984 equalled or exceeded 10 percent of all textiles and textile products under such categories that entered from all countries and from Canada and the Member States of the European Economic Community during calendar year 1984;

"(6) The term "producing country" means a country (other than a major producing country and a country in the Carribean region) the annual aggregate quantity of textiles and textile products of which that entered under the categories referred to in paragraph (2)(A) during calendar year 1984 equalled or exceeded 1.25 per centum of all textiles and textile products under such categories that entered from all countries and from Canada and the Member States of the European Economic Community during calendar year 1984;

"(7) the term "small producing country" means a country other than a major producing country and a producing country;

"(8) The term "country in the Caribbean region" means Mexico and a country eligible for designation as a beneficiary country under section 212 of the Caribbean Basin Economic Recovery Act (19 U.S.C 2702);

"(9) The term "wool product" means an article containing over 17 per centum by weight of wool;

"(10) The term "cotton, wool and manmade fiber sweaters" means articles classified under categories 345, 445, 446, 645 or 646 as defined in the Department of Commerce publication "Correlation Textile and Apparel Categories with Tariff Schedules of the United States Annotated," dated January 1985;

"(11) The term "entered" means entered, or withdrawn from warehouse, for consump-

tion in the customs territory of the United States;

"(12) The term "imported" means entered; and

"(13) The term "Multi-Fiber Arrangement" means the Arrangement Regarding International Trade in Textiles, as extended by the Protocol done at Geneva, December 22, 1981.

"SEC. 205. LIMITS ON TEXTILE AND APPAREL IMPORTS.

"(a) CALENDAR YEAR 1985.— Notwithstanding any other provision of law, the aggregate quantity of textiles and textile products classified under a category that is entered during calendar year 1985 shall not exceed—

"(1) in the case of textiles and textile products that are a product of a major producing country other than textile luggage and textile flat goods subject (as of the date of enactment of this Act) to a specific limitation under an agreement with a major producing country, the lesser of an amount equal to 101 per centum—

"(A) of the aggregate quantity of such products of such country classified under such category that would have entered during calendar year 1984 if the aggregate quantity of such products of such country classified under such category entered during calendar year 1980 had increased by 6 per centum annually, or 1 per centum annually in the case of a category covering a wool product, during calendar years 1981, 1982, 1983, and 1984, or

"(B) If the United States has an agreement with such country providing for an annual growth rate for such category of less than 6 per centum, of the aggregate quantity of such products of such country classified under such category that entered during calendar year 1984;

"(2) in the case of textile luggage and textile flat goods subject (as of the date of enactment of this Act) to specific limitation under an agreement with a major producing country, the specific limitation quantity in effect as of the date of enactment of the Act;

"(3) in the case of textiles and textile products that are a product of a producing country, an amount equal to the aggregate quantity of—

"(A) such products from such country classified under such category that entered during calendar year 1984, or

"(B) in the case of textile luggage and textile flat goods subject (as of the date of enactment of this Act) to specific limitation under an agreement with a producing country, the specific limitation quantity in effect as of the date of enactment of this Act;

"(4) in the case of textiles and textile products that are a product of a small producing country (other than cotton, wool, and man-made fiber sweaters described in paragraph (5)), an amount equal to the sum of—

"(A) the aggregate quantity of such products of such country classified under such category that entered during calendar year 1984, plus

"(B) an amount equal to—

"(i) 15 per centum of such quantity, in the case of a category that is not an import sensitive category, or

"(ii) 1 per centum of such quantity, in the case of a category that is an import sensitive category; and

"(5) in the case of cotton, wool and man-made fiber sweaters that are—

"(A) the product of substantial assembly operations in Guam from otherwise completed knit-to-shape component parts, an aggregate amount equal to 160,000 dozen; and

"(B) the product of substantial assembly operations in the Commonwealth of the Northern Mariana Islands from otherwise completed knit-to-shape component parts, an aggregate amount equal to 70,000 dozen.

"If application of paragraph (1) would result in the aggregate quantity of textiles and textile products of a major producing country classified under all categories permitted to enter during calendar year 1985 to be less than 70 per centum of the aggregate quantity of such products of such country that entered during calendar year 1984, then, notwithstanding paragraph (1), the aggregate quantity of textiles and textile products of such country that may be entered under each category during calendar year 1985 shall not be less than 40 per centum of the aggregate quantity of such products of such country that entered under such category during calendar year 1984.

"(b) GROWTH ADJUSTMENT.—For calendar years after 1985, the aggregate quantity of textiles and textile products classified under each category that may be entered during each such calendar year shall—

"(1) in the case of such products that are a product of a major producing country or of a producing country, be increased by an amount equal to 1 per centum of the aggregate quantity that could be entered under such category during the preceding calendar year; and

"(2) in the case of such products that are a product of a small producing country, be increased by an amount equal to—

"(A) in the case of a category (other than an import sensitive category), 6 per centum of the aggregate quantity that could be entered under that category during the preceding calendar year, and

"(B) in the case of an import sensitive category, 1 per centum of the aggregate quantity that could be entered under that category during the preceding calendar year.

"If the aggregate quantity that could be entered under a category for a calendar year after 1985 is reduced under section 210(b), than in the first calendar year in which there is no such reduction, this subsection shall be applied as if there had been no reduction under section 210(b) in previous calendar years.

"(c) MINIMUM QUANTITIES.—If, under subsection (a) or (b), the aggregate quantity of textiles and textile products of a country that may be entered during a calendar year under a category is—

"(1) less than one million square yard equivalents, in the case of a category covering yarn, fabric, made-ups, and miscellaneous products, other than wool products;

"(2) less than seven hundred thousand square yard equivalents, in the case of a category covering apparel, other than wool products apparel; or

"(3) less than one hundred thousand square yard equivalents, in the case of a category covering wool products,

"then, notwithstanding subsection (a) or (b), the aggregate quantity of textiles and textile products that may be entered from such country under such category during the calendar year shall be one million, seven hundred thousand, or one hundred thousand square yard equivalents, respectively. The amount prescribed in the preceding sentence shall be accorded growth subject to the provisions of subsection (b) beginning the first calendar year after the aggregate quantity of imports from such country under such category equals the minimum quantity prescribed under this subsection.

"(d) SPECIAL RULE.—For purposes of this section, if during any calendar year after 1984, the aggregate quantity of textiles and textile products that are the product of a small producing country, other than a country in the Caribbean region, and that are entered under the categories referred to in paragraph (2)(A) of section 204 equals or exceeds 1.25 per centum of all textiles and textile products entered under such categories from all countries and from Canada and the Member States of the European Economic Community during such calendar year, then such small producing country shall be considered to be a producing country for all succeeding calendar years.

"(e) ENFORCEMENT.—The Secretary of Commerce shall prescribe such regulations governing the entry, or withdrawal from warehouse, for consumption of textiles and textile products as may be necessary to carry out this title.

"SEC. 206. IMPORT LICENSING.

"In order to ensure the equitable and efficient administration of section 205 of this title, the Secretary of Commerce shall, within six months after the date of enactment of this title, establish and administer an import licensing system under which an importer of any textiles and textile products from any country and from Canada and the Member States of the European Economic Community, will be required to present an import permit as a condition of entry. The Secretary shall charge a fee for import licenses in such amount as may be necessary to cover the cost of administration of the system.

"SEC. 207. ANNUAL REPORT.

"Not later than March 15, 1986, and March 15 each calendar year thereafter, the President shall submit to the Congress a report on the administration of this title during the preceding calendar year. Such report shall include detailed information about the implementation and operation of the limitations established under section 205. All departments and agencies shall cooperate in preparation of this report, as requested by the President.

"SEC. 208. REVIEW.

"The Secretary of Commerce shall commence ten years after the date of enactment of this title a formal review of the operation of the Textile Import Control Program under the provisions of this title. The Secretary shall consult members and committees of Congress, representatives of the labor unions and the industries affected by the program, and appropriate government agencies. Within six months after the commencement of the study, the Secretary shall submit to Congress his findings as well as his recommendations for the future conduct of the program.

"SEC. 209. DUTY FREE ENTRY OF CERTAIN SWEATERS FROM GUAM AND THE NORTHERN MARIANAS.

"Subpart A of part 7, schedule 3 of the Tariff Schedules of the United States (19 U.S.C. 1202) is amended by adding at the end thereof the following new item:

"385.97	Cotton, wool and man-made fiber sweaters that are entitled to enter under the quotas established under section 205(a)(5) of the Textile and Apparel Trade Enforcement Act of 1985 or the increased quotas under section 205(b) of such Act that adjust the quotas under such section 205(a)(5) and that do not contain foreign materials to the value of more than 50 percent of their total value as this standard is applied pursuant to Headnote 3(a) of the General Headnotes and Rules of Interpretation.	Free

"SEC. 210. EFFECTIVE DATE.

"(a) IN GENERAL.—Subject to the provisions of subsection (b), the provisions of this title shall apply to textiles and textile products entered, or withdrawn from warehouse, for consumption on or after the date of enactment of this Act.

"(b) CALENDAR YEARS 1985 AND 1986.—The Secretary of Commerce shall determine, and publish in the Federal Register, the aggregate quantity, if any, of textiles and textile products that may be entered under section 205(a) or (c) of this title from each country under each category during the period beginning on the date of enactment of this title and ending December 31, 1985. Notwithstanding subsection (a), to the extent that the aggregate quantity of imports of textiles and textile products from a country under a category entered after December 31, 1984, and before the date of enactment of this title exceeds the quantity permitted entry for such country and such category during calendar year 1985 under subsection (a) or (c) of section 205, then the limit that would otherwise apply under section 205(b) for such category for such country for calendar year 1986 shall be reduced by the amount of such excess quantity. If such excess quantity exceeds the limit that would otherwise apply under section 205(b) for such category for such country for calendar year 1986, then the limit for such category and country for calendar years after 1986 shall be reduced until such excess is accounted for.

"TITLE III—FOOTWEAR

"SEC. 301. SHORT TITLE

"This title may be cited as the 'American Footwear Industry Recovery Act of 1985'.

"SEC. 302. FINDINGS AND PURPOSE.

"(a) The Congress finds that—

"(1) The domestic nonrubber footwear industry is important to the national economy, and footwear firms are vital to the economic health of small towns throughout the United States.

"(2) The domestic nonrubber footwear industry is highly labor intensive, and low capital requirements for entry into footwear production make it a primary target for industrializing on newly industrialized countries. As a consequence, footwear is produced in virtually every footwear consuming country in the world.

"(3) Tremendous competitive pressure has been created in the world footwear market in the last decade as a result of rapidly growing production and capacity in numerous developing and developed countries. This development has resulted in the widespread erection of tariff and nontariff barriers by foreign countries designed to protect their domestic footwear industries.

"(4) The United States has historically resisted the protectionist trends of other producing nations and has instead maintained a market distinguished by its accessibility. As a result, the United States market has become a focal point for world trade in nonrubber footwear.

"(5) The diversion of international trade to the United States market has resulted in serious injury to domestic producers as manifested by—

"(A) the loss of 155,000 footwear jobs since 1968,

"(B) a decline in domestic production and production capacity, and

"(C) the permanent closure of over 500 plants during the same period.

"(6) The serious injury to domestic producers poses a significant danger to the industry's supplier base as well.

"(7) The domestic nonrubber footwear producers have made a significant commitment to the future of the industry through substantial capital investment.

"(8) Since the termination of temporary import relief in 1981, capital investment in the domestic nonrubber footwear industry has declined as the industry struggled to battle the massive surge in imports which increased the percentage share of imported footwear in the United States market from 51 percent in 1981 to 77 percent in 1985.

"(9) Without the restriction of import levels, capital investment in this domestic industry will continue to decrease.

"(10) The domestic nonrubber footwear industry has thrice been judged by the International Trade Commission, as recently as May 1985, to be seriously injured by imports.

"(11) Since the termination of the two, four-year orderly marketing agreements in 1981, the harm to the domestic industry is even more critical than the serious injury which triggered the Commission's unanimous findings in 1976 and 1977.

"(12) The domestic nonrubber footwear industry has not been afforded adequate and appropriate relief from imports; therefore, the Congress concludes that—

"(A) the administrative process under sections 201, 202, and 203 of the Trade Act of 1974 has proven inadequate; and

"(B) in the absence of and effective remedy under such process, legislative relief is essential.

"(b)(1) It is the purpose of Congress in enacting this section to—

"(A) promote and expend the economic health of the United States nonrubber footwear industry,

"(B) preserve the jobs of American workers, and

"(C) prevent the further decline of this important domestic industry.

"(2) It is declared to be the policy of Congress that access to the United States market for foreign-produced nonrubber footwear should be on an equitable basis to ensure orderly trade in nonrubber footwear, reduce unfair trade in nonrubber footwear, and address United States balance-of-payments problems, or which footwear is the seventh largest component. In order to accomplish these objectives, it is deemed necessary and appropriate to limit imports of nonrubber footwear into the United States market.

"SEC. 303. DEFINITIONS.

"For purposes of this title—

"(1) The term 'entered' means entered, or withdrawn from warehouse, for consumption in the customs territory of the United States.

"(2) The term 'Secretary' means Secretary of Commerce.

"(3) The term 'nonrubber footwear' means the following categories of nonrubber footwear products, identified by reference to the following item numbers of the Tariff Schedules of the United States (as in effect on January 1, 1985): 700.05 through 700.45; 700.56; 700.72 through 700.83; and 700.95.

"(4) The term 'apparent domestic consumption' means, with respect to any 1-year period, the sum of imports plus domestic production less exports.

"SEC. 304. QUANTITATIVE LIMITATION ON NONRUBBER FOOTWEAR.

"(a)(1) During the 8-year period beginning on the date of enactment of this title, the aggregate number of pairs of nonrubber footwear which may be entered during any 1-year period shall not exceed 60 percent of the estimated apparent domestic consumption of nonrubber footwear for such period.

"(2) The quantitative limitation imposed by paragraph (1) for any 1-year period shall be distributed among the following categories of nonrubber footwear so that the aggregate number of pairs of nonrubber footwear in such category which may be entered during any 1-year period shall not exceed the quantity equal to—

"(A) in the case of nonrubber footwear with a customs value that does not exceed $1.25 per pair, 10 percent of apparent domestic consumption of nonrubber footwear for such period,

"(B) in the case of nonrubber footwear with a customs value that exceeds $1.25 per pair but does not exceed $2.50 per pair, 5.4 percent of apparent domestic consumption of nonrubber footwear for such period, and

"(C) in the case of nonrubber footwear with a customs value that exceeds $2.50 per pair, 44.6 percent of apparent domestic consumption of nonrubber footwear for such period.

"(b) Within sixty days after the effective date of this title, and on the first day of the fourth quarter of each 1 year period thereafter, the Secretary shall determine on the basis of the best information available, including his own or independent forecasts, the expected apparent domestic consumption of nonrubber footwear for, in the case of the initial determination, the remainder of the current 1 year period and in the case of the first day of the fourth quarter of each 1 year period thereafter, the next succeeding 1 year period. On each such date, the Secretary shall determine and publish in the Federal Register the allocation for the next succeeeding 1 year period of permissible imports of nonrubber footwear as required by this section.

"(c) On the first days of the first, second, and third quarters of each 1 year period, the Secretary shall revise the determinations of expected apparent domestic consumption made under subsection (b) for the current 1 year period on the basis of the best information then available and shall make such adjustments in the quantity of nonrubber footwear permitted to be imported under this section as indicated by the revision. All revisions and adjustments made under this subsection shall be published in the Federal Register.

"(d) If the revised determination of expected apparent domestic consumption published in the Federal Register under subsection (c) on the first day of the third quarter in any 1 year period for nonrubber footwear varies from the actual apparent domestic consumption of nonrubber footwear for such 1 year period, the Secretary shall publish in the Federal Register on the first day of the second quarter of such succeeding 1 year period a revision to the determination of expected apparent domestic consumption for such 1 year period made under subsection (c) of this section. The revision shall be in the amount of such variance and shall be in addition to any other revision that would

be made on any such first day of the second quarter under subsection (c) of this section.

"(e)(1) The Secretary and the Secretary of the Treasury shall take such actions within their respective jurisdictions as may be necessary or appropriate to enforce the provisions of this section, including without limitation, the issuance of orders to customs officers to bar entry to merchandise if the entry of such merchandise would cause the limitations established under this section to be exceeded.

"(2)(A) The Secretary and the Secretary of the Treasury are each authorized to issue such implementing regulations, including the issuance of import licenses, as may be necessary or appropriate to effect the purposes of this section and to enforce the provisions of this section.

"(B) Before prescribing any regulations under subparagraph (A), the Secretary or the Secretary of the Treasury, as the case may be, shall—

"(i) consult with interested domestic parties,

"(ii) afford an opportunity for such parties to comment on the proposed regulations, and

"(iii) consider all such comments before prescribing final regulations.

"SEC. 305. COMPENSATION AUTHORITY.

"For purposes of section 123 of the Trade Act of 1974 (19 U.S.C. 2133), the imposition of the quantitative limitation under section 204 shall be treated as action taken under section 203 of the Trade Act of 1974 (19 U.S.C. 2253).".

THURMOND (AND OTHERS) AMENDMENT NO. 876

Mr. THURMOND (for himself, Mr. HOLLINGS, Mr. MOYNIHAN, Mr. HELMS, Mr. HEFLIN, Mr. HEINZ, Mr. COHEN, Mr. WARNER, Mr. KENNEDY, Mr. MITCHELL, Mr. EAGLETON, Mr. SPECTER, Mr. EAST, Mr. COCHRAN, Mr. TRIBLE, Mr. DENTON, Mr. D'AMATO, Mr. SASSER, Mr. HATCH, Mr. PELL, Mr. MATTINGLY, Mr. ROCKEFELLER, Mrs. HAWKINS, Mr. GORE, Mr. DIXON, Mr. DODD, Mr. SIMON, Mr. FORD, Mr. DECONCINI, Mr. PRYOR, Mr. MATHIAS, Mr. LONG, Mr. LEAHY, Mr. METZENBAUM, Mr. RIEGLE, Mr. WEICKER, Mr. MCCONNELL, Mr. KASTEN, Mr. GLENN, Mr. BUMPERS, Mr. NUNN, and Mr. BYRD) proposed an amendment to amendment No. 875 proposed by Mr. HOLLINGS (and Mr. THURMOND) to the bill S. 1730, supra; as follows:

Beginning on page 1 of the pending amendment strike all after line 3 and insert the following:

"This title may be cited as the 'Textile and Apparel Trade Enforcement Act of 1985'.

"SEC. 1202. POLICY.

"The policy of this title is—

"(1) to prevent further disruption of the United States textiles and textile products markets, damage to United States textile and apparel manufacturers, and loss of jobs by United States workers by providing for orderly and nondisruptive growth of imports of textiles and textile products; and

"(2) to implement the objectives of the Multi-Fiber Arrangement by requiring the effective enforcement of import levels of textiles and textile products contemplated by the Multi-Fiber Arrangement.

"SEC. 1203. FINDINGS.

"The Congress finds that—

"(1) the United States and most major textile producing countries are parties to the Multi-Fiber Arrangement, the purpose of which is to ensure the orderly growth of imports of textiles and textile products and to avoid disruption of the markets for textiles and textile products in importing nations;

"(2) the Multi-Fiber Arrangement, which first entered into force on January 1, 1974, and which was most recently extended in December, 1981, through July 1986, contemplates a 6 per centum annual rate of growth for imports for most exporting countries and provides for a lower rate of growth for imports from significant exporting countries;

"(3) since 1980, the objective of orderly growth of imports of textiles and textile products for in the Multi-Fiber Arrangement has not been achieved; from 1981 through 1984 imports of textiles and textile products into the United States have grown at an annual rate of 19 centum, far in excess of the 1 per centum growth rate of the United States market for textiles and textile products during the same period and far in excess of the annual rate of import growth of less than 2 per centum that prevailed during the period 1974 through 1980;

"(4) the disruptive surge in imports of textiles and textile products which occurred from 1981 through 1984 resulted from the failure of the United States to enforce adequately its rights under the Multi-Fiber Arrangement and to extend coverage of the Multi-Fiber Arrangement to imports made of competing fibers;

"(5) import growth of apparel products has substantially outstripped the growth of the domestic market so that import penetration of the domestic market has more than doubled in the last six years, reaching a level of 50 per centum in 1984;

"(6) based on a nationwide audit of major retail outlets, the import penetration of such major items of apparel as trousers, blouses, shirts, suits, skirts and sweaters exceeds 50 per centum of domestic consumption;

"(7) since the most recent extension of the Multi-Fiber Arrangement, certain exporting countries have sharply increased their exports of textiles and textile products made in whole or in part from fibers not subject to the Multi-Fiber Arrangement with the effect of circumventing restraints agreed to under the Arrangement; the increased imports of these textiles and textile products have caused disruption of the United States market for textiles and textile products and have seriously undercut the effectiveness of the Multi-Fiber Arrangement;

"(8) imports of textiles and textile products into the United States are predominantly the product of significant exporting countries, with five large exporting countries now accounting for more than 50 per centum of all imports of textiles and textile products;

"(9) the domination of import trade by producers in the significant producing countries has limited participation in the United States market by other producing countries, many of which share important trade and other national interests, and encourage mutually beneficial trade and investment, with the United States;

"(10) a change in United States textile trade policy to afford the smaller producing countries and countries in the Caribbean region a relatively greater share of imports of textiles and textile products would promote the national economic interests of the United States;

"(11) the textile and apparel trade deficit of the United States was more than $16,200,000,000 in 1984, an increase of 53 per centum over 1983, and accounted for 13 per centum of the Nation's overall merchandise trade deficit;

"(12) the current level of imports of textiles and textile products, ten billion square yard equivalents in 1984, represents over one million job opportunities lost to United States workers;

"(13) imported textiles and textile products now account for 38 per centum (the equivalent of three million two hundred thousand bales of cotton) of the annual cotton consumption in the United States; only one of five of the bale equivalents included in imported textiles and textile products is grown in the United States; the result of the massive increases in cotton textile and apparel imports has been a declining market share for, and a $1,000,000,000 loss to, domestic cotton producers in 1983 alone, which was only partially offset by Federal cotton program benefits; another result is that United States cotton producers, who are spending about $20,000,000 annually in research and promotion efforts, have built markets not for themselves but for foreign growers;

"(14) imports of wool products have doubled since 1980, creating major disruptions among domestic wool products producers and seriously depressing the price of United States produced raw wool; the Multi-Fiber Arrangement recognizes that imports of certain products, such as wool products, in certain countries, including the United States, pose particular problems for certain industries, such as, the wool products industries in those countries and import growth rates of 1 per centum or less have been permitted in such cases;

"(15) as a result of this increased penetration and the very limited growth of the domestic market, the United States companies producing textiles and textile products identical, or similar, to those imported have been seriously damaged, many of them have been forced out of business, many have closed plants or curtailed operations, workers in such companies have lost employment and have been otherwise materially and adversely affected, and serious hardship has been inflicted on hundreds of impacted communities causing a substantial reduction in economic activity and lost revenues to local governments;

"(16) the increase in imports and increased import penetration of the United States domestic market have occurred notwithstanding the fact that, through extensive modernization programs and investment in more modern equipment, productivity, as measured by output per man hour, in the textile mill products sector has increased in the last ten years at the average annual rate of 4.2 per centum and in the apparel sector at the average annual rate of 3.4 per centum; as compared with the lower productivity growth of all manufacturing in the same period of 1.9 per centum;

"(17) the factors described above are causing serious damage, or the actual threat thereof, to domestic producers of textiles and textile products; as a result, market disruption exists in the United States requiring the new measures established under this Title;

"(18) based on experience during the past ten years and on other factors, the growth

of the United States market for textiles and textile products is unlikely to exceed an average annual rate of 1 per centum during the next several years;

"(19) if the rate of growth of imports of textiles and textile products into the United States that occurred since 1980 continues, plant closings will continue to accelerate, leaving the United States market with reduced domestic competition for imported products;

"(20) in order to avoid further market disruption and deterioration of the situation confronting the United States industry producing textiles and textile products, which is already seriously damaged, it is essential—

"(A) to require the establishment of import levels for textiles and textile products supplied by major producing countries that reflect—

"(i) the import level that would have occurred had imports from these countries grown since 1980 by the 6 per centum annual growth rate contemplated by the Multi-Fiber Arrangement, or 1 per centum in the case of wool products, or

"(ii) the actual import level resulting from restraints under a bilateral agreement with the United States providing for an annual import growth rate of less than 6 per centum, whichever is the lesser,

"(B) to require the establishment of import levels for textiles and textile products supplied by producing countries that reflect their 1984 import levels,

"(C) to require the establishment of import levels for textiles and textile products supplied by small producing countries that provide a significant increase in their market shares to meet their development needs and to permit future growth in such shares consistent with the Multi-Fiber Arrangement, and

"(D) to limit the future growth rate of imports of textiles and textile products into the United States to levels which reflect orderly growth as provided for in the Multi-Fiber Arrangement and the most recent Protocol extending the Multi-Fiber Arrangement;

"(21) the establishment of import levels, and limitation on future import growth to levels, that reflect effective enforcement of the Multi-Fiber Arrangement and that also reflect the expected growth rate of the United States market for textiles and textile products will fulfill announced policy objectives of the United States regarding trade in textiles and apparel;

"(22) as the Department of Defense has long recognized, a strong, viable and efficient domestic textiles and textile products industry is essential in order to avoid impairment of the national security of the United States;

"(23) the developments that have led to the sharp increase in imports of textiles and textile products since 1980 may not have been foreseeable; nevertheless, the rights of the United States under international agreements should have been invoked in order to prevent increased quantities of textiles and textile products from being imported under such conditions as to cause or threaten serious damage to domestic producers of textiles and textile products in the United States; and

"(24) the sharp increase in imports of textiles and textile products since 1980, and the effect of this increase on the United States textiles and apparel industry and its workers, constitutes exceptional circumstances within the meaning of the Milti-Fiber Arrangement and its Protocol.

"SEC. 1204. DEFINITIONS.

"For purposes of this title—

"(1) The term "Textiles and textile products" includes, but is not limited to, all tops, yarns, piece goods, made-up articles, apparel, manmade fibers, and other textile manufactured products (which derive their chief characteristics from their textile components) made in whole or in part from any natural or manmade fiber, or blend thereof, that are classified under schedule 3, part 6 of schedule 6, part 1, 4, 5 (except subpart E), 7, or 13 of schedule 7, or part 1 of schedule 8 of the Tariff Schedules of the United States or part 1 of the Appendix to the Tariff Schedules of the United States;

"(2) The term "category" means, with respect to textiles and textile products that are the product of a country, each of the following—

"(A) each category of textiles and textile products identified by a three-digit textile category number in the Department of Commerce publication "Correlation: Textile and Apparel Categories with Tariff Schedules of the United States Annotated", dated January 1985 and, subsequently, in the first edition of such document that is revised to reflect the adoption by the United States of the Nomenclature Structure of the Harmonized System;

"(B) with respect to each country with which the United States has (i) an agreement on the date of enactment of this title limiting exports of textiles and textile products to the United States that includes specific limitations on subdivisions of a category described in subparagraph (A), or (ii) taken unilateral action to limit products entered under such a subdivision, each such subdivision;

"(C) a category consisting of the manmade fiber products classified under subpart E of part 1 of schedule 3 to the Tariff Schedules of the United States; and

"(D) each category consisting of each of the following products when, because of fiber content, that product is not subject to the Multi-Fiber Arrangement:

"(i) yarn,

"(ii) fabric,

"(iii) apparel, and

"(iv) other textile products;

"(3) The term "import sensitive category" means—

"(A) a category (other than a category applicable to textiles and textile products that are a product of a country in the Caribbean region) for which the ratio of imports to domestic production, as reported in the Department of Commerce publication "U.S. Production, Imports and Import/Production Ratios for Cotton, Wool and Man-Made Fiber Textiles and Apparel", equals or exceeds 40.0 for the preceding calendar year; and

"(B) a category covering wool products;

"(4) The term 'country' means a foreign country (other than Canada and the Member States of the European Economic Community as constituted on December 31, 1984), a foreign territory, an insular possession of the United States, or any other territory, possession, colony, trusteeship or political entity, whether affiliated with the United States or not, that is outside the customs territory of the United States;

"(5) The term 'major producing country' means a country the annual aggregate quantity of textiles and textile products of which that entered under the categories referred to in paragraph (2)(A) during calendar year 1984 equalled or exceeded 10 percent of all textiles and textile products under such categories that entered from all countries and from Canada and the Member States of the European Economic Community during calendar year 1984;

"(6) The term 'producing country' means a country (other than a major producing country and a country in the Carribean region) the annual aggregate quantity of textiles and textile products of which that entered under the categories referred to in paragraph (2)(A) during calendar year 1984 equalled or exceeded 1.25 per centum of all textiles and textile products under such categories that entered from all countries and from Canada and the Member States of the European Economic Community during calendar year 1984;

"(7) the term 'small producing country' means a country other than a major producing country and a producing country;

"(8) The term 'country in the Caribbean region' means Mexico and a country eligible for designation as a beneficiary country under section 212 of the Caribbean Basin Economic Recovery Act (19 U.S.C 2702);

"(9) The term 'wool product' means an article containing over 17 per centum by weight of wool;

"(10) The term 'cotton, wool and manmade fiber sweaters' means articles classified under categories 345, 445, 446, 645 or 646 as defined in the Department of Commerce publication "Correlation Textile and Apparel Categories with Tariff Schedules of the United States Annotated," dated January 1985;

"(11) The term 'entered' means entered, or withdrawn from warehouse, for consumption in the customs territory of the United States; and

"(12) The term 'Multi-Fiber Arrangement' means the Arrangement Regarding International Trade in Textiles, as extended by the Protocol done at Geneva, December 22, 1981.

"SEC. 1205. LIMITS ON TEXTILE AND APPAREL IMPORTS.

"(a) CALENDAR YEAR 1985.— Notwithstanding any other provision of law, the aggregate quantity of textiles and textile products classified under a category that is entered during calendar year 1985 shall not exceed—

"(1) in the case of textiles and textile products that are a product of a major producing country, other than textile luggage and textile handbags and textile flat goods subject (as of the date of enactment of this Title) to a specific limitation under an agreement with a major producing country, the lesser of an amount equal to 101 per centum—

"(A) of the aggregate quantity of such products of such country classified under such category that would have entered during calendar year 1984 if the aggregate quantity of such products of such country classified under such category entered during calendar year 1980 had increased by 6 per centum annually, or 1 per centum annually in the case of a category covering a wool product, during calendar years 1981, 1982, 1983, and 1984, or

"(B) If the United States has an agreement with such country providing for an annual growth rate for such category of less than 6 per centum, of the aggregate quantity of such products of such country classified under such category that entered during calendar year 1984;

"(2) in the case of textile luggage and textile handbags and textile flat goods subject (as of the date of enactment of this Title) to

specific limitation under an agreement with a major producing country, the specific limitation quantity in effect as of the date of enactment of this Title;

"(3) in the case of textiles and textile products that are a product of a producing country, an amount equal to the aggregate quantity of—

"(A) such products from such country classified under such category that entered during calendar year 1984, or

"(B) in the case of textile luggage and textile handbags and textile flat goods subject (as of the date of enactment of this Title) to specific limitation under an agreement with a producing country, the specific limitation quantity in effect as of the date of enactment of this Title;

"(4) in the case of textiles and textile products that are a product of a small producing country (other than cotton, wool, and man-made fiber sweaters described in paragraph (5)), an amount equal to the sum of—

"(A) the aggregate quantity of such products of such country classified under such category that entered during calendar year 1984, plus

"(B) an amount equal to—

"(i) 15 per centum of such quantity, in the case of a category that is not an import sensitive category, or

"(ii) 1 per centum of such quantity, in the case of a category that is an import sensitive category; and

"(5) in the case of cotton, wool and man-made fiber sweaters that are—

"(A) the product of substantial assembly operations in Guam from otherwise completed knit-to-shape component parts, an aggregate amount equal to 160,000 dozen; and

"(B) the product of substantial assembly operations in the Commonwealth of the Northern Mariana Islands from otherwise completed knit-to-shape component parts, an aggregate amount equal to 70,000 dozen.

"If application of paragraph (1) would result in the aggregate quantity of textiles and textile products of a major producing country classified under all categories permitted to enter during calendar year 1985 to be less than 70 per centum of the aggregate quantity of such products of such country that entered during calendar year 1984, then, notwithstanding paragraph (1), the aggregate quantity of textiles and textile products of such country that may be entered under each category during calendar year 1985 shall not be less than 40 per centum of the aggregate quantity of such products of such country that entered under such category during calendar year 1984.

"(b) GROWTH ADJUSTMENT.—For calendar years after 1985, the aggregate quantity of textiles and textile products classified under each category that may be entered during each such calendar year shall—

"(1) in the case of such products that are a product of a major producing country or of a producing country, be increased by an amount equal to 1 per centum of the aggregate quantity that could be entered under such category during the preceding calendar year; and

"(2) in the case of such products that are a product of a small producing country, be increased by an amount equal to—

"(A) in the case of a category (other than an import sensitive category), 6 per centum of the aggregate quantity that could be entered under that category during the preceding calendar year, and

"(B) in the case of an import sensitive category, 1 per centum of the aggregate quantity that could be entered under that category during the preceding calendar year.

"If the aggregate quantity that could be entered under a category for a calendar year after 1985 is reduced under section 1210(b), than in the first calendar year in which there is no such reduction, this subsection shall be applied as if there had been no reduction under section 1210(b) in previous calendar years.

"(c) MINIMUM QUANTITIES.—If, under subsection (a) or (b), the aggregate quantity of textiles and textile products of a country that may be entered during a calendar year under a category is—

"(1) less than one million square yard equivalents, in the case of a category covering yarn, fabric, made-ups, and miscellaneous products, other than wool products;

"(2) less than seven hundred thousand square yard equivalents, in the case of a category covering apparel, other than wool products apparel; or

"(3) less than one hundred thousand square yard equivalents, in the case of a category covering wool products,

"then, notwithstanding subsection (a) or (b), the aggregate quantity of textiles and textile products that may be entered from such country under such category during the calendar year shall be one million, seven hundred thousand, or one hundred thousand square yard equivalents, respectively. The amount prescribed in the preceding sentence shall be accorded growth subject to the provisions of subsection (b) beginning the first calendar year after the aggregate quantity of imports from such country under such category equals the minimum quantity prescribed under this subsection.

"(d) SPECIAL RULE.—For purposes of this section, if during any calendar year after 1984, the aggregate quantity of textiles and textile products that are the product of a small producing country, other than a country in the Caribbean region, and that are entered under the categories referred to in paragraph (2)(A) of section 1204 equals or exceeds 1.25 per centum of all textiles and textile products entered under such categories from all countries and from Canada and the Member States of the European Economic Community during such calendar year, then such small producing country shall be considered to be a producing country for all succeeding calendar years.

"(e) ENFORCEMENT.—The Secretary of Commerce shall prescribe such regulations governing the entry, or withdrawal from warehouse, for consumption of textiles and textile products as may be necessary to carry out this title.

"SEC. 1206. IMPORT LICENSING.

"In order to ensure the equitable and efficient administration of section 1205 of this title, the Secretary of Commerce shall, within six months after the date of enactment of this title, establish and administer an import licensing system under which an importer of any textiles and textile products from any country and from Canada and the Member States of the European Economic Community, will be required to present an import permit as a condition of entry. The Secretary shall charge a fee for import licenses in such amount as may be necessary to cover the cost of administration of the system. The Secretary of the Treasury shall make all determinations regarding classification under the Tariff Schedules of the United States, appraisement, and valuation of products subject to licensing under this section.

"SEC. 1207. ANNUAL REPORT.

"Not later than March 15, 1986, and March 15 each calendar year thereafter, the President shall submit to the Congress a report on the administration of this title during the preceding calendar year. Such report shall include detailed information about the implementation and operation of the limitations established under section 1205. All departments and agencies shall cooperate in preparation of this report, as requested by the President.

"SEC. 1208. REVIEW.

"The Secretary of Commerce shall commence ten years after the date of enactment of this title a formal review of the operation of the Textile Import Control Program under the provisions of this title. The Secretary shall consult members and committees of Congress, representatives of the labor unions and the industries affected by the program, and appropriate government agencies. Within six months after the commencement of the study, the Secretary shall submit to Congress his findings as well as his recommendations for the future conduct of the program.

"SEC. 1209. DUTY FREE ENTRY OF CERTAIN SWEATERS FROM GUAM AND THE NORTHERN MARIANAS.

"Subpart A of part 7, schedule 3 of the Tariff Schedules of the United States (19 U.S.C. 1202) is amended by adding at the end thereof the following new item:

"385.97	Cotton, wool and man-made fiber sweaters that are entitled to enter under the quotas established under section 205(a)(5) of the Textile and Apparel Trade Enforcement Act of 1985 or the increased quotas under section 205(b) of such Act that adjust the quotas under such section 205(a)(5) and that do not contain foreign materials to the value of more than 50 percent of their total value as this standard is applied pursuant to Headnote 3(a) of the General Headnotes and Rules of Interpretation.	Free

"SEC. 1210. EFFECTIVE DATE.

"(a) IN GENERAL.—Subject to the provisions of subsection (b), the provisions of this title shall apply to textiles and textile products entered, or withdrawn from warehouse, for consumption on or after the date of enactment of this Act.

"(b) CALENDAR YEARS 1985 AND 1986.—The Secretary of Commerce shall determine, and publish in the Federal Register, the aggregate quantity, if any, of textiles and textile products that may be entered under section 1205(a) or (c) of this title from each country under each category during the period beginning on the date of enactment of this title and ending December 31, 1985. Notwithstanding subsection (a), to the extent that the aggregate quantity of imports of textiles and textile products from a country under a category entered after December 31, 1984, and before the date of enactment of this title exceeds the quantity permitted entry for such country and such category during calendar year 1985 under subsection (a) or (c) of section 1205, then the limit that would otherwise apply under section 1205(b) or (c) for such category for such country for calendar year 1986 shall be reduced by the amount of such excess quantity. If such excess quantity exceeds the limit that would otherwise apply under section 1205(b) or (c) for such category for such country for calendar year 1986, then the limit for such category and country for calendar years after 1986 shall be reduced until such excess is accounted for.

"TITLE XIII—FOOTWEAR

"SEC. 1301. SHORT TITLE

"This title may be cited as the 'American Footwear Industry Recovery Act of 1985'.

"SEC. 1302. FINDINGS AND PURPOSE.

"(a) The Congress finds that—

"(1) The domestic nonrubber footwear industry is important to the national economy, and footwear firms are vital to the economic health of small towns throughout the United States.

"(2) The domestic nonrubber footwear industry is highly labor intensive, and low capital requirements for entry into footwear production make it a primary target for industrializing on newly industrialized countries. As a consequence, footwear is produced in virtually every footwear consuming country in the world.

"(3) Tremendous competitive pressure has been created in the world footwear market in the last decade as a result of rapidly growing production and capacity in numerous developing and developed countries. This development has resulted in the widespread erection of tariff and nontariff barriers by foreign countries designed to protect their domestic footwear industries.

"(4) The United States has historically resisted the protectionist trends of other producing nations and has instead maintained a market distinguished by its accessibility. As a result, the United States market has become a focal point for world trade in nonrubber footwear.

"(5) The diversion of international trade to the United States market has resulted in serious injury to domestic producers as manifested by—

"(A) the loss of 155,000 footwear jobs since 1968,

"(B) a decline in domestic production and production capacity, and

"(C) the permanent closure of over 500 plants during the same period.

"(6) The serious injury to domestic producers poses a significant danger to the industry's supplier base as well.

"(7) The domestic nonrubber footwear producers have made a significant commitment to the future of the industry through substantial capital investment.

"(8) Since the termination of temporary import relief in 1981, capital investment in the domestic nonrubber footwear industry has declined as the industry struggled to battle the massive surge in imports which increased the percentage share of imported footwear in the United States market from 51 percent in 1981 to 77 percent in 1985.

"(9) Without the restriction of import levels, capital investment in this domestic industry will continue to decrease.

"(10) The domestic nonrubber footwear industry has thrice been judged by the International Trade Commission, as recently as May 1985, to be seriously injured by imports.

"(11) Since the termination of the two, four-year orderly marketing agreements in 1981, the harm to the domestic industry is even more critical than the serious injury which triggered the Commission's unanimous findings in 1976 and 1977.

"(12) The domestic nonrubber footwear industry has not been afforded adequate and appropriate relief from imports; therefore, the Congress concludes that—

"(A) the administrative process under sections 201, 202, and 203 of the Trade Act of 1974 has proven inadequate; and

"(B) in the absence of and effective remedy under such process, legislative relief is essential.

"(b)(1) It is the purpose of Congress in enacting this section to—

"(A) promote and expend the economic health of the United States nonrubber footwear industry,

"(B) preserve the jobs of American workers, and

"(C) prevent the further decline of this important domestic industry.

"(2) It is declared to be the policy of Congress that access to the United States market for foreign-produced nonrubber footwear should be on an equitable basis to ensure orderly trade in nonrubber footwear, reduce unfair trade in nonrubber footwear, and address United States balance-of-payments problems, or which footwear is the seventh largest component. In order to accomplish these objectives, it is deemed necessary and appropriate to limit imports of nonrubber footwear into the United States market.

"SEC. 1303. DEFINITIONS.

"For purposes of this title—

"(1) The term 'entered' means entered, or withdrawn from warehouse, for consumption in the customs territory of the United States.

"(2) The term 'Secretary' means Secretary of Commerce.

"(3) The term 'nonrubber footwear' means the following categories of nonrubber footwear products, identified by reference to the following item numbers of the Tariff Schedules of the United States (as in effect on January 1, 1985): 700.05 through 700.45; 700.56; 700.72 through 700.83; and 700.95.

"(4) The term 'apparent domestic consumption' means, with respect to any 1-year period, the sum of imports plus domestic production less exports.

"SEC. 1304. QUANTITATIVE LIMITATION ON NONRUBBER FOOTWEAR.

"(a)(1) During the 8-year period beginning on the date of enactment of this title, the aggregate number of pairs of nonrubber footwear which may be entered during any 1-year period shall not exceed 60 percent of the estimated apparent domestic consumption of nonrubber footwear for such period.

"(2) The quantitative limitation imposed by paragraph (1) for any 1-year period shall be distributed among the following categories of nonrubber footwear so that the aggregate number of pairs of nonrubber footwear in such category which may be entered during any 1-year period shall not exceed the quantity equal to—

"(A) in the case of nonrubber footwear with a customs value that does not exceed $1.25 per pair, 10 percent of apparent domestic consumption of nonrubber footwear for such period,

"(B) in the case of nonrubber footwear with a customs value that exceeds $1.25 per pair but does not exceed $2.50 per pair, 5.4 percent of apparent domestic consumption of nonrubber footwear for such period, and

"(C) in the case of nonrubber footwear with a customs value that exceeds $2.50 per pair, 44.6 percent of apparent domestic consumption of nonrubber footwear for such period.

"(b) Within sixty days after the effective date of this title, and on the first day of the fourth quarter of each 1 year period thereafter, the Secretary shall determine on the basis of the best information available, including his own or independent forecasts, the expected apparent domestic consumption of nonrubber footwear for, in the case of the initial determination, the remainder of the current 1 year period and in the case of the first day of the fourth quarter of each 1 year period thereafter, the next succeeding 1 year period. On each such date, the Secretary shall determine and publish in the Federal Register the allocation for the next succeeeding 1 year period of permissible imports of nonrubber footwear as required by this section.

"(c) On the first days of the first, second, and third quarters of each 1 year period, the Secretary shall revise the determinations of expected apparent domestic consumption made under subsection (b) for the current 1 year period on the basis of the best information then available and shall make such adjustments in the quantity of nonrubber footwear permitted to be imported under this section as indicated by the revision. All revisions and adjustments made under this subsection shall be published in the Federal Register.

"(d) If the revised determination of expected apparent domestic consumption published in the Federal Register under subsection (c) on the first day of the third quarter in any 1 year period for nonrubber footwear varies from the actual apparent domestic consumption of nonrubber footwear for such 1 year period, the Secretary shall publish in the Federal Register on the first day of the second quarter of such succeeding 1 year period a revision to the determination of expected apparent domestic consumption for such 1 year period made under subsection (c) of this section. The revision shall be in the amount of such variance and shall be in addition to any other revision that would be made on any such first day of the second quarter under subsection (c) of this section.

"(e)(1) The Secretary and the Secretary of the Treasury shall take such actions within their respective jurisdictions as may be necessary or appropriate to enforce the provisions of this section, including without limitation, the issuance of orders to customs officers to bar entry to merchandise if the entry of such merchandise would cause the limitations established under this section to be exceeded.

"(2)(A) The Secretary and the Secretary of the Treasury are each authorized to issue such implementing regulations, including the issuance of import licenses, as may be necessary or appropriate to effect the purposes of this section and to enforce the provisions of this section.

"(B) Before prescribing any regulations under subparagraph (A), the Secretary or the Secretary of the Treasury, as the case may be, shall—

"(i) consult with interested domestic parties,

"(ii) afford an opportunity for such parties to comment on the proposed regulations, and

"(iii) consider all such comments before prescribing final regulations.

"SEC. 1305. COMPENSATION AUTHORITY.

"For purposes of section 123 of the Trade Act of 1974 (19 U.S.C. 2133), the imposition of the quantitative limitation under section 1304 shall be treated as action taken under section 203 of the Trade Act of 1974 (19 U.S.C. 2253).".

DANFORTH AMENDMENT NO. 877

Mr. DANFORTH proposed an amendment to amendment No. 875 proposed by Mr. HOLLINGS (and Mr. THURMOND), and subsequently amended, to the bill S.1730, supra; as follows:

At the end of the matter proposed to be inserted, add the following:

SEC. . (a) Notwithstanding any other provision of this Act, any limitation imposed by this Act on the quantity of any textiles, textile products, or nonrubber footwear that may be entered, or withdrawn from warehouse, for consumption in the customs territory of the United States—

(1) shall not apply with respect to textiles and textile products before August 1, 1986,

(2) shall not apply after the first date on which the President provides—

(A) import relief under section 203 of the Trade Act of 1974 (19 U.S.C. 2253) that is substantially equivalent to the import relief recommended by the United States International Trade Commission under section 201(d)(1)(A) of such Act in connection with an investigation conducted under section 201(b) of such Act (19 U.S.C. 2251) with respect to imports of textiles and textile products, and

(B) imports relief under section 203 of such Act that is substantially equivalent to the import relief recommended by the United States International Trade Commission under section 201(d)(1)(A) of such Act on June 12, 1985, in connection with the investigation conducted under section 201(b) of such Act with respect to nonrubber footwear, and

(3) shall not apply with respect to textiles and textile products after the date on which the United States International Trade Commission makes a negative injury determination under section 201(b) of such Act with respect to imports of textiles and textile products.

BYRD (AND OTHERS) AMENDMENT NO. 878

Mr. BYRD (for himself, Mr. DOLE, Mr. STEVENS, Mr. CHILES, and Mr. DOMENICI) proposed an amendment, which was subsequently modified and modified further, to the bill S. 1730, supra; as follows:

At the appropriate place add the following:

When the Senate is considering a reconciliation bill upon a point of order being made by any Senator, and sustained any part of the bill not in the jurisdiction of the reporting committee or extraneous to the instructions given that committee shall be deemed stricken from the bill and may not be offered as a floor amendment. This provision may be waived by three-fifths of the Senators duly chosen and sworn. No motion to waive germaneness or reconciliation bills shall be agreed to unless suported by three-fifths of the Senators duly chosen and sworn, which super-majority shall be required to successfully appeal the ruling of the Chair on these matters which include the points of order on extraneous matters and matter not properly reported by a committee.

STAFFORD (AND OTHERS) AMENDMENT NO. 879

(Ordered to lie on the table.)

Mr. STAFFORD (for himself, Mr. KENNEDY, Mr. HEINZ, Mr. GLENN, Mr. DANFORTH, Mr. LEAHY, Mr. D'AMATO, Mr. EAGLETON, Mr. BURDICK, Mr. COHEN, Mr. HATFIELD, Mr. MOYNIHAN, Mr. HART, Mr. ANDREWS, Mr. LAUTENBERG, and Mr. RIEGLE) submitted an amendment intended to be proposed by them to the bill S. 1730, supra; as follows:

On page 10, beginning on line 23, strike out the dash and all that follows through "(2)" on line 4 of page 11.

On page 11, beginning on line 6, strike out "a" and all that follows through "or" on line 10.

On page 11, line 11, strike out "such".

On page 11, beginning on line 11, strike out "In" and all that follows through "Act." on line 15.

COMPACT OF FREE ASSOCIATION

BOREN (AND OTHERS) AMENDMENT NO. 880

(Ordered to lie on the table.)

Mr. BOREN (for himself, Mr. GOLDWATER, Mr. HART, Mr. LEVIN, and Mrs. KASSEBAUM) submitted an amendment intended to be proposed by them to the joint resolution (S.J. Res. 77) to approve the "Compact of Free Association," and for other purposes; as follows:

On page 96, line 7, strike "Senate." and insert in lieu thereof the following: Senate.

SEC. 8. (a) Section 315(a)(1)(A) of the Federal Election Campaign Act of 1971 is amended by striking out "$1,000" and inserting in lieu thereof "$1,500".

(b) Section 315(a)(2) of the Federal Election Campaign Act of 1971 is amended—

(1) by striking out "or" at the end of subparagraph (B);

(2) by striking out "$5,000." in subparagraph (C) and inserting in lieu thereof "$3,000;"; and

(3) by adding at the end the following new subparagraphs:

"(D) to any candidate and his authorized political committees with respect to—

"(i) a general or special election for the office of Representative in, or Delegate to Resident Commissioner to, the Congress (including any primary election, convention, or caucus relating to such general or special election) which exceed $100,000 ($125,000 if at least two candidates qualify for the ballot in the general or special election involved and at least two candidates qualify for the ballot in a primary election relating to such general or special election) when added to the total of contributions previously made by multicandidate political committees to such candidate and his authorized political committees with respect to such general or special election; or

"(ii) a runoff election for the office of Representative in, or Delegate or Resident Commissioner to, the Congress which exceed $25,000 when added to the total of contributions previously made by multicandidate political committees to such candidate and his authorized political committees with respect to such runoff election; or

"(E) to any candidate and his authorized political committees with respect to—

"(i) a general or special election for the office of Senator (including any primary election, convention, or caucus relating to such general or special election) which exceed the greater of $175,000 ($200,000 if at least two candidates qualify for the ballot in the general or special election involved and at least two candidates qualify for the ballot in a primary election relating to such general or special election) or the amount equal to $35,000 times the number of Representatives to which the State involved is entitled, when added to the total of contributions previously made by multicandidate political committees to such candidate and his authorized political committees with respect to such general or special election;

"(ii) a runoff election for the office of Senator which exceed the greater of $25,000 or the amount equal to $12,500 times the number of Representatives to which the State involved is entitled, when added to the total of contributions previously made by multicandidate political committees to such candidate and his authorized political committees with respect to such runoff election; or

"(iii) a general or special election for the office of Senator (including any primary election, runoff election, convention, or caucus relating to such general or special election) which exceed $750,000 when added to the total of contributions previously made by multicandidate political committees to such candidate and his authorized political committees with respect to such general or special election.".

(c) Section 315(a)(8) of the Federal Election Campaign Act of 1971 is amended—

(1) by striking out "person" the second place it appears and inserting in lieu thereof "person and intermediary or conduit".

(d) Section 315(a)(8) of the Federal Election Campaign Act of 1971 is amended—

"(1) by adding at the end of the paragraph the following subparagraph:

"(A) Notwithstanding any other provision of this Act, each multicandidate political committee which makes an independent expenditure in a Federal election in connection with such candidate's campaign, shall not do so in any newspaper, magazine, broadcast or other media advertisement without the following notice placed on, or within such advertisement:

"This message has been authorized and paid for by (name of committee), (name/title of treasurer and/or president). Its presentation is not subject to any campaign law contribution limits."

(e) Section 315 of the Communications Act of 1934 (47 U.S.C. 315) is amended—

(1) by redesignating subsections (b), (c), and (d) as subsections (c), (d), and (e), respectively; and

(2) by inserting immediately after subsection (a) the following:

"(b)(1) if any licensee permits a person to utilize a broadcasting station to broadcast material which either endorses a legally qualified candidate for any Federal elective office or opposes a legally qualified candidate for that office, such licensee shall, within a reasonable period of time, provide to any legally qualified candidate opposing the candidate endorsed (or to the authorized committee of such legally qualified candidate), or to any legally qualified candidate who was so opposed (or to an authorized committee of such legally qualified candidate), the opportunity to utilize, without charge, the same amount of time on such broadcasting station, during the same period of the day, as was utilized by such person.

"(2) For purposes of this subsection, the term 'person' includes an individual, partnership, committee, association, corporation, or any other organization or group of persons, but such term does not include a legally qualified candidate for any Federal elective office or an authorized committee of any such candidate.".

(f) Section 315(a) of the Communications Act of 1934 (47 U.S.C. 315(a)) is amended by striking "section" and inserting in lieu thereof "subsection".

(g) Section 315(e) of the Communications Act of 1934, as so redesignated by subsection (a) of this section, is amended to read as follows:

"(e) For purposes of this section—

"(1) the term 'authorized committee' means, with respect to any candidate for nomination for election, or election, to any Federal elective office, any committee, club, association, or other group of persons which receives contributions or makes expenditures during a calendar year in an aggregate amount exceeding $1,000 and which is authorized by such candidate to accept contributions or make expenditures on behalf of such candidate to further the nomination or election of such candidate;

"(2) the term 'broadcasting station' includes a community antenna television system; and

"(3) the term 'licensee' and 'station licensee' when used with respect to a community antenna system mean the operator of such system.".

(h) Section 301(17) of the Federal Election Campaign of 1971 is amended to read as follows:

"(17) The term 'independent expenditure' means an expenditure by a person expressly advocating the election or defeat of a clearly identified candidate which is made without cooperation or consultation with any candidate, or any authorized committee or agent of such candidate, and which is not made in concert with, or at the request or suggestion of, any candidate, or any authorized committee or agent of such candidate.

"(A) For the purposes of this subsection, 'made without cooperation or consultation with any candidate' means—

"(i) the person making the independent expenditure did not communicate with, advise, or counsel the candidate at any time on the candidate's plans, projects, or needs relating to the candidate's pursuit of nomination for election, or election, to Federal office, including any device relating to the candidate decision to seek Federal office;

"(ii) the person making the independent expenditure does not include as one of its officers, directors, or other employees an individual who communicated with, advised or counseled the candidate at any time on the candidate's plans, projects, or needs relating to the candidate's pursuit of nomination for election, or election to Federal office, including any advice relating to the candidate's decision to seek Federal office; and

"(iii) the person making the independent expenditure does not retain the professional services of any individual or other person also providing, or who in the same election cycle provided, those services to the candidate in connection with the candidate's pursuit of nomination for election, or election, to Federal office, including any services relating to the candidates decision to seek Federal office."

(i) If any provision of this Act or the application of it to any person or circumstance is held invalid, the remainder of the Act and the application of the provision to any other person or circumstance shall not be affected by such invalidation.

(j) The amendments made by such sections (a) through (i) of this section shall apply with respect to general, special, and runoff election occurring after December 31, 1986.

FAIR LABOR STANDARDS ACT AMENDMENTS

NICKLES (AND OTHERS) AMENDMENT NO. 881

Mr. NICKLES (for himself, Mr. METZENBAUM, Mr. BENTSEN, Mr. CHAFEE, and Mr. LAUTENBERG) proposed an amendment to the bill (S. 1570) to amend the Fair Labor Standards Act of 1938 to exclude the employees of States and political subdivisions of States from the provisions of that act relating to maximum hours, to clarify the application of that act to volunteers, and for others purposes; as follows:

In lieu of the matter proposed to be inserted, insert the following:

SHORT TITLE; REFERENCE TO ACT

SECTION 1. (a) SHORT TITLE.—This Act may be cited as the "Fair Labor Standards Amendments of 1985".

(b) REFERENCE TO ACT.—Whenever in this Act an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section of other provision, the reference shall be considered to be a reference to a section or other provision of the Fair Labor Standards Act of 1938.

COMPENSATORY TIME

SEC. 2. (a) COMPENSATORY TIME.—Section 7 (29 U.S.C. 207) is amended by adding at the end the following:

"(o)(1) Employees of a public agency which is a State, a political subdivision of a State, or an interstate governmental agency may receive, in accordance with this subsection and in lieu of overtime compensation, compensatory time off at a rate not less than one and one-half hours for each hour of employment for which overtime compensation is required by this section.

"(2) A public agency may provide compensatory time under paragraph (1) only—

"(A) pursuant to—

"(i) applicable provisions of a collective bargaining agreement, memorandum of understanding, or any other agreement between the public agency and representative of such employees; or

"(ii) in the case of employees not covered by subclause (i), an agreement or understanding arrived at between the employer and employee before the performance of the work; and

"(B) if the employee has not accrued compensatory time in excess of the limit applicable to the employee prescribed by paragraph (3).

In the case of employees described in clause (A)(ii) hired prior to April 15, 1986, the regular practice in effect on April 15, 1986, with respect to compensatory time off for such employees in lieu of the receipt of overtime compensation, shall constitute an agreement or understanding under such clause (A)(ii). Except as provided in the previous sentence, the provision of compensatory time off to such employees for hours worked after April 14, 1986, shall be in accordance with this subsection.

"(3)(A) No overtime compensation in the form of compensatory time off may be accrued by any employee of a public agency which is a State, a political subdivision of a State, or an interstate governmental agency, in excess of 480 hours for hours worked after April 15, 1986. Any such employee who after April 15, 1986, has accrued 480 hours of compensatory time off shall, for additional overtime hours of work, be paid overtime compensation.

"(B) If compensation is paid to an employee for accrued compensatory time off, such compensation shall be paid at the regular rate of compensation earned by the employee at the time the employee receives such payment.

"(4) An employee who has accrued compensatory time off authorized to be provided under paragraph (1) shall, upon termination of employment, be paid for the unused compensatory time at the regular rate of compensation earned by the employee at the time the employee receives compensation for overtime.

"(5) An employee of a public agency which is a State, political subdivision of a State, or an interstate governmental agency—

"(A) who has accrued compensatory time off authorized to be provided under paragraph (1), and

"(B) who has requested the use of such compensatory time,

shall be permitted by the employee's employer to use such time within a reasonable period after making the request if the use of the compensatory time does not unduly disrupt the operations of the public agency.

"(6) For purposes of this subsection—

"(A) the term 'overtime compensation' means the compensation required by subsection (a), and

"(B) the term 'compensatory time or compensatory time off' means hours during which an employee is not working and which are not counted as hours worked during the applicable workweek or other work period for purposes of overtime compensation and for which the employee is compensated at the employee's regular rate.".

(b) EXISTING COLLECTIVE BARGAINING AGREEMENTS.—A collective bargaining agreement which is in effect on April 15, 1986, and which permits compensatory time off in lieu of overtime compensation shall remain in effect until its expiration date unless otherwise modified, except that compensatory time shall be provided after April 14, 1986, in accordance with section 7(o) of the Fair Labor Standards Act of 1938 (as added by subsection (a)).

(c) LIABILITY AND DEFERRED PAYMENT.—(1) No State, political subdivision of a State, or interstate governmental agency shall be liable under section 16 of the Fair Labor Standards Act of 1938 for a violation of section 7 or 11(c) (as it relates to section 7) of such Act occurring before April 15, 1986, with respect to any employee of the State, political subdivision, or agency who would not have been covered by such Act under the Secretary of Labor's special enforcement policy on January 1, 1985, and published in sections 775.2 and 775.4 of title 29 of the Code of Federal Regulations.

(2) A State, political subdivision of a State, or interstate governmental agency may defer until August 1, 1986, the payment of overtime compensation under section 7 of the Fair Labor Standards Act of 1938 for hours worked after April 14, 1986.

SPECIAL DETAILS, OCCASIONAL OR SPORADIC EMPLOYMENT, AND SUBSTITUTION

SEC. 3. (a) SPECIAL DETAIL WORK FOR FIRE PROTECTION AND LAW ENFORCEMENT EMPLOYEES.—Section 7 (29 U.S.C. 207) is amended by adding after subsection (o) (added by section 2) the following:

"(p)(1) If an individual who is employed by a State, political subdivision of a State, or an interstate governmental agency in fire protection or law enforcement activities (including activities of security personnel in correctional institutions) and who, solely at such individual's option, agrees to be employed on a special detail by a separate or independent employer in fire protection, law enforcement, or related activities, the hours such individual was employed by such separate and independent employer may be excluded by the public agency employing such individual in the calculation of the hours for which the employee is entitled to overtime compensation under this section if the public agency—

"(A) requires that its employees engaged in fire protection, law enforcement, or security activities be hired by a separate and independent employer to perform the special detail,

"(B) facilitates the employment of such employees by a separate and independent employer, or

"(C) otherwise affects the condition of employment of such employees by a separate and independent employer.".

(b) OCCASIONAL OR SPORADIC EMPLOYMENT.—Section 7(p) (29 U.S.C. 207), as added by subsection (a), is amended by adding at the end the following:

"(2) If an employee of a public agency which is a State, political subdivision of a State, or an interstate governmental agency undertakes, on an occasional or sporadic basis and solely at the employee's option, part-time employment for the public agency which is in a different capacity from any capacity in which the employee is regularly employed, the hours such employee was employed in performing the different employment may be excluded by the public agency in the calculation of the hours for which the employee is entitled to overtime compensation under this section.".

(c) SUBSTITUTION.—(1) Section 7(p) (29 U.S.C. 207), as amended by subsection (b), is amended by adding at the end the following:

"(3) If an individual who is employed by a public agency which is a State, political subdivision of a State, or an interstate governmental agency,

agrees, with the approval of the public agency and solely at the option of such individual, to substitute during scheduled work hours for another individual who is employed by such agency in the same activities, the hours such employee worked as a substitute may be excluded by the public agency in the calculation of the hours for which the employee is entitled to overtime compensation under this section.".

(2) Section 11(c) (29 U.S.C. 211(c)) is amended by adding at the end the following: "The employer of an employee who performs substitute work described in section 7 (p)(4) may not be required under this subsection to keep a record of the hours of the substitute work.".

VOLUNTEERS

SEC. 4. (a) DEFINITION.—Section 3(e) (29 U.S.C. 203(e)) is amended—

(1) by striking out "paragraphs (2) and (3)" in paragraph (1) and inserting in lieu thereof "paragraphs (2), (3), and (4)", and

(2) by adding at the end the following:

"(4)(A) The term 'employee' does not include any individual who is a volunteer for a public agency which is a State, a political subdivision of a State, or an interstate governmental agency, if (i) the individual receives no compensation or is paid expenses, reasonable benefits, or a nominal fee to perform the services for which the individual volunteered and (ii) such services are not the same type of services which the individual is employed to perform for such public agency.

"(B) An employee of a public agency which is a State, political subdivision of a State, or an interstate governmental agency may volunteer to perform services for any other State, political subdivision, or interstate governmental agency, including a State, political subdivision or agency with which the employing State, political subdivision, or agency has a mutual aid agreement.".

(b) REGULATIONS.—Not later than March 15, 1986, the Secretary of Labor shall issue regulations to carry out paragraph (4) of section 3(e) (as added by subsection (a) of this section).

(c) CURRENT PRACTICE.—If before April 15, 1986, the practice of a public agency was to treat certain individuals as volunteers, such individuals shall until April 15, 1986, be considered, for purposes of the Fair Labor Standards Act of 1938, as volunteers and not as employees. No public agency which is a State, a political subdivision of a State, or an interstate governmental agency shall be liable for a violation of section 6 occurring before April 15, 1986, with respect to services deemed by that agency to have been performed for it by an individual on a voluntary basis.

STATE AND LOCAL LEGISLATIVE EMPLOYEES

SEC. 5. Clause (ii) of section 3(e)(2)(C) (29 U.S.C. 203(e)(2)(C)) is amended—

(1) by striking out "or" at the end of subclause (III),

(2) by striking out "who" in subclause (IV),

(3) by striking out the period at the end of subclause (IV) and inserting in lieu thereof ", or", and

(4) by adding after subclause (IV) the following:

"(V) is an employee in the legislative branch or legislative body of that State, political subdivision, or agency and is not employed by the legislative library of such State, political subdivision, or agency.".

EFFECTIVE DATE

SEC. 6. The amendments made by this Act shall take effect April 15, 1986. The Secretary of Labor shall before such date promulgate such regulations as may be required to implement such amendments.

EFFECT OF AMENDMENTS

SEC. 7. The amendments made by this Act shall not affect whether a public agency which is a State, political subdivision of a State, or an interstate governmental agency is liable under section 16 of the Fair Labor Standards Act of 1938 for a violation of section 6, 7, or 11 of such Act occurring before April 15, 1986, with respect to any employee of such public agency who would have been covered by such Act under the Secretary of Labor's special enforcement policy on January 1, 1985, and published in section 775.3 of title 29 of the Code of Federal Regulations.

DISCRIMINATION

SEC. 8. An employee of a public agency who asserts coverage under the Fair Labor Standards Act of 1938 between February 19, 1985, and April 14, 1986, shall be accorded the same protection against discharge or discrimination as is available under section 15(a)(3) of the Fair Labor Standards Act of 1938.

COMMERCE, JUSTICE, STATE, THE JUDICIARY, AND RELATED AGENCIES APPROPRIATION, 1986

DIXON AMENDMENT NO. 882

Mr. DIXON proposed an amendment to the bill H.R. 2965, supra; as follows:

SEC. . (a) The Congress finds that:

(1) there are more than 200 Soviet nationals employed at U.S. diplomatic posts in the Soviet Union;

(2) State Department officials have confirmed that most, if not all, of the Soviets report to the KGB in one way or another;

(3) retaining Soviets to work in our mission is an invitation to easy espionage;

(4) the reports of radically increased Soviet use of the chemical compound NPPD, a known cancer causing agent, which is used to attack Americans are alarming;

(5) NPPD may jeopardize the health and well-being of our diplomatic personnel and their families in the Soviet Union;

(6) the United States must strive continually to safeguard our foreign service officers and their dependents;

(7) Soviet citizens employed at our diplomatic posts in the Soviet Union pose greater risks to our national security than American citizens would; and

(8) reliable reports assert that Secretary of State Shultz endorses a plan to replace Soviets with Americans.

(b) it is the sense of the Congress that:

(1) the State Department should take steps to improve security and protect American lives at our Soviet missions by replacing the maximum number of Soviet citizens possible with Americans, at the earliest available opportunity; and

(2) the employment of a reduced number of Soviet nationals should be continued only if:

(A) such Soviet nationals do not pose a significant threat to the security of the United States;

(B) the employment of such Soviet nationals is necessary to provide usual and customary services to United States nationals, and the employment of a United States national as a replacement for such Soviet national would reduce to a significant extent the efficiency of operations at a United States diplomatic mission or consular post; or

(C) such Soviet nationals are employed in an occupation which precludes entry into the facilities of a United States diplomatic mission or consular post in the Soviet Union.

McCLURE AMENDMENT NO. 883

Mr. McCLURE proposed an amendment to the bill H.R. 2965, supra; as follows:

Add at the end of the bill the following new section:

"SEC. . (a) Since the Communist government of the Union of Soviet Socialist Republics since it seized power in Russia on November 7, 1917, has never submitted its rule to the consent of the governed through free elections; has designated the anniversary of this seizure "Revolution Day" as a national holiday; has held power since November 7, 1917 only through unrestrained secret police terror, and an extensive network of

forced labor Gulag camps; denies its subject Peoples the most basic human rights of free speech, free religion, free press, free assembly, free personal movement, and personal property; this Soviet repression has cost the Peoples of the Soviet Union tens of millions of deaths and has resulted in great damage to the culture, religion, and material well being of these Peoples; this repression violates the Universal Declaration of Human Rights and the 1975 Helsinki Final Act; the Soviet Union is actively seeking to subject other countries to the Communist system and is currently waging a genocidal war to subjugate the people of Afghanistan, making use of the most inhumane weapons of scientific barbarism against defenseless civilians, including the use of toxin weapons the possession of which is outlawed by international conventions to which the USSR is a signatory.

(b) Since: inexplicably, the annual "Revolution Day" message from the United States State Department of behalf of the American People congratulates the Communist Government of the USSR on its violent and undemocratic seizure of power on the anniversary of November 7, 1917; the annual message also congratulates the people of the Soviet Union on their rulers' seizure of power; such U.S. congratulations are displayed before the Soviet Peoples as a demonstration of the legitimacy of the Bolshevik Government in the eyes of the Democratic government of the United States of America and are perceived as the cruelest mockery of these Peoples.

"(c) None of the funds appropriated by this Act shall be used in any fashion or manner whatsoever to continue the practice of the Department of State of congratulating or in any way referring to such an anniversary as a holiday or cause for celebration, the Soviet Union, the Communist Party of the Soviet Union, or the People of the Soviet Union on the anniversary of the Communist Revolution of 1917; *Provided further,* That the amounts appropriated by this Act for the Department of State shall be reduced by 10 percent on November 4, 1985 unless the Secretary of State shall have submitted before the date of enactment of this Act a report describing his plan for proclaiming the sympathy of the American People for the bondage of the enslaved Peoples of the Soviet Empire and the hope that they will soon recover their freedom and national integrity."

HELMS (AND ARMSTRONG) AMENDMENT NO. 884

Mr. HELMS (for himself and Mr. ARMSTRONG) proposed an amendment to the bill H.R. 2965, supra; as follows:

On page 24, between lines 21 and 22, insert the following:

"SEC. . None of the funds appropriated under this Act shall be used to pay for abortions for which Federal funds are not available under the Medicaid program (title XIX of the Social Security Act).".

SYMMS AMENDMENT NO. 885

(Ordered to lie on the table.)

Mr. SYMMS submitted an amendment intended to be proposed by him to the bill H.R. 2965, supra; as follows:

At the end thereof add the following new section:

The Senate finds that: The following events document Romania's attitude towards religious freedoms:

(1) Father Geza Palfi, a Romanian Roman Catholic priest was arrested on December 26, 1983, because he mentioned in a Christmas day sermon that Christmas Day should be a national holiday, instead of a working day. At the time of his arrest he was savagely beaten by the Romanian secret police, SECURITATEI, outside his church in Tirgu Mures, Romania. Father Palfi died three months later of internal injuries sustained during the fatal beating.

(2) Geheoghe Caliu was imprisoned for 22 years for his activities in the Romanian Orthodox Church, and after serving five years of his last ten year sentence, he was released to serve the remainder of the sentence under House arrest in Bucharest. House arrest has been harsher punishment than the previous 22 years of imprisonment, owing to its high visibility and the government's desire to make Caliu's case an example to what happens to Christians in Romania.

(3) Doral Catarama, a minister for the Seventh-Day Adventist Church, was sentenced to ten years in prison for "embezzlement" by government officials. This was done in face of the fact that Dorel Catarama's State employers signed an affidavit stating he was a model employee, always "honest and disciplined." Christian Response International and Amnesty International have investigated the charges and found them to be unfounded.

(4) Under pressure from Western governments Romania gave permission to the World Reformed Alliance to send 20,000 Bibles to the Hungarian Reformed Church in Romania. The Romanian ambassador in talks with western officials, United States Senators and Congressmen has continually pointed to his country's acceptance of the Bibles as an illustration of his country's attitude towards religious freedoms. This example would be used frequently when discussing Romania's "most favored nation" trading status with the United States. The Bibles, upon arrival to Romania, immediately disappeared. It soon became apparent what had happened to the Bibles. In areas where toilet paper was extremely scarce, letters and certain words of the confiscated Bibles appeared on the toilet paper. The Romanian government had ground up the Bibles to make toilet paper.

(5) The Romanian government has bulldozed many Christian Churches in Romania. Among these:

(i) The Pentecostal Church of Cinpia Turzii, Romania, on May 7, 1982 was bulldozed and destroyed by government officials.

(ii) The Second Baptist Church of Romania had its building destroyed May 6, 1985, in an attempt to suppress religious freedoms.

(iii) The Baptist Church of Bistrita was bulldozed on November 3, 1984.

(iv) The largest Baptist Church in Europe, the Ordea Baptist Church of Ordea, Romania, which has a congregation of 2,000 members, is soon to be demolished by Romanian officials.

(6) Five leading Romanian Baptist Pastors of Bucharest, Joseph Sarac, Vasile Talos, Vasile Brinzei, Pascu Geabau, and Buni Cocar, have all been falsely accused of "embezzlement" because congregational funds totaling $57,285 were spent with full knowledge and consent of the various congregations involved, but without approval of the Ministry of Cults.

(7) Klaus Wagner of Sighisoara, Romania, a member of the Brethren Church, and Maria and Fibia Delepeta of Carpinis, Romania, members of the Army of the Lord/Romanian Orthodox Church were arrested October 1, 1981, and tried in Romanian courts. They were sentenced to six years, five years, and five years imprisonment respectively, for their illegal religious activities.

(8) Silviu Ciotata and Costel Georgescu of Ploestic, Romania, were arrested on December 11, 1981, for distributing Bibles. Their fate remains unknown.

(9) John Teodosiu of Cluj, Romania, was arrested and charged on December 16, 1981 for espionage, because of his activities compiling information for various human rights organizations relating to the arrests and persecution of religious believers in the Socialist Republic of Romania. John Teodosiu has been held incommunicado by the Romanian secret police; his situation today remains unknown.

(10) Relatives of Christian believers are being compelled to sign statements which would subject their loved ones—solely because of their religious beliefs—to treatment and detention in psychiatric institutions.

(11) Many Christians in Romania today are subjected to daily interrogations; beatings, torture, and electric shock treatment.

(12) These reprehensible, revolting, and blatantly evil practices occur in spite of the fact that in August of 1975 the Romanian government signed the Final Act of the Helsinki Accords, which stated Romania would "Recognize and respect the freedom of the individual to profess and practice, alone or in community with others, religion or belief acting in accordance with the dictates of his own conscience." The International Covenant of Civil and Political Rights which Romania ratified in 1974 is equally violated by these repulsive actions.

(13) In accordance with Section 402 of the 1974 Trade Act, Romania's emigration and human rights record is required to be studied annually by the administration, as well as both houses of Congress to determine whether that country is eligible to receive Most Favored Nation trading status.

Therefore it is the sense of the Senate that:

(1) The United States should play an active role in restoring Human Rights and religious freedoms to the Romanian people—in accordance with the Helsinki Accords and the International Covenant of Civil and Political Rights and the principles of religious freedom on which this country was founded.

(2) These acts of religious oppression and persecution taken by the government of the Socialist Republic of Romania are barbaric and repugnant to the community of civilized nations, and in violation of the intrinsic rights of all men.

(3) These actions are particularly objectionable because they are in blatant violation of the Helsinki Accords and the International Covenant of Civil and Political Rights. Romania's outright contempt for international agreements should be taken into consideration during the future bilateral agreements between this country and the Socialist Republic of Romania.

(4) The Senate should promptly consider and, in the absence of major mitigating circumstances arising subsequent to the consideration of this measure, should adopt a resolution of disapproval concerning the renewal of Most Favored Nation Status for the Socialist Republic of Romania.

NOTICES OF HEARINGS

COMMITTEE ON RULES AND ADMINISTRATION

Mr. MATHIAS. Mr. President, I wish to announce that the Committee on Rules and Administration will meet on Tuesday, October 29, 1985, at 9:30 a.m., in SR-301, Russell Senate Office Building, to deal with legislative and administrative business currently pending on its agenda.

The committee will be marking up the following three measures which concern Smithsonian Institution activities: S. 581, to authorize construction of facilities for the Whipple Observatory in Arizona and to authorize repair and replacement of facilities at the Tropical Research Institute in Panama; S. 582, to reauthorize the National Museum Act; and S. 583, to authorize appropriations for construction of additional facilities for the Cooper-Hewitt Museum in New York. Hearings were held by the committee on these bills on July 24, 1985.

Senate Resolutions 28, 29, and 81, each of which provides for television and radio coverage of Senate proceedings will also be under consideration by the committee. Hearings were held by the committee on the subject of broadcast coverage of Senate floor proceedings on September 17 and 18, 1985.

On its administrative agenda the committee will be considering a number of proposed amendments to the Senate mass mail regulation; chief among them is an amendment which would provide for printing the pictures of missing children on certain Senate mail.

For further information regarding this business meeting, please contact Carole Blessington of the Rules Committee staff on 224-0278.

AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON COMMERCE, SCIENCE, AND TRANSPORTATION

Mr. DOMENICI. Mr. President, I ask unanimous consent that the Committee on Commerce, Science, and Transportation be authorized to meet during the session of the Senate on Thursday, October 24, to conduct a meeting on the nomination of Carol G. Dawson to be Commissioner of the Consumer Product Safety Commission.

The PRESIDING OFFICER. Without objection, it is so ordered.

SELECT COMMITTEE ON INTELLIGENCE

Mr. DOMENICI. Mr. President, I ask unanimous consent that the Select Committee on Intelligence be authorized to meet during the session of the Senate on Thursday, October 24, 1985, in closed executive session in order to receive a briefing on intelligence matters.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON TOXIC SUBSTANCES AND ENVIRONMENTAL OVERSIGHT

Mr. DOMENICI. Mr. President, I ask unanimous consent that the Subcommittee on Toxic Substances and Environmental Oversight, of the Committee on Environmental and Public Works, be authorized to meet during the session of the Senate on Thursday, October 24, in order to conduct a hearing on ground water protection.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON SEAPOWER AND FORCE PROJECTION

Mr. DOMENICI. Mr. President, I ask unanimous consent that the Subcommittee on Seapower and Force Projection of the Committee on Armed Services, be authorized to meet during the session of the Senate on Thursday, October 24, 1985, in order to conduct a hearing on S. 535, National Ship Building Industrial Base Act of 1985

The PRESIDING OFFICER. Without objection, it is so ordered.

PERMANENT SUBCOMMITTEE ON INVESTIGATIONS

Mr. DOMENICI. Mr. President, I ask unanimous consent that the permanent Subcommittee on Investigations, of the Committee on Governmental Affairs, be authorized to meet during the session of the Senate on Thursday, October 24, 1985, in order to conduct a hearing on the role of the feature film industry in deglamourizing drug use.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

AN OPEN LETTER TO THE PRESIDENT OF THE UNITED STATES

● Mr. HART. Each year, in the opening session of the United Nations, the world's leaders come to New York to discuss their visions of the future and their hopes for peace. Tomorrow, it will be President Reagan's turn.

Our President has addressed the United Nations before, but this year the stakes could not be higher. In a matter of weeks President Reagan will be meeting with the Soviet leader at Geneva—his first summit with the Soviets since he took office. On the issue of arms control alone, where so much divides us, this meeting will be of crucial importance. The President's address provides an excellent opportunity for him to spell out an agenda for Geneva, a framework for United States-Soviet relations, and a program for peace.

It is my earnest hope that the President will use this occasion to lay the groundwork for a successful summit. I have prepared a letter to Mr. Reagan which expresses this hope and recommends some steps he should consider. I ask that this letter be printed in the RECORD.

The letter follows:

AN OPEN LETTER TO THE PRESIDENT

DEAR PRESIDENT REAGAN: The support of all Americans goes with you in your first meeting with Soviet Chairman Gorbachev. Our people are united in hoping the summit will help change relations with the Soviet Union and prove a turning point in our quest for peace.

The debate over the potential outcome of the upcoming summit, however, seems to have obscured what you have repeatedly pledged in the critical goal of your Administration: to recast U.S.-Soviet relations to create a lasting peace. The divisive debate among your own advisers only heightens the perception that, with less than four weeks to go, you have not exerted your leadership to set clear and bold objectives for the summit.

Mr. President, please resist the counsel of those in your Administration who might want simply another forum for ideological confrontation. You have before you an historic opportunity to fundamentally reshape U.S.-Soviet relations for the next century. I urge you to ignore the voices—including those within your own Administration—that would guide you toward a narrower agenda.

History offers a precedent: President Nixon's 1972 summit with Mr. Brezhnev. Mr. Nixon used that occasion to draw a comprehensive new paradigm for U.S.-Soviet relations—"detente." At that meeting, President Nixon signed the Agreement on the Prevention of War, the Threshold Test Ban Treaty, and a protocol on the Anti-Ballistic Missile Treaty. He also paved the way for President Ford's signing of the Vladivostok Accords in 1974.

Mr. Nixon's blueprint was not flawless. What is important is that he had a blueprint to offer. It was a blueprint that sketched a plan for the entirety of U.S.-Soviet relations: arms control, European security, trade, human rights, cultural exchange, and engagement in the Third World. The American people expect no less today.

Mr. President, your electoral landslide and personal popularity give you an almost unprecedented opportunity to create a new framework for U.S.-Soviet relations. You have the power to implement a new vision—but only if you make clear to the American people, and the Soviets, what that vision is.

Some in your Administration indicate you are prepared to engage Mr. Gorbachev in serious discussions over the full range of issues that are heightening tensions between our two nations. But your recent statements suggest you have a different agenda: insistence on testing, development, and eventual deployment of your Strategic Defense Initiative—regardless of the impact this single-minded pursuit would have on the overall balance of issues which threaten our security.

Mr. President, we stand on the threshold of a transformed strategic environment. The Soviets have a dynamic new leader, intent on consolidating and expanding his power within and beyond his nation's borders. The SALT II Treaty expires this year. The ABM Treaty is headed for erosion or outright abrogation in the absence of a plan to guide future compliance by both sides.

If you insist simply on defending SDI, our prospects for advancing our interests in this new environment appear grim indeed. Progress in reducing offensive armanents,

an objective you continually espouse, will be held hostage to the two sides' continued insistence on "force modernization." And US-Soviet relations, in a state of steady decline for five years, will continue on a course of dangerous instability. We need a new, clearer blueprint for out survival in the new and dangerous environment with the Soviet Union.

Mr. President, detente proved our antagonisms with the Soviets cannot be transcended with overly optimistic formulas. We cannot wish away the Soviets' internal repression, their military adventurism, or their growing arsenals. Our fundamental differences must be managed, not papered over: and it is a President's obligation to tell us how they should be managed.

In the current environment, it is obviously not realistic to expect that major new agreements will be signed at the upcoming summit or soon thereafter. There is too much mutual suspicion and too much damage to repair. But your announcement of a broad, bold strategy could recapture the initiative from the Soviets.

There is no shortage of realistic goals—compatible with your own philosophy—which you could build into such an agenda: reductions in both sides' offensive nuclear arsenals—not some time in the next century pending the results of SDI experiments—but by the next decade; concrete agreements for the continuation of research on strategic defenses in ways that do not undermine the ABM Treaty; joint efforts to make breakthroughs in verification technology so we can negotiate, ratify, and enforce broader arms control agreements; cooperative measures to stem nuclear proliferation and terrorism; arrangements to avoid inadvertent nuclear conflict in crisis; an agreement to renew progress toward a Comprehensive Test Ban Treaty.

Even this list is just a beginning. East-West trade, human rights, emigration, Third World "hot spots"—all these should be part of a comprehensive strategy for managing our relations with the Soviets. It does not require trusting the Soviets. It does require looking beyond fragile panaceas, like SDI, and developing a comprehensive plan for managing our inevitable tensions with the Soviets.

Mr. President, before you sit down with Mr. Gorbachev next month, I strongly urge you to develop and announce such a strategy in the coming weeks. A troubled, anxious world waits in hope.

Sincerely,

GARY HART.●

FIFTH ANNUAL MEETING OF THE SMALL BUSINESS COMMITTEE'S NATIONAL ADVISORY COUNCIL

● Mr. WEICKER. Mr. President, on Wednesday, October 23, 1985, the National Advisory Council to the Senate Committee on Small Business held its fifth annual day-long meeting and unanimously passed eight resolutions urging Congress and the President to take action on some of the most pressing issues facing small businesses and the economy today.

The Council, composed of 25 small business persons from about the country, provides the committee with regular grassroots insight into the problems and concerns of our Nation's small businesses. The Council was formed in 1981 to give the committee a better understanding of the small business viewpoint, while affording Council members the opportunity to expand their knowledge of the Federal Government and how it operates. This Council is the only officially recognized advisory body in the Senate. Its members come to Washington each year, at their own expense, to meet with committee members and other officials to discuss the state of small business from their perspective as active working members of the small business community.

Yesterday's meeting included morning sessions with Clayton Yeutter, U.S. Trade Representative, Joseph R. Wright, Jr., Deputy Director, Office of Management and Budget, James C. Sanders, Administrator, Small Business Administration, Michael Stern, minority staff director, Senate Finance Committee, and a luncheon address by Senator Ernest F. Hollings. In the afternoon, the council held its formal working session with members of the committee, and approved several important resolutions.

The Council's measures call for the President and Congress to take immediate action on the budget crisis, endorsing cuts in all areas, including entitlement programs, Social Security, defense spending and tax increases, if necessary; to oppose comprehensive tax reform with the exception of a minimum corporate tax; and to maintain the Small Business Administration [SBA] as an independent agency.

The Council also declared its support for vigorous enforcement of U.S. antitrust laws, particularly in the areas of anticompetitive mergers and acquisitions; stronger implementation of the Prompt Payment Act to ensure that small contractors doing business with the Federal Government receive timely payment; called for hearings and a Federal standard on the issue of liability insurance, in light of the current unavailability of affordable insurance for small firms; and finally, asked the President, the U.S. Trade Representative, International Trade Commission, and the Commerce Department to reduce imports from any country whose unfair trade practices contribute to the U.S. trade deficit with that country.

Mr. President, I commend the Advisory Council for the important contribution it has made to the congressional deliberations on small business matters. I urge my colleagues and the President to carefully review these resolutions, as they reflect some of the major concerns of America's 14 million small business owners and operators.

Mr. President, I ask that the full text of the eight resolutions and a list of the Council members who attended the annual meeting to be printed in the RECORD following this statement.

The material follows:

RESOLUTION OF NATIONAL ADVISORY COUNCIL ON BUDGET DEFICIT

Whereas, the total Federal debt has doubled over the past four years to almost 2 trillion dollars, and seriously threatens the majority of the nation's small businesses, which would be particularly hard hit by higher interest rates, renewed inflation and a stagnating economy.

Whereas, the Congressional Budget Office estimates that without any corrective action by the President or Congress to immediately reduce these deficits, and hold the line across the board on controllable spending, that a crisis is at hand for small business;

Whereas, any effective debt reduction package should include necessary tax increases, while allowing for provisions that are favorable to the short- and long-term planning of both small and agri-related businesses: Therefore, be it

Resolved, That the National Advisory Council to the Senate Committee on Small Business calls upon the President and the Congress of the United States to take immediate action to address this budget crisis. In the consideration of specific actions no areas should be exempt, including tax increases, and entitlements programs, as well as substantial reductions in defense spending, and other domestic discretionary programs.

RESOLUTION OF NATIONAL ADVISORY COUNCIL ON PROPOSED TAX REFORM

Whereas, small business is a critical segment of our national economy, whose employment expanded by 11.4% between 1982 and 1984, compared with only 5.3% employment growth for large firms during this same period;

Whereas, small business produces a more-than-proportionate share of net new jobs relative to the small business share of total employment;

Whereas, small business generally does not have access to public capital markets, and therefore, often has to rely on retained earnings to fund its growth and operations;

Whereas, Congress is currently considering comprehensive reform of the income tax code;

Whereas, there are a number of major provisions of the tax code affecting the ability of small business to retain earnings which are currently being recommended for change, either by limitation or elimination;

Whereas, the concerns of small business are often over-looked in important tax legislation;

Whereas, in the last four years, Congress has enacted three major tax revision bills and the small business community desires stability in the tax code in order to be able to make long-term economic decisions;

Whereas, the tax concerns of small business must be adequately addressed for any tax reform bill to be truly equitable;

Whereas, small business is nearly unanimous in its support of the retention of certain provisions of the tax code, including the preferential treatment of capital gains, graduated corporate income tax rates, the investment tax credit, loan loss reserve, direct expensing, tax exempt financing for small business, and some form of accelerated depreciation.

Therefore, be it resolved that, the National Advisory Council to the United States Senate Committee on Small Business does not believe that fundamental change in the tax code is warranted, with the exception of

a strong corporate miminum tax. Should Congress decide to enact comprehensive tax reform, any such revision of the tax code must recognize the needs of small businesses as reflected in the specific small business tax provisions cited above.

RESOLUTION OF NATIONAL ADVISORY COUNCIL ON THE SMALL BUSINESS ADMINISTRATION

Whereas, the Small Business Administration (SBA) was established as an independent Federal agency in 1953, and is the only agency in the Executive Branch whose sole mission is to serve, promote and protect this nation's 14 million small enterprises;

Whereas, small businesses annually lead the country in job creation, productivity and innovation, and provide the key to our overall economic growth;

Whereas, SBA has an impressive 32 year record of providing critical financial and management assistance which is not otherwise available to small business owners and operators;

Whereas, the United States Senate, in passing S. 408, a three year authorization bill for SBA by an overwhelming vote of 94 to 3 on July 16, 1985, has already agreed to preserve SBA as an independent Federal agency;

Therefore, be it resolved that, the National Advisory Council to the Senate Committee on Small Business calls upon the President and the entire Congress of the United States to enact legislation consistent with S. 408, which maintains SBA as an independent agency and maintains adequate funding (at its current funding level) for its essential lending, management, procurement and advocacy functions, and further, that the President, in future budget submissions to Congress, submit recommendations consistent with this Congressional action.

PROPOSED RESOLUTION OF NATIONAL ADVISORY COUNCIL ON FOREIGN TRADE

Whereas, the United States trade deficit threatens the economic well-being of the United States;

Whereas, for the first time since World War I, the United States is a debtor nation, owing its trading partners more than they owe us;

Whereas, the United States trade practices are more free and fair than those of most of our trading partners;

Whereas, small businesses are particularly harmed by unfair trade practices;

Whereas, the President has elected not to follow the recommendations of the International Trade Commission;

Therefore, be it resolved that the National Advisory Council to the Senate Committee on Small Business calls upon the President and the Congress of the United States to take comprehensive action this year to insist that our trading partners promptly reciprocate our free and fair trade policies, including following the recommendations of the International Trade Commission and, in the event that such trading partners fail to reciprocate, the President, the United States Trade Representative, the International Trade Commission, and the U.S. Commerce Department shall take direct action under current trade laws to reduce imports from such country to the full extent of such failure or offset the advantages of any unfair trade practice which contributes to the United States trade deficit with such country.

PROPOSED RESOLUTION OF THE NATIONAL ADVISORY COUNCIL ON LIABILITY INSURANCE

Whereas, small businesses currently face a crisis in obtaining liability insurance with reported rate increases of 300 percent to 1000 percent making insurance coverage either unaffordable or unobtainable at any price;

Whereas, the increase in insurance premium rates adds fuel to inflationary engines in the economy as a result of higher costs being passed along in the cost of goods and services;

Whereas, the number of insurance companies offering such liability coverage is steadily decreasing because of high past loss ratios in this type of insurance;

Whereas, many small firms have discontinued uninsurable products and services, others have closed their doors because they cannot continue operations as self-insurers or without insurance;

Whereas, one factor which has contributed to this crisis is the fractured nature of tort law in the various states of our Union which has caused increased unwillingness by insurance companies to provide coverage for firms which do business in a variety of states; and

Therefore, be it resolved that the National Advisory Council to the Senate Committee on Small Business calls upon the Committee to study and conduct hearings on this critical problem of liability insurance availability and affordability for small businesses, and supports the concept of a federal liability standard removing the uncertainty that surrounds this issue, and thereby providing the type of structure that will permit insurance companies to accurately estimate the costs of such insurance.

RESOLUTION OF NATIONAL ADVISORY COUNCIL ON IMPLEMENTATION OF THE PROMPT PAYMENT ACT

Whereas, the members of the National Advisory Council to the Senate Committee on Small Business, having considered the Federal agency implementation of the Prompt Payment Act, Public Law 97-177, during the three years since it became effective on October 1, 1982 have found that the objectives of the legislation and the intent of Congress are not being fully attained;

Whereas, some Federal agencies continue to make payments beyond the payment date specified in its contracts or beyond the times specified in the Act, without the payment of interest;

Whereas, some Federal agencies are abusing the fifteen day "grace period" provided in the Act by failing to initiate payment action on contractors' invoices until the expiration of thirty days;

Whereas, some Federal agencies are delaying payments to small business contractors by rejecting their invoices as "improper" after the fifteen days provided by the Act;

Whereas, some Federal agencies are delaying payments to small business contractors by refusing formal acceptance of supplies, services or construction so as to delay the start of the payment periods mandated by the Act, after which interest must be paid;

Whereas, some Federal agencies are failing to automatically pay interest due to small business contractors, rather requiring them to make a demand for payment of interest contrary to the Act's self-enforcing intent;

Whereas, these problems with agency implementation of the Act are placing substantial financing burdens on small business government contractors, and acting as an obstacle to small business participation in the Federal procurement market, thus denying the Government the advantages of the competition, industry, and innovation provided by many small businesses;

Therefore, be it resolved That, the National Advisory Council to the Senate Committee on Small Business calls upon the Congress, especially the Senate and House Committees on Small Business, the Senate Governmental Affairs Committee, and the House Government Operations Committee which were instrumental in the passage of the Prompt Payment Act, to:

1. conduct oversight hearings on the implementation of the Prompt Payment Act through OMB Circular A-125, the Federal Acquisition Regulation, and the implementing regulations of individual Federal agencies; and

2. To consider modifications to the Prompt Payment Act that will address demonstrated implementational abuses by some Fedeal agencies and assure attainment of Congressional intent and objectives in passing the Act.

RESOLUTION OF NATIONAL ADVISORY COUNCIL ON ANTITRUST ENFORCEMENT

Whereas, the antitrust laws of the United States have been the strong underpining of the American free enterprise system through insuring a free and open marketplace;

Whereas, the antitrust laws of the United States is the first line of defense against anticompetitive activity and is critical to the health of the economy and the survival of small business;

Whereas, the antitrust laws of the United States have insured the integrity and independence of the American small businessperson in being able to decide which products to handle, where and to whom to sell such products and the prices at which such products are sold;

Therefore, be it resolved That, the National Advisory Council to the Senate Committee on Small Business resolves as follows:

First, that the Federal Trade Commission and the Antitrust Division of the Department of Justice are urged to vigorously enforce the antitrust laws of the United States in the following areas where enforcement is now lacking:

A. Anticompetitive mergers and acquisitions;

B. Resale price maintenance;

C. Tying arrangements; and

D. Unreasonable territorial and customer restrictions.

Second, Senator RUDMAN and the other Members of the Senate Committee on Small Business are to be commended for their opposition to the "Vertical Restraints Guidelines" published by the Department of Justice on January 23, 1985—which do not accurately state current antitrust law—and for urging that the Vertical Restraints Guidelines be withdrawn as per Senate Concurrent Resolution 56;

Third, the Senate Committee on Small Business is urged to oppose the efforts of Secretary of Commerce Malcolm Baldrige to abolish Section 7 of the Clayton Act that makes illegal mergers and acquisitions which may unreasonably restrain competition or increase monopoly in any line of commerce; and

Fourth, the Senate Committee on Small Business is urged to insist that the Administration appoint a recognized spokesman for

small business to the Administration's current Task Force on Antitrust.

RESOLUTION OF NATIONAL ADVISORY COUNCIL ON INVESTMENT TAX CREDIT REFORM

Whereas, the manufacturing community in our nation is currently faced with increasing foreign competition;

Whereas, those foreign competitive businesses are often aided by direct and indirect subsidies afforded them by their home governments;

Whereas, those foreign competitors are further assisted by the artificially high value of the United States dollar vis-a-vis the value of their currencies;

Whereas, our system of government and basic integrity preclude the United States from violating the General Agreement on Tariffs and Trade (GATT);

Whereas, domestic manufacturers have applied for the investment tax credit for the purchase of foreign manufactured machinery, further enhancing the benefit of the purchase of such machinery from foreign suppliers, rather than domestic firms;

Whereas, the investment tax credit was originally designed to act as an incentive for manufacturing in the United States;

Therefore, be it resolved That, the National Advisory Council to the United States Senate Committee on Small Business urges the Members of this Committee to advocate a version of the investment tax credit that would allow only the purchase of equipment manufactured within the United States be eligible for such credit.

NATIONAL ADVISORY COUNCIL PARTICIPANTS

1. Mr. Robert Baker, Essex Bank, Peabody, Massachusetts.
2. Mrs. Asta Ball, Miniature Nut and Screw Corporation, Newington, Connecticut.
3. Mr. Herb Bowden, Sencore, Inc., Sioux Falls, South Dakota.
4. Mr. Timothy H. Fine, The Law Offices of Timothy H. Fine, San Francisco, California.
5. Mr. Walter Floss, Jr., Floss Insurance Agency, East Amherst, New York.
6. Mr. R. Alan Fuentes, Computer Dynamics, Inc., Virginia Beach, Virginia.
7. Mr. Odus Hennessee, Cosmetic Specialty Labs., Inc., Lawton, Oklahoma.
8. Mr. Bruce Hopewell, Lincoln Business Help Associates, Inc., New York, New York.
9. Mr. David L. Houston, Northwest Federal Savings & Loan Association, Woodward, Oklahoma.
10. Mrs. Gay Kruglick, Earls Academy, Phoenix, Arizona.
11. Mr. Michael Lefkiades, Michigan Coni Islands, Inc., Bay City, Michigan.
12. Mr. David Longnecker, Kiltons of Manchester, Manchester, New Hampshire.
13. Mr. F. Ray McCormick, McCormick Construction Co., Inc., El Paso, Texas.

22. Mr. Frank Carroll, Carrolline Travel, Worchester, Massachusetts.

MASSACHUSETTS FOR AFRICA MONTH

● Mr. KERRY. Mr. President, I would like to take this opportunity to draw attention to the fact that Governor Michael Dukakis of Massachusetts has proclaimed November as "Massachusetts for Africa Month." Twenty-five African countries are appealing for emergency aid to fight famine, and 150 million people are facing critical shortages of food, medical supplies, health care, and water. Through a community-wide effort Massachusetts will try to do its part to alleviate these horrible conditions.

This project was initiated by Douglas Rose, a Massachusetts youth counselor. During the month of November, merchants will donate proceeds from certain business days, while local school children, senior citizens, labor unions, colleges, religious organizations and sports teams will contribute in various ways.

Mr. President, I praise Governor Dukakis, Mr. Rose, and all those involved in this program for continuing to keep us aware of the terrible plight facing many Africans. It is this cooperation of neighbor working with neighbor for a common goal that shows true American spirit and compassion. I urge my colleagues to follow the example of Massachusetts and promote this kind of community participation in their own States.●

JAPAN-UNITED STATES SENATE SCHOLARSHIP PROGRAM

● Mr. COHEN. Mr. President, on behalf of myself and Senator MITCHELL, I would like to take this opportunity to share with our colleagues a letter we received from a student in Maine who participated in the Youth for Understandings Japan-United States Senate Scholarship Program. These appointments are made by a State selection committee which is comprised of a member we each name, along with representatives of the National Association of Secondary School Principals, the National Council for the Social Studies, and Youth for Understanding. High school principals throughout the State are invited to nominate one outstanding high school junior for consideration.

One such scholarship winner is Lara Horner of Bar Harbor. Her letter certainly underlines the positive experience which these students enjoy in Japan. The value of the program and the obviously beneficial relationships being established between our two countries are made clear in Ms. Horner's letter. To quote:

I am extremely grateful for the part you played in sending me to Japan. My summer in Japan was a learning and uplifting time unlike anything I have ever experienced in the past. I stayed on Okinawa which is different in many ways from the mainland of Japan. Okinawa does not have temples or an abundance of festivals, so I was able to direct my attention to the people, the school, and the uniqueness of Okinawa's history.

Youth for Understanding could not have selected a better family for me. My family was warm, caring, sensitive, and most of all had a wonderful sense of humor. They have become my second family. I got along very well with each member of the family: my older brother and I took karate lessons together; with my older sister I learned to cook; with my 17-year-old sister I went to school; and with my younger sister I learned origami. These are only a few of my sharing experiences with my family.

Everyone was always willing to teach me as much about Okinawa as possible. My sister read the paper every day and then translated it for me. My father took me to visit famous Okinawan war memorials on the southern part of the island. In his explaining, I learned a lot about the strength of the people and their ability to recover from such devastation in a relatively short period of time.

I learned even more about the Okinawan people by attending school. This gave me the chance to make friends, participate in activities, and share myself with the students and teachers. I attended classes in math, physics, Japanese caligraphy, and English. I was made to feel welcome on my first day of school. No fewer than 50 people surrounded me during my first 5 minutes at Nago High School. Everyone introduced him/herself and made a huge effort to speak English. All of the students wanted to be helpful and took a genuine interest in me. My entire school experience helped to better my image of myself. The students enabled me to understand that effort matters more than ability.

My experiences this summer have influenced my plans for the future. I intend to study the Japanese language in college and hope to spend a year studying in Japan. Maintaining a close relationship with my Japanese family and friends is important to me.

I delivered your message to the Okinawan Governor and he received it with pleasure. I deeply appreciate the privilege of being a U.S. Senate Scholar.

Lara Horner, Bar Harbor, Maine.●

SOUND ECONOMICS

● Mr. BRADLEY. Mr. President, I rise to recommend an article entitled, "Sound Economics, Sound Trade Policy," which appeared in the New York Times on September 15, 1985.

Prof. Richard Gardner's article urges the President not to deal solely with the politics of the trade issue, but to begin solving the fundamental economic problems affecting trade. His article adeptly explains that although unfair foreign trade practices need to be stopped, they only account for 10 percent of the current trade imbalances. He cites five key areas where fundamental policy are needed: The budget deficit, exchange rates, national competitiveness, import adjustments, and capital flows. Without

change in these areas, we may see a future collapse in what remains of the open trading system.

Mr. President, Professor Gardner's article gives us much to think about. I urge my colleagues to review it, and ask that it be printed in the RECORD.

The article follows:

[From the New York Times, Sept. 15, 1985]

SOUND ECONOMICS, SOUND TRADE POLICY

(By Richard N. Gardner)

The tidal wave of restrictive trade legislation pending in Congress has concentrated President Reagan's mind wonderfully. In his second term, he is beginning to give to trade policy the attention so sadly lacking in his first.

But so far he has dealt only with the politics of the problem, not with the economic fundamentals. He has not yet recognized that his free-trade objectives are being undermined, not only by the unfair trading practices of other nations but also by some of his own domestic and international policies.

On protectionism, the President has the right instincts. Import surcharges and other trade restrictions would again ignite inflation, making us less competitive, worsening our long-term trade imbalance and triggering foreign restrictions against our exports. They could also bring the foreign debt crisis to a potentially ruinous climax. Unable to export, debtor nations could not service their debts, and this would damage our banking system and even our national security.

Enforcing our laws against foreign unfair trade practices is essential to protect American interests and to restore confidence in Presidential leadership. But unfair trade practices abroad account for less than 10 percent of the $150 billion annual trade imbalance that is devastating basic industry in this country. A 10 percent solution is not enough. To deal with the other 90 percent, the President will need to consider fundamental policy changes in five key areas.

First, the budget deficit. As long as we go on spending more than we are saving, we will continue to borrow abroad to make up the difference. The high real interest rates necessary to attract foreign capital are a major cause of the overvalued dollar that drives up our trade deficit.

We will not escape this vicious circle until the President meets Congress halfway on deficit reduction—supporting some tax increases as well as limits on cost-of-living adjustments in Social Security and pension programs for middle- and high-income citizens. Without raising individual tax rates, we could raise at least $60 billion of additional revenue a year by a 30 cent gasoline tax, by a minimum tax on wealthy individuals and corporations, and by eliminating the deductibility of interest payments except for mortgage interest on principal residences.

Second, exchange rates. American leadership and support of liberal trade cannot coexist with an overvalued dollar. While we cannot return to fixed exchange rates, we can strengthen multilateral surveillance over domestic policies here and in other countries that determine the relationship among currencies. In return for accepting some international discussion of our domestic economic management, we could mobilize international pressure on Japan, West Germany and other countries to help our trade position by stimulating their economies. We can also limit extreme fluctuations in exchange rates by coordinated intervention in exchange markets with other key countries.

Third, a national program to enhance our competitiveness, even if we get the dollar down. A liberal trade policy cannot survive in the United States if our Government fails to show the same concern for promoting comparative trade advantages for our industries that our toughest competitors do for theirs. This does not mean half-baked "industrial policies." What it does mean, among other things, is more Government assistance to worker training and to education (especially mathematics, science and engineering); maintenance rather than repeal (as the Administration proposes) of the tax credit and accelerated depreciation for investment in modern plant and equipment; and more Export-Import Bank credit facilities for our exporters.

Fourth, adjustment to imports. Since the whole nation gains from open trade policies, it must be willing to help individuals who lose. We need new programs to assist workers, industries and communities hurt by imports, emphasizing worker training rather than simple income maintenance. If import restraints are required in exceptional cases to avoid personal hardship, they should be selective, limited in time and conditioned wherever feasible on action by management and labor to restore competitiveness.

Fifth, capital flows. One main cause of the United States' trade imbalance is the collapse of historic markets in Latin America and elsewhere because of the debt crisis. The major debtor countries will need at least $10 billion more a year in public and private capital flows, as well as open markets for their exports, if they are to service their debts, make the necessary domestic adjustments and resume their role as healthy trading partners.

The World Bank could assure most of this additional money through direct loans and co-financing with private lenders, but only if the Reagan Administration abandons its opposition to a substantial increase in the bank's capital.

These five changes in President Reagan's policies would encounter political and ideological resistance from members of his Administration. Yet without movement in at least some of these areas, he will not merely see the end of his free-trade policies. President Reagan will be partly responsible for the collapse of what is left of the open-trading system—one of the United States' great postwar contributions to its own and the general welfare.●

TVA: THE REAL ISSUE IS ACCOUNTABILITY

● Mr. HUMPHREY. Mr. President, on Monday, I offered for the RECORD my thoughts on the proposal approved by the Tennessee Valley Authority [TVA] Board of Directors to appoint an inspector general within the Agency. I argued that an inspector general created through statute, rather than one simply appointed by the Board, would be a good first step in addressing the problems which the Agency now faces. However, it is my belief that the problems which have plagued the Agency's Nuclear Construction Program reveal fundamental weaknesses in the TVA structure, weaknesses which, I believe, call for fundamental reforms.

First, let me state clearly, that the TVA power system is self-supporting. That is, the Agency must collect from its ratepayers revenues which are sufficient to cover its expenses. The Congress does appropriate funds for certain nonpower functions of the Agency, but that constitutes less than 5 percent of the total TVA budget. The self-supporting nature of TVA suggests some very important points.

First, the decisions which are made by TVA must be paid for by the ratepayers of the TVA system. Who makes those decisions? A three-member Board of Directors appointed by the President and confirmed by the Senate. Each member serves for 9 years. The Board regularly makes decisions about how to conduct business at this $5 billion Agency—decisions which have a potentially enormous impact on the lives of the people of the Tennessee Valley, their economic livelihood, and the condition of their natural surroundings. Yet, despite the importance of TVA and its activities, no one is provided a voice in the decisionmaking process—not regulators, not the marketplace, not the Congress, and least of all, not the people who will be asked to pay for those decisions. For the fact of the matter is, the Tennessee Valley Authority is not directly accountable to anyone.

Accountability is an absolutely essential element in our democratic society. Businesses rise and fall with their decisions. Elected officials must answer to the public at every election. And yet, in TVA we have an agency of the Government which is uniformly absolved from this principle and endowed with extraordinary power. This arrangement goes right to the heart of what is often called the TVA experiment. As President Roosevelt said when he suggested creating the agency, he wanted TVA to be—

. . . a Corporation clothed in the power of Government but possessed of the flexibility and initiative of private enterprises . . .

Perhaps the issue of accountability would be of less concern had there been no problems with the TVA experiment. But there have been. Nowhere are problems more evident than with the nuclear power program. Founded on what proved to be faulty projections of power demands in the future, TVA vastly overcommitted itself to a massive nuclear construction program and was able to finance this expansion through its access to the Federal Financing Bank [FFB]. When committed to the construction of the free world's largest nuclear power system—which called for the construction of 17 nuclear reactors—there were no regulators to question the need for such an expansion. And because TVA had access to easy financing at the FFB, it

was effectively shielded from the harsh discipline of the marketplace.

Today, the nuclear program is in shambles. Of five completed nuclear reactors, none are in operation. Construction and licensing procedures at four other reactors has been indefinitely delayed.

Moreover, because TVA is not subject to regular oversight in the Congress, another crucial link in accountability is lost. The effects are woefully evident in a nuclear program that is now fraught with mismanagement.

Finally, and most important, there is no provision within the TVA Act for the residents of the Tennessee Valley or their elected representatives to have any formal control over TVA policies and programs, except indirectly through the President, and the Congress. Unlike other publicly owned utilities, TVA's ratepayers do not have a voice in the selection of management of the utility. And ratepayers—those who must pay for the mistakes of management—have no rights under the TVA Act in terms of participation.

These are some of the basic issues which face TVA. The creation of an inspector general through statute would be a first step toward introducing some outside accountability at the agency. Clearly, however, even more is needed. TVA has announced that it will raise the rates it charges to its customers 6.9 percent over the coming year, an increase which is needed, in part, to cover costs stemming from problems associated with the nuclear program. This rate increase, like all TVA rate increases, was approved by the TVA Board without approval by a regulatory commission or the Congress. No such approval is needed under the law. And, tragically, those who will have to pay the higher rates—the people of the Tennessee Valley—were denied a voice in matters crucial to them. In my view, few would stand to lose if the TVA curtain of unaccountability were lifted, and many more would stand to gain.●

TRADE POLICY

● Mr. SIMON. Mr. President, one of the things this country is starting to look at seriously is our whole trade policy. We need a sensible appraisal that is practical and that is not dictated by economic theory.

R.C. Longworth is an economics writer for the Chicago Tribune.

In general, I find myself in agreement with what he has to say. He incorrectly describes the bill that our colleague Senator BENTSEN has put in as a "blanket 25-percent tariff," when, in fact, it is a long way from that. But except for that minor inaccuracy, it is a well-balanced, thoughtful presentation of the reality we have to face.

I ask that the article on trade policy be inserted in the RECORD at this point.

The article follows:

[From the Chicago Tribune, Sept. 26, 1985]

A TRADE POLICY IS OVERDUE

(By R.C. Longworth)

The battle between the free-traders and the protectionists is generating an extraordinary amount of sound and fury, considering that both sides are defending a myth.

The trouble is that the myths hide the real world. Both Congress and the White House are arguing about the wrong thing. As a result, the United States is as far as ever from a rational trade policy that might reduce our record $150 billion trade deficit and enable U.S. industry to compete in a new and baffling world.

There is no such thing as pure free trade, and never has been, despite President Reagan's restatement of this credo earlier this week and his promise to punish violators of the free-trade canon. As free trade does not exist, neither does its ideological opposite, pure protectionism.

Consider: At least half the trade in the world is affected, one way or the other, by some sort of "protectionism"—by tariffs, quotas, subsidies or other measures that distort trade by preventing its free flow. These measures grow daily. Free-traders say this should choke off trade and impoverish us all. Yet trade grew by 9 percent last year and will grow by another 4 to 5 percent this year.

Consider: With the spread of multinational companies, fully 40 percent of the world's trade is not between countries but between branches of companies. In other words, trade flows, not between a German manufacturer and an American buyer, but among the various arms of the same company, often American-owned—its Venezuelan mining arm, Indonesian subassembly arm, Mexican assembly arm and American merchandising arm, all setting their own prices.

Consider: American manufacturers compete less these days against factories in Europe or even Japan, where wage scales are roughly similar to ours, than against factories [often American-owned] in Third World countries, where wages are one-tenth what an American worker makes. No amount of wage-cutting here can match these Third World salaries. Nor should it. The entire U.S. economy is based on substantial income for workers.

Consider: Almost every nation except the United States has a trade policy, and makes it part of its overall foreign policy. They all realized long ago that trade is vital to their livelihood. In these countries, government policies on taxes, industry and investment are shaped to promote trade and to expand industries and jobs. The official American line, that these rational policies are somehow evil, strikes the rest of the world as nutty.

Against these realities, President Reagan's faith in free trade—his belief that all will be well if trade is only allowed to flow freely, with no government interference at all—is touching but silly.

His congressional opponents, frustrated by the President's blind faith in this economic tooth fairy, have responded with blunt instruments, such as a blanket 25 percent tariff, as though all imports are equal and all countries deserve the same treatment.

The free-trade theology stems from the theory of comparative advantage, laid out some 170 years ago by English economist David Riccardo. Riccardo argued that each nation has things it can make better and cheaper than other nations. Thus, it should sell what it makes best, and buy abroad things other nations make better. In this way, each nation uses its "comparative advantage" to its own profit.

Riccardo used the example of British textiles and Portuguese wine. Even then, this probably sounded better to the British than the Portuguese. The theories of free trade and comparative advantage have always been most popular in whatever country happened to be top dog in the trading world—as the U.S. has been since World War II.

The trouble is that "comparative advantage"—the natural superiority of countries in certain lines of work—is meaningless today. The swift transfer of technology means that the most modern factories can be moved around the globe, to take advantage of the lowest wages. The communications revolution means that headquarters in Chicago can direct factories in Sri Lanka as easily as plants in Skokie.

In short, "comparative advantage" is no longer some natural, God-given blessing but can be created by any country willing to go to the trouble.

This, is fact, is the biggest cloud on the U.S. trade horizon. The American trade deficit with Europe will disappear when the dollar weakens. Even the record deficit with Japan can be brought under control when the administration realizes that Japan is more a menace to the American economy than a fair-weather friend in the cold war against the Soviet Union.

But the threat of low-wage competition will be with us for years. As China becomes a manufacturing nation, this threat can only grow. Moreover, there is nothing inherently unfair about this. No simple, single measures aimed at "fair trade" will work here. Only a full-fledged trade policy, based on world realities, will suffice.

Does this imply some "protectionism"? Sure. It only recognizes that some things we have—industries, jobs, communities, a standard of living—are worth protecting. Like military defense, economic defense make sense. The question is not whether, but how.

An arsenal of weapons is at hand: quotas, subsidies, bilateral agreements—whatever works best in specific situations. This is much less tidy and satisfying than a blanket, bright-eyed belief in free trade. But unfortunately, ours is not a tidy and satisfying world.

The free-traders maintain that the real culprit is the overvalued dollar and that the trade deficit will fall when the dollar does. They add that the protective measures enable companies to become fat and slothful behind trade barriers, losing the ability to compete. Finally, they say trade barriers raise prices to consumers by keeping out cheap imports: A recent Federal Reserve study put a $14 billion annual cost on current barriers to imports of shoes, textiles, cars and steel.

First, the dollar is crucially important: Economists blame it for one-third to one-half of the deficit. But when the dollar falls, we'll still have a $75 billion to $100 billion deficit.

Second, many industries have used trade shields to modernize radically. Anyone whose idea of a textile mill comes from "Norma Rae" should go look at a modern mill. But even such modernization is over-

whelmed by competitors paying their workers $1 an hour.

Finally, that $14 billion figure must be put in perspective. It amounts to half of 1 percent of America's $3 trillion gross national product. That still a lot of money, but here is the real question: Is 0.5 percent of our GNP a reasonable price to pay for trade policies that could save millions of jobs?

Some might say yes, some no. But the question, put this way, makes it clear that a set of rational trade policies, deliberately aimed at enhancing American's competitiveness in the new global economy, would not be a ruinous enterprise, igniting inflation and busting our budget.

Such a trade policy is long overdue. It is time to jettison the myths and start dealing with the real world. If "protectionism" offends the ear, we can call it "managed trade" or "organized free trade" or some other fancy name. At this stage, what we call it is less important than whether we do it.

VIETNAM VETERANS OF AMERICA

● Mr. CHAFEE. Mr. President, today I am proud to join my colleagues as a cosponsor of S. 8. This bill will grant the Vietnam Veterans of America, Inc., a Federal charter. This bill will entitle the VVA to the benefits enjoyed by every other nonprofit chartered service organization.

As a fully chartered corporation, the VVA will now be able to adequately provide for the improvement of the conditions of Vietnam veterans, and produce research materials that document the relationships between Vietnam veterans and American society. As a result of this bill, the VVA will also be empowered with the ability to financially assist Vietnam veterans in need, along with their dependents and survivors.

Passage of this bill has been a priority for the VVA for quite some time. It is also long overdue. Vietnam veterans have gone through trying times, and have worked hard to overcome the stigma attached to their role as veterans of an unpopular war.

Recognition of the VVA as a federally chartered corporation will go a long way toward making up the debt we owe our Vietnam veterans.●

SANCTIONS ARE OUR BEST WEAPON

● Mr. SIMON. Mr. President, in USA Today, Nadine Hack, an investment banker from the New York area, had an article describing a visit she made to South Africa. When she went, she was not sure whether economic sanctions were right or wrong, but she came back convinced that sanctions can be helpful.

I urge my colleagues to read the Nadine Hack article, and I ask that her article be printed in the RECORD.

The article follows:

[From USA Today, Oct. 15, 1985]

SANCTIONS ARE OUR BEST WEAPON

(By Nadine B. Hack)

NEW YORK.—I went to South Africa firmly opposed to apartheid but painfully undecided about divestment or strong economic sanctions.

Now, I am convinced that sanctions are an appropriate response and in fact the best leverage we have. Regardless of Afrikaner protests that they will not be influenced by outsiders, they obviously are.

Black trade unionists, who hope divestment will not actually take place, applaud the international divestment campaign as the best influence on their country's direction.

While I was there, a boycott of white-owned businesses by the residents of Port Elizabeth's townships—strikingly similar to the Birmingham boycotts—was having a remarkably similar effect: The white mayor was grumbling that Pretoria ought really to be doing something immediately to make it easier for the blacks.

Economic sanctions are the last remaining non-violent, legitimate, and appropriate means we have to apply force.

A growing number of blacks have become so alienated and radicalized that they are no longer willing to tolerate any process of transition; for them, the revolution is long overdue.

U.S. policy is perceived by both backers and critics of the government as tacit complicity with the system. Out of frustration with the West and free enterprise as "supporters of apartheid," Marxist ideology is taking hold among many who know nothing of Marxism or the implications of a Marxist totalitarian system.

In not more fiercely opposing apartheid, we are creating fertile territory for communist influence. If we don't act quickly and strongly in opposition to apartheid, we will have created the problem we most fear.

As Bishop Tutu told us in Johannesburg, it is truly tragic to see mobs of angry black youths brimming over with pent-up frustration and hostility, robbed of any responsible leadership, left alone to roam the streets of the townships.

Sanctions will not bring about immediate reform nor end all the difficulties. However, sanctions can have an effect; merely debating them has already had an impact. We do not have the luxury of choice whether or not to make an impact in South Africa.●

WANDERING WHEELS

● Mr. LUGAR. Mr. President, I would like to bring to the attention of my colleagues a group which desires special tribute.

Wandering Wheels, a bicycling organization from Indiana, is concluding a 10-month, 12,000-mile cycling trip around the perimeter of the United States. Sixty riders, ages ranging from 18 to 52, will complete their journey November 23, on St. Simons Island, GA, which was also the starting point for the trip that began February 2.

While experiencing the geographical wonders of this great country, the bikers have encountered a variety of lifestyles and traditions unique to different areas of the United States. Along with meeting the physical challenge of the trip, the riders have set aside 1 day a week for church and community work projects. The projects have ranged from clearing land for an inner-city church in Dallas, TX, to painting a nursery school in a ghetto area in Boca Raton, FL, to picking up trash and painting fire hydrants in Davenport, WA. Bob Davenport, Wandering Wheels director, estimates that the Circle America team will have donated over $50,000 in labor, calculated at minimum wage, by the trip's end.

A college curriculum has been incorporated into the perimeter trip, enabling the students who have taken on this challenge to earn college credit as they travel. Imagine the exceptional teaching materials afforded the instructors and students on the trip! The participants are experiencing firsthand on a daily basis the various social structures, differing terrain, and history of the places they visit.

I enthusiastically support the thrust of this excursion. I share Wandering Wheels' concern for encouraging young persons, as well as adults, to involve themselves in healthy spiritual, mental and physical discipline. the Circle America team is to be commended for these fine goals and for accomplishing the most ambitious mass cycling coeducational expedition ever attempted in the United States.●

ORDERS FOR FRIDAY

RECESS UNTIL 8:45 A.M.

Mr. DOLE. Mr. President, I ask unanimous consent that when the Senate completes its business today, it stand in recess until 8:45 a.m. on Friday, October 25.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECOGNITION OF SENATOR PROXMIRE

Mr. DOLE. I ask unanimous consent that following the recognition of the two leaders under the standing order, there be a special order in favor of the Senator from Wisconsin [Mr. PROXMIRE] for not to exceed 15 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

TRANSACTION OF ROUTINE MORNING BUSINESS

Mr. DOLE. Mr. President I ask unanimous consent that following the special orders just identified, there be a period for the transaction of routine morning business tomorrow not to extend beyond the hour of 9:30 a.m., with Senators permitted to speak therein for not more than 5 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF PROCEDURE

Mr. DOLE. Following routine morning business, the Senate will begin consideration of S. 1714, the farm bill. I say to my colleagues that I hope all those who agreed to offer their amendments tomorrow will do that

and I am certain there will be rollcall votes throughout the day.

If we start early, we ought to be able to complete what action we do on the farm bill, say, around 4 p.m.

RECESS UNTIL 8:45 A.M. TOMORROW

Mr. DOLE. Mr. President, there being no further business to come before the Senate, I move that the Senate stand in recess until 8:45 a.m. on Friday, October 25.

The motion was agreed to and, at 9:02 p.m., the Senate recessed until tomorrow, October 25, 1985, at 8:45 a.m.

EXTENSIONS OF REMARKS

THE PRESIDENT'S MESSAGE OF HOPE AT THE GENERAL ASSEMBLY OF THE UNITED NATIONS

HON. WM. S. BROOMFIELD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 24, 1985

Mr. BROOMFIELD. Mr. Speaker, today, the President delivered a powerful and moving address to the assembled world leaders who are at the United Nations to mark the 40th anniversary of that international organization.

President Reagan's message was both realistic and hopeful. He recounted the bright successes of the United Nations, as well as its dismal failures. He talked about America's commitment to that organization and of our country's hopes for a peaceful future.

The President honestly described United States-Soviet differences and the importance of resolving our disagreements through frank give and take.

He proposed a new initiative to resolve the many regional conflicts which trouble the world today and involve the interests of both our country and the Soviet Union. Our President proposed negotiations among the warring parties in these regional disputes followed by United States-Soviet discussions on these difficult issues. Most importantly, the President revealed his deep desire to make progress in his forthcoming meeting with Mr. Gorbachev in Geneva.

I am confident that President Reagan, not unlike most Americans, has a vision of peace for this turbulent world. He supports the efforts of the United Nations but has been disappointed by the failures and weaknesses of that organization. If the founders of that institution could come back and visit today, what would they say about that world body? What would they say about the avoidance of real problem solving? How would they react to the efforts of many to politicize issues and, unfortunately, to misuse resources?

Let us hope that the United Nations can address its shortcomings, follow its original charter and rededicate itself to advocating human rights and freedom as the building blocks for true peace on this planet.

Again, I congratulate President Reagan for a splended address and recommend the text of the President's speech to my colleagues in the House.

The speech follows:

ADDRESS BY THE PRESIDENT TO THE GENERAL ASSEMBLY OF THE UNITED NATIONS AT THE COMMEMORATION OF THE 40TH ANNIVERSARY OF THE UNITED NATIONS

Forty years ago, the world awoke daring to believe hatred's unyielding grip had finally been broken—daring to believe the torch of peace would be protected in liberty's firm grasp.

Forty years ago, the world yearned to dream again innocent dreams, to believe in ideals with innocent trust. Dreams of trust are worthy, but in these 40 years too many dreams have been shattered, too many promises have been broken, too many lives have been lost. The painful truth is that the use of violence to take, to exercise, and to preserve power remains a persistent reality in much of the world.

The vision of the U.N. Charter—to spare succeeding generations this scourge of war—remains real. It still stirs our souls and warms our hearts. But it also demands of us a realism that is rockhard, clear-eyed, steady and sure—a realism that understands the nations of the United Nations are not united.

I come before you this morning preoccupied with peace, with ensuring that the differences between some of us not be permitted to degenerate into open conflict. And I come offering for my own country a new commitment, a fresh start.

On this U.N. anniversary, we acknowledge its successes: the decisive action during the Korean War; negotiation of the Non-Proliferation Treaty; strong support for decolonization; and the laudable achievements by the U.N. High Commissioner for Refugees.

Nor must we close our eyes to this organization's disappointments: its failure to deal with real security issues, the total inversion of morality in the infamous Zionism-is-racism resolution, the politicization of too many agencies, the misuse of too many resources.

The U.N. is a political institution and politics requires compromise. We recognize that. But let us remember—from those first days, one guiding star was supposed to light our path toward the U.N. vision of peace and progress—the star of freedom.

What kind of people will we be 40 years from today? May we answer—free people, worthy of freedom, and firm in the conviction that freedom is not the sole prerogative of a chosen few, but the universal right of all God's children.

This is the Universal Declaration of Human Rights set forth in 1948. And this is the affirming flame the United States has held high to a watching world. We champion freedom not only because it is practical and beneficial, but because it is morally right and just.

Free people, whose governments rest upon the consent of the governed, do not wage war on their neighbors. Free people, blessed by economic opportunity, and protected by laws that respect the dignity of the individual, are not driven toward the domination of others.

We readily acknowledge that the United States is far from perfect. Yet we have endeavored earnestly to carry out our responsibilities to the Charter these past 40 years, and we take national pride in our contributions to peace:

We take pride in 40 years of helping avert a new world war and pride in our alliances that protect and preserve us and our friends from aggression. We take pride in the Camp David agreements and our efforts for peace in the Middle East rooted in resolutions 242 and 338; in supporting Pakistan, target of outside intimidation; in assisting El Salvador's struggle to carry forward its democratic revolution; in answering the appeal of our Caribbean friends in Grenada; in seeing Grenada's representative here today, voting the will of its own people. And we take pride in our proposals to reduce the weapons of war.

We submit this history as evidence of our sincerity of purpose. But today it is more important to speak to you about what my country proposes to do, in these closing years of the 20th century, to bring about a safer, a more peaceful, a more civilized world.

Let us begin with candor—with words that rest on plain and simple facts. The differences between America and the Soviet Union are deep and abiding.

The United States is a democratic nation. Here the people rule. We build no walls to keep them in, nor organize any system of police to keep them mute. We occupy no country. The only land abroad we occupy is beneath the graves where our heroes rest. What is called the West is a voluntary association of free nations, all of whom fiercely value their independence and their sovereignty. And as deeply as we cherish our beliefs, we do not seek to compel others to share them.

When we enjoy these vast freedoms as we do, it is difficult for us to understand the restrictions of dictatorships which seek to control each institution and every facet of people's lives, the expression of their beliefs, their movements, and their contacts with the outside world. It is difficult for us to understand the ideological premise that force is an acceptable way to expand a political system.

We Americans do not accept that any government has the right to command and order the lives of its people, that any nation has a historic right to use force to export its ideology. This belief—regarding the nature of man and the limitations of government—is at the core of our deep and abiding differences with the Soviet Union, differences that put us into natural conflict—and competition—with one another.

We would welcome enthusiastically a true competition of ideas, welcome a competition of economic strength and scientific and artistic creativity, and, yes, welcome a competition for the good will of the world's people. But we cannot accommodate ourselves to the use of force and subversion to consolidate and expand the reach of totalitarianism.

When Mr. Gorbachev and I meet in Geneva next month, I look to a fresh start in the relationship of our two nations. We can and should meet in the spirit that we

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member of the Senate on the floor.

Boldface type indicates words inserted or appended, rather than spoken, by a Member of the House on the floor.

can deal with our differences peacefully. That is what we expect.

The only way to resolve differences is to understand them. We must have candid and complete discussions of where dangers exist and where peace is being disrupted. Make no mistake: our policy of open and vigorous competition rests on a realistic view of the world. Therefore, at Geneva, we must review the reasons for the current level of mistrust.

For example, in 1972 the international community negotiated in good faith a ban on biological and toxin weapons; in 1975 we negotiated the Helsinki accords on human rights and freedoms; and during the decade just past, the United States and the Soviet Union negotiated several agreements on strategic weapons. Yet, we feel it will be necessary at Geneva to discuss with the Soviet Union what we believe are their violations of a number of the provisions in all of these agreements. Indeed, this is why it is important that we have this opportunity to air our differences through face-to-face meetings—to let frank talk substitute for anger and tension.

The United States has never sought treaties merely to paper over differences. We continue to believe that a nuclear war is one that cannot be won and must never be fought. That is why we have sought, for nearly 10 years, still seek, and will discuss in Geneva radical, equitable, verifiable reductions in these vast arsenals of offensive nuclear weapons.

At the beginning of the latest round of the ongoing negotiations in Geneva, the Soviet Union presented a specific proposal involving numerical values. We are studying the Soviet counter-proposal carefully. I believe that within their proposal there are seeds which we should nurture, and in the coming weeks we will seek to establish a genuine process of give-and-take.

The United States is also seeking to discuss with the Soviet Union in Geneva the vital relationship between offensive and defensive systems, including the possibility of moving toward a more stable and secure world in which defenses play a growing role.

The ballistic missile is the most awesome, threatening, and destructive weapon in the history of man. Thus, I welcome the interest of the new Soviet leadership in the reduction of offensive strategic forces. Ultimately, we must remove this menace—once and for all—from the face of this Earth.

Until that day, the United States seeks to escape the prison of mutual terror by research and testing that could, in time, enable us to neutralize the threat of these ballistic missiles and, ultimately, render them obsolete.

How is Moscow threatened—if the capitals of other nations are protected? We do not ask that the Soviet leaders—whose country has suffered so much from war—leave their people defenseless against foreign attack. Why then do they insist that we remain undefended? Who is threatened if Western research—and Soviet research that is itself well-advanced—should develop a non-nuclear system which would threaten not human beings, but only ballistic missiles?

Surely, the world will sleep more secure when these missiles have been rendered useless, militarily and politically, when the Sword of Damocles that has hung over our planet for too many decades is lifted by Western and Russian scientists working to shield their cities and their citizens and one day shut down space as an avenue for weapons of mass destruction.

If we are destined by history to compete, militarily, to keep the peace, then let us compete in systems that defend our societies rather than weapons which can destroy us both, and much of God's creation along with us.

Some 18 years ago, then-Premier Aleksei Kosygin was asked about a moratorium on the development of an anti-missile defense system. The official Soviet news agency, TASS, reported he replied with these words:

"I believe that defensive systems, which prevent attack, are not the cause of the arms race, but constitute a factor preventing the death of people. . . . Maybe an anti-missile system is more expensive than an offensive system, but it is designed not to kill people but to preserve human lives."

Preserving lives. No peace is more fundamental than that. Great obstacles lie ahead, but they should not deter us. Peace is God's commandment. Peace is the holy shadow cast by men treading on the path of virtue.

But just as we all know what peace *is*, we certainly know what peace is *not*.

Peace based on repression cannot be true peace and is secure only when individuals are free to direct their own governments.

Peace based on partition cannot be true peace. Put simply: nothing can justify the continuing and permanent division of the European continent. Walls of partition and distrust must give way to greater communication for an Open World. Before leaving for Geneva, I shall make major new proposals to achieve this goal.

Peace based on mutual fear cannot be true peace because staking our future on a precarious balance of terror is not good enough. The world needs a balance of safety.

Finally, a peace based on averting our eyes from trouble cannot be true peace. The consequences of conflict are every bit as tragic when the destruction is contained within one country.

Real peace is what we seek, and that is why today the United States is presenting an initiative that addresses what will be a central issue in Geneva—the resolution of regional conflicts in Africa, Asia, and Central America.

Our own position is clear: as the oldest nation of the New World, as the first anti-colonial power, the United States rejoiced when decolonization gave birth to so many new nations after World War II. We have always supported the right of the people of each nation to define their own destiny. We have given $300 billion since 1945 to help people of other countries. And we have tried to help friendly governments defend against aggression, subversion, and terror.

We have noted with great interest similar expressions of peaceful intent by leaders of the Soviet Union. I am not here to challenge the good faith of what they say. But isn't it important for us to weigh the record, as well?

—In Afghanistan, there are 118,000 Soviet troops prosecuting war against the Afghan people.

—In Cambodia, 140,000 Soviet-backed Vietnamese soldiers wage a war of occupation.

—In Ethiopia, 1,700 Soviet advisers are involved in military planning and support operations along with 2,500 Cuban combat troops.

—In Angola—1,200 Soviet military advisers involved in planning and supervising combat operations, along with 35,000 Cuban troops.

—In Nicaragua—some 8,000 Soviet bloc and Cuban personnel, including about 3,500 military and secret police personnel.

All of these conflicts—some of them under way for a decade—originate in local disputes but they share a common characteristic: they are the consequence of an ideology imposed from without, dividing nations and creating regimes that are, almost from the day they take power, at war with their own people. And in each case, Marxism-Leninism's war with the people becomes war with their neighbors.

These wars are exacting a straggering human toll and threaten to spill across national boundaries and trigger dangerous confrontations. Where is it more appropriate than right here at the United Nations to call attention to Article 2 of our Charter which instructs members to refrain "from the threat or use of force against the territorial integrity or political independence of any state. . . ."?

During the past decade these wars played a large role in building suspicions and tensions in my country over the purpose of Soviet policy. This gives us an extra reason to address them seriously today.

Last year I proposed from this podium that the United States and Soviet Union hold discussions on some of these issues, and we have done so. But I believe these problems need more than talk.

For that reason, we are proposing, and are fully committed to support, a regional peace process that seeks progress on three levels:

First, we believe the starting point must be a process of negotiation among the warring parties in each country I've mentioned—which, in the case of Afghanistan, includes the Soviet Union. The form of these talks may and should vary, but negotiations—and an improvement of internal political conditions—are essential to achieving an end to violence, the withdrawal of foreign troops and national reconciliation.

There is as second level: once negotiations take hold and the parties directly involved are making real progress, representatives of the United States and the Soviet Union should sit down together. It is not for us to impose any solutions in this separate set of talks. Such solutions would not last. But the issue we should address is how best to support the ongoing talks among the warring parties. In some cases, it might well be appropriate to consider guarantees for any agreements already reached. But in every case the primary task is to promote this goal: verified elimination of the foreign military presence and restraint on the flow of outside arms.

Finally, if these first two steps are successful, we could move on to the third—welcoming each country back into the world economy so its citizens can share in the dynamic growth that other developing countries—countries that *are* at peace—enjoy. Despite past differences with these regimes, the United States would respond generously to their democratic reconciliation with their own people, their respect for human rights, and their return to the family of free nations.

Of course, until such time as these negotiations result in definitive progress, America's support for struggling democratic resistance forces must not and shall not cease.

This plan is bold. And it is realistic. It is not a substitute for existing peace-making efforts; it complements them. We are not trying to solve every conflict in every region of the globe, and we recognize that each conflict has its own character. Naturally other regional problems will require differ-

ent approaches. But we believe that the recurrent pattern of conflict that we see in these five cases ought to be broken as soon as possible.

We must begin somewhere, so let us begin where there is great need and great hope. This will be a clear step forward to help people choose their future more freely. Moreover, this is an extraordinary opportunity for the Soviet side to make a contribution to regional peace which in turn can promote future dialogue and negotiations on other critical issues.

With hard work and imagination, there is no limit to what, working together, our nations can achieve. Gaining a peaceful resolution of these conflicts will open whole new vistas for peace and progress—the discovery that the promise of the future lies not in measures of military defense, or the control of weapons, but in the expansion of individual freedom and human rights.

Only when the human spirit can worship, create, and build, only when people are given a personal stake in determining their own destiny and benefitting from their own risks do societies become prosperous, progressive, dynamic, and free.

We need only open our eyes to the economic evidence all around us. Nations that deny their people opportunity—in Eastern Europe, Indochina, southern Africa, and Latin America—without exception are dropping further behind in the race for the future.

But where we see enlightened leaders who understand that economic freedom and personal incentive are key to development, we see economies striding forward. Singapore, Taiwan, and South Korea—India, Botswana, and China. These are among the current and emerging success stories because they have the courage to give economic incentives a chance.

Let us all heed the simple eloquence in Andrei Sakharov's Nobel Peace Prize message: "International trust, mutual understanding, disarmament and international security are inconceivable without an open society with freedom of information, freedom of conscience, the right to publish and the right to travel and choose the country in which one wishes to live."

At the core, this is an eternal truth. Freedom works. That is the promise of the Open World and awaits only our collective grasp. Forty years ago, hope came alive again for a world that hungered for hope. I believe fervently that hope is still alive.

The United States has spoken with candor and conviction today, but that does not lessen these strong feelings held by every American: It's in the nature of Americans to hate war and its destructiveness. We would rather wage our struggle to rebuild and renew, not to tear down. We would rather fight against hunger, disease, and catastrophe. We would rather engage our adversaries in the battle of ideals and ideas for the future.

These principles emerge from the innate openness and good character of our people—and from our long struggle and sacrifice for our liberties and the liberties of others. Americans always yearn for peace. They have a passion for life. They carry in their hearts a deep capacity for reconciliation.

Last year at this General Assembly, I indicated there was every reason for the United States and the Soviet Union to shorten the distance between us. In Geneva—the first meeting between our heads of government in more than 6 years—Mr. Gorbachev and I will have that opportunity.

So, yes, let us go to Geneva with both sides committed to dialogue. Let both sides go committed to a world with fewer nuclear weapons—and some day with none. Let both sides go committed to walk together on a safer path into the 21st century and to lay the foundation for enduring peace.

It is time, indeed, to do more than just talk of a better world. It is time to act. And we will act when nations cease to try to impose their ways upon others. And we will act when they realize that we, for whom the achievement of freedom has come dear, will do what we must to preserve it from assault.

America is committed to the world, because so much of the world is inside America. After all, only a few miles from this very room is our Statue of Liberty, past which life began anew for millions—where the peoples from nearly every country in this hall joined to build these United States.

The blood of each nation courses through the American vein—and feeds the spirit that compels us to involve ourselves in the fate of this good Earth. It is the same spirit that warms our heart in concern to help ease the desperate hunger that grips proud people on the African continent.

It is the internationalist spirit that came together last month when our neighbor, Mexico, was struck suddenly by an earthquake. Even as the Mexican nation moved vigorously into action—there were heartwarming offers by other nations offering to help and glimpses of people working together, without concern for national self-interest or gain.

And if there was any meaning to salvage out of that tragedy, it was found one day in a huge mound of rubble that was once the Juarez Hospital in Mexico City.

A week after that terrible event and as another day of despair unfolded—a team of workers heard a faint sound coming somewhere from the heart of the crushed concrete and twisted steel. Hoping beyond hope, they quickly burrowed toward it.

As the late afternoon light faded, and racing against time, they found what they had heard—and the first of three baby girls—newborn infants—emerged to the safety of the rescue team.

Here is the scene through the eyes of one who was there. "Everyone was so quiet when they lowered that little baby down in a basket covered with blankets. The baby didn't make a sound, either. But the minute they put her in the Red Cross ambulance everybody just got up and cheered."

Well, amidst all that hopelessness and debris came a timely—and timeless—lesson for us all. We witnessed the miracle of life.

It is on this that I believe our nations can make a renewed commitment. The miracle of life is given by One greater than ourselves. But once given, each life is ours to nurture and preserve—to foster not only for today's world but for a better one to come.

There is no purpose more noble than for us to sustain and celebrate life in a turbulent world. That is what we must do now. We have no higher duty—no greater cause as humans. Life—and the preservation of freedom to live it in dignity—is what we are on this Earth to do.

Everything we work to achieve must seek that end so that some day our prime ministers, our premiers, our presidents and our general secretaries will talk not of war and peace—but only of peace.

We've had 40 years to begin. Let us not waste one more moment to give back to the world all that we can in return for this miracle of life.

Thank you.

UNIONISM STILL NEEDED

HON. WILLIAM D. FORD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 24, 1985

Mr. FORD of Michigan. Mr. Speaker, I want to share with my colleagues a speech given by Wayne County Sheriff Bob Ficano to UAW members at local 483 in Romulus, MI, earlier this month. I found Sheriff Ficano's viewpoint insightful when I heard his remarks at this meeting. His speech follows:

STATEMENT OF BOB FICANO, SHERIFF, WAYNE COUNTY, MI

It is an honor and pleasure to be with you today on this special occasion.

My remarks will be relatively short. One of the second times that I did meet Clarence was out at Standard Tube during a strike that was going on. That was one of the first experiences that I ever had. I was in the office only 2 weeks at that time. I have had some experience obviously with the UAW.

My grandfather came out of local 600. He had been bringing me to events since I was about 5 years old. He eventually retired from local 182.

That day the sheriff's department was supposed to have exercises with the Redford Police Department. They were to be in the park. I will never forget. I drove to the police department and they said the chief was around Telegraph and Plymouth Road. My grandmother had lived in that area and I could not remember a park there. I drove down and one of the first people I saw was the UAW person out in the middle of the street who had a yellow jacket on. I think Frank Runnels, your regional director, had just been elected. In fact, he had just come in from California right at the time of the strike. I will never forget seeing that and there were probably over 200 UAW members.

They had the State police, the local Redford police, everyone lined up along the left hand turn lane that faced Standard Tube. I will never forget the police chief coming up to me. He said Robert, we are going to have to bring them through. I said what's this all about? He said well there wasn't even a court injunction at the time of the pickets or anything. We are going to have to bring them through. It is our obligation as police officers to do this.

Well, I said I know quite a few of those people that are on the other side. I also felt that they were reasonable. I said, can we go over and talk to them. He said, oh no, no, no, it is too dangerous. So I think I gave him a heart attack cause I actually went right in the middle. I saw Frank and I said can we talk about it. I happened to know the drug store owner that was right across the street. As I said my grandmother lived in that area and I spent many many summers there. I figured we could use their back room, and sure enough they had a little storage area. At that point we got the supervisor of the township, James Kelly, the chief of police, myself and Frank got the owner on the phone. I told him at that time that I thought it was highly dangerous. I will never forget what he called them.

Obviously they were scabs that they were trying to bring in, but he kept referring to them as "replacement personnel". I said to him you know you may think this is rather funny, but you are sitting on the property and your officers can see all of Plymouth Road and all the activity. If we try to bring anybody through, obviously, somebody's going to get hurt. Either someone on the pickets or one of the police officers. I said you know in the very end you are going to be nice and safe and sound and you know we are going to have this conflict and yet you are going to end up benefitting from this and no one else is. But I suggest, why don't you come out and why don't you try to negotiate a contract. And sure enough by the power of persuasion he did come out and they ended up at a tavern, I guess, about a block and a half down. They got the owner and Frank and the local president.

Unfortunately, I don't think they ever did work out the contract. That was one of the first experiences that I had coming from the job. A lot of it really had to do with my background of being close to labor. I am not embarrased by it at all. In fact, we have been able to carry it over into the sheriff's department through cooperation and not confrontation. I have over five unions that I deal with myself in the sheriff's department. We have been able to arrange a lot of cooperation and a lot of projects that we have started on. And, I can tell you a lot of accomplishments that we've had in the sheriff's department, but I am not really here to talk to you about that day.

I've become very concerned as the Congressman has about not only unions, but also the Democratic Party. You know, many people, especially the Republicans, are now starting to question if we've not done too much for unions. I see the union movement as one of the greatest forces for good in this Nation's history. It was less than a lifetime ago that you could work yourself to death, in a system that would take from those who labored everything it could and give back as little as possible. It was less than 100 years ago that children worked like slaves; that scores died in burning buildings where working people had been packed in under intolerable conditions and it was less than 100 years ago that this Nation operated largely on the assumption that the rich should get rich at the expense of the working class, even if it killed the working class. Government worked to help the rich man by making way for railroads, by providing them with land, by arranging for international trading. But less than 100 years ago Government did very little for the worker.

In the past few years, we have heard a lot about corporate profits and the good corporations do for us. I agree, corporations are needed and are obviously an integral part of our free enterprise system but what we don't hear about, what we seem some times to be forgetting, are the coal miners who choked to death to make their owners rich, working women in Southern textile mills who have been treated little better than animals, and the ugly exploitations of the early auto industry. We too soon forget the pain and injustice that were casually heaped upon millions of people.

The union movement was nothing more than an expression of basic decency and fairness. It was a movement that said that people who worked for a living because they had to—the people who fill the front rows in the shift, who work in the factory, who serve the institutions of commerce and who deliver Government services—should not be abused; rather, they should be dealt with fairly. They should be paid a decent wage, should be protected against accidents and should be provided for in their old age because they earned it. In fact, ever since Adam and Eve, human nature has needed to be coaxed into doing the right thing. And so we needed the union movement and we got it. Thank God for people like Samuel Gompers, William Green, Walter Reuther and that generation of giants for the union movement. But what they really did for the people of this State, they kept families intact, for the fairness and decency the union movement has brought to American society. I think it is right, now, to remember the union movement. But I think it is more than right. I think it is necessary today, because of the challenge that unions face.

I guess the best way to express it is to look at it ourselves. I have a copy of an interview by a woman. She was a member of the UAW and was interviewed on television about 6 months after the Reagan landslide in 1984. These were her words. "We used to be politically active. Then we got good contracts from the unions and we got a winter vacation and even a summer vacation. We got wall-to-wall carpeting and freezers and new cars. Then when new workers came on over the years, we're looking pretty good. We're in the middle class. We don't become politically active any more with the union or with Government. We believe that Reagan was the guy who would protect what we had. We were wrong. Now we have to start waking up. We didn't get what we have from Reagan. We didn't get it by walking away from the unions or from political fights. We got it from tough unions that fought for what they wanted. Now we've got to wake up. There's a movement afoot in this land not just to knock out the unions, but to knock everybody out. All unions."

I tell you brothers and sisters, I am awake. I know you are, too. And together we can wake up this State. I have a hard time believing that here in the State of Michigan, we can't continue to pursue jobs that we have to continue exporting them. I refuse to believe that this great State, that makes cars, this great State with its technology of General Motors, Ford and Chrysler—can't continue to build cars. We have the labor. Lord knows we have the labor. We have the skills. We have the capital. It is a disgrace and a failure of the worst kind to send those jobs away to foreign lands.

But people like Governor Blanchard, Congressmen like Ford and Dingell need your help. Not your neutrality. The people who discovered this great land didn't do it by being neutral. The people who built our Nation didn't do it by being neutral. The people who fought the goons and the greedy and unenlightened Government to form your unions didn't do it by being neutral. And believe me none of you are going to survive by being neutral.

You can't win this fight from the front row. You are going to have to fight as you always have, only harder. You are going to have to be heard. Ronald Reagan and even on the country level, Bill Lucas, the new right, they all ask the same question: What does labor want? We have to tell them clearly. We have to remind them that it's the same question they asked Walter Reuther nearly 50 years ago. The answer is really simple. We want jobs, job security and a decent wage. I don't think there is any complexity to the whole equation here.

But it seems that on many occasions we seem to forget our own labor and democratic heritage. A lot of my friends who are my age, ask me, why do you march in the Labor Day Parade? My answer is simple. I remember where my roots are. You see, I'm a product of labor and the working middle class. I personally feel that I am one of the luckiest people in the world to be in the position I am. I have a law degree. I am a public official and I feel very fortunate to be in this position.

My grandparents and father were immigrants to this country from Italy. They had no college education, but they had simple family desires. They were willing to work hard to obtain some of the simple pleasures of life. They were willing to make sure that their son and grandson would get a college education. But, they were only able to achieve this dream through the help of the labor movement and the Democratic Party. Could they possibly have owned a home, simple as it was, a car, and send me to college, on 25 cents an hour? Obviously they couldn't have.

What upsets me is how my generation is forgetting how our parents had to struggle. If it were not for the gains made by labor, there would be no middle class in America today.

I find it totally amazing that Ronald Reagan can speak of family, church and community, when many of the policies of his administration destroy those very institutions. We in this room are also at fault, because we have not passed on to the next generation the history of the struggle that occurred to get us to our present level.

What bothers me is how people of my generation believe in the false promises of the Republican Party and President Reagan. He truly believes only the select few can make it to a comfortable life. Labor and the Democratic Party believe everyone should be given the opportunity to make it to a comfortable life.

The same people today who support President Reagan and the economic policies never would have obtained their economic freedom today to be yuppies or middle class or whatever you want to call them if his philosophy would have been in place for the past 50 years.

I get upset with Ronald Reagan speaking on values of home, church and community. Yet, we should pause and we should remember. My generation should remember what our parents taught us and experienced. Many of the principals they taught us are inbred really by the Democratic administration especially starting with FDR.

I often speak of our parents as having taught us love. They taught us different kinds of love. They taught us love for God. We as a nation are deeply spiritual people, inbred with a powerful sense of right and wrong. I don't need Ronald Reagan to legislate morality for me. Therefore, as people (Democrats) we're passionate for justice. And because we believe in a merciful God, we are compassionate people.

Our parents and Democrats taught us love of country, this country. Our parents love of their adopted country was founded on the evidence of their own lives. America afforded them dignity. They taught us love of family. The love of parents toward their children and of children toward their parents. All of this was inbred by Democrats and Democratic institutions.

I think some times we get swept away in thinking that the Republicans, that the President does have the answer to everything. But really the Democrats have been supplying for generations.

Now really, all of us have some type of role to play. Some of our problems we discussed and some of the things you have been hearing out of sourcing. In fact we have it right here in Wayne County. One of the biggest controversies that has erupted is that Bill Lucas has attempted to bring privatization right in the Wayne County Sheriff's Department. We find it quite humorous that he actually had to deal with the unions and the unions had a contract up to 1986. What was amazing about it is that these were two of the unions he had imposed a contract and in the contracts it states there should be no subcontracting of their work. He decided that he would impose the privatization regardless of what I, the sheriff, wanted, regardless of what the unions wanted and regardless of what the contract said.

The way he wanted to save the money was to cut a $5 million budget to $1.5 million. Just with the arithmetic alone, if you can imagine cutting $3.5 million out of a $5 million budget what kind of services are going to be delivered. But, he didn't answer that question. For example, they were going to eliminate 58 jobs by saving $3.5 million. Unfortunately, in the first article anyway, the press did ask if you were to divide the $3.5 million by 58 jobs that means everybody was earning over $70,000. Regardless of what you might think is going on in the county, the employees are not paid that well. The doctors in the medical unit are not even paid $70,000 a year. It just goes to show you that the press immediately saw that they were going to save $3.5 million.

Finally, after calling the free press the savings issue was enough to attract their attention. They finally took a close look at it. They found that under the proposal, all that it really did was transfer around 10 different jobs to different locations and really didn't save any money at all.

In fact, what was so ironic is that this medical unit had been surveyed or judged by what is known as the "National Institute of Corrections" and they found that it was one of the most effective and efficient jail medical administrations in the United States. And with that, these are some of the issues that we are facing in the county.

In conclusion, I guess all of us have a role to play and some of the problems we face could be solved soon, others can be solved in time, but nothing is going to happen, nothing will move unless we start today.

Of course, there are those who prefer to dwell more on their fears than their hopes. There are those who would prefer to curse the darkness rather than light a candle. Blame the past, rather than work to share the future.

But, I think together with these opportunities, labor and the Democratic Party is on the march toward greatness for it's followers and really what we want is jobs and job security.

I would like to leave you with one final thought. It has been said that youth measures in only one direction, from the things that they are to the ideal of what things ought to be; while the elderly measure things as they are against a past that they remember. I know all of you here today will never become patient about the gap between what is and what ought to be.

Thank you. It was certainly a pleasure being here today.

GRAMM-RUDMAN AMENDMENT

HON. MICKEY LELAND

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 24, 1985

Mr. LELAND. Mr. Speaker, I would like to bring to the attention of my colleagues, three letters showing the true effects of the Gramm-Rudman balanced budget amendment. The letters are from the U.S. Catholic Conference, the Children's Foundation, and Bread for the World. They are important because they eloquently point out the unfair and prejudiced nature of the Gramm-Rudman plan, a proposal that unfairly places the burden of balancing the budget on the backs of the poor, the sick, the elderly and all needy peoples in this country.

If there is any doubt as to what the administration's true intentions are, I offer as evidence comments made yesterday by the Secretary of Defense. Mr. Weinberger stated if Gramm-Rudman were passed, he thought the President "would not feel required to make any reductions in defense * * * we can't have our defense and our security policy be a total prisoner of a rigid formula." Mr. Speaker, I say that we cannot and must not make disadvantaged Americans prisoners of the President's misguided economic policies.

I urge my colleagues to read the following letters:

U.S. CATHOLIC CONFERENCE, DEPARTMENT OF SOCIAL DEVELOPMENT AND WORLD PEACE,
Washington, DC, October 16, 1985.

DEAR REPRESENTATIVE: On behalf of the United States Catholic Conference I am writing to call your attention to the likely negative impact on the poor of the Gramm-Rudman balanced budget amendment.

As the House begins deliberations on this proposal, we urge you to give careful consideration to the far-reaching consequences a balanced budget plan may have on programs that provide basic necessities for the poor. Over the past four years, reductions in low-income programs have been deeper than the cuts in virtually any other area of the budget. Millions of families have been severely affected by these budget cuts.

The budget deficit is a massive and serious problem. We encourage you to continue to explore responsible ways to reduce the deficit. We believe, however, that additional cutting in programs for the poor is not an acceptable method of dealing with the problem. The basic needs of the poor must take precedence over other areas of the budget that are less fundamental to the protection of human dignity. Therefore, as you craft a plan to reduce the federal deficit, we urge you to exempt low-income programs (e.g., Food Stamps, Medicaid, AFDC, SSI, low-income housing) from any further cuts. We are also concerned about the potentially adverse impact of Gramm-Rudman on foreign aid programs that help the poor in the developing countries, programs which we have consistently supported.

Thank you for consideration of these views.

Sincerely yours,

Rev. J. BRYAN HEHIR.

THE CHILDREN'S FOUNDATION,
Washington, DC, October 15, 1985.

DEAR REPRESENTATIVE: The Children's Foundation is opposed to the Gramm-Rudman "Balanced Budget" amendment as the vehicle for deficit reduction. This approach disproportionately effects the poor. If such legislation is considered provisions must be enacted to protect entitlement and discretionary programs from further budget reductions.

As currently proposed H.J. Res. 372 exempts Social Security and nearly 40 percent of the defense budget. All other programs, however, are subject to automatic cost reductions. Child nutrition, Head Start and school lunches for the poor will be among those programs cut. Some programs will be eliminated entirely. Since 1981, programs benefiting low income persons have been cut by $56 billion. Further reduction in services to the poor is unconscionable.

Furthermore, the plan makes no distinction between deficits resulting from slow economic growth or tax and spending policy deficits. Economic growth influences the size of the budget deficit. During periods of slow economic growth the unemployment rate escalates and consequently tax revenues are reduced, the deficit rises. An estimated one percentage point increase in the unemployment rate would spur about a $40 billion increase in the deficit.

The Gramm-Rudman measure requires rigid adherence to deficit targets resulting in more social spending cuts, despite the fact that deficit increases may be directly related to adverse economic conditions. While the measure has an "escape clause" there is little evidence of its effectiveness. The clause extends from 14 to 30 days the time the President can issue his automatic spending reduction order. If the President chooses not to delay the order or if a compromise cannot be reached with Congressmembers the cuts automatically go into effect.

The recession provision only applies when OMB and CBO predict negative economic growth, with the GNP in decline. Since OMB and CBO have never predicted a recession, not even the recession of 1981–1982, future predictions are unlikely.

Grappling to control the deficit is a complex issue, yet I hope that in your deliberations you weigh the full impact of H.J. Res. 372.

Sincerely,

BARBARA BODE, *President.*

BREAD FOR THE WORLD,
October 14, 1985.

DEAR REPRESENTATIVE: Bread for the World is deeply concerned about the passage of the Gramm-Rudman-Hollings "Balanced Budget" amendment by the House of Representatives. We are deeply concerned for several reasons, but principally because of its implications for hungry people both in the U.S. and abroad. The amendment calls for a balanced budget by FY 1991 through mandatory spending reductions, however, approximately 50 percent of the budget would be exempt, placing a disproportionate burden on means tested entitlements and low-income discretionary programs. Programs which collectively have been reduced by $56 billion since 1981—with $34 billion of this total targeted specifically to programs serving poor people—are hardly the reason for the budget deficits we now suffer from, and will hardly contribute to the retirement of the deficit without broad programmatic elimination. The prospect of this is uncon-

scionable in a time when hunger is on the increase in the United States and around the world.

Bread for the World shares Congress' concern over the ever-increasing federal budget deficit and its impact on the domestic and international economies. However, it is grossly unfair and irresponsible to exempt almost 40 percent of the defense budget, social security for middle and upper income Americans, and tax expenditures which benefit middle and upper income taxpayers at the expense of the poor. All low-income programs including the earned income tax credit should be exempt from any "balanced budget" compromise. Those foreign assistance programs which contribute directly to hungry peoples' abilities to combat hunger and malnutrition should also be exempt.

Bread for the World hopes that you share our concerns and will fight to exempt these program areas from any deficit reduction compromise.

Sincerely,

ARTHUR SIMON,
Executive Director.

CONSTITUTIONALITY OF GRAMM-RUDMAN

HON. TRENT LOTT

OF MISSISSIPPI

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 24, 1985

Mr. LOTT. Mr. Speaker, because some Members have raised concerns about the constitutionality of the Gramm-Rudman Balanced Budget and Emergency Deficit Control Act as included in House Joint Resolution 372, I asked the American Law Division of the Congressional Research Service to prepare a constitutional analysis of the controversial provisions.

In its memorandum of October 21, 1985, the American Law Division responded that the Gramm-Rudman amendment does not violate the Constitution on any of the four grounds questioned. While others may continue to disagree, I think there are sufficient constitutional grounds for proceeding with this approach. At this point I include the full text of the American law memorandum:

CONGRESSIONAL RESEARCH SERVICE,
Washington, DC, October 21, 1985.

To: Honorable Trent Lott, Attn: Don Wolfensberger.

From: American Law Division.

Subject: Various Questions Raised by Gramm-Rudman Deficit Reduction Proposal.

This memorandum discusses four questions that you have raised regarding the validity of aspects of the so-called Gramm-Rudman deficit reduction amendment to the debt ceiling bill (H.J. Res. 372). The time frame imposed by the legislative consideration of this measure necessitates that the response be brief and that background information on the measure as a whole be omitted. Your questions are treated seriatim.

1. Is the inclusion of the Congressional Budget Office in determining deficit amounts an unconstitutional delegation of executive powers to an agent of Congress under the *Buckley* v. *Valeo* decision?

Under Gramm-Rudman, CBO and OMB are to estimate total revenues and outlays each fiscal year, determine whether any deficit exceeds the maximum deficit amount set by law by a statistically significant amount, and estimate the rate of economic growth for the year and for each quarter of the year. If they disagree on any amount, the average amounts are to be reported. These figures are then reported to the President and Congress, along with the percentage by which automatic spending increases and controllable expenditures must be reduced in order to eliminate the excess deficit. Any reductions made in such programs must be by a uniform percentage.

The Court in *Buckley* v. *Valeo*, 424 U.S. 1 (1976), held that the composition of the Federal Election Commission, which at the time included members appointed by officers of Congress, violated the Constitution's appointments clause which requires that "Officers of the United States" be either appointed by the President by and with the advice and consent of the Senate or, in the case of so-called inferior officers, appointed by the President alone, a head of a department or a court of law. Art. II, Sec. 2, cl. 2. The term "Officers of the United States" was held to have substantive meaning whose "fair import is that any appointee exercising significant authority pursuant to the laws of the United States is an 'Officer of the United States,' and must, therefore, be appointed in the manner prescribed by [sec.] 2, cl. 2, of that Article." 424 U.S. at 126. Those not appointed in accordance with Article 2 may "properly perform duties only in the aid of those functions that Congress may carry out by itself, or in an area sufficiently removed from the administration and enforcement of the public law as to permit their being performed by persons not "Officers of the United States'." 424 U.S. at 139. The Court held that while the fact finding and investigatory functions of the FEC could be performed by non-officers, the rulemaking and enforcement duties, including "determinations of eligibility for funds," must be vested in persons appointed in accordance with Article 2 of the Constitution. 424 U.S. at 140.

The functions of both CBO and OMB under this provision of Gramm-Rudman would appear to be fact finding and information gathering, functions of the type the Court in *Buckley* held could be performed by non-officers. The bulk of these functions regarding forecasts of revenues, budget outlays, and economic growth are already performed by CBO and are publicly available. See, 2 U.S.C. 602, 603(a). It would not seem contrary to the *Buckley* analysis to hinge presidential action on the statistical findings arrived at by CBO (and OMB) presumably by means of objective, traditional methodologies. Furthermore, CBO is not the only actor in the process but is a partner with OMB, an executive agency, in determining the various amounts under the proposals.

The CBO (and OMB) calculations form the standard by which the President is to apply uniform percentage cuts in affected programs. The proposal would, in effect, reference those calculations and adopt them as the standard for executive action. Such a role for CBO would seem far removed from enforcement and administration, the type of duties that the *Buckley* court held must be performed by persons appointed in accordance with Article II of the Constitution.

2. Is the delegation of sequestering authority to the President violative of the constitutional lawmaking process as per the *Chadha* decision?

The Court in *INS* v. *Chadha*, 462 U.S. 919 (1983), struck down the legislative veto as contrary to the Constitution's presentment and bicameralism requirements. It held that Congress could not take actions that are legislative in character by means short of legislation. The Court spoke to Congress' ability to make law and held that to do so it must follow the explicit commands of the Constitution governing such congressional actions.

The Court specifically addressed the argument that the executive's action (in *Chadha*, the Attorney General's decision to suspend deportation) also "made law" but did not comply with presentment and bicameralism. In rejecting the analogy between the executive's action and the legislative veto, the Court made clear that what the executive is doing is not lawmaking but rather executing a law passed by Congress. The Constitution imposes no procedural mandates on the faithful execution of the laws by the President. There may be constitutional restraints on Congress in terms of the scope of delegations to the executive. That, however, is a question of delegation doctrine not a *Chadha* question, as the Court made clear. The Court's treatment of this issue is worth extensive quotation:

To be sure, some administrative agency action—rulemaking, for example—may resemble "lawmaking." See 5 U.S.C. § 551(4), which defines an agency's "rule" as "the whole or part of an agency statement of general or particular applicability and future effect designed to implement, interpret, or prescribe law or policy. . . . " This Court has referred to agency activity as being "quasi-legislative" in character. Humphrey's Executor v. United States, 295 U.S. 602, 628 (1935). Clearly, however, "[i]n the framework of our Constitution, the President's power to see that the laws are faithfully executed refutes the idea that he is to be a lawmaker." Youngstown Sheet & Tube Co. v. Sawyer, 343 U.S. 579, 587 (1952). See Buckley v. Valeo, 424 U.S., at 123. When the Attorney General performs his duties pursuant to § 244, he does not exercise "legislative" power. See Ernst & Ernst v. Hochfelder, 425 U.S. 185, 213-214 (1976). The bicameral process is not necessary as a check on the Executive's administration of the laws because his administrative activity cannot reach beyond the limits of the statute that created it—a statute duly enacted pursuant to Art. I, §§ 1, 7. The constitutionality of the Attorney General's execution of the authority delegated to him by § 244 involves only a question of delegation doctrine. The courts, when a case or controversy arises, can always "ascertain whether the will of Congress has been obeyed," Yakus v. United States, 321 U.S. 414, 525 (1944), and can enforce adherence to statutory standards. See Youngstown Sheet & Tube Co. v. Sawyer, supra, at 585; Ethyl Corp. v. EPC, 176 U.S. App. D.C. 373, 440, 541 F.2d 1, 68 (en banc) (separate statement of Leventhal, J.), cert. denied, 426 U.S. 941 (1976); L. Jaffe, Judicial Control of Administrative Action 320 (1965). It is clear, therefore, that the Attorney General acts in his presumptively Art. II capacity when he administers the Immigration and Nationality Act. Executive action under legislatively delegated authority that might resemble "legislative" action in some respects is not subject to the approval of both Houses of Congress and the President for the reason that the Constitution does not so require. That kind of Executive action is always subject to check by the terms of the legislation that authorized it; and if that authority is exceeded it is

open to judicial review as well as the power of Congress to modify or revoke the authority entirely. A one-House veto is clearly legislative in both character and effect and is not so checked; the need for the check provided by Art. I, §§ 1,7, is therefore clear. Congress' authority to delegate portions of its power to administrative agencies provides no support for the argument that Congress can constitutionally control administration of the laws by way of the congressional veto. 462 U.S. at 953–4, n. 16.

The delegation doctrine alluded to by the Court above is the principle that to be constitutionally valid, delegations of power by the Congress to the President must contain standards and be bounded by criteria to guide executive action. Attached is a memorandum that discusses Gramm-Rudman in terms of the delegation doctrine. It concludes that the proposal—at least on its face—arguably contains sufficient standards, criteria and limitations to save it from constitutional challenge on delegation grounds.

3. Does mandating that the President's budget submission contain a specific deficit level violate the President's authority under the Constitution to make such recommendations to Congress as he deems necessary?

Article II, Section 3 of the Constitution provides that the President "shall from time to time give to the Congress Information of the State of the Union, and recommend to their consideration such Measures as he shall judge necessary and expedient." Section 3(c) of Gramm-Rudman would amend 31 U.S.C. 1105 to require that the deficit contained in the budget submitted thereunder not exceed the maximum deficit amounts set forth in the proposal.

Nothing in Gramm-Rudman prohibits the President from submitting any proposal or budget he desires. It merely requires him to submit one budget in which deficits are consistent with statutorily established ceilings. In fact, section 3(d)(2) invites the President to propose alternative ways to reduce the deficit. Of course, nothing prevents him from also recommending deficits that may exceed the statutory limits. He may recommend, but Congress need not enact.

Congress may impose mandatory duties and reporting requirements on the President. The Constitution imposes on the President the duty to faithfully execute the laws, Article II, section 3, and the Court has held that "it would be an alarming doctrine, that Congress cannot impose upon any executive officers any duty they may think proper, which is not repugnant to any rights secured and protected by the Constitution." *Kendall* v. *United States ex rel. Stokes*, 37 U.S. 524 610 (1838). See, *National Treasury Employees Union* v. *Nixon*, 492 F.2d 587 (D.C. Cir. 1974) (requirement that President implement comparability pay adjustment for federal employees or submit alternative plan subject to mandamus by federal court). The imposition of a particular reporting requirement—in this case a budget that is within certain statutory guidelines—does not, however, preclude the President from submitting other budgets or any other recommendations pursuant to his authority to "recommend to [Congress'] Consideration such measures as he shall judge necessary and expedient."

4. Do any provisions in Gramm-Rudman violate the Constitutional right of each House to determine the rules of its proceedings?

Gramm-Rudman requires that certain of its internal procedural requirements may be waived only by three-fifths vote. Sections 3(f), (g). It also would make amendments to the congressional budget process and the rules governing its consideration in Congress. The proposal explicitly recognizes, however, in Section 3(d), that the "provisions of this Act other than those relating to the activities of the executive branch, are enacted by the Congress—. . . (2) with full recognition of the constitutional right of either House to change such rules (so far as relating to such House) at any time, in the same manner, and to the same extent as in the case of any other rule of such House."

Article I, section 5, clause 2 of the Constitution empowers "each House [to] determine the rules of its proceedings . . ." This internal rulemaking authority is an inherent constitutional power. See, *INS* v. *Chadha*, 462 U.S. 919, 956 n.21 (1983). A statute or rule of a prior Congress cannot remove or limit this rulemaking power from future Congresses. See, Deschler's Precedents of the House of Representatives, chap. 5, sec. 3; Constitution, Jefferson's Manual, and Rules of the House of Representatives, H. Doc. No. 97-271, 97th Cong., 2d Sess. Sec. 58 (1983). Gramm-Rudman appears to recognize this principle. Even without the disclaimer in section 3(k), future Congresses could exercise their internal rulemaking authority to effectuate procedures at variance with those outlined in Gramm-Rudman.

Specialist in American Public Law,
American Law Division.

CONRAIL SHOULDN'T BE SOLD TO NORFOLK SOUTHERN

HON. THOMAS M. FOGLIETTA

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 24, 1985

Mr. FOGLIETTA. Mr. Speaker, I want to share with my colleagues today's editorial from the Philadelphia Inquirer. In the not too distant future, Congress will have to make a decision on the disposition of Conrail. The following editorial outlines succinctly the reasons Norfolk Southern's bid should be rejected and an independent Conrail preserved.

CONRAIL SHOULDN'T BE SOLD TO NORFOLK SOUTHERN

It has become increasingly uncertain in recent weeks whether Congress will act this year on proposals for the sale of Conrail but it now is abundantly clear that, one way or another, Transportation Secretary Elizabeth Hanford Dole's recommendation that it be sold to the Norfolk Southern Corp. should be rejected. That could be done by congressional action if necessary but more appropriately by Mrs. Dole's withdrawing her recommendation or Norfolk Southern's rescinding its purchase offer.

The Norfolk Southern proposal, embraced by Mrs. Dole in February, appeared shaky from the start. It has become a growing embarrassment with each passing month. Testimony at public hearings and authoritative analyses have demonstrated that selling Conrail to Norfolk Southern would be detrimental to the national interest and jeopardize competitive railroad-freight service in the Northeast and Midwest, where Conrail operates.

A particularly devastating blow was dealt last month by the Interstate Commerce Commission in a report to the House public works and transportation subcommittee chaired by Rep. James J. Florio (D., N.J.). The ICC concluded that acquisition of Conrail by Norfolk Southern would place in doubt the long-term viability of smaller railroads serving portions of the same territory.

The ICC's report gives added validity to earlier findings of the U.S. Railway Association (USRA), which monitors Conrail operations for Congress. It reported in July that regional railroads operating in Conrail's territory would lose substantial volumes of traffic if it were acquired by Norfolk Southern, raising questions about their ability to remain in business.

At the outset, the Justice Department ruled that a Norfolk Southern takeover would violate antitrust laws unless significant trackage was divested to smaller railroads. The subsequent ICC and USRA findings suggest that, even with divestiture, the outlook for small lines would be bleak and rail-freight customers in some areas could find themselves at the mercy of a Norfolk Southern monopoly.

Moreover, the basic rational for selling Conrail to Norfolk Southern—namely, that Conrail could not stand alone—is no longer valid. Conrail, with net income of $500 million in 1984, is now well on its way to a fifth consecutive year of profitability. USRA has informed Congress that Conrail should remain profitable at least through the remainder of the 1980s.

There also are questions about the adequacy of Norfolk Southern's bid. It could become a government giveaway considering tax benefits that would accrue. But with a sale to Norfolk Southern demonstrated to be unwise because of other factors, there is no point in haggling over price.

The proper course for Congress now is to devote its attention to options that would preserve Conrail as an independent railroad. One way to do that would be through a public offering of stock. A consortium headed, by Morgan Stanley & Co., a New York investment firm, has proposed to buy Conrail and offer most or all of the stock for sale to the public.

Congress has not yet fully explored Morgan Stanley's proposal and there are many questions to be answered. That should be the focus of congressional attention in weighing Conrail's future.

Norfolk Southern has become a distraction. It received a fair hearing on an offer that was scrutinized and found wanting. It should step aside and let Congress move on to other options.

THE MEDICAL CARE GAP IN OUR NATION'S DEFENSES

HON. JOHN T. MYERS

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 24, 1985

Mr. MYERS of Indiana. Mr. Speaker, in spite of the commendable efforts by the Reagan administration to improve our Nation's defenses, there are still serious shortcomings. One of these gaps is our shortage of medical personnel. We do not have enough such personnel available to treat our wounded in case of war. According to recent estimates, six out of every seven

wounded might not survive for lack of prompt medical attention. Thus, the cream of our regular forces could be devastated in the first 6 weeks of a war. Certainly, if war comes, the present law could be changed and the necessary number and type of medical personnel drafted to fill these gaps, but that would take too long and our Nation's young men would be dying for lack of care in the meantime. Further, such a situation would be devastating to the morale of the men at the fighting front. Such a factor could mean the difference between victory and defeat.

The Department of Defense is aware of this situation and, within the resources it can allot, is trying to remedy the situation, but it is all too clear that these efforts will not be enough. Maj. Gen. Henry Mohr, U.S. Army (retired), recently described this situation in the October issue of the American Legion magazine in an article entitled: "The Problems of Battlefield Medicine." It is his firm conviction that we need to change the law now and commence registering medical personnel as we now do young men for possible military service. This would be a bitter pill for some to swallow, but it would be an even more bitter pill to lose thousands of young Americans needlessly in a future conflict.

The article follows:

[From American Legion Magazine, October 1985]

THE PROBLEMS OF BATTLEFIELD MEDICINE

(By Maj. Gen. Henry Mohr)

Of a major conventional war started today, 6 of every 7 battlefield wounded might not survive because combat medical care needed to save their lives is not available. If we were drawn into such a war today, the Department of Defense could not provide an adequate level of medical support to our military forces. This is the situation as it was described to me by Pentagon officials in June 1985.

This is a damning indictment of persistent and dangerous deficiencies in military readiness of the United States. As early as 1978, it was known that combat medical care for the U.S. Armed Forces was critically inadequate. This was confirmed by a 1981 Government Accounting Office report to Congress. Dr. John F. Beary III, then Assistant Secretary of Defense for Health Affairs, determined that all available active and Reserve force medical resources could treat only 1 in 10 battlefield wounded in a NATO conventional war.

As recently as 1984, the same assessment was made by Dr. William Mayer, the current Assistant Secretary of Defense for Health Affairs. Mayer also warned that the wounded who are not picked up from the battlefield and not treated within 6 to 10 hours probably would not survive.

The prediction that 1 in 7 wounded men could be treated with present combat medical capabilities represents a small measure of improvement, but it certainly is not comforting for the remaining unfortunate six.

On the positive side, Mayer pointed out that adequate combat medical care in Vietnam saved about 98 percent of wounded men brought into field hospitals. This shows what can and must be done.

Joining with Mayer in working for improvements is James Webb, Assistant Secretary of Defense for Reserve Affairs. A major share of responsibility for combat medical care has been placed on the Reserve forces, with more to come. Webb has made medical readiness a top priority of the Reserve forces.

While the Reserves have repeatedly proven their competence by performance, historically they have been severely short-changed on support, mission-essential equipment and training opportunities. As a result of problems over which thay have had no control, many Reserve and Guard units are not mission-ready. Few, if any, large Reserve component medical units, such as field hospitals, have their full authorizations of wartime equipment.

Yet the capabilities of the Reserve forces to contribute broadly and economically to national defense exist and their use is being appropriately expanded. It is worth noting that a major percentage of the best medical professionals in the military are in the Reserve forces.

Adding to the effect of what could suddently become a combat health care crisis is the effect of inadequacies on America's ability to mobilize. The Selective Service Act of 1948, as amended, prohibits drafting anyone until adequate medical care is provided.

At least 45,000 doctors, nurses and health care specialists who would be required immediately for the early stages of a war are not available. Additional medical units, facilities and equipment that would be urgently needed still do not exist.

Administrative actions can establish and organize units and provide them with facilities and equipment. But this will not solve immediate needs at the outset of a war for field-trained health care specialists—from doctors and surgeons to nurses and many types of medical professionals and corpsmen.

Any consideration of registration or induction will set off a storm of protest. Yet no alternative to peacetime registration or a draft to help solve this problem has surfaced.

Interestingly, about 97 percent to 98 percent of nurses are women. Historically, women have never shirked their responsibility to this nation in time of need. This gives hope that when they understand the life and death importance of their availability now, they will respond.

In what constitutes a major national security issue, the Selective Service system lacks authority to deal with medical personnel shortages.

Missing is a reliable system to respond to a DoD call for health care personnel either before or at the moment when a crisis erupts. There are no current provisions for registration or induction of health care professionals; not even for the purpose of their identification, location, professional classifications and fitness for service—and none for the advance peacetime training that everyone going to the field should have for his own protection. Living, working and surviving in a combat field environment is vastly different from the civilian life of most health care professionals.

If a war should suddenly break out, there could be a wild scramble to try to assemble medical resources. Right now, where the trained people, facilities and equipment would come from on short notice (or none at all) is troubling to contemplate. A great many men could die, unnecessarily, as a result of this gap in U.S. military preparedness, especially if a major conventional war comes at any time in the next several years.

There may be a partial, but not necessarily popular solution in allowing qualified, practicing nurses who lack college degrees to serve in the military. Those not having college degrees are not now being accepted by the military.

The military might consider accepting qualified, practicing nurses without college degrees, electing either to commission them, or appoint them as warrant officer nurses.

This would tap an undisturbed pool of personnel in a highly critical profession, and might partially reduce the need for peacetime registration or a draft of nurses.

At the core of the medical readiness problem is a policy adopted several years ago at the urging of Congress, which has thrown the military forces out of balance. The policy was aimed at "improving the tooth-to-tail (combat-to-support) ratio" of the military forces. That policy was well intended, but in the judgment of some military experts, was carried too far.

Numerous support units, (including medical), became victims and were eliminated. "Host Nation Support" (HNS) from allied countries was said to be an answer. However, even with the existence of HNS agreements, nobody knows if the next major military operations will be in a part of the world where HNS is available. This is a major flaw in the concept since there is no agreement with any potential enemy that the next war will be fought where it is most convenient to us. Such an assumption could be overly optimistic and highly dangerous.

It simply is not known how well HNS may work under the enormous pressures and confusion of sudden major conflict. The concept never has been tested under pressure. But, allied nations will surely meet their own requirements first. Help that comes to our forces may consist of whatever they can make available—adequate or not.

Will it be said that the people of this great nation would send their sons to battle without medical care needed to save the lives of the wounded? Are the costs of providing adequate medical care for those who serve this nation too great?

Even the wish list of corrections are spread out over years—until the "early 1990s," if then.

Americans have never been content with second-rate medical care for their military forces. They are not likely to tolerate military medical care deficiencies when it is known in advance that the life or death of U.S. servicemen is likely to be at stake the moment a war breaks out.

PLEASE, MR. PRESIDENT, HELP US

HON. THOMAS A. DASCHLE

OF SOUTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 24, 1985

Mr. DASCHLE. Mr. Speaker, I would like to take this opportunity to share with my colleagues letters sent to the President from schoolchildren in my home State of South Dakota.

With the special innocence that only children can express, these letters reveal the concern that is being felt by everyone who is touched by the crisis in agriculture. They show the frustration, the desperation that farmers and their families feel. The letters show their disbelief in the administration's

lack of response to help them deal with these problems.

The children are students at the Waverly School, which is in the heart of rural South Dakota. Ninety percent of the students are farmers' children. I think that their letters shown below, speak for themselves.

LETTERS TO THE PRESIDENT

MR. PRESIDENT: I think that we should get more money for our crops. Most of our bills are too high to pay. If we spend our money trying to get our crops in our fields we will not have enough money to pay our bills. How are we supposed to take care of our farms? We need help. I would like it if you would help our farmers.

Sincerely,

JANET BUCHHOLZ,
Third Grade.

DEAR MR. PRESIDENT: The farmers need to have a good price for their cows and crops. Our small towns are dying because the farmers are losing their land. Our farmers in South Dakota need your help.

Sincerely,

JEREMY CURREY,
Second Grade.

DEAR MR. PRESIDENT: I live on the farm. I love the outdoors. Buckwheat and wheat prices are too low. We can't make any money.

We need a good farm bill that will help us.

Sincerely,

LANCE DAGEL,
Second Grade.

DEAR MR. PRESIDENT: Please give the farmers money to hold on. Money is our only hope. We don't have enough money for our bills on the farm.

Some day I want to farm our land. Please make it possible. We need your help.

Sincerely,

JOEY FEYEREYSEN,
Third Grade.

DEAR MR. PRESIDENT: Why don't you care about our farms?

We don't have enough money to buy feed for our cows. Can't you do something to raise meat prices and grain prices? Can't you help us? The farmers in South Dakota need your help soon.

Sincerely,

JUSTIN CURREY,
Third Grade.

DEAR MR. PRESIDENT: We've had enough of this!!! The milk prices are dropping, but our expenses go up up up higher. What are we supposed to do? I like living on a farm.

I like to have rabbits, cats and dogs. Help us!!

Sincerely,

NICOLE COMES,
Second Grade.

DEAR MR. PRESIDENT: I think our taxes are up too high. We don't have enough money for our pigs. Please help us. Help the other farmers too. We have had enough of this bankruptcy in our state. And we are the ones who feed you. The farmers need a better bill. Please sign the farm bill that will be coming to you soon.

Sincerely,

TRACIE STRICHERZ,
Third Grade.

DEAR MR. PRESIDENT: The milk price is too low. The farmers have to pay too much for machinery. Meat is too high in the store.

WADE RUNGE,
Second Grade.

DEAR MR. PRESIDENT: I want more money for my calves and higher milk prices if I'll still be on the farm.

Sincerely,

CALVIN MACK,
Second Grade.

DEAR MR. PRESIDENT: We don't have enough money to buy machinery. Can't you make the grain prices higher? I like living on the farm.

Sincerely,

STEVEN BUCHHOLZ,
Second Grade.

DEAR MR. PRESIDENT: We think we need more money for our cattle, better prices for our grain. Our machinery is getting worn out. We need your help. We hope this does not last for another year.

Sincerely,

FIRST GRADERS:
COVEY COMES,
CHARLES MARTINELL,
JAMES RICHTER,
JOHN STRANGE.

A TRADE DEFICIT SCALPEL

HON. NANCY L. JOHNSON

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 24, 1985

Mrs. JOHNSON. Mr. Speaker, I would like to include in the RECORD a recent editorial in the Boston Globe which praises the proposed trade policy of the New England Council, a regional business association celebrating its 60th anniversary and representing over 1,300 New England firms.

This proposal as well as the House Republican Trade Partnership Act of 1985 offers a sensible alternative to the rising tide of ill-considered trade protectionism. The council and others have put forward a proposal to strengthen U.S. rights under international trading agreements. This change requires the investment of more authority in the office of the U.S. Trade Representative to respond to such unfair trading practices as intellectual property rights violations, counterfeiting, and injurious industrial targeting.

Enactment of such a policy would be an important step toward opening foreign markets to U.S. goods while preventing illegal goods from penetrating our domestic markets. Most important, this proposal reaffirms the commitment to fairness made by the U.S. Government to American companies. As the following editorial summarizes: "Many American companies need no more help to compete than an assurance of fairness."

[From the Boston Globe, Sept. 1, 1985]

A TRADE DEFICIT SCALPEL

A towering trade deficit, likely to top $150 billion this year, has prompted a torrent of proposals in Congress that approach the problem with all the finesse of a meat ax. A regional effort, assembled by former Sen. Paul Tsongas and the New England Council, avoids the danger of rampant protectionism by sharpening a more discriminating tool, which would deal with trade grievances on a case-by-case method. It deserves the support of Congress.

The largest single source of the trade deficit is, of course, the overvalued dollar, which makes American goods less competitive with their counterparts from other countries in both foreign and domestic markets. The problem is compounded by unfair practices by other countries. These practices may make it more difficult for American companies to sell in foreign markets or may give imports an unfair advantage in the open U.S. markets.

The Tsongas-New England Council proposal, filed by Rep. Brian Donnelly (D-Mass.), gives the US trade representative the power to initiate a wide range of actions whenever unfair practices are found in foreign or domestic markets. Under existing law, such an initiative lies only with the president.

Mechanisms of this sort are appropriate to the current trade situation because they avoid across-the-board restrictions that are bound to provoke countermeasures from other countries, running the risk of widespread protectionism among the industrial nations. Their existence should prompt other countries to reevaluate their trade policies; they can be invoked if the countries fail to do so.

The timeliness of the proposal and its moderate approach was emphasized on Friday with the release of the latest US trade figures, showing the best comparative performance so far this year. The reduction of the gap to $10.5 billion during July may have reflected the first effects of a weaker dollar.

If so, it indicates that American goods are regaining their competitiveness even without excessively protectionist measures—and that any heavy-handed efforts by Congress would provoke countermeasures just when Americans are ready to expand their international markets.

The proposal is additionally important because it reaffirms American support of the broad concept of free trade by conforming to the General Agreement on Tariffs and Trade, which continues to form the framework for all world trade.

Many American businesses need no more help to compete than an assurance of fairness. The Tsongas-New England Council proposal would help provide it.

MOSCOW FEEDS A LAP-DOG FOREIGN PRESS

HON. WILLIAM F. GOODLING

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 24, 1985

Mr. GOODLING. Mr. Speaker, I rise today to express my grave concern about current practices of Western media reporting news from the Soviet Union and other Communist-bloc countries.

As David Satter's Wall Street Journal article of October 22, 1985, which I submit for the RECORD, emphasizes, the Soviet Union is a master of propaganda and disinformation. Often, new information we receive in America has been provided directly

by a fine example of the free press such as Pravda, or given our Moscow correspondents by the KGB or its agents. Mr. Satter, correspondent for the Financial Times for 6 years, further points up that most of the information from Pravda, other Soviet publications, and the KGB which Western journalists use as sources are simply quoted verbatim—without quotation marks—and no analysis is included.

Indeed, it seems that our journalists are so concerned that they not become tools of Western governments and institutions in reporting Eastern bloc news that they have gone too far the other way—and have become pawns of the Soviet propaganda machine. I cannot condone journalists who are eager to uncover crime, corruption and injustice in our own country, yet are seemingly blind to such incidences in the Soviet Union, let alone seeking them out.

It is understandable that Western journalists wish to find well placed sources for news stories everywhere. However, the same questioning, probing and analysis of what is said which all reporters apply to our own politicians and officials, just does not happen when interviewing their Soviet counterparts. I for one find this hypocritical, because of the double standard applied; and reprehensible, because our media is serving to enhance Soviet propaganda goals in the Western World.

[From the Wall Street Journal, Oct. 22, 1985]

MOSCOW FEEDS A LAP-DOG FOREIGN PRESS

(By David Satter)

As next month's summit meeting in Geneva nears, the success of the Soviets' effort to convince Americans that they are peaceful, reasonable and, in general, "just like us" will depend in part on the analytical abilities of Western correspondents.

The Soviet Union is a difficult country to report on because it is not a country "like any other," but rather one based on an ideology that is a complete reinterpretation of given reality.

Every Soviet political position, whether it be that Korean airliner 007 was a "spy plane," that the invasion of Afghanistan was "fraternal help" or that the U.S. Strategic Defense Initiative is a "threat to peace," is justified not in terms of empirical objectivity but on the basis of this ideology, which claims to be a "perfect science" and insists that "the truth" is whatever the Soviet leaders say it is.

The Soviet authorities understand that concessions to their view of reality weaken an adversary's ability to insist on the absolute value of anything. This is why the effort to induce the world to take their ideological lying literally is not just a question of prestige for the Soviet leaders but also a matter of fundamental political strategy.

DEAFENING ECHO CHAMBER

Inside the Soviet Union, indoctrination depends on repetition. Once a specific propaganda position has been decided on, the Soviet media become a deafening echo chamber with official lies repeated in every newspaper, radio broadcast and television news program, as well as in every official statement or speech by a Soviet leader.

In the case of foreigners, however, the Soviet leaders must communicate through the Western media, which is why they attach so much importance to the manipulation of Western correspondents.

The Soviet authorities do not expect Western journalists to believe Soviet propaganda, but only to repeat it uncritically, without any effort to analyze what it means, so that, over time, the Soviet Union's ideological lying and officially sanctioned misuse of language, enhanced by the credibility of important American publications, begin to have the same numbing effect on Westerners as on Soviet citizens.

In his new book, "Reluctant Farewell," Andrew Nagorski, a former Moscow correspondent for Newsweek, analyzes the role of Moscow correspondents. He quotes an unidentified Associated Press correspondent as saying that 90% of stories filed from Moscow by the AP were simple paraphrases of articles from the Soviet newspapers and the Soviet news agency, Tass.

In my experience, the same figure applied to the output of our Western news organizations as well. Even the small percentage of stories that are not taken directly from the Soviet press are largely based on Soviet official information and therefore show the imprint of the Soviet Union's deluded view of reality.

Year after year, for example, Western correspondents who travel outside of Moscow under the auspices of the Soviet foreign ministry or the Soviet press agency, Novosti, are taken on the same factory tours, shown the same collective farms, and treated to the same programmed answers. The result is a spate of identical, meaningless stories, which reappear in the Western press at two- or three-year intervals.

The contrast between the reporting on real events from most countries and the sterile summaries of Pravda and Tass from the Soviet Union may lead many people to think that for Moscow correspondents, the mechanical repetition of Soviet propaganda is the only type of reporting that is possible. This not true. There are many Soviet citizens who are ready to speak honestly to Western journalists. The problem is that Western journalists are often neither willing nor able to take advantage of the opportunities that exist.

American publications often serve, for many reasons, as transmission belts for Soviet disinformation. In the first place, faced with a country that requires an exceptional effort of analysis in order to be understood, Western publications traditionally send people who are completely unqualified. There were times during my tenure in Moscow when the percentage of American correspondents who could not speak Russian reached 90%. This meant that Andrei Sakharov, for example, was frequently interviewed for United Press International by the agency's Soviet translators, who were provided by the KGB. Time magazine sent its KGB-provided Soviet translator to interview Soviet citizens as an "American correspondent." It was common for non-Russian-speaking correspondents to interview their KGB-provided maids to get the reaction of the Soviet "man in the street."

Besides an inability to speak Russian, Western correspondents in Moscow often demonstrate the type of heedless careerism that makes them susceptible to Soviet manipulation.

Even though all Soviet political positions are stated in Pravda and no Soviet official can offer anything except what has been printed in Pravda, the Soviet authorities have achieved considerable success in inducing correspondents to bargain for "high-level access" by demonstrating their conformity. The result is that Moscow correspondents, priding themselves on their "sources," begin to identify with them, as they would in the U.S., and frequently are ready to function as conduits for disinformation while treating those brave Soviet citizens who try to speak to them honestly with barely disguised contempt.

The attitude of many correspondents was well expressed by Nick Daniloff, the Moscow correspondent of U.S. News and World Report, in a recent interview in the Washington Journalism Review. Mr. Daniloff was quoted as saying: "I don't consort with dissidents. The magazine considers them a passing phenomenon of little interest. In a political sense, they don't have any influence—and they are perishing."

In fact, in the Soviet totalitarian contest, a "dissident" is anyone ready to meet with foreign correspondent without lying to him. And far for "perishing," there are hundreds of such people still at liberty in Moscow who are ready to take risks to help correspondents gather truthful information about the real state of Soviet society. Nonetheless, their bravery is of no use if it is not met with bravery on the part of correspondents who feel some responsibility to learn the truth about the nature of the country to which they are accredited. Unfortunately, this is almost never the case.

As the result of long experience, Soviet officials have been able to turn the manipulation of Western correspondents into something approaching a science.

The Soviets know the requirements of different types of correspondents. Wire-service reporters, for example, can be rewarded with information five minutes before their competition. A newspaper correspondent can be sure of having a Soviet official at dinner with his editor, thereby demonstrating his "access." Particularly cooperative journalists can be rewarded with on-the-record interviews in which officials repeat the contents of Pravda. The most cooperative correspondents can even hope for an interview with the Soviet leader, in which he repeats the contents of Pravda.

The favoritism costs the Soviet authorities nothing and it means nothing to the Western reading public, but it is a competitive advantage for which reporters are often, willing to pay with their integrity.

At the same time, every Western journalist in the Soviet Union is aware that if he refuses to cooperate, he may be the target of provocations. He may not be confident that in the face of an accusation by the Soviet government of "hooliganism," "espionage" or "homosexuality," his newspaper would be ready to believe him and not the Soviets. Being honest means taking a risk.

NO RELATIONSHIP TO REALITY

As Americans prepare for the summit meeting, it is important to review not only our knowledge but also the sources of our knowledge. One of the reasons that Americans are often confused about the Soviet Union is that Soviet manipulation of diplomats, who senselessly limit their contacts, and Sovietologists, who depend on the Soviet authorities for their visas, has given rise to a conventional wisdom about the "reasonableness" of the Soviet Union that bears no relationship to reality.

Behind the facade of a country that desires nothing so much as peace and "good relations" with the West is an aggressive police state waiting to be discovered. This is why it is essential that before making policy

decision based on our impressions of the Soviet Union's intentions, we bear in mind that the Soviet system is organized to create illusions and begin to give the most serious thought to the entire process through were formed.

STUDENTS WITH A PURPOSE

HON. PAT WILLIAMS

OF MONTANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 24, 1985

Mr. WILLIAMS. Mr. Speaker, students from Eastern Montana College have sent President Reagan the following letter:

EASTERN MONTANA COLLEGE,
Billings, MT, May 15, 1985.

Hon. President RONALD REAGAN,
Pennsylvania Avenue,
Washington, DC.

DEAR PRESIDENT REAGAN: We would like to solicit your support in our opposition to the proposed Higher Education cut-backs. We have already lodged a protest with the Montana Congressional Delegation and we have their support.

The majority of the students that will be affected by the proposed Federal Higher Education Act are single; one-parent families; nonminority; and minority students. Resources that some of these students have found to supplement their education are being threatened by the cut-backs.

On the Eastern Montana Campus, approximately sixty-four per cent of the independent students are under the poverty level (less than $8,000.00 annually); dependent students under the criteria of poverty are under twenty-four thousand dollars annual income, with percentages of sixty-seven. Your cut-backs will affect this campus when the independent students no longer have resources.

The cut-backs that are of major concern and affect our attempts of completing our education are the Guaranteed Student Loans; Campus Safe; Trio Project Funds; Pell Grants; National Direct Student Loans; Supplementary Educational Opportunity Grants; Welfare Daycare Service's; and others.

We ask your cooperation in remedying these proposed cut-backs. Sir, if these are allowed to be voted on in the House and Senate, or accepted as they presently are proposed, you will see a new generation of illiterates prevail throughout this great Nation.

Further, if these Federal cut-backs in Education are allowed to pass, the American taxpayers of this country will feel the affects in their future tax contributions.

We respectfully need your reconsiderations of the Educational Appropriation Bill as it presently is proposed.

Respectfully,

STUDENTS NEEDING THEIR EDUCATION FOR THE NATION'S FUTURE.

A NATION GRIPPED BY POLITICS OF CONTRABAND

HON. DAN BURTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 24, 1985

Mr. BURTON of Indiana. Mr. Speaker, Narco-Guerrilla warfare is one of the most insidious types of warfare facing us today.

Not only is it spreading at an alarming rate, but the growth is occuring in our own backyard. Countries in Central and South America are nearly under siege by the drug lords, with no end in sight. The "business" is too profitable, and the tacit consent and approval by the Soviets is a major contributing factor.

This issue, combined with the numerous low-intensity wars currently going on in Central America create a serious problem for the United States. Unless we learn how to address this issue, not only will our children be affected, but the Nation's survival will be in question as well.

F. Andy Messing Jr.'s article in the Washington Times titled, "Peru: A Nation Gripped by Politics and Contraband" presents an excellent analysis of this expanding problem. He speaks with firsthand knowledge and draws insightful and alarming conclusions.

I urge my colleagues to read the article and think about the issues Mr. Messing raises.

The article follows:

[From the Washington Times, Sept. 3, 1985]

PERU A NATION GRIPPED BY POLITICS OF CONTRABAND

(By F. Andy Messing, Jr.)

In Peru, an unpayable foreign debt, liberation theology, Sendero Luminoso (the Shining Path), the coalition of 10 leftist parties forming the "United Left," and even the heavy Soviet presence don't constitute the major threat to the democratic efforts of Peru or to the strategic interests of the United States. The real problem is drugs.

While the other problems are grave, they can be dealt with by political-socio-economic methods developed over the past two decades. However, the drug problem, as integrated into the "narco-guerrilla war," is throwing countries like Peru into almost unrecognizable anarchy.

Even democratic elections can not uncover the insidious infrastructure within the government, making it impossible to deal with the network out of government. A current popular song, Smuggler's Blues, refers to it as "the politics of contraband," while State Department officials call it "shared sovereignty."

Whatever it is called, its primary and secondary effects abound. While drug action destabilizes all sorts of formal lines of authority, the money involved finances the chaos. The lure of easy money, in a society where poverty is rampant and class lines are drawn, makes drugs a new and strong aspect of that society. Whole new dynamics emerge.

For instance, the Peruvian army is expanding, ostensibly to deal with the growing Shining Path guerrilla efforts. As the army increases, and it becomes its own political force, it exerts its influence on domestic events and even the drug markets. One former Peruvian government official said both sides are being fueled by drug money, and both sides are getting more dangerous. As one U.S. drug enforcement agent put it, "they are giving each other an excuse to grow."

As Shining Path's terrorist activities continue, authorities have lost sight of how to deal with them without harming the innocent. Accordingly, Shining Path makes even the other hard leftists and extreme measures look palatable. The shifts of power within the United Left will only be changes in faces.

While Alan Garcia, inaugurated as president July 28, may be committed personally to productive change, the drug network will stymie it, since chaos is to the network's benefit.

Furthermore, as the media doesn't focus on drugs as the salient issue, they wind up being manipulated by both elements, and the drug lords of the area get richer. One U.S. government official told of a $2.5 billion loan offer to one South American country by a single drug lord.

Besides the drug lords, the winners in the international set will be the Soviets, as they have no qualms about starting or satelliting onto amoral activities for their own purposes. There already are a large Soviet Embassy staff, an estimated 150 Soviet military advisers, and a huge fishing fleet of 40,000. This activity is increasing, lending excellent cover for extensive KGB activity and surveillance in that area of the world.

Ironically, even the Soviet efforts will be held in check at some points by the drug lords as a weird competition develops.

The Reagan administration is contemplating a $29.1 million military aid program for Peru—in order to buy back Soviet influence or at least put it in check. While Soviet influence is declining in some levels of the Peruvian military, it is still apparent, with dozens of Mi-8 and Mi-24 helicopters on the runway at Lima. In Ayachucho, Soviet BMP vehicles and AK-47 assault rifles are everywhere.

U.S. military aid can produce good results in this type of environment, but only with a thoughtful approach. Despite the conditions Congress is seeking on judicial reform, accounting for the disappeared, and tighter control of authorities, it would be still more positive if any military aid sent be in complete coordination with the U.S. Drug Enforcement Agency, in-country. This would provide more leverage for combating drugs and for controlling misuse by errant factions of the government.

Narco-guerrilla warfare is spreading—Colombia, Mexico, Nicaragua, and now countries in Africa. Unless the United States learns to deal with it, not only will our children be subverted, but our country's survival will be in question.

ARGENTINA AND PRESIDENT ALFONSIN

HON. ROBERT GARCIA

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 24, 1985

Mr. GARCIA. Mr. Speaker, the Christian Science Monitor published an op-ed piece on October 22 by Argentine economist Martin Redrado on the success of Raul Alfonsin as President of Argentina.

Mr. Redrado has given an excellent analysis of the difficulties that President Alfonsin has had to face, and that he must still face in order to get Argentina back on its feet. I commend Mr. Redrado's article to my colleagues.

The article follows:

[From the Christian Science Monitor, Oct. 22, 1985]

ARGENTINA'S ALFONSÍN

(By Martin Redrado)

Earlier this year Argentine President Raul Alfonsín initiated a comprehensive new economic stabilization plan. Since then inflation has been lowered to 3 percent monthly. Although the country may well be sliding into recesion, with real wages falling, a great majority of the Argentine people think that Mr. Alfonsín is doing what had to be done to put the nation on a sound economic footing. Pools show a relatively optimistic mood within the country. The upshot: President Alfonsín is enjoying widespread popularity.

In this still incipient democracy, Mr. Alfonsín appears to be a unique alternative to the political leadership of recent years. He is seeking to upgrade the nation's economy. He has allowed the civil courts to try the top nine officials of the prior military regime. He is trying to professionalize the military forces.

How long will the current public enthusiasm last? Many factors contribute to support the assumption that it will last at least until the end of the year. First, Alfonsín's majority Radical Party is facing a fragmented Peronist opposition which lacks the requisite leadership and innovative solutions for dealing with Argentina's difficult economic challenges. The Radicals appear likely to win the Nov. 3 elections, expanding their majority in the House. Second, wages and prices will remain frozen until the elections are over, thus maintaining—so far as the public is concerned—a sense of economic stability. Third, the military officers are likely to be convicted before the end of the year.

Granted that the current political and economic setting promises some stability—which Argentina has needed—what about the long haul, the national setting after the beginning of next year? Is the present economic strategy sustainable?

Unfortunately, there are no easy answers to such questions. The new stabilization plan, set up in June, was based on three principles: reduce the fiscal deficit from 13.1 percent to 2.5 percent of the GNP, freeze wages and prices, and establish a new currency, the austral.

Still, structural problems continue to trouble the Argentine economy. The nation's high tax burden, for example, needs to be reduced. This could be achieved by selling many of the 524 state-owned enterprises, most of which run deficits. Mainly privileged monopolies, these corporations control more than 50 percent of the country's gross national product. The financial needs of these state enterprises lead to a crowding out of private investment. Private investment has been diminishing dramatically in recent years. The government has lowered its expenditures by reducing the real wages of the 2 million state employees and also by dampening public investment. But these actions do not reflect a fundamental reform of the relationship between the state sector of the economy and the private sector.

It must also be noted that the economic reform plan announced this past June includes a heavy anti-export bias because import and export duties are being used to finance the public sector.

What all this quickly suggests is that Mr. Alfonsin faces serious challenges at the beginning of next year. That said, it is evident that a slow process of trial and error is taking place in Argentina. When President Alfonsin was first inaugurated, in December 1983, his public statements asserted that a better distribution of wealth would solve Argentina's most challenging economic problems. He also spoke about imperialism and how the interests of the industrialized "North" were squeezing developing countries through the repayment of external debt.

Now he has realized that in order to distribute wealth, the country needs to grow. This can only be done through private investment, either national or foreign. Alfonsin, and his key economic officials are learning that economic reality has little to do with good intentions.

But most important, the country as a whole is understanding that Argentina's most pressing problems are not coming from abroad—and that characteristics of competition, creativity, and entrepreneurialism must all be tapped to build for a better Argentine future.

OPPOSITION TO UNFAIR MANDATORY MEDICARE PARTICIPATION BY TEACHERS

HON. CARROLL HUBBARD, JR.

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 24, 1985

Mr. HUBBARD. Mr. Speaker, I would like to share with my colleagues the recent excellent letter I received from two fellow Kentuckians, Charles and Elizabeth Hartley of Shepherdsville, KY, who are among the thousands of teachers in Kentucky who have contacted me in opposition to proposals that will mandate their participation in Medicare and the Social Security system.

Charles and Elizabeth Hartley have expressed well their views about requiring Social Security and Medicare participation by teachers, especially in light of the fact that Kentucky teachers and those in other States already have their own State retirement programs.

I urge my colleagues to consider their views about these important matters. The letter to me from Charles and Elizabeth Hartley follows:

SEPTEMBER 3, 1985.

Representative CARROLL HUBBARD,
Rayburn House Office Building, Washington, DC.

DEAR CONGRESSMAN HUBBARD: It has come to our attention that the compromise budget resolution adopted by both houses of Congress on August 1 contains language that would, if passed into law, require public school teachers in thirteen states including Kentucky to begin contributing to mandatory Medicare coverage. Further, it would require all teacheres hired in those states after January 1, 1986 to participate in the Social Security system.

We have no objection to Medicare coverage deductions for employees who plan to benefit from Medicare in the future. We do question the fairness of mandatory participation of all employees. Further, we wonder if this effort by Congress to reduce the budget deficit is not short-sighted. How much will this end up costing in the long run?

We do object strenuously to mandatory participation in the Social Security system for any Kentucky school teacher. We have both taught in the public schools of Kentucky for more than twenty years. As such, we would not be directly affected by this proposal. However, we object to it for two reasons.

First, the teachers hired after January 1, 1986 and their employers would be required to contribute to both the Social Security system and the Kentucky Teachers' Retirement System. The immediate financial burden would be almost prohibitive.

Second, the long term effects of this proposal on the Kentucky Teachers' Retirement System would almost certainly be drastic. The system would have to be restructured to alleviate the financial burden of those required to participate in both systems. At the very least this would jeopardize the long term funding of benefits, our benefits for which we have been paying for twenty years. At the worst, it would cut off new participants in the system and ultimately destroy it.

Our retirement system was created at a time when the Federal government would not allow public employees to participate under Social Security. It operates on an actuarial and financially sound basis. Our contributions are invested and placed in reserve to pay future claims. In short, we pay our way. Must teachers now be deprived of their own system in order to help bail out Social Security?

And what will be the ultimate effect? Will the Social Security system be any better able to provide benefits for teachers than their own systems? Will Social Security be any sounder financially? We think not.

The truth is that this proposal will merely "rob Peter to pay Paul." And in the long run neither Peter nor Paul will be treated justly.

While you are not our Representative, Congressman Hubbard, you do represent many of our fellow teachers and their families. Please use your considerable influence in the House of Representatives to see that this short-sighted proposal never becomes law.

Respectfully,

CHARLES and ELIZABETH HARTLEY.

EXEMPT RURAL WATER SYSTEMS FACILITIES

HON. GLENN ENGLISH

OF OKLAHOMA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 24, 1985

Mr. ENGLISH. Mr. Speaker, today I am introducing legislation to exempt rural water systems facilities assisted under the Consolidated Farm and Rural Development Act as amended from certain right-of-way rental payments under the Federal Land Policy and Management Act of 1976.

This legislation would exempt small nonprofit water systems, which are organized for public benefit, from easement fees for

the right-of-way across Federal land. These costs are proving themselves prohibitive to several rural water systems in Oklahoma and, no doubt, in other States, too. Much of this Federal land is U.S. forestry land. The Forestry Service incurs no expense regarding the location of rural water lines on forestry property, and a right-of-way fee ought not be assessed. Rural electric cooperatives currently receive the exemption which this legislation provides for rural water systems.

Current economic conditions throughout rural America are severely depressed. It is unnecessary to require rural water systems and their users to carry this additional burden of financing right-of-way easement fees. This legislation allows the rural systems to use funds, which they would otherwise have to pay toward the easement fees, to provide the water services which are so vital to rural residents. The text of this legislation follows:

H.R. 3617

A bill to exempt rural water systems facilities assisted under the Consolidated Farm and Rural Development Act as amended from certain right-of-way rental payments under the Federal Land Policy and Management Act of 1976

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Rural Water Right-of-Way Policy Act of 1985."

SEC. 2. Subsection 504(g) of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1764) is amended by inserting the following sentence at the end of the subsection: "Rights-of-way shall be granted, issued, or renewed, without rental fees, for rural water and sewer facilities financed pursuant to the Consoldiated Farm and Rural Development Act as amended, or any extension from such facilities: *Provided,* That nothing in this sentence shall be construed to affect the authority of the Secretary granting, issuing, or renewing the right-of-way to require reimbursement of reasonable administrative and other costs pursuant to the second sentence of this subsection.".

CHINA-IRAN NUCLEAR LINK IS REPORTED

HON. HOWARD WOLPE

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 24, 1985

Mr. WOLPE. Mr. Speaker, I would like to urge all my colleagues to take a close look at the following article which appeared in yesterday's Washington Post. Since the administration first initialed the agreement for nuclear cooperation with the Chinese in April 1984, many of us have raised questions about the highly dubious track record of the Chinese in the area of nuclear proliferation. Links between China and the Pakistani nuclear program have been widely reported and allegations of Chinese nuclear exports to South Africa and Argentina are frequently heard. These questions turned into very serious concerns when we finally had a chance to examine the text of the agreement, which was submitted to Congress last July, because of the ambiguous and oddly vague language of the document. Such concerns were treated lightly by the State Department, and we were assured that these persistent reports of Chinese proliferation all involved events long past and that the Chinese have renounced these past transgressions.

Now we learn that just this past June, China may have discussed the possibility of exporting sensitive nuclear technology to Iran and may be continuing unsafeguarded nuclear exports to several other countries. Is this reassuring evidence of China's new stance on proliferation? It is important to keep in mind that until just last year, the People's Republic of China had a position of public support for nuclear proliferation, so these reports and allegations should not be casually dismissed.

I do not think that Congress can afford to play a passive role in this affair. Can you imagine what it would mean if we were suddenly faced with a nuclear-armed Iran? The fact is that there is much more at stake in this agreement than simply short-term economic or political gains. The insidious threat posed by nuclear proliferation is one of the most fundamental and least recognized threats to our Nation's security. We must start today to take this threat seriously, before we find that it is just too late. Congressman FEIGHAN, of Ohio, and I have introduced legislation, H.R. 3537, the Sino-American Nuclear Verification Act of 1985, which seeks to address the deficiencies in the United States-China agreement by requiring Presidential certification of China's nonproliferation and nuclear safeguard policies before any export licenses can be granted under the agreement. Frankly, I believe that this agreement is so flawed that it does not even comply with the formal requirements of U.S. nonproliferation laws. Under the procedures set out in law, this pact should be withdrawn and resubmitted with a waiver from the requirements of the Atomic Energy Act of 1954. Short of that, however, I think that H.R. 3537 is a prudent and responsible measure, which is all the more important in light of these recent revelations.

The article follows:

[From the Washington Post, Oct. 23, 1985]

CHINA-IRAN NUCLEAR LINK IS REPORTED

(By Patrick E. Tyler and Joanne Omang)

The Reagan administration has received reliable intelligence reports that China suggested in June that it might provide Iran with sensitive nuclear technology after Peking signed a 30-year atomic power agreement with the United States, according to well-placed sources in the U.S. intelligence community.

These reports from Peking were shared in a closed briefing of the Senate Foreign Relations Committee earlier this month at the insistence of Sen. Jesse Helms (R-N.C.).

Along with other intelligence reports about Peking's continuing nuclear exports to Argentina and South Africa, the disclosure about Iran subsequently triggered an allegation Monday by Sen. Alan Cranston (D-Calif.) that the Reagan administration has "systematically withheld, suppressed and covered up information known virtually throughout the executive branch" about Chinese violations of nonproliferation guarantees.

Cranston's charges that the Chinese shared nuclear technology with what he termed five "nuclear outlaw" nations—Brazil, Argentina, Pakistan, South Africa and Iran—are the latest hitch in the U.S.-China nuclear agreement signed by President Reagan in April 1984. The pact would allow U.S. nuclear contractors to supply reactor components and other technology to Peking.

Because of widespread criticism, however, the agreement was not submitted to Congress until last July while the administration sought additional Chinese nonproliferation assurances. Unless rejected by Congress, the pact automatically takes effect in January.

After months of agitation from senators seeking access to current intelligence on China's nuclear exports, the issue came to a head on Oct. 8. The Central Intelligence Agency at that time refused to brief the Senate Foreign Relations panel about Chinese nuclear proliferation, and committee members reportedly clashed sharply at the hearing with Richard T. Kennedy, the State Department official in charge of nuclear cooperation with China.

The department yesterday "categorically denied" withholding information from the Senate but sources on Capitol Hill yesterday indicated that some senators were not persuaded.

One well-placed source said CIA sensitivity about sharing information with the Senate stemmed from detailed disclosure in a report Sept. 23 by columnists Jack Anderson and Dale Van Atta of the CIA's evidence that China helped Pakistan build a nuclear bomb.

"We have a very serious source problem in Peking," one intelligence official warned, adding that the administration would rather risk angering some senators than compromise intelligence capabilities that have allowed close monitoring of China's nuclear program.

The administration defended the nuclear agreement yesterday as Vice President Bush, just returned from a six-day trip to China, said, "We wouldn't enter into any agreement that would cause an increase in the proliferation of nuclear weapons."

Critics charge that the administration made the pact to score a foreign policy success for Reagan despite serious Pentagon, CIA and congressional concern about whether China has aided nuclear programs of nations expressing interest in developing such weapons.

Intelligence officials said yesterday that the CIA has a well-documented case that China helped design Pakistan's first nuclear weapons, made of nuclear components and reactor technology acquired covertly over a decade.

In a Senate speech Monday, Cranston said, "My information is that China has either engaged in serious nuclear trade negotiations with, or actually has continued a series of nuclear exports to, each and every one of these five 'nuclear outlaw' nations, subsequent to Chinese discussions with Reagan administration officials on the importance of curbing such trouble-some exports.

"China has, in the recent past, engaged in the most egregious effort in history to export nuclear bombmaking know-how," the senator added, referring specifically to Peking's assistance to Pakistan.

Regarding Iran, Cranston said, "China has not shown, in its discussions of nuclear commerce" with Iranian parliament Speaker Ali Akbar Hashemi Rafsanjani ". . . anywhere near the type of prudence we would expect."

Rafsanjani met with senior Chinese officials in Peking in late June. One well-placed official said yesterday that some of the apprehension about Chinese assurances on nuclear issues stems from U.S. problems with Chinese assurances on other issues.

For instance, this official said China asserts that it does not sell conventional arms to Iran, which is at war with Iraq, although U.S. intelligence has ample evidence that it does.

Cranston's reference to wide circulation of the intelligence reports in the executive branch dealt with disclosure in the top secret National Intelligence Daily of the China-Iran discussions.

That occurred after the visit here this summer of Chinese President Li Xiannian, who joined Reagan in signing the nuclear-power pact. The daily intelligence report is circulated to about 200 administration officials.

LATIN AMERICAN PARLIAMENTARIANS CONDEMN CHILEAN DICTATORSHIP

HON. MICHAEL D. BARNES

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 24, 1985

Mr. BARNES. Mr. Speaker, last week legislators from countries throughout the Western Hemisphere—representing many ideological leanings—came together for the second special meeting of the Latin American Parliament. The meeting was called to analyze the foreign debt of the region from a political standpoint.

In attendance were more than 100 lawmakers from the hemisphere, including a group of former Chilean parliamentarians who lost their positions 12 years ago as a result of the military coup by General Augusto Pinochet. The Chileans participated as special guests of honor with the right to voice opinions and to cast votes.

During the meeting, the Latin American Parliament issued a statement "strongly" condemning the Chilean military government and resolved to send a delegation to that country "to express its support for solidarity with the political, social and religious organizations seeking to defend human rights and reinstate the democratic system." At the same time, the document accused the government of General Pinochet of "state terrorism" including "kidnapings, disappearances, assassinations, tortures, and weakening of opposition sectors." It went on to condemn strongly "the Chilean military dictatorship because it undermines the universal democratic conscience."

A summary of the statement, which appeared on October 16 in the Foreign Broadcast Information Service, follows:

STATEMENT CONDEMNS CHILEAN REGIME

MONTEVIDEO, October 12—The Latin American Parliament "strongly" condemned the Chilean military Government today and resolved to send a delegation to that country to express its solidarity with the organizations struggling "to reinstate the democratic system." In a statement approved at the extraordinary assembly taking place in Montevideo, the regional forum expressed its "ethical and political duty" to redouble its "efforts to definitively liberate the region from the dramatic experience of military dictatorships."

The document emphasized "the increased human rights violations in Chile" in the wake of "the fierce repression by that country's dictatorship, exercised systematically as the only response to the heroic efforts of the peoples." At the same time, it accused the government of Augusto Pinochet of increasing the "procedures of state terrorism" such as "kidnappings, disappearances, assassinations, tortures, and weakening of opposition sectors." The resolution condemned "strongly the Chilean military dictatorship because it undermines the universal democratic conscience" and expressed solidarity "with the increasing strugglers" of the population "to end the tyranny." It also decided to designate a delegation of the Latin American Parliament "to visit Chile" and "express its support for solidarity with the political, social, and religious organizations seeking to defend human rights and reinstate the democratic system."

THE CONGRESSIONAL GOLD MEDAL AND LEON KLINGHOFFER

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 24, 1985

Mr. BIAGGI. Mr. Speaker, I rise today to announce my cosponsorship of a joint resolution authored by my good friend the distinguished Senator from New York [Mr. D'AMATO] to require the awarding of a Congressional Gold Medal to the widow of Leon Klinghoffer.

I support this resolution and wish to commend Senator D'AMATO for his initiative in sponsoring it. It is unfortunate that there has been some misunderstanding about the precise award proposed for the memory of Leon Klinghoffer by Senator D'AMATO. Press accounts indicated that he was proposing a Congressional Medal of Honor. The Senator had always intended and only proposed it be the Congressional Gold Medal for that is the award that can and has been awarded to civilians to honor significant events, great achievements, and symbols of the American spirit. Leon Klinghoffer paid the supreme sacrifice, the giving of his life as an innocent victim of international terrorism. The Congressional Gold Medal has been awarded 116 times in its history. One of the honorees was our late distinguished colleague Leo J. Ryan, another innocent victim of violence.

The American public was justifiably outraged over the hijacking of the *Achille Lauro* cruise ship. The American public applauded the President's decisiveness which led to the apprehension of the four terrorists. We as a nation and people mourn the death of Leon Klinghoffer and extend our condolences to his widow. Yet we in Congress in order to do something meaningful in his honor should cosponsor the joint resolution authored by Senator D'AMATO and our colleague TED WEISS. I urge you to do so.

ELIMINATING STATE-TAX DEDUCTIBILITY IS A BIG, BAD REVENUE RAISER

HON. FRANK HORTON

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 24, 1985

Mr. HORTON. Mr. Speaker, over the past several months, we have heard from many of our colleagues, representing districts across the Nation, who oppose repeal or restriction of the deduction for State and local taxes. The reasons for this outcry of opposition include fairness, impact on education and other Government services, and the fact that the prohibition on "double taxation" has been a central tenet of our tax policy since the days of our Founding Fathers.

Recently, an editorial came across my desk which discusses the policy implications of repeal or restriction of this deduction. Although it targets the administration's proposal, the arguments hold true for the proposal embodied in the staff recommendations of the House Ways and Means Committee.

I ask unanimous consent that this editorial be included in the RECORD. I hope you will review it and urge you to contact members of the Ways and Means Committee to express your opposition to any attempt to repeal or restrict this deduction.

The editorial follows:

[From the IRET Op Ed, Sept. 23, 1985]

ELIMINATING STATE-TAX DEDUCTIBILITY IS A BIG, BAD REVENUE RAISER

(By John B. Egger)

One of the worst ideas in the Administration's tax-reform plan is the elimination of the deductibility of state and local taxes from federally taxable income. Unable to make a defensible case that the state taxes we pay should be in the federal tax base, the Administration falls back on sheepish apologies, semantic tricks, and a poorly-reasoned list of "winners and losers." Its case is unconvincing.

The apologies are familiar. "Well, it wouldn't hurt very many taxpayers," just the third who itemize. This argument could be better used to triple taxes on left-handed redheads. Bad tax policy isn't made good by harming a minority.

"Besides, we need the money." Something is very wrong with the Administration's case when this is its ultimate defense. It could with equal validity justify any absurd tax. Sound policy doesn't justify taxing a payment flow just because it's large.

Semantic tricks and biased language make life difficult for one's opponents. Deductibility is called "federal aid" that affords "unfair subsidies" and creates "interference," resulting in an "overproduction" and "underpricing" of state and local government services. But without the premise that

deductibility is bad, this is like saying that I subsidize your driving by not stealing your Toyota, and interfere with your evening by not coming over to watch TV. Biased language can seduce the most careful analyst. Like most (not all) seductions, this one should be resisted firmly.

Calling state and local tax deductibility a "subsidy" is a sneaky misuse of the term. Subsidies are generally considered bad because they inefficiently reduce the price and increase the production of some specific good. Deductibility doesn't do this. It does transfer tax liability among taxpayers, but this transfer is not a subsidy.

Basing an equity argument on transfers among states, the Administration correctly notes that while deductibility requires that federal tax rates or other taxes be higher than otherwise, its benefits are proportional to the level of state taxes which can be deducted on individual income tax returns. Deductibility permits states which are "high-tax" by this measure to transfer tax liability to "low-tax" states. But this is a highly distorted way to rank states and to examine interstate transfers of taxes, as a study of states' per capita government spending would show. Alaska, Texas, and Wyoming—"low-tax" by the Administration's standard—raise substantial revenue from severance taxes which are largely paid by other states. By ignoring the other interstate transfers which deductibility helps to offset, the Administration presents a case which is simply not credible.

The Administration again tells only part of the story when it asserts that deductibility creates a "subsidy" for itemizers by nonitemizers. This "subsidy," actually a transfer, is an offset to the sizable reverse transfer which is created by the zero bracket amount (or "standard deduction"), used by the two-thirds of returns which don't itemize. The tax code recognizes that for equity or other reasons certain expenditures should be deductible, but non-itemizers use the zero bracket amount to shelter from tax income which is not used for deductible expenditures. For example, the zero bracket amount for a joint return in 1985 is $3540. A taxpayer won't itemize if his itemizable expenditures fall short of this. A non-itemizer who files a joint return shields from tax not only, say, his $1,000 of itemizable expenditures but also another $2,540 of nondeductible expenditures. Itemizers, by contrast, earn their deductions, paying tax on every dollar of income not spent on deductible items.

The transfer of tax liability from nonitemizer to itemizer which this asymmetry creates is offset in part insofar as the itemizer may deduct state and local taxes paid. These taxes should be considered neither income nor expenditures, but their deductibility offsets the effect of the deductions for imaginary expenses granted to nonitemizers by the zero bracket amount.

None of this addresses whether taxes paid should be part of federally taxable income anyway. Income is the sum of one's consumption and the change in one's net worth. Some economists think taxes can be considered consumption expenditures, arguing that by choosing where we live we tacitly agree to pay for the local and state services which are provided.

But individuals have to buy a combination of location and taxes/services. While the package is freely chosen, it is not correct to infer that the choice necessarily demonstrates a preference for either part individually. Some people like being close to mountains or family, and tolerate the taxes and unwanted public services as the price. Others will live wherever public schools and libraries are good. The outside observer has no way to distinguish between these two types of citizen, so it is simple governmental self-serving to argue that they are all of the second type. Let's face it: taxes are forced exactions. They are not consumption and are not part of income. Neither state nor federal taxes should be part of the other's income-tax base.

Finally, it is perplexing to find this proposal advanced by an Administration which has apparently respected the federalist principle and considered the federal government a servant, not a master, of the states. It hardly seems the way to encourage states and localities to shoulder more of the public-services burden.

The elimination of deductibility makes little political sense and cannot stand the light of economic analysis. It is a bad idea through and through.

KOREAN WAR MEMORIAL ADVANCES AS SUPPORT SPREADS

HON. JAMES J. FLORIO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 24, 1985

Mr. FLORIO. Mr. Speaker, yesterday the Committee on House Administration took a momentous and significant step toward the establishment of a Korean war memorial. I congratulate the distinguished chairman of the committee, FRANK ANNUNZIO, for his leadership in this effort and I must thank my colleague, Representative MARY ROSE OAKAR, for her hard work with this legislation before that committee.

Mr. Speaker, over 145 of our colleagues have cosponsored H.R. 2205, The Korean War Memorial Act which I introduced earlier this year. The chairman and ranking minority member of the House Veterans Affairs Committee, the Hon. G.V. "SONNY" MONTGOMERY and Hon. JOHN PAUL HAMMERSCHMIDT joined me as original cosponsors of H.R. 2205 and their support has been unwavering. For that support I am deeply grateful.

I draw the attention of my colleagues to an editorial which appeared in the newspaper Stars and Stripes. Stars and Stripes is read by over 2 million American military personnel around the world and I find this editorial to be most descriptive in it's call for a memorial to those who fought in Korea. It was provided to me by the newspaper's editor, Dan McCurry, who is known by many for his dedication to the well-being of America's veterans.

The editorial is particularly timely in this, the 40th anniversary of the founding of the United Nations. It was under the blue flag of the United Nations that over 54,000 Americans died in Korea and that organization stands today as witness to their sacrifice. I urge my colleagues to read the editorial and to support H.R. 2205, The Korean War Memorial Act, when it is brought to the floor. It is recognition which is long overdue.

LOOKING FOR A KOREAN WAR MEMORIAL

This is the story of three rivers and of the stone which men pile upon their banks, of the boulders carved into monuments, and the rock mortised into great buildings, or ground into gravel. The Potomac of Washington, the Han of Seoul and New York City's East River each flow beside a great world city. Along each shore line governments still pay tribute to that September, 1950 when the surface of the Han ran with the blood of American and Korean troops fighting to cross the waters and reinstall in Seoul an elected government pushed out by the rampage of Communist troops from the north.

While an armistice stilled the daily fighting thirty-one years ago, that campaign continues today. Now along the Potomac that war's survivors want to construct a memorial to their living and dead of Korea. They are discovering that creating a peacetime monument in their own capital city is far more difficult than building bridges while under enemy fire in another capital 7,100 miles from home.

Fifty-five thousand men died in service during a Korean War in which almost nine million Americans served. Since then several hundred thousand GI's have guarded the borders of South Korea. Thirty-eight thousand American troops remain there today.

Each hill, every ridge and river valley of South Korea's map was preserved at the cost of American lives. There is no more crucial piece of real estate in northeast Asia than where the world's four great powers, the Soviet Union, the U.S., Japan and China come face to face. We fought a multi-billion dollar war there and annually spent millions of taxpayers' dollars in Korean military and economic aid. Thirty years ago we heard the loud cries of parents and politicians alike to bring our boys home from Korea. Yet three decades and millions of dollars after the shooting stopped we have yet to erect a national memorial to those who served.

A "police action" this war was called by the same Defense Department which now labels war as "violence processing" and peace as "permanent pre-hostility." The Pentagon would still redefine the sacrifice in hope of somehow scrubbing away our memories of the dead, of those who never fully recovered and of the countless others whose bodies are just now feeling the damage caused by days and nights of constant Chosin cold, the hours of continuous fire-fights in Seoul and those awful seconds in which the buddy once standing at your side, now lies at your feet forever dead to wife, children and family. Too easily we have forgotten the 2,700 POWs who died, the 8,177 MIA's unaccounted for in Korea and the small stones over unmarked American graves which still stand in the North.

We should understand that a great memorial to the American sacrifice in Korea has long stood beside New York's East River. That monument is the United Nations, a fledgling organization created from humankind's weariness with World War II. The U.N. would have little to say, and even fewer to listen, had not Americans fighting in Korea first put their military muscle behind the U.N.'s voice. The world flags fluttering along the water's edge have increased in number every year because in 1950 Americans in Korea gave the UN a lasting respect. In so many arenas the legitimacy of the United Nations was not established on the East River, it was confirmed south of the Yalu. That "police action" gave a breathing

space for peace which secured the United Nations from a rapid self-destruction in the Cold War.

UN forces could not have stood between the Greeks and Turks of Cyprus had not Americans first stood strong at Pusan. The blue flag of the United Nations could not have stopped the warring Egyptians and Israelis had not that flag first pushed despotism north of the 38th Parallel. Thousands of UN workers would not be digging wells, healing children and bringing food to the starving in 1984 had not the U.S. Marines crossed the rivers, secured the ridges and provided security against Communist invasion in 1950.

It diminishes in no way the vision of the UN's founders, that rare spirit of Secretary General Dag Hammarskjold or the dedication of the many UN technicians to remember what happened on the Korean peninsula three decades past. Indeed such remainders put to shame the diplomatic dilettantes of all nations whose debates often forestall no wars and serve but to fill their own wallets.

The United States has a heavy investment in democracy in Korean, an investment which has often been in question. What is not in doubt, however, is the alternative which has taken frightful flower in the North Korean regime of Kim II Soong.

In Korea the war continues and victories usually come in small steps. Then suddenly comes a magnificient leap to freedom like the Soviet tour guide last week who crossed the demarcation line into the South.

Step by step will also be the path of creation for a Korean War Memorial in Washington. Those who survived a shooting war in Korea are far to tough to be entangled by naysayers along the Potomac.

Many have served in Korea, more should remember, and all should enlist in the effort for the dedication of a Korean War Memorial within this decade.

REV. ANTHONY FAILLA: A MAN FOR ALL SEASONS

HON. STEPHEN J. SOLARZ

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 24, 1985

Mr. SOLARZ. Mr. Speaker, I would like to pay tribute to Father Anthony Failla, pastor of St. Finbar's R.C. Church in the Bensonhurst area of my district, on the occasion of his being honored by the Independent Neighborhood Democrats of Carroll Gardens for his years of service to the community.

Father Failla was ordained nearly 30 years ago and was first assigned to Holy Family Church in Canarsie where he organized and ran a youth program for area youngsters.

He was transferred to St. Mary Star of the Sea Church in Carroll Gardens where he remained for many years, actively participating in the life of the community. He helped found the Carroll Gardens Neighborhood Association—a civic association dedicated to the betterment of the community and was a founding member of the South Brooklyn Development Council. During the 1960's, he served as an inspiration to a small group of young adults in the neighborhood, urging them to work toward positive change in the community and beyond. Many of these young adults remained in Carroll Gardens and have risen to leadership positions in the civic and political life of the community.

During this time, Father Failla encouraged this group to use its energy to form the Independent Neighborhood Democrats of Carroll Gardens. His support and encouragement helped these activists create a viable political entity which continues to play an important role in the community to this day. For these reasons, IND has selected Father Failla as the guest of honor at their gala dinner dance which will take place at the Embassy Terrace on Friday evening, November 8, 1985.

At the age of 39, Father Failla was selected by the Brooklyn Diocese to administer the St. Michael-St. Edward Church in the Fort Greene section of Brooklyn—making him one of the youngest administrators in the diocese. While serving in this post, he became chairman of community board No. 2 in which the church was located. When the Myrtle Avenue El was dismantled, Father Failla recovered railroad ties and other pieces of the old structure and had an altar, containing these pieces, constructed for the church. This unique reminder of the face of the community at an earlier time remains at St. Michael-St. Edward to this day.

Father Failla also served as a member of the Brooklyn Bicentennial Commission, helping to plan Brooklyn's part in the celebrations to commemorate the Nation's bicentennial. And he helped found the Friends of Fort Greene Park—an organization formed to help upgrade the neighborhood park.

In 1979, Father Failla was transferred to St. Finbar's Church in Bensonhurst, where he again distinguished himself as an active and involved member of the community. He started the Bensonhurst Renaissance Family Counselling Program and offered space to the program—which provides individual, family, and group counselling to children, adolescents, and adults—in one of the church buildings. He was also the founder of the AMICO Extended Services Program—established to meet the needs of the largely Italian-American residents of the area for information and assistance with entitlements and other social services. And he has also provided space for a residence for homeless men, run by the Society of St. Vincent de Paul. This residence provided temporary shelter for a period of up to 9 months which, along with a range of social services, helps these men to obtain permanent shelter and pick up the pieces of their lives. In addition, Father Failla serves as president of the Bensonhurst-Bath Beach Community Council and treasurer of the Bensonhurst Redevelopment Corp., two important and active community organizations in Bensonhurst. He is also a member of the Italian Board of Guardians.

Since his ordination nearly three decades ago, Father Failla has demonstrated his deep and longstanding commitment to the larger needs of the communities in which he has served. He has contributed innumerable hours and has shown tremendous energy, compassion, and enthusiasm in working with parishioners and residents of the larger community to develop needed programs and services for area residents.

I want to congratulate Father Failla for his many years of commitment to the people of the communities in which he has served. On the occasion of this special tribute by the members and friends of IND, I want to wish him continued strength and success in all his future endeavors.

MIDDLETOWN ENTITLEMENT FUNDS

HON. BENJAMIN A. GILMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 24, 1985

Mr. GILMAN. Mr. Speaker, I am pleased today that a great inequity is being remedied in the Community Development Block Grant [CDBG] Program. Seventeen cities suffered a loss of designation as central cities within their standard metropolitan statistical areas [SMSA] when the Office of Management and Budget [OMB] redefined the criteria for central city status. The loss of central city status caused these cities to lose the much needed entitlement funding under the Community Development Block Grant Program.

Within our own 22d Congressional District in New York State, the city of Middletown lost its entitlement funding by OMB's arbitrary decree. Our neighbor to the east, Newburgh, located in Congressman HAM FISH's district has suffered a similar plight. Congressman FISH and I, joining with other Members of Congress from the affected areas, proposed legislation which would "grandfather" these cities in until the next decennial census which will be conducted in 1990.

Last February, I addressed the House Banking Subcommittee on Housing and Community Development asking that they consider the issue of Middletown's entitlement status along with the 16 other affected cities. The subcommittee was sympathetic to the loss of designation. As a result, the subcommittee incorporated the intent of our legislation into H.R. 1, the housing bill.

While we must still await action from the other body, I am pleased that the House acted to alleviate this injustice. In the fiscal year 1985, the city of Middletown received over $500,000 in funding under the CDBG entitlement program. This funding has become particularly important in light of Middletown's revitalization efforts. We must not allow the Office of Management and Budget, an agency which acts like our fourth branch of Government, to arbitrarily eliminate the funding the city of Middletown so desperately needs and deserves. The road to renewal should not have to confront these arbitrary roadblocks.

Mr. Speaker, in closing I thank my colleagues for supporting the redesignation of the city of Middletown, NY, as an entitle-

ment city. While this provision will directly benefit the people of the city of Middletown, NY, it also addresses a need of other "Middletowns" across this Nation.

TIME FOR CHANGE IN SOUTH AFRICA

HON. ROBERT GARCIA

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 24, 1985

Mr. GARCIA. Mr. Speaker, in his column in today's New York Times, Anthony Lewis discusses the practical, as well as the moral, failure of apartheid.

He also points out that the time for change in South Africa is now. The most striking point that Mr. Lewis makes in his essay is that the South African business community is becoming increasingly aware of the need to do away with apartheid. I submit Mr. Lewis' article for the RECORD.

[From the New York Times, Oct. 24, 1985]

TIME AND SOUTH AFRICA

(By Anthony Lewis)

In this year of crisis in South Africa, one important event has been the change in business attitudes. The business community is now pressing urgently for an end to the apartheid system. Some business leaders took the bold step of going to Zambia to talk with the African National Congress.

Why? Business people are not by nature political reformers. Why are they now taking such an active role on South Africa's central political question? I think it is because they have seen a simple truth in their country's turmoil. From that truth much follows, for South Africans and for us outside.

The truth is that apartheid no longer works. A system that divides a nation, humiliates most of its people and attracts the obloquy of the world imposes too heavy a burden on the society. And its victims will no longer humbly bear it.

The curious thing is that the rulers of South Africa perceive much of that truth, too. That is why President Botha talks about "reform" and disavows the word apartheid. He has lost the old National Party faith in the rightness of racial separation.

But Mr. Botha has nothing to replace the old faith. He cannot justify denying people basic rights because of their skin color, or at least he does not try to. But he has no vision of an alternative South African society. He gives his people no plan, no goal. Those who ask for change get repression.

That is President Botha's tragedy and his country's. For the lack of vision in this time of crisis is a mortal danger to South Africa. Every week, every day that passes in rudderless turmoil makes it less likely that South Africa will arrive in passable shape at a decent future.

By now most people know what that future will be. Some day South Africa will have a non-racist system. Of course racial differences will exist, there as in other countries. But South Africa will not have the unique distinction of writing them into law—of defining in racial terms who may vote, who may live with his family and so on.

The only question is when that future will arrive. It is an absolutely critical question, and it is what the business leaders have understood.

Business sees what is happening in the black community. Its acknowledged leaders are mostly in prison or detention or exile. In their place, pushing the protests in the face of police whips and guns, are students. The old leaders were middle-class men and women—lawyers like Nelson Mandela, doctors, ministers. The new ones are scarcely educated, suspicious of middle-class status in any black because it smacks of dependence on the white world.

In short, business see a black community that is increasingly radicalized, increasingly disconnected from middle-class values. And it sees that Government policy is causing the process: the policy of refusing to envisage, or to talk about, political change.

In those circumstances it is not surprising that the business community wants urgent action. It would rather negotiate with Nelson Mandela than with those who will follow. When 91 business leaders stated their position in an advertisement last month, a cardinal point of their program was "negotiating with acknowledged black leaders about power sharing."

Last week 52 American heads of businesses that operate in South Africa endorsed the program of their South African counterparts. Their aim, apparently, was to try to move Mr. Botha and his Government, but I think they misconceived the way they can apply power to that end.

No one who knows Mr. Botha can believe that he will be moved by political advice from American business leaders. But he has to listen if they say something else: say that their companies are going to leave because they cannot operate profitably in today's South Africa.

Disinvestment is in fact under way. Even the Rev. Leon Sullivan, whose principles of nondiscrimination have been used to justify U.S. corporate presence in South Africa, says he will urge all companies to pull out if apartheid has not been dismantled by 1987.

And there is a deep conservative interest in applying the most effective pressure for change in South Africa. Breyten Breytenbach, the great Afrikaans poet who served a prison term for his anti-apartheid activites, puts it in the current New Republic:

"The rulers [of South Africa] are destabilizing and ruining the region. . . . They are destroying the credibility and the viability of Western values. They are endangering, in the long run, whatever strategic and financial interests the West may have in the area."

COMPLEX PROBLEMS AND SIMPLE SOLUTIONS

HON. THOMAS A. DASCHLE

OF SOUTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 24, 1985

Mr. DASCHLE. Mr. Speaker, even though the debate on the 1985 farm bill has passed, unfortunately, the crisis facing family farmers and ranchers throughout this Nation has not. As the other body begins deliberations on new farm legislation, and we anticipate a conference between our respective Agriculture Committee, I would urge my colleagues to examine the thoughts contained in two farm policy editorials published in the Arkansas Gazette.

These editorials lay to rest the fallacies of the so-called "free market system" in agriculture, and echo the comments of tens of thousands of family farmers and ranchers throughout the Nation—passing more of the same in the way of a new farm bill will not pull family agriculture from the depths of its economic depression.

I would commend the editorial writers of the Gazette, and recommend these editorials to each of my colleagues:

COMPLEX PROBLEMS AND SIMPLE SOLUTIONS

The astonishing lack of progress toward a solution of the massive farm problem may be attributed to the fact that those who make policy have no understanding of agriculture's essential role in the economic system. Consequently, they concentrate on searching for a simple solution to an enigma that is beyond their comprehension.

Before any attempt is made to outline a farm program for the remainder of the century, certain assumptions should be established:

Agriculture is an essential industry with a priority that should rank somewhere above the economic health of public utilities, Conrail, Chrysler, Continental Illinois National Bank and Trust Company or any other bank that is regarded as "too big to fail."

The efficiency of farmers has been clearly established and is well known. Their productive capacity—the skill with which they use machines and manpower in growing crops and livestock—is demonstrated by the fact that one farmer produces food and fiber for himself and perhaps 75 other people. Less than 3 percent of the population is engaged in commercial farming, compared with 30 percent only a few years ago.

The problems of agriculture cannot be solved simply by "exporting the surplus."

In agriculture, as in public utilities or the manufacture of automobiles, "price" is the key factor. Farmers cannot stay in business if they are required to sell their commodities below cost, regardless of how efficient they may be in growing crops and livestock.

If Congress and the administration could understand these assumptions, they might be prepared to write a replacement for the Agriculture and Food Act of 1981. The next order of priority would be to hold the cost at the lowest possible level. Certainly, there is no justification for spending $30 billion a year on a farm program, as the country did in 1983, or for a four-year program that might require outlays of $50 billion when the original law called for spending $11 billion. Planning of that quality simply confirms the lack of understanding that has characterized the effort for the last four years.

The presumed efficacy of exports may be the one illusion that has led to more miscalculations than any other factor in the farm program formula. Americans fell into the trap early in the 1970 decade when adverse weather and other circumstances threatened to produce a global food shortage. The United States owned the world's greatest reserve of grain and was in position to profit from the (temporary) sellers' market.

Earl Butz, who was secretary of Agriculture in the Nixon and Ford administrations, misread the signals and concluded that "exports" would provide the permanent solution to the problem. Grow all you can, he said, and we'll sell it. Thus the doctrine of

the free market will be confirmed and farmers will be released from government controls.

The dream world, in which other countries would send their agents to the United States in search of food, soon melted into mist as other regions boosted production. Farm exports have been declining for three years and there is little indication the situation will improve. World sales have been accounting for 40 percent (or more) of some key crops, but the demand is likely to continue its decline.

The Soviet Union, viewed as one of the most promising markets, is expected to harvest 190 million metric tons of grain this year, an increase of about 12 per cent over last year. A crop of this size would enable the Soviets to reduce their imports by about 12 million tons, 10 million tons of which would represent reduced sales by the United States. Grain traders have expressed fear that, for the first time, the USSR will not comply fully with the terms of its agreement to purchase at least 8.5 million metric tons of grain and soybeans in the United States.

Those who write the new farm law should consider the erratic world demands for American farm commodities. Domestic consumption of food and fiber can be predicted with reasonable accuracy, but exports follow no fixed pattern. A "safe" farm law would set production targets that would meet domestic demand with a margin of 30 percent (or some other reasonable figure) for exports. In those years when the world harvest falls a bit short, we could expect prices to rise, when world production soars, the domestic supply could be handled at reasonable cost, particularly if the law contained provisions for adequate reductions the following year.

In order to protect the income of farmers, price supports would have to be set at "profitable" levels.

The exercise in "supply management" would contrast with the current mood of the country and is not likely to be approved. No one should ignore the fact that the Senate Agriculture Committee has tentatively endorsed a farm bill containing a mechanism for a wheat marketing quota referendum as a key component of a legislative sounding board called the Farm Policy Reform Act of 1985. A move reportedly is under way to extend the referendum to other crops.

The measure is certain to encounter rough sledding and the odds against its passage are long. Still it demonstrates that at least a few people in Congress understand that the complex farm problem defies the simple solution of "returning agriculture to a free market," which is exactly what the farmers had when they all went broke more than 50 years ago.

A Fair Warning to Agriculture

Farmers, who gave President Reagan 67 percent of their votes in the 1984 election, should brace themselves for the consequences of their suffrage. In his recent radio address, delivered from his ranch where he is on vacation, Mr. Reagan described the kind of farm program he wanted and urged Americans to send their lawmakers "an unmistakable message that change in our farm policy is not only desired, but essential."

Farmers—those who voted for Mr. Reagan and the few who didn't—probably will be cheered by the message. With commodity prices hovering around 50 percent of parity and with agriculture in the deepest slump since the 1930 decade, producers would welcome a change from what they have. The hazard, from the viewpoint of farmers, is that Mr. Reagan may succeed in doing what he has proposed from time to time, since the days when he taught pop economics for General Electric: Take the government out of the game altogether and return agriculture to the tender mercies of the free market.

In his GE days, Mr. Reagan occasionally praised the productive skills of farmers and urged the government to "turn that genius loose." His theme then was that all farm programs should be aimed at returning agriculture to the law of supply and demand. The lofty and idealistic doctrine did not guide government policies during Mr. Reagan's first term and his radio address mentioned his accomplishments in shelling out subsidies.

"Our administration," he said, "has spent more on farm programs than any administration in history."

No one is likely to challenge the assertion. Mr. Reagan named $59 billion as the amount dished out since 1981, and that did not include his personal Payment-in-Kind (PIK) that cost an additional $9 billion to $10 billion. Outlays in 1983 alone, when the way was being paved for the 1984 campaign, totaled $22.2 billion (plus PIK), compared with about $24 billion for the four years covered by the previous law.

It should be emphasized that the Agriculture and Food Act of 1981 is a product of the Reagan administration. It contained the provisions he wanted, including considerable flexibility for the Secretary of Agriculture to increase or decrease the government's role (and spending) for specific programs. Armed with the mandate of his first term. Mr. Reagan got what he wanted in agriculture. The net result was that the 1981 law is demonstrably the most expensive and least effective in the history of farm legislation.

With farm bankruptcies setting post-depression records and with such commodities as wheat and corn trading below price-support levels, producers may be a bit reluctant to exercise their genius and produce at full capacity for storage bins that already are overflowing.

Mr. Reagan blamed the farm depression on a variety of factors, lumped together as those misguided policies of the past. The implication was that it all happened before he came to office but, in truth, his first term is part of the "past" and virtually all the price-depressing surpluses now in storage were accumulated during his administration and under the programs his Departmen of Agriculture fashioned within the terms fo his 1981 farm law.

"A major contributor to the problem, he said, "is federal efforts designed to help farmers. The answer cannot be found in sticking with discredited programs and increasing government controls. The answer can only be found in our ability to help the agriculture industry to stand on its own feet again."

Mr. Reagan's sense of history may be playing tricks on him. Agriculture has operated under a series of farm programs for more than 50 years. During that period, it has experienced varying degrees of prosperity and, just for the record, its growth rate, its productivity, and the accumulation of assets all constitute an amazing achievement. Under government programs, agriculture mechanized, modernized, adopted scientific practices and became the envy of the world with its ability to produce food and fiber. Recent policies, including the 1981 law, deprived it of the essential ingredient: The ability to turn a profit.

In contrast, it was "standing on its own feet" before it collapsed completely and had to be rescued in the early years of the 1930 decade.

Our historical perspective should be lengthened to embrace a knowledge of the rural poverty that gripped agriculture before the government came to the rescue.

FACED WITH INSURANCE CRISIS, NURSE-MIDWIVES APPEAL TO CONGRESS

HON. JAMES J. FLORIO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 24, 1985

Mr. FLORIO. Mr. Speaker, in July 1985, malpractice insurance for half of the Nation's 2,800 certified nurse-midwives was canceled, effective over the course of the next 6 months. The midwives had been covered under a blanket policy written for their professional association.

Of the approximately 1,400 nurse-midwives whose coverage was canceled, about 800 are independent practitioners who will have no choice but to stop practicing. Some midwives associated with hospitals, clinics, and other organizations are able to continue practicing under the group policies offered by the institutions; but as those policies come up for renewal, insurers are apparently demanding that nurse-midwives be excluded, thus eliminating all options for obtaining coverage.

Although the midwives had filed very few claims under their policy, no insurance firm has been willing to negotiate a new nationwide group policy. Nurse-midwives believe their abandonment is unjustified and that the lack of liability coverage is jeopardizing their profession. Emergency Federal legislation aimed specifically at making liability insurance available for nurse-midwives has been suggested as a solution.

The following advertisement documenting the midwives' appeal recently appeared in the Washington Post.

[From the Washington Post, Sept. 10, 1985]

AN APPEAL TO MEMBERS OF CONGRESS FROM AMERICA'S 1.7 MILLION PROFESSIONAL NURSES

We appeal for your urgent attention to the special plight of a vitally important segment of this country's nursing profession—and the tens of thousands of mothers and babies throughout this country who depend on them.

We refer to this nation's dedicated corps of nurse-midwives—registered nurses with post-graduate training in childbirth and pre- and post-natal care who work collaboratively with obstetricians. Certified nurse-midwives provide quality, cost effective care that has resulted in reduced infant mortality in settings in which they practice, particularly in low income, rural and inner city areas.

Despite a low incidence of malpractice claims, insurance companies have made an

arbitrary decision to cancel policies for nurse-midwives, refused to renew existing policies and refused to issue new policies. Professional nurse-midwives cannot practice without basic malpractice insurance. They are being denied their right to work.

This is a matter of the gravest concern not only to certified nurse-midwives, but to the whole nursing profession and to women and families throughout the country.

We appeal for your interest and consideration. We need it now. The situation is desperate. Please help!

SECRETARY HODEL'S REMARKS AT THE GROUNDBREAKING OF THE U.S. HOLOCAUST MEMORIAL AND MUSEUM

HON. BENJAMIN A. GILMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 24, 1985

Mr. GILMAN. Mr. Speaker, last week I was privileged to join Secretary of Interior Donald Hodel, Holocaust Memorial Council Chairman Elie Wiesel, and some of our colleagues at the very moving groundbreaking ceremony for the Holocaust Memorial and Museum. On land donated by the Federal Government, this important structure will be constructed solely from private contributions.

Prior to the actual groundbreaking, which included the mixing of soil and ashes from Europe's concentration camps with American soil, Secretary Hodel spoke movingly to those assembled at this historic occasion, bringing with him a message from President Reagan, who has agreed, in an unprecedented manner, to serve as honorary chairman of the fundraising effort.

Mr. Speaker, I know that all of our colleagues, in both Houses of Congress, support this historic effort. We can all appreciate Secretary Hodel's remarks, as well as the President's message, and I ask that they be printed in full at this point in the CONGRESSIONAL RECORD for our colleague's review and commentary.

REMARKS OF SECRETARY OF THE INTERIOR DON HODEL AT OFFICIAL GROUNDBREAKING CEREMONY FOR U.S. HOLOCAUST MEMORIAL AND MUSEUM, OCTOBER 16, 1985

I stood in the Rotunda of the Capitol last April. It was part of this nation's sober observance of the Days of Remembrance. Speaker after speaker, regardless of his faith, implored us to remember the Holocaust.

We free people of the world do remember—in many ways. In Israel, there is Yad Vashem. I was there not quite 2 years ago, and was privileged to lay a wreath at the flame which will flicker eternally in that dark and stone-cold room. It was a gripping, moving experience. No civilized man or woman could fail to be moved.

In the United States, we have the Days of Remembrance Commemoration. And, thanks to the efforts of many men and women—from all walks of life and of many religious faiths—this country will have its own Holocaust Memorial and Museum. But it will come into being, and will achieve its rightful place as an important part of our Nation's Capital, only if a broad cross-section of America understands its purpose and contributes to its funding.

It is in this regard that we should take note that President Reagan has agreed to serve as Honorary Chairman of the fundraising effort. As I am sure you know, it is most unusual for the President of the United States to assume such a position with a private, non-governmental activity.

President Reagan's participation serves as a clear and unmistakable signal to the entire nation that successful completion of the United States Holocaust Memorial and Museum is an important objective of the American people and that it is most deserving of the moral and financial support of all of us.

Ladies and gentlemen, it gives me great pleasure to deliver to you a personal message from the President.

THE WHITE HOUSE,
Washington, DC, October 15, 1985.

I am pleased to send greetings to all those gathered for the groundbreaking for the Holocaust Memorial Museum.

We are building this museum not just to pay our respects to the memory of the victims of an immense tragedy, nor merely to provide the living with a reminder of the horror which even now is slipping out of living memory and into history. We build today for our posterity.

With our children and our children's children in mind, we are creating on this spot a place of remembrance and mourning. Although some have questioned the wisdom of placing the memorial for a European catastrophe so close to the gleaming symbols of our democracy, the lessons of the Holocaust—the brutal, even diabolical perversion of power, unchecked by law and devoid of faith in God—do belong here. When, in the years to come, our children emerge from this museum with the lessons of totalitarianism fresh in their minds, those soaring white monuments to democracy, justice, and freedom under God will gleam all the more brightly in the sunlight of freedom.

Today, much of the world still struggles to rid itself of the rule of godless tyrants and murderers. This memorial will stand always to remind us of the nobility of that struggle and the perils we face if we remain indifferent. God bless you.

RONALD REAGAN.

On an official and personal note, I would like to comment briefly on the working relationship between the Holocaust Memorial Council and the Department of the Interior. Not quite 2 weeks ago, I exercised my responsibility as Secretary to approve the architectural plans for the memorial and museum and to certify to the Congress that funds were available to complete construction. I could not have done so had it not been for the tireless efforts of so many of you, who have made this great day possible, and my confidence that the American people will heed your call for support, so that this noble project can become a vital part of the heart of the world capital of freedom.

But, you ask, why do we have need for these museums and memorials? Why do we seek to remember such a painful episode in history?

The short answer is that if we dare let ourselves forget, we may not be sufficiently vigilant when other Hitlers take those first, almost unnoticeable steps toward tyranny. We must be vigilant to incipient tyranny wherever it occurs, because, as is etched on front of our National Archives, "Eternal Vigilance is the Price of Liberty."

But that merely is a political or societal reason for remembering the Holocaust. I submit, however, that there is an even more important reason for remembering:

We serve God by remembering. If remembering the Holocaust can help us—or our brothers and sisters in the world—avoid the physical and emotional pain of terror and barbarism, we and they obviously are better off for it. But, crucial as that is to our general well-being, I am more concerned about the well-being of our souls.

When Hitler destroyed men, women and children, he sinned against them; but he quite surely also sinned against God. And when the rest of mankind tolerates that happening, we just as surely sin against God.

I firmly believe the Lord did not put man and woman on earth with indifference as to how they treated each other. I have faith that we are commanded by God not merely to be kind to one another; but to stand tall and to take those steps that are within our God-given abilities when we sense that evil has reared its ugly head.

We therefore must remember the Holocaust—now and forever—if we are to remain able as vigilant children of God to serve him.

If I am correct in this respect, then let it be said that those of you who are the builders of the memorial and museum truly are doing the work of the Lord.

TISH SOMMERS: A VERY SPECIAL PERSON

HON. FORTNEY H. (PETE) STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 24, 1985

Mr. STARK. Mr. Speaker, I wish to pay special tribute to one of California's truly remarkable women, Tish Sommers, who recently lost her battle with cancer. A life-

long social activist and self described freelance agitator, for the past 15 years, she worked tirelessly on the special needs of middle aged and older women.

Tish Sommers had a unique capacity to use her own personal experiences as a means of educating and advocating for social change. Divorced at 57, she quickly recognized the problems women face in entering or returning to the job market in midlife. Because of her own painful experiences, she founded a self-help job program for women in California's Bay Area. Not content to use her talents for California women, she went on to launch a nationwide movement to assist displaced homemakers, a term she coined to describe women who lost their jobs as homemakers through widowhood and divorce. Through the Alliance for Displaced Homemakers, which she cofounded, she was able to gain Federal and State support for critically needed displaced homemaker programs.

Struck with cancer in her fourties she soon learned the importance of health insurance and made this a priority issue when she helped organize the Older Women's League in 1980. Although she had access to her husband's employer-based health insurance when she contracted cancer, she lost this coverage when she was divorced. Because of her cancer she was unable to obtain health insurance coverage. One of the first issues taken up by the Older Women's League [OWL] was access to health insurance by midlife women. OWL promptly drafted a model State bill requiring continuation or conversion of group health insurance for spouses who would otherwise lose their coverage following widowhood, divorce, or their husband's retirement. Through the advocacy of local OWL members, such legislation has been enacted in six States.

Mr. Speaker, I am proud to say that I had the opportunity to work with Ms. Sommer's Older Women's League in developing legislation to deal with the problems women face when they lose their health insurance because of a change in their marital status. Originally introduced as H.R. 21, the Continued Access to Group Health Insurance Act of 1985, the provisions have now been included in H.R. 3128, the Ways and Means Deficit Reduction Amendments of 1985. With parallel provisions already a part of the Senate Finance Committee's deficit reduction legislation, I have every hope that we will soon enact effective continued access to private health insurance for spouses and their dependent children.

This legislation will serve as a wonderful tribute to a truly outstanding woman.

Ms. Sommers died at her home in Oakland, CA, last Friday, October 18. I speak for many when I say that Tish Sommers—activist, feminist, teacher, and role model—left a remarkable legacy, and will be greatly missed in the women's movement and aging network in this country. Memorial services are being held in Washington today and in Oakland in November.

EXPLANATION OF VOTE ON REPRESENTATIVE LATTA'S AMENDMENT

HON. TOM LEWIS

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 24, 1985

Mr. LEWIS of Florida. Mr. Speaker, on September 11, I expressed my concerns over the $3 billion surplus in the airport and airway trust fund, which has been allowed to accumulate instead of financing those air safety programs for which the moneys were collected.

Since that time, title VIII, subpart B of H.R. 3500, the Omnibus Budget Reconciliation Act of 1985, has made provisions to remove the highway trust fund and the airport and airway trust fund from the unified budget. It is obvious to me, as well as the framers of H.R. 3500, that as long as budget deficits continue to grow, and trust fund surpluses continue to grow larger, the temptation to use the surplus to offset the deficits will increase, not diminish.

Unfortunately, both Representative FAZIO and Representative LATTA introduced amendments to H.R. 3500 which were designed to keep these trust funds under the unified budget. For this reason, I rose yesterday to speak in strong support of removing these trust funds from the unified budget, and in opposition to the Fazio and Latta amendments.

Opposing Representative LATTA's amendment would have been particularly difficult, since aside from the portion dealing with the trust funds, I supported his amendment. Fortunately, Representative LATTA has modified his amendment in order to provide for the removal of these trust funds from the unified budget by 1989, and; therefore, I was pleased to vote for his amendment.

QUALITY OF HIGHER EDUCATION IN NEW YORK PROVEN IN NATIONAL SURVEY

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 24, 1985

Mr. BIAGGI. Mr. Speaker, as the ranking New York member on the House Education and Labor Committee, I was delighted to learn of the results of a recent survey of some 70,000 presidents, vice presidents, and directors in major businesses. The survey was conducted by Dun & Bradstreet. The question they were asked was where did you obtain your undergraduate and graduate degrees?

The results were gratifying. Of the top five undergraduate schools, two were from New York. Of the top five graduate schools two were from New York. The schools attended were both public and private which reflects the balance and diversity of higher education in New York.

While schools outside of New York did finish in first place those schools from New York fared quite respectably in the final survey results which I would like to provide to my colleagues.

Undergraduate.—Yale, Harvard, City University of New York, Princeton, and New York University.

Graduate.—Harvard, New York University, Columbia, University of Pennsylvania, and University of Michigan.

So it is obvious that a good education leads to a good job. This survey further shows that getting educated in New York gives you a leg up on others looking for the better job.

TAX REFORM

HON. NEWT GINGRICH

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 24, 1985

Mr. GINGRICH. Mr. Speaker, I would like to have the following article placed in the CONGRESSIONAL RECORD:

[From the Wall Street Journal, Oct. 16, 1985]

A TAX RESHUFFLE GONE AWRY

(By Martin Feldstein)

It's remarkable that a president who two years ago said he favored eliminating the corporate income tax has now been maneuvered by his political advisers into supporting a 25% rise in corporate tax collections. It's sad that a president who believes fiercely in economic growth has been reading weekly speech scripts in praise of a plan that would undermine growth by curtailing saving and investment.

But despite the president's weekly trips around the country to sell his tax plan, the American public is decidedly uninterested. That's not really surprising. For a typical middle-income family with annual earnings of $30,000, the president's proposed 7% tax cut would reduce tax liabilities by about $4 a week. That raises net income by less than 1%.

Many individuals also feel instinctively that the promised tax cuts will never materialize, because a government that's running a $200 billion a year deficit has no money to give away. And they also feel that even if they lose their own deduction for state and local taxes, there will still be enough tax-shelter gimmicks left to permit many wealthy individuals to pay little or no tax.

REDUCED INCENTIVE

Although the 7% cut in personal income taxes has not been enough to buy the popular support that the president's political advisers originally predicted, it would reduce the Treasury's personal tax collections by $25 billion a year. To keep total revenue unchanged, corporate tax collections would therefore have to be increased by $25 billion, a rise of more than 25%.

Such an increase in corporate taxes would substantially reduce the incentive to invest in business plant and equipment. By eliminating the investment tax credit and changing the tax depreciation rules, the president's plan would raise the cost of capital for investment in equipment by more than 50%. Historical experience confirms the common-sense conclusion that the result of

such a change in the cost of capital would be a substantial decline in the rate of investment.

The proposal of Ways and Means Committee Chairman Dan Rostenkowski would be even more harmful to investment and growth. By 1990, the Rostenkowski plan would raise annual corporate taxes by nearly twice as much as the president's plan. The depreciation rules would be rolled back to the pre-1981 standard, thereby cutting the incentive to investment even more sharply than the president's plan. The Rostenkowski proposal would also reduce incentives for spending on research and development and would raise the tax rates on corporate profits and capital gains. Although these changes are a repudiation of the president's 1981 tax initiatives, there has not been a word of criticism from either the White House or the Treasury Department.

Indeed, despite the public's lack of interest in the tax proposals and the harm that they would do to investment and long-term economic growth, the president's political advisers are openly cynical about their strategy for getting Congress to enact a tax bill. According to their game plan, the House Democrats will pass a tax bill out of fear that the president would otherwise attack them for blocking a tax cut for middle- and lower-income individuals. The Republican majority in the Senate will then be forced by the coming 1986 elections to support their president by passing his tax bill. In short, although the members of Congress may recognize that it is an economically counterproductive bill, enough of them will vote for it out of political self-interest to ensure its passage.

But what about the business community? Why is it not calling on Congress to reject the president's proposal and postpone tax reform until some future year when it can be approached more sensibly? Although the vast majority of major business firms are strongly opposed to the administration's tax plan (and even more opposed to the Rostenkowski plan), they have certainly not expressed this opposition in a clear and forceful way.

Their lack of effective opposition reflects the cleverness with which the administration has managed its tax campaign. The administration began by designing a tax plan that splits the business community; the proposed cut in the corporate rate (from 46% to 33%) would reduce total taxes for about one-fifth of major firms even though corporate taxes as a whole would rise by more than 25%. Without unanimity, the major business organizations that were so effective in persuading Congress to strengthen investment incentives in the 1981 tax legislation cannot now speak out to defend those incentives by rejecting the current tax proposals.

Although individual companies go to the Treasury Department and the Congress to plead for modifications in specific features of the tax proposals that would hit their own firms particularly hard, they generally do not campaign against the tax proposals as a whole. Instead, each firm tries to protect only what it sees as its own particular vital interests.

The individual business leaders who would like to speak out in opposition to the president's tax plan are generally intimidated into public silence. In the hardball world of tax politics, the Treasury Department and the White House staff try to convince each firm that its public position on the president's plan will strongly influence the Treasury's ultimate willingness to compromise on the specific tax features of greatest interest to that firm.

But there is no way to avoid all of the anti-investment changes proposed in the president's plan and the Rostenkowski plan. As long as the central feature of any enacted tax plan is a reduction in personal taxes, there is no way to avoid a business tax increase of $20 billion to $50 billion a year.

MINIMUM TAX INSTEAD

In place of the current radical and misguided tax plans of the administration and the Ways and Means Committee, tax reform at present should be limited to making sure that all individuals and businesses with substantial incomes are required to pay a significant amount of tax each year. That more modest goal would clearly increase the fairness of the tax system and yet would not weaken incentives to invest in plant and equipment. The revenue raised by such a downpayment on future tax reform should be devoted to reducing the oppressive budget deficits.

It is the time for responsible leaders in Congress to declare that the current plans to reshuffle tax liabilities are misguided and mischievous. Instead of dealing with the budget deficit, the tax proposals would worsen the prospects for future deficit reductions. Instead of strengthening incentives to save and invest, the proposals would weaken these incentives and undermine long-term economic growth. The responsible leaders in Congress should now make it clear that the current tax proposals are not an acceptable starting point for tax reform and that Congress will not be cajoled or frightened into passing such counterproductive legislation.

PRESIDENT REAGAN'S UNITED NATIONS SPEECH

HON. ROBERT H. MICHEL

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 24, 1985

Mr. MICHEL. Mr. Speaker, President Reagan today addressed the U.N. General Assembly at the commemoration of the 40th anniversary of the United Nations. I must say that in all my years of hearing Presidential addresses, none has so eloquently, forcefully, and frankly addressed the major issues of our time more than this great speech. It should be read by every American. At this point I wish to insert in the RECORD the President's speech:

ADDRESS BY THE PRESIDENT TO THE GENERAL ASSEMBLY OF THE UNITED NATIONS AT THE COMMEMORATION OF THE 40TH ANNIVERSARY OF THE UNITED NATIONS

Forty years ago, the world awoke daring to believe hatred's unyielding grip had finally been broken—daring to believe the torch of peace would be protected in liberty's firm grasp.

Forty years ago, the world yearned to dream again innocent dreams, to believe in ideals with innocent trust. Dreams of trust are worthy, but in these 40 years too many dreams have been shattered, too many promises have been broken, too many lives have been lost. The painful truth is that the use of violence to take, to exercise, and to preserve power remains a persistent reality in much of the world.

The vision of the U.N. Charter—to spare succeeding generations this scourge of war—remains real. It still stirs our souls and warms our hearts. But it also demands of us a realism that is rockhard, clear-eyed, steady and sure—a realism that understands the nations of the United Nations are not united.

I come before you this morning preoccupied with peace, with ensuring that the differences between some of us not be permitted to degenerate into open conflict. And I come offering for my own country a new commitment, a fresh start.

On this U.N. anniversary, we acknowledge its successes: the decisive action during the Korean War; negotiation of the Non-Proliferation Treaty; strong support for decolonization; and the laudable achievements by the U.N. High Commissioner for Refugees.

Nor must we close our eyes to this organization's disappointments: its failure to deal with real security issues, the total inversion of morality in the infamous Zionism-is-racism resolution, the politicization of too many agencies, the misuse of too many resources.

The U.N. is a political institution and politics requires compromise. We recognize that. But let us remember—from those first days, one guiding star was supposed to light our path toward the U.N. vision of peace and progress—the star of freedom.

What kind of people will we be 40 years from today? May we answer—free people, worthy of freedom, and firm in the conviction that freedom is not the sole prerogative of a chosen few, but the universal right of all God's children.

This is the Universal Declaration of Human Rights set forth in 1948. And this is the affirming flame the United States has held high to a watching world. We champion freedom not only because it is practical and beneficial, but because it is morally right and just.

Free people, whose governments rest upon the consent of the governed, do not wage war on their neighbors. Free people, blessed by economic opportunity, and protected by laws that respect the dignity of the individual, are not driven toward the domination of others.

We readily acknowledge that the United States is far from perfect. Yet we have endeavored earnestly to carry out our responsibilities to the Charter these past 40 years, and we take national pride in our contributions to peace:

We take pride in 40 years of helping avert a new world war and pride in our alliances that protect and preserve us and our friends from aggression. We take pride in the Camp David agreements and our efforts for peace in the Middle East rooted in resolutions 242 and 338; in supporting Pakistan, target of outside intimidation; in assisting El Salvador's struggle to carry forward its democratic revolution; in answering the appeal of our Caribbean friends in Grenada; in seeing Grenada's representative here today, voting the will of its own people. And we take pride in our proposals to reduce the weapons of war.

We submit this history as evidence of our sincerity of purpose. But today it is more important to speak to you about what my country proposes to do, in these closing years of the 20th century, to bring about a safer, a more peaceful, a more civilized world.

Let us begin with candor—with words that rest on plain and simple facts. The differences between America and the Soviet Union are deep and abiding.

The United States is a democratic nation. Here the people rule. We build no walls to keep them in, nor organize any system of police to keep them mute. We occupy no country. The only land abroad we occupy is beneath the graves where our heroes rest. What is called the West is a voluntary association of free nations, all of whom fiercely value their independence and their sovereignty. And as deeply as we cherish our beliefs, we do not seek to compel others to share them.

When we enjoy these vast freedoms as we do, it is difficult for us to understand the restrictions of dictatorships which seek to control each institution and every facet of people's lives, the expression of their beliefs, their movements, and their contacts with the outside world. It is difficult for us to understand the ideological premise that force is an acceptable way to expand a political system.

We Americans do not accept that any government has the right to command and order the lives of its people, that any nation has an historic right to use force to export its ideology. This belief—regarding the nature of man and the limitations of government—is at the core of our deep and abiding differences with the Soviet Union, differences that put us into natural conflict—and competition—with one another.

We would welcome enthusiastically a true competition of ideas, welcome a competition of economic strength and scientific and artistic creativity, and, yes, welcome a competition for the good will of the world's people. But we cannot accommodate ourselves to the use of force and subversion to consolidate and expand the reach of totalitarianism.

When Mr. Gorbachev and I meet in Geneva next month, I look to a fresh start in the relationship of our two nations. We can and should meet in the spirit that we can deal with our differences peacefully. That is what we expect.

The only way to resolve differences is to understand them. We must have candid and complete discussions of where dangers exist and where peace is being disrupted. Make no mistake: our policy of open and vigorous competition rests on a realistic view of the world. Therefore, at Geneva, we must review the reasons for the current level of mistrust.

For example, in 1972 the international community negotiated in good faith a ban on biological and toxic weapons; in 1975 we negotiated the Helsinki accords on human rights and freedoms; and during the decade just past, the United States and the Soviet Union negotiated several agreements on strategic weapons. Yet, we feel it will be necessary at Geneva to discuss with the Soviet Union what we believe are their violations of a number of the provisions in all of these agreements. Indeed, this is why it is important that we have this opportunity to air our differences through face-to-face meetings—to let frank talk substitute for anger and tension.

The United States has never sought treaties merely to paper over differences. We continue to believe that a nuclear war is one that cannot be won and must never be fought. That is why we have sought, for nearly 10 years, still seek, and will discuss in Geneva radical, equitable, verifiable reductions in these vast arsenals of offensive nuclear weapons.

At the beginning of the latest round of the ongoing negotiations in Geneva, the Soviet Union presented a specific proposal involving numerical values. We are studying the Soviet counter-proposal carefully. I believe that within their proposal there are seeds which we should nurture, and in the coming weeks we will seek to establish a genuine process of give-and-take.

The United States is also seeking to discuss with the Soviet Union in Geneva the vital relationship between offensive and defensive systems, including the possibility of moving toward a more stable and secure world in which defenses play a growing role.

The ballistic missile is the most awesome, threatening, and destructive weapon in the history of man. Thus, I welcome the interest of the new Soviet leadership in the reduction of offensive strategic forces. Ultimately, we must remove this menace—once and for all—from the face of this Earth.

Until that day, the United States seeks to escape the prison of mutual terror by research and testing that could, in time, enable us to neutralize the threat of these ballistic missiles and, ultimately, render them obsolete.

How is Moscow threatened—if the capitals of other nations are protected? We do not ask that the Soviet leaders—whose country has suffered so much from war—leave their people defenseless against foreign attack. Why then do they insist that we remain undefended? Who is threatened if Western research—and Soviet research that is itself well-advanced—should develop a non-nuclear system which would threaten not human beings, but only ballistic missiles?

Surely, the world will sleep more secure when these missiles have been rendered useless, militarily and politically, when the Sword of Damocles that has hung over our planet for too many decades is lifted by Western and Russian scientists working to shield their cities and their citizens and one day shut down space as an avenue for weapons of mass destruction.

If we are destined by history to compete, militarily, to keep the peace, then let us compete in systems that defend our societies rather than weapons which can destroy us both, and much of God's creation along with us.

Some 18 years ago, then-Premier Aleksei Kosygin was asked about a moratorium on the development of an anti-missile defense system. The official Soviet news agency, TASS, reported he replied with these words:

"I believe that defensive systems, which prevent attack, are not the cause of the arms race, but constitute a factor preventing the death of people. . . . Maybe an anti-missile system is more expensive than an offensive system, but it is designed not to kill people but to preserve human lives."

Preserving lives. No peace is more fundamental than that. Great obstacles lie ahead, but they should not deter us. Peace is God's commandment. Peace is the holy shadow cast by men treading on the path of virtue.

But just as we all know what peace *is*, we certainly know what peace is *not*.

Peace based on repression cannot be true peace and is secure only when individuals are free to direct their own governments.

Peace based on partition cannot be true peace. Put simply: nothing can justify the continuing and permanent division of the European continent. Walls of partition and distrust must give way to greater communication for an Open World. Before leaving for Geneva, I shall make major new proposals to achieve this goal.

Peace based on mutual fear cannot be true peace because staking our future on a precarious balance of terror is not good enough. The world needs a balance of safety.

Finally, a peace based on averting our eyes from trouble cannot be true peace. The consequences of conflict are every bit as tragic when the destruction is contained within one country.

Real peace is what we seek, and that is why today the United States is presenting an initiative that addresses what will be a central issue in Geneva—the resolution of regional conflicts in Africa, Asia, and Central America.

Our own position is clear: as the oldest nation of the New World, as the first anti-colonial power, the United States rejoiced when decolonization gave birth to so many new nations after World War II. We have always supported the right of the people of each nation to define their own destiny. We have given $300 billion since 1945 to help people of other countries. And we have tried to help friendly governments defend against aggression, subversion, and terror.

We have noted with great interest similar expressions of peaceful intent by leaders of the Soviet Union. I am not here to challenge the good faith of what they say. But isn't it important for us to weigh the record, as well?

—In Afghanistan, there are 118,000 Soviet troops prosecuting war against the Afghan people.

—In Cambodia, 140,000 Soviet-backed Vietnamese soldiers wage a war of occupation.

—In Ethiopia, 1,700 Soviet advisers are involved in military planning and support operations along with 2,500 Cuban combat troops.

—In Angola—1,200 Soviet military advisers involved in planning and supervising combat operations, along with 35,000 Cuban troops.

—In Nicaragua—some 8,000 Soviet bloc and Cuban personnel, including about 3,500 military and secret police personnel.

All of these conflicts—some of them under way for a decade—originate in local disputes but they share a common characteristic: they are the consequence of an ideology imposed from without, dividing nations and creating regimes that are, almost from the day they take power, at war with their own people. And in each case, Marxism-Leninism's war with the people becomes war with their neighbors.

These wars are exacting a straggering human toll and threaten to spill across national boundaries and trigger dangerous confrontations. Where is it more appropriate than right here at the United Nations to call attention to Article 2 of our Charter which instructs members to refrain "from the threat or use of force against the territorial integrity or political independence of any state. . . ."?

During the past decade these wars played a large role in building suspicions and tensions in my country over the purpose of Soviet policy. This gives us an extra reason to address them seriously today.

Last year I proposed from this podium that the United States and Soviet Union hold discussions on some of these issues, and we have done so. But I believe these problems need more than talk.

For that reason, we are proposing, and are fully committed to support, a regional peace process that seeks progress on three levels:

First, we believe the starting point must be a process of negotiation among the warring parties in each country I've mentioned—which, in the case of Afghanistan, includes the Soviet Union. The form of these talks may and should vary, but negotiations—and an improvement of internal political conditions—are essential to achieving an end to violence, the withdrawal of foreign troops and national reconciliation.

There is as second level: once negotiations take hold and the parties directly involved are making real progress, representatives of the United States and the Soviet Union should sit down together. It is not for us to impose any solutions in this separate set of talks. Such solutions would not last. But the issue we should address is how best to support the ongoing talks among the warring parties. In some cases, it might well be appropriate to consider guarantees for any agreements already reached. But in every case the primary task is to promote this goal: verified elimination of the foreign military presence and restraint on the flow of outside arms.

Finally, if these first two steps are successful, we could move on to the third—welcoming each country back into the world economy so its citizens can share in the dynamic growth that other developing countries—countries that *are* at peace—enjoy. Despite past differences with these regimes, the United States would respond generously to their democratic reconciliation with their own people, their respect for human rights, and their return to the family of free nations.

Of course, until such time as these negotiations result in definitive progress, America's support for struggling democratic resistance forces must not and shall not cease.

This plan is bold. And it is realistic. It is not a substitute for existing peace-making efforts; it complements them. We are not trying to solve every conflict in every region of the globe, and we recognize that each conflict has its own character. Naturally other regional problems will require different approaches. But we believe that the recurrent pattern of conflict that we see in these five cases ought to be broken as soon as possible.

We must begin somewhere, so let us begin where there is great need and great hope. This will be a clear step foward to help people choose their future more freely. Moreover, this is an extraordinary opportunity for the Soviet side to make a contribution to regional peace which in turn can promote future dialogue and negotiations on other critical issues.

With hard work and imagination, there is no limit to what, working together, our nations can achieve. Gaining a peaceful resolution of these conflicts will open whole new vistas for peace and progress—the discovery that the promise of the future lies not in measures of military defense, or the control of weapons, but in the expansion of individual freedom and human rights.

Only when the human spirit can worship, create, and build, only when people are given a personal stake in determining their own destiny and benefitting from their own risks do societies become prosperous, progressive, dynamic, and free.

We need only open our eyes to the economic evidence all around us. Nations that deny their people opportunity—in Eastern Europe, Indochina, southern Africa, and Latin America—without exception are dropping further behind in the race for the future.

But where we see enlightened leaders who understand that economic freedom and personal incentive are key to development, we see economies striding forward. Singapore, Taiwan, and South Korea—India, Botswana, and China. These are among the current and emerging success stories because they have the courage to give economic incentives a chance.

Let us all heed the simple eloquence in Andrei Sakharov's Nobel Peace Prize message: "International trust, mutual understanding, disarmament and international security are inconceivable without an open society with freedom of information, freedom of conscience, the right to publish and the right to travel and choose the country in which one wishes to live."

At the core, this is an eternal truth. Freedom works. That is the promise of the Open World and awaits only our collective grasp. Forty years ago, hope came alive again for a world that hungered for hope. I believe fervently that hope is still alive.

The United States has spoken with candor and conviction today, but that does not lessen these strong feelings held by every American: It's in the nature of Americans to hate war and its destructiveness. We would rather wage our struggle to rebuild and renew, not to tear down. We would rather fight against hunger, disease, and catastrophe. We would rather engage our adversaries in the battle of ideals and ideas for the future.

These principles emerge from the innate openness and good character of our people—and from our long struggle and sacrifice for our liberties and the liberties of others. Americans always yearn for peace. They have a passion for life. They carry in their hearts a deep capacity for reconciliation.

Last year at this General Assembly, I indicated there was every reason for the United States and the Soviet Union to shorten the distance between us. In Geneva—the first meeting between our heads of government in more than 6 years—Mr. Gorbachev and I will have that opportunity.

So, yes, let us go to Geneva with both sides committed to dialogue. Let both sides go committed to a world with fewer nuclear weapons—and some day with none. Let both sides go committed to walk together on a safer path into the 21st century and to lay the foundation for enduring peace.

It is time, indeed, to do more than just talk of a better world. It is time to act. And we will act when nations cease to try to impose their ways upon others. And we will act when they realize that we, for whom the achievement of freedom has come dear, will do what we must to preserve it from assault.

America is committed to the world, because so much of the world is inside America. After all, only a few miles from this very room is our Statue of Liberty, past which life began anew for millions—where the peoples from nearly every country in this hall joined to build these United States.

The blood of each nation courses through the American vein—and feeds the spirit that compels us to involve ourselves in the fate of this good Earth. It is the same spirit that warms our heart in concern to help ease the desperate hunger that grips proud people on the African continent.

It is the internationalist spirit that came together last month when our neighbor, Mexico, was struck suddenly by an earthquake. Even as the Mexican nation moved vigorously into action—there were heartwarming offers by other nations offering to help and glimpses of people working together, without concern for national self-interest or gain.

And if there was any meaning to salvage out of that tragedy, it was found one day in a huge mound of rubble that was once the Juarez Hospital in Mexico City.

A week after that terrible event and as another day of despair unfolded—a team of workers heard a faint sound coming somewhere from the heart of the crushed concrete and twisted steel. Hoping beyond hope, they quickly burrowed toward it.

As the late afternoon light faded, and racing against time, they found what they had heard—and the first of three baby girls—newborn infants—emerged to the safety of the rescue team.

Here is the scene through the eyes of one who was there. "Everyone was so quiet when they lowered that little baby down in a basket covered with blankets. The baby didn't make a sound, either. But the minute they put her in the Red Cross ambulance everybody just got up and cheered."

Well, amidst all that hopelessness and debris came a timely—and timeless—lesson for us all. We witnessed the miracle of life.

It is on this that I believe our nations can make a renewed commitment. The miracle of life is given by One greater than ourselves. But once given, each life is ours to nurture and preserve—to foster not only for today's world but for a better one to come.

There is no purpose more noble than for us to sustain and celebrate life in a turbulent world. That is what we must do now. We have no higher duty—no greater cause as humans. Life—and the preservation of freedom to live it in dignity—is what we are on this Earth to do.

Everything we work to achieve must seek that end so that some day our prime ministers, our premiers, our presidents and our general secretaries will talk not of war and peace—but only of peace.

We've had 40 years to begin. Let us not waste one more moment to give back to the world all that we can in return for this miracle of life.

Thank you.

THE 75TH YEAR OF SCOUTING IN AMERICA

HON. IKE SKELTON

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 24, 1985

Mr. SKELTON. Mr. Speaker, Longfellow wrote in "My Lost Youth": A boy's will is the wind's will, and the thoughts of youth are long, long thoughts.

That spirit of youthful adventure, of high hope and valiant enterprise, has always been at the heart of the Boy Scout movement. In this 75th anniversary year of Scouting in America, I am glad to join with those around the world who are celebrating the ideals and the achievements that have marked the Boy Scouts since their beginnings at the turn of the century.

The spirit of scouting was conceived in 1899–1900 during the long ordeal of Mafeking—a town under fierce siege for over 200 days in the Boer War and bravely defended by Robert Baden-Powell, destined to be founder of Scouting. His "Scouting for Boys" in 1906 was a call to British youth

and youth everywhere. The first troops were begun in 1908, and by 1909 over 11,000 Boy Scouts gathered for a jamboree at London. In 1910 the movement was introduced into America by Daniel C. Beard, Ernest L. Seton, and James West. These were men who hoped by precept and example to make it possible for boys to pass from youth to manhood strong in character and in body alike. "Mens sana in corpore sano"—the historic ideal of the ancient Greeks—was a guiding principle in the Scouting movement: "A healthy mind in a healthy body." By the application of this ideal in daily life, Scouting sought to instill values into boys that would carry them into adult life as happy, useful citizens, dedicated to the common good.

Since that time three-quarters of a century ago over 70 million Americans have participated in Scouting in one form or another. That tremendous statistic becomes very personal for me when I recall that I am myself an Eagle Scout and my son Page became an Eagle Scout recently. Scouts have been prominent in every area of our Nation's life from 1910 to the present day, exemplifying in their lives principles and values for which Scouting stands. The roster of former Scouts includes many Members of Congress, President Reagan, former President Ford, and many, many more.

It would be difficult to overstate the service rendered by Scouting to the quality of American life in any era, but especially in the early decades of this century. This was a time of rapid urbanization and industrialization. Social and economic changes were transforming the very face of our country. The benefits of the outdoor life and of health-giving activities in the open air and under God's free Sun and skies were too often denied to millions of boys. A New York City study done at that time indicated that 93 percent of the students in local public schools were anemic and in need of open air treatment. The lure of hills and the woods, and the lore of generations of woodsmen and naturalists, conspired to win the hearts and minds of boys—and of the men who helped them—who felt themselves to be, in the famous phrase of the poet Keats, too "long in city pent."

To one who has been long in city pent,
'Tis very sweet to look into the fair
And open face of heaven.

Something of that spirit, that feeling for the wildness of nature and its challenge to a boy's will, has always been present in Scouting.

But also the early decades of this century were a time of heavy immigration from the Old World. Newcomers were often confused and perplexed by the conditions of American life. The growing diversity of ethnic, cultural, and religious backgrounds underlined the need for binding values, ways by which people of different traditions could be brought together. Scouting was one such means as it still is. The stated purpose of the Scouts' "to promote the ability of boys to do things for themselves and teach them patriotism, courage, and self-reliance," was itself a response to the urgent necessity of the times. As members of the Boy Scouts of America, boys acquired a sense of larger loyalty that strengthened the Nation's moral fabric.

The theme of self-reliance runs all through our history, a theme strikingly articulated by Emerson in his essay of 1841: "Discontent is the want of self-reliance; it is infirmity of will." The call to boys to cultivate self-reliance in Scouting was balanced by its message of patriotism, a concern for the common good and for civic virtue.

It is hardly surprising that Scouting has had such great appeal to American boys in every generation. Chartered by Congress in 1916, in the midst of the Great European War into which this country would be drawn within a year, the movement grew from 100,000 in 1914 to over 1 million by the outbreak of the Second World War.

At this anniversary occasion, it is fitting that we look again at the Scout oath and ponder its significance: Every Scout pledges on his honor "to do my duty to God and my country, to help other people at all times, to keep myself physically strong, mentally awake, and morally straight." That oath reminds us—and I fear we need reminding—that duty to God precedes all other obligations. It is an oath that could not be permitted in any totalitarian country, past or present. It is an oath deeply rooted in the history and traditions of America. The Scout Law lists the qualities of a Scout in a well-known litany of virtues: "Trustworthy, Loyal, Helpful, Friendly, Courteous, Kind, Obedient, Cheerful, Thrifty, Brave, Clean, and Reverent." An organziation which tries to foster such ideals is surely deserving of respect from all who care deeply for the quality of our Nation's life. And I would note the presence of reverence in that sequence: Reverence as an attitude defined by the dictionary as "profound respect mingled with love and awe." An irreverent generation is ultimately an uncaring people. It is the sense of duty, to God, to country, and to other people, that must begin and end in reverence, that profound respect for the source of life and author of liberty.

Think for a moment how deeply the traditions of religious faith inform and sustain the foundations of our national life. Freedom of conscience and of worship is at the heart of our country's heritage, and such freedom would be empty without the vibrant reality of faith in all its rich diversity. The role of religion in our common heritage was definitively expressed by George Washington himself in his first inaugural, 1739:

No people can be bound to acknowledge and adore the Invisible Hand which conducts the affairs of men more than those of the United States. Every step by which they have advanced to the character of an independent nation seems to have been distinguished by some token of providential agency; and in the important revolution, just accomplished in the system of their united government the tranquil deliberations and voluntary consent of so many distinct communities from which the event has resulted cannot be compared with the means by which most governments have been established without some return of pious gratitude, along with a humble anticipation of the future blessings which the past seem to presage.

That "Spirit of pious gratitude" invoked by Washington is, I venture to assert, the same spirit that finds expression in the Scout Oath. Our "duty to God" involves no creedal or sectarian identity. It is a board-based commitment to the Power "that hath made and preserved us as a nation." To be sure, we are free not to make such a commitment. But then we are clearly rejecting the moral and spiritual tenets on which Scouting is founded.

"Duty to country, patriotism, takes many forms also. It may means service in the Armed Forces, or it may mean the quiet obligations of citizenship that are present in every area of human life, in family life, in business and the arts and sciences, the professions, and the like. It is the loyalty that binds State and Nation into indissoluble union.

Above all, Scouting is concerned with the transformation of boys into men. Its dedication to the work ethic, education, morality, reverence, inculcates these ideals as a very way of life, giving direction, and purpose to the energies and enthusiasms of boys. So it is truly that we may say with the poet:

A boy's will is the wind's will,
And the thoughts of youth are long, long thoughts.

I congratulate and commend the Boy Scouts of America on this, their 75th year, confident that their story of achievement, good times, and service to all has only begun.

HUMAN RIGHTS IN THE SOVIET UNION

HON. RON WYDEN

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 24, 1985

Mr. WYDEN. Mr. Speaker, the summit meeting between President Reagan and Soviet Secretary General Gorbachev is scheduled to begin in a little over 2 weeks. It is my hope that the subject of human rights in the Soviet Union will be on the agenda for serious discussion at Geneva.

My wife, Laurie, is a member of the Congressional Human Rights Caucus Committee of 21 and is working for the release of Mark Nepomniashchy. Mr. Nepomniashchy, a 53-year-old electrical engineer from Odessa, was arrested in October, 1984, and charged with "circulation of false materials to defame the Soviet state." Mr. Nepomniashchy is now serving a 3-year sentence in a labor camp.

He was detained by the police following the arrest of Yakov Levin, who was to be married to Mr. Nepomniashchy's daugther, Yehudit. Mr. Levin was arrested a few days before his wedding and Mr. Nepomniashchy was arrested for appealing on

Levin's behalf. Mr. Levin was also sentenced to 3 years in a labor camp and is now serving that term.

Before his arrest, Mr. Nepomniashchy wrote an open letter "to the people and government of Israel and to all people of good will." I quote from a passage of the letter:

"I ask you to explain to the world that people are sentenced here just because of their desire to be Jews. I ask you to stop these shameful reprisals. I ask for your help. It is already 5 years since my family tried to be repatriated to Isael. We have suffered a lot for the action of the KGB. Our home was searched three times. We were taken for interrogation more than once. We were demanded to stop the teaching of Hebrew, the observance of our holidays and Shabbats. The chief of the Jewish department of the Odessa KGB, Colonel Krasnov, promised to introduce me to Shcharansky and to imprison me in the same place. . . . Can I lie low when my daughter is deprived of the right to marry the man she loves? Must they wait for my kin to become extinct? Perhaps this appeal is our only defense. Please help my daughter come to Israel. Please help her bridegroom to become free. Please help them to be married and to live in Israel."

We are asking President Reagan to discuss the case of Mark Nepomniashchy and the many, many others like him, with Mr. Gorbachev. The issue of human rights needs to be discussed and we request that it be at the top of the agenda at Geneva. We also request that President Reagan urge Mr. Gorbachev to reaffirm and uphold the promise the Soviet Union made at Helsinki to honor the right of emigration.

The Committee of 21 will continue to speak on behalf of Soviet prisoners of conscience to let Soviet leaders know of their commitment to human rights. My wife and I will continue to work for the release of Mark Nepomniashchy and to write to him and send our best wishes for his good health and that of his family.

AMERICA'S HOMELESS

HON. GARY L. ACKERMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 24, 1985

Mr. ACKERMAN. Mr. Speaker, I rise today to join my colleagues from around the Nation in voicing my deep concern for the plight of America's homeless. Public efforts in the past have clearly been inadequate to combat this national problem.

There may be as many as 3 million homeless Americans, and their legions are growing in epidemic proportions—much as 38 percent a year. While we used to regard them as primarily older male alcoholics and drug addicts, the typical homeless person today is 34 years old. Twenty-one percent are families with children; 13 percent are single women. More than half of the homeless have completed high school; 30 percent have attended college. An alarming number of people are newly homeless because of sudden unemployment, eviction, or family crisis. More and more, the emergency shelters brim with parents tightly grasping the small hands of their children.

Despite this growing tragedy and the lack of adequate emergency shelter, the Reagan administration response is nothing less than willful neglect. It proposed this year a 2-year moratorium on spending for federally assisted housing for the poor, which would slash the number of units by some 65,000. What's more, the administration wants to end the Community Services Block Grant Program, which has provided over $125 million in emergency food and shelter funds for the poor, and stop FEMA's Emergency Food and Shelter Program.

I am deeply troubled by the huge budget deficit, as are all of us here today. And while some spending cuts for domestic programs may be in order, we cannot ignore our responsibility to care for those unable to care for themselves. Sacrifices must be shared fairly, but those who have hit rock bottom have nothing left to sacrifice. The largest publicly sponsored shelter system is run by my hometown of New York City. It cares for more than 6,000 people, twice as many as just 2 years ago, and more than during the Great Depression—but deeply insufficient in a city where officials estimate 20,000 homeless under 21 years alone. The city board of health says an average of one homeless person a day is now found dead in the streets. It is painfully clear that despite the best efforts of local governments and private organizations, we have failed to meet our obligation.

H.R. 3500 is a small but powerful helping hand for the homeless. It extends the authorization of the FEMA Shelter Program, establishes new homeless shelter grants to supplement the local government and private efforts, and begins a new program of support services for the homeless. For the Congress to do less would be not only to shirk our responsibility, but also to condemn millions more Americans to poverty, despair, and death.

I urge my colleagues to head the plea of the homeless, and to defeat the Latta amendment.

MEXICO'S EARTHQUAKE REMEMBERED

HON. LES AuCOIN

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 24, 1985

Mr. AuCOIN. Mr. Speaker, in Mexico City, September 19 will long be remembered as the day of disaster and mourning. It will also be remembered as the day people around the world reached out to help their fellow human beings.

In the wake of two massive earthquakes, skyscrapers were reduced to a mass of twisted rubble. Residents were trapped underneath piles of concrete and steel. Thousands died. Many were found miraculously alive.

During the past month, people all over the world have lent their support to helping Mexico City dig out from under the terrible economic aftershocks of these earthquakes. In my home State of Oregon, Northwest Medical Teams of Portland sent the first group of American doctors with much-needed supplies to aid earthquake victims. The Portland Red Cross raised donations to set up a temporary shelter and information center for victims' relatives.

Zapatas, a local Portland restaurant, donated its dining room for an event to benefit Mexico City. The Ecumenical Ministries of Portland collected disaster relief that will be distributed throughout Mexico. KVAS radio in the coastal town of Astoria ran a 3-day campaign to raise funds for Mexico City in a community that continues to fight an uphill battle for economic survival.

All Oregonians have certainly seen their share of hard times, and that's what makes these grassroots relief efforts that much more meaningful.

With our help, the Mexican people can start rebuilding their capital city and their lives.

TEMPLE BETH SOLOMON OF THE DEAF OBSERVES 25TH ANNIVERSARY

HON. HOWARD L. BERMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 24, 1985

Mr. BERMAN. Mr. Speaker, I rise today to pay tribute to one of my community's finest organizations. Temple Beth Solomon of the Deaf is celebrating its 25th year in existence. It is believed to be the oldest synagogue for the deaf in the world. Temple Beth Solomon is a truly unique and vital organization with an outstanding record of accomplishments. As the Representative of California's 26th District, I am proud to share some of Temple Beth Solomon's accomplishments with my colleagues.

On June 10, 1960 Temple Beth Solomon held its first Shabbat service at Temple Israel of Hollywood. Prior to 1965, the temple was known as the mobile congregation because the members had to travel to host congregations. Finally, in 1965 Temple Beth Solomon bought the buildings and property of another synagogue that was relocating, finding a permanent home in Arleta, a Los Angeles suburb in the San Fernando Valley.

Efforts are always being made to develop new activities at Temple Beth Solomon. A particularly successful program was on the deaf victims of the Holocaust. It included the testimony of several death-camp survivors, an exhibition of works by the deaf artist David Bloch, who was imprisoned in Dachau, and a performance in sign language of songs of the Warsaw Ghetto.

Today, regular Sabbath services in English and Hebrew in both sign language and sound are conducted. Beth Solomon has 246 members, about 90 percent deaf or

hearing impaired. They include adults and children born deaf, those who have suffered progressive hearing loss, and hearing relatives and others committed to using sign language.

It is my distinct pleasure and honor to join with my colleagues to pay tribute to Temple Beth Solomon, an invaluable resource to the community and a treasure for all.

RULE ON H.R. 2187 SUPERFUND AMENDMENTS OF 1985

HON. DAN ROSTENKOWSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 24, 1985

Mr. ROSTENKOWSKI. Mr. Speaker, I take this opportunity to inform my colleagues that the Committee on Ways and Means yesterday favorably ordered reported to the House of Representatives H.R. 2817, the Superfund Amendments of 1985.

I wish to serve notice, pursuant to the rules of the Democratic caucus, that I have been instructed by the Committee on Ways and Means to seek less than an open rule for the consideration of the provisions of this bill within the jurisdiction of the Committee on Ways and Means by the House of Representatives.

THE PASSING OF SIDNEY RABB

HON. BARNEY FRANK

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 24, 1985

Mr. FRANK. Mr. Speaker, many people in the Greater Boston area and elsewhere were saddened last week by the death of Sidney Rabb. Sidney Rabb was a leader on a national scale in many areas. As a business person, he built one of the great supermarket chains of our country, along with his brothers and other members of his family, the Stop & Shop chain. And he led that chain into diversification into other retail businesses which have also been very successful.

As a public citizen, he was an active supporter of a variety of civic causes, and was often called on by high officials to serve. Among the institutions which benefited enormously from Sidney Rabb's wisdom, energy, and sense of commitment, is the Boston Public Library. His charitable works were also numerous and substantial. And he was a pillar of strength for the Jewish community in Greater Boston. I knew Mr. Rabb for 15 years, during my service as an aide to the mayor of Boston and continuing through my work in the State legislature, when I represented the district he lived in, and when my election mornings at the polls were always brightened by Sidney Rabb's early appearance to vote on his way to work.

Well beyond what some people consider retirement age, Sidney Rabb continued to be a creative force in the business, civic, and charitable worlds. He was an extraordinarily gifted man—in intelligence, in energy, in business sense and in compassion. And all of us are fortunate that he was as willing as he was to share those gifts with so many others. Sidney Rabb's death is a sad event for many of us who had the enormous benefit of his friendship, and for even more who benefited—sometimes without even realizing it—from his good works in so many areas.

CHINA NUCLEAR AGREEMENT

HON. ESTEBAN EDWARD TORRES

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 24, 1985

Mr. TORRES. Mr. Speaker, reports over the past few days have indicated that China has been negotiating with Iran to supply nuclear technology of a sensitive nature. These reports should reinforce any doubts we may have about the administration's proposed agreement for nuclear cooperation with China. Congress would be making a grave mistake to approve the sale of nuclear technology to China.

The agreement, as it was submitted, does not satisfy important criteria established by law, which must be met in nuclear cooperation agreements. It does not contain adequate safeguards against the spread of nuclear materials and technologies to other countries. Furthermore, it does not guarantee that nuclear materials will not be used to make a bomb.

I call on the President to withdraw the agreement until we have answered all the questions surrounding China's nuclear export activities. The acquisition of nuclear weapons by Iran is a dangerous scenario; one that must be avoided at all costs.

VOYAGER URANUS ENCOUNTER—ANOTHER JPL FIRST

HON. CARLOS J. MOORHEAD

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 24, 1985

Mr. MOORHEAD. Mr. Speaker, the week of October 7 the congressional space caucus sponsored a conference on the future of science for the purpose of furthering the process of achieving a long-term national space policy. The caucus had been most fortunate in assembling an array of eminent scientists from all disciplines of space science. I would like to pay special thanks to Dr. Edward Stone of the California Institute of Technology, who served on the panel discussing lunar and planetary exploration, for sharing his knowledge with the Congress. Dr. Stone, who is project scientist for the Voyager to Uranus Program, presented a most fascinating portrait of this mission.

I would like to draw the attention of my colleagues to some of the particulars of the Voyager Uranus mission. Uranus, the seventh planet from the Sun, is so far from Earth, at a distance of nearly 2 billion miles, that its discovery in 1781 doubled the size of the known solar system.

The third largest of the planet, Uranus is circled by at least nine charcoal-black rings. Unlike any of the other planets except Pluto, Uranus lies on its side. It may have been at an early stage of formation when it was tipped off its original axis in a violent collision with another body.

As Uranus travels the solar system in this unusual position, one pole remains in sunlight for 42 years while the other is dark; then for the next 42 years, the situation is reversed. Currently, its sunlit southern pole is framed at the center of the nine rings, like a giant bull's-eye.

The Voyager 2 spacecraft is now headed toward that distant target, after having completed highly successful investigations of Jupiter in 1979 and Saturn in 1981. Voyager will fly past Uranus on January 24, 1986, passing within 64,500 miles of the planet's cloud-tops. The spacecraft's trajectory, which will eventually take it out of the solar system, offers the only opportunity in the foreseeable future to conduct closeup studies of Uranus.

Thus Uranus will be the third planet encountered by the spacecraft in the first 9 years of its 3-billion-mile path looping through and then out of the solar system.

Because of its remoteness, Uranus is difficult to study, but a surprising amount has been learned through painstaking studies from observatories on Earth. Even so, information about the planet is sparse when compared to what is known of planets nearer to Earth.

The Voyager encounter will be the most intensive study of Uranus ever undertaken, with initial observations beginning November 4, 1985. The spacecraft's last look at the planet will occur on February 26, 1986. Many of the highest priority measurements will be obtained on January 24, 1986, during the 6 hours it takes Voyager to sweep through the Uranian system. In half a day, scientists will gain more knowledge of the planet and its moon, strange ring system, and unique magnetic field than has been learned about Uranus in more than 200 years of astronomical study.

Almost as soon as the Voyager/Uranus encounter ends, scientists and engineers will begin detailed planning of the Voyager's 1989 encounter with Neptune.

As it travels toward its next target, the spacecraft will continue fields and particles experiments in the region between Uranus and Neptune. In addition, engineers will use the 3½ year cruise time to explore new ways to improve Voyager's ability to collect, compress, and return data from Neptune to Earth.

In the late 1990's, both Voyagers are expected to find the heliopause—the boundary where interstellar space begins. Voyager 1 will travel in the direction of the star Rasalhague (Alpha Ophiuchus); Voyager 2 toward Sirius (Alpha Canis Majoris).

With the conclusion of the Voyager mission, Pluto remains the only planet in our Sun's system unvisited by U.S. spacecraft.

CONGRESSMAN GEORGE MILLER HONORS PUBLISHER DEAN LESHER

HON. GEORGE MILLER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 24, 1985

Mr. MILLER of California. Mr. Speaker, next Tuesday, October 29, will be Dean Lesher Day in Contra Costa County, CA. I know that Members of the House of Representatives will want to join me in saluting this leading citizen of California.

Dean Lesher publishes several newspapers in my district, but that is far from the complete story of this extraordinary businessman and civic leader. He has been an unqualified advocate of Contra Costa County, and a vigorous promoter of higher education throughout the State of California.

Dean was born not far from this Capitol building, in Williamsport, MD, and studied at the University of Maryland and Harvard law. He began his professional life as an attorney in Missouri. But he obviously had far greater goals.

Today, Dean Lesher personally presides over Lesher Communications, Inc., including 7 daily newspapers, 12 weekly papers, 2 radio stations as well as other newspapers. Five of those newspapers circulate within my own congressional district.

As a longtime proponent of higher education, Dean Lesher has served on the board of governors of the community colleges, the board of trustees of the California State University system, and the California Postsecondary Education Commission.

His many achievements in the field of journalism have won for him and his newspapers many distinguished awards, including California Publisher of the Year, Education Publisher of the Year, and Suburban Newspaper Publisher of the Decade.

Perhaps for Dean, the most memorable of these was the award for his outstanding contributions to the newspaper industry presented to him at the White House in 1983 by President Ronald Reagan.

When Dean Lesher came to California more than 40 years ago, Contra Costa was a thinly populated, heavily rural county which few thought of as an integral part of the bay area.

Today, our county is a booming one, not just part of the bay area, but the central hub of the east bay. Industry, both heavy and light, and a vigorous farming community share this county with business complexes, shopping malls, and homes for more than 600,000 people.

This remarkable change did not happen solely as the result of Dean Lesher's efforts. But perhaps more than any other single individual, Dean Lesher foresaw what this county could become, and he nurtured that growth through his newspaper and through his service in many business and civic organizations over the years.

The designation of October 29 by our county board of supervisors and the mayors' conference as Dean Lesher Day is in recognition not only of his journalistic achievements, but also in gratitude for his unqualified promotion of the county in which we live.

I know that all Members of this Congress will join me in congratulating Dean Lesher, and his wife, Margaret, upon his being honored by the county which he has spent much of his life helping to build.

NATIONAL ORGANIZATION OF ITALIAN AMERICAN WOMEN

HON. JOSEPH J. DioGUARDI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 24, 1985

Mr. DioGUARDI. Mr. Speaker, I am pleased to have this opportunity to salute the members of the National Organization of Italian American Women.

The NOIAW is holding a salute to Italian American talent on Sunday night at Mercy College. As an American and the son of Italian immigrants, I take great pride in the accomplishments of the sons and daughters of the Italian Republic who have made America our home.

The Sunday program features Carozella Napoletano, a delightful musical featuring popular neapolitan songs and dances, as well as arrias from famous operas. This presentation is produced and directed by Mario DiGennaro.

The musical will be followed by an exhibition of the works of Italo-American artists and a champagne reception. The event will be a day of pride for all Americans of Italian heritage.

FARM CREDIT—HOUSE CONCURRENT RESOLUTION 190

HON. RON MARLENEE

OF MONTANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 24, 1985

Mr. MARLENEE. Mr. Speaker, a blue ribbon, nonpartisan commission to evaluate the economy-threatening problems of the Farm Credit System is desperately needed.

The fate of the Farm Credit System must soon be decided. Some analysts believe that we have only until the end of the year to resolve the problems of some system banks. It is the result of years of farmers selling their products at prices below the cost of production. Unless we begin at once to address the situation, we shall witness a disaster that will reverberate across rural America and impact the entire Nation.

I have introduced, and 65 Members have cosponsored, House Concurrent Resolution 190, which calls on the President to appoint a nonpartisan commission to examine the grave situation in the Farm Credit System and make recommendations to the Congress within 3 weeks of its creation.

All of us in a position of responsibility must immediately work together to encourage the formulation of solutions that can restore the soundness and viability of the Farm Credit System. The administration must acknowledge the crisis and join us in this effort to see that the System is sound and can once again provide an adequate supply of farm credit at reasonable interest rates.

There has been much speculation about the administration's attempts to craft a proposal. However, I must caution the administration that any proposal that recommends further deluting of local control is unacceptable to this Member. To concentrate further authority in Washington, DC, will only exacerbate the problem, a problem brought on it part by the isolation of the Farm Credit Administration's officials in our Capital. The strength of the System lies in its farmer borrowers, not in the bureaucrats who have vacillated, equivocated, and delayed until the crisis is upon us.

Also, I believe we should move the Farm Credit Administration out of Washington—to Kansas City, Denver, or Billings. The Farm Credit System has moved away from the farmer. It is time to bring it back to the grassroots.

Mr. Speaker, the future of family farming and farm credit, and the health of the American economy depends in large measure on what we do here.

The establishment of this Commission could be the conduit through which the Farm Credit System will be saved, before it is too late. It should be pointed out that the Commission, in addition to making recommendations, would be a valuable asset in providing an expert evaluation of all proposals to reform the Farm Credit System.

I urge my colleagues to join us in cosponsoring House Concurrent Resolution 190.

A FIRSTHAND ACCOUNT OF NICARAGUAN FREEDOM FIGHTERS

HON. NEWT GINGRICH

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 24, 1985

Mr. GINGRICH. Mr. Speaker, many times I've addressed the House of Representatives on the nature of communism and the fact that Communist governments work systematically to deceive the American media and the American public. So it's frustrating but not surprising when we see pro-Communist Nicaragua propaganda articles in many American periodicals.

Today, I'm presenting my colleagues an objective eyewitness account of Freedom Fighters in Nicaragua which was published in the Toronto Sun last February. This article was written by a Canadian journalist, Pete Bertie, who has repeatedly traveled with the FDN in areas of conflict in Nicaragua. I urge my colleagues to examine this account and to recognize the real nature of the struggle defenders of freedom are facing in Nicaragua:

POWER OF THE CONTRAS

The first thing you notice on entering the FDN's base camp, hidden in a secluded valley on the Nicaragua-Honduras border, is its remarkable resemblance—except for the weapons—to a Boy Scout camp. We think of Somoza's Guardia as tough professionals with hard eyes and dubious pasts, so it's a shock to find yourself among a couple of thousand high-spirited young men and women with ready smiles and an average age of 20.

Half of the young people had arrived so recently they had neither uniforms nor weapons, and were going through basic training with sticks instead of rifles. Among the would-be guerrillas was Carla, 16, a student from Chinandega. She had fled that city after participating in a large anti-Sandinista demonstration last August which was attacked by the "turbas divinas"—mobs, reportedly composed mainly of militiamen and policemen in plainclothes, unleashed by the authorities on anyone who incurs their displeasure. * * *

Several boys I spoke to had a more urgent reason for fleeing—the forced recruitment by the Sandinistas of all able-bodied men over 12, a hugely unpopular measure that has recently turned the trickle of refugees into a flood. FDN officials claim young men are streaming north at a rate of almost 100 a week to escape the Sandinista regime and then return to fight it.

At dusk my second day, bedlam broke loose inside the camp. Civilian messengers from northern Jinotega province had brought news of a 90-Man Sandinista patrol near the river Coco, which at that point forms the international border. The FDN considers the northernmost parts of Nicaragua its "zona controlada," or controlled zone, into which the Sandinistas venture at their peril, and then only in battalion strength.

The Special Operations Force was immediately assembled, 55 elite soldiers armed to the teeth with M60 machineguns, M79 grenade launchers and 60mm mortars in addition to the standard Kalashnikov and FAL automatic rifles, and trained to cover short distances fast.

I was invited to join their search-and-destroy mission, and within half an hour we were marching into some of the roughest mountain territory in Central America.

There followed a gruelling trek of 13 hours, broken by four hours sleep in an abandoned hut, along mountain trails ankle-deep in treacherous mud and intersected by deep ravines. I marvelled at the strength of these small but wiry men, laden with 60 lb. packs and weapons half as large as themselves, while I staggered along with a mere 15 lb. pack and free hands. they laughed when I comented on it later, explaining: "We're campesinos, we grew up in these mountains."

The afternoon was spent in our hammocks and I had the leisure to observe that besides being very young, my companions were all wearing rosaries and crucifixes around their necks, apparently part of the uniform. It was explained to me that the FDN is devoutly Christian—90% Catholic and 10% evangelical—and that for many guerrillas it was religious persecution, rather than the Sandinistas' political or economic policies, that made them join.

I also learned that all but six of this troop were campesinos, simple country boys who in many cases could not read or write, and that seven were deserters from the Sandinistas' armed forces. Just two had served briefly in the Guardia: Comandante Isaac, 29, and Xavier 26, his second-in-command. Neither seemed much like a man with a criminal past, and they smiled patiently when I quizzed them about their service.

The Sandinistas call the FDN "la Guardia," and the original Contras were indeed just that. They have long since gone, their places taken by the new breed of guerrilla exemplified by my companions. I am told there remain about 100 ex-Guardsmen, those whose democratic credentials stood the test during the stringent weeding-out of those with dubious pasts conducted by the American CIA in the days when "the Company" was still advising the Contra movement. The small contingent of ex-Guardsmen in the ranks of the FDN is in any case vastly outnumbered by the ex-Sandinistas fighting alongside them, an estimated 20% of their total strength.

The Special Operations force returned to base next day, having failed to make contact with the enemy. However, it was good practice for the real thing, the departure of Task Force Independencia for the Nicaraguan heartland one week later.

"Nos vemos en Managua!"

With this ringing farewell "see you in Manague," Task Force Independencia swung out of base camp on the hot afternoon of Oct. 30.

A newly-constituted force of only 150 men, Independencia was led by Comandante Invisible, a 34-year-old career soldier with a friendly, unassuming manner that belied a tough and decisive character. His job was to take these troops down to the southern part of Jinotega province and make a nuisance of himself, for which purpose he was taking along a string of mules laden with C4 plastic explosives, useful for blowing up everything from electricity pylons to bridges.

The men marched jauntily to the accompaniment of rock music blaring from a small ghetto-blaster, which I slowly realized they were intending to take through the mountains with them. "We have to keep abreast of the news while we're inside," said Invisible with a grin.

The pace was relaxed, and for the next seven days our routine would be to rise at dawn and march until early afternoon, select an overnight campsite and spend the rest of the day barbecuing a cow or a couple of pigs. Sometimes the campsite was a mountaintop, our hammocks along between the trees, but usually we were made welcome in the isolated 'fincas' or homesteads of the campesinos, the poor mountain peasants.

On our fifth day out, we stopped at the home of Dona Maria, a tiny shack of rough-cut vertical planks and a beaten earth floor, and as we rested she regaled us with a diatribe against the government. "We can't get sugar, rice, beans or kerosene, even with our ration cards," she complained bitterly, "and they pay us 500 cordobas for a quintal of coffee which would fetch 2,000 on the open market." She said that sooner than sell her coffee at a loss she would let it rot on the bushes.

Before setting out, I had imagined I would be witnessing a struggle between the government and the guerrillas for the hearts and minds of the people, but I was beginning to discover that the government has virtually lost that particular battle already, one of the main reasons being the highly unpopular collectivization of agriculture.

The campesinos claim that it causes perpetual shortages of most staple foods, and obliges them to buy and sell their produce only through the state co-operatives, at prices fixed arbitrarily by the latter. This ability to set prices, and even withhold rations if it suits them, gives the Sandinistas who run the co-operatives considerable power over the lives of the campesinos.

Maria's large family included five adult women but no males over eight, which prompted me to ask where her menfolk were. "All the men are forced to join the army, so they prefer to go with the Contras," she said.

If there is any single word which symbolizes the situation in Nicaragua, it is "Piricuaco." It reportedly means 'mad dog' in the language of the Miskito Indians, and was used as a synonym for Sandinista by nearly every Nicaraguan I met, civilian or guerrilla. It gained currency in the aftermath of the victory of the revolution in July 1979, when the Sandinistas reportedly committed atrocities against defeated Somocistas and former allies alike.

A unit commander in Task Force Diriangen known as Levis told me that he had been a Sandinista guerrilla of the Tercista faction up until the victory, but became more and more disillusioned with his former comrades until the day, Nov. 11, 1979, they murdered two of his friends, Mario and Miguel Castro, in Sacacli, Jinotega. One of the Castros got into a fist fight with a Sandinista activist and beat him, whereupon the loser fetched his friends and set upon the two cousins. They cut out their eyes, tongues and testicles, and from that moment Levis was again an anti-government guerrilla.

On our way south we were overtaken by Task Force Diriangen under the legendary Mike Lima, a 25-year-old commander who lost his right hand in Nov. 1983, ran onto a grenade last March, fracturing both legs and his other arm, and is now back at the head of his troops and at the top of the Sandinistas' list of wanted men.

Arriving at the finca of Dona Ana Nov. 7, we learned that four of Lima's men had been killed the day before by a Sandinista boobytrap, 10 connected mines in a banana plantation—a place frequented more by children than by guerrillas. And said she and her neighbors were now afraid to bring in the bananas and coffee harvests.

A fascinating aspect of this war is the reversal of roles in the Nicaraguan countryside. The FDN's virtual control of the territory, made possible by the support of the people, has obliged the government to resort to the sort of guerrilla-style tactics described above. Wherever the Sandinistas go, the FDN hears about it almost at once through a vast network of correos, or messengers-cum-guides. By the same token, the Sandinistas rarely know where the guerrillas are, and even when they do they rarely catch them, since a campesino correo moves twice as fast as a group of armed men. This human early warning system was with us every step of the way, drawing a cloak of invisibility around us and contributing powerfully to the high moral of my companions.

Among the counter-measures the Sandinistas have tried is the small reconnaisance patrol, eight or 10 fast moving soldiers with a radio who call down mortar fire on contact with guerrillas. One of these had spotted us the previous day, and we had been escorted from the area by whistling 120mm mortar shells lobbed, very inaccurately, from the barracks near Wiwili, some 2½ miles away. The campesinos say that the main effect of such bombardments is to kill livestock and the occassional civilian.

Until now, Independencia had successfully avoided contact with the enemy, and Invisible's precious mules were unharmed. Just ahead, however, lay La Vigia highway, which Mike Lima had fought his way across two days previously. The Sandinistas would be waiting for us.

The full moon hung like a white sun in the southern sky ahead, turning night almost into day as it cast its spectral glow over the Coco Valley 1,000 feet below us. We stood atop the last of the rugged mountains of Nueva Segovia, gazing at the province of Jinotega beyond the unseen river, as archipelago of hilltops in an ocean of white mist. This side of the river Coco, and running parallel to it across our path, lay the highway we had to cross.

My companions, more concerned with the job in hand than with the breathtaking beauty of the view, lost no time is heading down the steep mountainside at a trot. It took four hours to reach the road, which was guarded by Sandinista units stationed on strategic hilltops all along the valley—including one where the path we were following met the highway.

The main body of the task force crouched low in a gully while flanking units moved to cut off the road to our right and left, and at a signal the crossing began.

In an instant the eerie tranquility of that still evening was demolished by a chorus of staccato automatic rifles, crashing rockets and grenades, and warcries, the half-light split asunder by flashing explosions and arcing red tracer bullets.

Since they knew from the correos (guides) that the Sandinistas occupied a low hill immediately to the right of the path, the vanguard raced up the hill to the left, pouring a hail of fire across at the enemy, who wasted no time in replying. Moments later, a unit of Specials stormed straight up the Sandinistas' hill firing from the hip and howling like Hades: "Viva la FDN!" and "Muerte a los Piricuacos!"

As a non-combatant, I had been assigned to a unit which included the paramedics and the mule train, and we soon had our hands full trying to prevent the terrified animals from bolting. Alternately coaxing and bullying them, we drove the mules in what seemed like slow motion along the path beneath the bullets being traded over our heads between the two hills.

As we crossed the highway there was a lull in the battle, the vanguard having ceased fire to avoid hitting the Specials, who by this time had succeeded in storming the Sandinistas' hilltop positions and driving them back. Barring the odd ricochet, we were out of trouble.

It took a further half-hour for Independencia to disengage and regroup beyond the highway, and as unit after unit reported back it was apparent from the excited discussions that the task force had sustained only one casualty, a Special who fell in the initial assault. On the other hand, they talked of 13 Sandinistas killed on the hill, plus another 25 in a troop truck that had the misfortune to run into one of the flanking units farther up the road. At that moment I began to take seriously the absurdly lopsided casualty rates that are always being bandied about in the FDN.

By 2:30 a.m. we were wading chest-deep across the Coco, which although 100 yards wide is as sluggish as it is shallow, and so easily fordable. Another correo, waiting on the Jinotega side, led us on a two-hour hike to the nearest dense cover, where we thankfully collapsed into makeshift tents. Independencia had arrived.

No sooner was Task Force Independencia safely inside Jinotega province than its zone of operation was changed to Matagalpa, 50 km (30 miles) away. Not needing another six-week trudge up and down high mountains, I got myself transferred to Task Force Diriangen, with which we had just caught up.

The majority of Mike Lima's 300 men were to stay in Jinotega, joining the 2,000 other members of Diriangen who were already causing strife in that province, but he himself had to return to base with 60 men and a mule train, a journey of two to three weeks.

Before leaving, Mike was anxious to expend surplus ammunition in a highway ambush in a gorge near Zompopero. This gorge is littered with the wreckage of previous ambushes, and the guerrillas joke that it is so popular for this purpose that it has to be booked in advance.

As it turned out, Diriangen caught only small fry that day, a State Security Jeep carrying some very frightened civilians. State Security is the Nicaraguan little brother of the KGB, and being apparently even more unpopular than the army its members wear plainclothes, so Mike Lima was very suspicious of his catch. However, after warning them that using highways, especially in government vehicles, could be fatal even for civilians, he released them.

Diriangen's presence had been announced in thunderous fashion and speed was now of the essence. We marched eastward for several days to the river Cua, only to find ourselves surrounded by six of the Sandinistas' crack anti-insurgency battalions, almost 6,000 men. It appeared they had realized from talking to his ambush victims that Mike Lima was back in town, and they wanted him badly. Before he had received his terrible wounds he had been the government's nemesis, and such was his fame that the campesinos would visit our campsite as we passed through, just to meet him in person.

From neighboring fincas they arrived with food, some bringing a sack of hot tortillas, some a bucket of cooked beans and one of hot coffee, still others a basket of cheese and a live cow for slaughter.

The escape route was then worked out with the local correos (guides), and at dawn next morning Task Force Diriangen struck camp, marched northeast, and passed through 6,000 enemy troops like smoke through a fence.

Mike Lima commented later: "If it weren't for the campesinos' support we'd be nothing, we wouldn't even exist." It had already occurred to me that it would have taken just one Sandinista, collaborator, among the scores of campesinos who helped or know about us, to end our trip prematurely and painfully. But then the FDN is itself 90% or more campesino, and everywhere we went one or other of the boys would know either the finca owner or one of his friends or relations elsewhere.

Once north of Mount Kilambe the tension eased, and we found ourselves in the huge 'zona contolada', or controlled zone, policed by Task Force Rafaela Herrera under El Tigrillo, a former Sandinista comandante.

Our route was rapidly coming to resemble the Don Valley Parkway on a Friday evening as we met over more of Tigrillo's men and were joined by a detachment from Task Force Armando Blanchard, led by Comandante Johnson. A gentle man with an awesome record of service going back five years, Johnson was proudly escorting his young son to base camp, where he would join his father's cause.

Discipline was evaporating fast along with the need for it, and Diriangen ambled contentedly northwards, chatting and laughing as their radio broadcast Red Red Wine and Karma Chameleon to everyone within a five mile radius.

Task Force Diriangen reached a transit camp on the Coco River on Nov. 28, and next day we were ferried upstream to base camp in launches captured from the Sandinistas two years ago, when the FDN began the drive south that has carried the war to the very outskirts of Managua.

Thus ended a grueling trip, a journey into a world virtually inaccessible to the foreign press, for which the Sandinistas must be profoundly thankful. For the campesinos of Nicaragua are among the poorest of the poor, and as such, supposedly, the main beneficiaries of the revolution; if they have gone over to the opposition, what is the future of the Sandinistas?

I-R 100 AWARD TO UNIVERSITY OF ARKANSAS

HON. JOHN P. HAMMERSCHMIDT

OF ARKANSAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 24, 1985

Mr. HAMMERSCHMIDT. Mr. Speaker, each year the Research and Development magazine confers the I-R 100 Award for the year's 100 top technological developments. The competition is keen and the award is prestigious.

I call your attention to this fact for the following reasons:

First, I am proud to tell you that the University of Arkansas was the only university to be designated as a winner in the competition which includes industrial and government laboratories. The project, under the direction of Prof. Lothar Schafer, involves developing a gas-phase electron diffraction unit for molecular structure analysis. By using state-of-the-art counting devices and techniques, the apparatus will make rapid structural studies on materials which are not accessible by other processes. Professor Schafer and the University of Arkanas are to be warmly congratulated for receiving a signal honor that is well deserved.

Second, in the early phases, this work was funded by EPSCOR. This latter is the acronym for experimental program to stimulate competitive research, and the program operates through the National Science Foundation [NSF]. In essence, this program sets aside certain funds which enable the less prestigious States and universities to compete for research money without having it preempted by the traditional elite. This recognition of the excellent work at the University of Arkansas underscores the wisdom shown by Congress in making certain that there be opportunity for those universities which are still striving toward academic excellence and prestige.

Third, the fact that the University of Arkansas, and Professor Schafer's project in

particular, could not get funding through the normal NSF peer review process, raises questions about the operation of the peer review method which often functions as a closed network and which can produce self-fulfillment of the internal evaluations of program directors in the agencies. We all support the peer review process, but it is vital that Congress be vigilant as to possible abuses.

In any event, I am proud of this fine recognition that has been bestowed on the University of Arkansas and Professor Schafer and his team.

BRONX BOASTS BEST BUSDRIVER—MICHAEL MURPHY

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 24, 1985

Mr. BIAGGI. Mr. Speaker, it is with great pleasure and pride that I rise today to pay tribute to the champion busdriver of this continent—Michael Murphy, from my home district in the Bronx. Life is filled with many unsung heroes—people who labor day after day at their jobs. Although their stories do not appear in our newspapers or on our televisions, these people do their share to better the community in which they live. Michael Murphy is such a man.

By virtue of his award as Champion of the American Public Transit Association's Bus Rodeo, Michael Murphy has achieved his day of glory, appearing in both the New York Times and the New York Daily News. But he has earned this honor by 15 years of dedicated driving—in and out of every type of neighborhood in New York. In fact, Michael refers to his present route on the Bronx 12 line as "one big obstacle course."

Michael Murphy triumphed over 86 other drivers from across the United States and Canada, many of whom were in awe of the New York busdrivers. Speed was not the measure the American Public Transit Association used to judge the drivers; they tested the more important talents of precision and safety. The contestants had to pass a written examination and then demonstrate skills including braking, turning, and backing up throughout several obstacle courses. One of the most demanding courses involved weaving the bus at a steady speed of 20 mph through a route marked by 55-gallon barrels, which only allowed the bus a 1-inch clearance on either side. Michael Murphy used the skills he's developed on his daily Bronx bus routes to rise above the competition and drive away with the championship, which included a $1,000 savings bond.

The entire Bronx community joins me in congratulating Michael on his outstanding performance. We are proud and privileged to be served by such a fine and safe driver. I rejoice that one of the thousands of Bronx residents, who daily strive their hardest to excel in their chosen profession, is publicly recognized for his outstanding efforts. I am certain that all of my colleagues in the House of Representatives will join with me in wishing Michael Murphy continued success on his Bronx 12 line and in all his future endeavors.

DEDICATION OF COBB MOUNTAIN ELEMENTARY SCHOOL

HON. DOUGLAS H. BOSCO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 24, 1985

Mr. BOSCO. Mr. Speaker. I would like to take a moment to share with my colleagues a heartwarming interpretation of the "Pledge of Allegiance" as written and recited by kindergarten and first grade students at the dedication of Cobb Mountain Elementary School in my district. These youngsters worked hard to memorize their pledge which they named, "Promise to be Loyal." I was proud to take part in the special ceremony marking the dedication of the school and to observe first hand the sense of pride and honor the students felt in making their own personal promise to our great country. I would like to commend both the children and their teachers for their effort in making one of our most fundamental expressions of loyalty and patriotism understandable to the children. Their oath follows:

"PROMISE TO BE LOYAL"

I promise to be loyal to the flag of the United States of America and to the government and for what it means. One country, under God, unbreakable, with freedom and laws for everybody.

MILES CITY NATIONAL FISH HATCHERY

HON. RON MARLENEE

OF MONTANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 24, 1985

Mr. MARLENEE. Mr. Speaker, today I am introducing a bill to transfer title of the Miles City National Fish Hatchery in Miles City, MT to the State of Montana. This simple straightforward piece of legislation will allow the State of Montana to receive title to a fish hatchery which the Federal Government abandoned in 1983 because it could not afford the cost of renovation and maintenance for the hatchery.

The State of Montana is willing to invest $5 million in the hatchery to rebuild and maintain it if the Federal Government will give the State a long-term lease.

However, Mr. Speaker, we have a problem. The State of Montana has tried for the last 9 months to negotiate a long-term lease with the Federal Government that would compensate the State for its $5 million investment should the Federal Government fail to renew the lease. But, by law the Federal Government can not commit itself to future appropriations so it will not accept the terms of the lease.

The alternative proposed by the Federal Government is to sell the hatchery to the State for "fair market value." However, the State is not interested in purchasing a property which the Federal Government has abandoned and in which the State already plans to invest $5 million for reconstruction and maintenance. And believe me Mr. Chairman, the real estate market for a fish hatchery in Miles City, MT is not particularly good now or ever.

The best plan for this hatchery is to put it back to work by transferring ownership to the State. This is clearly in line with the intent of Congress when it decided to abandon its financial commitment to certain Federal fish hatcheries. In the Senate report which accompanied the 1983 Interior appropriation bill, the committee stated:

The Committee understands that a number of States are actively investigating the possibility that the State could assume control of Federal hatcheries. In fact, two States have already reached agreement to take over hatcheries proposed for closure. The Committee supports that development feeling that in many cases, it is more appropriate that the States administer some of these hatcheries rather than the Federal Government.

Mr. Speaker, my bill will accomplish the goals stated in the committee report. Thank you.

YOUTH EMPLOYMENT OPPORTUNITY WAGE ACT OF 1985

HON. TRENT LOTT

OF MISSISSIPPI

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 24, 1985

Mr. LOTT. Mr. Speaker, on March 28, 1985, I introduced H.R. 1811, the Youth Employment Opportunity Wage Act of 1985. Sixty-nine of my colleagues have joined me as cosponsors and together we are making an effort this week in sending a message to our colleagues in the House that we believe it is time to see some action on this legislation.

Despite sustained economic growth over the past 3 years, youth unemployment remains extremely high, particularly for minorities. The unemployment rate of all youth 16 to 19 in July 1985 was 19.5 percent, while the unemployment rate among black youth was 41.3 percent.

The bill would permit employers to pay young people under 20 years of age, from May 1 through September 30, a wage of no less than either 75 percent of the otherwise applicable minimum wage or $2.50 per hour, whichever is less. This bill provides protections so that adult workers or previously hired youth will not be adversely affected by the proposal. It prohibits the discharge, transfer, or demotion of any employee because of ineligibility for the youth wage and for the purpose of hiring an eligible youth and it provides penalties to assist in enforcement of this provision.

I hope that all my colleagues in this House will support the Youth Employment Opportunity Wage Act of 1985.

OPPOSING ADVANCED ARMS SALES TO JORDAN

HON. THOMAS A. LUKEN

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 24, 1985

Mr. LUKEN. Mr. Speaker, today I am joining with a majority of my colleagues in the House of Representatives in introducing a joint resolution to prohibit the sale of advanced weapons to Jordan unless and until Jordan enters into direct peace negotiations with Israel.

I oppose the sale because it will upset the balance of power in the Middle East and lead to further escalation of the arms race in one of the most volatile areas of the world.

It is important to remember that Jordan has actively participated in three major wars against Israel using American-supplied equipment.

Just 3 years ago, for example, King Hussein sent a Jordanian army battalion to fight Israel in Beirut. Hussein also sent his troops into battle against Israel during the 1973 and 1967 Mideast wars, losing East Jerusalem and the West Bank in 1967 as a result.

While it is in the economic and security interests of the United States to maintain friendly relations with such Arab countries as Egypt, Jordan and Saudi Arabia, a strong and stable Israel also is an integral part of American Middle East policy.

Therefore, the administration's assumption upon which this proposed sale is based, that somehow the position of the United States in the Middle East is strengthened by weakening Israel's military superiority versus its enemies in the region, defies logic. Weakening Israel's military superiority only strengthens Syria, a Soviet client State.

On October 17, Secretary of State Shultz testified before the Committee on Foreign Affairs in support of the Jordanian arms sale. In his testimony, the Secretary said that "the principal conventional threat" to Jordan comes from "a vastly more powerful Syria."

Earlier this week, however, the Jordanian Prime Minister and his Syrian counterpart met in Riyadh and there have been reports from Riyadh that Syria's President Hafez Assad may hold a summit meeting with King Hussein in the near future.

Even if Jordan fears a Syrian move, no amount of weapons that we might sell Jordan would significantly alter the balance of power between them. The fact is that Jordan's security depends on a strong and secure Israel to serve as a deterrent, as Israel did in 1970 and 1980 when it prevented a Syrian invasion of Jordan.

I also see no reason why we should reward King Hussein for continuing to insist on Soviet participation in an international conference—a position the administration emphatically opposes—as an excuse for avoiding direct negotiations with Israel. And I see no reason to accord the PLO a seat at the negotiating table and a veto over the outcome of negotiations, as King Hussein has insisted upon.

When Israeli Prime Minister Shimon Peres, speaking before the United Nations on Monday, called on Jordan to end its 37-year state of belligerency with Israel and offered to go to Amman for direct peace talks before the end of the year, the Jordanian Ambassador responded by joining all delegates from the 21-member Arab bloc except Egypt in walking out. On Tuesday, Jordan flatly rejected his offer.

Is this moderation? Is this an appropriate response to the olive branch of peace extended by Prime Minister Peres? I think not.

I believe that the Reagan administration is engaged in wishful thinking if it believes that the sale of sophisticated weapons to so-called moderate Arab States will persuade them to sit down at the conference table and negotiate peace with Israel.

Selling arms to Jordan now, before it has even agreed to direct talks with Israel, would send the wrong signal to Jordan, Saudi Arabia and other Arab States whose refusal to end the state of war with Israel remains the primary obstacle to peace in the Middle East.

I urge my colleagues to cast an aye vote when the resolution reaches the House floor.

A TRIBUTE TO ALFRED S. HARDING

HON. H. JAMES SAXTON

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 24, 1985

Mr. SAXTON. Mr. Speaker, I would like to take this opportunity to honor Alfred S. Harding, whose recent retirement caps 18 years of dedicated service to the Township of Moorestown, NJ.

A former New Englander, Al came to Moorestown in 1967 to assume the role of township manager. Members of the local governing body, and the public-at-large, learned very quickly that Al Harding was a highly skilled professional with a warm personality and a strong sense of community and cooperation.

Al's knack for getting the job done right has also been well-recognized outside Moorestown's boundaries. He has been long-regarded by his colleagues as the "dean of New Jersey managers." Governing officials in other municipalities noticed Al's work as well, as former Mayor William A. Angus Jr. will attest.

Mr. Angus recently told me,

Al's very demeanor made it extremely easy to enlist outstanding volunteers for all of the structured boards and committees, as well as those ad hoc committees that arise from time-to-time.

We, as members of the governing body, were often admired and envied by our counterparts in other communities when they realized the quality of people attracted to public service in Moorestown.

Mr. Speaker, if ever there was an individual entitled to a long and healthy retirement, it is Al Harding. Much of his vacation time over the years was spent attending schools and training sessions which would improve his skills as a township manager.

Al now has the opportunity to do some real vacationing. But, as one can well expect, he has even set goals in this area. He and his wife, Dorothy, intend to visit every national park from here to Mauna Loa.

I'm sure all my colleagues in the House will want to join with me in wishing Al Harding many days of well-deserved leisure and congratulating him on his successful and distinguished career in service to the people of Moorestown.

THE UNITED NATIONS AT 40—STILL GIVING PEACE A CHANCE

HON. BILL ALEXANDER

OF ARKANSAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 24, 1985

Mr. ALEXANDER. Mr. Speaker, today we are celebrating a very special birthday—the 40th anniversary of the founding of the United Nations.

The U.N. Charter adopted in San Francisco was an expression of hope by a war-torn world that man could create an institution that would allow him to live in peace.

The United Nations has helped us strive for that goal. Although we live in a time of increased armaments, although there is a greater gulf in ideologies that separate us, and although the potential for conflict that will end life on Earth is greater than ever, global conflict has been avoided and regional conflicts have been contained. In large measure, we owe this to the United Nations.

The United Nations today stands as a neutral forum where all nations can meet and search for peace and compromise. It still requires our strong support.

POTTSVILLE, PA, PLANT TO EXPAND

HON. GUS YATRON

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 24, 1985

Mr. YATRON. Mr. Speaker, I am pleased to share with you and my colleagues the news of the expansion of one of the companies in my district. Allied Corp.'s Engineered Plastics, Specialty Plastic Films Division at Pottsville, PA, will be expanding its current annual operating capacity by 9 million pounds in order to begin the manufacture by 1987 of biaxially oriented nylon film.

On Tuesday, October 29, 1985, a groundbreaking ceremony will take place at the existing plant located on Westwood Road in Pottsville. The plant currently employs 310 people who work in four rotating shifts of 50, 24 hours a day, 7 days a week. Each year, the employees produce 20 million pounds of plastic film that is used in numerous food and nonfood packaging applications.

The expansion of the Pottsville plant has been made possible by Allied Corp.'s winning of an exclusive license to use the technology of Unitika, Ltd., Osaka, Japan, to produce and market biaxially oriented nylon film within the United States, Canada, and Mexico. Unitika is the world's leading supplier of such nylon film, which is used principally in the packaging of cheeses, meats, shelf-stable foods like coffee, cookies, candy, condiments, pickles, and edible oils. Biaxially oriented nylon film has unique properties that make it strong, durable, and resistant to heat, moisture, oxygen, high gas, flavors, and aromas. The applications of this product are seemingly endless and they all make life easier and safer for users and consumers.

Mr. Speaker, at a time when our trade imbalance is so great, I am especially heartened by the nature of this business arrangement between Allied Corp. and Unitika, Ltd. By making the biaxially oriented nylon film technology available to us, Japan will enable the United States to enhance our national industrial output and the local economic well-being of the community of Pottsville, PA.

I would thus like to commend this international economic initiative and wish it outstanding commercial success. I congratulate Allied Corp. and all the managers and employees of the Specialty Plastic Films Manufacturing Plant in Pottsville for the business acumen, hard work, and years of excellence in manufacturing that made it possible.

UNIVERSUM SOKOL PUBLICATIONS PUBLISHES THE BATA STORY

HON. BERNARD J. DWYER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 24, 1985

Mr. DWYER of New Jersey. Mr. Speaker, I would like to bring to the attention of the House and extraordinary publication and its author. "The Stormy Years" by Anthony Cekota is a fascinating chronicle of the Bata family and its entrepreneurial spirit in the face of adversity. This book, which was published by Universum Sokol Publications in Perth Amboy, NJ, details the history of famous shoemaker Tomas Bata and how he built a shoe empire through hard work and ingenuity, during the troubled years 1932–45.

The author, Anthony Cekota, is the oldest personal witness to the origin and worldwide growth of the unique Bata Enterprise. Beginning as a shoe factory worker with Bata in 1914, Mr. Cekota has had a life-long association with Bata enterprises and the Bata family. Through perseverence and hard work he financed his own technical education and found his niche in the field of public service. When the Nazis overran his native Czechoslovakia in 1939, Mr. Cekota accepted an invitation from Thomas J. Bata to join him in Canada.

Through his close association with Bata, Mr. Cekota has many insights to share on the growth of this enterprise and the philosophies which made it so unique. Bata Enterprises was built on the philosophy of the necessity to serve one's customers and the public to the utmost of one's ability. This is a philosophy from which we could all learn and grow.

In closing, I would like to commend Mr. Cekota on this engrossing work and Universum Sokol on its publication so that many more could learn from the Bata story.

SOCIAL SECURITY TRUST FUNDS AND THE DEBT LIMIT

HON. DONALD J. PEASE

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 24, 1985

Mr. PEASE. Mr. Speaker, earlier this week the Secretary of the Treasury let us know that he may dip into the Social Security trust funds to keep the Government afloat if we do not increase the debt limit by the end of the month. He could do this by taking back the securities in which the Social Security trust funds are invested. This action would reduce the aggregate amount of the Government's debt, allowing the Treasury to stretch out the period before the Government defaults.

One consequence of taking back those securities would be to deprive the Social Security trust funds of the interest they would earn on those holdings. Members will remember that it was only 2 years ago that this Congress, in cooperation with the Reagan administration, enacted a number of wide-ranging changes to the Social Security Act to assure the financial stability of those very trust funds. That package included unpopular tax increases and benefit cuts that the country ultimately had to accept as the price for maintaining a program as vital as Social Security.

What disturbs me today, Mr. Speaker, is that in 1983 we were not dealing simply with a financial problem. We had to make those difficult decisions in great measure to restore public confidence in Social Security among both workers and beneficiaries. To tamper with those trust funds, even in this emergency situation, could undermine our efforts to rebuild the confidence level the program needs to be effective.

FORM BLUE RIBBON PANEL ON FARM CREDIT

HON. BILL SCHUETTE

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 24, 1985

Mr. SCHUETTE. Mr. Speaker, there's an old saying among Michigan farmers: If you borrow $1,000 from the bank and can't pay it back, even though you want to, you're in trouble. But if you borrow $1 million and can't pay it back, even though you want to, the bank's in trouble.

Well, we are learning that when you borrow multibillions of dollars and can't pay it back, America is in trouble.

The administrators of the farm credit system have long maintained that the system has the financial resources to take care of its own problems. However, this assertion is based upon two fundamental assumptions: The first is that the agricultural economy will continue to support the system, and the second is that the system will continue to quickly consolidate its capital.

Obviously, the first of these assumptions is questionable at best. The farm economy continues to deteriorate at an alarming rate. Land values are down 60 percent and more in many areas. As the farm economy slides, the farm credit system loses its ability to function.

May I stress at this point that we are not considering farm credit in a vacuum. The farm credit system of the United States is intimately tied to the farm economy as a whole. The troubles of the system today are symptomatic of the large problem, the depression on America's farms.

We have no time to assess blame for the system's woes, and I don't intend to do so. Congress is as culpable as anyone for creating a system without the ability to move cash reserves around when and where necessary, and for not establishing annual outside audits. By permitting loans of up to 85 cents on the dollar, Congress helped to set the stage for large numbers of defaulted loans.

And, the Farm Credit Administration can rightfully be criticized for many of its management practices including loans that were highly questionable.

These practices, and others, have helped to create the situation faced by the system today. We have all heard the frightening statistics, but they cannot be repeated too often: As much as 15 percent of the system's $74 billion in loans may be uncollectable. System loans that went from $20 billion in 1972 to $66.2 billion in 1980. At least 9 of the system's 37 main banks with more problem loans then they have capital. As much as half of the commercial farm debt in this country may be uncollectable.

Land values—the collateral underpinning most farm debt—continues to slide, eroding up to half the backing of loans in some parts of the country.

And, it comes as no news to this House that the bin-busting harvest this fall will continue to push prices downward.

The many farm bankruptcies that result from the agricultural depression put more land on the market, driving down real estate values and thus eroding more land collateral. That puts more farmers in trouble, and the cycle spirals downward.

We must find solutions to this vicious whirlpool. To fail to do so threatens the very survival of agricultural.

There are some actions the Government can take that will require very little budgetary outlay. For one, it can require the system to use its multibillion-dollar reserves to help cover losses.

Every Member of this House should be a cosponsor of H. Con. Res. 190, introduced by Congressman RON MARLENEE, my friend and ranking minority member of the Subcommittee on Wheat, Soybeans, and Feed Grains, on which I also serve.

The bill expresses the sense of Congress that the President should form a National Commission on the Farm Credit System to make recommendations to the Congress on the crisis in farm credit.

This resolution calls for the creation of a select blue ribbon task force composed of Members of Congress, officials from the Government and lending institutions. The Commission would recommend necessary reforms of the farm credit system to the President and Congress in order to assure adequate credit supplies and fair interest rates to farmers and ranchers.

Mr. Speaker, I cannot overemphasize the enormity of the problems facing the farm credit system, and as a consequence, our Nation. Creation of this blue ribbon panel is the first necessary step in what will be a protracted effort to maintain this vital source of capital for American farmers.

CSCE HEARING ON SOVIET CULTURAL LIFE

HON. STENY H. HOYER

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 24, 1985

Mr. HOYER. Mr. Speaker, on Tuesday, October 29, 1985, the Commission on Security and Cooperation in Europe, commonly known as the Helsinki Commission, will hold a hearing on cultural life in the Soviet Union. The hearing, which will concentrate on censorship and other Soviet restrictions on artistic freedom, will take place at 10 a.m. in room 210 of the Cannon House Office Building.

Freedom of expression is an essential aspect of the ability of an individual to fully utilize his or her artistic potential. Unfortunately, in the Soviet Union this freedom is greatly restricted. Soviet authorities attempt to censor all forms of cultural expression so as to ensure conformity with official policies and ideology. In addition, broadcasts from the West, which communicate various Western cultural programs, are jammed in an attempt to isolate the common Soviet citizen.

The Commission currently has a particular concern over restrictions on cultural life in the Soviet Union as the CSCE Cultural Forum, one of six specialized meetings to discuss specific provisions in the Helsinki Final Act mandated by the Madrid Meeting of 1980–83, is taking place in Budapest, Hungary. The forum, which began on October 15, and will end on November 25, has a mandate to discuss interrelated problems concerning creation, dissemination and cooperation in the various fields of culture. This includes human rights issues such as those to be discussed at the October 29 hearing.

The Commission is fortunate to have five experts who will testify at the hearing. We will hear from Oleg Vidov, a film actor and director; Maxim Shostakovich, a conductor and pianist; and Vasily Aksyonov, a novelist. These three artists were prominent in their respective fields in the Soviet Union but are now living in the United States because of Soviet restrictions on their individual creativity. Michael Scammell, a noted British scholar who is an expert on Soviet censorship, and George Jacobs, an expert on Soviet jamming practices, will also testify.

Mr. Speaker, cultural freedom is, in my view, important to the development of a prosperous and peaceful world. The ability to express oneself and communicate that expression to others, particularly to those in other countries, is important to bridging the many wide gaps that separate the peoples of the world. In no case is this more important than with the Soviet Union. As cochairman of the Helsinki Commission, I encourage my colleagues, the press and the public, to attend this important hearing. Thank you.

ASK THE POLICE: S. 49 IS A KILLER

HON. MEL LEVINE

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 24, 1985

Mr. LEVINE of California. Mr. Speaker, I rise to express my deep concern regarding the efforts to bring S. 49 to the floor before the scheduled hearings are conducted.

I am alarmed about this effort because S. 49 is a complex bill which affects law enforcement and public safety. Yet, the other body sent this bill directly to the floor without conducting hearings. Now we are being ask to do the same.

I find efforts to bring S. 49 directly to the floor rather suspicious. What is there about this bill that cannot stand the test of hearings?

Is it that every major law enforcement group in the country opposes this bill? S. 49 would enable criminals to acquire guns more readily, making our streets and communities more vulnerable to handgun violence and crime. An October 23 editorial in the Washington Post describes this effort as "a maneuver that would bring (S. 49) directly to the floor without hearings that could show what a terrible bill it is."

This legislation must be examined carefully. I urge my colleagues to oppose efforts to bring S. 49 to the floor before hearings can be held.

I insert the editorial in the RECORD.

ASK THE POLICE: S. 49 IS A KILLER

America's law enforcement officials came to Capitol Hill in uniform and unity yesterday to let it be known that they want their latest enemy in the war against crime killed on the spot. The menace is S. 49—a Senate-passed bill that would gut what minimal federal controls do exist over quickie handgun sales and traffic in this country. The message—from every major law enforcement organization in the United States—was directed squarely at members of the House: "S. 49, the McClure-Volkmer Gun Decontrol Bill . . . will make it harder to fight crime." Will the House listen to those who risk their lives for public safety?

Not if the old familiar gun lobbyists get their way. As always, the big pusher of dangerous gun traffic is the National Rifle Association, which—contrary to what its name might lead members to believe—takes money from people with legitimate sporting interests in firearms but is preoccupied by the defense of Saturday Night Specials and other concealable weapons used by criminals to threaten, maim and kill.

The NRA, along with the Gun Owners of America, wants the McClure-Volkmer bill enacted as is, without hearings, just the way it was railroaded through the Senate. That's part of what is upsetting law enforcement officials. At a gathering yesterday under the auspices of Handgun Control, Inc., Richard Boyd, national president of the Fraternal Order of Police, put it bluntly: "I'm here today to tell the National Rifle Association and the Gun Owners of America to back off." He was joined by representatives of the Police Foundation, the Police Executive Forum, the International Association of Chiefs of Police, the National Troopers Coalition and the National Organization of Black Law Enforcement Executives.

Also circulating are petitions signed by some 850 law enforcement authorities urging House members not to support an effort to discharge the Senate bill from House committee consideration—a maneuver that would bring the Senate version directly to the floor without hearings that could show what a terrible bill it is. S. 49 would undercut state handgun laws requiring registration, licenses to carry, waiting periods and criminal background checks—and this is more than enough to upset law enforcement authorities.

What opponents of S. 49 seek to preserve is public safety, something in the interest of sportsmen, collectors and anybody else who understands the difference between legitimate purchases of firearms—for recreation, law enforcement and private security—and quickie sales of "snubbies" and other concealable handguns to criminals and "impulse" purchases. If House members can understand this, too, S. 49 should be a dead duck.

CONVEY LAND TO THE PERSHING COUNTY WATER CONSERVATION DISTRICT

HON. BARBARA F. VUCANOVICH

OF NEVADA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 24, 1985

Mrs. VUCANOVICH. Mr. Speaker, today I am introducing legislation to authorize and direct the Secretary of the Interior to convey certain lands to the Pershing County Water Conservation District in Nevada.

The lands in question were originally purchased for the Humboldt project in order to secure Federal water rights. The district has repaid original project costs including land and water rights acquisition as well as project facilities. The only outstanding repayment obligation is for the raising of Rye Patch Dam 3 feet. Since 1953, the district has leased the land for community pasture. As a result of a request to the Bureau of Reclamation by Lander County in the early 1960's to dispose of the lands in order to increase their tax base, the district makes an annual in-lieu tax payment to the county for the lands. In this way water rights are protected since the lands have not been disposed to private ownership.

The legislation would authorize the Secretary to convey approximately 30,000 acres in Lander County, NV. to the district. The conveyance would be without monetary consideration. The legislation would not release the district from existing contracts and repayment obligations to the Federal Government, nor would it release the district from the responsibility of continuing to protect Federal water rights associated with the Humboldt project. Existing contracts for land use—for example grazing—entered into prior to enactment of the legislation would be in full force.

I believe there are compelling reasons for supporting this legislation, including:

First, the district has already paid for the lands through repayment of original project costs and has exhibited their continuing interest in the lands through the payment of in-lieu taxes to Lander County;

Second, public needs such as protection of Federal water rights, community pasture, and expansion of the County's sewage treatment plant could not be met if the lands were sold to private interests; and

Third, the original repayment contract for the Humboldt project states that title to the project will remain with the United States until Congress enacts otherwise. This clause could be interpreted that the lands can be neither transferred nor sold unless Congress passes appropriate legislation.

I strongly believe that transferring the 30,000 acres to the Pershing County Water Conservation District is fair, equitable, and in the best interest of the public. I urge my colleagues to join me in supporting prompt passage of this legislation.

MULE APPRECIATION DAY 1985

HON. BOB STUMP

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 24, 1985

Mr. STUMP. Mr. Speaker, As we observe Mule Appreciation Day on October 26, 1985, and there is again some interest in the Army using pack mules, the following article will be of interest to many.

Its author, Fred Burke, of Marble Canyon, AZ, joined the Army in 1936 as an enlisted man in the Army's 11th Horse Cavalry in Presidio Monterrey, CA. Upon his retirement some 20 years later at Fort Huachuca, AZ, he was retired with the last MOS of pack officer. During his career, Fred was the company commander of the 256th Quatermaster Pack Company, a part of the 10th Mountain Division and the last of our military to take mules into combat in Italy.

Fred Burke's analogy of the GI and the pack mule, originally written for the Stars and Stripes during World War II, follows:

THE GI AND HIS PACK MULE

Now that the Army is talking about reviewing the use of Army pack mules, the close analogy between enlisted draftees and the conscription of pack mules should prove interesting reading.

Drafted GI's and mules both joined against their wills. Mules and GI's were both sent to training centers. The mules' centers were called Remount Stations. They were both processed with physicals and hair cuts. The mules' manes and tails were cut short.

Both received immunization shots and both received a serial number. Mules got what was called a Preston brand and it was burned on their necks. Although the GI didn't get physically burned, most carried a brand on their minds for the rest of their lives at the memory of this first training.

Both had service records filled out with serial numbers, home towns, date drafted, age and family if known. For mules, the family names might include a mare named Miss Cookie and the father a jack donkey named Sams Man.

Both were given uniforms at training camp. The mules received new shoes and halter. Both were given basic equipment to take recruit training with. The GI got a gun, back pack, canteen etc. The mule got a pack saddle called a Phillips saddle, saddle pad, tarp, lash rope to tie on loads and a lead rope.

Now they were both ready to take basic training and were assigned to a training company. Both learned how to carry heavy loads over long forced marches, to bivuac in the field and live on reduced rations.

During this time, they were assigned living quarters. In the GI's case, it was called a barracks; with the mule, it was a stable and corral. GI's had mess call three times a day; the mules only twice. The mules got grain and hay; the GI's got food that tasted about the same. When it came to cleaning their respective quarters, the mules had the best of it. The GI's had to make their own beds and scrub the barracks. The mules were fortunate to have a detail of enlisted men who cleaned the stable for them.

During recruit training, both would get blisters, sore muscles and sores from equipment rubbing on formerly unused spots. They got colds from field training trips. Both mules and GI's would report in the morning to be placed on the sick call book and reported to the medical facilities.

In the mule's case, his doctor was called a veterinarian. Both received treatment and a notation as to light duty, full duty or confinement to quarters with a report back date. The sick book was a permanent record for both. They were both accused of malingering to get out of work. In the mule's case, he learned that if he went on sick call, he got to loaf in the corral and didn't have to take a long march with a pack.

After recruit training, GI's and mules were assigned to a replacement depot for future assignment to their permanent companies. Their service record went right along with both and the serial number was their identification.

Upon arriving at their new company, both were assigned to a platoon. The mule was given a number from 1 to 50—almost the same number as in a GI's platoon. The mule's number was put on his halter and his saddle. He also got a GI haircut on his tail that told his platoon number. A one bell cut was the 1st platoon, a two bell cut was the 2nd platoon, the three bell cut was the 3rd platoon and no bells was the 4th platoon.

By now both were full fledged, fully trained healthy individuals ready to join their comrades in defense of their country, willingly or not. From here on both were career military and hopefully would volunteer for an Army career.

The parallel continued in love, duty, living conditions and retirement. An exception was leave time—the mules got no leave. And a GI could retire at 20 years with half pay. The mules were sold as surplus and sent to farms.

In love matters, the GI had the PX girls, the USO or Canteen girls. And of course, there was always the girl next door who he would someday marry and reproduce more GI's. The mules only had the platoon "bell mare" for love. Each platoon had one and she was like a queen bee. All the mules in the platoon loved her with a fanatic passion and would follow her to death and did on several occasions.

The mule sometimes fell in love with the local camp followers who would stray close enough to camp for him to pick up her scent. The mule would even go AWOL just like the GI to spend some extra time with a sweet young thing.

Unfortunately for the mule, he was different from the GI when the subject of reproduction came up. The mule cannot reproduce but he enjoyed the pleasures of trying.

In WWII at Camp Swift, Texas, a large number of mules went AWOL and were seen enjoying the pleasures of free love among the horses in the river bottom near Bastrop, Texas. This was just prior to their going overseas with their GI counterparts to fight in the 10th Mountain Division in Italy.

In death both mules and GI's were together at times. Sadly, at times both were killed in either a mine field or by enemy artillery fire. In this case, they both had the same notation in their service records—KIA.

PBGC REFORMS

HON. GERALD D. KLECZKA

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 24, 1985

Mr. KLECZKA. Mr. Speaker, I rise in strong support of the Pension Benefit Guaranty Corporation [PBGC] provisions contained in the budget reconciliation bill.

I commend the Education and Labor Committee for their diligent work in crafting legislation which enjoys bipartisan support. This proposal addresses the fiscal problems facing the PBGC and the pension security problems facing American workers. It is also sensitive to the decisionmaking processes of private business. Balancing these competing interests was not an easy task, and I applaud their efforts.

My interest in this legislation is strong. I represent a district which has been hard hit by unfunded pension liability problems. In July, the Allis-Chalmers Corp., a company which has had financial problems for several years, terminated its pension plan. This decision affected more than 7,000 workers and turned over an unfunded pension liability of nearly $170 million to the PBGC. This was the largest pension plan termination ever faced by the PBGC and it brings total unfunded liabilities for the PBGC to nearly $900 million.

This situation did create many anxious moments and indisputable hardship for many workers. However, thanks to the existence of the PBGC, most of the pension benefits of Allis-Chalmers retirees were guaranteed.

There are nearly 29 million American workers who are covered by the PBGC and will rely on it should their pension plans fold. Therefore, it is incumbent upon this body to ensure that the PBGC will remain solvent. Passage of the reconciliation bill's PBGC reform provisions will help achieve this goal in a responsible manner.

The bill seeks to increase the annual PBGC premium from $2.60 to $8.50 per participant, effective January 1, 1986. There is wide agreement that this premium increase is desperately needed in order to eliminate the current deficit faced by the PBGC and to finance future claims. As the representative of a district which has directly benefited from the PBGC's services, I urge my colleagues to maintain the fiscal solvency of the PBGC. They were there when we needed them; but, in order for them to be there in the future, we must provide proper funding.

In addition to the premium increase, the bill seeks to institute much needed reforms in plan termination procedures to prevent the "dumping" of unfunded liabilities on the Federal Government. It divides plan terminations into two categories, standard terminations and distress terminations. If a company does not meet the criteria for a distress termination, it can only terminate its pension plan if it has sufficient assets to provide all vested benefits, not only the guaranteed level of benefits. Only companies which demonstrate legitimate financial difficulty can make claims against the PBGC insurance fund.

The bill also contains important "communication" provisions. First, it requires that all affected parties be given 60 days notice of any proposed plan termination, which seems only logical and fair. It also requires communication between the Internal Revenue Service [IRS] and the PBGC. The bill requires the IRS to notify the PBGC when a company requests a pension funding waiver in excess of $1 million. This will better enable the PBGC to anticipate future plan terminations.

Now is the time to act. Further delay will only compound the fiscal problems facing the Pension Benefit Guaranty Corporation, thereby jeopardizing the security of our workers' pensions.

Again, I commend the committee's work and urge my colleagues to support these provisions.

HOSTAGE CRISIS REACHING 600 DAYS

HON. GEORGE M. O'BRIEN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 24, 1985

Mr. O'BRIEN. Mr. Speaker, Sunday will be the 600th day Americans have been held hostage in Lebanon.

William Buckley, a U.S. Foreign Service officer, was kidnaped in Beirut on March 16, 1984, 600 days ago Sunday.

Today marks the 290th day Father Lawrence Jenco, the head of Catholic Relief Services in Beirut, has been held hostage in Lebanon.

Terry Anderson, the Associated Press Beirut bureau chief, was taken hostage 222 days ago.

The director of the American University Hospital, Beirut, David Jacobsen, was kidnapped 148 days ago.

Thomas Sutherland, the dean of the American University Agriculture School, was taken hostage 137 days ago.

Today also marks the 325th day since the disappearance of Peter Kilburn, the American University librarian.

Mr. Speaker, the hostage crisis in Lebanon is going on 600 days. But it won't be over until all the Americans are returned home safe and sound.

LATTA AMENDMENT TO H.R. 3500

HON. W. HENSON MOORE

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 24, 1985

Mr. MOORE. Mr. Speaker, I voted for the Latta amendment to H.R. 3500 as it is one of the few rare moments in the House that determine whether it is time to stand up to honest and substantial deficit reduction or whether it is time to duck and run from the deficit as usual. I had honest disagreements with a few inputs used in the Latta amendment as a disproportionate negative impact would apply to Louisiana due to the nature of the changes involved. However, the Latta amendment offered the opportunity to cut the deficit by an additional $3.5 billion over the next 3 fiscal years largely by denial of new spending add-ons. In balance, it was fair and possessed the type of fiscal discipline necessary to cut the deficit enough to get interest rates to fall. Its good points far outweighed its few faults.

However, I was particularly concerned about the Latta amendment failing to include provisions adopted by the House Merchant Marine and Fisheries Committee for Outer Continental Shelf revenue sharing and fiscal 1987-90 reauthorization of the Coastal Zone Management Act. These appear as a deficit reduction component in the final year of the Latta amendment and as such ample time for consideration of extension remains.

I would also like to remind my colleagues the geography of Louisiana puts our residents at the jeopardy of floodwaters all to frequently despite the continuing efforts of the Corps of Engineers. Flood insurance is not a secondary consideration. It is a vital interest. I agree with provisions in H.R. 3500 that would prevent FEMA from increasing flood insurance rates in 1986. The cost consequence is too important to those who pay the price. I find fault in the Latta substitute as its rejection of housing program add-ons has a consequence a missed opportunity to remind FEMA of flood insurance cost considerations.

Nothing denies consideration of the H.R. 1 housing bill provisions outside packaging within H.R. 3500. Proper legislative action would be to require such a massive housing bill to be considered independent of any superstructure such as that used today. H.R. 1 should be considered on its own and a freeze on flood insurance rates should be approved within it.

VOTE ON THE LATTA AMENDMENT

HON. ROBERT W. DAVIS

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 24, 1985

Mr. DAVIS. Mr. Speaker, some claim that today's vote on the Latta amendment to H.R. 3500 was a vote on the renewal of Federal housing programs. My colleagues who so eloquently argued that a vote in favor of this amendment was a vote to zero-out these programs know that is, at best, a half truth.

The Latta amendment would have stricken from the Omnibus Reconciliation Act of 1985 extraneous legislative language, including the entire text of H.R. 1, the Housing Authorization Act of 1985. A bill that contains 146 legislative sections and was the subject of 12 days of committee hearings warrants individual consideration.

Proponents of H.R. 1's inclusion in reconciliation claimed that because of inac-

tion in the other body, this would be the only means to force a conference on renewing housing programs. This contention rings hollow when the chairman of the other body's Banking Committee stated that if the House passed a separate housing bill, the other body would go to conference on the issue.

My vote for the Latta amendment should not be construed as a vote against H.R. 1. Many of the housing programs in the bill are vital to my district and have received my strong support. H.R. 1 also contains language which concerns me and should be subject to consideration and debate by the full House. One such issue is the fair housing provision.

Adopting H.R. 1 as part of the reconciliation process denies Members not on the Banking Committee the opportunity to debate its provisions or vote on amendments. What other major authorizing legislation enjoyed similar closed rule and closed door passage?

Let's keep distinct issues distinct. A bill whose purpose is to achieve the deficit reduction required by the budget resolution is not the place for $14.3 billion in fiscal year 1986 spending authority.

DISARRAY OF STANDARDS FOR ISSUING SECURITY CLEARANCES AND CLASSIFYING INFORMATION REQUIRE LEGISLATIVE REMEDY

HON. GEORGE C. WORTLEY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 24, 1985

Mr. WORTLEY. Mr. Speaker, today I have introduced legislation for Congress to establish the National Commission on Classified Information and Security Clearances.

My legislation proposes that the Commission be composed of 17 members, including the Chief Justice of the U.S. Supreme Court; four Members of the House of Representatives, two to be appointed by the Speaker, and two to be appointed by the minority leader; four Members of the Senate, two to be appointed by the majority leader and two by the minority leader, and eight members to be appointed by the President of the United States, with not more than four members of the same political party. The Chief Justice would serve as chairman of the Commission. The vice chairman would be elected by Commission members.

The Commission would conduct investigations and make recommendations to the President and the Congress not later than 1 year after appropriations are enacted for the Commission.

The Commission's investigative responsibilities would include: First, examination of standards and procedures used by each Federal department, agency, and entity to issue security clearances, and to classify information; second, to determine if security clearance procedures ensure that all persons who have been issued clearances, including both Federal and private sector personnel, continue to meet security standards; third, to determine if current standards and procedures for classifying information cause more information to be classified than required for the interests of national security; and fourth, the identification of dangers posed to national security by the growth in the numbers of Federal and private sector persons holding security requirements.

The Commission's recommendation duties would include: First, recommending uniform standards and procedures for the issuance of security clearances; second, recommending uniform procedures that ensure that persons holding clearances continue to maintain security standards; third, making recommendations to each Federal entity for the implementation of standards and procedures for classifying information and documents; and fourth, designing standards and procedures to prevent the classification of information and documents that are not sensitive to national security requirements.

Further, my legislation proposes that the Commission shall cease to exist 30 days after submitting its final report.

The original cosponsors of my bill to establish this investigation and recommendatory Commission are: Messrs. SHERWOOD L. BOEHLERT of New York; BILL EMERSON of Missouri; HAMILTON FISH, JR. of New York; DEAN A. GALLO of New Jersey; ROBERT GARCIA of New York; BENJAMIN A. GILMAN of New York; ROBERT J. LAGOMARSINO of California; JERRY LEWIS of California; ALFRED A. MCCANDLESS of California; GUY V. MOLINARI of New York; HOWARD C. NIELSON of Utah; ELDON RUDD of Arizona, and DENNY SMITH of Oregon.

Mr. Speaker, my cosponsors and I are convinced that the establishment of the National Commission on Classified Information and Security Clearances is overdue in this era when espionage is conducted on an alarming scale.

America's military and industrial secrets are more vulnerable than they need be. Part of this vulnerability exists because we live in a free and open society.

Because we live in a free and open society, our Government must take more precautions than governments that are not free.

At the same time, freedom compels us to walk a thin line. We must not classify information which does not require classification. We do not need to issue clearances to those who do not have access to classified information.

In this era of weapons systems sophistication and highly competitive technology, we do need standardization of classification and security clearance procedures. We do need periodic reviews of clearances as personnel move to different responsibilities and different activities.

Our Government estimates there are some 1,400 Soviet and Soviet bloc agents in the United States. But there are only some 1,200 FBI counterintelligence agents available to monitor the activities of the Soviet and Soviet bloc agents.

Approximately 4.3 million Americans possess security clearances of one degree or another.

Mr. Speaker, both the disarray of our systems of classification and clearances and the necessity to update the protection of America's security behooves favorable consideration of this legislation.

I urge that our colleagues join my 13 original cosponsors and myself in cosponsoring this bill.

SENATE—*Friday, October 25, 1985*

(Legislative day of Monday, October 21, 1985)

The Senate met at 8:45 a.m., on the expiration of the recess, and was called to order by the President pro tempore [Mr. THURMOND].

PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Let us pray.

Father in Heaven, we pray for our families who so often suffer neglect due to Senate schedules and pressures. We know that the family is the basic unit of the social order and disintegrating families contribute to social decay. Give us grace, Lord, to take seriously the priority of family relationships over all other business and to realize that however we succeed in other areas there is no compensation when we fail as spouses and parents. Instead of hoping to find time for our families this weekend, help us to make time—to take time. If there be estrangement, let there be reconciliation and healing. Remind the Senators that their position, their prestige, their preferential treatment, their power, is for the Hill, not the home; that they need the family and the family needs them. Bless our families, loving Father, sustain them by Your grace. Make Your presence felt and Your love to fill hearts and homes. In Jesus' name. Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. The distinguished majority leader is recognized.

SCHEDULE

Mr. DOLE. Mr. President, under the standing order the leaders have 10 minutes each. I reserve the time of the distinguished minority leader and also the time that I do not use. Then there is a special order in favor of the distinguished Senator from Wisconsin [Mr. PROXMIRE] for not to exceed 15 minutes, routine morning business not to extend beyond 9:30 with statements limited therein to 5 minutes each. Then we will move to the consideration of S. 1714, the farm bill. It is really a very major piece of legislation with about 17 to 18 different titles. The text of the bill is 459 pages in length. So it is a very extensive piece of legislation, and it will require some time.

It is my hope that Members will be here promptly for opening statements, and that we can start the amendment process. We will have votes today and we will have votes on Monday. So I would hope that we can begin work on the farm bill. In the meantime, the managers of the reconciliation bill, Senators, DOMENICI and CHILES, will be working on some procedure to resolve the problems that are occurring with respect to the reconciliation bill. I would also note that the State-Justice-Commerce appropriations bill seems bogged down temporarily.

I know that the distinguished manager of that bill would like to resolve those conflicts. In any event, the farm bill is up, and we intend to stay on it continuously.

We may have to break temporarily, as I have indicated to the distinguished Senator from Alabama [Mr. HEFLIN], when we work out the reconciliation package, if we do. We hope we can complete action on the farm bill by Friday. That is the bad news.

The good news is that the Royals won and they move back to Kansas City tomorrow for the remaining games of the World Series.

[Laughter.]

TRIP TO ASIA

Mr. DOLE. Mr. President, between August 15 and 29, I visited five of our most important allies and friends in Asia—South Korea, Japan, Taiwan, Hong Kong, and the People's Republic of China. Traveling with me were six distinguished colleagues—JIM MCCLURE, PETE DOMENICI, BILL COHEN, DAN EVANS, PETE WILSON, and PAT MOYNIHAN.

GOALS OF DELEGATION

Our delegation had two main goals. The first was to reaffirm, at each stop, the basic strength of our bilateral relations and the importance we attach to continued close ties. We wanted the leaders of the north Asia region to know that the Senate understands their importance and values their friendship.

The north Asia region is critical to our own security. Its countries play an increasingly active and important international political role. It sits astride vital channels of commerce. And it is the most dynamic economic region in the world and our fastest growing trade partner.

TRADE DEFICITS DOMINATED TALKS

But we also went to discuss differences which do exist and to discuss them frankly, as friends should.

And it is fair to say that one such difference dominated most of our conversations—our huge and rapidly growing trade deficits, specifically including our very large deficits with Japan, Taiwan, South Korea, and Hong Kong.

Our message on trade deficits was loud and clear. The United States cannot be the world's only free trader. We cannot, and will not, continue to tolerate the massive deficits we are running with Japan, Taiwan, South Korea, and other countries around the globe, which add up to a total projected deficit this year of about $150 billion. We have some work to do to put our own house in order, especially in getting the dollar back to a reasonable level. But unless our major trading partners take decisive steps in the immediate future to open their markets to our exports and make a substantial dent in those deficits, the United States will act decisively to deal with this problem. If the Executive is unwilling to act, then Congress is prepared to move unilaterally.

We had the opportunity to present our message at the highest levels of government at each stop. In South Korea, we met with President Chun; in Taiwan, with President Chiang; in Japan, with Prime Minister Nakasone; in Hong Kong, with Governor Youde; and in China, with Chairman Deng.

We do not labor under any illusions that our trip, by itself, will solve the trade deficit problem. But the problem is never going to be solved until each side understands fully and in detail the real problems of the other side. We went to these five places to hear their side of the story, and we learned a great deal. But, even more important, we went to make sure they heard about, and understood, our situation in the United States and our intentions in Congress.

Much more action is needed. We must have more action from these five countries. We need appropriate follow-up here in Congress and, hopefully, in the Executive. If we see these needed actions, we can begin to make some progress in cutting our intolerable trade deficits. If we don't, all of us are going to suffer.

NAKASONE TO SEND MISSION TO DISCUSS DEFICITS

As one small step in the right direction of better understanding and communication, I am pleased to report to the Senate that, in response to our invitation, Japanese Prime Minister Nakasone is sending a high-level delegation for further talks with us in the Congress on our critical trade problems. We expect the Japanese, when they arrive, will find for themselves that our delegation did not exaggerate the intensity of feeling in this country on the trade deficits issue. The American people see it as one of our most important economic and political issues, and they are demanding that Congress act to redress the massive imbalance.

I would like to include in the RECORD at this point a copy of the letter which we, in the delegation, sent to Prime Minister Nakasone, inviting the Japanese delegation, and the Prime Minister's response.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

LETTER FROM SENATORS TO JAPANESE PRIME MINISTER NAKASONE

DEAR MR. PRIME MINISTER: We want to express our appreciation for your warm hospitality during our recent visit to Japan.

Our meeting and luncheon provided an important opportunity for us to convey to you the sense of urgency in the Congress over our huge and growing trade deficit with Japan and to hear your views on this problem.

As we noted, Congress seems determined to assert its Constitutional authority in trade policy-making. To that end, we would welcome your appointment in the immediate future of a high level Government and Liberal Democratic Party delegation to come to Washington for direct meetings with leading Members of Congress. The delegation would be able to continue the dialogue we have begun and to gauge for itself the prevailing mood in Congress and among the American people.

Through such efforts, we are hopeful we can resolve this preplexing problem which divides us.

Sincerely yours,

BOB DOLE.
PETE DOMENICI.
DANIEL J. EVANS.
DANIEL PATRICK MOYNIHAN.
JIM MCCLURE.
BILL COHEN.
PETE WILSON.

LETTER TO SENATOR DOLE FROM JAPANESE PRIME MINISTER NAKASONE

DEAR SENATOR DOLE: Your recent visit to Japan together with other leading members of the United States Senate and your wives was most informative as well as beneficial.

As you stressed in the meetings here, there is no doubt that the relationship between Japan and the United States is of utmost importance. Considering the breadth and depth of our relationship, I believe that leaders of not only the executive branch but also the legislative branch of both states should strive together for furthering mutual understanding and cooperative ties between our countries and peoples. Such forward-looking attitudes are of crucial importance for both countries in resisting the temptations of protectionism.

In this connection, I have considered the timely and useful suggestion in your letter of August 22 for a high-powered delegation to Washington, D.C. to have direct meetings with leading members of Congress, and now plan to dispatch toward the end of September a delegation composed of a select few leading members of the Diet who are well-versed in all aspects of Japan-U.S. relations. The delegation will be headed by Mr. Susumu Nikaido, Vice President of the Liberal Democratic Party, and is expected to have frank and sincere exchanges of views with Congressional leaders on ways to solve current trade and economic problems and to further improve our bilateral relations.

The delegation will also explain about the concrete measures the Japanese Government is taking in order to solve these problems.

I hope that such discussions will help us have a clearer vision of constructive policies to pursue in the near term.

Sincerely yours,

YASUHIRO NAKASONE,
Prime Minister of Japan.

SUMMARY OF STOPS

Mr. DOLE. Mr. President, I would like to summarize briefly the highlights of meetings and events at each stop on our trip.

SOUTH KOREA

The first stop of our trip was the Republic of Korea—ROK, August 16-18—where we met with President Chun; Prime Minister Lho; Deputy Prime Minister Shin; Foreign Minister Lee; and Speaker of the National Assembly Lee and several other assemblymen.

TRADE

We pressed our case that South Korea must begin to take significant, concrete steps to reduce our large—$4 billion—and fast-growing trade deficit. In particular, the delegation pushed for an end to the ban on the import of computers and tobacco products, which are a Government monopoly; sharp and immediate reductions in tariffs on products such as citrus fruits and alcoholic beverages; elimination or liberalization of textile import quotas; an end to recently imposed restraints on motion picture imports; and removal of constraints on the activities of U.S. firms in the service industries.

Noting that South Korea is internationally and justifiably known as one of the centers of counterfeiting of patented, copyrighted, and trademarked material, the delegation stresses that Seoul's failure to provide adequate protection to intellectual property rights was a major bilateral irritant and was seriously damaging the ROK's reputation in international commercial circles.

SECURITY AND NORTH-SOUTH ISSUES

On nontrade issues, we reaffirmed the strength of the American security commitment to South Korea. There is near-unanimous support in the Senate and the Congress for the continued presence of the approximately 40,000 American troops stationed in South Korea, as long as there remains a real and significant military threat from the north. We received some very sobering briefings, from our own Embassy and military personnel and from ROK officials, on the strength and modernization of North Korea's military forces. The north has a standing armed force of about 1 million, with more than 5 million others in active reserve—an astounding one-third of the entire population of 19 million active in the armed forces. Pyongyang has simultaneously tightened its political ties to the Soviet Union—mainly at the expense of the People's Republic of China. Moscow has responded by providing several new and dangerous weapons systems to the north, including Mig-23's. North Korean Migs, from their base closest to the DMZ, can be over Seoul in 6 minutes.

At the same time, we do see some hope in the opening of direct contacts between the south and the north, through the Red Cross family reunification and the economic talks. If the North Koreans are seriously interested in using these contacts to reduce tensions on the peninsula—and that is a very big if—the ROK Government is ready to meet them halfway.

TRIP TO THE DEMILITARIZED ZONE (DMZ)

The delegation visited the DMZ, to receive briefings on the security situation and to meet with American troops stationed there. The reality of the North Korean threat comes home when you traverse the very short distance from Seoul to the DMZ and when you observe first hand the North Korean presence just over the border.

I am pleased, though not surprised, to report on the excellent state of our troops. They know why they are there, they're determined to do the job and their morale is high—they are ready to meet any threat that arises.

DOMESTIC POLITICAL SITUATION

We congratulated the South Korean officials on the selection of Seoul as host for the 1988 Summer Olympic Games, an honor of which the ROK leadership is justifiably proud. We also noted, though, that with the honor would go the increasingly harsh spotlight of international attention, which would focus not only on the games but also on Korean society in general. In that context, we expressed our concern about the limitations on peaceful dissent, especially the imprisonment or prohibition of political activities by opponents of the Government, and we urged the gradual liberalization of the political system.

Following are brief summaries of our most important meetings with South Korean officials.

PRESIDENT CHUN

The delegation reassured Chun of the strong support in the Congress for close American-Korean ties, including the continued presence of American forces in South Korea as long as there was a serious threat from the north. At the same time, we explained to Chun the seriousness with which the Congress and the American people view our high trade deficits. We stressed that the resulting unemployment and other problems had dramatically raised the political stakes at home. The American people are demanding action to reduce those deficits. Congress is prepared to act, and soon, if no other way is found to address this problem. We specifically noted that our $4 billion imbalance with South Korea was too large and would have to be pared quickly.

President Chun stressed the ROK's deep indebtedness to the United States, beginning with the sacrifices made by Americans during the Korean war; the continued U.S. security commitment and presence of American troops in South Korea; and the large American contributions to South Korea's economic miracle.

He acknowledged that the United States, because of its position as leader of the free world, must remain both militarily and economically strong. In that context, he expressed understanding of our deep distress over both our budget and trade deficits and promised that South Korea would do its utmost to cooperate with us in resolving these problems, while noting that the relatively small size of the South Korean economy and domestic problems limited what Seoul could do.

Chun also made the case that South Korea should be viewed as a special case, in light of the threat from North Korea, the ROK's heavy expenditures on defense—6 percent of GNP—and its relatively low level of per capita GNP. Above all, he stressed that South Korea was different than and should not be lumped by us with Japan as a trade problem.

Chun also said that in his extensive personal diplomacy—he has met with leaders of 111 different countries, many of them from the Third World—the point he always makes is that cooperation with the United States has brought South Korea security and relative prosperity. In contrast, those countries which cooperate with the Soviet Union achieve little progress.

PRIME MINISTER LHO

The delegation stressed to Lho that, unless the ROK takes concrete and effective steps to reduce our deficits within 2 or 3 months, at most, Congress is likely to act. The delegation cited computers and tobacco products as examples of American products which could compete effectively in a free market in Korea. We acknowledged Lho's points that Korea is different than Japan and has its own economic problems, such as a labor force working on the margins of poverty, with potential for domestic unrest if unemployment should increase. But we also outlined our own economic problems—per capita debt more than eight times as large as South Korea's, high budget deficits and many thousands of Americans out of work because of imports.

DEPUTY PRIME MINISTER SHIN

The delegation predicted that, if Seoul did not take strong action soon to reduce our overall trade deficit by opening its markets, the Congress would act unilaterally—the votes were there to pass a strong trade bill, possibly within 2 months. The delegation particularly raised the problems of restrictions on the import of computers, citrus products, and motion pictures, the Government monopoly on sales of tobacco products, quotas on imported textiles and high tariffs on a large number of products, including alcoholic beverages.

We also cited serious concerns about South Korea's failure to provide adequate protection to intellectual property, though we acknowledged some progress.

Shin responded that the ROK understood America's problems and was committed to doing what it could to help. He asked the delegation to keep several factors in mind. South Korea had enjoyed a trade surplus with the United States only in the last few years. Because of that surplus, Seoul had already removed many import restrictions and hoped to be able to act on some of the specific items we raised in the foreseeable future. He noted that some products, though, were especially sensitive domestically, such as cigarettes and citrus—progress on those would be more difficult.

Noting that the South Korean currency was tied to a basket of currencies dominated by the dollar, he said that South Korea as a result had not benefited much in its exports to the United States from the strong dollar. He also expressed the hope that a new GATT round could help resolve some trade problems, both internationally and bilaterally. In response, the delegation expressed the view that a new GATT round, properly structured, might be helpful but not in the timeframe demanded by the urgency of our bilateral problem.

FOREIGN MINISTER LEE

The delegation stressed the strong support in the Senate for close United States-Republic of Korea ties and a continued close security relationship. The ensuing discussion centered on two issues: dissent on campus in South Korea and the Soviet-North Korean relationship.

The delegation questioned Lee carefully about the justification and procedures for the "special education camps" which the ROK was considering establishing, where campus dissidents reportedly would be sent. We expressed the concern that the camps could be misused, or at least seen, as a method of quashing legitimate dissent. Noting that the Olympics and other events would focus international attention on South Korea, the delegation said the country would suffer the special vulnerability of a relatively open society to outside criticism—if political rights were denied, it would be noted and reported and be to the long-term detriment of the ROK.

Stressing the immediacy of the threat from the north, Lee said Seoul's chief priority was stability, without which no other progress—including in the north-south talks—was possible. As a result, the Government was in the process of promulgating new regulations to handle campus dissent. The "special education camps" are to be established as a voluntary alternative to prison, for students who had violated the law.

On the question of Soviet-North Korean relations, the delegation expressed strong concern about the north's Soviet-underwritten military buildup. Lee said South Korea, too, was worried, especially with the arrival of Mig-23's. He said Pyongyang was clearly moving closer to Moscow than the People's Republic of China—the Chinese were not even invited to the August 15 celebration of Korean independence in the north.

Despite these concerns, Lee said the south was seriously, though cautiously, pursuing talks with the north, through the Red Cross and directly on economic questions. The north has even put out feelers on the question of participating in some way in the Olympics. The main issue, though, said Lee, was whether the north was serious about these contacts and had in fact given up its determination to conquer the south militarily—that remained to be seen.

NATIONAL ASSEMBLY SPEAKER LEE AND OTHER ASSEMBLYMEN

The codel stressed the political sensitivity of our massive trade deficits in the United States and called on the assemblymen, as fellow legislators, to work cooperatively with us to avoid the need for unilateral, protectionist action by either side. Above all, we said, what is needed is for Korea to open its markets equitably to our exports, such as computers and alcoholic beverages. We also stressed the need for better protection of intellectual property. The assemblymen expressed understanding of our political dilemma and support for greater market opening at home. At the same time, they contrasted Korea's situation with Japan's, which has a much larger trade surplus and far lower spending on defense.

JAPAN

The second stop of our trip was Japan—August 18-20. While there, we met with Prime Minister Nakasone, Foreign Minister Abe, Finance Minister Takeshita, International Trade and Industry [MITI] Minister Murata, Agriculture Minister Sato and a group of Liberal Democratic Party [LDP] Diet leaders, including LDP Vice President Nikaido. We also had a session with leaders of the Japanese business organization Keidanren.

TRADE

Our huge trade deficit with Japan was the central focus of virtually all of our meetings. This year, that deficit is expected to reach $50 billion. We told all of the Japanese with whom we met that the United States can no longer tolerate deficits of that magnitude. Economically, they distort international capital flows, undercut American growth and cost us thousands of jobs. Politically, they have become the political issue at home, as affected constituent groups rightly demand that we do something to resolve the problem. We, frankly, predicted that, in the current environment, the deficits would come down, either through quick, cooperative bilateral action or through unilateral action by the United States, led by the Congress.

Japan must move quickly and decisively to open its markets. It must reduce tariffs on items like wood products, alcoholic beverages, and confectionary products. It must eliminate quotas on beef, citrus, and other agricultural goods. It must allow national treatment for U.S. air cargo carriers. And it must eliminate the complex array of nontariff barriers to our goods and services which deny so many American firms fair access to Japanese markets.

The delegation did acknowledge that, despite all the barriers to our imports, Japan was nonetheless one of our major markets, taking, for example, about 20 percent of all of our agricultural exports. We also expressed our understanding that all of our problems do not originate in Japan or our other trading partners. We need to put our own house in order, by reducing our budget deficits, getting the dollar back to an equitable level and taking other steps to make our export effort more effective. We in the delegation pledged our best efforts to achieve such results.

But the bottom line of our message was that, politically and practically speaking, time is running out. Unless Japan acts soon, the tide of protectionism is going to overwhelm us, to the long-term detriment of both countries.

I would like to insert in the RECORD at this point the text of a speech that I delivered to the Japanese National Press Club, which reiterates and expands on many of these trade-related themes.

There being no objection, the speech was ordered to be printed in the RECORD, as follows:

REMARKS BY SENATOR BOB DOLE, MAJORITY LEADER, UNITED STATES SENATE, JAPAN NATIONAL PRESS CLUB, AUGUST 19, 1985

It is a pleasure to appear at your prestigious National Press Club. It is indeed an honor I shall long cherish.

Our ties with Japan are among the most important in the world. They are based on a set of shared security, political, and economic goals. We are friends and our delegation is here in that spirit. While our relationship is fundamentally sound the trade issue threatens to undermine it.

So let me get to the point. I speak today not as a specialist in the intricacies of international trade or one with easy answers. But as the majority leader of the U.S. Senate, I know the mood of the Senate and of the American people. Both believe we have a critical trade problem. They are demanding that something be done now.

We can no longer avoid a trade confrontation. We have one. The time is past for gestures. Immediate action is needed. It is essential that your press, as well as your Government and business leaders, understand how critical the problem is.

Having said that, let me take a step back. Most responsible policymakers, including Members of Congress and business men and women, understand that trade is a very complex issue. Our massive trade deficit has several causes—certainly not all created by Japan, nor do we seek to make your Government the scapegoat.

THE VALUE OF THE DOLLAR

Many feel strongly that the most important cause of our trade problem is of our own making—the value of the dollar. Since 1980 the dollar has appreciated by 30 to 40 percent against other major currencies. This makes our exports substantially more expensive and our imports much cheaper.

Many of us believe a major cause for the dollar's rise is budget deficits. Even with the recent reductions in our Federal spending, budget deficits will be in the $200 billion range for years to come. This flood of red ink drives up interest rates and makes the dollar more attractive.

In an effort to slow the hemorrhage, some in our Congress mounted a serious attack on the budget deficit. We failed in our effort as evidenced by the insufficient savings in the compromise budget resolution passed last month. More should be done but realistically the window of opportunity is probably closed for some time.

GROWTH EXACERBATES TRADE DEFICITS

A second factor contributing to our unprecedented trade deficit is that the U.S. economy has grown more rapidly than that of our trading partners. Therefore, we buy more from them than ever before. The debt problems of the developing countries have made this situation worse.

A third theory suggested by Government and industry leaders in Japan to explain the lack of U.S. competitiveness is that U.S. exporters lack long-term commitment, refuse to make an effort, or simply fail to adapt to market conditions. Given our demonstrated marketing prowess in other countries—it is difficult to accept this theory.

TRADE IS A GLOBAL PROBLEM

As previously stated, our trade problem is neither solely self-induced nor limited to Japan. Canada has a huge positive trade balance with us. Brazil, Taiwan, and Korea also sell much more than they buy. These, and other countries, sometimes deny us equal access to their markets while taking full advantage of ours.

BIG PROBLEM IS JAPAN

None of this can erase the fact that our major problem is with Japan. Our predicted trade deficit this year of $50 billion will be larger than our total international deficit just 3 years ago.

The situation has grown dramatically worse in recent years. Your trade surplus with us increased by more than 70 percent last year and at the current pace will increase by another 35 percent this year. No other country in the world would tolerate such an imbalance.

Your markets are closed to many American products even when they are the best in the world. In the telecommunications field, for example, we are second to none. Yet we have great difficulty selling here. The same is true of many other high technology products. Lumber, plywood, and paper could also be sold in great volume in Japan but high tariffs and other barriers keep them out. Agricultural products are sold here, but if your markets were truly open, the quantities would be much greater. The list of examples could go on and on.

This is not just an American problem. every country in the world has had enormous difficulty selling manufactured products in Japan. It's not just a question of the high-valued dollar or U.S. marketing failures that has created this situation.

EXAMPLES OF JAPANESE RESTRICTIONS

American producers face a multitude of market restrictions here. You impose quotas on beef, citrus, and other agriculture products despite limited domestic production and high potential demand. You have prohibitively high tariffs on wine, chocolates, and wood products.

There are any number of additional examples of how Japan imposes restrictions on foreign imports from tobacco, to satellites, to consumer items. Your testing and standards rules contribute to keeping foreign products out as do your customs regulations. Indeed the Japanese system is notorious among foreign businessmen. It has accomplished in many areas what tariffs and quotas could not do.

You also restrict competition in services where the United States is quite competitive. We could compete effectively in banking, finance, shipping, and international legal services, for example.

In sum, the fundamental problem is that your market is not sufficiently open to our products and services. Its opening is an essential first step toward solving our trade problem.

Prime Minister Nakasone realizes that major changes must be taken to open your markets and his recently announced action program was a small step forward. But the 3-year implementation period ignores the urgency of the problem and fails to respond to many of our top priorities.

New initiatives should be judged by their results in increased sales. Six previous liberalization programs resulted in few new sales. A clear and specific commitment to reduce our bilateral deficit, through a dramatic increase in American exports is needed.

Some have suggested other approaches as well. One idea is to raise the value of your currency. Another is to voluntarily restrict

exports. A third suggestion is for Japan to stimulate economic demand.

I am certainly not here to advocate any of these or other particular remedies, but based on my assessment of the mood of Congress, I can report that the "protectionist pot" is about to boil over.

THE CONGRESSIONAL ROLE IN TRADE POLICYMAKING

Perhaps I should explain to you that our Constitution gives Congress the basic responsibility for trade. While in recent years we have ceded much of this authority to the executive branch, the time is probably approaching when Congress might well impose tighter constraints on executive negotiating authority and limit the broad discretion the executive branch has in trade matters.

THE MOOD IN CONGRESS

The belief among American business men and women, our farmers, and those who have lost their jobs, is that our current trade relationship is not fair. This has generated a powerful momentum in Congress to enact some kind of legislation. Hundreds of trade bills have been introduced this year. They range from surcharges on all imported goods, to attempts to provide protection to specific industries, to proposals to change our laws governing unfair trade practices. One bill that may be considered in the next 60 days focuses specifically on Japan.

The plain fact is that I have never seen stronger congressional sentiment for acting on the trade front. My colleagues, yes even the most responsible ones, are tired of what they perceive as basic unfairness. They are convinced of the need to address the situation one way or another.

We have not lost sight of the fact that maintaining a global trading system with open markets is in our mutual interest and we are aware of the negative consequences of retaliation. Most of us reject protectionism and strive instead for a system of trade based on equal access to all markets. We welcome fair competition from abroad—it improves our industry and makes us more efficient. As a Senator from an agricultural State, I appreciate the benefits of trade and the peril that flows from attempts to close borders.

It should also be noted that trade is and will continue to be a major political issue in the 1986 and 1988 elections. Many in Congress are already moving to gain early poltical advantage and in this highly charged atmosphere administration opposition would not be enough to forestall action for long and even a Presidential veto might be swept aside. Certainly the Government of Japan can fully appreciate that political pressure cannot be ignored forever.

THE PROPOSED NEW GATT ROUND

Some counsel Congress that the answer lies in a new round of negotiations under the General Agreement on Tariffs and Trade. Those who are leading this effort should realize that there is growing skepticism in the Congress about launching such an initiative. With the magnitude of deficits the United States is facing, there is very little we could give up in new negotiations and to expect others to make significant unilateral concessions seem totally unrealistic.

Nonetheless, such talks could possibly be helpful if the agenda fully addresses the real issues in world trade. We need to develop effective rules to eliminate subsidies, and to ensure equal access in all markets. Rules must be developed to open up trade in agriculture and services. The negotiations should also strive to bring the developing countries more fully within the disciplines of the international trading rules.

A new round, however, will take years to negotiate. Congress will not tolerate the status quo for that length of time. The real timeframe is much shorter and those who would use a new round as a way to delay or divert Congress will not likely succeed.

CONCLUSION

Let me conclude by reaffirming that the relationship between our countries is among the most important in the world. I appear here today as a friend, to candidly report the growing surge of congressional impatience which mirrors the frustration felt across America.

I have not exaggerated the depth of feeling at home on this issue. I can assure you that you will witness stong congressional reaction unless prompt and dramatic corrective measures are instituted here.

Thank you for listening.

OTHER ASPECTS OF OUR BILATERAL RELATIONS

Mr DOLE. Mr. President, we expressed to the Japanese our conviction that we have no more important bilateral relationship than with Japan and that, apart from the trade question, our bilateral relations are in excellent shape. Our countries share almost all the same strategic interests and goals, both in north Asia and globally, and we cooperate fully and to great effect on international political issues.

The delegation noted strong Senate support for the basing arrangements which we have in Japan, which are essential to regional security and to balance a growing Soviet presence in the Western Pacific. We also expressed the hope that Japan would continue to increase its defense spending, which is now bumping up against the 1 percent of GNP limit which has been Government policy.

Following are brief summaries of our most important meetings with Japanese officials.

PRIME MINISTER NAKASONE

Nakasone opened our meeting by expressing the view that, overall, American-Japanese bilateral relations were excellent. Our extensive cooperation, he said, is based on our shared commitment to democracy and free enterprise and serves our own countries and the world at large. Nakasone reaffirmed his commitment to do everything he could to resolve cooperatively any bilateral problems which exist, even though his powers and influence are not unlimited.

The delegation responded by noting the strong Senate support for the United States-Japan alliance and expressing appreciation for Nakasone's efforts to improve ties between our countries even further. We noted that we came to Japan as friends, to reaffirm our friendship. But, as friends, we also wanted to speak candidly about any problem which existed.

The delegation stressed that the overriding bilateral issue was the huge rapidly growing trade imbalance between our countries. While there are understanding and appreciation of Nakasone's personal efforts to help redress this imbalance, even in the face of strong domestic counterpressures, it was not clear that all elements of the Japanese Government and society shared the Prime Minister's commitment. It appeared, the delegation said, that elements of the bureaucracy, some of the business community and some strong pressure groups were still doing everything possible to thwart the intent of Nakasone's own market-opening programs.

Noting that despite their own strong views they were only "moderates" on the trade deficit issue compared to many in Congress, delegation members outlined the political pressures that were building in the United States, especially growing out of the dismantling of many of our traditional industries and the resulting unemployment of tens of thousands of Americans. We stressed that time was running out for a joint, cooperative solution to this problem, and we urged Nakasone to redouble his efforts to bring his bureaucracy and other power centers in Japan into line behind an effective program to reduce the Japanese surplus.

Nakasone stated his belief that the problem of a recalcitrant bureaucracy is being solved, through his strong, persistent efforts to remove bureaucratic bottlenecks to market-opening.

Nongovernmental pressure groups, especially those with strong representation in the Diet, are a more difficult problem, he said. He noted that political pressures in Japan were no less real and potent than in the United States. Nonetheless, he was working to bring Diet Members, especially fellow LDP members, around to the view that Japan must take major market-opening steps. It was the hardest job he has encountered in 40 years of politics, he said, but he is trying his best, and he will achieve positive results, at most within the 3 year timetable of the action program announced in July.

FOREIGN MINISTER ABE

The delegation noted growing concern in the United States that our serious trade imbalance could begin to impact on our broader relations, despite the best intentions of both sides. More serious economic problems in the United States, for example, could well lead to cuts in our defense spending, exacerbating the issue of Japanese defense spending, which already is something of a problem between us.

Abe said he welcomed frank talk on trade and any other issues between us. He joined in hoping that our trade problems would not impact on other aspects of our relations, especially our security ties, which would be, he said, "a disaster for both of us." He termed our bilateral relations a "global partnership," in which we cooperate on

problems throughout the world. As one example, he cited the rapid growth in Japanese foreign aid spending, which in absolute terms is now about half of ours and which is projected to equal ours in about 7 years—it is one of only two areas which were increased in this year's Government budget. Moreover, our two countries cooperate closely in our aid efforts in many places, such as Latin America, the Middle East and southern Europe, to the benefit of both of us.

Abe said that, despite the wishes of both sides, we understood the political pressures in the United States and knew there could be "spillover" to other aspects of our relations unless both sides addressed the trade problem urgently. He said that "drastic improvement" in the imbalance was "impossible" in the immediate future, but Japan was determined to demonstrate its good faith and establish a clear trend of improvement.

During our meeting, we also had a useful exchange of views with Abe on the situation on the Korean Peninsula, in the People's Republic of China, and in the Middle East.

FINANCE MINISTER TAKESHITA

Stressing that our trade deficits have become a major political issue at home, the delegation asked Takeshita's views on four particular questions wholly or partly within the purview of his ministry.

First. The Japanese Government's various "action programs" to open its markets to American exports: Takeshita said he was aware of American dissatisfaction with the results so far achieved. He promised that Japan would follow through on all aspects of the July program, including a broad range of tariff cuts.

Second. Government efforts to stimulate domestic demand: Takeshita said a special committee has been set up to study ways to encourage the consumption of imports, with an initial report due in mid-October. He also said there would be increased spending on public works—the largest contemplated project: A $10–$20 billion bridge across Tokyo Bay; a review of Government land holdings, to identify good sites for new projects; encouragement of a shorter workweek, to stimulate spending on leisure-time activities; and the weeding out of Government regulations which retard growth.

Third. Dollar/yen exchange rate issue: Takeshita said that Nakasone accords the issue highest priority—he receives an exchange rate update three times daily. Takeshita predicted the yen would depreciate in the short run, because of high American interest rates, but would move toward an "equilibrium level" in the longer run. He stressed that Japan was adhering to the 1982 bilateral yen-dollar agreement negotiated with the United States.

Fourth. U.S. financial services firms: U.S. trust banks have been able to operate in Japan for several years—six are now active. Takeshita predicted that a Japanese Government report due in November would open the door to U.S. firms' membership in the Tokyo Stock Exchange.

MITI MINISTER MURATA

The delegation said its bottom line aim was to let Japan know it must open its markets on an equitable basis to American exports. Tariff reductions and other reforms in the July action program, though significant, were "too little, too late and too slow." The delegation cited several areas where Japan should move immediately to increase its purchase of American products: agricultural products, including citrus fruits and apples, aircraft, and forest products.

Murata defended the action program, saying that it reflects a "changed mentality" on the part of the Japanese. As part of the followup, Miti will meet with the heads of 134 Japanese companies to encourage them to "buy American."

Murata said a new GATT round was "necessary" to open Japan markets. The delegation indicated there was a great skepticism in Congress about a new round, since other international trade agreements, such as the Multi-Fiber Agreement, have led to unintended floods of foreign products into the American market.

AGRICULTURE MINISTER SATO

The delegation expressed appreciation for Japan's large purchases of U.S. agricultural exports but pressed for greater market access for a range of products in Sato's jurisdiction: Beef and citrus—where a 1984 agreement was being seriously undercut because of Japan's implementing regulations—other agricultural products—for example, noncitrus fruits and nuts—and wood products. The delegation noted that Japan exports seven times as much in wood products to the United States as we export to Japan, even though we have a clear competitive advantage in that industry. While acknowledging the pressure for protection from Japanese farmers, the delegation also noted that Japan was jeopardizing the well-being of its manufacturing workers, who are highly dependent on exports to the United States for their jobs and who will be directly affected if we react to Japanese restrictions with our own; for example, on auto imports.

DIET AND LDP LEADER NIKAIDO AND OTHER MEMBERS OF DIET

The delegation outlined for the Diet Members the intensity of feeling in the United States on the trade deficits issue, which may well be the political issue of 1986 and perhaps even 1988. We expressed understanding that the Diet Members had their own political constituencies to deal with, but we urged that they take the broadest possible view—protecting their farmers, for example, while putting their manufacturing workers at risk of their jobs made little long-term sense. The delegation also offered its perception that the problem was a very broad-based one—attitudes and actions would have to change in the Japanese Government, the political structure, the business community, pressure groups and society at large. The Diet Members would play a key role in reshaping the attitudes and actions of those groups.

The Diet Members expressed an understanding of the seriousness of the problem; urged that we be as patient as possible and accept that Japan was acting in good faith; defended overall Japanese Government strategy to deal with the problem, including the July action program; and said solid results would take time but would be forthcoming.

KEIDANREN

The delegation stressed that the Japanese private sector had to be at the heart of any serious effort to redress our trade imbalance. We also stated frankly that there was a real question whether the Japanese business system was structured, and whether most Japanese businessmen were prepared, to do what is necessary—give American products fair consideration. We outlined for the Japanese business leaders our serious and growing economic problems and told them frankly that, absent a significant turnaround in our trade situation with Japan, there would be very strong, probably overwhelming, pressure to restrict Japanese access to our markets. The Japanese business community should therefore see a resolution of this problem as in its own interest, not as a favor to the United States.

TAIWAN

We visited Taiwan from August 20–22. While there, we met with President Chiang, Premier Yu, Foreign Minister Chu, Defense Minister Soong, Economics Minister Lee, Communications Minister Lien, Central Bank Deputy Governor Chien—whose appointment as Finance Minister was made the day after our meeting—Acting Minister of Finance Li and Agricultural Council Chairman Wang.

TRADE

Trade was again very much at the top of our agenda, and our basic message was much the same as it was in South Korea and Japan—our rapidly growing trade deficit with Taiwan, which will hit $12 billion this year, is economically and politically intolerable. If it is not reversed soon through cooperative efforts, Congress will move to reverse it unilaterally. If Taiwan wants to have continued access to our markets, it must give us competitive access to its markets.

The two primary points we made during the visit were: First, very significant reductions are needed in the extremely high tariffs on many goods of interest to American manufacturers and farmers; and second, significant progress is also needed in strengthening the protection of American intellectual property. In addition, we pressed for national treatment of our companies in service industries, such as insurance, banking, motion picture distribution and leasing.

The principal barrier to our imports is high tariffs, many on products of special interest to us in the range of 50 to 70 percent. We reminded the Taiwanese that, in August, the United States presented to Taiwan a list of 174 items on which sharp tariff cuts are needed. Among the most important items on this list: Beef and other meat products; fruits and vegetables; alcoholic beverages; tobacco products; cosmetics and toiletries; agricultural chemicals; wood products; and scientific instrumentation. We are still awaiting strong action on this list of items.

OTHER ISSUES

The delegation stressed the long friendship between the American and Taiwanese people and pledged that we will never forget that friendship. We reaffirmed the strong Senate support for the Taiwan Relations Act. The United States remains committed to helping the Taiwanese people meet their legitimate defense needs, in accord with that act and other agreements of our Government. We expressed our strong hope that Taiwan would continue to be able to play a full and active role in the appropriate international organizations, such as the Asian Development Bank [ADB].

Following are brief summaries of our most important meetings with Taiwanese officials.

PRESIDENT CHIANG CHING-KUO

The delegation told Chiang that we came to Taiwan as long-time and loyal friends of the Taiwanese people. We reiterated our support for the Taiwan Relations Act, of which several delegation members had been principal backers. We also indicated support for the policy of responding to Taiwan's legitimate self-defense needs and insisting that any resolution of the Taiwan situation be a peaceful one, consistent with the aspirations of the Taiwanese people.

At the same time, as friends, we stated our deep concern about our exploding trade deficit with Taiwan, which in 1984 was about $10 billion and would grow to $12 billion this year. We indicated frankly that this problem was generating tremendous political pressure at home, especially because so many thousands of Americans were being thrown out of work by the flood of imports and so many American farmers were threatened with loss of their livelihood because of foreign restrictions on our exports. We indicated that, unless Taiwan and our other trade partners enjoying high surpluses took concrete steps to reverse these gross trade imbalances, Congress would very likely act on trade legislation within several months.

Chiang said Taiwan regarded its relations with the United States as of vital importance. For that reason, it was taking the trade deficit problem very seriously and would work hard to resolve it. He indicated he had already instructed senior members of his administration to give high priority to this problem and that real progress had been made—tariffs had been reduced on many products and other nontariff barriers had been scaled back.

Chiang also pointed out that Taiwan's was a relatively small economy, with few natural resources and highly dependent on trade. For the first 20 years after 1949, Taiwan had suffered trade deficits, often large ones. There had been large surpluses only in recent years. At the same time, he said, Taiwan faced a major military threat. He pointed to recent statements by People's Republic of China leaders which failed to renounce the use of force in resolving the Taiwan question. Because of the threat, said Chiang, Taiwan had no choice but to expend great resources on defense.

PREMIER YU

The delegation reaffirmed the American commitment to help Taiwan meet its legitimate defense needs and to follow the provisions of the Taiwan Relations Act. The delegation, however, also said that our trade deficit with Taiwan was a major and growing problem, which would have to be dealt with decisively in the near future if congressional action on protectionist legislation was to be avoided. We noted that all of us on the delegation were relative moderates on trade issues—there were many in Congress who were pushing approaches far more confrontational than ours. To argue against such approaches, though, was becoming increasingly difficult, since we had so little "ammunition" in the form of positive action from our trade partners.

MEMBERS OF THE CABINET

We had a lengthy and detailed discussion, focused on trade and, to a lesser extent, bilateral security issues, with the seven members of the Cabinet listed in the introductory paragraph above.

We briefed the Taiwanese on our growing economic problems, of which the most politically potent was growing unemployment in the face of rapidly rising imports. We noted the constitutional responsibility of Congress to set trade policy and outlined the rapidly rising political pressure on Congress to assert its authority by passing restrictive trade legislation. We predicted that Congress was poised to act, possibly within 2 months, unless our major trading partners take steps in the immediate future to give us fair access to their markets. We also opined that, with sentiment running as strong as it is in the United States, there might even be the votes to override a Presidential veto of some trade legislation. In the face of the barriers to our exports which exist in Taiwan, we said, Americans will see any such action not as retaliation but as establishing some equity in our trade relations.

Tariffs are the biggest problem—they must be reduced, sharply and quickly, on a whole range of products. Taiwan must also end such restrictive practices as the Government monopoly on alcoholic beverages and tobacco products and quotas on items like videos and films.

We also pressed hard on the need for more effective protection of intellectual property rights, especially copyrighted material such as motion pictures—and patented and trademarked chemical and pharmaceutical products. The problem was so serious in Taiwan that it has become known as the "counterfeiting capital of the world." Many American firms are reluctant to establish facilities or license their products in Taiwan, fearing they will be pirated.

A third area about which we complained is Taiwan's restrictions on American firms in the service industries, for example, banks and financial institutions and insurance. While acknowledging there had been some progress recently, we described the situation as still very much of a "one way street"—the Taiwanese are free to operate in our markets while we are excluded from theirs.

In responding, the Taiwanese stressed the steps that have already been taken to reduce tariffs, which are much lower than they were 25 years ago. They also mentioned several factors affecting our trade deficits such as the high value of the dollar, the orientation of most American producers toward the domestic market and strong competition from Japan—in particular, the Taiwanese said Japanese firms often provide better, faster after-sales service than American firms, which are much further from the Taiwan market. They also said that they, too, had to cope with domestic political pressures, including from workers who feared the loss of their jobs.

HONG KONG

During our brief stay in Hong Kong—August 22-24—we met with Governor Youde, Financial Secretary Bremridge, Trade and Industry Secretary Ho, and Trade Director McLeod.

TRADE

Because we have a $5 to $6 billion trade deficit with Hong Kong, trade again was the focus of our talks. The situation in Hong Kong, though, is different than in South Korea, Japan, and Taiwan. Hong Kong is essentially an open market, with no duties on our imports—which totaled $3.1 billion last year. Hence protectionism—through tariffs and nontariff barriers—is not a central issue. In fact, Hong Kong's annual per capita imports from the United States of $577 are nearly three times Japan's and more than three times that of the European Economic Community.

Nonetheless, the sheer size of our deficit with Hong Kong demands action, and we frankly told that to the Hong Kong authorities. In the long run, it is precisely those highly export dependent economies such as Hong Kong which will suffer most if our massive bilateral and international trade deficits force us to enact protectionist measures. The United States, in fact, is Hong Kong's largest market, taking about 45 percent of its exports.

TEXTILES

Hong Kong is worried, in particular, about possible restrictions on its textile exports, which make up about a third of its total exports to the United States. We outlined the problems of our domestic textile industry and underscored our conviction that the multifiber agreement was never intended to unleash the flood of textiles which have inundated us in recent years. We also noted that Hong Kong uses a different accounting system than we do on textiles, causing it to undervalue its textile exports.

FUTURE OF HONG KONG

By all appearances, Hong Kong has recovered from the jitters which accompanied the negotiations between Great Britain and the People's Republic of China. One important factor has clearly been the steady stewardship that Governor Youde has given the colony through this difficult transition period. Reflecting the colony's confidence, exports are at a record level, unemployment is a very low 3 percent, and inflation is running at 5 to 6 percent. It is possible that strains may develop as the 1997 transition date approaches, but there also appears to be growing confidence that the People's Republic of China intends to fully live up to its commitment to permit Hong Kong to retain its economic and social identity through a lengthy period of postintegration adjustment.

PEOPLE'S REPUBLIC OF CHINA

The final stop of the delegation was in the People's Republic of China—August 24-29—including visits to Beijing and Shanghai. We visited China at the invitation of the National People's Congress [NPC]. NPC standing committee Vice Chairman Wang was our host throughout our visit. Our most important meetings in the People's Republic of China were with Communist Party Central Advisory Committee Chairman Deng, NPC Chairman Peng, President Li, and Minister of Foreign Economic Relations and Trade Zheng.

BILATERAL RELATIONS

We indicated our satisfaction that American-Chinese relations were developing relatively smoothly, to the benefit of both countries and in accord with the various communiques signed by our Government. We acknowledged that significant bilateral problems exist, notably Taiwan, the climate for foreign investment in China and the People's Republic of China failure to live up to the bilateral grain agreement. We also said, though, that the United States would like to see these problems resolved cooperatively.

The Chinese, from Chairman Deng down, seemed to share these views. They expressed their general satisfaction over our relations, their understanding that cooperative ties served both countries and what appeared to be genuinely warm feelings for the people of the United States.

TAIWAN

The Chinese remain very sensitive on the Taiwan question. In several meetings, and in part perhaps because of our own prior stop in Taiwan, they expressed strongly their view that our policy toward Taiwan represents interference in the internal affairs of China.

We responded, just as vigorously, that there is strong support in the Senate for the Taiwan Relations Act, which will continue to govern our ties to Taiwan. As specified in that act, the United States will continue to help Taiwan meet its legitimate defense needs through the sale of defensive arms. We also reaffirmed that current American policy toward the People's Republic of China and Taiwan was based on an assumption that the Taiwan question would be resolved peacefully. We specifically warned against direct military action against Taiwan, such as a military blockade, which would be extremely dangerous and force us to respond.

ECONOMIC ISSUES

We pressed the Chinese on two particular issues. First, we strongly urged improvement in the climate for foreign investment, particularly through negotiation of a substantive bilateral investment treaty [BIT], liberalizing regulations on repatriation of profits and availability of foreign exchange and reducing extremely and artifically high local support costs—for example, housing, labor—for foreign businesses. The Chinese indicated they understood the benefits they could derive from increased foreign investment and said they were looking into these and other problems. They expressed no optimism, though, that a bilateral investment treaty could be concluded in the foreseeable future.

Second, we expressed deep disappointment that China had failed to live up to our bilateral grain agreement. The Chinese responded that their shortfall of grain purchases resulted solely from economic factors, especially the rapid increase in domestic production of grain. The Chinese did say that they would remain in the market for foreign grain, though at reduced levels, for the forseeable future and indicated they intended to retain the United States as one supplier.

NUCLEAR COOPERATION AGREEMENT

We told the Chinese of the serious concern among some in Congress about the agreement, especially in relation to whether it had sufficient safeguards on proliferation, and said we could not promise it would have smooth sailing in the Senate. The Chinese repeated their standard assurance that they have no intention to provide any assistance to any other state in the development of nuclear weapons.

Following are brief summaries of our most important meetings with Chinese officials.

CHAIRMAN DENG

Deng said he hoped that visits such as ours would contribute to better understanding, and hence closer ties, between our countries, and he urged that more Members of Congress visit China. He said any views we wanted to express would certainly be taken into account by the People's Republic of China as it formulated its policies.

We indicated our general satisfaction at the state and progress of our relations and outlined our concerns on four issues in particular.

First Chinese anti-American votes in international organizations. We expressed dismay that China seemed to pursue a "two-America" policy toward the United States. Bilaterally, our relations are increasingly cooperative and the rhetoric surrounding those relations cordial, sometimes even warm. Yet in international fora, especially the United Nations, China votes against our position consistently. For example, during the 39th U.N. General Assembly—fall 1984—the People's Republic of China voted against us on 89 percent of the plenary votes. On the 20 so-called "name-calling" votes during that assembly, in which the United States was gratuitously singled out for unwarranted attack—for example, on the false charge that we are helping South Africa develop a nuclear capability—China had voted against us each of the 17 times it voted—it did not vote three times. We indicated to Deng that such a record is noted by the Congress and the American people

and inevitably impacts on the way we view the People's Republic of China.

Second. Investment climate in the People's Republic of China. We outlined some of the problems encountered by American businesses trying to operate in China, especially the problems of repatriation of profits and the high cost of maintaining local offices and personnel. We urged serious negotiations on a substantive bilateral investment treaty and substantial reform of the regulations governing foreign investment.

Third. Nuclear cooperation agreement: While indicating that members of the delegation support the agreement, we outlined the reservations of some in Congress about its provisions relating to proliferation. While no one wants to deny China the opportunity to develop its nuclear power potential, all of us want the "nuclear club" to remain as small as possible.

Fourth. Taiwan: We stressed that any suggestions by the People's Republic of China, private or public, that it is contemplating or reserving the right to use force against Taiwan, including a naval blockade, would be counterproductive.

CHAIRMAN PENG

Peng said China's policy of "opening to the outside world" is "irreversible," since it is central to China's goal of catching up to the developed world within 50 years. He said China is satisfied with the "achievements and progress" in the development of our relations, which he described as entering a "new stage" of friendship and cooperation which is "inevitable" between the "most developed country in the world and the world's largest developing country."

Taiwan: He expressed in very strong terms the People's Republic of China's determination to "reunify the country" by gaining control over Taiwan. China was firmly committed to doing that peacefully, he said: "I can assure you that you will not be deceived and disappointed on this." At the same time, though, he added, China could not give up its "sovereign right" to use force, including steps such as a naval blockade, if it should be necessary, for example, if the Taiwanese leadership persisted in its refusal to enter into talks to solve the problem peacefully.

The People's Republic of China, he promised, would pursue a "one country, two systems" policy toward Taiwan—after reunification, Taiwan could keep its "political and social systems" and could continue "economic and cultural relations and personnel exchanges" with foreign countries. The People's Republic of China will not station troops on Taiwan—as it will in Hong Kong.

In the meantime, he stressed, the People's Republic of China "cannot understand why there should be a Taiwan Relations Act" or why a "friendly country like the United States should raise questions about Taiwan." He likened it to an NPC resolution on "China's relations with California or Hawaii."

The delegation responded by reasserting our determination that the Taiwan question be resolved peacefully, with full regard for the rights and wishes of the people of Taiwan. We indicated that we were not going to forget or set aside our long friendship for the people of Taiwan, a pledge embodied in the Taiwan Relations Act. The United States, we indicated, will continue under that act to help the Taiwanese meet their legitimate defense needs. Threats to use force like naval blockades, such as occasionally come from People's Republic of China leaders, reinforce the case for defensive arms sales to Taiwan.

Other issues: First, Peng expressed distress that the United States, including some in Congress, had charged China with inhumane family planning practices. Stressing the urgency of the population problem, he nonetheless denied there was any infanticide or forced abortion in the People's Republic of China. Second we noted our disappointment over China's apparent "two America" policy, reflected in persistent People's Republic of China votes for anti-American, "name-calling" resolutions in the United Nations and other international bodies, which are inconsistent with the People's Republic of China's expressions of friendship for us. Third, the delegation expressed regret over China's failure to live up to the Bilateral Grain Agreement, which raises questions about its commitment to live up to other agreements or to engage in mutually beneficial economic relations.

PRESIDENT LI

Li discussed Taiwan at some length, very much in the same vein as Peng. He indicated the People's Republic of China intended to resolve the Taiwan question peacefully—there is no consideration being given to a naval blockade. He said the People's Republic of China believed the United States was not living up to the provisions of the August 17, 1982, communique, which indicated future American arms sales to Taiwan would decrease in quantity and not exceed the then-current level of technological quality. He specifically said that any sale of advanced fighter aircraft, such as the F-16 or F-20, would create a very serious bilateral problem.

In response to a delegation question, Li said that China was seeking to improve relations with the Soviet Union but that the "three obstacles"—the Russian military buildup on the border, Soviet support for the Vietnamese invasion of Kampuchea, and the Soviet occupation of Afghanistan—remain a barrier to fully normal relations. He also said that, even were those obstacles removed, relations would not revert to the state they were in the 1950's, since the People's Republic of China is now committed to an independent and nonaligned foreign policy.

The delegation expressed concern at China's failure to live up to the grain agreement. Li indicated that, when China was back in the grain market, it would give "first consideration" to the United States as a supplier. The delegation also told Li of the serious concerns on the part of some in Congress about the nonproliferation provisions of the Nuclear Cooperation Agreement.

FOREIGN ECONOMIC RELATIONS AND TRADE MINISTER ZHENG

We discussed four issues with Zheng:

First. Grain agreement: We noted our deep disappointment that China had not lived up to the grain agreement, which would inevitably impact on our consideration of other agreements with the People's Republic of China. Zheng indicated that, from China's perspective, it had met the minimum requirements of the agreement. He expressed regret that it had been affected by American policies on textile imports. He said China would be importing grain for the foreseeable future and would look to the United States as a supplier, if the price and quality were right.

Second. Textiles: We briefed Zheng on the economic and political realities of the textile issue in the United States. Zheng said the Jenkins bill had created a major stir in the People's Republic of China. According to the People's Republic of China's calculations, passage of the bill would reduce Chinese textile exports to the United States by 56 percent. In that event, China would have to take some reciprocal action.

Third. Investment climate in China: We urged Zheng to support negotiations for a substantive bilateral investment treaty. He indicated that the People's Republic of China was aware of the problems of investors and would be working on those problems through new laws and regulations.

Fourth. Technology transfer: Zheng said China appreciated American efforts to facilitate technology transfer and expressed the hope that the signature of the Nuclear Cooperation Agreement would speed up the process even more.

RECOGNITION OF THE ACTING DEMOCRATIC LEADER

The PRESIDENT pro tempore. The distinguished acting Democratic leader is recognized.

THE ADMINISTRATION'S TRAGIC SET-BACK OF ARMS CONTROL

Mr PROXMIRE. Mr. President, the Reagan administration has bluntly and flatly repudiated the Anti-Ballistic Missile Treaty. This body—the U.S. Senate—ratified that treaty by a smashing 88 to 2 in 1972. The treaty represents the solemn word of this country as clearly and simply as any promise possibly can. If there has been any time in history when this country of ours has so conspicuously betrayed its word, this Senator cannot recall it. What I am saying, Mr. President, represents the most serious kind of charge against the Reagan administration. This charge requires evidence. Here it is. Article 5, section 1 of the ABM Treaty reads as follows:

> Each party undertakes not to develop, test or deploy ABM systems or components which are sea-based, air-based, space-based or mobile land-based.

The treaty elsewhere specifically confines permissible testing to fixed land based ABM missiles period. That is it. No sea-based, air-based, land-based, and—the case now in point—no space-based testing of ABM missiles is permitted in the plain, simple language of this treaty. In spite of this crystal clear language in the treaty, the Reagan administration has specifically repudiated its own former position that the treaty means what it says. It has also repudiated the position of every President who has held office since 1972. It now provides a precisely opposite view of the treaty. It is a view that permits no ambiguity. It simply and bluntly declares that this country will proceed to violate article 5, section 1 of the treaty by testing space-based ABM components.

On the face of it, the administration appears to have taken an absolutely clear, incontrovertible position in flat violation of the treaty. Can this be true? Have I missed something? No way. Consider: Who can speak with the most authority on that 1972 treaty? My nomination is the chief U.S. negotiator of the ABM Treaty: Gerard Smith. Smith knows that treaty better than most of us know our own kitchen or bedroom. He knows every article, every section, every sentence, every phrase, every word. He lived with it for years. There is no way anyone in the present administration could begin to know the treaty and what it stands for the way the man who was chief negotiator knows it. So what does Gerard Smith say about the administration's interpretation of the treaty? How does the chief negotiator of the treaty react to the administration contention that the U.S. Presidents and top foreign policy and military officials' interpretation of the treaty in the past is wrong?

Mr. Smith answers that question in an excellent, terse letter that appeared in the New York Times on Wednesday, October 23. Smith vigorously disagrees with the administration. He believes that the ABM Treaty absolutely forbids the development and testing of space weapons. He charges that the administration position "has drastic implications for the survival of the treaty and indeed of the whole arms control process."

This Senator agrees with the chief negotiator of the treaty on both points. The administration's interpretation of the treaty—that it permits testing of antimissile systems in space—should make a nullity of the treaty. It would mean that if we now proceed to tests, we are deliberately violating our solemn promise and pledge.

The second point made by Gerard Smith is even more significant. The interpretation by the Reagan administration does indeed "have drastic implications for the whole arms control process." Why would this administration's interpretation have such a drastic effect on arms control? Because with this cavalier administration repudiation of the explicit language of the treaty, no country in the future could rely on the United States to keep its word when it promised to limit nuclear testing or nuclear weapons production or nuclear deployment. Any future party to an arms control treaty with the United States could not rely on our word. It could not rely on verification of our compliance. With this ABM precedent, any country signing a treaty with the United States could expect this country to flatly ignore the most explicit provisions of the treaty—even when the chief negotiator for the United States publicly and emphatically conceded that the U.S. action constituted a deliberate violation of the treaty. With this action, the administration is kicking nuclear arms control right out the door.

Mr. President, there is an honorable way for the United States to change the treaty. The treaty is permanent. But the United States can forthrightly call for a formal renegotiation of the treaty with the Soviet Union. Or if the Reagan administration is truly convinced that for some strange reason the treaty permits space-based testing despite the explicit ban in article 5, it can go to the Standing Consultative Commission specifically set up in the language of the treaty for the purpose of interpreting any ambiguity in the treaty. On the other hand, this sudden unilateral and reckless announcement by the administration that the treaty does not mean what it says in unmistakable language is a tragedy for our country and for the cause of peace.

Mr. President, I ask unanimous consent that the letter to which I have referred by Gerard Smith in the New York Times be published in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

[From The New York Times, Oct. 23, 1985]

HOW THE ADMINISTRATION AMENDED THE ABM TREATY

(By Gerard C. Smith)

To the EDITOR:

Despite Secretary of State George P. Shultz's efforts to blunt adverse domestic and international political repercussions, it is clear that the Reagan Administration has repudiated its former position, and that of all previous administrations, that the anti-ballastic-missile treaty bars development and testing of space-based strategic defenses or components of them that use lasers, particle beams and other types of nontraditional technology. This new version of the treaty has drastic implications for the survival of the treaty and indeed of the whole arms-control process.

As head of the United States delegation to the strategic arms limitation talks that negotiated the ABM treaty, I would like to record that it was not our intention that any type of technology for space-based ABM systems could be developed or tested under the treaty. This has been the official view of the United States Government for more than 13 years. In my opinion, the Russians agree with this position, which is binding on both parties and have stated so on a number of recent occasions. The controlling provisions of the treaty (to which the Senate consented to ratification by a vote of 88 to 2) is Article 5. Section 1 reads, "Each party undertakes not to develop, test or deploy ABM systems or components which are sea-based, air-based, space-based or mobile land-based."

The treaty does permit a small deployment of fixed land-based ABM missiles using traditional technology. It also permits development and testing of new technology for such fixed land-based defenses—but not deployment. The differences between the ban on deployment and testing of space-based systems, and the more limited constraints on fixed land-based systems is reflected in an agreed statement appended to the treaty (Agreed Statement D), which provides that if new type systems are developed, they cannot be deployed unless authorized by a treaty amendment. This agreed statement does not modify in any way the total ban on the development and testing of space-based systems.

The Administration, after having accepted the official interpretation for more than four years, now has concluded that space-based systems or components using new technology may be developed and tested under the treaty, despite the ban in Article 5. The apparent rationale for this change is that the Russians never agreed to the broader historical American position.

This radical change in a central provision of the treaty, which is the supreme law of the United States, was apparently accomplished in secrecy without consultation with the Congress or United States allies for which this treaty has security significance.

While the Article 5 ban seems unambiguous to this writer, if the Administration is concerned about some ambiguity in the negotiating record, it should be recalled that the treaty anticipated this contingency and provided for consultation machinery to clarify any such situation. Would it not at least be prudent, as well as correct international procedure, to undertake such consultation

with the other party to the treaty before the Administration implements this new interpretation in carrying out the "Star Wars" program?

SECRETARY OF STATE SHULTZ REAFFIRMS ADMINISTRATION SUPPORT FOR RATIFICATION OF THE GENOCIDE CONVENTION THIS YEAR

Mr. PROXMIRE. Mr. President, the Secretary of State, George Shultz, has joined President Reagan in calling upon the Senate for ratification of the Genocide Convention. On October 7, in a letter to the majority leader, Mr. DOLE, Secretary of State Shultz reaffirmed the administration's strong support of the Genocide Convention and called on the Senate to ratify the convention this year.

President Reagan first called on the Senate to ratify the Genocide Convention in September 1984. At that time he joined Presidents Truman, Kennedy, Johnson, Nixon, Ford, and Carter in recognizing the convention as crucial to our ability to fight human rights abuses worldwide.

Last week President Reagan took the opportunity to reaffirm his position on the Genocide Convention in a letter to the majority leader, Mr. DOLE. this letter appeared in the RECORD on Wednesday of this week. I am very pleased with the President's continued support, and with the support of Secretary of State Shultz.

I urge my colleagues to join me in supporting the Secretary's request for prompt action on the Genocide Convention this year.

I ask unanimous consent that the Secretary's letter be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

THE SECRETARY OF STATE,
Washington, October 7, 1985.

Hon. ROBERT DOLE,
U.S. Senate.

DEAR BOB: As you well know, the Genocide Treaty has failed to receive Senate approval for 37 years. Now, as a result of strong Administration support, thoughtful consideration by the Seante Foreign Relations Committee, and careful crafting of eight provisions aimed at protecting US interests, Senate advice and consent now seems possible. I am convinced that ratification of the Convention with the eight provisions adopted by the Senate Foreign Relations Committee would fully protect the United States and advance the national interest.

Ratification now would remove a focal point of international criticism over the years. It would make clear to all that US opposition to genocide is unequivocal. And, it would be seen as a reaffirmation of this nation's longstanding commitment to fundamental human rights and individual dignity.

I urge the Senate to give its advice and consent to the Genocide Convention, with the eight provisions adopted by the Senate Foreign Relations Committee, this year.

Sincerely yours,

GEORGE P. SHULTZ.

MYTH OF THE DAY: CONGRESS HAS LIMITED HOSPITAL COVERAGE TO MEDICARE PATIENTS

Mr. PROXMIRE. Mr. President, the myth of the day is that in adopting the new DRG payment system, Congress has limited hospital coverage of Medicare beneficiaries.

Time and again, senior citizens have been told that "your Medicare DRG is up."

Or a physician will tell his or her patient that, "I think you need an extra day in the hospital, but Medicare has set a limit on your coverage and I must discharge you."

And in some cases, patients needing posthospital home health care have been discouraged from contracting with a Visiting Nurse Association or freestanding home health agency in favor of the hospital's own home health agency because "you do want a service that Medicare will reimburse, don't you?"

Well, Mr. President, these statements are just not true. While it may be popular to substitute the phrase "Medicare made me do it" for the old line "The devil made me do it," the same old rejoinder applies: "It just ain't so!"

Far too many Medicare patients, though, are feeling the old bum's rush to the door, raising the specter of denial of benefits and freedom of choice, and, more alarmingly, premature discharge.

So what are the facts?

First, physicians and hospitals have a legal obligation to provide treatment to Medicare patients in the hospital until they no longer need hospital-level care. Violation of that responsibility can lead to malpractice suits or sanctions by Medicare.

Second, the Medicare Program has not set a limit on the number of days of treatment for any diagnosis. The only reason that hospitals receive an average length of stay for each diagnosis is to establish a basis for extra payments for patients whose hospital stays are unusually long and costly—known as outliners.

Third, patients may receive home health care after leaving the hospital from any certified Medicare provider—and there are almost 6,000 home health agencies across the country certified by Medicare. A Medicare patient does not have to rely upon the hospital-based agency unless they would like to use the hospital's service.

Fourth, a patient cannot be charged for extra days in the hospital based solely upon the average length of stay that accompanies each DRG. A hospital may only begin to charge a patient after a physician has determined that the patient no longer needs hospital-level care and that notice has been provided to the patient in writing. Even then you may not be charged until the third day after the day on which the written notice is provided.

It is time to end this myth that Medicare condones this bum's rush to the door about which we in Congress have received so many complaints. That is why I have introduced a Medicare patient bill of rights to provide Medicare patients with clear, straightforward answers regarding their rights to health care when they need it most—during a hospital admission.

I am concerned that we have let this myth develop a life of its own for far too long. It is time to see that Medicare beneficiaries be given the most powerful tool of all—the facts—and the Medicare patient bill of rights will do just that.

And I put my colleagues on notice that I intend to press this resolution to a vote in the next month and end this myth for good.

Mr. President, I yield the floor.

ROUTINE MORNING BUSINESS

The PRESIDING OFFICER (Mr. HECHT). Under the previous order, there will now be a period for the transaction of routine morning business for not to extend beyond 9:30 a.m. with statements therein limited to 5 minutes each.

PRESUMMIT MANEUVERING

Mr. BYRD. Mr. President, I believe the latest round of presummit maneuvering by both the United States and the Soviets should be viewed in a positive light. First, the new proposal on the European intermediate-range missile balance by the Soviets, although not acceptable to the United States in its overall calculations, does present a fresh basis for negotiations at Geneva. So I see an opportunity here for a narrowing or our differences on this matter prior to the summit.

Second, in reviewing the President's speech before the United Nations, I feel that he is taking an upbeat view in his expectations for a real dialogue at the summit. In particular, his three-step proposal toward resolving various regional disputes, including particularly the conflict in Afghanistan, is to be welcomed. I hope that the Soviets will respond positively to this proposal. The Soviet military action in Afghanistan is a major obstacle to improvement in Soviet-American relations. During the recent visit of the Senate delegation which I led to the Soviet Union this past September, we attempted to impress upon Mr. Gorbachev that the withdrawal of Soviet forces from that nation would create a better climate for progress on other major issues in contention between our two nations. Inasmuch as it is not a war which Mr. Gorbachev started, nor one in which he has invested his

prestige up to now, he has an opportunity to take action in the near future to terminate it. If it continues on and on, it will become Mr. Gorbachev's war. Therefore, progress in the ongoing U.N.-sponsored negotiations on Afghanistan should be made, and appropriate international guarantees of an acceptable political solution in Afghanistan could be accomplished. If progress on this matter could be made at the summit, it would be a major achievement.

Mr. President, I ask unanimous consent to include in the RECORD the text of the address by President Reagan to the General Assembly of the United Nations to which I alluded earlier.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

ADDRESS BY THE PRESIDENT TO THE GENERAL ASSEMBLY OF THE UNITED NATIONS AT THE COMMEMORATION OF THE 40TH ANNIVERSARY OF THE UNITED NATIONS

Forty years ago, the world awoke daring to believe hatred's unyielding grip had finally been broken—daring to believe the torch of peace would be protected in liberty's firm grasp.

Forty years ago, the world yearned to dream again innocent dreams, to believe in ideals with innocent trust. Dreams of trust are worthy, but in these 40 years too many dreams have been shattered, too many promises have been broken, too many lives have been lost. The painful truth is that the use of violence to take, to exercise, and to preserve power remains a persistent reality in much of the world.

The vision of the U.N. Charter—to spare succeeding generations this scourge of war—remains real. It still stirs our souls and warms our hearts. But it also demands of us a realism that is rockhard, clear-eyed, steady and sure—a realism that understands the nations of the United Nations are not united.

I come before you this morning preoccupied with peace, with ensuring that the differences between some of us not be permitted to degenerate into open conflict. And I come offering for my own country a new commitment, a fresh start.

On this U.N. anniversary, we acknowledge its successes: the decisive action during the Korean War; negotiation of the Non-Proliferation Treaty; strong support for decolonization; and the laudable achievements by the U.N. High Commissioner for Refugees.

Nor must we close our eyes to this organization's disappointments: its failure to deal with real security issues, the total inversion of morality in the infamous Zionism-isracism resolution, the politicization of too many agencies, the misuse of too many resources.

The U.N. is a political institution and politics requires compromise. We recognize that. But let us remember—from those first days, one guiding star was supposed to light our path toward the U.N. vision of peace and progress—the star of freedom.

What kind of people will we be 40 years from today? May we answer—free people, worthy of freedom, and firm in the conviction that freedom is not the sole prerogative of a chosen few, but the universal right of all God's children.

This is the Universal Declaration of Human Rights set forth in 1948. And this is the affirming flame the United States has held high to a watching world. We champion freedom not only because it is practical and beneficial, but because it is morally right and just.

Free people, whose governments rest upon the consent of the governed, do not wage war on their neighbors. Free people, blessed by economic opportunity, and protected by laws that respect the dignity of the individual, are not driven toward the domination of others.

We readily acknowledge that the United States is far from perfect. Yet we have endeavored earnestly to carry out our responsibilities to the Charter these past 40 years, and we take national pride in our contributions to peace:

We take pride in 40 years of helping avert a new world war and pride in our alliances that protect and preserve us and our friends from aggression. We take pride in the Camp David agreements and our efforts for peace in the Middle East rooted in resolutions 242 and 338; in supporting Pakistan, target of outside intimidation; in assisting El Salvador's struggle to carry forward its democratic revolution; in answering the appeal of our Caribbean friends in Grenada; in seeing Grenada's representative here today, voting the will of its own people. And we take pride in our proposals to reduce the weapons of war.

We submit this history as evidence of our sincerity of purpose. But today it is more important to speak to you about what my country proposes to do, in these closing years of the 20th century, to bring about a safer, a more peaceful, a more civilized world.

Let us begin with candor—with words that rest on plain and simple facts. The differences between America and the Soviet Union are deep and abiding.

The United States is a democratic nation. Here the people rule. We build no walls to keep them in, nor organize any system of police to keep them mute. We occupy no country. The only land abroad we occupy is beneath the graves where our heroes rest. What is called the West is a voluntary association of free nations, all of whom fiercely value their independence and their sovereignty. And as deeply as we cherish our beliefs, we do not seek to compel others to share them.

When we enjoy these vast freedoms as we do, it is difficult for us to understand the restrictions of dictatorships which seek to control each institution and every facet of people's lives, the expression of their beliefs, their movements, and their contacts with the outside world. It is difficult for us to understand the ideological premise that force is an acceptable way to expand a political system.

We Americans do not accept that any government has the right to command and order the lives of its people, that any nation has an historic right to use force to export its ideology. This belief—regarding the nature of man and the limitations of government—is at the core of our deep and abiding differences with the Soviet Union, differences that put us into natural conflict—and competition—with one another.

We would welcome enthusiastically a true competition of ideas, welcome a competition of economic strength and scientific and artistic creativity, and, yes, welcome a competition for the good will of the world's people. But we cannot accommodate ourselves to the use of force and subversion to consolidate and expand the reach of totalitarianism.

When Mr. Gorbachev and I meet in Geneva next month, I look to a fresh start in the relationship of our two nations. We can and should meet in the spirit that we can deal with our differences peacefully. That is what we expect.

The only way to resolve differences is to understand them. We must have candid and complete discussions of where dangers exist and where peace is being disrupted. Make no mistake: our policy of open and vigorous competition rests on a realistic view of the world. Therefore, at Geneva, we must review the reasons for the current level of mistrust.

For example, in 1972 the international community negotiated in good faith a ban on biological and toxin weapons; in 1975 we negotiated the Helsinki accords on human rights and freedoms; and during the decade just past, the United States and the Soviet Union negotiated several agreements on strategic weapons. Yet, we feel it will be necessary at Geneva to discuss with the Soviet Union what we believe are their violations of a number of the provisions in all of these agreements. Indeed, this is why it is important that we have this opportunity to air our differences through face-to-face meetings—to let frank talk substitute for anger and tension.

The United States has never sought treaties merely to paper over differences. We continue to believe that a nuclear war is one that cannot be won and must never be fought. That is why we have sought, for nearly 10 years, still seek, and will discuss in Geneva radical, equitable, verifiable reductions in these vast arsenals of offensive nuclear weapons.

At the beginning of the latest round of the ongoing negotiations in Geneva, the Soviet Union presented a specific proposal involving numerical values. We are studying the Soviet counter-proposal carefully. I believe that within their proposal there are seeds which we should nurture, and in the coming weeks we will seek to establish a genuine process of give-and-take.

The United States is also seeking to discuss with the Soviet Union in Geneva the vital relationship between offensive and defensive systems, including the possibility of moving toward a more stable and secure world in which defenses play a growing role.

The ballistic missile is the most awesome, threatening, and destructive weapon in the history of man. Thus, I welcome the interest of the new Soviet leadership in the reduction of offensive strategic forces. Ultimately, we must remove this menace—once and for all—from the face of this Earth.

Until that day, the United States seeks to escape the prison of mutual terror by research and testing that could, in time, enable us to neutralize the threat of these ballistic missiles and, ultimately, render them obsolete.

How is Moscow threatened—if the capitals of other nations are protected? We do not ask that the Soviet leaders—whose country has suffered so much from war—leave their people defenseless against foreign attack. Why then do they insist that we remain undefended? Who is threatened if Western research—and Soviet research that is itself well-advanced—should develop a non-nuclear system which would threaten not human beings, but only ballistic missiles?

Surely, the world will sleep more secure when these missiles have been rendered useless, militarily and politically, when the Sword of Damocles that has hung over our planet for too many decades is lifted by

Western and Russian scientists working to shield their cities and their citizens and one day shut down space as an avenue for weapons of mass destruction.

If we are destined by history to compete, militarily, to keep the peace, then let us compete in systems that defend our societies rather than weapons which can destroy us both, and much of God's creation along with us.

Some 18 years ago, then-Premier Aleksei Kosygin was asked about a moratorium on the development of an anti-missile defense system. The official Soviet news agency, TASS, reported he replied with these words:

"I believe that defensive systems, which prevent attack, are not the cause of the arms race, but constitute a factor preventing the death of people. . . . Maybe an anti-missile system is more expensive than an offensive system, but it is designed not to kill people but to preserve human lives."

Preserving lives. No peace is more fundamental than that. Great obstacles lie ahead, but they should not deter us. Peace is God's commandment. Peace is the holy shadow cast by men treading on the path of virtue.

But just as we all know what peace *is*, we certainly know what peace is *not*.

Peace based on repression cannot be true peace and is secure only when individuals are free to direct their own governments.

Peace based on partition cannot be true peace. Put simply: nothing can justify the continuing and permanent division of the European continent. Walls of partition and distrust must give way to greater communication for an Open World. Before leaving for Geneva, I shall make major new proposals to achieve this goal.

Peace based on mutual fear cannot be true peace because staking our future on a precarious balance of terror is not good enough. The world needs a balance of safety.

Finally, a peace based on averting our eyes from trouble cannot be true peace. The consequences of conflict are every bit as tragic when the destruction is contained within one country.

Real peace is what we seek, and that is why today the United States is presenting an initiative that addresses what will be a central issue in Geneva—the resolution of regional conflicts in Africa, Asia, and Central America.

Our own position is clear: as the oldest nation of the New World, as the first anti-colonial power, the United States rejoiced when decolonization gave birth to so many new nations after World War II. We have always supported the right of the people of each nation to define their own destiny. We have given $300 billion since 1945 to help people of other countries. And we have tried to help friendly governments defend against aggression, subversion, and terror.

We have noted with great interest similar expressions of peaceful intent by leaders of the Soviet Union. I am not here to challenge the good faith of what they say. But isn't it important for us to weigh the record, as well?

—In Afghanistan, there are 118,000 Soviet troops prosecuting war against the Afghan people.

—In Cambodia, 140,000 Soviet-backed Vietnamese soldiers wage a war of occupation.

—In Ethiopia, 1,700 Soviet advisers are involved in military planning and support operations along with 2,500 Cuban combat troops.

—In Angola—1,200 Soviet military advisers involved in planning and supervising combat operations, along with 35,000 Cuban troops.

—In Nicaragua—some 8,000 Soviet bloc and Cuban personnel, including about 3,500 military and secret police personnel.

All of these conflicts—some of them under way for a decade—originate in local disputes but they share a common characteristic: they are the consequence of an ideology imposed from without, dividing nations and creating regimes that are, almost from the day they take power, at war with their own people. And in each case, Marxism-Leninism's war with the people becomes war with their neighbors.

These wars are exacting a straggering human toll and threaten to spill across national boundaries and trigger dangerous confrontations. Where is it more appropriate than right here at the United Nations to call attention to Article 2 of our Charter which instructs members to refrain "from the threat or use of force against the territorial integrity or political independence of any state. . . ."?

During the past decade these wars played a large role in building suspicions and tensions in my country over the purpose of Soviet policy. This gives us an extra reason to address them seriously today.

Last year I proposed from this podium that the United States and Soviet Union hold discussions on some of these issues, and we have done so. But I believe these problems need more than talk.

For that reason, we are proposing, and are fully committed to support, a regional peace process that seeks progress on three levels:

First, we believe the starting point must be a process of negotiation among the warring parties in each country I've mentioned—which, in the case of Afghanistan, includes the Soviet Union. The form of these talks may and should vary, but negotiations—and an improvement of internal political conditions—are essential to achieving an end to violence, the withdrawal of foreign troops and national reconciliation.

There is as second level: once negotiations take hold and the parties directly involved are making real progress, representatives of the United States and the Soviet Union should sit down together. It is not for us to impose any solutions in this separate set of talks. Such solutions would not last. But the issue we should address is how best to support the ongoing talks among the warring parties. In some cases, it might well be appropriate to consider guarantees for any agreements already reached. But in every case the primary task is to promote this goal: verified elimination of the foreign military presence and restraint on the flow of outside arms.

Finally, if these first two steps are successful, we could move on to the third—welcoming each country back into the world economy so its citizens can share in the dynamic growth that other developing countries—countries that *are* at peace—enjoy. Despite past differences with these regimes, the United States would respond generously to their democratic reconciliation with their own people, their respect for human rights, and their return to the family of free nations.

Of course, until such time as these negotiations result in definitive progress, America's support for struggling democratic resistance forces must not and shall not cease.

This plan is bold. And it is realistic. It is not a substitute for existing peace-making efforts; it complements them. We are not trying to solve every conflict in every region of the globe, and we recognize that each conflict has its own character. Naturally other regional problems will require different approaches. But we believe that the recurrent pattern of conflict that we see in these five cases ought to be broken as soon as possible.

We must begin somewhere, so let us begin where there is great need and great hope. This will be a clear step foward to help people choose their future more freely. Moreover, this is an extraordinary opportunity for the Soviet side to make a contribution to regional peace which in turn can promote future dialogue and negotiations on other critical issues.

With hard work and imagination, there is no limit to what, working together, our nations can achieve. Gaining a peaceful resolution of these conflicts will open whole new vistas for peace and progress—the discovery that the promise of the future lies not in measures of military defense, or the control of weapons, but in the expansion of individual freedom and human rights.

Only when the human spirit can worship, create, and build, only when people are given a personal stake in determining their own destiny and benefitting from their own risks do societies become prosperous, progressive, dynamic, and free.

We need only open our eyes to the economic evidence all around us. Nations that deny their people opportunity—in Eastern Europe, Indochina, southern Africa, and Latin America—without exception are dropping further behind in the race for the future.

But where we see enlightened leaders who understand that economic freedom and personal incentive are key to development, we see economies striding forward. Singapore, Taiwan, and South Korea—India, Botswana, and China. These are among the current and emerging success stories because they have the courage to give economic incentives a chance.

Let us all heed the simple eloquence in Andrei Sakharov's Nobel Peace Prize message: "International trust, mutual understanding, disarmament and international security are inconceivable without an open society with freedom of information, freedom of conscience, the right to publish and the right to travel and choose the country in which one wishes to live."

At the core, this is an eternal truth. Freedom works. That is the promise of the Open World and awaits only our collective grasp. Forty years ago, hope came alive again for a world that hungred for hope. I believe fervently that hope is still alive.

The United States has spoken with candor and conviction today, but that does not lessen these strong feelings held by every American: It's in the nature of Americans to hate war and its destructiveness. We would rather wage our struggle to rebuild and renew, not to tear down. We would rather fight against hunger, disease, and catastrophe. We would rather engage our adversaries in the battle of ideals and ideas for the future.

These principles emerge from the innate openness and good character of our people—and from our long struggle and sacrifice for our liberties and the liberties of others. Americans always yearn for peace. They have a passion for life. They carry in their hearts a deep capacity for reconciliation.

Last year at this General Assembly, I indicated there was every reason for the United States and the Soviet Union to shorten the

distance between us. In Geneva—the first meeting between our heads of government in more than 6 years—Mr. Gorbachev and I will have that opportunity.

So, yes, let us go to Geneva with both sides committed to dialogue. Let both sides go committed to a world with fewer nuclear weapons—and some day with none. Let both sides go committed to walk together on a safer path into the 21st century and to lay the foundation for enduring peace.

It is time, indeed, to do more than just talk of a better world. It is time to act. And we will act when nations cease to try to impose their ways upon others. And we will act when they realize that we, for whom the achievement of freedom has come dear, will do what we must to preserve it from assault.

America is committed to the world, because so much of the world is inside America. After all, only a few miles from this very room is our Statue of Liberty, past which life began anew for millions—where the peoples from nearly every country in this hall joined to build these United States.

The blood of each nation courses through the American vein—and feeds the spirit that compels us to involve ourselves in the fate of this good Earth. It is the same spirit that warms our heart in concern to help ease the desperate hunger that grips proud people on the African continent.

It is the internationalist spirit that came together last month when our neighbor, Mexico, was struck suddenly by an earthquake. Even as the Mexican nation moved vigorously into action—there were heartwarming offers by other nations offering to help and glimpses of people working together, without concern for national self-interest or gain.

And if there was any meaning to salvage out of that tragedy, it was found one day in a huge mound of rubble that was once the Juarez Hospital in Mexico City.

A week after that terrible event and as another day of despair unfolded—a team of workers heard a faint sound coming somewhere from the heart of the crushed concrete and twisted steel. Hoping beyond hope, they quickly burrowed toward it.

As the late afternoon light faded, and racing against time, they found what they had heard—and the first of three baby girls—newborn infants—emerged to the safety of the rescue team.

Here is the scene through the eyes of one who was there. "Everyone was so quiet when they lowered that little baby down in a basket covered with blankets. The baby didn't make a sound, either. But the minute they put her in the Red Cross ambulance everybody just got up and cheered."

Well, amidst all that hopelessness and debris came a timely—and timeless—lesson for us all. We witnessed the miracle of life.

It is on this that I believe our nations can make a renewed commitment. The miracle of life is given by One greater than ourselves. But once given, each life is ours to nurture and preserve—to foster not only for today's world but for a better one to come.

There is no purpose more noble than for us to sustain and celebrate life in a turbulent world. That is what we must do now. We have no higher duty—no greater cause as humans. Life—and the preservation of freedom to live it in dignity—is what we are on this Earth to do.

Everything we work to achieve must seek that end so that some day our prime ministers, our premiers, our presidents and our general secretaries will talk not of war and peace—but only of peace.

We've had 40 years to begin. Let us not waste one more moment to give back to the world all that we can in return for this miracle of life.

Thank you.

PRESIDENT ZIA'S THOUGHTS ON THE AFGHANISTAN CRISIS

Mr. BYRD. Mr. President, the Washington Post of Tuesday, October 22, 1985, carried a front page article reporting on a lengthy interview with Pakistan's President Mohammed Zia ul-Haq. No world leader has a more immediate interest in events in Afghanistan than does President Zia. Soviet and Afghan aircraft routinely violate Pakistani airspace and bomb refugee settlements in Pakistan. The Pakistani Government has shouldered much of the burden of the Afghan war by providing sanctuary for more than 2 million Afghans driven from their country by Soviet policies that target civilians.

President Zia observes in this interview that the Soviet military effort after nearly 6 years is a failure. He estimates that combined Soviet and Afghan forces have suffered casualties exceeding 60,000. This leads President Zia to speculate that "one day the Soviet Union will come to the conclusion that there is no military solution," and begin the process of achieving a diplomatic settlement.

I hope that President Zia is correct. In my recent meeting with Soviet leader Gorbachev, my delegation stressed the importance the United States attaches to a Soviet withdrawal from Afghanistan, and the damage the Soviet occupation has done. President Zia's remarks provide important insights into developments in South Asia, and I ask unanimous consent that the Washington Post article entitled "Soviet and Afghan Casualties Exceed 60,000, Zia Declares" be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Washington Post, Oct. 22, 1985]

SOVIET AND AFGHAN CASUALTIES EXCEED 60,000, ZIA DECLARES

(By Michael Getler and Don Oberdorfer)

NEW YORK, October 21.—Pakistani President Mohammed Zia ul-Haq said today that the Soviet Union and its Afghan ally have suffered 60,000 to 70,000 casualties in less than six years of warfare in Afghanistan and predicted that Moscow will conclude sooner or later that "there is no military solution."

Zia spoke in an hour-long interview that also covered his hopes for improved relations with Indian Prime Minister Rajiv Gandhi, whom he will meet at the United Nations here Wednesday. In addition, he discussed the more limited, nonmilitary role he sees for himself and the currently banned opposition parties when martial law is lifted by the end of the year.

The Pakistani leader, who addresses the U.N. General Assembly on Wednesday, also said that Benazir Bhutto, a leading figure of the main opposition Pakistan People's Party, who has been under 90-day house arrest since late August, "can leave the country any time" and is expected to go back to France before Nov. 6. She had returned to Pakistan from France to attend her brother's funeral.

Zia expressed long-term hopes, but few short-range expectations, for the Afghan policy of the new Soviet leader, Mikhail Gorbachev. He depicted Gorbachev as taking a "wait and see" attitude toward the Afhgan war while being preoccupied with internal questions.

Meeting Zia in Moscow as he took power last March, Gorbachev delivered a personal warning about what he charged was Pakistan's aid to the Afghan resistance. Zia said that in the seven months since that meeting, the Soviets have intensified both their military activity inside Afghanistan and their "border violations" on the Pakistani side of the Afghan-Pakistani line.

In the war zone, said Zia, the intensification of Soviet military activity in four offensives so far this year has caused higher casualties on all sides, but "it has not made much difference to the activities of the freedom fighters inside Afghanistan."

Discussing the military situation in Afghanistan, Zia, a career soldier who took power under martial law in 1977, said that although actual numbers are much smaller, the Soviets have suffered proportionately greater combat troop losses than did the United States in Vietnam or the allies in World War II.

The total toll of killed, wounded or sick among Soviets and their Afghan allies is 60,000 to 70,000 men, Zia said. State Department sources said there were credible estimates. The U.S. estimate early this year, before the stepped-up fighting, indicated that about 9,000 Soviets may have been killed and 16,000 wounded. Zia, saying "we have very close eyes" on the situation across the border, put the present Soviet force in Afghanistan at 150,000 men, which is substantially higher than the 115,000 to 120,000 estimated by the United States. He said there were no casualty figures for the anti-government forces that could be authenticated.

Zia described violations of Pakistan's border, including bombing raids, as attempts "to intimidate people in the border area."

"These warnings cannot be ignored," he said, but gave no hint that Pakistan would change its course. "You've got to put up a fairly good poker face," Zia said of his response to Soviet pressures.

Soviet leader Yuri Andropov, who came to that post after being head of the KGB, or secret police, was reputed to be personally opposed to the Soviet occupation of Afghanistan. Zia said that "we saw definite signs" that Andropov as Kremlin leader had been "following a policy of leniency in trying to resolve the [Afghan] issue."

Gorbachev, on the other hand, was described by Zia as "not so much in a hurry" to find a resolution to the Afghan problem, "which in his [Gorbachev's] opinion, the military is tackling."

The new Soviet leader seems willing to "wait and see" whether an intensification of Soviet military action can change the situation to Moscow's advantage, according to the Pakistani.

Zia predicted with an air of considerable confidence that this effort will not succeed. He said that it was his impression Gorbachev is sensitive to the propaganda loss the

Soviets suffer in much of the nonaligned world over Afghanistan and that "one day the Soviet Union will come to the conclusion that there is no military solution" and thus a diplomatic solution must be arranged.

Zia said that next month's summit meeting in Geneva of President Reagan and Gorbachev could have a "tremendous" positive effect on Moscow if the U.S. leader, with "the right perspective and the right emphasis," makes some simple but clear-cut points about Afghanistan.

Those points are, Zia said, that the Soviet Union must withdraw from Afghanistan and that it can leave behind a "friendly" and "nonaligned" Afghanistan, with no outside interference allowed by anyone, including Moscow.

Zia expressed some concern and surprise at the actions in the past six weeks of Gandhi, who has stepped up his accusations that Pakistan is building atomic weapons. Nevertheless, Zia spoke warmly of the new Indian leader as "an openminded, simple, forthright person" and said he hopes his talks here with Gandhi help "remove the suspicions, misapprehensions and lack of confidence" between the neighboring countries.

He said he had apprehensions that India, which exploded a crude nuclear device in 1974, already had "some nuclear devices for military use" and that a newly operational plutonium-producing breeder reactor, which Zia described as operating without international safeguards, "must create a lot of fear and concern" in the region.

He said both countries could resolve their nuclear fears of each other with bilateral, regional or international accords but said, "I don't know if India is that keen to be bound" by such agreements.

Zia said that his government is asking for more than the current $3.2 billion in the next five-year program of U.S. military and economic aid to his country. The present program is about evenly split between military and economic help. But Zia said that next time he wants to increase the percentage going to economic help while adding "a little more" to the current $1.6 billion in military aid.

Zia reiterated his pledge to end martial law by the end of this year and said there were "all reason" for it to end even sooner. He said that, for another five years, he would retain the presidency, with more limited powers than he presently wields. A new prime minister would be the chief executive. Zia would end his military role as leader of the armed forces.

As a step toward lifting martial law, Zia pushed a new law through Pakistan's National Assembly last week that critics contend merely seeks to legitimize what was done under his martial-law rule and protect him from prosecution from some future government.

Another key bill that may allow opposition parties to operate freely once again, comes before the assembly next month. Under questioning today, Zia said, "I see no reason" why what he described as a "refined" version of the Pakistan Peoples' Party "should not function" once again. Zia said how "refined" the party becomes would depend on how party leaders controlled their various factions.

Before a party could be revived, however, it would have to register and be approved by an "independent" electoral commission. The parties would have to show their political manifesto, financial support and commitment to democracy. Zia described the commission as a device to import a "certain form of discipline" on the political process.

TEXTILE AND APPAREL TRADE ENFORCEMENT

Mr. BYRD. Mr. President, as a cosponsor of the textile bill and a longtime advocate of fair trade for America's shoe industry, I am pleased to join with my colleagues in support of the Hollings-Thurmond amendment.

The American textile industry is regarded as one of the most modern and efficient in the world. The Department of Commerce tells us that American textile companies will spend about $2 billion this year alone on capital improvements, mostly for new equipment. American textile workers have joined with management in an unprecedented drive to improve productivity. But anticompetitive prices by some foreign textile manufacturers are undermining the American industries' efforts and costing jobs. In the last 5 years, textile imports have doubled, and recent trends indicate that foreign products are increasing their share of the American market at an even faster rate. Between 1980 and 1982, the average increase in foreign shipments was 10.2 percent per year. But the annual increase from 1982 to 1984 is more than three times that rate, averaging 30.9 percent.

In the face of this challenge, the administration has steadfastly refused to take steps to protect American jobs. While foreign products have garnered almost half of the domestic market, the administration clings to free trade rhetoric. While some 250 American textile factories have closed over the past 5 years, this administration has managed to remain aloof and philosophical about the resulting job loss.

This is an attitude that American footwear workers know all too well. At the end of 1984, unemployment in the nonrubber footwear industry reached 16.7 percent—twice the national average. American production has fallen more than 20 percent this year below last year's levels. Plant closings are increasing, with 105 footwear plants closing in 1984—more than double the total in 1983. These closings include two plants in West Virginia—one in White Sulfur Springs, and another in Elkins.

As a Member of the Senate footwear caucus, I have tried repeatedly to get the administration to act to save American jobs in this important industry. When the International Trade Commission found that the industry was suffering from serious harm as a result of imports, I joined my colleagues in writing the President to urge that he accept the International Trade Commission's finding and provide appropriate relief for footwear workers and the industry. But the President refused to accept the ITC's recommendation and denied relief for the industry.

In both textiles and footwear products, we have seen administration inaction lead to a bipartisan consensus for Congress to fill the void. In his recent statement of administration trade policy, the President indicated that he would seek modifications and improvements in the trade law. But this administration's failure to apply existing law has undermined the textile and footwear industries and caused thousands of Americans to lose their jobs. No trade policy can survive on rhetoric. To be successful, it must be given fair, consistent, and convincing application. Because the administration has failed to develop that kind of policy, we are acting today. I commend Senators HOLLINGS and THURMOND, and Senators MITCHELL and COHEN, for their efforts on behalf of this measure, and I am pleased to join with them in supporting it.

NATIONAL FOREST PRODUCTS WEEK

Mr. COCHRAN. Mr. President, pursuant to Public Law 86-753, a resolution passed by Congress in 1960, the President has proclaimed this week, October 20-26, as "National Forest Products Week" in honor of this country's magnificent forests, their bountiful resources, and the men and women who harvest and manage those resources with such talent and dedication. The men and women I speak of are the forest managers, the landowners, the mill workers, and the researchers who commit themselves to the production and the conservation of one of America's greatest resources, its forests.

The theme for this year's observance is "America Grows on Trees." Indeed America has grown on trees. The American Indians made canoes from the bark of paper birch; the Jamestown settlers used the dense forest to build their first homes; New England white pines were used to make masts for seagoing ships during the American Revolution; and in the 19th century, wood fibers were discovered to be useful in making paper.

When Congress enacted the National Forest Products Week resolution in September 1960, our great American forest contained about 603 billion cubic feet of wood. Today, due to outstanding management by America's forest industry personnel, that forest has increased to 711 billion cubic feet. In the last 25 years, it has produced 1.7 billion tons of paper and paperboard and has yielded material for the construction of 46 million new housing units.

But the benefits of forest products reach much further than paper and construction. Today, wood alcohols are

used to produce the colognes that some wear. Torula yeast, a product made from wood sugars, is used in baby foods. Cellulose, a carbohydrate that comes from wood, is a prime component in the manufacturing of football helmets, hard hats, and rayon; and pulping liquid is used in the production of hair spray.

Forest managers, through careful and studied management techniques, have made great strides in forest production, somehow facilitating ever-increasing yields while simultaneously fulfilling their roles as stewards of the land. Each year over 1 billion tree seedlings are planted; that is four for every man, woman, and child in the United States. Annual wood growth in the United States totals approximately 21.9 billion cubic feet. In addition, forest managers work steadfastly to combat wildfire, insects, and diseases, which have conspired to destroy so many millions of acres of our forests in the past.

In my home State, the forest covers 53 percent of the land and is a major source of income. In 1984, Mississippi foresters harvested 518 million dollars' worth of forest products, making it the third most valuable crop in the State. That number continues to rise; the 1984 harvest yielded 7 percent more than in 1983.

Henry David Thoreau, at the outset of America's industrial revolution, said:

> It is remarkable what a value is still put upon wood even in this age and in this new country—a value more permanent and universal than that of gold.

Mr. President, as we observe this week as National Forest Products Week, I salute the hard working men and women who diligently work to grow, produce, and conserve our Nation's treasure.

Mr. COCHRAN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. HELMS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

THE CONTINUING PLIGHT OF SOVIET JEWRY

Mr. ZORINSKY. Mr. President, in anticipation of the upcoming summit between President Reagan and Soviet General Secretary Gorbachev, I want to call attention to the continuing plight of Soviet Jewry generally, and specifically to the suffering of one Soviet prisoner of conscience, Rabbi Moshe Abramov.

My wife Cece belongs to the Congressional Spouses' Committee of 21, each member of which has adopted a Soviet prisoner of conscience with whom she tries to open lines of communication. Cece's adopted prisoner is Rabbi Moshe Abramov who was convicted of "malicious hooliganism" and sentenced to 3 years in a Soviet labor camp. His real crime is that he is Jewish—nothing more. Cece has written to Rabbi Abramov. Her letters have not been returned; neither have they been answered. We cannot be certain that he has ever seen them.

Rabbi Abramov, like the other 20 adopted prisoners of conscience, represents hundreds of thousands of Jews who suffer daily persecution, harassment, and abuse in the Soviet Union. They would leave, except that they are denied permission to emigrate by the Soviet authorities. They are hostages, even those not in prisons and labor camps are nonetheless prisoners. All are harassed and discouraged from the practice of religion—even rabbis, and live with a barrage of Soviet anti-Semitic propaganda. Those who seek to emigrate may be dismissed or demoted at work, physically abused, intimidated. Their mail may be confiscated, their telephone service disconnected, or they may be conscripted into the military or arrested on trumped-up charges.

Every Member of this body recently joined in a letter to President Reagan denouncing this abuse of human rights and asking the President to present our unified and adamant opposition to the continued persecution of Soviet Jewry. Today I renew that request on behalf of Rabbi Abramov and 400,000 others, Jewish men, women, and children, and all those of whatever faith or creed yearning to breathe free in the Soviet Union.

ADDRESS BY THE SECRETARY OF THE ARMY JOHN O. MARSH TO CONGRESSIONAL MEDAL OF HONOR SOCIETY

Mr. THURMOND. Mr. Pesident, Secretary of the Army John O. Marsh recently made an address to the Congressional Medal of Honor Society at a biennial convention in my home State.

His speech poignantly addressed three of our Nation's most important monuments: the Washington Monument, Lincoln Memorial, and the Grant Monument. Each carries its own symbolism, which characterizes a facet of this great Nation's worth. Secretary Marsh's speech was patriotic and provided a refreshing reminder that we are fortunate to live in this great democracy.

Mr. President, I ask unanimous consent that the following speech be printed in the RECORD.

There being no objection, the speech was ordered to be printed in the RECORD, as follows:

REMARKS BY THE HONORABLE JOHN O. MARSH, JR., SECRETARY OF THE ARMY

The last line of the Declaration of Independence reads: "And for the support of this declaration, with a firm reliance on the protection of Divine Providence, we mutually pledge to each other our lives, our fortunes, and our sacred honor."

There is no group in our country that has done more to keep that pledge and to protect the values America represents than you. I am honored to be here this evening.

I would like to talk with you about three monuments on the Mall of our Nation's Capital. One represents the founding of the Republic and National Will. One honors preservation of the Union. And the third is a tribute to leadership in fighting the Nation's wars.

First is the Washington Monument.

If you were to ascend the steps of the 555 foot obelisk, you would find placed in the side of the monument, stones taken from the various states to emphasize the role of America's first President in founding the Republic.

Just past the 500 foot level is a polished white stone taken from the ruins of ancient Carthage.

Other than an identification of the donor who gave the stone during the last century, there is nothing to indicate why, in a monument that is fully American, there is displayed a stone with a history all its own, taken from a city of another place and another time.

Carthage once flourished on the Southern Shores of the Mediterranean Sea; prosperous in trade and commerce, and material wealth, it was the pride and envy of the ancient world. But, it was crushed by Rome, and its fields were sown with salt.

Could it be this stone from a great but forgotten city was placed there also to remind us that material wealth and progress are never substitutes for National Will?

Second, at the western end of the Mall, facing East toward the Washington Monument and the Capitol, is the Lincoln Memorial honoring our 16th President. His greatness was appreciated in death.

It was during Lincoln's Administration that on July 12, 1862 the Medal of Honor would be first authorized as an Award for bravery.

In the Lincoln Memorial, chipped on a large stone tableau, is the Gettysburg Address. Ironically, an editorial comment by the Harrisburg Patriot newspaper immediately following President Lincoln's Gettysburg Address, said:

"We pass over the silly remarks of the President; for the credit of the nation we are willing that the veil of oblivion shall be dropped over them and that they shall no more be repeated or thought of."

The Memorial honors what he did to preserve the Union, and reminds us today of what we must do to defend it.

The third monument is at the foot of the Capitol, on the eastern end of the Mall, facing west toward the Washington Monument. It is one of the greatest pieces of equestrian statuary in the world. Unfortunately many people are not aware it is the Grant Monument. It is a tribute to military leadership and a strong defense. Infantry is depicted around the base, a cavalry charge to its right, and a field artillery caisson on its left.

This past July we celebrated the centennial of General Grant's death. His great military genius, like his monument, has never

been fully appreciated. His compassion, evidenced at Appomattox, marks him as a great human being.

Grant's greatness was not just his military leadership which was significant, but his ability to mold into a total war effort the resources of an industrial society, and take advantage of technologies that impacted on military logistics such as manufacturing, transportation, and communications especially the telegraph.

The impact of the telegraph was displayed early in the war. At the first Battle of Bull Run in 1861, in the face of civilian flight and Union retreat, the War Department telegraph operator near the battle sent a message to the Department of War. Describing the retreat, he ended the message saying:

"I am going to close the office and go with the crowd:"

The following telegram came back at once:

"If you keep your office open until you have permission to close it, you will be rewarded. If you close it without such permission, you will be shot."

He stayed!

Today, we still live in a troubled world.

In this decade:

Martial law has been declared in Poland.

Russia has seen its fourth dictator in as many years. Their military build-up continues.

In Africa, famine has struck Ethiopia.

The governments of the Sudan and Nigeria have changed, and Libya has moved troops into Chad.

The war of attrition between Iran and Iraq drags on endangering the Persian Gulf.

In Afghanistan, Soviet invaders have increased their forces and the pace of their war of devastation.

In an unsuccessful assassination attempt on the President of South Korea, North Korean terrorists murdered four members of his Cabinet.

Great Britain and Argentina fought a war over the Falkland Islands.

Blood letting continues in Kampuchea.

In September '83 the Russians shot down a Korean airliner, taking 269 lives.

Recently, we were shocked by the murder in East Germany of Major Nicholson, who was carrying out his duties under an international agreement.

In October 1983, Soviet and Cuban aggression into the Southern Caribbean at Grenada was halted by the United States rescue operation to save American citizens.

The hijacking of TWA flight #847 in Lebanon is further evidence of how the scourge of terrorism threatens the peace and stability of the world.

The Soviet Union has made Cuba an arsenal in the Caribbean, and they are the principal supporter of arms going into Nicaragua.

The recent visit to the Kremlin by Daniel Ortega, a Marxist-Leninist ruler, is just further confirmation of the already overwhelming evidence of the Soviet connection.

Surely it must be perceived there is a growing threat to the collective security of the Hemisphere that warrants the modest request made by the President to aid those supporting freedom in Nicaragua.

As the Administration has stated, it is not advocating the overthrow of the communist government of Nicaragua—support for the Contras is to pressure that communist government to live up to the promises it made to the Organization of American States in 1979 when they promised the establishment of democratic processes in Nicaragua.

On the world scene, the conflict we are in, but did not choose, is a challenge of ideas and contrasting values.

What is at stake is personal freedom and liberty, the same stakes that Patrick Henry addressed in St. John's Church in Richmond. Governance in the 20th Century is a struggle between the free society and the police state. Do we choose our leaders or are they chosen for us?

What you do today makes a difference, just as what you once did to earn that Medal made a difference.

It is easy to become disillusioned, but you must keep your vision.

It is easy to become dissatisfied, but you must renew your spirit.

It is easy to become a cynic, but you must retain your sense of purpose.

It is easy to become selfish, but you must be willing to sacrifice.

It is easy to despair, but you must keep your hope.

We need to be reminded of Grant's perseverance when he said:

"I'll fight it out on this line if it takes all summer."

We must remember Lincoln's dedication and compassion when he observed:

"With malice toward none, with charity for all, with firmness in the right as God gives us to see the right, let us strive on to finish the work we are in."

Lincoln's work is not done.

In the Pentagon is the Hall of Heroes, a shrine honoring those who have been awarded this Medal. Although the design may vary slightly for the Medal of each Service, all represent "valor," a magnificent common virtue of those who have served the Nation so well.

From Washington we must strengthen our National Will and renew our sense of purpose. As we approach the Bicentennial of our great Constitution, let us remember the charge that Washington gave to those delegates when it appeared the Convention would fall into disarray because of regional and economic difference, as well as political philosophy. He charged the delegates with these words:

"Let us raise a standard to which the wise and the honest can repair. The event is in the hands of God."

Let us raise that standard today.

NONDEFENSE DISCRETIONARY ACCOUNTS IN DOT APPROPRIATIONS

BILL (H.R. 3244)

Mr. DOMENICI. Mr. President, on October 23 during Senate debate on H.R. 3244, the fiscal year 1986 Department of Transportation and Related Agencies Appropriation bill, an amendment was adopted to reduce nondefense discretionary appropriated programs in that bill.

A list of the nondefense discretionary programs in the bill was inadvertently omitted from the RECORD at that time, and I ask unanimous consent that it be printed in the RECORD.

There being no objection, the list was ordered to be printed in the RECORD, as follows:

NONDEFENSE DISCRETIONARY ACCOUNTS IN THE DEPARTMENT OF TRANSPORTATION AND RELATED AGENCIES APPROPRIATION BILL

National Alcohol Fuels Commission: Salaries and expenses, 48 1700 0 1 271.

DEPARTMENT OF TRANSPORTATION

THE CABOT TRADE DECISION

Mr. BAUCUS. Mr. President, American companies face fierce competition from subsidized foreign companies. Our trade law ostensibly outlaw trade subsidies. Unfortunately, the U.S. Commerce Department has invented a loophole in our antisubsidy law, through which our foreign competitors have driven billions worth of lumber, petrochemicals, and other natural resource products.

A few weeks ago, the Court of International Trade issued a well-reasoned opinion reversing the Commerce Department's interpretation. I would like to briefly explain this decision, and its potential significance.

THE LEGAL FRAMEWORK

The basic GATT subsidy provision is article XVI:4, which proscribes subsidies that lead to the sale of exported products at lower prices than similar domestic products and thereby injure an industry. This provision is expanded and elaborated upon in the Subsidies Code, which proscribes not only export subsidies, but also domestic subsidies that "adversely affect the conditions of normal competition."

Neither GATT nor the Subsidies Code are self-executing. Instead, they must be implemented by U.S. trade law provisions that fit the GATT framework. In the subsidies area, Congress has more leeway than in other areas, because, as trade law expert Gary Hufbauer says, the GATT/Subsidies Code provisions "leave such a large gray area where nations have failed to agree on common rules."

The U.S. implementing law is the countervailing duty law contained in title VII of the Trade Act. This law proscribes certain "domestic subsidies," including "the assumption of any costs * * * of manufacture, production or distribution" for "a specific enterprise or industry, or group of enterprises or industries."

The key phrase is "a specific enterprise or industry, or group of enterprises or industries." This phrase, one court has noted, "is simply one of the phrases used to insure that the listed Government subsidies are covered in the widest possible range of circumstances * * *. Congress has covered the full range of possibilities, going from the subsidization of a single unit to all larger units, up to and including the entire productive sector."

The U.S. Commerce Department, however, believes otherwise. In the phrase "specific industry or group of industries," Commerce has divined a "general availability" requirement which, as Deputy U.S. Trade Representative Mike Smith recently described it, "marks the dividing line between permissible and impermissible subsidies."

For example, in one case, United States softwood lumber producers charged that the Canadian Provinces were subsidizing their lumber industries by providing timber cutting rights at substantially less than their fair market value. The Commerce Department, however, disagreed. Commerce held that benefits that were generally available throughout the exporting country's economy are not countervailable subsidies. Further, Commerce held that cheap cutting rights were generally available throughout the Canadian economy because they were nominally available to anybody that wanted them and were in fact used by a few industries besides the lumber industry—such as the furniture and paper industries. In a case involving Mexican natural gas, issued around the same time, Commerce issued a similar general availability holding.

Mr. President, these holdings were absurd. By inventing the general availability test and applying it so broadly that benefits provided to a handful of forest products industries are considered generally available, Commerce created a huge loophole in our countervailing duty law, to the detriment of U.S. industries.

Neither the Canadian lumber nor the Mexican natural gas decisions were appealed to the Court of International Trade. Shortly thereafter, however, the CIT did begin ruling on some similar cases. In Carlisle Rubber, the Court noted the need for some kind of test to protect general subsidies that most governments confer such as national defense, government-subsidized education and infrastructure, and sufficient public health and agricultural extension programs and held, accordingly, that there was a general availability test. In Bethlehem Steel, however, the court disagreed, holding that there was not.

THE CABOT DECISION

A few weeks ago another decision was issued, which begins to make some sense of the CIT's holdings. In Cabot Corp. the Court agreed that there is a general availability test, but that the Commerce Department has applied it too broadly. The Court said that:

The distinction that has evaded the [Commerce Department] is that not all so-called generally available benefits are alike—some are benefits accruing generally to all citizens, while others are benefits that when actually conferred accrue to specific individuals or classes. Thus, while it is true that a generalized benefit provided by government, such as national defense, education or infrastructure, is not a countervailable bounty or grant, a generally available benefit—one that may be obtained by any and all enterprises or industries—may nevertheless accrue to specific recipients. General benefits are not conferred upon any specific individuals or classes, while generally available benefits, when actually bestowed, may constitute specific grants conferred upon specific identifiable entities, which would be subject to countervailing duties.

The appropriate standard focuses on the de facto case by case effect of benefits provided to recipients rather than on the nominal availability of benefits.

Consequently, the Court remanded the case to the Commerce Department for reconsideration.

CONCLUSION

This decision makes good sense. As Gary Hufbauer says, "the general availability standard should be used sparingly to excuse only those incentives that in practice and design are used by a broad range of industries and geographic areas. Otherwise, the international community risks taking countermeasures against little subsidies while big subsidies run free."

Mr. President, the Commerce Department's broad general availability requirement has done exactly what Hufbauer warned against, thereby permitting Canadian lumber subsidies and Mexican natural gas subsidies to run free.

By reversing the Commerce Department, the Cabot decision restores our countervailing duty law to the scope Congress intended for this reason. I urge the administration to adopt the reasoning of the Cabot decision in any future countervailing duty litigation.

THE 10TH ANNIVERSARY OF PUBLIC LAW 94-142 AND THE IMPORTANCE OF S. 873

Mr. CHAFEE. Mr. President, in November we will celebrate the 10th anniversary of the Education for All Handicapped Children Act—Public Law 94-142. I am a cosponsor of Senate Concurrent Resolution 71 to commemorate this revolutionary law.

When this act was originally proposed it was subject to great debate and controversy. There was disagreement about many of the basic premises of the proposal. When I refer to the act as revolutionary, I do so with sincerity.

We are watching the first generation of handicapped children leave public schools after 10 years of education in what is known as the "least restrictive setting"—that is, whenever possible, handicapped and nonhandicapped children being educated together, each getting the education they need.

The 10th anniversary of Public Law 94-142 is indeed a time to celebrate our accomplishments, but it is also a time for us to reflect upon the changes that still must be made to ensure a better quality of life and widespread opportunities for the developmentally disabled.

Handicapped children have become accustomed to learning and playing with nonhandicapped children. Nonhandicapped children have grown to accept children with handicaps as friends and classmates. But Mr. President, we are in danger of eroding these achievements.

As handicapped children leave school at age 18 or 21, they are offered few options for remaining in their own communities—with their families and friends.

Although it has been shown that people with severe handicaps can live, learn, work, and play in the community, as they become young adults our system of funding the services they need forces too many people into segregated residential systems.

We have demonstrated in our educational process that severly handicapped people can be supported in the community given the properly supported environment. Public Law 94-142 provides this type of environment to students in the educational process.

It is time that we reform the Medicaid funding stream to offer the same level of support to promote lifelong integration of handicapped and nonhandicapped children and young adults throughout their lives. We must not allow the gains we have made through Public Law 94-142 to be lost due to a funding mechanism that allows support services only in the most restrictive settings.

I have offered legislation, S. 873, the community and family living amendments of 1985, that offers precisely the sort of reform this system needs. It is the logical follow up to Public Law 94-142.

My bill, offers many of the same types of reforms introduced in the educational field by Public Law 94-142. It calls for greater parental involvement in placement decisions, and formal due process procedures. My bill reforms Medicaid funding to encourage less restrictive residential settings, to allow handicapped and nonhandicapped children and adults to continue to live their lives together. My bill says that just as segregated schooling is unwarranted, so too are many of our segregated residential settings.

The community and family living amendments of 1985 offers those with disabilities the chance to receive those services in community settings, which is where so many of our citizens with disabilities live now, and want to stay.

So, Mr. President, while I join my colleagues in celebrating our achievements over the past 10 years, I also remind them that there is a great deal left to be done.

COMMEMORATING UNIVERSITY OF IOWA'S CENTER FOR THE ARTS 50TH ANNIVERSARY PROGRAM "TO IOWA WITH LOVE"

Mr. HARKIN. Mr. President, on November 15 and 16 the University of Iowa Dance Co. will celebrate the land, people, and spirit of Iowa in a program entitled "To Iowa With Love"—part of the commemoration of the 50th anniversity of the UI's Iowa Center for the Arts.

As we in the Senate begin the debate on the farm bill, we have been overwhelmed with facts and figures illustrating the depth and breadth of the farm crisis in Iowa and throughout the Midwest. What the numbers do not tell us, however, is of the pride and strength of the people of Iowa—of their determination and resolve to fight to save their lands and perserve their way of life.

I want to commend the University of Iowa—in particular, Lan-lan King, acting director of the UI Dance Program; Alicia Brown, director, UI Dance Co.; and Winston Barclay of the UI Arts Center Public Relations Office—for choosing the celebration of Iowa life as a timely and deeply significant theme for the anniversary program. Their efforts and commitment in putting together this expression of pride and hope are deeply appreciated.

KENNEDY CENTER CORPORATE FUND

Mr. McCLURE. Mr. President, I offer my heartfelt personal congratulations for the remarkable efforts undertaken on behalf of the John F. Kennedy Center by John R. Welch, Jr., chairman of the General Electric Co. and chairman of the 1985 corporate fund for the center. Mr. Welch and the 34 distinguished corporate leaders, who are serving as vice chairmen of the corporate fund, have raised an unprecedented $2,250,000 from America's corporations to help sustain the privately funded performing arts operations of Kennedy Center.

The Nation's business community has played an important part in the life of our National Cultural Center since its inception more than 25 years ago. Carrying on this tradition the cor-

porate fund was established in 1977 by a group of dedicated business leaders to help ensure that the corporate community played a continuing part in the growth and development of the center. Since that time, more than 400 corporations have helped to raise over $15 million to assist the Center's privately funded performing arts operations. Now in its eighth year, the center's corporate fund remains one of our Nation's outstanding models of private sector support for the arts. Unique at its inception, the corporate fund has spawned like-minded efforts throughout the business community on behalf of the arts in America.

The funds raised for the corporate fund have helped the center fulfill its national mission of bringing performances and artists to audiences around the country. This past year important performing companies like the San Francisco Ballet were featured in the Nation's Capital while new works for young audiences were enjoyed in more than a score of cities across America. On going private support needed to help make events such as these possible and to ensure that the Kennedy Center continues to flourish. I hope that my colleagues will join me in congratulating John F. Welch and his 34 cochairmen for their leadership of this important endeavor this year:

CHAIRMAN

John F. Welch, Jr., Chairman, Chief Executive Officer General Electric Company.

VICE CHAIRMEN

Samuel H. Armacost, President, Chief Executive Officer, BankAmerica Corporation.

Stephen D. Bechtel, Jr., Chairman, Bechtel Group, Inc.

Robert A. Beck, Chairman, Chief Executive Officer, the Prudential Insurance Company of America.

Bennett E. Bidwell, Executive Vice President, Office of the Chairman, Chrysler Corporation.

Theodore F. Brophy, Chairman, Chief Executive Officer, GTE Corporation.

Roger B. Smith, Chairman, Chief Executive Officer, General Motors Corporation.

Rawleigh Warner, Jr., Chairman, Mobil Corporation.

Thomas H. Wyman, Chairman, Chief Executive Officer, CBS Inc.

SECRETARY

Harold Burson, Chairman, Burson-Marsteller.

INTEGRAL VISTAS

Mr. McCLURE. Mr. President, I want to take this opportunity to offer my congratulations to the Secretary of the Interior for his courageous action today in declining to issue a final list designating integral vistas. The Secretary will undoubtedly receive considerable criticism for his action, but I think he was correct both as a matter of law and as a matter of policy. I had previously written to both the Secretary asking that he not issue this list and to the Administrator of EPA requesting that the underlying regulations be rescinded. I ask unanimous consent that copies of those letters be included in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, if is so ordered.

(See Exhibit 1.)

Mr. McCLURE. Mr. President, as a matter of law, these regulations are not authorized. The legislative history of the Clean Air Act is unambiguous and the colloquies on this precise subject are clear. During consideration of that measure, I participated in a discussion with Senator Muskie in which he stated:

> The Senate accepted the House prohibition against the Administrator imposing any mandatory or uniform buffer zone around a Federal class I area in order to accomplish the purpose of section 128.

When EPA proposed the concept of integral vistas on December 2, 1980, it was an attempt to achieve by regulation what was never authorized and what was specifically rejected by the Congress.

As a matter of policy the Secretary is also correct. The national parks will not be left exposed to massive assaults. Our precious heritage will not be in jeopardy. In fact, the National Park System will be better protected without these designations. We will not have created by implication some artificial double standard that some parks have important vistas and others do not.

I have in the past actively participated in several measures which acquired lands to protect vistas where the lands being acquired had no resource potential other than the vista. The Chesterbrook tract at Valley Forge is perhaps the best example, but there are many others. I resent the implication which apparently is current in some circles that the Department of the Interior and the National Park Services does not care about our national parks. I resent the efforts to regulate to death the commitment and dedication of our park managers. The Federal land managers have ample tools at their disposal to protect the national parks and to fulfill the mandate of the 1916 Organic Act "to conserve the scenery and the natural and historic objects and the wildlife therein and to provide for the enjoyment of the same in such manner and by such means as will leave them unimpaired for the enjoyment of future generations."

Many of the visual threats which we have dealt with are at parks which would not be covered by any such list. Are we to assume that the vistas at those parks are not important? Are we going to substitute a totally ineffectual designation for the professional judgment of our park managers? Are we to allow the issuance of a list to lull us into some false sense of security or worse to have that list turn into some form of priority for future land acquisition whether or not there are any threats? Congress was right to reject the idea of such a list. I applaud the action of the Secretary in following the law and I call again on the Administrator of EPA to rescind these illegal regulations which would harm and not help the National Park System.

The Secretary is correct and I am glad that he did not take the easy approach and issue the list. He could have done so by proclaiming through a press release that the view from our parks was forever protected. He knew that would not be true. It would be false security and it could even serve to impede his efforts to protect other units. Secretary Hodel should be congratulated by all parties. The substitution of sophistry and meaningless lists for reasoned judgment and wise stewardship should never be allowed to happen.

EXHIBIT 1

U.S. SENATE,
Washington, DC, October 7, 1985.

Hon. DONALD P. HODEL,
Secretary of the Interior, U.S. Department of the Interior, Washington, DC.

DEAR DON: I am writing to express my strong objection to the Department of the Interior taking any action to identify "integral vistas" associated with national parks and other mandatory class I Federal areas, in supposed reliance on a 1980 Environmental Protection Agency regulation. For reasons set forth below, I believe the EPA regulations exceed the statutory authority provided by the 1977 Amendments to the Clean Air Act and are, therefore, unlawful. The Department of the Interior has no obligation to perpetuate this unlawful and expansive reading of the Clean Air Act by identifying integral vistas and I urge you not to do so.

As an active participant in the legislative debates on the 1977 Amendments to the Clean Air Act, I can assure you that there was no intent to protect "integral vistas". Indeed, I do not recall that phrase even being used in debates on the Senate bill, discussions with Members of the House of Representatives in conference or in final debates on the Conference Committee report.

It strikes me that, through its integral vistas regulation, EPA has created the type of limitation on economic development which Congress explicitly prohibited in the 1977 Amendments. Although not precisely a "uniform buffer zone"—which Congress explicitly prohibited in the 1977 Amendments—the effect of protecting a broad array of "integral vistas" around a large national park could have a similar economic effect. Since Congress balanced air quality and economic development in the 1977 amendments and decided to protect only very limited geographic areas (mandatory class I Federal areas), I submit it is improper for EPA to reach a different balancing conclusion by regulation and include "integral vistas" within the Air Act's protection.

I would also note that if there was any doubt that the concept of "integral vistas" was not included in the 1977 Amendments to the Clean Air Act, it was eliminated last year when Senator Hart of Colorado proposed an amendment to the Act which would have allowed states to issue PSD permits only where it could be determined that the facility would not cause "a significant impairment of visibility with the integral vistas." Although Senator Hart ultimately withdrew his proposed amendment due to opposition from both industry and environmental groups (Environment Reporter (March 9, 1984)), the critical point to be made is that the Hart amendment recognized that the concept of "integral vistas' is not currently included within the Clean Air Act.

How could there be such confusion on the absence of legislative support for the concept of integral vistas is beyond me. The plain language of Section 169A of the Clean Air Act not only does not refer to "integral vistas", but clearly specifies that visibility is to be protected "in" class I areas. Even so, some clever drafters convinced the EPA Administrator in 1980 that "because 'visibility' is a perceptual value and the perception occurs 'in' a (class I) area", Congress intended "integral vistas" associated with class I areas to be protected.

This is a creative interpretation, but not a convincing one. Refreshing my recollection through a review of the published legislative history, I am struck that there is not even support for the concept of integral vistas in Congress' deliberations. The original Senate bill (S. 252) did not contain a provision comparable to the current visibility protection section (Section 169A). The Conferees adopted, with modification, the visibility provision which had been included in the House bill (H.R. 6161). As explained in the Conference Report, the concern which prompted the House to add the visibility provision to the Act was the perceived need to reach "existing pollution in Federal mandatory class I areas from existing sources." Pollution from new facilities was to be addressed through the Prevention of Significant Deterioration (PSD) permit process.

In agreeing with the House to expand the protection for class I areas to reach existing sources of pollution, the Senate managers (of which I was one), did not intend to also expand the areas to be protected. This is clear both from the language of the conference report, which refers to "pollution in Federal mandatory class I areas", and from the Senate's debates. The Senate thought it was protecting visibility in enacting the PSD provisions of Section 165 and so indicated by giving Federal Land Managers "an affirmative responsibility to protect the air quality related values (including visibility) within a class I area. . . ." As Senator Muskie, the Manager of the Conference Report, stated:

"The purpose of nondegradation provisions is to protect the air quality values of the class I areas in this case. Most of these values are scenic."

The only additional protection provided by visibility language of Section 169A was the ability to reach existing sources.

As can be seen from the foregoing, the contemplated scope of the areas to be protected by the visibility section (169A) and the PSD provision (165) are the same. EPA has recognized in its rulemaking that the PSD provisions do not authorize the protection of integral vistas. If EPA is to be consistent in its reading of legislative history, however, it cannot find support in Section 169A for its "integral vistas" concept, either.

In sum, I find no support in eihter the Clean Air Act as written, or in the legislative history of the 1977 Amendments, which supports the EPA regulations protecting integral vistas. Accordingly, I am contemporaneously writing EPA to request that it proceed forthwith to rescind those regulations. I believe it is both unnecessary and inappropriate, Don, for your Department to proceed with identifying integral vistas based on EPA regulations of questionable lawfulness. I again urge you not to do so.

Sincerely,

JAMES A. MCCLURE,
Chairman.

U.S. SENATE,
Washington, DC, October 9, 1985.

Hon. LEE M. THOMAS,
Administrator, Environmental Protection Agency, Washington, DC.

DEAR LEE: In 1980, the Environmental Protection Agency (EPA) promulgated regulations protecting "integral vistas" associated with national parks and other mandatory class I Federal areas, purportedly in reliance on Section 169A of the Clean Air Act. These regulations required the Secretary of the Interior to identify any such integral vistas deserving of protection by December 31, 1985.

In a recent letter I wrote to Secretary Hodel (copy enclosed), I urged him not to identify any integral vistas before the December 31, deadline and thus allow the EPA regulations to go unimplemented. The basis of my request to the Secretary was that the underlying 1980 EPA regulations were unlawful, inasmuch as they are without support either in the language of the Clean Air Act or in the legislative history of the 1977 Amendments to the Act. To follow through on my position, I am writing you today to urge that you institute the necessary steps to rescind the 1980 EPA integral vista regulations, on the basis that they are unlawful.

My conclusion that the EPA regulations exceed the authority contained in the Clean Air Act follows from an analysis of the statute and its legislative history. As you know, Section 169A of the Act establishes as a national goal "the prevention of any future, and the remedying of any existing impairment of visibility in mandatory class I Federal areas which impairment results from manmade air pollution."

As the above-emphasized word makes clear, Congress intended in Section 169A to limit the protection of visibility to that contained in class I areas. There is no discussion in the section of "integral vistas" or language which even addresses the concept of "vistas" outside class I areas. This is consistent with other provisions of the 1977 amendments. For example, Section 165 of the Act assigns to Federal Land Managers "an affirmative responsibility to protect the air quality related values (including visibility) within a class I area. . . ."

Confronted with this consistent expression of Congressional intent to protect visibility values only in class I areas, EPA's regulation drafters sought support for their position in the legislative history of the 1977 Amendments of the Clean Air Act. However, I find no support for integral vista protection there, either.

As one of the Senate Managers in the Conference Committee which considered the 1977 Amendments, I can assure you there was no intention to reach "integral vistas" by promulgating Section 169A. Indeed, the Conferees understood the only difference between Section 169A (which was in the original House bill) and Section 165 (dealing with PSD permits) to be that the former was capable of reaching existing sources of pollution which were impairing visibility in national parks, whereas the latter was designed to reach new sources. There was no intention to make Section 169A broader in geographic scope than Section 165. Congress was keenly aware of the potential scope of these provisions in passing the 1977 Amendments, because of concerns which had been expressed that too expansive a program would be both expensive for the Federal government and have a detrimental impact on economic development. A concrete expression of these concerns is the prohibition on buffer zones contained in Section 169A(e) of the Act.

The above-expressed concerns were clearly expressed in an exchange I had with Senate Manager of the Clean Air Act Amendments, Senator Muskie:

Mr. MCCLURE. To provide an explicit understanding of the requirements of section 128 (169A) regarding visibility protection for Federal class I areas, I would like to ask the floor manager several questions. First, are the provisions of this section limited to only existing major stationary sources which cause or contribute to visibility impairment in Federal class I areas?

Mr. MUSKIE. Yes, the Federal interest is limited to existing sources which have been in existence 15 years or less. Visibility restrictions with regard to new sources would result under the provisions of section 127 (165), concerning prevention of significant deterioration.

Mr. McCLURE. Once a promise has been granted to a new source and the question of visibility has been considered as a part of air quality values under the significant deterioration provisions, could the source be subjected later to the requirements of section 128?

Mr. MUSKIE. It is my understanding that that was not the intent of the conferees.

Mr. McCLURE. With regard to citizen suits, the House bill prohibited such suits in order to compel attainment of the national goal by a specific date. Is my understanding correct that this provision was accepted by the Senate conference?

Mr. MUSKIE. Yes; your understanding is correct. And, the prohibition is specifically discussed in the statement of managers. In addition, the Senate accepted the House prohibition against the Administrator imposing any mandatory or uniform buffer zone around a Federal class I area in order to accomplish the purpose of section 128.

In sum, the entire concept of "integral vistas" is contrary to the careful balance which Congress struck in passing the 1977 amendments to the Clean Air Act. Although most of us clearly saw the need to protect the visibility qualities of our national parks, we understood the need for such protection to take place simultaneously with economic development. For EPA to have cited Congress' statements regarding the need to protect "vistas" and "panoramas" in our national parks as support for the integral vistas regulations, while ignoring Congress' concerns about stifling economic development in the process, constitutes an improper attempt by EPA to reformulate a balance already struck by Congress.

Because EPA's 1980 regulations lack support either in the Clean Air Act or in the legislative history of the Act, I submit that they were promulgated without lawful authority. To correct this error, which has created great confusion and consternation among many westerners, I urge you to rescind the integral vistas regulation. The regulations to be rescinded include, without being limited to, the following sections of Title 40 of the Code of Federal Regulations: 51.301(n), 51.302(b)(1)(i), 51.304, 51.306(b)(7), and 51.307(b)(1).

I believe it would be far wiser for EPA to now admit the error of the integral vista regulations and—on its own initiative—rescind such regulations, rather than await the almost-certain lawsuits which will follow any identification of integral vistas by the Department of the Interior. In so rescinding these regulations, you will be bringing EPA into conformance with both the plain language of the Clean Air Act and Congressional intent.

Sincerely,

JAMES A. McCLURE,
Chairman.

THE LIVE-AID CONCERTS

Mr. SPECTER. Mr. President, on July 13, 1985, a group of very talented and dedicated individuals came together with one mission: Famine relief for those suffering in Africa and in the world.

Those who performed at the Live-Aid Concerts in Philadelphia and London did so without reimbursement. Neither did the large number of people who worked behind the scenes in making this incredible project the huge success that it became.

Recently, the Congress awarded a special commendation to Bob Geldof, the Irish musician whose idea called "Band-Aid" has been the genesis of all of the recent "Aid" concerts. However, in singling out Mr. Geldof, we have overlooked many other individuals who volunteered their valuable time and resources for this magnificent happening.

At this time, Mr. President, I would personally like to recognize Messrs. Larry Magid and Allen Spivak, owners of Electric Factory Concerts in Philadephia, who coproduced "Live-Aid" along with Mr. Bill Graham of San Francisco.

These gentlemen are representatives of the entertainment industry which pooled its talents and came up with the biggest musical event in history. The problem they addressed was far larger than the pictures we all saw on television. Their work clearly represented the spirit of generosity and brotherhood that, unfortunately, does not occur many times until a situation has become too grave to address. However, these gentlemen, and the wide and varied talent that they attracted, donated their time unselfishly to help in some way stop a bad situation from getting worse. Their spirit transcended hunger and political issues and addressed in human terms all our hopes of living together in peace on this planet.

I applaud Messrs. Magid, Spivak, and Graham and the many other generous men and women, who contributed their time and effort, for their fine work. It is their wish that they be given nothing in return for their efforts in making "Live-Aid" a success; it is my desire that they gain the necessary recognition among my colleagues in the U.S. Congress that they so deserve.

CONCLUSION OF ROUTINE MORNING BUSINESS

The PRESIDING OFFICER. Morning business is closed.

BUDGET ACT WAIVER

Mr. HELMS. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Senate Resolution 235, Calendar No. 344.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will report.

The legislative clerk read as follows:

A resolution (S. Res. 235) waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of S. 1714.

The Senate proceeded to consider the resolution.

Mr. HELMS. Mr. President, I urge the Senate to adopt Senate Resolution 235 so that the Senate may proceed to the consideration of S. 1714, the Agriculture, Food, Trade, and Conservation Act of 1985, a bill to expand export markets for U.S. agricultural commodities, provide price and income protection for farmers, assure consumers an abundance of food and fiber at reasonable prices, continue food assistance to low-income households, and for other purposes. Senate Resolution 235 would waive the provisions of section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of S. 1714.

The waiver of section 402(a) is necessary to permit consideration of various statutory authorities, including those to extend the Dairy Indemnity Program, the Food for Peace Program, the Food Stamp Program, various research and extension programs, and other programs.

S. 1714 extends for 4 years the basic legislation for almost all of the Nation's major farm commodities, as well as extending the authorizations for appropriations for many of the programs mentioned above.

The delay in reporting S. 1714 was occasioned by the complexities of developing legislation to meet the special needs of agricultural producers. The committee deliberations on S. 1714 were especially lengthy because of this.

While I believe that the bill should be amended to bring it into line with the budget resolution assumptions for agriculture and to make certain policy changes, it is important that we pass a bill so that the farm and other programs in the legislation may be continued.

Therefore, I urge adoption of the resolution.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution (S. Res. 235) was agreed to, as follows:

S. Res. 235

Resolved, That pursuant to section 402(c) of the Congressional Budget Act of 1974, the provisions of section 402(a) of such Act are waived with respect to the consideration of S. 1714, the Agriculture, Food, Trade, and Conservation Act of 1985, a bill to expand export markets for United States agricultural commodities, provide price and income protection for farmers, assure consumers an abundance of food and fiber at reasonable prices, continue food assistance to low-income households, and for other purposes.

The waiver of section 402(a) is necessary to permit consideration of statutory authority to extend the Dairy Indemnity Program; the Food for Peace Program; the Food Stamp Program; various research and extension programs; and other programs.

S. 1714 extends for four years the basic legislation for almost all of the Nation's

major farm commodities, as well as extending the authorizations for appropriations for many of the programs specified above. The delay in reporting S. 1714 was occasioned by the complexities of developing legislation to meet the special needs of agricultural producers.

AGRICULTURE, FOOD, TRADE AND CONSERVATION ACT OF 1985

Mr. HELMS. Mr. President, I move that the Senate now proceed to the consideration of the farm bill, S. 1714.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from North Carolina.

The motion was agreed to.

The PRESIDING OFFICER. The bill will be stated by title.

The legislative clerk read as follows:

A bill (S. 1714) to expand export markets for United States agricultural commodities, provide price and income protection for farmers, assure consumers an abundance of food and fiber at reasonable prices, continue food assistance to low-income households, and for other purposes.

The Senate proceeded to consider the bill, which was reported from the Committee on Agriculture, Nutrition, and Forestry.

Mr. HELMS. Mr. President, this legislation provides for the authorization, with modifications, for virtually all of the farm commodity programs and activities of the U.S. Department of Agriculture. In addition, the legislation reauthorizes the Food Stamp Program and various research and extension programs of the USDA.

Because the food and agriculture section is the largest single component of the U.S. economy, comprising about 20 percent of the gross national product, this bill will have a direct impact upon every American. And, because the United States is the world's largest exporter of agricultural commodities and products, the decisions Congress makes on this bill will have global impact. It is not an exaggeration to say that this legislation will have more impact on food and agriculture policy worldwide than any action taken by any government anywhere for the rest of this decade and probably the rest of this century.

Mr. President, I regret it is not possible for me to say that this particular farm bill will prove positive and helpful to farmers, consumers, and taxpayers, certainly not as it now stands. Indeed, in the opinion of this Senator, this bill has several major flaws that result in it not being sound farm policy. Very frankly, it offers little hope for recovery in the U.S. agricultural economy. In addition, it is unnecessarily costly, exceeding the budget resolution assumptions for Farm Commodity Program spending by $8.9 billion over 3 years by the calculation of the Congressional Budget Office and by more than $19 billion by what is recognized as the more accurate calculation of the U.S. Department of Agriculture. These immense and unnecessary cost overruns will have a negative impact on every American, and upon heavily indebted farmers in particular. For these reasons, with all due respect to those who disagree with me—and I do respect them—it is my intention—and I think the intention of other Senators as well—to offer corrective amendments at the appropriate time.

I will get to my specific intentions in that regard a little later. But first let me say that despite what I regard as serious flaws, this bill does have much to commend it to the Senate.

The Senate Committee on Agriculture, Nutrition, and Forestry put extraordinary effort into this farm bill, spending almost 4 months in markup, plus more than 3 months in hearings and other preliminary efforts. There is no member of the committee who has not contributed significantly to this bill. It is a tightly drawn and carefully constructed document that makes many improvements in current law in a number of ways.

In addition to providing for farm commodity programs, the bill reauthorizes and improves the Food Stamp Program and other feeding programs. It has a strong and effective trade title, with a number of new policy instruments for the Secretary of Agriculture to use to expand U.S. agricultural exports and to improve our foreign food assistance programs. The conservation title is strong and effective. Indeed, the conservation title makes this bill the most far-reaching piece of environmental legislation likely to be considered by the 99th Congress.

Mr. President, I shall take a few minutes to describe in the briefest way the principal features of this legislation. In addition, I shall include at the end of my remarks a detailed summary of major provisions of the bill.

Senators who wish further information about what is in the bill, or the committee's intentions and rationale for including specific provisions, or background data on the agricultural sector, may refer to the committee report on the bill, Report No. 99-145. I thank the staff of the Agriculture Committee for the excellence of their work on the report, and commend it to anyone who has an interest in agricultural policy.

For the moment, I shall pull a few threads from the fabric of what is in this farm bill, and conclude with a detailed critique of the legislation.

AGRICULTURAL EXPORTS

This title recognizes that U.S. farmers must export to prosper, it expands and extends instruments of export policy, with the specific intention of encouraging agricultural exports generally, of combating the predatory practices of our competitors in overseas markets, and in reforming and expanding the food assistance America extends to other nations.

First, the bill expands the Intermediate Credit Program and authorizes the guarantee of loans in the amount of $1 billion annually for periods of 3 to 10 years. The bill also requires the Commodity Credit Corporation to make available short-term export credit guarantees in the amount of at least $5 billion annually for 4 years.

Second, to combat predatory practices of foreign competitors, the bill requires the Secretary of Agriculture to use at least $325 million annually for 3 years to directly assist in the export of U.S. commodities adversely affected by the price or credit subsidies or unfair marketing arrangements used by other countries. And, to add to the U.S. arsenal, the Secretary is required to sell for export at least 150,000 tons of CCC-owned diary products annually for 3 years. Finally, the bill requires the Secretary to use at least $2 billion of CCC-owned commodities to enhance and encourage export sales of U.S. agricultural commodities during fiscal years 1986 through 1988.

To further assure that the United States gets the "biggest bang for the buck" in encouraging export sales, the bill exempts all export enhancement programs, except Public Law 480 programs, from cargo preference requirements.

And, the committee bill makes a fundamental reform in U.S. foreign food assistance by requiring that foreign payments for commodities provided on concessional terms under title I of Public Law 480 be paid partially in local currencies that are then to be made available for loans to finance private enterprise investment within developing countries. And, the bill authorizes the President to donate up to 500,000 tons annually of CCC commodities under a new Food and Process Program to promote private free enterprise policy and development in recipient countries.

The title II Donation Program under Public Law 480 is expanded by increasing the minimum to be distributed purposes from 1.7 to 1.9 million metric tons per year for 2 years, plus other reforms to permit easier distribution of such concessional sales. On top of all that, the bill broadens the authority of the Secretary to distribute under section 416 of the Agricultural Act of 1949 all agricultural commodities acquired by the CCC. At present, the Secretary is authorized to donate to foreign people only wheat and dairy products. Under this bill, he can give them honey, corn, sorghum, barley, rice, soybeans, and all the rest.

Finally, the export title is capped off by requiring the President to designate a special assistant for agricultural

trade and aid to assist and advise the President on U.S. foreign food assistance and export programs.

DAIRY

Mr. President, the dairy title of the committee bill recognizes that the present Diary Program is too costly and encourages a massive and unacceptable surplus production of milk. The Diary Program established in the bill would allow production to adjust to the size of the actual market by providing that the Government purchase price will be adjusted in accordance with demand, as reflected in estimated net purchases of milk and milk products by the Commodity Credit Corporation. This would be predictable, long-term, and readily understandable so that dairymen can better make production decisions.

Specifically, the bill would maintain the present Government milk purchase price at $11.60 per hundredweight through calendar year 1986. On January 1, 1987, the Government purchase price would be adjusted downward by 50 cents if the Secretary estimated surplus removals for 1987 would exceed 5 billion pounds milk equivalent. On January 1, of succeeding years, the Secretary would be required to drop the Government purchase price $1 if purchase estimates exceed 10 billion pounds. The Secretary would be required to reduce the purchase price by 50 cents if Government purchase estimates were between 5 and 10 billion pounds. And, the Secretary would be authorized to raise the purchase price if estimates for Government purchases are 2 billion pounds or less.

In my judgment the committee bill is defective in that there is no sense or justification in waiting until January 1, 1987 for the purchase price to be reduced. There ought to be at least one 50-cent reduction in 1986. In fact, two such adjustments in 1986 are called for by the huge and unwarranted level of Government purchases at this time. The excessive Government purchase prices are inducing increased investment in the dairy industry—cow numbers are increasing—at a time when the Government surpluses have never been higher. This situation is so incredible, that, as the distinguished majority leader has often said, even the cows are laughing. But the taxpayers aren't laughing. They are being taken to the cleaners.

WOOL AND MOHAIR

Mr. President, this title of the committee bill extends the present Direct Payment Program for producers of wool and mohair, continuing the support price level at 77.5 percent of an amount determined under the current statutory formula. This direct payment is too high in relation to the market price, but at least there is no massive surplus of wool in Government warehouses. Perhaps it is for that reason that the committee did not adjust the amount of subsidy paid to each wool producer for each pound of wool.

However, as there are presently a relatively small number of wool producers receiving incredibly large payments, the committee decided to establish a payment limit of $50,000 per individual producer in 1986 and subsequent years. No doubt this will upset the fellow in California who received $564,000 last year, and the 323 others who received amounts between $50,000 and $200,000. But it will have no impact on the approximately 95,000 other producers who received between $1 and $50,000. I should note that only 569 wool producers would be affected if payments were limited to $25,000—the median average annual income for American families.

WHEAT, FEED GRAINS, COTTON, AND RICE

Mr. President, wheat, feed grains, cotton, and rice are what we call the principal program commodities. For each of these crops the committee bill establishes a somewhat complex panoply of price support programs which have three principal features: First, nonrecourse commodity loans—which means loans the farmers have the entitlement to pay back—it is the Government that has no recourse in this matter—by forfeiting the commodity to the Government; second, target prices and deficiency payments—which means direct subsidy income transfers paid to farmers on the basis of how many bushels, pounds, or hundredweights each produces; and third, production controls designed to reduce the number of acres a farmer may use to grow a particular program crop.

The purpose of these programs is to provide a measure of stability in the agricultural sector, thereby increasing the opportunity for farmers to derive fair and reasonable profits from the marketplace. In short, the aim of Federal farm programs is to introduce elements of predictability into the inherently unpredictable business of farming. It is my assessment that these programs fail miserably, because they have become so excessive as to operate in perverse and counterproductive ways. But more about that later.

The committee bill is quite detailed in these matters and I refer those interested to the summary of major provisions for a precise listing of every provision. The highlights are these:

WHEAT

For the 1986 crops the loan rate is established at $3 per bushel; thereafter it is set at between 75 and 85 percent of the average price received by producers during the immediately preceeding 5 marketing years, excluding the high and low years. But, the loan rate may not be reduced more than 5 percent in any one year.

The Secretary is authorized to reduce further the loan rates by not more than 20 percent if the average market price in the previous marketing year is not more than 110 percent of the loan rate for that year. This is often called the Findley provision.

The committee bill provides for the establishment of marketing quotas for wheat if approved by producers in a referendum. The committee bill requires a referendum to be conducted if 50 percent of wheat farmers request it in a poll to be conducted by April 1986. If 60 percent of the producers approve of marketing quotas in the referendum—to be conducted by August 1, 1986—marketing quotas would be in effect for the 1987 through 1989 crops. If marketing quotas are in effect, the loan rate for wheat would be the higher of 75 percent of the national average cost of production or $3.55 per bushel. Target prices, if marketing quotas are in effect, would be the higher of the national average cost of production or $4.65 per bushel.

A so-called marketing loan is required for wheat. Under this provision, the Secretary is required to permit the repayment of nonrecourse loans at the lower of either the original loan rate or the higher of one of three other measures: First, 70 percent of the original loan rate; second, if the loan level is reduced using the so-called Findley provision, 70 percent of the loan rate that would have been in effect but for such a reduction; or third, the prevailing world market price.

The establishment of the basic loan rate on a formula that is below market clearing levels is commendable, and constitutes a significant reform in Federal farm policy. The limitation of any adjustment to no more than 5 percent per year is not a good idea, as it will simply lengthen the time it will take for the United States to become price competitive again. But, still, putting the loan rate on a market oriented formula will make this bill historic, and is sufficient in and of itself to cause this bill to be regarded as a major reform bill.

If the Secretary is actually able to use the so-called Findley provision, the bill will be much improved. However, the target prices are so high that it is not likely that the administration will ever permit the use of this provision to help U.S. crops become more competitive. Because the subsidies are paid on the spread between the higher of the loan rate or the market price and the target price, the budget exposure would simply be too great to expect the employment of this additional instrument in the Secretary's Nonrecourse Loan Program authority.

Target price subsidies—called deficiency payments—are required to be made for eligible production using the same formula as under current law. However, one important reform—at

least as far as in limiting the impact of the tremendous incentive to produce surplus crops just to get a subsidy payment—is that producers would not be required to plant more than 50 percent of their acreage base in order to qualify for these payments on all of their acreage they are permitted to plant.

For wheat, the payments per bushel are increased from the present level of $4.38 per bushel for all production to $4.55 per bushel for the first 20,000 bushels—only 15 percent of the farmers produce more than this—and $4.00 per bushel for all the rest. This has the effect of increasing the average payment per bushel to $4.50. Target prices are then frozen in this way for 4 years.

Production controls are authorized in the form of acreage limitations on set-asides with a maximum limitation of 20 percent of the wheat acreage base. Haying and grazing in 1986 and grazing for the life of the bill is authorized on the acreage required to be devoted to conservation uses, and would be permitted at the option of a State ASC committee. And, the bill authorizes paid land diversions.

Because of possible market price movement below loan levels from the use of the marketing loan, increased producer participation in the farm commodity programs is expected. Increased participation will increase outlays associated with disbursing commodity loans and deficiency payments. The committee bill provides two new payments to induce producers to forgo use of the Nonrecourse Loan Program or to forgo both the use of the Loan Program and the receipt of deficiency payments but to comply with 50 percent of any Acreage Reduction Program. In both cases, the Secretary would be authorized to make payments—in the second situation they would be payments-in-kind subject to availability of the commodities—in amounts equal to the amount by which the original loan rate exceeds the level at which the loan may be repaid multiplied by the amount of wheat the producer is otherwise eligible to place under loan.

FEED GRAINS

The same programs as for wheat are provided for feed grains, except that there is no authority for marketing quotas for feed grains. The corn loan rate is established at not less than $2.40 per bushel for 1986. For succeeding years the same formula and limitations would be used as those for wheat.

The deficiency payments would use the same formula as current law, except that producers would not be required to plant more than 50 percent of their base in order to qualify for such payments. The target price for corn is set, and frozen for 4 years, at $3.03 per bushel.

The production control programs would be limited to a maximum of 15 percent of a farmer's acreage base.

COTTON

The committee bill requires the Secretary to make available nonrecourse loans for a term of 10 months for upland cotton. For the 1986 crop, the loan level would not be less than 55 cents per pound. For succeeding years, the loan level would be the higher of: First, 85 percent of the average spot market price during the 3 years of the previous 5-year period, with the high and low years excluded; or second, 50 cents per pound. The loan level may not be reduced by more than 5 percent per year. I believe that the 50 cents minimum loan level may prove to be too high. If this occurs, cotton production worldwide will increase, to the detriment of U.S. cotton producers.

A modified marketing loan is provided for as the Secretary is required to permit repayment of loans by producers at the lower of the original loan rate or at the prevailing world market price, with certain limitations that reduce the Government's exposure to no more than 20 percent of the original loan rate.

As in the wheat and feed grains, titles the Secretary may make payments to producers who agree to forgo obtaining loans and to producers who forgo obtaining loans and receiving deficiency payments.

Target prices are established at 81 cents per pound, and are frozen at that level for 4 years. As in wheat and feed grains, producers are not required to plant more than 50 percent of their acreage base in order to qualify for such payments. I have visited with scores of cotton farmers in recent months. Not a single one has failed to mention that the cotton target price is far too high. Sound agriculture policy demands it be reduced, but more about that later.

Both acreage limitations and set-aside production controls are authorized, with maximum limitation of 20 percent. Land diversion payments are also authorized.

RICE

The loan rate for rice is established at not less than $7.20 per hundredweight for the 1986 crop. The adjustment in subsequent years would be on the same basis as for cotton, but the minimum loan level is established at $6.50, with no more than a 5 percent per year reduction permitted.

A modified marketing loan is required, with the loan repayment level at 70 percent of the loan rate or the prevailing world market price, whichever is higher.

As in the other program commodities, the Secretary is authorized to make payments to producers who agree to forgo obtaining loans in return for such payments and to producers who forgo both obtaining loans and receiving deficiency payments.

Deficiency payments are established at $11.90 per hundredweight and are frozen at that level for 4 years. Producers would not be required to plant more than 50 percent of their base in order to qualify for such payments.

Production controls, acreage limitations and set-asides, have a maximum limitation of 35 percent of the rice acreage base.

MISCELLANEOUS PROVISIONS

Mr. President, in addition to the several program instruments already described for each of the program commodities, there are a number of other features of farm programs which apply to all crops, generally.

The bill maintains the present $50,000 payment limit and the $100,000 disaster payment limit. Of course, there are many exclusions and loopholes in this, and I hope the Senate will tighten this provision up. In fact, I see little justification for a payment that is double the median average annual income for American families, particularly when it is clear that farmers, as a class, have greater wealth and incomes than other Americans. But, again, more about that later.

In addition there are a number of other miscellaneous provisions that are similar to provisions contained in previous farm bills. These include authority to make advance deficiency payments, restrictions on the resale of Government commodities, and authority to require producers not to exceed their normally planted acreage if a set-aside is in effect.

And, the bill requires the establishment of beef and pork promotion programs financed by assessments on producers.

SOYBEANS

The committee bill continues the current Soybean Program with a loan level equal to 75 percent of the average price received by farmers during the preceding 5 years, excluding the high and low years, except that it may not be less than $5.02 per bushel.

Further, the bill prohibits acreage control programs being applied to soybeans.

Mr. President, the Soybean Program is the model of what a farm program should be. There are no target prices, and no massive inducements for surplus production. If every commodity program had been structured on the soybean model, there is no question that agriculture in America would be much stronger today. Our foreign competitors would be virtually nonexistent. We would still be in the golden era of the late 1970's as far as commodity prices and export markets. The committee is very wise indeed not to have tampered with the Soybean Program.

PEANUTS

The committee bill continues the current Peanut Program with certain modifications to make the program more accessible to farmers who wish to produce peanuts. The national poundage quota is continued at a minimum of 1.1 million tons annually, and can be increased annually by an amount the Secretary estimates that domestic uses of peanuts would exceed the quota. The two-tier system of "quota" and "additional" peanuts is continued. The Peanut Program operates without payments and subsidies to producers, and has virtually no cost to the taxpayers.

SUGAR

The committee bill continues the current program with a price support loan level of 18 cents per pound. The Secretary may make annual adjustments in the support prices based on changes during the 2 immediately preceding crop years.

HONEY

The committee bill sets the 1986 loan level at not less than 65.3 cents per pound. For the 1987 and subsequent crop years, the loan would be the higher of 85 percent of the average price received by farmers during the 5 preceding years, excluding the high and low years, or 50 cents per pound. The loan level could not be reduced by more than 5 percent in any one year.

As in the other nonrecourse loan programs, the bill allows the Secretary to permit the repayment of loans at levels less than the amount extended to the producer if the Secretary determines that such lesser payment is desirable. And, the Secretary may make payments to producers who agree to forgo obtaining nonrecourse loans in the first place.

FOOD ASSISTANCE RESERVE

The committee bill repeals present authority for the farmer-owned reserve for wheat and feed grains, the food security wheat reserve, and other reserves. In place of these, the Secretary is authorized to establish a food assistance reserve of up to 500 million bushels of wheat and feed grains for humanitarian purposes.

CONSERVATION

Mr. President, the conservation title is one of the most significant and important features of this farm bill. It provides that no Federal subsidies will be paid to farmers who employ unsound conservation practices generally, and specifically includes sodbuster, swampbuster, and cross-compliance provisions that prohibit eligibility for farm programs for those farmers who produce crops on highly erodible land or converted wetland.

In addition, this title establishes a Conservation Acreage Reserve Program of between 25 and 30 million acres of erosion-prone land. At least 10 million acres must go into the reserve in the 1986 crop-year, another 10 million acres in 1987, and an additional 5 million acres by the close of crop-year 1989. The Secretary is provided authority to enter into long-term contracts with producers for 7 through 15 years to make payments to put erosion-prone cropland into the reserve and convert it to less intensive uses.

One of the great tragedies of the massive subsidies paid to farmers on the basis of the maximum number of bushels, pounds, and hundredweights they can manage to produce has been the abuse of the Nation's soil and water resources. While this bill generally continues these current subsidies, these conservation provisions at least provide that the damage done by the farm programs to the soil and water resources will be greatly diminished. I commend the committee for adopting all of the proposals I recommended in this regard.

RESEARCH

Mr. President, this bill extends the current agricultural research, teaching, and extension programs. It authorizes the Secretary to enter into cooperative agreements with private agencies, organizations, and individuals on a cost-sharing or cost-reimbursement basis for the development of new agricultural technology, and makes USDA the lead agency for promoting and managing the appropriate development and regulation of biotechnology in agriculture.

CREDIT

The committee bill consolidates the Farmers Home Administration farm ownership and farm operating loan programs into one leading program with an authorization of $4 billion annually for fiscal years 1986 through 1988, apportioned as follows: fiscal year 1986—$2 billion for direct loans, $2 billion for loan guarantees; fiscal year 1987—$1.5 billion for direct loans, $2.5 billion for loan guarantees; fiscal year 1988—$1 billion for direct loans, $3 billion for guarantees.

In addition, the committee bill requires the Secretary to establish a 3-year interest rate buydown for FmHA-guaranteed-loans, funded at a level of $490 million over 3 years. Eligible guaranteed loan borrowers can receive up to a 2-percent buydown.

Also, the committee encouraged participation in the Federal Crop Insurance Program by restricting access to the Emergency Disaster Loan Program to eligible producers who have suffered physical losses and eligible producers who do not have access to Federal crop insurance.

FOOD STAMPS

The Food Stamp Program is reauthorized for 4 years. The committee made the following changes in the food stamp and commodity distribution statues:

Each State would be required, for the first time, to set up an employment and training program for able-bodied food stamp recipients. States would be provided flexibility to design their own programs, including the number of work-related options—workfare, job training, job finding clubs, and so forth—to provide that an increasing percentage of recipients are involved in such work-related activities. This provision would ultimately require that 45 percent of able-bodied recipients pa9ticipate in such programs.

State and local governments would be prohibited from charging sales taxes on food stamp purchases. Elimination of this practice will increase the purchasing power of food stamp recipients in States that currently have State or local sales taxes on food stamp purchases and eliminate the indirect Federal subsidies to those governments currently taking place through the Food Stamp Program.

States would be given greater incentives for reducing over issuance errors in the Food Stamp Program by the imposition of a strengthened sanctions system for such errors. States that fail to reduce errors below 5 percent would be required to reimburse the Federal Government for an increasing percentage of such errors.

Recipients of energy assistance payments would not be allowed to claim the portion of their energy bills paid by such payments in calculating eligibility for the excess shelter cost deductions.

Income from programs under the Job Training Partnership Act would be counted as income for food stamp purposes, thereby improving compatability with the AFDC Program.

The committee also continued the Temporary Emergency Food Assistance Program, which provides surplus commodities to low-income Americans, for 2 years. Beginning in January 1986, the Federal Government will require matching of administrative costs by the States on a dollar-by-dollar basis, up to a maximum of $50 million Federal costs. For the past 2 years, the Federal Government has not required that a State match the $50 million of Federal funds used to pay State and local commodity distribution costs.

These program reforms are significant, and I commend the committee for adopting them. However, in at least two areas of the Food Stamp Program, the committee approved bill is deficient, and I shall attempt to modify it at the appropriate time.

First, there are 17 States that have indicated an interest in considering an optional block grant for food assistance programs for the needy. The welfare lobby in Washington wants to keep the focus and control of the program centralized so they can better

manipulate it to suit their own purposes. I happen to believe that the poor and hungry can often be better assisted by programs that have diversity, flexibility, and the opportunity for innovation and enterprise. I hope the Senate will agree and join me in permitting an optional block grant to the States for this purpose.

Also, there is now no incentive for States to manage the program in a fiscally responsible way. It is estimated by USDA that about 10 percent of the total food stamp budget is erroneously distributed to people who are not eligible. Of course, this simply makes limited Federal resources achieve less good for those most truly in need. I believe the committee food stamp provisions should be modified to provide for error rate sanctions for those States that do not meet the same standards in the Food Stamp Program that they must meet for other welfare programs such as AFDC. If they can meet it for AFDC, they can meet it for food stamps. This amendment would not reduce benefits by one dime to those Congress intends to be eligible and it will require the States to be more fiscally responsible.

ANALYSIS OF THE BILL AND CHANGES NEEDED

Mr. President, at the outset of deliberations on the 1985 farm bill, I urged the Committee on Agriculture, Nutrition, and Forestry to report a bill that would correct the mistakes in current farm policy and set our sights toward bringing about recovery in the agricultural economy.

It is with regret and no satisfaction that I felt obliged to go on record as the first chairman of the Senate Agriculture Committee to vote against a farm bill. The bill reported by the committee is not sound farm policy and offers no hope for recovery in the U.S. agricultural sector. Moreover, the bill exceeds the budget resolution by $8.9 billion, by the calculation of the Congressional Budget Office—and by what is recognized as a more accurate estimate by the USDA of $19.1 billion. Obviously this bill is totally unsatisfactory to anyone believing, as I do, that Congress has a duty to restore fiscal sanity to the cost of operating the Federal Government.

While my greatest objection is: First, the failure of the policy instruments; and second, the counterproductive impact they will have on the agricultural sector, it will be perilous to the Nation if we ignore the damage that will be done to the entire economy if the Senate does not agree to make this farm bill conform to this budget resolution.

What will happen to the entire budget process if every committee were to exceed the budget by such enormous amounts? What will happen to the general economy if Federal deficits are permitted to grow by these incredible amounts?

Less than 20 percent of the $54 billion in benefits and subsidies provided in this farm bill are directed to farmers who are experiencing financial distress. Yet, it is the relatively high degree of financial distress that is the only justification offered by the proponents of these tremendous otlays for farm subsidies. With all due respect, such justification falls into the category of false pretense.

My point is this: The Senate can, and should adopt a farm bill that is sound farm policy, one that does conform to the budget resolution. It is my hope that Senators will consider carefully amendments that I and others will offer to correct the mistakes in this bill. If efforts to reform the failed policies of the past, and to conform the bill to the budget resolution, are successful, the recovery that is so desperately needed by farmers can get underway. If we fail to do our duty, and if the 1985 farm bill ends up continuing the mistakes of the past, the farm economy is certain to continue a downward spiral.

FAILURES OF THE PAST AND PRESENT

Past and present U.S. agricultural policies have contributed markedly to a downward spiral in the farm economy. In the period from 1981 to 1984, real net farm income declined 27 percent from the previous 4-year period, while direct Government payments increased over 350 percent. At the time the 1981 farm bill was enacted, it was estimated to have a 4-year cost of $11 billion. In fact, outlays under that act will have exceeded $63 billion, almost 600 percent more than projected.

These massive increases in Federal outlays for agriculture over the past 4 years have demonstrated that the answer to the farm problem isn't more and more Government spending distributed indiscriminately. Indeed, the immense spending increases are directly responsible for the massive surpluses that have resulted in the diminished ability of farmers to earn profits in the marketplace.

Why have farm programs proven counterproductive? The answer to that is simple: The price supports are greater than the market value of the crops. But the subsidies aren't paid on the basis of a farmer's demonstrable need or financial stress. The subsidies are paid on the units of production—by the bushel, pound, or hundredweight. The more of a particular crop a farmer produces, the greater his total subsidy. By definition, this means that the greatest benefits and subsidies go to the largest farmers, which also by definition, means those farmers who need help the least.

Because Congress requires the Government, in effect, to purchase everything a participating farmer produces at the loan rate level, there is compelling inducement for farmers to collect the subsidies offered. For example, USDA estimates that the current market price for wheat is about $2.80. The loan rate is $3.30—$3 in this bill. In addition, direct subsidy payments, known as deficiency payments are paid in the same way. The target price is $4.38—$4.55 for 80 to 85 percent of the production and $4 for the rest in this bill. There are similar programs for feed grains, cotton, and rice. The intention is to try to create a price floor in the marketplace for these commodities, plus an income support for the producers of these commodities. But the effect is just the opposite. Here's why.

The U.S. agricultural production system is geared to produce for the export market. More than 40 percent of everything American farmers produce must be sold in export markets, and the United States now controls about 50 percent of all world trade in agriculture. Many fail to consider that foreign farmers operate under the protection of the U.S. price support programs, because our Government will purchase from our farmers anything they produce but cannot sell. Foreign farmers are keenly aware that if they just undercut at the margin the price at which the U.S. Government will take commodities off the market, there go our markets—and 50 percent of the world trade is a very large market for them to target.

And that is just what our competitors have been doing. Price supports established above market clearing levels have stimulated production here and abroad, creating competition for American farmers that they would not otherwise have confronted. After rising from 40 percent to 60 percent of world trade during the 1970's, U.S. agricultural exports have fallen to the present level of about 50 percent. The cumulative loss in U.S. grain exports over the past 5 years totals nearly 100 million tons, roughly equivalent to losing one full year of grain exports.

Unmarketable U.S. surpluses, stored under the price support programs, overhang the markets and further depress prices farmers receive in the marketplace. This resuts in all kinds of dislocations, such as declining land values and increases in production of other crops and livestock. When the surpluses become so great that there is literally no more physical storage space—as was the case in the autumn of 1982, and as is predicted to be the case after the record 1985 crops are harvested—policymakers are then forced by circumstance to turn to efforts to restrict production. The largest acreage reduction program in the history of the world [PIK] was implemented in 1983 for precisely this reason. Over the past 4 years, more than 125 million acres have been idled through Government supply control programs. This has caused tremendous

loss of income to farmers and everyone else in the farm economy. And yet, total world production and trade have increased, while the U.S. share has declined. Foreign farmers see the United States reduce acreage, and promptly expand theirs. In 1983, when the United States removed 80 million acres in the PIK Program, total world acreage actually increased by 13 percent.

Policies that induce more and more production in the face of massive surpluses, for which there is no ready market, put U.S. agriculture in a position like that of a dog chasing its own tail. Loan rates and target prices above market levels stimulate production and help turn U.S. markets over to foreign producers. Surpluses accumulate and put downward pressure on prices. Land values fall as farm units have trouble producing positive cash flows. Farmers who had not previously participated in these entitlement programs feel compelled to sign up, meaning ever greater Government costs and ever greater inducements to excessive production.

Calls then come forth for further production controls and even higher price supports in an effort to support the very farm income that was driven downward by subsidies that were too high to begin with. These actions, when taken, induce even greater surpluses and result in pressure for starting the cycle all over again.

The most startling aspect of all this is that the small- to medium-sized family farmers are the ones most adversely impacted by this bizarre scenario. The larger farms are generally those whose variable costs of production are the least. They have traditionally had access to the greatest amounts of capital and technology, and can most readily adapt to changing conditions. Because the larger farmers' costs of production are generally lower, they find the price supports to be much more generous than do those farmers who are smaller and whose costs of production are generally higher. Those farmers at the lower end of the cost-of-production curve simply apply the relatively lucrative price support payments and protections to purchasing more and more inputs and technology. In this way they attempt to increase their net income by producing and selling more and more bushels, pounds, and hundredweights—for which they receive ever more subsidies and payments. Those who are at the higher end of the cost-of-production curve then find that the surpluses thus created have driven the prices they receive in the marketplace even lower.

What an anomaly. The most vocal advocates of the family farmer then call for increased price supports, thus creating and exacerbating this particularly perverse cycle all over again.

FARM SUBSIDIES ARE TARGETED BACKWARDS: TO THE LARGE AND WEALTHY

It needs to be understood that only about 30 percent of the value of U.S. production is covered by farm programs. There are no subsidies or price supports for livestock or for perishable commodities such as fruit and vegetables and other specialty crops. So, the loan rate and target price programs can't begin to address the problem of income support for the farm sector. The income support functions of the 1985 farm bill will never help farmers who produce 70 percent of our agricultural output.

And, how about the 30 percent of the value of production that is covered? Surely, one would expect that the $65 billion we are talking about spending over the next 4 years in this bill will go to assist farmers experiencing financial stress. Don't count on it. Exactly the opposite will be the case.

You see, these programs operate as nonmeans tested entitlements—paid to farmers, not on the basis of financial condition but on the basis of bushels, pounds, and hundredweights. These units of production are inanimate objects that cannot experience financial stress. Only farm businesses can experience financial difficulty. Financial difficulty for a farming business can be gauged by changes in its asset values, debt commitments, and farm cash income; that is, on the basis of its equity and its cash flow. The most recent data available on this subject is contained in a report issued in July 1985 by the Department of Agriculture entitled "Financial Characteristics of U.S. Farms, January 1985," and is included as an appendix to the committee's report on the bill.

The bottom line? It's this: There is enormous relative wealth in the U.S. agricultural industry. The average net equity for farming operations with gross sales greater than $250,000 was $904,446 on January 1, 1985. The average net equity for all farming operations with gross sales between $100,000 and $250,000 was $429,891 on January 1. And, the statistics for farms with gross sales between $20,000 and $100,000 was $246,220. This compares to the net equity of the average American family of about $92,000.

What's more, farmers as a class, have net annual incomes that often greatly exceed that of the average American family. Average annual income for American families is about $24,800 per year. The average net income for farm families with farming operations grossing more than $250,000 was $96,889 in 1984. Average net income for the $100,000 to $250,000 gross sales farm was $36,273. The same figures for those farming operations with gross sales between $20,000 and $100,000 was $17,602. Of course, there are many farmers in these different sales categories whose incomes were less than these average amounts. But, as in any averaging of statistics, for every farm family that had income less than the amounts indicated here, there was a farm family that had net income greater than these amounts. Farm programs provide their benefits, by definition to the larger farmers, and therefore, definition, to the most wealthy farmers.

The most substantial part of the equity base of American farms is land. Farmland prices peaked in 1981 after three decades of uninterrupted increases. By April 1984, farmland prices had dropped 8 percent nationwide, and by as much as 28 percent in parts of the Corn Belt and upper Midwest. Land values will probably continue to decline further in 1985—and will surely do so if present farm policies continue to induce massive surpluses constantly driving prices lower and lower. Many farmers who purchased land or started farming in the late 1970's now have debts exceeding the value of their assets. But the fact remains that even with depressed land values and correspondingly reduced equities, American farm families—on the average—have net worth equity positions and net annual incomes which greatly exceed that of the average American family.

However, this relative wealth says nothing about debt to asset ratios, and that is where most farmers who are experiencing financial stress are most severely impacted. USDA estimates that by the end of 1985, 4.6 percent of all U.S. farms will be technically insolvent, with debt/asset ratios exceeding 100 percent. Another 2.6 percent are projected to be in the very highly leveraged category, with debt/asset ratios between 70 and 100 percent. Another 19.5 percent are expected to be in the highly leveraged category, with debt/asset ratios between 40 percent and 70 percent.

The remaining 71.9 percent of American farmers are not experiencing—nor are they expected to experience—financial difficulty in 1985. And, it is important to note, not all of the farms in the highly and very highly leveraged categories are under serious financial stress. Farms with less than $50,000 in sales obtain much of their income from off-farm sources, and often serve as tax shelters for the very wealthy. Very large farms with over $500,000 in sales tend to be highly industrialized specialty operations and typically operate with high debt/asset ratios. Most of these farms have positive cash flows.

However, there is a very real, and often livelihood threatening, financial difficulty for a relatively large number of farmers. The American people have great sympathy for the problems these families face, and surely intend that those who can be helped should

be. At current rates of interest and levels of net returns in farming, farms with debt/asset ratios over 40 percent are likely experiencing cash shortfalls. Many will not be successful in keeping their businesses, and that is very sad and unfortunate, indeed.

This is especially unfortunate when it is understood that the cash-flow problems that are creating these wrenching problems are directly attributable to the massive surpluses induced into production by price support subsidies that are paid to all eligible farmers, and in greatest measure to the largest farmers with the highest equities and incomes and the least degree of financial stress. Just as appalling is the degree to which global competition is created under the protection that foreign farmers—such as those in Canada, Australia, Europe, and Argentina—receive from United States loan rates established by law above market clearing levels.

The point is this: The immensely costly provisons of this farm bill have very little to do with helping farmers in distress. It is apparent that these instruments of policy have been mandated by Congress to operate in such a way as actually to contribute significantly to the very real distress that up to 30 percent of the farmers are facing. The farm price support programs indiscriminately spew their subsidies on 100 percent of eligible production, inducing surplus eligible production. This causes ever greater distress for the 20 to 30 percent of the farmers to whom the American people would cheerfully extend a helping hand. And this is what has caused the farm programs to soar in expense from $11 billion to $65 billion over four years.

Indeed, by mandating programs which make it possible for farmers to forfeit unlimited amounts of eligible commodities to the Federal Government, and by insisting that target price deficiency payments must be made to producers based on the maximum amount a farmer can possibly and conceivably produce, this bill is certain to continue the same counterproductive and perverse conditions that have prevailed the past 4 years. And, in the process, it will cause the Federal deficits to soar, adding further to the economic distress of all Americans, but especially to debt-plagued farmers who will be burdened with enormously high interest rates. In short, if we want to douse the fire with gasoline, this farm bill is the way to do it.

The committee approved bill has certain provisions that allow farmers to receive deficiency payments without having to actually grow part of the crop, and to receive direct payments if they are willing to forego putting that which they do grow into the price support loan program. However, these are new and untested policy instruments. They may reduce some of the incentive to produce surpluses, but are even more likely to provide additional payments to farmers without any regard to their financial condition or need for assistance.

Unless properly modified, this farm bill will cause massive surpluses to continue to pile up in Government warehouses, and market prices will continue to decline. Storage will run out, and massive diversion schemes will be implemented. The hapless dog will chew its tail. This will drastically reduce farm income and devastate the agricultural support industries that make up so much of the rural American economy. Such acreage diversion schemes will encourage foreigners to put more acreage into production, and cause American farmers to more intensely cultivate their remaining acres. America will lose another 10 percent, or maybe 20 percent, or more of its export market share. Farm cash flow will deteriorate, and along with that land values will continue to fall. This means that ever greater numbers of farmers will find their operations in the highly leveraged category, and the entire equity base of rural America will be severely threatened. The once great American agricultural sector will lie in ruins, its comparative advantage transferred to the eagerly awaiting farmers in Argentina, Brazil, Europe, India, Canada, Australia, Thailand, and all the other countries which have taken away our export markets at the inducements in U.S. farm policy.

This scenario is very real, because this is precisely what is happening now. And, it is certain to continue to happen in just this way if this bill is not modified by the Senate.

HOW TO ACHIEVE SOUND POLICY

Correcting these counterproductive and destructive flaws in the committee reported bill is not at all impossible. Indeed, the changes required should not even be difficult. The basic instruments of farm policy are sound, and will work well if they are in a sensible relationship to actual market conditions.

LOAN RATES

The concept of nonrecourse loans has worked well as an effective and cost-efficient marketing tool for farmers. The committee bill recognizes the need for the loan rates to be established on a formula that allows the loan rate to adjust to changing market conditions.

There needs to be a limit on the amount of crop loans that one farmer is permitted to forfeit to the Government. The tremendous increase in the cost of the farm programs is a consequence of Congress requiring that any farmer may forfeit to the Government any amount of commodity he can conceivably produce. This is an entitlement for bushels, pounds, and bales that has become too costly and destructive to sound policy. It induces massive overproduction and removes any element of risk for the farmer-businessman. Putting a cap on the total amount of nonrecourse loans would still permit farmers to take out recourse loans that they would have to repay as any other loan. This reform would allow farmers to produce as much as they want, but the amounts above the nonrecourse loan cap would have to be marketed at their own risk.

TARGET PRICES

The target price deficiency payment system is a very orderly and effective procedure for transferring income from the nonfarm to the farm sector. It is far more desirable to support farm income, if that is what Congress intends, with direct payments than it is to try to do so by artificially setting loan rates above market clearing levels and by employing acreage diversion schemes to try to control production. As previously described, both of those tools used to support farm income are destructive to the purpose intended. That is why Congress established target prices.

However, if Congress intends to support farm income the obvious question is, Whose income, and how much? As previously described, the present system of determining who gets income support subsidies, and how much, ends up making immense payments to wealthy farmers, and invites everyone in the production stream to turn out ever greater surpluses, actually depressing market prices for every farmer—and particularly for those small- to medium-sized family farms.

Because past and present policies mandated by Congress have created this chaos, and because so many farmers organized their businesses in a way that now makes them dependent upon receiving direct subsidies, no one has suggested that Congress now terminate the Deficiency Payment Program. However, this does not mean that Congress cannot modify the Target Price Program. Three modifications are necessary:

First, reduce the target price payment level. Freezing the target prices for 1986 at the 1985 level, and providing for their 5 percent across-the-board reduction in each year thereafter will provide massive income protection, yet will signal that over time this protection will diminish marginally. Target prices are simply too high. Congress did not intend them to be at the present levels in inflation adjusted terms when they were established at their present levels in the 1981 farm bill.

Second, reduce the amount of commodities for which one farmer could receive target price payment subsidies. As previously discussed, the target price levels are so high as to serve as

massive inducements to surplus production, and operate as entitlements for income transfer payments to farmers without regard to their financial condition. Almost half of the entire cost of these subsidies benefit the largest 5 percent of the farmers. Limiting the amounts of commodities for which a particular farmer is entitled to these income transfer payments is an absolute necessity if these farm programs are to make any sense at all.

Third, remove gimmicks and loopholes that provide for higher payments and which encourage crafty schemes to evade payment limits. The market price on which the target price deficiency payments are calculated should be made honest. Right now it is skewed to assure the calculation for the highest amount of subsidies. Also, many farm operations have come to violate the spirit of the $50,000 payment limitation permitted to any one farmer by cleverly dividing up his operations into several "payee units." Reports abound of schemes by tax avoidance limited partnerships which craftily exploit the loopholes in the payment limitation provisions of the Target Price Program. This multibillion-dollar program is rife with abuse. It needs to be tightened up.

ACREAGE REDUCTION PROGRAMS

Schemes to limit production on an annual basis should be phased out, because they don't work. Acreage reduction programs, called ARP's in farm bill jargon, are the basis of eligibility for the panoply of farm programs. For this reason, their implementation can give the impression of reducing government costs, at least in theory. But they don't work that way in practice, particularly over a multiyear period.

WHEN ARP'S ARE IN EFFECT

Farmers simply more intensely cultivate their remaining acres, or put generally unproductive land into the ARP. However, when foreign producers read that the United States has an ARP in a particular year they are induced to plant more acreage, increasing world surpluses even more. Further, because ARP's require farmers not to use valuable assets of land and equipment, their implementation makes it less possible for farmers to earn their income from the marketplace, and actually reduces farm income. ARP's are a hoax on farmers and taxpayers alike.

The Conservation Reserve Program provided for in the committee bill will pay farmers more than $4 billion to remove between 25 and 30 million fragile acres from production. And, the sod-buster and conservation cross compliance provisions in the bill make sure that there will be adequate and effective reduction of the least suitable acres.

For these reasons the Senate should modify the committee approved bill to phaseout authority for the Secretary to implement acreage reduction programs as an instrument of agricultural policy.

CONCLUSIONS

If these six modifications are made in the farm bill reported by the committee, the Senate will have assurance that it will be possible for a recovery to get underway in the U.S. agricultural economy. All of these proposals for modifications will improve the effectiveness of the farm programs, and more properly target the billions of dollars in benefits and subsidies to those farmers who are most likely to be in need of assistance. The thrust of these recommendations will be to remove the massive inducements for excessive surplus production now inherent in the extensive and complex weave of farm price support and subsidy programs.

Mr. President, the Senate Committee on Agriculture, Nutrition and Forestry put much effort into this farm bill, spending almost 4 months in markup. With the exceptions I have noted, this farm bill is generally excellent work that makes important reforms in a wide range of programs. The conservation title is outstanding. The export title will provide important new instruments to the Secretary of Agriculture in helping combat the predatory trading practices of some competitor nations, and make significant reforms in our foreign food assistance programs. The research title has a number of reforms and innovations that will improve the quality and delivery of agricultural research in the years ahead. Reforms in a number of the programs for commodities other than those already mentioned will make them more effective in meeting increasing global competition.

In other areas the committee adopted reforms, but simply did not go far enough to be effective or desirable. This is the case in dairy, and in food stamps, and perhaps a few others. There are certain to be floor amendments on these subjects. In particular, I believe that the food stamp error rate sanctions for the States and the work requirements for the able bodied are weak and very much need to be strengthened. Some 17 States have indicated that they would be interested in considering an optional block grant for providing food assistance to the needy, and I feel strongly that the Senate should provide such authority on that basis.

So. while there is much in this farm bill to commend it, I am nonetheless disappointed that by indiscriminately pouring forth massive subsidies on the agricultural sector, this bill will contribute to its further wrenching pain and decline.

As I conclude, I would emphasize that this bill, without the modifications I have outlined, is bad news for American farmers and American taxpayers. It offers no hope for improvement in the farm economy. It repeats all the mistakes of the past. It will perpetuate the existing difficult economic situation of our farmers, and it will waste many billions of deficit dollars—dollars borrowed from future generations—to pay massive subsidies to hundreds of thousands of farmers who least need it. The huge commodity surpluses thus induced into production will further cripple the cash flows and profitability of the very family farmers these programs, it is so loudly proclaimed, are supposed to help.

Mr. President, I ask unanimous consent that a summary of major provisions of the farm bill be printed in the RECORD.

There being no objection, the summary was ordered to be printed in the RECORD, as follows:

SUMMARY OF MAJOR PROVISIONS OF S. 1714—AGRICULTURE, FOOD, TRADE, AND CONSERVATION ACT OF 1985

TITLE I—AGRICULTURAL EXPORTS AND PUBLIC LAW 480

A. Agricultural exports

The agricultural export provisions of the bill would—

(1) Authorize the Secretary of Agriculture through the Commodity Credit Corporation (CCC) to guarantee the repayment of loans under the intermediate export credit program to finance export sales of U.S. agricultural commodities and the products thereof. Under this section—

(a) The Secretary is authorized to guarantee loans of more than 3 years and not more than 10 years to finance export sales of agricultural commodities;

(b) The purposes for which intermediate credit financing and guarantees may be provided are expanded to include financing the food and fiber needs of developing countries and otherwise promoting the export sales of U.S. agricultural commodities.

(c) The Secretary is encouraged to finance or guarantee export sales to purchasers from countries that are previous recipients of credit under title I of P.L. 480, and that are friendly countries and purchasers unable to utilize other Department of Agriculture short-term export credit programs;

(d) The repayment of loans financed or guaranteed is required to be in dollars with a rate of interest determined by the Secretary;

(e) The requirement that agreements to finance export sales of agricultural commodities are subject to review by the Secretary or the National Advisory Council on International Monetary and Financial Policies is deleted;

(f) The cargo preference laws do not apply to export sales financed or guaranteed under this provision;

(g) For purposes of financing or guaranteeing export sales, the CCC is required to make available no less than $500,000,000, to the extent practicable, for fiscal year 1985, no less than $1,000,000,000 for each of the fiscal years 1986 through 1988, and no more than $1,000,000,000 for fiscal years 1989 through 1991.

(2) Require the CCC to make available no less than $5,000,000,000 in short-term export credit guarantees for each of the fiscal years 1986 through 1989. The amendment would also require the CCC, when

making repayment guarantees available on terms of up to 3 years in connection with export sales of U.S. agricultural commodities, to take into account the credit needs and creditworthiness of countries that are potential purchasers of U.S. agricultural commodities and whether the availability of CCC guarantees will improve the competitive position of U.S. agricultural exports.

(3) Extend the Agricultural Export Credit Revolving Fund through September 30, 1989.

(4) Require the Secretary to use no less than $325 million of CCC funds or CCC-owned commodities for each of fiscal years 1986, 1987, and 1988 and such funds or commodities as the Secretary deems necessary for each of the fiscal years 1989 through 1991 for assistance in the export of U.S. agricultural commodities and products adversely affected by price or credit subsidies or unfair marketing arrangements or trading practices employed in connection with foreign agricultural exports. The provision would require the Secretary to provide export assistance under this provision on a priority basis for agricultural commodities or products for which a favorable decision under section 301 of the Trade Act of 1974 has been made.

(5) Require the Secretary to sell for export, at prices the Secretary determines appropriate, at least 150,000 metric tons of CCC-owned dairy products in each of the fiscal years 1986, 1987, and 1988 and to report semiannually to the Senate and House agriculture committees on the volume of dairy sales made under this section.

(6) Require that agricultural commodities and products acquired by the CCC be provided at no cost to U.S. exporters, users, and processors, and foreign purchasers to encourage development, maintenance, and expansion of export markets for U.S. agricultural commodities, including value-added or high-value agricultural products. Such commodities may also be provided to countries that do not meet the financial qualifications for export credit or credit guarantees provided by the CCC in order to reduce the cost to such countries of purchasing U.S. agricultural commodities. The Secretary is also authorized to use CCC-owned commodities in conjunction with intermediate credit programs for the export sale of breeding animals, and the establishment of facilities in the importing nation to improve the handling, marketing, processing, storage, or distribution of imported agricultural commodities. Under the export bonus program—

(a) Domestic users must be provided equal treatment relative to foreign purchasers and users in cases where domestic users may be disadvantaged as a result of the program;

(b) All interested foreign purchasers are to be considered for participation, with priority given to those who have traditionally purchased U.S. agricultural commodities and who continue to make such purchases in excess of purchases during a representative period;

(c) CCC commodities must be used to encourage increased use and avoid displacing usual marketings of the United States;

(d) Reasonable precautions must be taken to prevent resale or transshipment of commodities whose export is assisted under the provision;

(e) Supplemental distributions of commodities may be made to foreign purchasers who sell the commodities in the importing country and use the proceeds for the construction or rehabilitation of facilities in the importing country to improve the marketing, storage, or distribution of U.S. agricultural commodities in the importing country.

(f) The Secretary is authorized, in carrying out this section, to make green dollar export certificates available to commercial exporters of U.S. agricultural commodities. These certificates could be redeemed by the exporter for CCC-owned commodities.

(g) The Secretary is required to use no less than $2,000,000,000 of agricultural commodities and products to carry out this section during the period October 1, 1985 through September 30, 1988.

(7) Declare findings of Congress concerning open and fair trade and the unfair trading practices of other countries; declare U.S. policy to be that of promoting free and active world trade in agricultural goods and reducing or eliminating U.S. restrictions on imports of agricultural goods; and express the sense of the Congress that the President should initiate a new round of multilateral trade negotiations to strengthen the General Agreement on Tariffs and Trade (GATT), improve the dispute settlement procedures of the GATT, bring agricultural trade issues within the purview of strengthened and more effective GATT rules and procedures, and clarify the intent of and bring uniformity to the interpretation of Article XVI of GATT.

(8) Declare the sense of Congress that the Foreign Agricultural Service should place emphasis on funding an export market development program for value-added farm products and processed foods at a higher funding level than that provided during fiscal year 1985.

(9) Require consultation between the head of the Foreign Agricultural Service and the heads of other appropriate agencies of the Department of Agriculture, including the Administrator of the Animal and Plant Health Inspection Service, before relaxing or removing any restriction on the importation of any agricultural commodity into the United States. The Secretary would also be required to consult with the United States Trade Representative before removing or relaxing any import restrictions on agricultural commodities. Department of Agriculture personnel assigned to participate in negotiations of trade agreements, protocols or procedures with foreign governments with respect to a specific agricultural commodity, class of commodities or product of an agricultural commodity would be required to consult with the Agricultural Policy Advisory Committee and the appropriate Agricultural Technical Advisory Committee regarding agricultural practices and industry procedures before concluding any agreement with any foreign government on any agricultural trade matter pertaining to the agricultural commodity, class of commodities, or product.

(10) Require appropriate Department of Agriculture officers and employees stationed in foreign countries to submit annually to the Secretary detailed reports decumbenting the nature and extent of (A) programs in the foreign countries that provide direct or indirect government support for the export of agricultural commodities or products and (B) other trade practices that may impede the entry of U.S. agricultural commodities and products into the countries. The reports would also have to identify opportunities for the export of U.S. agricultural commodities and products to the countries in which the officers and employees are stationed. The Secretary would be required to compile information contained in the reports each year and to make the information available to Congress, the Agricultural Policy Advisory Committee and the Agricultural Technical Advisory Committees, and other interested parties. The Secretary and the Trade Representative would be required to convene a meeting, at least once a year, of the Agricultural Policy Advisory Committee and the Agricultural Technical Advisory Committees to develop specific recommendations for reducing or eliminating trade barriers or distortions identified in the annual reports and for expanding U.S. agricultural export opportunities identified in the annual reports. The President would be encouraged to commence negotiations with other countries to reduce or eliminate trade barriers or distortions identified in the annual reports and to report periodically to Congress on actions taken to accomplish those objectives.

(11) Limit to payments the form of compensation that may be made to producers of agricultural commodities for which export controls have been imposed.

(12) Revise the authorities of the Department of Agriculture concerning the barter or exchange of agricultural commodities for strategic and critical materials. In addition, this section would—

(a) Require the CCC, to the maximum extent practicable and in consultation with the Secretary of State, to accept strategic and critical materials produced abroad in exchange for CCC commodities;

(b) Require the Secretary of Agriculture in effecting the exchange of goods to use normal commercial trade channels, avoid displacing usual marketings of U.S. agricultural commodities, and take reasonable precautions to prevent resale or transshipment of commodities;

(c) Authorize the CCC to solicit bids from, and utilize, private trading firms to barter for strategic or other materials;

(d) Require the CCC to be reimbursed for the strategic and critical materials in the same fiscal year the materials are transferred to the stockpile; and

(e) Require the CCC, if the volume of petroleum products stored in the Strategic Petroleum Reserve is less than the level prescribed by law, to the maximum extent practicable, with approval of the Secretary of Agriculture and in consultation with the Secretary of Energy and the Secretary of State, to accept petroleum products in exchange for CCC commodities and to transfer such products, without reimbursement, to the Strategic Petroleum Reserve.

(13) Clarify the application of the cargo preference laws to certain activities of the Secretary of Agriculture or the Commodity Credit Corporation. The provision specifically would provide that the cargo preference laws do not apply to export activities of the Secretary or the CCC—

(a) under which CCC-owned stocks of agricultural commodities or products are made available to U.S. exporters, users, processors, or foreign purchasers for the development, maintenance, or expansion of U.S. agricultural export markets;

(b) under which CCC guarantees of commercial credit are blended with CCC direct credits to reduce the effective interest rate on export sales of U.S. agricultural commodities and products;

(c) under which CCC credit or credit guarantees are extended for not more than 3 years to finance or guarantee export sales of U.S. agricultural commodities or products; or

(d) undertaken for the purpose of promoting the export of U.S. agricultural commodities or products, if the Secretary determines that such activities are necessary to cause such commodities or products to become or remain competitive under conditions prevailing in international trade.

The bill would make no change in the application of the cargo preference laws to the export activities of the Secretary or the CCC when these activities are carried out under the Agricultural Trade Development and Assistance Act of 1954 (Public Law 480) or subsections (a), (b), and (c) of section 416 of the Agricultural Act of 1949.

(14) Authorize the Secretary, effective October 1, 1985, to make grants to States, on a fifty-fifty matching basis, for the purpose of paying the costs of construction, employing personnel, acquiring equipment, and taking other action relating to the expansion of existing international trade development centers in the United States to enhance the exportation of U.S. agricultural products and related products.

B. Public Law 480 and related programs

The Public Law 480 and related program provisions of the bill would—

(1) Revise the authority to finance the sale of U.S. agricultural commodities under title I of Public Law 480 as follows:

(a) Require that at least 25 percent of the aggregate value of title I sales, or 500,000 metric tons (whichever is greater), but not more than 50 percent of such sales be sales for foreign currencies. (The actual amounts of commodities sold for foreign currencies could drop below 500,000 metric tons per year, if certain conditions are met in each of fiscal years 1986, 1987, and 1988.) The terms and conditions of such sales will be established by the Secretary of Agriculture. The foreign currency generated by these sales will be converted into dollars over a 10- to 30-year time period, the conversion to begin on a date 10 years after the sale of the commodities.

(b) Authorize the Secretary to enter into agreements with financial intermediaries in foreign countries under which the Secretary would lend the foreign currency generated from commodity sales to the intermediary and the intermediary would, in turn, use the currency to make loans to finance private enterprise investment within the developing country at reasonable rates of interest.

(c) Require that financial intermediaries give preference to agriculture and agriculturally related enterprises when making loans. The financial intermediaries must repay the currency loaned by the Secretary in time for the currency to be converted to dollars.

(d) Specify that only local citizens can own the entities receiving financing from financial intermediaries, except that U.S. citizens may own up to 25 percent of any such entity.

(e) Provide that the rate of interest charged on loans made to a financial intermediary will be negotiated between the Secretary and the financial intermediary. The Secretary may give preferential rates of interest to cooperatives and private nonprofit voluntary agencies that act as financial intermediaries to help defray their "start-up" costs as financial intermediaries.

(f) Specify that the amount of foreign currency loaned to financial intermediaries in a given country cannot exceed the amount that can be productively used and absorbed in the private sector in that country.

(g) Require that the Secretary, to the maximum extent practicable, use at least 5 percent of the foreign currencies initially obtained from the sale of agricultural commodities for agricultural technical assistance, including the funding of market development activities.

(2) Revise title II as follows:

(a) Require that the following amounts of agricultural commodities be distributed for nonemergency purposes under title II of Public Law 480:

[Million metric tons]

Fiscal year:	
1986	1.9 [1](1.425)
1987	1.9 [1](1.425)
1988 and subsequent fiscal years	1.7 [1](1.275)

[1] The starred amounts represent the minimum amounts of food for nonemergency distribution programs that must be distributed through nonprofit voluntary agencies and the World Food Program.

(b) Require that, in distributing commodities under title II, the President must consider the nutritional needs of the recipients, the purpose of the Title, the cost effectiveness of the commodities, and the benefits to be derived by the United States from distributing commodities in the form of processed and fortified products and provide at least 75 percent of the title II nonemergency minimum quantity of commodities in the form of processed or fortified foods or bagged commodities.

(c) Encourage the President to enter into multiyear agreements with nonprofit voluntary organizations, cooperatives, and international organizations for nonemergency commodity distribution under title II.

(d) Empower the President to authorize nonprofit voluntary organizations to establish local food reserves for subsequent use in combatting famine and other food shortage emergencies or to limit disincentives to local agricultural production which could arise from the immediate distribution of the commodities.

(e) Authorize the sale of commodities provided to nonprofit voluntary agencies and cooperatives by such agencies (monetization) and the use of the proceeds for activities to enhance the food assistance programs carried out by these agencies.

(f) Require that a minimum of 5 percent of the commodities distributed under nonemergency title II programs by nonprofit voluntary agencies and cooperatives be monetized. In carrying out the monetization, the President must safeguard usual U.S. commodity marketings; not permit the use of such funds for personnel and administrative costs of cooperating sponsors, distributing agencies, and recipient agencies (other than local cooperatives), and not permit the funds to replace resources otherwise available to nonprofit voluntary agencies and cooperatives.

(g) Urge the President to establish a task force on food assistance to study ways to provide food (under P.L. 480) to the most nutritionally needy persons in recipient countries.

(h) Require nonprofit voluntary agencies and cooperatives to disclose the intended uses of any funds to be generated through the monetization of commodities at the time the entity makes its request for the commodities.

(3) Lower the aggregate minimum value of title III Food for Development agreements from 15 percent of the aggregate value of all title I agreements made that year to 10 percent of such agreements.

(4) Broaden the Secretary's authority to distribute eligible commodities under section 416 of the Agricultural Act of 1949 to include all commodities and products acquired by the Commodity Credit Corporation through price support operations and make other changes in this authority as follows:

(a) Specify that eligible commodities may not be made available for foreign donation under section 416 in amounts that will reduce the amount of eligible commodities traditionally donated to domestic feeding programs or agencies.

(b) Provide that eligible commodities may not be made available for foreign donation under section 416 unless there are sufficient storage facilities for the commodities, the commodities will not displace U.S. commodity sales, and the commodities will not interfere with local commodity production and marketing. The safeguarding of usual marketing cannot be used to prevent the distribution of eligible commodities for use in countries that—

(i) have not traditionally purchased them from the United States, or

(ii) do not have the resources to purchase them from the United States through commercial sources or commissioned sales.

(c) Requires the Secretary to estimate and announce the types and amounts of commodities that the Secretary anticipates will be available for distribution.

(d) Expand the purposes for which eligible section 416 commodities may be sold or bartered to include (1) the payment of processing and handling costs incurred in connection with the donation of these commodities and (2) if requested by a cooperative or nonprofit voluntary agency, the generation of funds (from the sale of commodities donated to these entities) to enhance the effectiveness of the entity's food assistance programs.

(e) Requires that a minimum of 5 percent of the aggregate value of the eligible commodities distributed to nonprofit voluntary agencies and cooperatives be monetized in the same manner as is provided for monetization under the amendments made by this bill to Title II of Public Law 480.

(f) Specify that at least 400,000 metric tons of eligible section 316 commodities must be furnished to cooperatives and nonprofit voluntary agencies and the World Food Program each fiscal year for distribution in developing countries. The President can waive this requirement if he determines and reports to Congress, together with his reasons, that this quantity cannot be effectively used by the recipients. Neither the Secretary nor CCC is required to purchase commodities for donation under this program.

(5) Authorize the President to donate up to 500,000 metric tons of eligible section 416 commodities in each of the fiscal years 1986 through 1989 under a new Food for Progress program to promote private free enterprise policy and development. In return for the commodities, the recipient country must promote economic freedom in the production of food for domestic consumption and must be able to use the donated commodities without disrupting its own domestic agricultural markets. The Com-

modity Credit Corporation may pay the costs of processing, packaging, transportation, and handling of the donated commodities, as well as purchase commodities and products for program use if CCC does not hold such stocks or if CCC stocks are not sufficient to meet commitments made under the program. The President must carry out this program through his National Security Adviser.

(6) Require the President to appoint, with the advice and consent of the Senate, a Special Assistant for Agricultural Trade and Food Aid. This Special Assistant will have cabinet rank and will assist and advise the President on U.S. domestic and foreign food assistance programs; coordinate and streamline the administration of food assistance programs carried out by the Department of Agriculture and the Agency for International Development; recommend ways to increase and encourage the use and consumption of U.S. agricultural commodities through food assistance; serve as a member of the Development Coordination Committee and as chairman of that Committee's Food Aid Subcommittee; and issue food assistance policy guidelines to Federal departments and agencies to assure the coordination of food assistance programs. In addition, the Special Assistant may solicit information on and recommend steps to promote the export of U.S. agricultural commodities and expand U.S. export markets; develop and recommend national agricultural policies that will foster and promote the U.S. agriculture industry; and examine Federal Government programs and activities for their effect on agriculture.

TITLE II—DAIRY

The dairy provisions of the bill would—

(1) Require, effective October 1, 1985, through September 30, 1989, that the price of milk be supported through the purchase of milk and milk products at a level equivalent to $11.60 per hundredweight for milk containing 3.67 percent milkfat, except that—

(a) On January 1, 1987, if the Secretary of Agriculture estimates that for the succeeding 12-month period beginning on such date net price support purchases of milk or milk products would exceed 5 billion pounds milk equivalent, the Secretary would be required to reduce the price support level by 50 cents per hundredweight; and

(b) On January 1, 1988, and January 1, 1989, the Secretary estimates that for the succeeding 12-month period net price support purchases of milk or milk products would—

(i) exceed 10 billion pounds or more milk equivalent, the Secretary would be required to reduce the price support level by $1.00 per hundredweight, or in the Secretary's discretion, by an amount determined by a cost of production index established by the Secretary;

(ii) exceed 5 billion but be less than 10 billion pounds milk equivalent, the Secretary would be required to reduce the price support level by 50 cents per hundredweight or, in the Secretary's discretion, by an amount using such index; and

(iii) be less than 2 billion pounds milk equivalent, the Secretary would be authorized to increase the price support level by at least 50 cents per hundredweight or, in the Secretary's discretion, by an amount using such index;

(2) Extend through December 31, 1989 the current provisions of the Federal milk marketing law relating to authority for seasonal base-excess plans, seasonal takeout-payback (Louisville) plans, mandatory hearings on amendments to milk marketing orders, and the use of milk production capacity as part of the pricing standard used by the Secretary in setting milk prices under a marketing order;

(3) Extend through September 30, 1989 the requirement that the CCC make dairy products available, without charge, to veterans' hospitals and the military;

(4) Make clear that the legal status of producer-handlers would not be changed under the provisions of the amendment;

(5) Extend through September 30, 1989 authority for indemnity payments to dairy farmers who sustain losses as a result of pesticides, nuclear radiation or fallout, or from other chemicals or toxic substances; and

(6) Require the Secretary to conduct a study of the differentials used to adjust the minimum price for class I milk under Federal milk marketing orders, with particular emphasis on the differentials used for the delivery locations of such milk to handlers and to report within 1 year of enactment of the bill the results of the study, with any recommendations for necessary legislation, to the Senate and House agriculture committees.

TITLE III—WOOL AND MOHAIR

The wool and mohair provisions of the bill would—

(1) Extend the price support program for wool and mohair through December 31, 1989 as follows:

(a) Continue the support level for wool at 77.5 percent of an amount determined under statutory formula;

(b) Continue the support level for pulled wool and mohair in relation to the level for shorn wool;

(2) Establish a limitation of $50,000 on the amount of payments a person may receive under the wool and mohair price support program for any marketing year; and

(3) Expand the authority of the Secretary of Agriculture to enter into or to approve agreements for advertising and sales promotion programs which may be conducted outside of the United States for the purpose of maintaining and expanding foreign markets and uses to include programs for U.S. wool and sheep in addition to such programs for mohair and goats, or their products.

TITLE IV—WHEAT

The wheat provisions of the bill would—

(1) Provide for a loan and purchase program for the 1986 through 1989 crops of wheat. If marketing quotas are not in effect for wheat, loans and purchases would be made available to producers at (a) not less than $3.00 per bushel for the 1986 crop and (b) not less than 75 percent nor more than 85 percent of the average price received by producers during the immediately preceding 5 marketing years, excluding the high and low years, for the 1987 through 1989 crops. The loan rate could not be reduced by more than 5 percent from the level for the preceding year's crop. For the 1986 through 1989 crops, the Secretary of Agriculture would also be authorized to reduce further the loan rates by not more than 20 percent if the average market price of wheat in the previous marketing year is not more than 110 percent of the loan level for that year. Any such reduction would not be considered in determining the loan level in subsequent years.

If marketing quotas are in effect, loans and purchases would be made available at the higher of 75 percent of the national average cost of production of wheat or $3.55 per bushel.

(2) Require the Secretary to permit the repayment of loans at the lower of (a) the loan rate established for the crop or (b) the higher of (i) 70 percent of the loan rate established for the crop, or (ii) if the loan level was reduced using the so-called Findley provision, above, 70 percent of the loan rate that would have been in effect but for such reduction, or (iii) the prevailing world market price, as determined by the Secretary;

(3) Authorize the Secretary to make payments available to producers who agree to forgo obtaining loans in return for such payments. Payments would be made in amounts equal to the loan payment rate multiplied by the amount of wheat the producer is otherwise eligible to place under loan. The amount of wheat eligible to be placed under loan could not exceed the farm program acreage for the crop multiplied by the farm program payment yield. The loan payment rate would be the amount by which the loan rate established for the crop exceeds the level at which the loan could be repaid;

(4) Require the Secretary to make available deficiency payments for the 1986 through 1989 crops of wheat using the same formula as under current law except that producers would not be required to plant more than 50 percent of their base or permitted acreage in order to qualify for such payments. For the 1986 through 1989 crops, the target price would be $4.55 bushel on the first 20,000 bushels of production and $4.00 per bushel on any additional bushels.

If marketing quotas are in effect for any crop of wheat, the target price would be the higher of the national average cost of production of wheat or $4.65 per bushel;

(5) Require the Secretary to make prevented planting and reduced yield disaster payments available to producers for whom Federal crop insurance is not available. The Secretary would also have discretionary authority to make such disaster payments available to any wheat producer if disaster losses have created an economic emergency that cannot be alleviated by crop insurance and other assistance programs;

(6) Authorize acreage limitation and set-aside programs for wheat (with a maximum limitation or set-aside of 20 percent) if needed to protect against overproduction. The Secretary would be required to announce any such wheat acreage limitation or set-aside program not later than July 1 (with authority to change the program up to July 31) prior to the calendar year in which the crop is harvested. The acreage base for determining any such reduction would be the average acreage planted to wheat in the 5 crop years immediately preceding the year for which the determination is made. Haying and grazing in 1986, and grazing in 1987 through 1989, of the acreage required to be devoted to conservation uses would be permitted at the option of the State ASC Committee. In no event could the total acreage base for any farm exceed the total acreage of cropland on the farm;

(7) Authorize the Secretary to make land diversion payments, regardless of whether an acreage limitation or setaside program is in effect, if the Secretary determines that land diversion payments are necessary to assist in adjusting the total national acreage of wheat to desirable goals. Land diversion payments would be made to producers who devote cropland to approved conservation uses in accordance with land diversion contracts entered into by the Secretary;

(8) Authorize the Secretary to make payments available to producers who forgo obtaining a loan, who forgo receiving deficiency payments, who do not plant wheat for harvest in excess of the farm acreage base reduced by one-half of any acreage required to be diverted from production, and who otherwise comply with the provisions of the bill. Payments would be made in the form of wheat owned by the CCC, subject to availability, and would be in amounts equal to the loan payment rate (the amount by which the loan rate established for the crop exceeds the level at which loans may be repaid) multiplied by the amount of wheat the producer is otherwise eligible to place under loan; and

(9) Require the Secretary to conduct a poll not later than April 1, 1986, to determine whether producers favor conducting a marketing quota referendum for wheat. Producers eligible to vote would include those producers who produced wheat during at least one of the 1981 through 1985 crop years. If 50 percent of those polled favor a referendum, the Secretary would be required to conduct such a referendum not later than August 1, 1986. If approved in a referendum by 60 percent or more of the producers voting, marketing quotas would be in effect for the 1987 through 1989 crops. If marketing quotas are in effect, the marketing of wheat in excess of the farm marketing quota would be subject to penalty.

TITLE V—FEED GRAINS

The feed grains provisions of the bill would—

(1) Provide for a loan and purchase program for the 1986 through 1989 crops of feed grains. Loans and purchases would be made available to producers at not less than $2.40 per bushel for the 1986 crop of corn and not less than 75 percent nor more than 85 percent of the average price received by producers during the immediately preceding 5 marketing years, excluding the high and low years, for the 1987 through 1989 crops of corn. The loan rate could not be reduced by more than 5 percent from the level for the preceding year's crop. For 1986 through 1989 crops, the Secretary of Agriculture would also be authorized to reduce further the loan rates by not more than 20 percent if the average market price of corn in the previous marketing year is not more than 110 percent of the loan level for that year. Any such reduction would not be considered in determining the loan level in subsequent years.

Loans and purchases for grain sorghums, barley, oats, and rye would be made at levels that are fair and reasonable in relation to the level of loans and purchases for corn;

(2) Require the Secretary to permit the repayment of loans at the lower of (a) the loan rate established for the crop or (b) the higher of (i) 70 percent of the loan rate established for the crop, or (ii) if the loan level was reduced using the so-called Findley provision, above, 70 percent of the loan rate that would have been in effect but for such reduction, or (iii) the prevailing world market price, as determined by the Secretary;

(3) Authorize the Secretary to make payments available to producers who agree to forgo obtaining loans in return for such payments. Payments would be made in amounts equal to the loan payment rate multiplied by the amount of feed grains the producer is otherwise eligible to place under loan. The amount of feed grains eligible to be placed under loan could not exceed the farm program acreage for the crop multiplied by the farm program payment yield. The loan payment rate would be the amount by which the loan rate established for the crop exceeds the level at which the loan could be repaid;

(4) Require the Secretary to make available deficiency payments for the 1986 through 1989 crops of feed grains to producers of corn, grain sorghums, oats, and, if designated by the Secretary, barley, using the same formula as under current law except that producers would not be required to plant more than 50 percent of their base or permitted acreage in order to qualify for such payments. The target price for corn, for the 1986 through 1989 crops, would not be less than $3.03 per bushel;

(5) Require prevented planting and reduced yield disaster payments for producers for whom Federal crop insurance is not available in the same manner as for wheat;

(6) Authorize acreage limitation and set-aside programs for feed grains (with a maximum limitation or set-aside of 15 percent) if needed to protect against overproduction. The Secretary would be required to announce any such acreage limitation or set-aside program not later than November 15 prior to the calendar year in which the crop is harvested. The acreage base for any reduction would be the average acreage planted to feed grains for harvest in the 5 crop years immediately preceding the year for which the determination is made. In no event could the total acreage base for any farm exceed the total acreage of cropland on the farm;

(7) Authorize the Secretary to make land diversion payments, regardless of whether an acreage limitation or set-aside program is in effect, if the Secretary determines that land diversion payments are necessary to assist in adjusting the total national acreage of feed grains to desirable goals. Land diversion payments would be made to producers who devote cropland to approved conservation uses in accordance with land diversion contracts entered into by the Secretary; and

(8) Authorize the Secretary to make payments available to producers who forgo obtaining a loan, who forgo receiving deficiency payments, who do not plant feed grains for harvest in excess of the farm acreage base reduced by one-half of any acreage required to be diverted from production, and who otherwise comply with the provisions of the bill. Payments would be made in the form of feed grains owned by the CCC, subject to availability, and would be in amounts equal to the loan payment rate (the amount by which the loan rate established for the crop exceeds the level at which loans may be repaid) multiplied by the amount of feed grains the producer is otherwise eligible to place under loan.

TITLE VI—COTTON

The cotton provisions of the bill would—

(1) Require the Secretary of Agriculture to make available to producers of upland cotton nonrecourse loans for a term of 10 months. For the 1986 crop, the loan level could not be less than 55 cents per pound. For the 1987 through 1989 crops, the loan level would be the higher of (i) 85 percent of the average United States spot market price during the 3 years of the 5-year period ending July 31 in the year in which the loan level is announced, with the high and low years excluded, or (ii) 50 cents per pound. The loan level may not be reduced by more than 5 percent from the level determined for the previous year's crop;

(2) Require the Secretary to announce the loan level for upland cotton no later than November 1 of the calendar year preceding the marketing year for which the loan is to be effective;

(3) Authorize the extension of loans, at the producer's request, for an additional 8 months beyond the normal 10-month term unless the average price of upland cotton for the preceding month exceeded 130 percent of the average price for the proceding 36 months in which event a special import quota would be proclaimed;

(4) Require the Secretary to permit the repayment of loans by producers at the lower of the loan rate established for the crop or the prevailing world market price, except that for the 1987 through 1989 crops, if the world market price is less than 80 percent of the loan rate established for the crop, the Secretary may permit repayment at a level not in excess of 80 percent of the loan rate established for the crop;

(5) Authorize the Secretary to make payments available to producers who agree to forgo obtaining loans in return for such payments. Payments would be made in amounts equal to the loan payment rate multiplied by the amount of upland cotton the producer is otherwise eligible to place under loan. The amount of upland cotton eligible to be placed under loan could not exceed the farm program acreage for the crop multiplied by the farm program payment yield. The loan payment rate would be the amount by which the loan rate established for the crop exceeds the level at which the loan could be repaid;

(6) Require the Secretary to make available deficiency payments to producers for the 1986 through 1989 crops of upland cotton using the same formula as under current law, except that producers would not be required to plant more than 50 percent of their base or permitted acreage in order to qualify for such payments. The target price for upland cotton, for the 1986 through 1989 crops, would be not less than 81 cents per pound;

(7) Require prevented planting and reduced yield disaster payments to producers for whom Federal crop insurance is not available in the same manner as for wheat;

(8) Authorize acreage limitation and set-aside programs for cotton (with a maximum limitation or set-aside of 20 percent) if needed to protect against overproduction. The Secretary would be required to announce any such cotton acreage limitation or set-aside program not later than November 1 prior to the calendar year in which the crop is harvested. The acreage base for any reduction would be, for the 1986 crop, the average acreage planted to upland cotton for harvest in the 2 previous years, for the 1987 crop, the average acreage planted to upland cotton for harvest in the 3 previous years, for the 1988 crop, the average acreage planted to upland cotton for harvest in the 4 previous years, and, for the 1989 crop, the average acreage planted to upland cotton for harvest in the 5 previous years. In no event could the total acreage base for any farm exceed the total acreage of cropland on the farm;

(9) Authorize the Secretary to make land diversion payments, regardless of whether an acreage limitation or set-aside program is in effect, if the Secretary determines that land diversion payments are necesssary to assist in adjusting the total national acreage of upland cotton to desirable goals. Land diversion payments would be made to producers who devote cropland to approved conservation uses in accordance with land diversion contracts entered into by the Secretary;

(10) Authorize the Secretary to make payments available to producers who forgo obtaining a loan, who forgo receiving deficiency payments, who do not plant upland cotton for harvest in excess of the farm acreage base reduced by one-half of any acreage required to be diverted from production, and who otherwise comply with the provisions of the bill. Payments would be made in the form of cotton owned by the CCC, subject to availability, and would be in amounts equal to the loan payment rate (the amount by which the loan rate established for the crop exceeds the level at which loans may be repaid) multiplied by the amount of cotton the producer is otherwise eligible to place under loan; and

(11) Require the Secretary to make available to producers recourse loans on seed cotton using existing authorities under the Commodity Credit Corporation Charter Act.

TITLE VII—RICE

The rice provisions of the bill would—

(1) Require the Secretary of Agriculture to make available to producers of rice loans and purchases. For the 1968 crop, the loan level could not be less than $7.20 per hundredweight. For the 1987 through 1989 crops, the loan level would be the higher of (i) 85 percent of the average price received by producers during the preceding 5 years, with the high and low years excluded, or (ii) $6.50 per hundredweight. The loan and purchase level could not be reduced by more than 5 percent from the level determined for the preceding year's crop;

(2) Require the Secretary to permit the repayment of loans by producers at the lower of (a) the loan rate established for the crop or (b) the higher of (i) 70 percent of the loan rate established for the crop or (ii) the prevailing world market price, as determined by the Secretary;

(3) Require the Secretary to announce the loan and purchase level no later than March 1 of the calendar year for the crop harvested in that calendar year;

(4) Authorize the Secretary to make payments available to producers who agree to forgo obtaining loans in return for such payments. Payments would be made in amounts equal to the loan payment rate multiplied by the amount of rice the producer is otherwise eligible to place under loan. The amount of rice eligible to be placed under loan could not exceed the farm program acreage for the crop multiplied by the farm program payment yield. The loan payment rate would be the amount by which the loan rate established for the crop exceeds the level at which the loan could be repaid;

(5) Require the Secretary to make available deficiency payments to producers for the 1986 through 1989 crops of rice using the same formula as under current law, except that producers would not be required to plant more than 50 percent of their base or permitted acreage in order to qualify for such payments. The target price for rice, for the 1986 through 1989 crops would be not less than $11.90 per hundredweight;

(6) Require prevented planting and reduced yield disaster payments to producers for whom Federal crop insurance is not available in the same manner as for wheat;

(7) Authorize acreage limitation and set-aside programs for rice (with a maximum limitation or set-aside of 35 percent) if needed to protect against overproduction. The Secretary would be required to announce any such rice acreage limitation or set-aside program not later than January 31 of the calendar year in which the crop for which the announcement is made is harvested. The acreage base for any reduction would be, for the 1986 crop, the average acreage planted to rice for harvest in the 2 previous years, for the 1987 crop, the average acreage planted to rice for harvest in the 3 previous years, for the 1988 crop, the average acreage planted to rice for harvest in the 4 previous years, and, for the 1989 crop, the average acreage planted to rice for harvest in the 5 previous years. In no event could the total acreage base for any farm exceed the total acreage of cropland on the farm;

(8) Authorize the Secretary to make land diversion payments, regardless of whether an acreage limitation or set-aside program is in effect, if the Secretary determines that such payments are necessary in adjusting the total national acreage of rice to desirable goals. Land diverson payments would be made to producers who devote cropland to approved conservation uses in accordance with land diversion contracts entered into by the Secretary; and

(9) Authorize the Secretary to make payments available to producers who forgo obtaining a loan, who forgo receiving deficiency payments, who do not plant rice for harvest in excess of the farm acreage base reduced by one-half of any acreage required to be diverted from production, and who otherwise comply with the provisions of the bill. Payments would be made in the form of rice owned by the CCC, subject to availability, and would be in amounts equal to the loan payment rate (the amount by which the loan rate established for the crop exceeds the level at which loans may be repaid) multiplied by the amount of rice the producer is otherwise eligible to place under loan.

TITLE VIII—PEANUTS

The peanut provisions of the bill would—

(1) Require a national poundage quota for peanuts for the 1986 through 1989 marketing years at a level that will meet domestic edible, seed, and related uses for peanuts taking into consideration carry forward of stocks and producer undermarketings, but not less than 1,100,000 tons. The national poundage quota would be apportioned among the States so that each State's poundage quota is equal to the percentage of the national poundage quota allocated to farms in the State for 1985;

(2) Require the establishment of farm poundage quotas for each farm that had a farm poundage quota for the 1985 crop year and for other farms on which peanuts were produced in at least 2 of the 1983 through 1985 crop years. If the national poundage quota is increased for any of the 1987 through 1989 marketing years, the increase in a State's poundage quota apportionment would be allocated equally among all farms on which a poundage quota was established for the marketing year immediately preceding the marketing year for which the allocation is being made and all other farms on which peanuts were produced during at least 2 of the 3 immediately preceding crop years as determined by the Secretary of Agriculture. The farm poundage quota established on a farm during any of the 1986 through 1989 marketing years would be reduced to the extent the Secretary determines that the farm poundage quota was not produced on the farm for any 2 of the 3 marketing years preceding the year for which the determination is being made. The bill would authorize leasing of quota after the normal planting season (fall leasing) only if the quota had been planted on the farm from which the quota is to be leased.

(3) Retain the peanut program's two-tier system of "quota" peanuts (production within a farm's poundage quota) and "additional" peanuts (production in excess of the poundage quota and production from a farm for which no farm poundage quota has been established);

(4) Increase the penalties from 120 percent to 140 percent of the quota loan level for marketing violations by handlers relating to quota peanuts and for failure of handlers to comply with the regulations governing the disposal and handling of additional peanuts. The provision would allow the handling and disposal, including export, of additional peanuts by a handler without physical supervision. The Secretary would be required to require adequate financial guarantees and facilities to assure compliance of handlers to export additional peanuts. Penalties at a rate equal to 140 percent of the quota loan level would be imposed on importers who import additional peanuts in commercial quantities which had been exported from the United States;

(5) Establish the deadline for contracting with handlers for the crushing or export of additional peanuts as August 1;

(6) Continue price support for quota and additional peanuts. For the 1986 crop of quota peanuts, the national average quota support rate would be equal to the 1985 rate, adjusted by the percentage increase in prices paid by producers for commodities and services, interest, taxes, and farm wages between 1981 and 1985. The quota support rate for the 1987 through 1989 crops of peanuts would be the rate for the preceding year adjusted to reflect any change in the national average cost of production, excluding any change in the cost of land, except that the support rate for any year could not be less than the 1985 quota support rate and could not exceed the previous year's level by more than 6 percent.

The support level for additional peanuts would be established at a level the Secretary determines appropriate and must ensure that there will be no losses to the Government;

(7) Require the Secretary to make warehouse storage loans available to designated area marketing associations (except cooperatives engaged in activities with respect to peanuts other than handling CCC price support operations), and to use the associations in administrative and supervisory activities relating to price support and marketing; and

(8) Continue the requirement for establishment of marketing pools. No pools would be established by type except for Valencia peanuts produced in New Mexico. Any distribution of net gains on additional peanuts would first be reduced by any CCC losses on quota peanuts placed under loan. Proceeds due any producer from any pool would be reduced by lossees incurred with respect to peanuts transferred from an additional loan pool to a quota loan pool. Losses in area quota pools, other than certain losses incurred as a result of transfers from additional loan pools to quota loan pools, would be offset by gains or profits from pools in other production areas.

TITLE IX—SOYBEANS

The soybean provisions of the bill would—

(1) Extend the price support program for soybeans through the 1989 marketing year as follows:

(a) Require the price of soybeans to be supported through loans and purchases at a

level equal to 75 percent of the average price received by farmers for soybeans during the preceding 5 years, excluding the high and low years, except that the support price could not be less than $5.02 per bushel; and

(b) Provide that the Secretary of Agriculture may not require participation in any production adjustment program as a condition of eligibility for soybean price support, that soybeans may not be considered an eligible commodity for any reserve program, and that the Secretary may not make payments to farmers to cover the cost of storing soybeans.

TITLE X—SUGAR

The sugar provisions of the bill would—

(1) Require the Secretary of Agriculture to provide price support for the 1986 through 1989 crops of domestically grown sugarcane and sugar beets through nonrecourse loans at not less than 18 cents per pound for raw cane sugar and, for sugar beets, at such level as the Secretary determines to be fair and reasonable in relation to the level of loans for sugarcane; and

(2) Give the Secretary discretion to increase the support prices for sugarcane and sugar beets from the level for the preceding crop based on changes during the 2 immediately preceding crop years in such factors as the cost of sugar products, increased cost of production, and other circumstances that may adversely affect domestic sugar production.

TITLE XI—HONEY

The honey provisions of the bill would—

(1) Require the Secretary of Agriculture to make loans and purchases available for the 1986 through 1989 crops of honey at a level not less than (i) 65.3 cents per pound for the 1986 crop and (ii) the higher of 85 percent of the average price received by farmers during the five preceding marketing years, excluding the high and low years, or 50 cents per pound for the 1987 through 1989 crops. The loan level would not be reduced by more than 5 percent from the level determined for the preceding year;

(2) Authorize the Secretary to permit the repayment of loans by producers at the lower of the loan rate established for the crop or such rate as the Secretary determines will minimize loan forfeitures, will not result in excessive stocks, will reduce Government costs of storing honey, and will maintain the competitiveness of honey in domestic and export markets;

(3) Authorize the Secretary to make payments available to producers who agree to forgo obtaining loans in return for such payments. Payments would be made in amounts equal to the loan payment rate (the amount by which the loan rate established for the crop exceeds the level at which loans may be repaid) multiplied by the amount of honey the producer is eligible to place under loan; and

(4) Make any person who knowingly forfeits adulterated or imported honey placed under loan ineligible for honey loans, purchases, or payments for 3 years after the determination.

TITLE XII—FOOD ASSISTANCE RESERVE

The reserve provisions of the bill would—

(1) Require the Secretary of Agriculture to establish a food assistance reserve of up to 500 million bushels of wheat and feed grains to be used by the Secretary to meet urgent humanitarian needs;

(2) Require that at least 200 million bushels of wheat be included in the reserve to be used to provide emergency food assistance to developing countries at any time that the domestic supply of wheat is so limited that wheat cannot be made available for disposition under Public Law 480, except that 300,000 tons of wheat may be released from this portion of the reserve in any fiscal year without regard to the domestic supply situation for use in providing urgent humanitarian relief in any developing country suffering a major disaster;

(3) Require that at least 100 million bushels of wheat be included in the reserve to be used to provide assistance under section 416 of the Agricultural Act of 1949;

(4) Authorize the Secretary, in connection with the use of stocks in the reserve, to pay for processing, reprocessing, packaging, transporting, handling, and other charges, including the cost of overseas delivery;

(5) Authorize the Secretary to establish or replenish the reserve through purchases from producers or in the market and by designating stocks of wheat and feed grains acquired by the Commodity Credit Corporation; and

(6) Repeal the current authorities for the farmer-owned reserve for wheat and feed grains, the food security wheat reserve, and other reserves.

TITLE XIII—MISCELLANEOUS COMMODITY PROVISIONS

The miscellaneous commodity provisions of the bill would—

(1) Apply payment limitation requirements for the 1986 through 1989 crops as follows:

(a) Extend the $50,000 limitation in current law on the total payments (excluding disaster payments) that a person may receive under any one or more of the annual programs for wheat, feed grains, upland cotton, extra long staple cotton, and rice;

(b) Limit disaster payments to $100,000 for wheat, feed grains, upland cotton, and rice;

(c) Specify that the following would not be subject to the payment limitation:

(i) any gain realized by a producer from repaying a loan for wheat, feed grains, upland cotton, or rice at a level less than the loan level established for the crop;

(ii) deficiency payments for wheat or feed grains received as the result of a reduction of the loan level under the so-called Findley provision;

(iii) loan deficiency payments received for a crop of wheat, feed grains, upland cotton, or rice; and

(iv) inventory reduction payments received for a crop of wheat, feed grains, upland cotton, or rice;

(d) Require an adjustment of any acreage reduction requirement established under a set-aside or acreage limitation program if the Secretary of Agriculture determines that the total amount of payments that would be earned by any person under the program for any crop would be reduced under the payment limitation requirements;

(e) Require that regulations issued by the Secretary on December 18, 1970 be used to determine whether a corporation and its stockholders are different persons for purposes of applying the payment limitation requirements;

(2) Authorize the Secretary to require, whenever a set-aside program is in effect for any of the 1986 through 1989 crops of wheat, feed grains, upland cotton, or rice that producers not exceed the acreage on the farm normally planted to designated crops as reduced by the set-aside or diverted acreage, as a condition of eligibility for program benefits. The Secretary would also be authorized, whenever marketing quotas are in effect for any of the 1987 through 1989 crops of wheat, to require as a condition of eligibility for program benefits for any commodity that the acreage normally planted to crops designated by the Secretary be reduced by an amount equal to the acreage normally planted to wheat minus the individual farm program acreage for wheat;

(3) Extend the provision concerning finality of facts determined by the Secretary relating to the basis for loans, payments, price support operations, or the amount thereof, to the extra long staple cotton program;

(4) Provide that the Secretary shall determine the rate of loans, purchases, and payments under the commodity programs under the Agricultural Act of 1949 without regard to the requirements for notice and other procedures for public participation in rulemaking contained in 5 U.S.C. 553, or in any directive of the Secretary.

(5) Provide that the Commodity Credit Corporation for the 1986 through 1989 crops may not sell any of its stocks of wheat, corn, grain sorghum, barley, oats, and rye, respectively, at less than 115 percent of the current national average loan rate for the commodity, as adjusted, or, if the Secretary permits the repayment of loans made for a crop of the commodity at a rate less than the loan rate established for the crop, at less than 115 percent of the average loan repayment rate which is determined for the crop during the period of the loan;

(6) Authorize the Secretary to make available advance deficiency payments to producers who agree to participate in acreage limitation or set-aside programs for any of the 1986 through 1989 crops of wheat, feed grains, upland cotton, and rice if the Secretary determines that deficiency payments will likely be made available for the commodity. Advance payments would be made available to producers as soon as practicable after the producer files a notice of intention to participate in the program. Payments would be made available in amounts the Secretary determines appropriate to encourage participation in the program except the amount could not exceed an amount determined by multiplying the estimated farm program acreage for the crop by the farm program payment yield for the crop by 50 percent of the projected payment rate. If the deficiency payment is determined to be less than the advance deficiency payment made available to the producer, the producer would be required to refund the difference between the payment advanced and the payment finally determined by the Secretary to be payable to the producer. Producers would also be required to refund advance deficiency payments if the Secretary determined that deficiency payments would not be made available to a producer on a crop. If the Secretary makes land diversions payments to assist in adjusting the total national acreage of each of the 1986 through 1989 crops of wheat, feed grains, upland cotton, or rice to desirable levels, the Secretary would be authorized to make at least 50 percent of the advance payments available to a producer as soon as possible after the producer agrees to undertake the diversion of land in return for the payment;

(7) Extend the special grazing and hay program through the 1989 crop year;

(8) Authorize the Secretary to permit a producer to plant a second crop of a commodity on acreage diverted from production under an annual commodity program if the producer has historically produced crops of

two commodities on the same land in the same year.

TITLE XIV—FOOD STAMPS AND COMMODITY DISTRIBUTION

A. Food stamps

The food stamp provisions of the bill would—

(1) Permit certain publicly operated community health centers to accept food stamps from their residents who are participating in drug addiction or alcoholic treatment programs and make residents of such programs eligible to participate in the Food Stamp Program;

(2) Modify the definition of a disabled person for purposes of the Food Stamp Program to include anyone receiving Federal benefits based on a determination of disability or blindness under criteria substantially similar to the criteria used in the supplemental security income (SSI) program to determine disability or blindness;

(3) Clarify the current regulatory practice of including as income benefits provided to third parties on behalf of households by the Aid to Families with Dependent Children (AFDC) program and by State and local governments, except medical, energy, housing assistance, and child care assistance;

(4) Require educational grants, loans, and scholarships, to the extent they provide assistance beyond that for tuition and mandatory fees, to be counted as income if they are provided in the form of vendor payments;

(5) Provide that food stamp benefits will not be adjusted to reflect a reduction in AFDC or SSI benefits due to receipt of a nonrecurring lump sum payment;

(6) Include allowances, earnings, and payments received under programs authorized by the Job Training Partnership Act as income for the Food Stamp Program;

(7) Exclude from income at State option, child support payments that are excluded under AFDC if the State agrees to pay the additional food stamp benefit costs caused by such exclusion;

(8) Clarify that shelter expenses paid by any kind of Low-Income Home Energy Assistance Act payments do not qualify as household expenses for the purpose of calculating the excess shelter expense deduction;

(9) Require retrospective budgeting and monthly reporting for all households with earnings or a recent work history. Prospective budgeting would be used for migrants and households with no earnings and only elderly or disabled adult members. States would have the option of using either prospective or retrospective budgeting and requiring periodic reports for all other types of households;

(10) Exclude from resources the value of a burial plot for each household member;

(11) Authorize States to consider households containing only persons receiving AFDC or SSI benefits as automatically meeting the food stamp income and resource eligibility tests if the gross income of such households does not exceed 130 percent of the poverty level;

(12) Require States to establish employment and training programs for able-bodied food stamp recipients which could include job search training programs, employment experience programs, workfare, or other employment activities. States would be required to place 25 percent of the persons subject to the work requirements in employment and training activities by the end of fiscal year 1987, 35 percent by the end of fiscal year 1988, and 45 percent by the end of fiscal year 1990 and thereafter;

(13) Count all income (instead of a pro rata share) of an ineligible alien as available to his or her household;

(14) Prohibit the charging of sales tax on food purchased with food stamp coupons;

(15) Require (instead of authorize) the Secretary of Agriculture to require the use of alternative methods of food stamp issuance, including electronic benefit transfer, when the Secretary in consultation with the Inspector General of the Department of Agriculture determines that program integrity would be improved by instituting a different method of issuance in an area;

(16) Authorize States, with approval of the Secretary, to use simplified application and benefit determination procedures for households containing members receiving AFDC, SSI or medicaid;

(17) Require State agencies to provide a means of certifying and issuing food stamps to eligible households that do not reside in permanent dwellings or have fixed mailing addresses;

(18) Require all adult members of a household, or one adult member of a household being certified under expedited service procedures, to certify under penalty of perjury the truth of all information on the household's application form and all other reports which the household is required to file;

(19) Require State agencies to verify household size in any case in which household size is questionable and permit State agencies, as well as the Secretary, to establish other factors that must be verified;

(20) Provide that the Secretary, after consulting with the Inspector General may require State agencies to require most households to present photographic identification cards to receive coupons in project areas where the Secretary determines that this practice would be cost effective as well as useful to protect program integrity. State agencies could permit households to comply with this requirement by presenting a photographic identification card used to receive assistance under a welfare or public assistance program;

(21) Permit State agencies to stagger food stamp coupon issuance throughout a month except that no household could go more than 40 days between coupon issuances as a result of changes in scheduling;

(22) Require State agencies to establish and operate fraud detection units in all project areas with 5,000 or more participating households;

(23) Make a retail food store or wholesale food concern that has been disqualified under the Food Stamp Program ineligible to participate in the special supplemental food program for women, infants, and children (WIC) established under section 17 of the Child Nutrition Act. The bill would also authorize information obtained from retail food stores and wholesale food concerns to be used in administration of the WIC program;

(24) Subject retail food stores and wholesale food concerns that are sold during a disqualification period to a civil money penalty and prohibit the buyer of the store or concern from accepting food stamps until the money penalty is fully paid if the buyer had actual or constructive notice of the penalty when the store or concern was sold;

(25) Make all adult household members jointly and severally liable for the value of any overissuance of benefits to the household;

(26) Make State agencies liable for interest on claims assessed against the State by the Secretary after the State agency has exhausted the administrative review process;

(27) Require States to use other means of collection to collect claims arising from intentional program violations which are not collected through cash payment or allotment reduction unless the State agency can demonstrate that other collection methods are not cost effective. Also, State agencies would be allowed to reduce household allotments to collect claims arising from State agencies' errors;

(28) Authorize the intercept of unemployment compensation benefits by State agencies to collect claims arising from a food stamp overissuance caused by an intentional program violation;

(29) Require a retail food store, wholesale food concern, or State agency, to show that it is likely to prevail on the merits of its case to obtain a judicial stay of an administrative action of the Secretary;

(30) Require the Secretary to set standards for States' periodic review of office hours of operations;

(31) Require States with error rates in excess of 5 percent to pay 75 percent of the dollar value of benefits issued erroneously between 5 and 7 percent and 100 percent of the benefits issued erroneously over 7 percent;

(32) Authorize the Secretary to require special certification procedures in project areas with high payment error rates if such procedures would improve program integrity in a cost-effective manner;

(33) Extend for 4 years the supplemental security income cash-out demonstration projects;

(34) Authorize the Secretary to conduct a pilot project on the effects of eliminating cash change;

(35) Prohibit funds appropriated under the Food Stamp Act of 1977 to be transferred to the Department of Agriculture's Office of the Inspector General or Office of the General Counsel;

(36) Delete the requirement that Puerto Rico provide noncash benefits beginning October 1, 1985, under its food assistance block grant. The date by which the Commonwealth must submit its plan describing the provision of assistance would be moved from July 1 to April 1 of the prior fiscal year. Also, the requirement that the Commonwealth designate a single agency as responsible for the supervision of program administration would be deleted to allow different agencies to be responsible for different phases of the nutrition assistance program.

B. Commodity distribution

The commodity distribution provisions of the bill would—

(1) Permit transfer of perishable agricultural commodities purchased under section 32 of Public Law 74-320 from a public or private nonprofit organization that receives these commodities to another such organization that agrees to use the commodities in providing nutrition assistance to individuals in low-income groups without cost or waste;

(2) Extend through September 30, 1989, the Commodity Distribution Program under section 4 of the Agriculture and Consumer Protection Act of 1973;

(3) Extend through September 30, 1989, the Commodity Supplemental Food Program under section 5(a) of the Agriculture and Consumer Protection Act of 1973;

(4) Make section 32 commodities available for Temporary Emergency Food Assistance Program (TEFAP) distribution in addition to the price-support commodities already distributed. The bill also requires States to encourage distribution of TEFAP commodities in rural areas; and

(5) Extend the Temporary Emergency Food Assistance Program for 2 years and authorize appropriations of $50 million for payment of storage and distribution costs of States and local operating agencies with a requirement that States must match these Federal funds.

TITLE XV—AGRICULTURAL RESEARCH, EXTENSION, AND TEACHING

Title XV makes a number of amendments to the National Agricultural Research, Extension, and Teaching Policy Act of 1977 and related statutes. These amendments would—

(1) Amend the findings in the 1977 Act to specifically recognize that the agricultural system of the United States is increasingly dependent on science and technology, and that the system requires a constant supply of expertise in food and agricultural sciences;

(2) Designate the Department of Agriculture as the lead agency for establishing appropriate controls with respect to the development and use of the application of biotechnology to agriculture;

(3) Extend the terms of the Joint Council on Food and Agriculture Sciences and the National Agricultural Research and Extension Users Advisory Board through September 30, 1989;

(4) Add research to develop new and alternative industrial uses for agricultural crops and research to reduce farm input costs to the high priority research areas specifically identified for competitive research grants under section 2(b) of the Act of August 4, 1965. The authorization for appropriations for competitive research grants would be extended at a level of $70 million for each of the fiscal years 1986 through 1989. In addition, panels created for the purpose of reviewing grant proposals would be exempted from the Federal Advisory Committee Act;

(5) Revise the Act of July 22, 1963 (Research Facilities Act) by deleting the formula for allocation of funds, authorizing facilities grants to be made subject to a matching requirement, and extending the authorization of appropriations at the current level of $31 million for each of the fiscal years 1986 through 1989;

(6) Extend the authorization of appropriations for grants and fellowship for food and agricultural sciences education at the current level of $50 million for each of the fiscal years 1986 through 1989;

(7) Extend the term of the Animal Health Science Research Advisory Board through September 30, 1989, extend the authorization for appropriations for continuing animal health and disease research programs at the current level of $25 million annually through September 30, 1989, and extend the authorization for appropriations for research on specific national or regional animal health or disease problems at the current level of $35 million annually through September 30, 1989.

(8) Extend the authorization for appropriations for certain agricultural research programs at the current level of $890 million for each of the fiscal years 1986 through 1989, extend the authorization for appropriations for agricultural research at State agricultural experiment stations at a level of $300 million for each of the fiscal years 1986 through 1989, and consolidate and extend the authorization for appropriations for all extension and related programs administered by or funded through the Extension Service at a level of $380 million for each of the fiscal years 1986 through 1989;

(9) Authorize the Secretary of Agriculture to use a cooperative agreement as the legal instrument reflecting a relationship between the Secretary and any other party when such agreement would further an objective of each of such parties in an agricultural research, extension or teaching activity, including statistical reporting, and all such parties will contribute resources to the accomplishment of the objectives;

(10) Authorize the Secretary to enter into a cooperative agreement with a private agency, organization, or individual to share the cost, on a 50-50 matching fund basis, of a research project or to allow the use of a Federal facility or service on a cost-sharing or cost-reimbursable basis to develop new agricultural technology to further a research program of the Secretary; authorize not more than $3 million of the funds appropriated to the Agricultural Research Service for each of the fiscal years 1986 through 1989 to carry out this program;

(11) Extend the authorization for appropriations for aquaculture assistance at the current level of $7.5 million for each of the fiscal years 1986 through 1989;

(12) Extend the term of the Rangeland Research Advisory Board through September 30, 1989 and extend the authorization for appropriations for rangeland research at the current level of $10 million annually through September 30, 1989;

(13) Include the acquisition and improvement of agricultural libraries as a permissible use of research facilities grants to 1890 land-grant colleges and Tuskegee Institute; and extend the authorization for appropriations for grants to upgrade 1890 land-grant colleges and Tuskegee Institute at the currentl level of $10 million for each of the fiscal years 1986 through 1989;

(14) Require the Secretary to increase and intensify research programs that are directed at developing technology to overcome barriers to expanded sales of U.S. agricultural commodities in foreign markets;

(15) Provide for the establishment of a new program of agricultural productivity research;

(16) Require the Secretary to conduct assessments of existing information concerning dietary calcium, and dietary and blood cholesterol, and to propose protocols and plans for needed studies in such areas; and

(17) Require the Secretary to submit to appropriate congressional committees a comprehensive plan for implementing a national food and human nutrition research program, and an annual report on the human nutrition research activities conducted by the Secretary.

TITLE XVI—CONSERVATION

A. Highly erodible land conservation

The provisions of the bill relating to highly erodible land would—

(1) Provide that any person who produces an agricultural commodity on highly erodible land (defined as class IIIe, IVe, VI, VII, or VIII land) in any crop year would be ineligible, as to any commodity produced by that person during that crop year, for—

(a) agricultural price support or payments made available under any Federal law;

(b) Commodity Credit Corporation loans for the construction or purchase of farm storage facilities;

(c) Federal crop insurance and disaster payments; and

(d) new Farmers Home Administration loans, if the loan proceeds will be used for activity contributing to excessive erosion of highly erodible land.

In addition, the person would not be eligible to receive any payments for the storage of commodities owned by the Commodity Credit Corporation.

(2) Provide that the ineligibility provisions cited above would not apply to any person who produces a crop of an agricultural commodity on highly erodible land—

(a) that was cultivated in any of the last 5 years (except that, beginning in crop year 1988, or 2 years after the land is mapped for purposes of soil classification, the crop would have to be produced using an appropriate conservation system in order to be eligible for price support and other Federal benefits);

(b) that was planted before the date of enactment of the bill;

(c) that was planted during any crop year beginning before the date of enactment of the bill;

(d) using a conservation system approved by a soil conservation district or, in areas where soil conservation districts do not exist, by the Secretary of Agriculture; or

(e) in reliance on a determination made by the Soil Conservation Service that such land was not highly erodible.

(3) Require the Secretary, as soon as is practicable, to complete soil surveys on those private lands not classified as to land capability, concentrating, insofar as is possible, on those localities where significant amounts of highly erodible land are being converted to agricultural production.

(4) Provide that in administering this program, the Secretary must—

(a) use the services of the local, county, and State Agricultural Stabilization and Conservation committees;

(b) Establish appeal procedures under which persons may seek review of the classification of land as highly erodible and under which persons adversely affected by determinations made under this program may seek review of such determinations; and

(c) not later than 180 days after the date of enactment, issue any regulations necessary to implement this program, including regulations that define the term "person," determine program ineligibility, and protect the program interests of tenants and sharecroppers.

B. Wetland conservation

The wetland provisions of the bill would—

(1) Provide that any person who produces an agricultural commodity on wetland (defined as hydric soil, or soil inundated or saturated with water, that supports the growth and regeneration of hydrophytic vegetation) that has been drained, filled, or dredged to reduce the flow of water to make the land suitable for agricultural production in any crop year shall be ineligible, as to any commodity produced by that person during that crop year, for—

(a) agricultural price support or payments made available under any Federal law;

(b) Commodity Credit Corporation loans for the construction or purchase of farm storage facilities;

(c) Federal crop insurance and disaster payments; and

(d) new Farmer's Home Administration loans, if the loan proceeds will be used for

activity contributing to the conversion of wetland.

(2) Provide that the ineligibility provisions cited above would not apply to any person who produces a crop of an agricultural commodity on converted wetland—

(a) if the conversion of such wetland was commenced before the date of enactment of the bill; or

(b) if production is possible as the result of a natural condition, such as drought, and is not assisted by any producer action that destroys the natural characteristics of the wetland.

(3) Provide that the ineligibility provisions would also not apply to a person who produces a crop of an agricultural commodity on land converted to artificial wetland (in an area that was not wetland) for purposes such as stockwater, fish production, irrigation (including subsurface irrigation, a settling basin, cooling, rice growing, or flood control. The Secretary of Agriculture also has the authority to exempt any person from the ineligibility provisions if that person takes action associated with the production of an agricultural commodity on wetland and the action, individually and in connection with other similar actions authorized by the Secretary in the area, has a minimal impact on the wetland.

(4) Provide that in administering the program the Secretary must—

(a) use the services of the local, county, and State Agricultural Stabilization and Conservation committees;

(b) consult with the Secretary of the Interior in carrying out the program, including the identification of wetlands, the determination of exemptions, and the issuance of regulations;

(c) establish appeal procedures under which persons can seek review of the determination that land is converted wetland and under which persons adversely affected by program determinations may seek review of those determinations; and

(d) not later than 180 days after the date of enactment, issue any regulations needed to implement the program, including regulations that define the term "person," specify program ineligibility, and protect the program interests of tenants and sharecroppers.

C. Conservation acreage reserve

The conservation acreage reserve provisions would—

(1) Establish a conservation acreage reserve program to convert eligible erosion-prone land to less intensive uses (such as pasture, permanent grass or legumes, or trees) and to place this land in the conservation acreage reserve. Eligible erosion-prone land is defined as class IVe, VIe, VII, or VIII land, or as land having an excessive rate of erosion (as determined through the use of the universal soil loss equation and the wind erosion equation) that has been used, or is considered to have been used, to produce an agricultural commodity during at least 2 of the 3 crop years prior to January 1, 1986. While the Secretary of Agriculture has discretion to fix the size of the conservation acreage reserve at a maximum of 30 million acres, the Secretary is required to put at least 10 million acres into the reserve during the 1986 crop year, an additional 10 million acres during the 1987 crop year, and an additional 5 million acres by the close of the 1989 crop year.

(2) Require the Secretary, during crop years 1986 through 1990, to enter into conservation contracts (lasting from 7 to 15 years) with owners and operators of eligible erosion-prone land. Under the contracts, the owners and operators must agree—

(a) to implement an approved conservation plan for converting the land to a less intensive use;

(b) to put the land covered by the contract into the conservation acreage reserve and to establish approved vegetative cover on the land;

(c) not to use the land for agricultural purposes, or conduct any harvesting, grazing, or haying, or make commercial use of the forage or trees on such land, except as permitted in the contract or by the Secretary;

(d) to forfeit all future rental payments and conservation payments and to refund all such payments received, with interest thereon, if the owner or operator violates the contract in such a way as to warrant its termination, or to make refunds of such payments or accept payment adjustments, if the Secretary determines that the contract violation does not warrant contract termination;

(e) upon transfer of the land subject to the contract, to forfeit all future rental payments and conservation payments and to refund all such payments received, with interest thereon, unless the transferee agrees to assume the terms of the contract or enters into a new contract with the Secretary;

(f) not to adopt any practice specified in the contract as a practice that would tend to defeat the purpose of this program; and

(g) to any additional provisions that the Secretary believes is desirable to carry out the program or to facilitate its administration.

(3) Require the conservation plan to set forth—

(a) the conservation measures and practices to be installed on the land subject to the contract; and

(b) the commercial use, if any, to be made of the land during the term of the contract.

(4) Require a portion of the conservation contracts to be entered into with owners and operators who agree to plant trees as the vegetative cover. To the extent practicable, in areas prone to wind erosion, at least 10 percent of the acreage under conservation contract must be devoted to shelterbelts, but no more acreage may be devoted to this purpose than is consistent with effective wind erosion control.

(5) Authorize the Secretary, on a yearly basis, to designate a State, or part of a State, as an area in which the haying or grazing of conservation acreage may be permitted. Specific decisions to permit such activity will be made on a contract by contract basis, subject to such terms and conditions as the Secretary may prescribe, except that haying and grazing may be permitted only during the 6 principal nongrowing months.

(6) Provide that in return for the agreement of the owners and operators, the Secretary must agree to—

(a) share the cost of the conservation measures and practices set forth in the contract that the Secretary determines are appropriate and in the public interest;

(b) pay a rental fee in an amount necessary to induce the placement of erosion-prone land into the conservation reserve and obtain the retirement of cropland base and allotment history; and

(c) provide conservation technical assistance in carrying out the contract.

(7) Provide that the amounts of rental payments payable to owners and operators may be determined through the submission of bids or such other means as the Secretary deems appropriate. The Secretary must give priority to those offers that, on the basis of all relevant factors, result in the lowest cost to the Government. The relevant factors include—

(a) the amount of rent needed to bring land into this program;

(b) the productivity and extent of erosion on the land subject to the contract;

(c) the number of eligible acres removed from production each year;

(d) the amount of funding for the program;

(e) the extent to which erosion-prone land may contribute to off-site damages; and

(f) the potential benefits to wildlife.

The Secretary may establish different criteria for the acceptance of contract offers for land located in various States and regions of the country.

(8) Provide that rental payments may be made in cash or in in-kind commodities. If in-kind payments are made—

(a) they must be made in the commodity normally produced on the land; and

(b) they must be made by delivery of the commodity within the county where the land is located or at such other point as is mutually agreeable; by the transfer of negotiable warehouse receipts, or by any other appropriate method.

(9) Authorize the Secretary to pay rental payments in cash if insufficient quantities of commodities are available from which to make payments and to make both rental and conservation payments in advance of compliance with the conservation contract. The total amount of rental payments, however, may not exceed $50,000 per owner or operator for each fiscal year; this limitation, however, is separate from and not related to the payment limitation applicable to the annual commodity programs under the Agricultural Act of 1949.

(10) Authorize the Secretary to modify or terminate a contract if the owner or operator agrees to the modification or termination and the Secretary determines that the modification or termination is in the public interest.

(11) Authorize the Secretary to modify or waive contract terms to permit the production of agricultural commodities on land covered by conservation reserve contracts, subject to such conditions as the Secretary finds are appropriate.

(12) Provide that, in carrying out this program, the Secretary—

(a) must reduce the owner's or operator's program acreage base by the amount of the acreage placed under the conservation reserve contract;

(b) must use the Commodity Credit Corporation (CCC), except that, beginning in fiscal year 1988, the Corporation must receive funds appropriated to carry out this program in advance of any CCC expenditures for the program;

(c) must issue regulations implementing the program within 180 days after the authorizing legislation is enacted;

(d) must provide safeguards to protect the program interests of tenants and sharecroppers;

(e) must consult with Federal and State fish and wildlife agencies, land-grant colleges, conservation districts, and other water management and conservation groups, and

(f) may use the services of a number of land grant colleges and related Federal, State, and local agencies in carrying out the program.

D. Other conservation provisions

Other conservation provisions of the bill would—

(1) Authorize the Secretary of Agriculture to purchase conservation easements on certain highly erodible land and wetland that has been used as security for Farmers Home Administration loans. If the FmHA borrower is unable to repay the loan, the land in question has been cultivated for row crops in each of the last 3 years, and the land is suitable for conservation purposes, the Secretary may forgive all or a portion of the FmHA debt in return for a conservation easement, at least 50 years in length, on all or part of the land pledged as security for the FmHA debt. The person granting the easement would be required to maintain specified conservation practices and to permit certain recreational and wildlife uses of the land for the life of the easement in return for the foregiveness of the debt. The forgiveness of the debt would not be counted as income to the debtor for Federal income tax purposes.

(2) Promote energy and water conservation through dry land farming in the administration of the Soil Conservation and Domestic Allotment Act.

(3) Provide that soil conservation payments or grants in aid under the Agricultural Conservation Program must be used in accordance with approved soil conservation plans.

(4) Extend the Soil and Water Resources Conservation Act of 1977 and provide for updating the data every 10 years that is used in the appraisal of soil and water resources.

(5) Express the sense of Congress concerning the value of the Soil Conservation Service and urging that funding for necessary Soil Conservation Service programs be continued.

(6) Require the Secretary to implement a program for the amortization of delinquent Farmers Home Administration loans, using revenue generated from softwood timber crops planted on land previously used for crop production or pasture and pledge as security for the delinquent loan. Repayment of the reamortized loan must be made within 50 years; with the interest rate set by the Secretary. To be eligible for the program, the FmHA borrower must place at least 50 acres of eligible land in softwood timber production, the eligible land may have no liens, other than the FmHA lien, against it, and the indebtedness against such eligible land cannot exceed $1,000 per acre. The Secretary may also make loans to finance the planting of the softwood timber, but not in excess of $100,000 to any one borrower.

TITLE XVII—AGRICULTURAL CREDIT

The agricultural credit provisions of the bill would—

(1) Consolidate the authorizations for the FmHA farm ownership and farm operating loan programs into one authorization, with an amount of $4 billion authorized annually for these programs for fiscal year 1986, fiscal year 1987, and fiscal year 1988. These authorizations would be apportioned between insured loans and guaranteed loans as follows:

(a) Fiscal year 1986—$2 billion would be designated for insured loans and $2 billion for guaranteed loans.

(b) Fiscal year 1987—$1.5 billion would be designated for insured loans and $2.5 billion for guaranteed loans.

(c) Fiscal year 1988—$1 billion would be designated for insured loans and $3 billion for guaranteed loans.

In each of the 3 fiscal years, the Secretary is authorized to transfer up to 25 percent of the funds designated for guaranteed loans to the insured loan program.

(2) Encourage use of the crop insurance program by restricting access to the emergency disaster loan program—

(a) to eligible producers who have suffered physical losses; and

(b) to eligible producers who do not have access to Federal Crop Insurance for the crop in question.

Any eligible producer who suffers a qualifying loss on annual crops planted before the date of enactment of the bill, however, would have access to the emergency disaster loan program.

(3) Establish a 3-year interest rate buydown program for FmHA guaranteed loans, to be funded at $490 million over 3 fiscal years. The duration of the interest rate buydown on an individual loan would be for the term of the loan, or for three years, whichever is shorter. An individual guaranteed loan borrower would be eligible for up to a 2 percent Federal interest rate buy-down if—

(a) the borrower can meet the 100 percent cashflow test that is currently being used by FmHA;

(b) the lending institution matches the Federal interest rate buy-down with at least an equal reduction in the borrower's interest rate;

(c) the borrower is otherwise unable to make his loan payments in a timely manner; and

(d) the loan guarantee is necessary for the borrower to obtain credit.

(4) Authorize the compromise, adjustment, reduction, or charge-off of claims and the release of security instruments and agreements entered into or administered by the Farmers Home Administration to carry out the Act. Borrowers or others obligated on a debt could also be released from personal liability with or without the payment of any consideration at the time of the compromise, adjustment, reduction or charge-off of the claim.

(5) Require that a loan applicant or borrower who is directly and adversely affected by a decision of the Secretary be given—

(a) written notice of the decision within 10 days of the date of the decision, an opportunity for an informal meeting, an opportunity for a hearing, and the procedures to be used to appeal the decision;

(b) a reasonable opporunity to inspect and reproduce the applicant's or borrower's personal file maintained by the Secretary; and

(c) the right to be represented by an attorney or nonattorney at any file inspection, informal meeting, or hearing. The Secretary may charge the applicant or borrower for reasonable costs incurred in reproducing files.

(6) Provide for the sale or lease of farmland held in FmHA inventory as follows:

(a) To the extent practicable, farmland would be sold or leased to operators of not larger than family-size farms. The Secretary must advertise the availability of such land in at least one local newspaper and post an announcement of the availability of such land in the FmHA county office. If such land could not be sold or leased to family-size farmers, it could be disposed of under the provisions in current law.

(b)(i) The Secretary may sell farmland through installment sales or similar devices. The Secretary may subsequently sell any such installment sale or other contract.

(ii) The Secretary may also enter into lease with option to purchase agreements with farm operators. Such lease agreements must be made on a fair and equitable basis. In leasing such land, the Secretary must give special consideration to the previous owner or operator, if the person has the resources and skills to succeed in the proposed farming operation.

(c) The Secretary must offer to sell the farmland at a price that reflects the average annual income that could be generated from farming the land.

(d) If two or more persons are qualified to purchase a given tract of land, the FmHA county committee will select the person who will be allowed to make the purchase.

(e) If any tract of farmland in the FmHA inventory is too large to be used in a family farm operation, the Secretary must subdivide the tract into parcels suitable for farming by family farmers.

(f) If any of the farmland in the FmHA inventory is highly erodible land, as defined in the "Sodbuster" portion of the bill, the Secretary may require as a condition of sale or lease, that specified conservation practices be used on such land.

(7) Require that the Secretary—

(a) consider recommendations made by a loan applicant or borrower concerning the technical design and choice of materials to be used in the construction of water and waste disposal facilities and give the applicant or borrower a comprehensive justification when such design or materials are not used in the facility;

(b) conducts a study of the practicality and cost effectiveness of making loans and grants for the construction of rural water and waste disposal facilities at individual locations, rather than central or community locations, and report the results to the House and Senate agriculture committees;

(c) with regard to an application for a loan or loan guarantee—

(i) approve or disapprove an application, and notify the applicant of the Secretary's action, including any reasons for disapproval, within 90 days after receipt of a complete application; and

(ii) if the application is incomplete when it is received, inform the applicant of the reasons for its incompleteness within 20 days after receipt;

(d) make the proceeds of an insured loan available within 15 days of the date the loan is approved or within 15 days of the date that sufficient funds become available to the Secretary for such loans, unless the loan applicant agrees to a longer period;

(e) decide whether a lender should be designated as an approved lender under the Department's approved lender program within 15 days of the receipt of a complete application; and

(f) make personnel and resources available in sufficient quantities to expeditiously process FmHA loan applications submitted by farmers and ranchers.

(8) Authorize FmHA insured loan borrowers to—

(a) transfer their loan accounts, on a one-time basis and with the approval of the head of the FmHA State office, to an FmHA county office in an adjacent county; and

(b) make prospective loan payments—

(i) from proceeds generated from the leasing of mineral rights in real property used to secure an FmHA loan, and

(ii) from proceeds generated from the sale of minerals severed from real property used to secure an FmHA loan if the minerals had

not been used as security for the loan and the loan security is otherwise adequate.

The provision for prospective loan payments will not apply to any loan subject to foreclosure or liquidation proceedings on the date of enactment of the bill.

(9) Clarify that the Secretary can sell notes from the Agricultural credit Insurance Fund and the Rural Development Insurance Fund on a nonrecourse basis. All such notes sold from the Agricultural Credit Insurance Fund must have been held in that fund for at least 4 years.

(10) Authorize the use of a portion of the proceeds from an operating loan made to a limited-resource borrower to pay for training in the keeping of farm and ranch business records.

(11) Require a study of the administrative appeals procedure used under the FmHA farm loan programs and a report of the results of such study be made to the House and Senate Agriculture committees by September 1, 1986.

(12) Require a study of the appropriateness of the Farm and Home Plan used by FmHA in the administration of its farm and ranch lending program and a report of the results of such study be made to the House and Senate Agricultural committees not later than 120 days after enactment of the bill.

(13) Require the release of funds from normal income security in amounts sufficient to pay the borrower's essential household and farm operating expenses, until such time as the Secretary determines that the underlying loan should be liquidated.

(14) Require that a detailed annual loan summary statement be issued to any insured loan borrower who requests such a statement.

TITLE XVIII—AGRICULTURAL MARKETING

Subtitle A—Pork Promotion, Research, and Consumer Information

Subtitle A of Title XVIII establishes a new program of promotion, research, and consumer information designed to strengthen the position of the pork industry in the marketplace and to maintain, develop, and expand markets for pork and pork products. Subtitle A of Title XVIII would—

(1) Declare findings of Congress concerning the value of pork and pork products to the human diet; the role of pork production in the U.S. economy; the need to market pork and pork products to ensure adequate nourishment; the importance of maintaining, expanding, and developing markets for pork and pork products; the movement of pork and pork products in interstate and foreign commerce; and the replacement of domestic pork with imported pork in normal trade channels;

(2) Declare the purpose of the subtitle to be that of authorizing assessments for promotion, research, and consumer information to strengthen the pork industry in the marketplace and maintain, develop, and expand markets for pork and pork products;

(3) Require the Secretary of Agriculture to issue and amend orders applicable to persons engaged in the production and sale of porcine animals, pork, and pork products in the United States and the importation of such animals and products into the United States;

(4) Require the Secretary to issue an order, after giving notice and an opportunity for public comment on a proposed order, if the order would assist in carrying out the subtitle;

(5) Require that the order provide for the establishment and appointment by the Secretary of a National Pork Producers Delegate Body consisting of producers, appointed by the Secretary from nominees submitted by State associations, and of importers. States that have State associations that do not submit nominations or that do not have a State association would submit nominees in a manner prescribed by the Secretary. The number of producer members appointed to the Delegate Body from each State would equal two members, and additional members, determined by using an allocation formula based on porcine animals marketed from the State in calendar year 1986 and based on net assessments collected in such State in subsequent calendar years. The number of importer members would be determined on the basis of importations of porcine animals, pork, or pork products in calendar year 1986 and assessments collected from importers in subsequent calendar years. Pork producer and importer members of the Delegate Body would be authorized to cast a number of votes determined on the basis of specified formulas. Members of the Delegate Body would serve for a 1-year term and would serve without compensation but could be reimbursed for transportation expenses. The Delegate Body would nominate not less than 17 members of the National Pork Producer Directors for the first year and not less than one and one-half persons (rounded up to the nearest person) thereafter from among the Directors for each vacancy on the National Pork Board that requires nominations for appointment to the Board;

(6) Require that the order provide for the establishment and appointment by the Secretary of a body to be known as the National Pork Producer Directors to serve as a liaison between the State pork producer associations and the Board and to consult with the Board on policy matters. The Directors would consist of one pork producer member from each State with one additional producer member from each State from which 11 million or more porcine animals were marketed during a year. One importer member, selected in a manner prescribed by the Secretary, would serve on the Board. Directors would serve for 3-year terms, and would serve without compensation but could be reimbursed for transportation expenses;

(7) Require the order to provide for the establishment and appointment by the Secretary of a National Pork Board consisting of 11 pork producers nominated from members of the Directors and appointed by the Secretary. Members of the Board would serve for 3-year terms, and would serve without compensation but would be reimbursed for reasonable expenses. The Board would develop pork promotion, research, and consumer information plans and projects; submit the plans and projects to the Secretary for approval; administer orders issued by the Secretary; prescribe rules necessary to carry out orders; receive, investigate, and report to the Secretary complaints of violations of orders; make recommendations to the Secretary concerning amendments to the orders; and employ a staff and conduct routine business. The Board would be required to prepare and submit, for the approval of the Secretary, a budget for each fiscal year of anticipated expenses and disbursements of the Board in the administration of the order, including the projected cost of any promotion, research or consumer information plan or project to be conducted by the Board directly or by way of contract or agreement, and the budget, plans or projects for which the State associations and National Pork Producers Council are to receive funds. These budgets, plans, or projects would become effective on the approval of the Secretary. The Board, with the approval of the Secretary, would be authorized to enter into contracts or agreements for the development and conduct of activities authorized under an order and for the payment of the costs thereof through assessments;

(8) Require that no later than 30 days after the Board is established, an assessment be paid by each producer for each porcine animal produced in the United States that is sold or slaughtered for sale, and by each importer for each porcine animal, pork, or pork product imported into the United States. A person would not be required to pay an assessment if the person proves to the Board that an assessment was previously paid by a person for a porcine animal of the same category. The initial rate of assessment would be 0.25 percent of the market value of the porcine animal, pork, or pork product sold or imported or such lesser amount as may be set by the Secretary upon recommendation by the Board. The pork or pork product imported into the United States would be assessed based on the equivalent live value of the porcine animal from which such pork or pork product was produced. The assessment could be increased in increments of 0.1 percent but could not exceed 0.5 percent unless approved in a referendum. The Secretary would have authority to waive the collection of assessments upon selected pork products when the collection would not be practicable. Each State pork producer association would receive an amount of funds from the assessments collected based on a specified formula and would be required to use the funds and the proceeds from the investment of such funds for financing pork promotion, research, and consumer information plans and projects. The National Pork Producers Council would receive 60 percent of the aggregate assessments collected less the amount distributed to the State associations and would use these funds and the proceeds from the investment of such funds for financing pork promotion, research, and consumer information plans and projects. The Board would receive the amount of assessments remaining after the distributions to the State associations and the Producers Council. The Board would use the funds and the proceeds from the investment of such funds, generally, for financing pork promotion, research, and consumer information plans and projects;

(9) Require the Secretary, in determining whether to continue an order then in effect, to conduct a referendum not earlier than 1 and not later than 2 years after the effective date of the initial order among persons who have been producers and importers during a representative period, as determined by the Secretary. A majority of the producers and importers voting must approve the order for it to be continued;

(10) Require the Secretary to terminate or suspend an order if, after the initial referendum, the Secretary determines that an order does not tend to effectuate the declared policy of the subtitle. After the initial referendum, on the request of a number of persons equal to at least 15 percent of persons who have been producers and importers during a representative period, as determined by the Secretary, the Secretary would be required to conduct a referendum to determine whether the producers and importers favor the termination or suspension

of the order. The Secretary would not be required to conduct more than one referendum under this subtitle in a 2-year period.

(11) Authorize a producer or importer to receive a refund of an assessment prior to approval of continuation of the order in a referendum. After approval of the order in a referendum, no refunds would be permitted;

(12) Authorize a person subject to an order to file a petition with the Secretary requesting a modification of or an exemption from the order;

(13) Grant jurisdiction to U.S. District Courts to enforce an order, rule, or regulation issued under the title. A person who willfully violates an order, rule, or regulation issued by the Secretary under this title may be assessed a civil penalty of not more than $1,000 and, in the case of a willful failure to pay, collect, or remit an assessment, an additional penalty equal to the amount of the assessment. The Secretary is also authorized to issue cease and desist orders for violations of an order, rule, or regulation; and

(14) Preempt State regulation of promotion and consumer education involving pork and pork products and obtaining funds from pork producers for such activity and prohibit the State regulation of such activity (other than a regulation or requirement relating to public health or the provision of State or local funds for such activity) that is in addition to or different from this subtitle. This section would apply only during a period beginning on the date of the commencement of the collection of assessments and ending on the date of the termination of the collection of assessments.

Subtitle B—Beef Promotion and Research

Subtitle B of Title XVIII revises the Beef Research and Information Act which provides for financing (through assessments on all cattle sold in the United States and on cattle, beef, and beef products imported into the United States) a program of promotion and research designed to strengthen the position of the beef industry in the marketplace and to maintain and expand markets and uses for beef and beef products. Subtitle B of Title XVIII would—

(1) declare findings of Congress concerning the value of beef and beef products to the human diet; the role of beef production in the economy of the United States; the need to market beef and beef products to ensure adequate nourishment; the importance of maintaining and expanding markets for beef and beef products; the conduct by established State and national organizations of beef promotion, research, and consumer education programs that are invaluable to promote the consumption of beef and beef products; and the movement of beef and beef products in interstate and foreign commerce;

(2) Declare the purpose of the Act to be that of authorizing assessments for promotion and research designed to strengthen the beef industry in the marketplace and to maintain and expand markets and uses for beef and beef products;

(3) Require the Secretary of Agriculture to issue a beef promotion and research order after giving notice of and an opportunity for public comment on a proposed order;

(4) Require that the order provide for the establishment and appointment by the Secretary of a Cattlemen's Beef Promotion and Research Board consisting of producers, appointed by the Secretary from nominees submitted by State livestock or farm organizations, and of importers. States that do not have a State livestock or farm organization would submit nominees in a manner prescribed by the Secretary. The number of producer members appointed to the Board would be determined by using an allocation formula based on the total inventory of cattle in each State. The number of importer members would be determined by converting the volume of imported beef and beef products into an equivalent number of live animals. Members of the Board would serve for a 3-year term and would serve without compensation but would be reimbursed from assessment for reasonable expenses incurred in performing duties as a member of the Board of Beef Promotion Operating Committee. The Board would administer the order; issue regulations; elect members of the Board to serve on the Committee; approve or disapprove budgets submitted by the Committee; receive, investigate, and report to the Secretary on complaints of violations of the order; and recommend to the Secretary any necessary amendments to the order.

(5) Require that the order provide for the establishment of a beef Promotion Operating Committee. The Committee would consist of ten members of the Board, elected by the Board, and ten producers who are directors of qualified State beef councils, elected by a federation that includes as members of the qualified State beef councils. A member of the Committee would serve for a 1-year term, and would serve without compensation but would be reimbursed for reasonable expenses incurred in performing duties as a Committee member. The Committee would develop plans or projects for promotion, advertising, research, consumer information, and industry information which would be paid for with assessments collected by the Board. The Committee would develop and submit a budget of anticipated expenses and disbursements of the Committee to the Board for the approval of the Board. If approved by the Board, the budget would be submitted for approval of the Secretary. No plan, project, or budget would become effective unless approved by the Secretary.

(6) Require that an assessment be paid by each person purchasing cattle from a producer and each person marketing beef directly from cattle produced by that person. An assessment would also be paid by each importer of cattle, beef, or edible beef products. The rate of assessment would be $1 per head of cattle, or in the case of imported beef and edible beef products, the equivalent of $1 per head of cattle, as determined by the Secretary. If a producer is participating in a program of an established qualified State beef council, the producer would receive credit of up to 50 cents per head of cattle in determining the amount of the assessment due from the producer for contributions to the program. The assessments would be used for the payment of expenses incurred in administering the order, and the maintenance of a reasonable reserve.

(7) Require the Secretary, in determining whether to continue the initial order, to conduct a referendum not later than 2 years after the issuance of the order (or any earlier date recommended by the Board) among persons who have been producers or importers during a representative period, as determined by the Secretary. A majority of the producers and importers voting must approve the order for it to be continued.

(8) Require the Secretary, after the initial referendum, on the request of 10 percent of persons who have been producers or importers during a representative period, as determined by the Secretary, to conduct a referendum to determine whether the producers and importers favor the termination or suspension of the order. The Secretary would also be required to terminate or suspend an order if the Secretary finds that the order, or a provision of the order, does not tend to effectuate the declared policy of the Act.

(9) Authorize the Secretary to issue an order to restrain or prevent a person from violating an order and to assess a civil penalty of no more than $5,000 for the violation of an order. Jurisdiction would be granted to United States District Courts to enforce an order, rule, or regulation issued under the Act.

TITLE XIX—GENERAL PROVISIONS

The general provisions of the bill would—

(1) Establish a National Commission on Agricultural Policy to study the structure, procedures, and methods of formulating and administering agricultural policies, programs, and practices of the United States. The Commission would be composed of 15 members appointed by the President from nominations submitted by the Governors of the States. The chairmen and ranking minority members of the House and Senate agriculture committees would be ex officio members of the Commission. The Commission would submit annual reports to the President and Congress and would terminate 4 years after the date of enactment of the bill;

(2) Make several amendments relating to the Agricultural Stabilization and Conservation committees, including authorizing county ASC committees to petition the Secretary of Agriculture to change the number of local administrative areas in the county but not to exceed the number of local areas in the county on December 31, 1980; requiring that the members of the local committees be elected for 3-year terms instead of annually and that the local committees meet once a year and more often at the direction of the county ASC committee with the approval of the State ASC committee; specifying the duties of local committees; and increasing the rate of compensation for county and local committee members by 10 percent from the rate in effect on the date of enactment of the bill;

(3) Authorize $57,067,300 to be appropriated for fiscal year 1986 to carry out the Federal Insecticide, Fungicide, and Rodenticide Act and authorize such sums as are necessary for fiscal year 1987 to carry out such Act;

(4) Amend the Consolidated Farm and Rural Development Act to authorize the Secretary to make grants to nonprofit institutions for the purpose of enabling the institutions to establish and operate rural technology development centers;

(5) Expand the authority of the Secretary to change and collect user fees for the provision of pamphlets, reports, and other publications, to include the provision of software, and electronic publications, and to include all such materials prepared in the Department of Agriculture;

(6) Amend the Virus-Serum-Toxin Act of 1913 to authorize the Secretary to regulate the preparation, sale, and shipment of animal biological products in intrastate commerce and for export, as well as for interstate commerce. A 4-year transition period for intrastate animal biological products is provided. The bill also (i) authorizes the issuance of a special license under an expedited procedure for animal biological products that are designed to meet emer-

gency conditions, limited market, or local situations, (ii) requires the Secretary to exempt from licensing requirements animal biological products prepared for use in the preparer's own animals, prepared by a licensed veterinarian for use in animals under such veterinarian's care, or intended for intrastate distribution in a State that licenses such products and meets certain other criteria, and (iii) makes applicable to animal biologicals the enforcement provisions of the Federal Meat Inspection Act regarding detentions, seizures, and injunctions;

(7) Amend the Poultry Products Inspection Act to require all poultry and poultry products, capable of use as human food that are imported into the United States, to be subject to inspection, sanitary, quality, species verification, and residue standards applied to poultry produced in the United States. The amendment also would require that such imported poultry and poultry products be processed in facilities and under conditions at least equal to those under which similar products are processed in the United States. Any imported poultry article that does not meet the standards would not be permitted entry into the United States; and

(8) Provide that neither the Secretary nor any officer or employee of the Department of Agriculture may (1) use information furnished under provisions of certain specified Acts for a purpose other than the development or reporting of aggregate data in a manner such that the identity of the person who supplied the information is not discernible and is not material to the intended uses of the information, or (2) disclose the information to the public unless the information has been transformed into a statistical or aggregate form that does not allow identification of the person who supplied the information. Persons publishing or publicly releasing the information in any manner prohibited by this section would be subject to criminal penalties.

Mr. HELMS. Mr. President, before I yield to my distinguished colleague, the ranking minority member, for his remarks, let me say that I have never been more honored in my life than to work with this committee in connection with this bill. That does not mean that there was 100 percent harmony. Certainly, there was not 100 percent agreement. But the Agriculture Committee is made up of very fine Senators, colleagues of whom I am very proud and whom I respect very much, and none more than the distinguished ranking minority member, the Senator from Nebraska [Mr. ZORINSKY].

Here is a man of incredible patience and good cheer. Day after day, we have sat together in the markup of this bill. I hold Senator ZORINSKY in the greatest affection, and I express my gratitude to him.

I see the distinguished Senator from Mississippi [Mr. COCHRAN] in the Chamber. What a delight it is to work with him!

I think we are going to have a little fun as we proceed on the farm bill. I imagine that there will be a few disagreements along the line. But we do have a little policy in the committee that we agree to disagree agreeably.

Finally—and I will speak of this at the conclusion of the consideration of the farm bill in some detail—I want to pay my respects to the staff, minority and majority. As a matter of fact, we do not have that sort of arrangement on the Agriculture Committee. Everybody works for everybody, and everybody works together. We have a fine staff, and I am grateful to them for the enormous amount of work and time they have devoted to a piece of legislation that has approximately 2,600 provisions and 20 titles. I do not know whether there is a longer piece of legislation that will go through this body, and I say that in the hope that it will go through.

With that, I yield the floor to my distinguished colleague from Nebraska.

The PRESIDING OFFICER (Mr. SIMPSON). The Senator from Nebraska.

Mr. ZORINSKY. Mr. President, I should like to take this opportunity to indicate that the cooperation of the chairman of the committee, Senator HELMS, has been outstanding throughout the development of S. 1714. He also has been a model of patience during the several months in markup and many deliberations on the Senate farm bill, under extremely difficult conditions. Many times we had difficulty in obtaining quorums. We have arrived at a very fragile coalition, which is the bill before the Senate today.

I thank the chairman for his patience and for his fairness and evenhandedness in conducting the business of the committee throughout the deliberations on the farm bill.

Mr. President, agriculture is of key importance to the economic well-being of the Nation. Each citizen in this country has a stake in the farmer's survival. The price and income protection provided by the farm commodity programs in S. 1714—the 1985 farm bill—are, in the strictest sense, an investment in the continuing ability of the Nation's farmers to meet the food and fiber needs of consumers at home and abroad.

S. 1714 would extend and update a number of the important farm commodity programs; extend the Food for Peace Program under Public Law 480 and provide new authorities designed to increase the export of U.S. agricultural commodities; extend the Food Stamp Program; provide renewed authorizations for agricultural research, extension, and teaching programs; and establish programs to promote soil and water resource conservation efforts.

The commodity price support programs have, over the years, been of great importance in providing farmers with a degree of stability in uncertain markets and protection from prices sliding far below the cost of production.

In general, S. 1714 attempts to maintain income protection for farmers while making U.S. commodities more competitive in United States and foreign markets. In this connection, S. 1714 freezes the target prices for the 4-year life of the bill in the case of corn, $3.03 per bushel, upland cotton, 81 cents for pound, and rice, $11.90 per hundredweight. The bill effects a slightly different freeze of the wheat target price $4.38 per bushel—by establishing two levels of target price protection: $4.55 per bushel on the first 20,000 bushels of production and $4 per bushel on all remaining bushels of production.

Mr. President, S. 1714 is the product of a lengthy and arduous series of discussions, meetings, hearings, debates, and markup sessions. The success or failure of this effort must be judged in the context of what can and cannot be accomplished through Government farm programs.

What is apparent to me and, I think, to a number of my colleagues, is that the problems of agriculture are so pervasive, so complex, and so deep, as to be beyond the scope of any farm bill alone, no matter how well thought out or how well-funded. Neither Congress nor the farm community should look to the 1985 farm bill as a permanent, definitive solution to the long-range problems of agriculture.

For example, the deficit-based strong dollar adds, by some estimates, as much as 50 percent to the cost of our agricultural commodities abroad. Removing this inflated expense will do more to provide long-term relief than any other single action we could take.

Tax laws provide another example of governmental policies that distort and often defeat the direct actions taken by Congress on behalf of agriculture. In the current environment, farming the Tax Code is more profitable than farming the land. Competition from wealthy individuals seeking financially-advantageous investment losses adversely affects producers who must farm at a profit to survive.

Monetary policy provides a third example of nonagricultural policies that affect greatly the profitability of farming. Quite simply, high interest rates combined with low income mean insolvency for many farmers.

Thus, as we begin debate on the 1985 farm bill, it must be recognized that the ability of S. 1714 to cure all that ails agriculture today is limited.

AGRICULTURE AND THE ECONOMY

Agriculture is our Nation's most vital industry.

The export of agricultural commodities represents the largest positive share of our balance of trade.

Domestically, agriculture and its related industries are our No. 1 employer, providing the American consumer with a food supply that is as diverse,

as dependable, and as high quality as any in the world. Furthermore, the American consumer spends only about 14 percent of disposable income on food, making our food among the cheapest in the world.

Strategically, we as a nation are insulated from the whims of foreign suppliers when it comes to the acquisition of that most basic of human needs—food. To appreciate the significance of this fact, one has only to remember the oil embargo of 1973 to understand the chaos that would ensue if we were to be deprived of our capacity to produce food.

Despite the tremendous efficiency and productivity of our family farms, and our Nation's vital dependence on them, our farmers are facing the most wrenching financial crisis since the Great Depression. If this crisis is allowed to continue unabated, our family farm system of agriculture, which has thus far served us exceptionally well, will be permanently altered, to the detriment of us all.

DEVELOPING THE 1985 FARM BILL

Agriculture Committee members brought to the committee table diverse opinions as to how the severe problems facing agriculture should be addressed. Those opinions included the so-called market-oriented approach to commodity programs put forth by the administration, commitments to maintaining net farm income, proposals to reduce commodity surpluses, and concepts aimed at reducing Government expenditures. S. 1714 addresses each of these concerns.

The bill reported by the committee gives the administration what it requested in terms of "market-oriented" commodity loan programs by providing market-based price support loan rates. The administration has contended that the key to the salvation of the agricultural sector lies in our ability to compete in foreign markets, and that to compete, we must reduce the cost of our agricultural commodities in international trade. The administration has further contended that, since loan rates establish a floor for the world price of agricultural commodities, lowering the loan rates to so-called market-clearing levels is essential if we are to retain our present markets and recapture those lost to lower priced foreign producers. S. 1714 does just that.

There are economists who contend that the price of our commodities is inelastic, meaning that sales will not necessarily increase as we reduce our selling price, and that the market-oriented concept is merely a mechanism for reducing budget outlays at the expense of a politically weak farm sector.

I have stated many times, on the floor of the Senate and elsewhere, that the international market in which our agricultural commodities are sold is not a free market system. And I repeat—it is not a free market system.

By some estimates, over 90 percent of the commodities traded in the international market are subsidized by either the buyer or the seller. To compel the American farmer to market his or her production at so-called market-clearing prices in such an international market—without the benefit of a proven and effective safety net—could be damaging to our family farm system of agriculture and could have dire consequences for our national economy, as well.

For these reasons, I support the freeze on target prices contained in S. 1714. With effective target prices, we can maintain a safety net for agricultural producers, thereby enabling them to provide American consumers with the most diverse, highest quality, and cheapest food and fiber in the world.

S. 1714 also contains numerous provisions aimed at reducing commodity surpluses.

First, the conservation reserve provisions and the swampbuster and sodbuster provisions, patterned after my farm bill (S. 1051), will go a long way toward removing marginal land from unneeded production.

Second, the enhanced export provisions contained in the bill should provide further incentives for additional foreign sales as a further means of reducing surpluses.

Third, the wheat provisions of S. 1714, also patterned after language contained in my original bill, would provide for a producer referendum to determine if mandatory production controls should be in effect for the 1987 through 1989 crop years. Such controls, if adopted, would reduce surpluses, improve net farm income for wheat producers, and reduce Government expenditures at the same time.

SUPPLY MANAGEMENT FOR WHEAT

The Nation simply produces more wheat than it can consume or sell abroad. We have proven this year after year after year. This has led to the accumulation of massive Government surpluses, accompanied by plummeting market prices and skyrocketing Government expenditures. Wheat growers, in response to lower market prices, have signed up en masse for Government farm programs. Program participation for the upcoming crop year will likely approach 100 percent.

This increased program participation has led to greater Government expenditures for deficiency payments under income support/target price provisions, increased surplus accumulation through loan foreitures under price support/loan rate provisions, and increased Government expense related to the storage of Government-owned grain and grain in the farmer-owned reserve.

The need for an effective supply management program is overwhelming. The American Farm Bureau Federation reports that current wheat acreage exceeds demand by 34 percent. Some economists predict that if present trends continue, demand for our grain will be severely reduced through the remainder of the century. Given the continuing advances in genetics, hybridization, and biotechnology, as well as a heightened desire by our current purchasers abroad to become more nutritionally self-sufficient, this estimate may be conservative. At any rate, the need for fencerow to fencerow production is absent, at least for the foreseeable future.

If we continue this type of fencerow to fencerow mentality, we will create a boom in production.

In fact another administratively imposed Payment-in-Kind Program—the PIK Program—appears possible, unless legislative action is taken to reduce surpluses in a more orderly manner and with less detrimental effect on agribusinesses.

Conceptually, supply management merely entails bringing production into balance with demand. It is the most fundamental tenet of the marketplace. General Motors does not operate its plants at full capacity when to do so would glut the market and force it to sell units below their cost of production. Yet this is exactly what we force our farmers to do. The absence of effective supply management would bankrupt General Motors just as it is bankrupting our Nation's agricultural producers.

Some have asked why my supply management proposal is limited to wheat. Let me state that I will support the application of supply management to any commodity for which an excessive surplus exists. Of course, some commodities, such as tobacco, are already subject to mandatory supply management programs. However, certain factors affected my decision to limit the proposal to wheat.

First, producer support for mandatory supply management appears strongest among wheat producers.

Second, wheat suffers to a greater degree than some other commodities from price-depressing surpluses and the vagaries of volatile and diminishing export markets.

Third, wheat, unlike other food commodities such as feed grains, is predominantly consumed directly by humans. Therefore, increases in the price of a bushel of wheat are more directly—and more equitably—passed on to consumers. Increasing the price of a bushel of wheat by one dollar increases the price of a loaf of bread by only a few pennies. Americans spend only about 14 percent of their disposable income on food, making our food among the cheapest in the world.

Feed grains, on the other hand, pass through a more complex food chain, and the consumer is more price sensitive with regard to the meat end product. This results in the increased costs of feed grains being absorbed by middlemen, some of whom, such as cattle feeders, are in as weak a financial position as the farmer.

Finally, wheat-growing operations tend to be less diversified than feed grain operations, leaving wheat producers more vulnerable to market fluctuations and less able to weather low grain prices for exended periods of time.

It should be further noted that, because of low prices, approximately 600 million bushels of wheat are being fed annually to livestock. Increased prices will eliminate the use of wheat as livestock feed, thereby increasing the consumption of feed grains.

In my view, a mandatory supply management program for wheat is preferable to a voluntary program. A mandatory program offers tighter management and control, and, in view of the "slippage" in implementation and results that have accompanied voluntary programs, a mandatory program would be more cost-effective.

For the last few years we have been wishing for the law of supply and demand to take effect. I feel the time for wishing is over.

Because mandatory supply management represents a dramatic departure from the current wheat programs, I provided for a producer referendum. In addition, language was adopted in committee that would require a polling of wheat producers as a prerequisite to a referendum vote in 1986. In short, before a referendum is held, more than 50 percent of the producers must favor the holding of a referendum. Sixty percent or more of the producers voting in the referendum must favor mandatory controls before the program would become effecive for the 1987 through the 1989 crops of wheat.

Much of the opposition to supply management comes from entities whose primary interests do not include the return of profitability to agriculture. Many of these entities benefit from full production and cheap grain. I understand their concerns.

But what they need to understand is that Federal farm programs should work to the primary benefit of producers, and that when production agriculture is profitable, the corollary industries that support and are in turn supported by agriculture will be profitable as well. Short-term policies designed to benefit agribusiness are doomed to fail in the long run if the producer cannot make a profit and survive.

Specifically, the bill directs the Secretary to conduct a poll, by mail ballot, of wheat producers to determine whether the producers favor the conduct of a marketing quota referendum for the 1987 through 1989 marketing years for wheat. The Secretary is required to conduct the poll by April 1, 1986. Any producer who produced wheat on a farm during at least one of the 1981 through 1985 crop-years of wheat will be eligible to vote in the referendum.

If more than 50 percent of the producers responding to the poll favor the conduct of a referendum, the Secretary must conduct a referendum, by mail ballot, by August 1, 1986.

For any crop of wheat for which marketing quotas are in effect, the level of price support loans will be not less than $3.55 per bushel. Target prices will be not less than the higher of the national average cost of production per bushel, as determined by the Secretary, or $4.65 per bushel.

WHEAT PROGRAM IN ABSENCE OF MARKETING QUOTAS

For the 1986 crop of wheat and any crop of wheat for which marketing quotas are not in effect, the price support loan rate will be set at not less than $3 per bushel. However, the Secretary can reduce this loan rate by as much as 20 percent if the Secretary determines that the average price of wheat received by producers in the preceding marketing year is not more than 110 percent of the loan level. With the current depressed prices of wheat, it is likely that the Secretary will make this determination. The committee has been informed that the Secretary would not need to reduce the loan rate by the full 20 percent authorized.

For crop years 1987 through 1989—and if marketing quotas are not in effect—the wheat loan rate would be not less than an average of historical prices computed through the use of a formula. Under the bill, the loan rate for wheat in these crop years would be not less than 75 percent, nor more than 85 percent of the average price of wheat during the immediately preceding 5 marketing years, excluding the year in which the average price was the highest and the year in which the price was the lowest during that period. Notwithstanding the formula determination, the loan level could not be reduced by more than 5 percent from the level determined for the preceding crop.

Target prices for the 1986 crop of wheat and for the 1987 through 1989 crops of wheat—if marketing quotas are not in effect—would be set so as to provide additional protection for family-sized wheat farms. Under the bill, the target price of wheat in such cases would be $4.55 per bushel for any portion of the crop that does not exceed 20,000 bushels, and $4 per bushel for any portion of the crop that is more than 20,000 bushels.

FEED GRAIN PROGRAM

The bill provides that the loan rate for corn will be set at $2.40 per bushel for the 1986 crop. Other feed grains would be set at a level that the Secretary determines to be fair and reasonable in relation to the loan rate for corn.

The loan rate for the 1987 through 1989 crops of corn would be set at not less than 75 percent, nor more than 85 percent, of the simple average price received by producers of corn during the immediately preceding 5 marketing years, excluding the year in which the average price was the highest and the year in which the average price was the lowest.

However, as in the case of wheat, the loan rates for feed grains could be reduced using the modified Findley amendment.

(Mr. WARNER assumed the chair.)

Too, in the case of wheat and feed grains, the Secretary would be required to permit producers to repay their price support loans at the lower of, first, the loan rate established for the crop or, second, the higher of, first, 70 percent of the loan rate established for the crop, or second, if the loan level was reduced using the Findley amendment, 70 percent of the loan rate that would have been in effect but for such reduction, or third, the prevailing world market price, as determined by the Secretary.

The target prices for the 1986 through 1989 crops of corn would remain at the 1985 level of $3.03 per bushel.

AGRICULTURAL CREDIT

In developing the agricultural credit provisions of S. 1714, the objective was to make improvements in the Farmers Home Administration [FmHA] loan programs that directly benefit agricultural producers in this country while reducing Federal expenditures.

I believe that the legislation goes far in meeting this objective.

I am particularly pleased that the legislation contains provisions for an interest rate buy-down program. This program, which I will discuss in more detail later, is very important to financially troubled farmers and ranchers. Many agricultural producers currently cannot meet the repayment requirements for guaranteed loans from commercial or cooperative lenders because of inadequate cash-flow and high interest rates. If the rate of interest was reduced, a substantial number of these producers would have adequate income to support repayment of their loans.

The program is additionally important in that it would ensure the continued availability of affordable credit under FmHA programs during the period in which the legislation would place greater reliance on the Guaran-

teed Loan Program, and less on the Direct Loan Program.

CONSOLIDATION AND AUTHORIZATION OF FARM OWNERSHIP AND OPERATING LOAN PROGRAMS

Under the provisions of the bill relating to agricultural credit, the authorization for FmHA farm ownership and farm operating loan programs would be consolidated. And $4 billion would be authorized annually for these programs for fiscal years 1986 through 1988. These authorizations would be apportioned between insured loans and guaranteed loans as follows:

First for fiscal year 1986, $2 billion would be provided for insured loans and $2 billion for guaranteed loans.

Second, for fiscal year 1987, $1.5 billion would be designated for insured loans and $2.5 for guaranteed loans.

Third, for fiscal year 1988, $1 billion would be designated for insured loans and $3 billion for guaranteed loans.

The gradual increase in the Guaranteed Loan Program is the primary source of savings under the legislation.

The Secretary of Agriculture would be authorized to transfer up to 25 percent of the funds designated for guaranteed loans to the Insured Loan Program.

AVAILABILITY OF DIRECT LOANS TO NEW FARMERS HOME ADMINISTRATION BORROWERS

The legislation would ensure eligiblity for insured loans could not be restricted to current borrowers, as the Department of Agriculture had planned to do by regulation. This provision is very important in view of the current agricultural crisis in the United States. If eligibility were to be so restricted at this time, it could have a devastating effect on a large number of our farmers and ranchers who do not qualify for commercial or guaranteed loans because their current cash flow cannot support repayments at the current rates of interest on such loans. If FmHA loans having favorable interest rates are available, a number of these agricultural producers would have a reasonable chance of overcoming economic stress and continuing in business.

INTEREST RATE BUY-DOWN PROGRAM

The legislation also contains a number of other provisions that would help alleviate the financial problems of American agricultural producers, including a program for interest-rate reductions on FmHA guaranteed loans.

The program would require the Secretary of enter into contracts with lending institutions that reduce the interest rate on guaranteed loans for a period not to exceed 3 years. The contract would specify the amount by which the interest rate on such loans would be reduced. The Secretary would pay the lender not more than 50 percent of the cost of making the reduction. Any payment made by the Secretary under the program could not exceed the cost of reducing the annual rate of interest by more than 2 percent.

The interest rate buy-down program would be available only to borrowers who cannot locally obtain sufficient credit under reasonable rates and terms to meet their actual needs. In addition, a borrower would be required to have an estimated cash income for the following 12-month period equal to, or in excess of, the estimated cash expenses to be incurred by the borrower during such period. The program would not, however, be available to a borrower if the borrower could otherwise make payments on the guaranted loan in a timely manner.

The bill would authorize up to $490 million from the agricultural credit insurance fund to be used to carry out the program. This authorization level would permit the Secretary to effectuate an interest-rate reduction of 4 percent for 3 years on approximately $8 billion of loans guaranteed by the FmHA. The program is designed to deal directly with one of the gravest problems facing many agricultural producers today—that is, the problem of high rates of interest on outstanding indebtedness. By reducing the rate of interest on guaranteed loans, the program would provide immediate assistance to thousands of financially troubled farmers and ranchers in the United States.

EMERGENCY LOAN PROGRAM AMENDMENTS

The legislation would make a number of changes in the Emergency Loan Program administered by the Farmers Home Administration. These changes are expected to reduce Federal outlays under the program with no significant adverse effect on agriculture. The provisions would, among other things, repeal the authority for the Secretary to make emergency loans to producers who can receive credit elsewhere and would encourage the use of Federal crop insurance by precluding the making of a loan on the basis of the loss of a crop that could have been covered by such insurance.

The limit on the size of an emergency loan under the program would be reduced to $200,000 for each disaster. Current law provides for similar limits of $500,000. The total amount of indebtedness that a borrower could have outstanding under the program would be reduced to $400,000.

SETTLEMENT OF CLAIMS

Under current law, there is limited authority for the settlement of debt obligations of FmHA borrowers. The legislation would broaden this authority to provide the Secretary with greater flexibility to compromise repayment obligations. This would allow the Secretary and the borrower, prior to any liquidation of the loan, to negotiate what assets the borrower may retain as the result of the liquidation. Currently, a borrower is required to liquidate all property securing the loan until the debt is settled. In some cases, the indebtedness exceeds the value of the collateral, which can result in the borrower remaining liable for substantial loan repayments even after the property securing the loan is liquidated. Under these circumstances, there is little incentive for a borrower to voluntarily liquidate, and often the Government becomes involved in protracted legal proceedings to liquidate the loan.

With the new expanded authority to settle debts, the Secretary would be able to negotiate, on a case-by-case basis, agreements that would allow severely delinquent borrowers to retain some property, including their home, in order that the borrower may make a transition from agriculture to another means of livelihood—thereby permitting FmHA loans to be liquidated in a more timely manner.

RELEASE OF NORMAL INCOME SECURITY

The legislation would also require the Secretary to release from the normal income security for a FmHA loan amounts that are sufficient to enable the borrower to pay essential household and farm operating expenses unless the Secretary determines that the loan should be liquidated. Such security consists of, among other things, crops produced on the farm by the borrower.

When the crops securing the loan are sold, the borrower generally repays the indebtedness. However, the sale of the crops, in some cases, does not generate sufficient proceeds to allow the borrower to repay the loan and have enough money left over to cover necessary living and operating expenses. In such cases, the borrower would be allowed to receive from the proceeds of the sale enough money to meet these essential expenses. The release to the funds would help many farmers to continue their operation and meet essential expenses without undue financial stress.

DISPOSITION AND LEASING OF FARMLAND IN THE INVENTORY OF THE FARMERS HOME ADMINISTRATION

Because of the continuing financial crisis in American agriculture, the Farmers Home Administration has liquidated an increasingly large number of loans, and as a result, the inventory of farms owned by the Farmers Home Administration has vastly increased. Prior to 1981, the Farmers Home Administration had never owned more than 260 farms. By April 1984, the inventory increased to 2,135 farms with 506,642 acres in total. The number of farms in FmHA inventory currently is around 3,000 farms.

The legislation would make a number of important changes in the manner in which such farmland is leased or sold by the Secretary. Included among these are the following:

First, to the extent practicable, the farmland would be first offered for sale or lease to operators of family sized farms.

Second, farmland may be leased, with the option to purchase, to operators of family sized farms.

Third, farmland would be offered for sale at a price that reflects the annual income that may be expected from farming the land.

Fourth, in leasing farmland, the Secretary would be required to give special consideration to a previous owner or operator of the farm if there is a reasonable prospect that such operator will be successful in the proposed farming operation.

Fifth, farmland may be sold through installment sales contracts or similar devises if the interest of the Government in the land is protected.

Sixth, if the farmland is in tracts larger than that necessary for family sized operations, the land would have to be subdivided and sold in units suitable to such operations.

The legislation would help to ensure that family farmers would be given the opportunity to purchase farmland from the Government at affordable prices and that such farmers would not be placed at a disadvantage in competing with large operators or nonfarmers for the purchase of additional farmland.

OTHER CREDIT PROVISIONS BENEFITING FARMERS AND RANCHERS

Several provisions are designed to directly or indirectly assist farmers and ranchers. These include:

First, improved procedures for the prompt processing of loan applications by the Farmers Home Administration.

Second, improved appeals procedures for prompt and fair review of adverse determinations affecting FmHA borrowers.

Third, availability to FmHA borrowers of summary loan statements.

Fourth, authorization for loan funds to be used by the borrower for training in the maintenance of records of farming and ranching operations.

Fifth, authorization for a borrower to make prospective payments on a loan from the proceeds of the lease or sale of mineral rights from real estate that secures the loan.

WATER, WASTE, AND COMMUNITY FACILITIES LOANS AND GRANTS

The legislation would also make certain changes in the Farmers Home Administration's programs that provide loans and grants to rural communities for the purpose of constructing or improving water, waste disposal, and other essential community facilities.

Under current law, eligibility for water and waste facility loans at interest rates not to exceed 5 percent are restricted to communities in which the median family income is below the Federal poverty line. This requirement is very restrictive and precludes the granting of assistance to many communities that need to construct or upgrade facilities to meet applicable health standards but cannot meet repayment terms on loans at higher rates of interest. The bill would address this problem by amending the eligibility requirement for these loans so that communities in which the median family income is below 80 percent of the statewide nonmetropolitan median household income would qualify for such loans. In addition, the bill would provide for loans at rates between 5 and 7 percent for communities in which the median family income does not exceed 100 percent of the statewide standard.

FOOD STAMP AND COMMODITY DISTRIBUTION PROGRAMS

The provisions of S. 1714 involving the Food Stamp Program, the Commodity Distribution Program, and related programs would, according to the estimates of the Congressional Budget Office, save $586 million during fiscal years 1986 through 1989. The savings would result from amendments made to the Food Stamp Act of 1977.

A majority of the provisions that would result in savings would not adversely affect food stamp recipients. A number of the provisions would, in fact, be beneficial to certain eligible low-income households. However, it should be noted that some of the provisions would result in higher costs to the States.

FOOD STAMP PROGRAM SAVINGS

The savings in the food stamp program would be accomplished by:

First, maintaining the Puerto Rico nutritional assistance block grant at the current level of $825 million per fiscal year, estimated 3-year savings of $230 million;

Second, ending the current exclusion from income under the Food Stamp Program of allowances, earnings, and payments under the Job Partnership Training Act, estimated 3-year savings of $163 million;

Third, providing that low-income energy assistance payments must be considered in calculating a food stamp household's excess shelter deduction, estimated 3-year savings of $165 million;

Fourth, authorizing States to collect food stamp overissuances that result from agency-caused errors, estimated 3-year savings of $30 million;

Fifth, modifying the Food Stamp Program error-rate sanction provisions to require States with error rates in excess of 5 percent to repay to the Federal Government the sum of: one, 75 percent of the dollar value of benefits overissued between 5 and 7 percent, and two, 100 percent of the amount overissued in excess of 7 percent, less three, 75 percent of value of any overissued benefits collected by the States that would otherwise be returned to the Federal Government, estimated 3-year savings of $41 million; and

Sixth, prohibiting a household's food stamp allotment from being adjusted to reflect a reduction in AFDC or SSI benefits made as a result of the receipt by such household of a nonrecurring lump-sum payment (estimated 3-year savings of $18 million).

OTHER FOOD STAMP PROGRAM PROVISIONS

The food stamp provisions would make numerous other changes in the program, most of which would have little budgetary impact.

Among other things, the legislation would:

First, prohibit the imposition of State and local sales taxes upon food stamp transactions. Currently, such taxes are imposed in about 17 States. This prohibition would result in the loss of revenue in those States. However, the imposition of sales taxes on food stamp purchases has the effect of reducing food stamp recipients' benefits by the rate of the tax imposed, which may be as high as 6 percent. This prohibition against the imposition of such taxes on food stamp transactions would allow recipients to use the full value of their benefits for food—which is the purpose of the food stamp program;

Second, require States to establish employment and training programs and place in such programs 25 percent of food stamp work registrants by the end of fiscal year 1987, 35 percent of such persons by the end of fiscal year 1988, and 45 percent by the end of fiscal year 1990. To assist States in the implementation of these programs, the Federal Government would allocate to States $40 million for fiscal year 1986, $50 million for fiscal year 1987, $60 million for fiscal year 1988, and $75 million for fiscal year 1989 and would share 50 percent of any additional costs that a State may incur over its allocation. The Congressional Budget Office has estimated that under these levels of funding, the increased 3-year cost to the Federal Government would be $10 million. It should be noted that this requirement may result in higher administrative costs to the States in operating these work and training programs. However, if such programs are successfully operated, savings to the States under other programs, such as AFDC and unemployment compensation, should offset these increased costs;

Third, expand the definition of disabled member to cover anyone receiving a Federal benefit based on a determination of blindness or disability under criteria similar to those used under the Supplemental Security Income Program. Under current law, certain blind or disabled veterans, railroad retirement recipients, and other Federal program beneficiaries are not

covered under the definition of disabled member even though they have the same degree of disability as others who are considered blind or disabled for Food Stamp Program purposes. The expanded definition would ensure that all similarly blind or disabled persons who receive benefits under Federal law would be treated the same under the Food Stamp Program;

Fourth, provide for categorical eligibility under the food stamp program for most AFDC and SSI recipients; and

Fifth, require educational grants, loans, and scholarships, to the extent that they cover more than tuition and mandatory fees, to be counted as income if they are provided in the form of a vendor payment. The costs of required textbooks for courses covered by such grants, loans, and scholarships would not be considered mandatory fees for this purpose; therefore, any portion of a grant, loan, or scholarship paid to an educational institution or other supplier on behalf of a student for required textbooks would be considered income for Food Stamp Program purposes.

There are also a number of provisions in the bill that are intended to reduce fraud and abuse in the program and to provide for greater collections by State agencies of overissued benefits. These provisions should provide for better administration of the program by the States.

COMMODITY DISTRIBUTION PROGRAM

S. 1714 would extend, through fiscal year 1989, the Secretary's authority to purchase commodities for distribution to institutions, commodity supplemental food programs, disaster relief areas, summer camps for needy children, needy families on Indian reservations and in the Trust Territory of the Pacific Islands, and other commodity distribution programs.

COMMODITY SUPPLEMENTAL FOOD PROGRAM

The Commodity Supplemental Food Program would also be extended through fiscal year 1989. This program provides food packages of USDA-purchased commodities to low-income pregnant, breastfeeding, and postpartum women, and infants and children up to 6 years of age. The Commodity Supplemental Food Program currently operates in Nebraska and 11 other States as well as the District of Columbia. In addition, the legislation would extend, through fiscal year 1989, three demonstration food projects for low-income elderly persons.

The Secretary would also be authorized to permit State agencies to serve low-income elderly persons when unused caseload slots are available at any of the Commodity Supplemental Food Program sites.

TEMPORARY EMERGENCY FOOD ASSISTANCE PROGRAM

The legislation would extend the Temporary Emergency Food Assistance Program through fiscal year 1987.

To assist States in meeting the costs of storing and distributing commodities made available to them under the program, Congress appropriated $50 million for fiscal years 1983 and 1984 and $57 million for fiscal year 1985. Under current law, there is no requirement for the States to match the funds provided for this purpose.

Under S. 1714, annual appropriations of $50 million would be authorized. However, beginning January 1, 1986, any funds provided to a State by the Federal Government from the appropriation would be required to be matched dollar for dollar by the State. No in-kind contributions would be counted as satisfying the matching requirement.

OTHER PROVISIONS RELATING TO COMMODITY DISTRIBUTION

The legisation would extend the National Commodity Processing Program through June 30, 1986, and would authorize a public or private nonprofit organization to transfer to another such organization perishable agricultural commodities purchased under section 32 of Public Law 74-320 if the other organization agrees to use the commodities in providing nutrition assistance to low-income individuals without cost or waste.

RESEARCH, EXTENSION, AND TEACHING

A major part of the bill focuses on supporting and improving food and agriculture research, extension, and teaching.

Federal support of the development of agricultural science and technology is a public investment that has paid huge dividends for this Nation and the world; and the development and dissemination of new agricultural technology are fundamental missions of the Department of Agriculture.

Congress has the responsibility of providing the necessary tools by which the Department and the scientific community can meet the agricultural research, extension, and teaching needs of our Nation.

Congress first addressed the needs of the food and agricultural sciences in a unified manner in title 14 of the 1977 farm bill.

The 1985 bill will not make radical changes in the Federal policies and programs established under title 14. The bill will continue—through fiscal year 1991—funding authorizations for agricultural research, extension, and teaching programs provided under title 14, and will update and fine tune the operation of a number of these programs.

The testimony of witnesses from the agricultural research, extension, and teaching community at the farm bill hearings was clear that coordination of agricultural research and education activities could be improved.

The great strength of our decentralized system of agricultural research and education has been that diverse needs can be addressed. Yet, that decentralization can be a weakness if coordination of efforts is lacking.

Also, a better system for communication between the Federal and State research systems, and between the research community and the users of that research, is needed.

To better focus the expenditure of funds and insure greater communication and coordination within the food and agricultural sciences, the bill extends the terms of the Joint Council on Food and Agricultural Sciences and the Users Advisory Board. In addition, the responsibilities of these key panels are more carefully defined, to insure the concentration of research and extension efforts in those areas of greatest national needs.

The bill will strengthen the role of the States in the research, extension, and teaching programs. It also will give the Secretary of Agriculture additional authorities to improve higher education in the food and agricultural sciences.

I am pleased that the bill includes the provisions of my bill to strengthen the rural development and small farm research and extension programs.

CONSERVATION

Perhaps the most significant and far-reaching provisions of the legislation are contained in title XVI of S. 1714, the conservation title.

This year we are marking the 50th anniversary of the soil conservation movement in this country. Therefore, it is particularly appropriate for the 1985 farm bill to include strong conservation provisons.

Since 1935, the Agriculture Department's Soil Conservation Service has worked hand-in-hand with local conservation organizations to boost soil and water conservation, conduct natural resource surveys, and enhance community resource protection.

Years ago, Hugh H. Bennett, the first Chief of the Soil Conservation Service and the father of the soil and water conservation movement, thought soil erosion and water depletion could be corrected and halted in as few as 20 years. Bennett was wrong about that. Despite years of effort by Federal and State governments and local organizations—including 3,000 conservation districts covering more than 2 billion acres—threats to the Nation's soil and water resources remain substantial.

According to the national agricultural lands study, we are losing the equivalent of a million acres of our best cropland each year to erosion. In the 10 Great Plains States, wind erosion alone results in the loss of a quarter million acres of land annually.

Erosion by water and wind reduces productivity on 1 of every 4 acres. Over the next 50 years, production capacity lost to erosion could equal the output of 25 million to 62 million acres of cropland.

The current depressed farm economy compounds these problems. Under today's economic conditions, many farmers simply cannot implement needed conservation measures. In some cases, the only way to correct problems is to remove land from cultivation. Yet that reduces farm income. So one big step we can take to promote conservation is to strengthen the farm economy.

Threats to the Nation's water resources are also well documented. Depletion of groundwater acquifers, saltwater intrusion, pollution, and improper water management are serious national concerns that threaten domestic, agricultural, and industrial water use.

The continued presence of soil and water problems is not an indictment of past conservation efforts. Rather, it dramatically points out the need to strengthen the commitment by local organizations—including the efforts of volunteers—and Government to addressing the problems. We can only imagine the condition of our soil and water resources today had it not been for the tireless work of the Soil Conservation Service and the equally important efforts of its partners in conservation districts throughout the country.

The simple fact is that the existing conservation programs are not sufficient to meet our needs. We continue to lose valuable soil at an alarming rate. Resources that go unprotected today will be unavailable to produce commodities tomorrow.

Farmers are rightfully looking to the 1985 farm bill for help in meeting this challenge. That bill must be oriented to conservation and the Senate Agriculture Committee has taken major steps to see that it will be oriented to conservation.

Working on the conservation section of the farm bill over a 2-week period in July, the Senate Agriculture Committee tentatively approved:

Strong "sodbuster" and "swampbuster" provisions; an extension of the landmark 1977 Soil and Water Resources Conservation Act; a Conservation Reserve Program that would idle 25 million to 30 million acres of erosion-prone cropland for 7 to 15 years.

These conservation measures won broad committee support and were approved mostly on voice votes. Also, in many cases, similar provisions have been adopted by the House as part of its farm bill. That greatly increases the likelihood that the conservation measures will be included in the version of the bill that goes to the President.

Let me explain in more detail what these conservation measures would do.

The sodbuster provision denies Federal subsidies and other Farm Program benefits to those who cultivate highly erodible land—defined by the bill as classes IIIe, IVe, VI, VII, and VIII land—without regard to conservation practices. The Companion Swampbuster Program denies farm benefits to those who drain, fill, or dredge wetlands for cultivation.

Land being farmed prior to enactment of the bill would be exempt from the swampbuster provision. For the sodbuster measure, however, the committee adopted a controversial "cross compliance" provision that severely restricts such grandfathering after 1988.

In short, after 1988, farmers who cultivate highly erodible land without implementing sound conservation practices will be ineligible for any type of price support or other payments made by the Commodity Credit Corporation, farm storage facility loans, crop insurance, disaster payments, and Farmers Home Administration farm loans.

The sodbuster and swampbuster provisions are extremely important to those of us interested in conserving our precious natural resources. Conversion of marginal grassland to cropland is most serious in the Great Plains but it is a problem all over the country. Nationwide, 45 million acres of highly erodible land have already been brought into production and another 247 million acres could be cultivated.

Loss of wetlands takes its toll on wildlife and recreation and is a serious problem in Nebraska. We live in one of the five States in the Nation that have lost more than 90 percent of the natural wetlands, most of it through conversion to cropland. Nationwide, 14.7 million acres of wetlands were destroyed from 1955 to 1975, 80 percent of those wetlands were drained or filled for farm use.

The sodbuster and swampbuster programs are needed for economic reasons as well as for conservation. It is time Government stopped subsidizing the cultivation of land not suitable for farming. It just adds to our surpluses and further depresses commodity prices.

Let me also counter an argument used against these proposals. Neither the swampbuster nor the sodbuster interferes with a farmer's right to use his or her land as he or she chooses. This is not an attempt to dictate farming practices. We are simply saying to farmers, if you want to plow highly erodible land without regard to conservation practices, or if you want to drain and plow wetlands, you will do so without the benefits of Federal agricultural programs.

The conservation reserve, endorsed by the Reagan administration earlier this year, would reimburse farmers—in cash or commodities—for the cost of diverting their most erodible land to conservation uses for extended periods. John Block called the reserve the "largest single soil conservation initiative in the history of American agriculture."

The program would promote the planting of protective grasses and trees on classes IV, VI, VII, or VIII land. Payments to individual farmers would be capped at $50,000. And here is the best news: the cost of the program to the taxpayer will be offset by lower spending on crop loans, subsidies, and other Federal farm programs.

The extension of the Soil and Water Resources Conservation Act requires USDA to update its nationwide appraisal of soil and water resources, along with its comprehensive conservation plan, every 10 years. The comprehensive plan has served an essential purpose and played a significant role in educating the public about natural resource conservation. It will be extremely beneficial to have periodic updates.

We cannot afford to mortgage the future by depleting the resources that our children will rely on for their food, clothes, and livelihoods.

More than a century ago, the great statesman and orator, Daniel Webster, reminded us that cultivating the Earth "is the most important labor of man."

"If there is one lesson in history which is unmistakable," he said, "it is that national strength lies very near the soil."

I am pleased to report that Webster's observations were heeded by the Committee on Agriculture, Nutrition, and Forestry in the drafting of S. 1714. The unprecedented programs established in the bill to reduce erosion and preserve our soil and water deserve the support of each and every Senator in this body.

CONCLUSION

Mr. President, S. 1714 may not be a great farm bill. However, S. 1714 is by no means a disastrous farm bill. S. 1714, in fact, contains many important and significant provisions; the legislation combines new and innovative ideas with tried and proven programs. Of course, not all of the problems that plague agriculture will disappear with the enactment of S. 1714. On the other hand, the problems facing agriculture will be exacerbated if provisions similar to those contained in S. 1714 are not enacted.

Other than the surplus reduction provisions, perhaps the most significant contribution S. 1714 can make to solving our Nation's agricultural crisis is to buy time through the income support provisions of the bill. Time is

51-059 O-87-21 (Pt. 21)

needed to see if the economic theory reflected in market-clearing loan rates is valid. Time is needed to reduce the oppressive surpluses that are smothering commodity prices under a mountain of grain. Time is needed for reducing the value of the dollar, to help our commodities move in world trade. Time is needed to address other factors outside the purview of farm legislation that affect agriculture. Most importantly, time is needed to allow the agricultural economy to work its way out of the excessive debt burden that is strangling so many of our farm operations.

Mr. PRESSLER and Mr. COCHRAN addressed the Chair.

The PRESIDING OFFICER (Mr. McCONNELL). The Senator from Mississippi.

Mr. COCHRAN. Mr. President, I first commend in the most generous way I can the leadership provided to our committee by the chairman, the distinguished Senator from North Carolina, Mr. HELMS, in the development, drafting, and bringing to the floor of the Senate this important legislation. He has been confronted with a lot of controversy in the development of the new farm bill, but he has displayed an inordinate amount of kindness and patience to committee members and has brought an equally large amount of hard work and expertise to the process. Even though there has been a good amount of criticism of this farm bill, it has been subjected to some bad reviews, it represents a lot of hard work and contains some important new provisions and initiatives which I believe are going to make our country and the agriculture economy stronger. I commend Chairman HELMS and the distinguished ranking Democratic member of the committee, Senator ZORINSKY, for their leadership in bringing this bill to the floor.

THE NEED FOR A MARKETING LOAN

Mr. President, when I introduced my farm bill, the Farm and Market Recovery Act of 1985, I pointed out that today U.S. agriculture is confronted with a major dilemma: on one hand, greater income is needed to help the farm economy overcome its acute financial distress but, on the other hand, lower "effective prices" are needed to help prevent the continued erosion of markets, both international and domestic. The problem is lower farm prices will not generate higher incomes, at least not immediately. So, agriculture is caught in a squeeze: after substantial capital investment increases in response to the 1970's world food demand, many farmers today face cash requirements that exceed their incomes.

As exports increased from less than $8 billion in 1970 to over $40 billion in 1981, farm debt increased from $50 billion to over $200 billion. Since 1981, exports have declined almost 25 percent, but farm debt has not declined. Farm debt today is about $215 billion. With normal to high production during the 1980's, except for the PIK and drought year 1983, there is a surplus of commodities and generally lower prices. The net result is a farm income level which is not adequate to service the outstanding debt. An adjustment period is needed either for income to improve to support current investment or for some capital to exit in an orderly way.

The current farm dilemma did not develop in 1 or 2 years and it will not be resolved in a short time. But help is needed immediately to improve the price competitiveness of U.S. agricultural products. Only by being consistently competitive can markets, domestic or international, be developed and maintained.

Because about 40 percent of current U.S. production must be exported, special attention must be given to international markets. Since marketing internationally is subject to less than completely free price competition, farm policy must provide some measure of income stability. For over 50 years the Nonrecourse Price Support Loan Program has been in place for this purpose. However, with the loan program's fixed price floor, U.S. agriculture, operating as a global industry in an imperfect marketing environment, cannot be competitive enough year in and year out to develop and maintain markets.

Many programs have been developed to assist in developing markets for our agricultural products. The Food-for-Peace Program, Public Law 480, has been in operation for many years. We also have several export credit assistance programs to help make U.S. products more competitive. These are good programs, but, with today's global competition and the current high value of the dollar relative to other currencies, U.S. agricultural products are not price competitive. That is, commodity prices are not competitive enough to sell all that farmers are producing.

We might ask, whose fault is it? Or, what can be done? These are good questions and they must be answered, but the answers are complex because the problem is complex. Failure to recognize this relationship results in some unfortunate conclusions about what is good policy.

At this point in the farm problem debate, you usually can separate the arguments into two groups. One argument would suggest the answer is Government control of production to raise prices by reducing supply. These people say farmers could make it if the Government would just raise prices. Even if the Government could increase prices, farmers would have to cut production because there would be even fewer markets for higher priced products than there are markets for products at current prices. Furthermore, after all this was done, there would be no guarantee that additional reductions would not be needed in the future without building walls around the country to keep foreign products out.

The other argument would have you believe that many inefficient farmers are being kept in business by high Federal supports and all we need to do to solve the farm problem is eliminate these programs, if not immediately, at least in a 3- to 4-year period. Many farmers, however, are already out of business. The number of farmers decline each year. This trend has been in place for over 50 years, and it will likely continue. The number of farms has declined from about 6.5 million in the early 1930's to about 2.3 million today.

I believe neither of these arguments are very helpful because they do not fully recognize the true characteristics of agricultural marketing.

U.S. agriculture is now a highly capitalized, global industry. It is directly affected by national monetary and fiscal policy and by international economic and political factors. Farmers, therefore, are affected by many factors over which they have no control. For example, some economic studies report that 30 to 50 percent of the decline in agricultural exports since 1981 is the result of the high dollar exchange rate.

U.S. agriculture has changed with the times, and world agriculture has changed, and changes must be made in Federal farm policy. But the impact of these policy changes cannot and should not be placed totally and solely on the backs of farmers. Benefits of a large, healthy, and competitive agriculture accrue to many people beyond the farm gate. The total agricultural industry accounts for 20 percent of private employment, 25 percent of our trade, and 20 percent of the Nation's gross national product [GNP]. Thus, it is important to the Nation's economy for agriculture to share in and be able to contribute to the economic recovery.

Toward the objective of ensuring the recovery of the agricultural industry, I proposed in S. 843, the farm bill I introduced, the concept of a "marketing loan" in conjunction with a gradual phase in of market-oriented nonrecourse loan levels. Put simply, the marketing loan is a sales oriented program. Above all else, the 1985 farm bill must address in an effective way the immediate need to sell U.S. agricultural products. There is no alternative to developing a sales program as the centerpiece of a new farm policy.

The marketing loan concept was developed out of the belief that, first, U.S. production agriculture is efficient

and competitive, and second, the Nation's economy would benefit more from producing and selling the production each year than from producing and having the Government store the production, or reducing production to avoid Government storage.

Mr. President, the marketing loan effectively addresses the two critical issues today facing U.S. agriculture: First, industry's need to be domestically and internationally price competitive to move large volumes of production, and second, farmers' need for income stability to make the necessary investments to be on the leading edge of efficiency while operating in a volatile global environment.

By allowing the traditional nonrecourse loan to be repaid at market clearing levels, U.S. commodities will be price competitive. Maintaining the traditional nonrecourse loan provides farmers with minimum income protection, but not a profit, as commodity prices fluctuate in response to world market, economic, and political conditions.

The marketing loan is a policy tool that will allow U.S. agriculture to regain the initiative in world markets. It will stop the erosion of U.S. exports caused by the overvalued dollar and let our competitors know that the United States intends to confront openly and aggressively subsidies and other forms of unfair market competition.

The marketing loan is a strong trade and export program. However, it is not an export program only. It does not discriminate between domestic and international markets. Domestic markets will also benefit from competitive price adjustments generated by the marketing loan.

This concept is important because many domestic users of agricultural products are adversely affected by cheap imports. We must not have Federal programs that add to these problems by selling U.S. products to foreign purchasers at lower prices than to domestic purchasers.

Mr. President, I am happy the Agriculture Committee has adopted the marketing loan for the cotton, rice, and honey programs, and included it as an integral part of the wheat and feed grain programs. I urge my colleagues to support these provisions as adopted by the Committee on Agriculture.

Mr. MELCHER. Mr. President, the scope of the farm problem can be measured by the following factors: First, net farm income.

Second, farm indebtedness and its effect on the financial institutions of the farm credit system, the commercial banks that make agricultural loans, and the Farmers Home Administration, that is the lender of last resort for those agricultural producers who are under severe stress.

Third, I believe the next important factor in the scope of the farm program could be measured by the effect on agribusiness, that includes the suppliers to farmers, all of the variety of business interests that do sell supplies to farmers, and to the economy of their own particular business entities.

Fourth, the effect on rural communities must be measured if we are to understand the scope of the farm problem, and the rural communities of this countryside are the very fabric of America.

Fifth, the continuing trend of the mismanagement of agricultural exports with its buildup of surplus commodities which depress prices and further aggravates the farm economy, liquidating more farms, liquidating more businesses and further damaging the entire economy. That is a fifth factor that must be measured if we are going to understand the scope of the farm problems.

Mr. President, there are several key points that must be first described before going into each of the five factors that make up the total scope of the overall farm problem.

Let us talk about target prices first.

Most of the agricultural producers in America do not receive any deficiency payments that are based on target prices. Let me repeat this, Mr. President: target prices are prices that are set by law in this farm bill and other farm bills and says, that is a price that is the minimum for what farmers should receive in order to cover the costs of their production. And that is not anything, in itself, but a statement. That is nothing more than just a statement that there is a target price for wheat, for corn, or the rest of feedgrains or for cotton or for rice, and it is set by law and says this is a price that should be received by the producers of these products.

Target prices also signify the other side of the coin.

When the prices are below that which the farmers receive for their products, then a deficiency payment is made out of U.S. Treasury funds for those individual producers making up the difference.

This is how we arrive at a large part of the costs of the farm program. Target prices and deficiency payments are not to the liking of individual farmers.

First of all, I think it is important that everybody understands that most farmers are not covered by target price programs—only wheat, feed grain, cotton, or rice are. Most of the agriculture producers of this country are not covered or protected by target prices. They produce other goods or they are not in the program. There are certain restrictions if a producer of wheat, feed grains, rice, or cotton wants to be subject to the deficiency payment. That safety net, which is what it is commonly termed, is a safety net for those farmers who wish to be in the program to produce those crops.

But even those that are covered, those four major commodities, those farmers would prefer, very much prefer, to get the market price payment right out in the market, to receive a price for their product right off the marketplace that is at least equal to the cost of production and, therefore, at least as good as what we have set by law as the target price.

Since that situation does not exist, most of these farmers of these crops do get into the program. But, Mr. President, most agriculture producers are not producers that produce these commodities to begin with. Most agriculture producers are not covered by deficiency payments. They are either not in the program or they are not in production of the commodities that are covered in the program.

It is important that we understand that, Mr. President, because when we talk about farmers, we sometimes think along these lines: Every farmer is producing one of these basic crops and, therefore, every farmer has a stake in getting a deficiency payment. But that is not really true. There are livestock producers, whether it is hogs or cattle; there are poultry producers, whether it is chickens or turkeys; there are producers of vegetables; producers of fruit; and, or course, dairy producers, and none of these are directly involved with deficiency payments geared to the target prices that are spoken of so often. But yet they are involved, Mr. President, because they are all wrapped up in agriculture. Let me explain that.

The basis of food production depends upon these basic commodities, particularly grain. Most of the wheat that is produced in the United States and throughout the world actually goes into human consumption. Still some of the wheat goes into the production of livestock or poultry. All of the livestock producers, dairy producers, and poultry producers depend upon the supply of grain for their operation. They could not operate without it. They would not have the same type of food production without it. So they very much want to know what is going to happen to grain producers and if there is assurance that there will be a supply of grain for their purposes in their endeavors in livestock, poultry, or dairy. That is why we speak of feed grains.

But on the basis of dairy, livestock, and poultry depending upon grain, you might draw the conclusion—and I think many in the public draw the conclusion—that these producers would be better off if the grain were cheaper and that they are better off now because grain is obviously much

cheaper than it has been for the past several years. However, that is not so at all. That is not the way this operation works. That is not the result for their business operation.

Cheap grain and the continuation of any circumstances that continues grain cheap for more than 1 or 2 years creates a bad situation for these producers because it means that more beef will be produced, more pork will be produced, more poultry will be produced, more milk will be produced and, therefore, the prices of their commodities go down. Their prices are low now and continually sag from the pressure of cheap grain.

That wraps up all of those producers not covered by deficiency payments and target prices. Whether they are in beef or in hogs or whether they are in poultry or whether they are producing milk, they are all wrapped up in the price of grain. And while grain is a commodity that they all purchase, they do not want it too cheap because historically, without a doubt, it is going to mean that the prices of their particular commodities go down. Beef prices are low, pork prices are low, poultry prices are low, and milk prices are low, demonstrating, once again, that historically as the price of grain cheapens, those producers of these commodities—pork, beef, poultry, and milk—suffer lower prices for their products along with the grain farmer. The lower costs of the grain they purchase does not offset the lower price they receive for their products.

In summary, low grain prices result in low prices for beef, pork, poultry, and dairy and these producers lose income. It is bad economics and their losses are among the worst of the entire spectrum of agricultural producers.

There is another aspect that should be considered. We are the biggest grain producer in the world. That is, we have the ability year after year to outproduce all of our needs for domestic consumption and have a large amount available to be exported to other countries. So what effect is the world price? This large production virtually establishes the world price of wheat and feed grains. Whatever the U.S. domestic price is becomes the world price. We have large surpluses; therefore, the world price is very low.

What is the effect of low grain prices on the other countries? It has been rather discouraging for other countries, particularly those that are developing countries. Let us talk about them first because, with very cheap grain available, it becomes almost axiomatic that the grain that they can produce in their countries at higher costs is going to be discouraged from production. Indeed, those people from the multinational groups that are attempting to help the hungry people in Africa are very concerned about whether or not, even after the drought, we will see a concerted effort in those various countries within Africa to produce grain for their own use in their own countries. So the developing countries are hurt in Africa by low world prices for grain.

That is true in other parts of the world also. It is true in Central America. It is true in Asia. For all developing countries, when grain prices get as low as they are now, it is a discouragement for producing grain and cereal in their own particular country, because their prices are low also.

In other words, the price of corn and wheat in the United States has a direct bearing on what the world price is. The effects of low prices here in the United States, meaning low world prices for these grains, is not good news for developing countries. It is adverse to their interests.

Now, that might strike a lot of people as being a rather weird situation. After all, if they are a poor, developing country, they must need grain to eat, particularly in drought areas. So why are they not better off with the prices lower? I repeat, Mr. President, the reason they are not better off is that while, for the time being they may get cheap grain, that very fact discourages agriculture endeavors in their own country.

The overall effect of that is a lessening of food production in the world. For their own particular interest, it is a lessening of food production in their own country. And that is of no advantage to any developing country.

Mr. President, other countries that are industrial countries such as the Common Market countries also have quite large grain production. What is the effect of low prices of American grain? It means the world prices are low. It has a harsh effect on them, also. The Common Market countries are very anxious, absolutely gung ho, to protect their own agricultural endeavors. Wheat producers in France or in Germany are protected by a marketing system with a subsidy that assures they will continue to be in operation. To the extent their crops are good, they can export some grains. Then they come into competition with the United States. That is the circumstance of last year, of this year, and it may be the circumstance next year. The Common Market countries have more grain than they need for their own domestic use, and will be aggressive exporters in competition with the United States and other grain exporting countries. But the effect of low world price for grain on them is harsh, also.

Coming back to the United States and to our producers, let me talk a little bit about the cost of production. What is the cost of production of a bushel of wheat, or a bushel of corn, or 100 pounds of rice? We believe we have fairly accurate figures. Target prices reflect those estimates. The reason I say that it is just fairly accurate is that these commodities are produced under different circumstances in different parts of the country. These are independent operations, farm by farm. Some of them have a lower cost of production than others. That is understandable, either because of the area they are in, the soil they have, or the size of their operation.

So when we speak to cost of production, we are talking about the cost of production based on the average. How do we arrive at the average? We look to the land grant colleges throughout the United States to have assessments in their particular States, and to have accurate assessments as near as they can make them. Then we average out those and weight them as to the production of each State. That is the best system that anyone can follows. It is updated annually. The cost of production varies, the cost of fuel varies, and the cost of taxes varies. Most taxes are on the land.

Because most of the people we are talking about here today are connected with production of these grains, cotton, and rice, are they not making much in the way of income. So they are not paying much in Federal income taxes. But the taxes vary on the land from area to area, fuel varies in cost, the size of the farms vary, the weather conditions vary—all of these things are factors that must be considered regularly, repeated every year to see if there are changes, and then arrive State by State through the land grant colleges on what they view as the cost of production for commodities that are produced in their States. By averaging out those on a weighted basis we can come up with a fairly accurate cost of production.

The Department of Agriculture reviews these figures. They have methods of their own. They do it by States, regions, and commodities. And they come up with what they believe is the cost of production. By looking at it all, you can arrive at a figure. That figure is reflected pretty much in what the target price for these various basic commodities are.

Farm producers are of the opinion that the target price really is a little bit on the skimpy side, below the actual cost of production. So they are not in full agreement that the target prices accurately show what their true costs are. There is reason for them to believe that. There are legitimate reasons for them to believe that.

The cost of interest for these producers is relatively high. For most agricultural producers throughout this country, whether they are in grains, cotton, hogs, cattle or poultry, whatever they produce, the average cost of interest for them runs about 14 per-

cent. Some of them are paying to their PCA's a little bit higher, and maybe a little bit lower. Some of them are paying to commercial banks that are carrying their loans that provide them with their lines of credit a little bit higher or a little bit lower than 14 percent. But in general, it is 14 percent, and that is a relatively high rate of interest. It has been averaging at that point for the last 3 or 4 years.

So that one element in the cost of production is at a modern, historic high. I do not think farm producers have had to pay that type of interest since the 1920's.

Considering the average interest rates of the last 50 years, the current 14-percent rate is high and is a heavy cost input to them.

Mr. President, let me recap. We can produce grains in abundance. We have cost effectiveness here in the United States. That cost effectiveness is tremendous. American farmers are producing these farm commodities at a lower cost than anywhere else in the world. Therefore, they are competitive with anyone else in the world. But surpluses of these commodities have driven prices down. And if the Department of Agriculture is accurate, the price of these commodities is going to go down even much more.

Perhaps a lot of people think, well, it is unfortunate that we have so much product here in the United States and other parts of the world because, obviously, we do not need all of the food that we have produced. Mr. President, that simply is not true. There is not too much food in the world. No study, no worldwide study has indicated that there is more than a minimal amount of carryover in the total amount, or total quantities of food that is available in the entire world.

So why do the food commodities continue to sag in price for these agricultural producers? The fact is that we simply have failed in the distribution of all the food supplies that are available. Notably, we have failed here in the United States. First of all, domestically, we are told by very serious studies of nutrition that 20 percent of the people in this country are to a certain degree malnourished, and to a certain degree they do not have adequate food. That should be corrected. The studies that are conducted by the world food organizations or other international groups have always demonstrated that the total output of food as it exists right now is adequate if it were properly distributed to all of the areas of the world where there are deficiencies of food. With their projections of what is going to happen during the next decade and the decade after that—and the projections are consistent that at the present level of world food production demand would outstrip available supplies, hunger would be very damaging, and malnutrition would be extremely serious—it is absolutely essential that there be more food available.

So what we are faced with now is properly utilizing the surpluses we have in this country and in some other countries. There is not such an abundance of food worldwide that we have a carryover of any significance. But that is not true of the United States and that is not true of some other large producing countries. The fact is that individually and collectively we have not found distribution methods that are adequate to take care of the supplies that are on hand.

We could and we should find those distribution methods and make use of them to lower these surpluses. As long as we have the surpluses here in the United States, prices for our producers are going to be low. The target price with deficiency payments will be in effect. However, it is not a good answer for agricultural producers. It is not a good answer for the farmers who produce these commodities. It is only a safety net despite the fact that they do not like it, and they would prefer that it not be necessary. These producers know that this safety net must be there so that at least they can be kept in business.

Mr. President, I started out by listing the five factors that have to be understood, that have to be weighed and measured to thoroughly understand the scope of the farm problem. I wanted to add the remarks I presented in the intervening time so that we could talk with intelligence about the five factors.

The first was net farm income. Net farm income is declining.

Let me put that in the right perspective.

If net farm income for 1985 is going to be around $20 billion, and you divide the 2 million farm operations into that $20 billion, you come up with an average of net farm income for each individual farm of $10,000.

We know that an average can be very misleading. No farm operator that nets $10,000 is going to be out of business, unless they have other losses that they have to make up for.

Is $10,000 an adequate income? Mr. President, it is sad for me to say, but there is a great percentage of ranch and farm operators who do not believe they will show any net farm income from their operation in 1985. They wish they had the same net farm income as in 1984. Some have to go as far back as 1982 or 1983 or perhaps further to find a time when they actually had some income.

Mr. President, just what are we talking about here? Twenty billion dollars may be the net farm income for the entire country during 1985. Twenty billion dollars for whom? There are 2 million farmers. Just the raw arithmetic of that is divide 2 million farmers into $20 billion and come up with $10,000 per farm operator as net income.

Mr. President, we are not talking about some little group that are all banded together and we look at them and talk to them and say, "Are you satisfied, Joe? Is that all right, John?"

The Joes, the Johns, the Marys, the Sallys, and whoever else makes up all these farmers who produce all this stuff in the United States are scattered all over the country. They are producing all these things—wheat, pigs, poultry, grain, milk, fruits, apples, oranges, peaches, pears, and vegetables. They are producing all these things and their operations are not very uniform. So there are some farmers who are going to have quite a bit of money. Maybe they are covered by a marketing order and the marketing order for fruits and vegetables happens to work out OK for this year. The price is all right and they have a crop and make some money. They are going to be able to buy a new car or make a new investment. Maybe they made a bundle. That's fine. I am happy for them.

We might be talking about some grain producers who have had bumper crops and somehow they got their grain in on time. Maybe they produced barley and sold it to beer breweries at a good price and have a good income. Good. I am glad to see somebody successful in agriculture.

But what we are really talking about in net farm income is that it is not adequate to keep agriculture in business. That is what it means to the country. How are we going to keep those agricultural producers in the country? How are we going to produce corn, wheat, cotton, rice, sorgum, barley, and all the rest that are among the commodities that are covered by deficiency payments? Are they going to stay in business?

A lot of them are not. A lot of them are going to go down the tube. I will get into that a little bit later in discussing farm indebtedness.

I think that presenting figures to indicate how some operators are making good money is easy to do, but it is not those operators about which we worry nor for whom we will have to craft this farm bill.

They may be involved indirectly in the suffering which is affecting agriculture as a whole. All I can say about those particular farmers and ranchers who are making good money for 1985 or who made a lot in 1984 is I am glad they did, but, you know, if they were the significant group, Mr. President, we would pass a farm bill in 2 hours because most of what we are going to be discussing in this farm bill is the scope of the farm problem. That farm problem is huge.

The $20 billion net farm income for all these agricultural producers of America, all 2 million of them, is not enough. For those who are having good income, actually have net income and that income is good, we are not going to have to worry about them. They are not the problem.

Our problem is the vast majority of these producers having such price difficulty as to jeopardize the continuation of their operation. That is the problem. The truth is that the vast majority of them are having difficulty on income that jeopardizes the continuation of their operation. So it becomes a national problem. That is what this farm bill is about, to help alleviate a national problem.

Farm indebtedness is the second factor that I believe has to be a part of the factors we review in the scope of the farm problem.

Farm indebtedness, of course, has its effect on the individual operators, but it also has an effect on the financial institution that is providing the credit for those individual operators. That includes the farm credit system. The farm credit system, made up of the Federal land bank and the banks for cooperatives and the production credit associations, is an institution that was started by first the devising of the Federal land bank back in the twenties. The bank for cooperatives and the production credit associations, the other two segments of the farm credit system, were added afterwards. But they have all been in operation for more than 50 years and agricultural producers throughout the country look to this system to provide them with credit that is sound and hopefully at competitive interest rates—usually it has been—and hopefully a little bit lower sometimes than can be provided through commercial lending institutions.

Some $70 billion of the total farm debt in the United States is covered by the farm credit system. The total farm debt in the United States, the last time checked, was $214 billion, a sizable chuck of dough. About one-third of that was covered by the farm credit system. Commercial banks loaned a big portion of the rest, about 25 percent and Farmers Home Administration, the lender of last resort for agricultural producers, was lending about 17 percent of that total package. The rest of the farm credit comes from other sources.

The effect of farm indebtedness is indeed staggering for the farm credit system. They have $70 billion loaned out to agricultural producers, either through the land bank or the PCA's or the banks for cooperatives, and they have precious little reserve left available to write off bad loans. They will approach this directly, formally, in a hearing which has yet to be held here, in the Senate Agriculture Committee, and they will describe the depth of their sickness. It is suggested that they are going to need $10 billion in backing from the United States yet this year in order to keep this entire farm credit system solvent.

As for commercial banks, they are, of course, reviewing their agricultural loans very critically, have been for the past year, and are finding that much of the agricultural portfolio they are carrying has to be classified. I checked with two of the largest chains of commercial banks in the upper Midwest, and I find that as of sometime this summer, about 30 to 35 percent of their agricultural borrowers were classified and they would anticipate that that would increase somewhat during the balance of the year so that by the end of the year, they may be looking at 35 or 40 percent of their agricultural borrowers that have to be classified.

What that means is that some of those are going to be liquidated, some of those are going to have their credit stopped, forcing liquidation.

As for Farmers Home Administration, the borrower of last resort, their portfolio is even worse and all that we can anticipate as we look at this projection of where the prices of these commodities are going to be is very discouraging.

Mr. President, there are three more important factors that I believe must be examined, must be understood, and must be considered as we consider the scope of the farm problem. Those factors I shall discuss at a later time. They are, I repeat, the effect on argibusiness—the suppliers in the economy—and the effect on rural communities and, last, the continuing trend of mismanagement of agricultural exports with its buildup of surplus commodities in the United States. I do not want to prolong my discussion any further. I have taken plenty of the time of the Senate at this time.

I yield the floor.

Mr. McCONNELL. Mr. President, we today begin to write the most important farm legislation since the current enabling farm legislation was written 50 years ago. You'd think that we would have learned something about farm policy in 50 years, Mr. President, but it looks like we haven't. The bill reported by the Senate Agriculture Committee certainly contains some important innovations—more market-oriented loan rates and a conservation reserve—but it also contains many of the same policies that have put agriculture in its current mess. We have an opportunity during this debate to truly redirect farm policy to recognize the worldwide, dynamic nature of the agriculture of the 1980's and beyond and I hope we'll do it.

There are a number of proposals which will be offered that move agriculture in the right direction and merit serious consideration. Maintenance of farm income is critical, but doing it through bad policy deters the long-term growth of agriculture. Let me give you an example. On the one hand, we establish target prices significantly above market-clearing levels, encouraging farmers participating in farm programs to produce as much as they can to obtain maximum program benefits. On the other hand, we pay these same farmers not to plant.

If it does not make much sense to you, Mr. President, it does not make much sense to me either.

There are precedents already found in agriculture where high price support rates do not improve agriculture in the long term. The sugar, cotton, rice, and tobacco programs have served farmers well for years, but the evidence clearly indicates that U.S. farmers are losing market shares of these commodities at alarming rates. Just 10 years ago, U.S. cotton and sugar producers held the lion's share of the world market but now, these same farmers are restricted to a market where we have less than 50 percent of the world market. So the solution to keep price supports high is to further restrict U.S. planted acreage to control supply. Sounds easy and painless doesn't it?

So what happens? Our competitors, the Philippines for sugar, the Chinese for rice, simply increase acreage in response to our reduction and flood the market even further. American growers are again compelled to reduce planted acreage even further and fixed costs of farming must be paid with revenue from significantly smaller acreages. That leaves little if any room for profit and as the words from a current song go "the banker's against the farmer and the farmer's against the wall." We simply have to stop this merry-go-round before American agriculture collapses.

My Kentucky tobacco growers recognized the problem of noncompetitiveness. They swallowed a bitter pill by accepting an immediate 19 percent reduction in loan rates, with future price support rates driven by market forces. The result? Flue-cured tobacco growers, whose own price support structure for the 1985 crop year is geared to world prices, have seen the smallest amount of tobacco go under loan since 1979. Market clearing price supports work.

Mr. President, there are rampant rumors regarding various amendments which may be offered to the farm bill, so I shall address other issues when they are offered for consideration. However, I do think a moment of personal congratulations are in order here.

The distinguished chairman of the Senate Agriculture Committee has worked tirelessly with every member

of the Agriculture Committee, including this Senator, to see that we had the opportunity to debate the issues which were important to us. His patience and diligence, along with his commitment to make the lives of America's family farmers a little better, are to be commended and I congratulate the Senator for his aggressive efforts to move from the failed farm policies of the past to farm policies which serve the best long-term interests of the American farmers.

Mr. President, I ask unanimous consent that an outstanding statement on this farm bill, written by Senator HELMS, which appeared in the October 24 edition of the Washington Post, be printed in the RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Washington Post, Oct. 24, 1985]

THE STRUGGLING FAMILY FARMER WILL BE THE VICTIM

(By Jesse Helms)

As the Senate prepares to begin the farm bill debate, the image of family farmers struggling to save their livelihoods will be invoked to justify huge expenditures for farm subsidies. The tragic irony is that struggling family farmers will be *victims* of farm programs that, in fact, target their subsidies backward—to the large and the wealthy.

Few Americans understand that less than 20 percent of the $65 billion in benefits and subsidies in the farm bill is directed to farmers experiencing financial distress.

This is the farm bill's equivalent of the "$600 toilet seat."

In fact, the fourfold increase in federal farm spending during the past five years has caused much of the stress. The reason is simple: Congress has established price supports at levels greater than the value of crops, contributing to unmanageable surpluses that drive farmers' prices below profitable levels.

Yet farm program benefits, unlike other means-tested federal programs, are not paid to individuals on the basis of need. Rather, farm subsidies are paid on the units of production—by the bushel, pound or hundredweight. So the more of a subsidized crop a farmer produces, the bigger his government check. By definition, this means the greatest benefits and subsidies go to the largest farmers who least need help.

Despite the severe—and widely publicized—distress among some sectors of the farm economy, it is a fact that there is enormous wealth in the U.S. agricultural industry. On Jan. 1 of this year, the average net equity for farms with gross sales over $250,000 was $904,446, and for farms with gross sales between $100,000 and $250,000, the figure was $429,891. In comparison, the net equity of the average American family—which is taxed to pay these farm subsidies—is about $92,000.

Farmers as a class also have larger annual incomes than Americans on the average. The average net income for farmers with gross sales over $250,000 in 1984 was $96,889, and for those with gross sales between $100,000 and $250,000 it was $36,273. The average income for the typical American family was about $25,000.

An accurate picture of just how many farmers there are, and who they are, is revealed in an Agriculture Department study that estimates that by the end of 1985, about 5 percent of all farms will have debt-to-asset ratios exceeding 100 percent, meaning they are insolvent. Another 23 percent will be highly leveraged, with ratios between 40 and 100 percent.

The remaining 72 percent will not be experiencing financial stress threatening their livelihoods. Yet the agricultural programs indiscriminately spew out subsidies for all who come—the large and small, the poor and wealthy, the financially successful and the financially distressed. It is indisputable that the greatest amount of money is directed to the largest, wealthiest and most financially successful, to the detriment of the small, poor and financially distressed farmers.

The farm bill the Agriculture Committee approved continues this bizarre scenario. That is why I was obliged to become the first chairman in the history of the committee to vote against reporting a farm bill.

But there is hope. There are some very good policy instruments in the bill. Fundamental changes are made in the loan rate for wheat, feed grains, cotton and rice. The bill prudently links the loan rate to world market prices in the future, ensuring increased competitiveness of U.S. farm products in the world markets our farmers must have if they are ever to prosper.

But what the committee improved with one hand, it ruined with the other. By voting to freeze the level of subsidies paid to farmers for each bushel or pound of crop they produce, the committee effectively prevents the secretary from using authorities that permit him to reduce the loan rates that make American farm products competitive. Because subsidy payments are based on the difference between the loan rate and the subsidy or target price, the budget exposure created by lowering the loan without lowering target prices is more than any administration's fiscal managers could allow.

The tragic consequence of unrealistically high target price levels is their inducement to big farmers to produce huge surpluses, continuing the depressed prices that make it almost impossible for the struggling, highly leveraged farmer to make a profit.

The most important change the full Senate should make in the committee bill is to allow target prices to ease downward over the life of the bill. My suggestion is a 5 percent reduction each year. Such gentle reductions would still ensure massive and unprecedented levels of income protection to farmers, but would signal that over time this protection will diminish marginally.

Other worthwhile changes include better targeting of subsidies to those 30 percent of the farmers in financial distress and requiring the largest, wealthiest farmers to bear market risks for producing surpluses. This can be accomplished by capping the amount of crop loans an individual producer can receive and limiting the amount of commodities for which an individual farmer may receive target price payments. The payment limitation, currently $50,000, should be reduced, and the loopholes that allow farmers to divide their farms to avoid the limit could be tightened.

Contrary to popular myths, these changes would not drive thousands of farmers off the land. It is the current perversity of farm programs, which encourages surplus production, that's driving farmers out of business. So these modest reforms would improve the effectiveness of the programs and properly target the billions of dollars in benefits and subsidies to those farmers most likely to be in need of assistance.

Mr. ABDNOR. Mr. President, this is a historic moment—the U.S. Senate has within its hands, heads—and hopefully hearts—the future of the largest and most important sector of the U.S. economy—agriculture. We now begin the debate on Federal farm policies and programs. This debate will send a message to agriculture and rural America as to whether this Congress views this portion of our society as a problem to be minimized or as an opportunity to be maximized.

Since its founding, Mr. President, this Nation has functioned as a family—a family with common roots, goals, and ambitions. This family has held together through great and countless trials for more than two centuries because we possessed mutual confidence and pride in purpose and compassion. We fought a great Civil War and learned that a house divided cannot stand.

But an economy divided cannot stand either, Mr. President.

The rural and agricultural economy is the forgotten economy. Economists tell us that two consecutive quarterly declines in real gross national product represents a recession. This staggering economic event has occurred once during the last 4 years, in the fourth quarter of 1981 and the first quarter of 1982. This recession of 1981–82, we all recall, was devastating. There is a comparable figure which measures gross product for the farm sector. Quarterly real gross farm product has declined seven times during the last 4 years, Mr. President. Technically defined, the farm sector has experienced four recessions in the last 4 years. I contend that the only reason the U.S. farm sector exists today is because its individual units—the farms and ranches—are owned and managed by the most efficient and resilient form of business organization—the family. You see, in farming, unlike other businesses, when times get tough, you can't pick up your marbles and go home—because you are home.

Economists also tell us that during recessions government expenditures go up to cushion economic hardships caused by the recession. It's a "one for all, all for one" philosophy of our democracy. Between 1980 and 1983 Federal budget outlays increased 37 percent and the deficit almost tripled. From our common purse, help was provided when and where needed—high and longer unemployment benefits, job retraining assistance, job-creating public works projects, food assistance, emerging loans and grants and the list goes on.

But those days are behind us as we celebrate the third year of economic recovery and growth: The unemployment rate has fallen better than 3 full

percentage points and millions of jobs have been created; interest rates have been halved; inflation has been cut by better than two-thirds; domestic investment has increased by more than 50 percent.

In South Dakota—in rural America—Mr. President, all this is nothing but self-gratifying happy talk.

I now come before this Congress to plead—no, not to plead—to demand that my part of the family—my fellow rural Americans, farmers and ranchers—be recognized, appreciated, and treated not as robber barons in bib-overalls but as citizens. They have earned their citizenship and with that citizenship comes rights, and among those rights is access to the resources of this great Nation during time of desperate economic need.

I can't tell you how disturbed I was in reading in the October 24 edition of the Washington Times an article by Robert Walters which recommended the elimination of price supports "to slow the rise of food prices." Where has this guy been? According to the Department of Labor, during the last 12 months while the Consumer Price Index went up 3.2 percent, prices of food consumed in the home increased 0.7 percent. Also, according to the Department of Labor, the producer price index for farm foodstuffs during the last 12 months has declined almost 15 percent. Is this stupidity, blindness, or both? If there is any Member in this Chamber who adheres to Mr. Walter's philosophy, I would like to talk to him out in the hall. Let me try to put the economic depression in rural America and agriculture into perspective for my congressional colleagues. I can only ask that you try to relate these economic events in terms of your constituency.

Since the beginning of the so-called economic recovery:

Real net farm cash income has declined 14 percent.

The value of farm assets has declined 20 percent, in some areas of the country by better than 50 percent.

Export sales have dropped over $7 billion, down 22 percent; export volume has fallen to 10 percent.

Department of Agriculture data shows that during just the last 12 months: Wheat prices have fallen 17 percent; corn prices 24 percent; soybean prices 22 percent and; beef cattle prices 11 percent.

And then add the pending collapse of a primary source of credit, the Farm Credit System.

Plus, the depressed financial condition of agriculture has cost the agribusiness sector $26.2 billion in total output, 327,000 jobs and $6.4 billion in personal income.

Maybe I'm still not getting through. According to a recent study by the General Accounting Office, the financial stress on the farm sector could result in farm loan losses of $25 billion between 1985 and 1993. So what? Farm loan losses of this magnitude could cost the economy as a whole—up to 275,000 jobs; a loss of $51 billion in gross national product; an increase in interest rates of more than 1 full percentage point; lower business investment of $38 billion, and 189,000 fewer housing starts.

Many—perhaps a majority—of my colleagues and certainly the Reagan administration will argue during the next several days that we cannot allow this farm bill to bust the budget. And I hope I don't need to inform my colleagues that nobody in this Chamber abhors deficits more than I. But we have a life or death situation here and you don't pull the plug on a patient to save a little electricity nor do you ask a starving man to fast for world hunger. Let those who have benefited from our economic recovery come forward and fast for the farmer.

Mr. President, during the last couple of months I have traveled extensively in South Dakota. I found that my constituency, my neighbors, my family are exhausted; they have given all they have to give. Farming—the origin of 20 percent of this Nation's gross national product and over 20 million jobs—has been treated like a punching bag by Washington. Let's begin with at least the commitment that the 1985 farm bill will provide hope, not despair, and the opportunity for long-term planning not the destruction caused by mass confusion and panic. Let's put a stop to trick-or-treat farm policy. Let's do what is fair and right.

Mr. DURENBERGER. Mr. President, I rise today as the Senate begins its historic debate on the 1985 farm bill to share a few thoughts with my colleagues. Over the next several weeks, while the Senate temporarily diverts it attention from budgets and summits and the other matters, I intend to use this opportunity to focus attention on some of the issues that will tend to be neglected in this debate. On each day the Senate considers the farm bill, I will discuss a different aspect of the problem which we as a nation must address, whether it is as large a topic as the plight of rural America, or as direct and concrete as the letters and stories of individual farmers who have called out to me for help. In so doing, I hope to sensitize my colleagues, and others who may read this RECORD, to the dangers which the current crisis holds for our Nation and the urgency and level of sacrifice its solution will require.

As we start our work as legislators on this bill, I want to remind my colleagues of a statement of President Dwight Eisenhower. He said, "Farming looks mighty easy when your plow is a pencil, and you're a thousand miles from the cornfield." That is what we will be engaged in primarily on this floor, Mr. President, plowing with our pencils and our calculators and our briefing books. We will talk a lot about budget targets, vetoes, and the merits or demerits of many proposals. I was informed that as we begin this bill there are 151 amendments which are out there to be offered to this bill. In the process, Mr. President, let us not lose track of what we are doing here.

We are separated by profession and by geography from those for whom what we say and do here is a matter, not of mere interest, but of survival. The bottom line in this debate is not budget outlays or whether we pass a Democratic package or a Republican package—the bottom line is people: How this bill affects their ability to achieve their hopes and aspirations.

I wish that I could bring the Members of this body with me to towns like Worthington, MN. Since January 1985, 30 businesses there have closed their doors. There has been a 400 percent increase in the number of delinquencies in tax payments. In the area surrounding this town 10,000 people, almost half the farmers are over 55 years of age. What will we find in towns like Worthington in the year 2000?

We are not talking in this debate about whether somebody is going to get their COLA or not, or whether three or four battleships are enough to get the job done. We are talking about the basic necessities for maintaining a way of life and a quality of life for some 60 million rural Americans.

Law, it has been said Mr. President, is nothing unless close behind it stands a warm, living public opinion, I believe that it is the opinion of those I serve in this place, and their countrymen and women, that we pass a law that provides some measure of relief for farmers today and holds out a genuine hope for the future of rural America.

I hope that the human dimension will be foremost in our minds as we consider this bill.

AMENDMENT NO. 886

(Purpose: To authorize the Secretary of Agriculture to prohibit the importation of any livestock or meat that has been administered certain drugs)

Mr. PRESSLER. Mr. President, I have two amendments that have been agreed to by both sides. At this time, I send the first of the two amendments to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from South Dakota [Mr. PRESSLER, for himself and Mr. ABDNOR] proposes an amendment numbered 886.

Mr. PRESSLER. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 459, between lines 18 and 19, insert the following:

IMPORTATION OF LIVESTOCK AND MEAT

SEC. 1927. Section 20 of the Federal Meat Inspection Act (20 U.S.C. 620) is amended by adding at the end thereof the following new subsection:

"(g) The Secretary may prohibit the importation into the United States of—

"(1) any livestock, or

"(2) any carcass, meat, or meat products of any livestock,

if the Secretary determines that such livestock may have been administered any drug (including any antibiotic drug) which has been banned for use in livestock in the United States: *Provided*, That

"(A) the Secretary determines that residues of that particular drug (including any antibiotic drug) threaten the health and safety of U.S. consumers;

"(B) the use of that particular drug (including any antibiotic drug) gives foreign producers of livestock an unfair competitive advantage over U.S. producers.".

Mr. PRESSLER. Mr. President, the amendment I am offering would authorize the Secretary of Agriculture to prohibit the importation of livestock intended for slaughter and meat products which may have been treated with an animal drug or antibiotic which has not been approved for use in the United States. This is an effort to make our food safety standards equal for all products.

Currently, an animal drug or antibiotic may be disapproved for use in the United States because of potential health hazards, but the product can still be used in other nations. Meat products and livestock from those nations can still be imported into the United States. Periodic residue samples may be taken from meat imports, but it is possible that contaminated meat or livestock imports nevertheless enter the United States. If we banned the drug in the United States, then we should also ban the importation of products which have been treated with the drug.

If consumer health is threatened by the use of these drugs in food producing animals, then country of origin should not be a factor. Earlier this year there was a controversy over the importation of Canadian hogs which may have been treated with the antibiotic, chloremphenical. This drug had been banned in the United States but it was still being used in Canada. Several States banned the importation of Canadian hogs because of the potential presence of the drug in the meat. In response Canada also has banned the use of the drug. However, there are other nations which use this drug and others banned in the United States. The Secretary of Agriculture should have the authority to restrict the importation of such livestock and meat products. That is all this amendment would do.

Mr. President, here in the United States, the Food and Drug Administration and the Department of Agriculture take great care in assuring the American consumer of a healthy food product. It is only fair that these same standards be imposed on food products imported from other nations. I urge my colleagues to join me in support of this amendment.

Mr. HELMS. Mr. President, I inquire of the Senator from South Dakota [Mr. PRESSLER] if my understanding is correct.

In the first place, his amendment would authorize but not require the Secretary of Agriculture to limit imports of meat products that the Secretary determines were produced with drugs not approved for use in this country. Is that correct?

Mr. PRESSLER. That is correct. It would result in a situation where the Secretary would have the authority, if he chose to use it, to ban products from a country which allows the use of an animal drug that has been banned in the United States.

For example, our current situation is that residue tests are done on a certain amount of meat products imported into the United States. If no residue shows up in those tests, the imports can continue. Under my amendment if the nation has a different standard in terms of an animal drug, then the Secretary would have the authority to restrict imports. He would not be required to use it, but he would have the authority to do so.

Mr. HELMS. I thank the Senator.

Mr. President, it is my understanding that the amendment of the distinguished Senator from South Dakota would authorize but not require the Secretary of Agriculture to limit imports of livestock and meat products that the Secretary determines were produced with drugs that are not appoved for use in this country. With the understanding that this language does not instruct the Secretary to limit or prohibit imports, I am willing to accept this amendment.

I would just simply note for the record that U.S. farmers also have access to drugs and antibiotics that have been banned in other nations. For example, over one-half the cattle in this Nation are produced using a growth hormone called Zeranol. This particular product has been banned throughout much of Europe.

The Agriculture Committee has worked very hard to enact a strong export title to this farm bill. I will not accept any amendments to this legislation that are certain to result in justifiable retaliation by our foreign trading partners and undermine the important components of the export title of this farm bill.

Again, with the understanding that this amendment is not binding upon the Secretary to take action, I am willing to accept this amendment.

I yield to the distinguished Senator from Montana.

Mr. MELCHER. Mr. President, the Senator from South Dakota is offering an amendment that is entirely discretionary and has two provisos, that the Secretary of Agriculture, first of all, may ban imports provided that first, the Secretary determines that residues of that particular drug including any antibiotic drug threatens the health and safety of U.S. consumers; and second, the use of that particular drug, including any antibiotic drug gives foreign producers of livestock an unfair competitive advantage over U.S. producers.

Mr. President, first of all, the amendment seeks to protect U.S. consumers. Foreign producers using drugs that are banned for use on livestock here in the United States seems to be a contradiction in public health matters. We have our laws here in the United States banning certain drugs for livestock. It is enforced and enforced for the very obvious reason, to protect the public health. But we do find ourselves importing products from abroad, even from our closest neighbors such as Canada, where commonly used livestock drugs up there are banned here in the United States for public health reasons.

So, the amendment on its face is absolutely in order and should be accepted, and I only state to my friend from South Dakota that I realize why the Department of Agriculture wants to add these two provisos, making it more difficult to keep out any products that may contain residues of a banned drug here in the United States but, nevertheless, I understand the circumstances. It gives the Secretary of Agriculture an undue authority, in my judgment, to delay or not to enforce what should be enforced.

I compliment the Senator from South Dakota on his amendment. I think it is wise. I think it is unfortunate that the provisos need to be in there to permit the Secretary to perhaps never ban the importation of livestock with such residues and also giving him the out of saying on that, he is not too sure that it constitutes anything in this country that is unfair competition to our producers.

But, nevertheless, I am very much in support of the Senator's amendment and I do not believe there is any objection on our side.

Mr. HELMS. I thank the Senator.

Mr. President, if no one else chooses to speak, I move adoption of the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from South Dakota.

The amendment (No. 886) was agreed to.

AMENDMENT NO. 887

Mr. PRESSLER. Mr. President, I send a second amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from South Dakota [Mr. PRESSLER] proposes an amendment numbered 887.

Mr. PRESSLER. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 130, after line 22, insert the following:

STUDY OF OAT IMPORTS

SEC. 503. (a) The Secretary of Agriculture shall conduct a study of the impact on domestic farm programs of the increased importation of oats into the United States.

(b) By no later than one year after the date of enactment of this Act, the Secretary of Agriculture shall submit to the Congress a report on the study conducted under subsection (a).

Mr. PRESSLER. Mr. President, this amendment deals with a problem that is very important in my State, the increase in oats imports.

Mr. President, the amendment I am offering would require the Secretary of Agriculture to conduct a study of the dramatic increase in oat imports and its impact on the domestic price support program for oats.

In recent years the quantity of oats imported into the United States has increased dramatically. During the 1980–81 marketing year 1.3 million bushels of oats were imported. During the 1984–85 marketing year oats imports were 30.2 million bushels. Imports in 1984–85 equaled nearly 7 percent of the total U.S. production of oats. The majority of the increase in oats imports has come from Sweden, Denmark, and Finland. It is unclear why the imports have increased so dramatically.

The high value of the dollar may have encouraged some imports but with the domestic oats prices at very low levels it appears unlikely that it would be profitable to ship oats from Europe to the United States. The August 1985 average price for oats in the United States was $1.13 per bushel. The loan rate for oats is $1.31 per bushel. It is very unclear why imports of oats at an average price of $1.78 would continue to increase. These increased imports should be investigated and action should be taken against any unfair trade policies which may be causing the increase.

The increase in oats imports not only affects farmers but also increases the cost of the farm program. The oats program is relatively small but the low prices have resulted in more oats being put under loan and higher deficiency payments to oats producers. A reduction in import levels would very likely reduce the cost of farm programs in the future.

Mr. President, I urge my colleagues to join me in support of this amendment. With the record trade deficit and high cost of farm programs we cannot afford to allow European nations to dump their surplus oats production on the U.S. market.

Mr. HELMS. If the Senator will yield, I know he has to catch a plane, he made his statement and I have examined the amendment and I find it acceptable.

Let me say to the Senator from South Dakota that I do commend him for his contributions and, as I say, I will accept his amendment.

Mr. MELCHER. Mr. President, we have no objection to this amendment on this side.

Mr. HELMS. I move its adoption, Mr. President.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from South Dakota.

The amendment (No. 887) was agreed to.

Mr. PRESSLER. Mr. President, I do have two additional amendments that I intend to offer next week and would like to have them printed. One is on misbranding food substitutes for cheese, and the other is to establish a three-tier target price for wheat and feedgrains. It will establish a three-tier target price and wheat and feedgrains to direct benefits to family farmers without increasing the cost of the program.

Mr. DIXON and Mr. HELMS addressed the Chair.

The PRESIDING OFFICER (Mr. CHAFEE). The Senator from North Carolina.

Mr. HELMS. Mr. President, just for the Senators on the floor and those who may be listening in their offices, I anticipate two rollcall votes in fairly short order. One will be by the distinguished Senator from Illinois, who will call up an amendment.

I ask unanimous consent that immediately thereafter, the Senator from Georgia [Mr. MATTINGLY] be recognized to call up an amendment.

The PRESIDING OFFICER. Is there objection? Hearing none, it is so ordered.

Mr. HELMS. I thank the Chair.

I yield the floor.

AMENDMENT NO. 890

(Purpose: To permit the transfer of agricultural products from one licensed warehouse to another warehouse for continued storage)

Mr. DIXON. Mr. President, I have an amendment at the desk and I ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Illinois [Mr. DIXON] proposes an amendment numbered 890.

On page 459, between lines 18 and 19, insert the following new section:

TRANSFER OF AGRICULTURAL PRODUCTS STORED IN WAREHOUSES

SEC. . Section 17 of the United States Warehouse Act (7 U.S.C. 259) is amended—

(1) by striking out "That" and inserting in lieu thereof "(a) Except as provided in subsection (b),"; and

(2) by adding at the end thereof the following new subsection:

"(b)(1) Notwithstanding any other provision of this Act, if a warehouseman lacks sufficient space to store the agricultural products of all depositors in a licensed warehouse, the warehouseman may, in accordance with regulations issued by the Secretary of Agriculture and subject to such terms and conditions as the Secretary may prescribe, transfer stored agricultural products for which receipts have or have not been issued out of such warehouse to another licensed warehouse for continued storage.

"(2) The warehouseman of a licensed warehouse to which agricultural products have been transferred under paragraph (1) shall deliver to the rightful owner of such products, on request, at the licensed warehouse where first deposited, such products in the amount, and of the kind, quality, and grade, called for by the receipts or other evidence of storage of such owner.".

Mr. DIXON. Mr. President, I ask for the yeas and nays on my amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

COPING WITH A BUMPER HARVEST

Mr. DIXON. Mr. President, the grain bins, country elevators and grain warehouses are bulging at the seams as a result of the bumper harvest our farmers are experiencing throughout much of the Midwest.

A unique problem has developed as a result of the abundance of grain being brought in by our farmers for storage. We have not been confronted with this situation before, and only a legislative remedy will cure the difficulty.

The problem is this: federally licensed warehouses are prohibited by a 1929 statute from redepositing grain at another facility, such as a river terminal. Their State-licensed warehouse counterparts are allowed to engage in such redeposits. As a result of this anomalous situation, Federal warehouses are operating this year at a competitive disadvantage because they cannot move old grain out to another location in order to accommodate the massive harvest of the current season.

To cope with this situation, I am offering an amendment granting discretionary authority to the Secretary of Agriculture to allow federally licensed warehouses to transfer grain during extraordinary circumstances such as

we are faced with now when bumper crops are coming out of the farmers' fields, with no place to go for storage. My colleagues will note that this amendment does not repeal the 1929 law which is causing the current problem. The amendment simply grants discretionary authority to the Secretary to cope with a situation which is beyond everyone's control at a time when we are blessed with a more than bountiful harvest.

Mr. President, I urge my colleagues to support this amendment so that our federally licensed grain warehouses will be on a par with our State licensed warehouses in terms of being able to transfer grain to make room for the new harvest.

I simply want to add that the U.S. Department of Agriculture is aware of this problem and of the language in this pending amendment. Essentially, it puts Federal grain elevators and warehouses in exactly the same position as State grain elevators and warehouses, authorizing them to forward to other places the commodities at such time as their elevators or warehouses are full. I ask that this amendment be given the favorable consideration of the Senate.

Mr. HELMS. Mr. President, I agree with the Senator from Illinois. This amendment is most constructive. It is an improvement over the current law. The Senator from Illinois and some of the rest of us feel that it is a matter on which the Senate ought to express itself. I intend to vote for it with enthusiasm.

Mr. ZORINSKY. Mr. President, we have examined the amendment and believe that it has great merit. In fact, I think it provides insight into the magnitude of the overproduction that can lead to a crisis in the availability of storage. I think it will benefit this Nation to accept this amendment. We have no objection.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The yeas and nays have been ordered. The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from Colorado [Mr. ARMSTRONG], the Senator from Alabama [Mr. DENTON], the Senator from Arizona [Mr. GOLDWATER], the Senator from Oregon [Mr. HATFIELD], the Senator from Maryland [Mr. MATHIAS], the Senator from Oregon [Mr. PACKWOOD], the Senator from Alaska [Mr. STEVENS], and the Senator from Wyoming [Mr. WALLOP] are necessarily absent.

I also announce that the Senator from California [Mr. WILSON] is absent on official business.

Mr. BYRD. I announce that the Senator from Texas [Mr. BENTSEN], the Senator from Florida [Mr. CHILES], the Senator from California [Mr. CRANSTON], and the Senator from West Virginia [Mr. ROCKEFELLER] are necessarily absent.

I further announce that the Senator from Massachusetts [Mr. KENNEDY] is absent on official business.

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 86, nays 0, as follows:

[Rollcall Vote No. 256 Leg.]

Glenn	McConnell	

NOT VOTING—14

Armstrong	Goldwater	Rockefeller
Bentsen	Hatfield	Stevens
Chiles	Kennedy	Wallop
Cranston	Mathias	Wilson
Denton	Packwood	

So the amendment (No. 890) was agreed to.

Mr. HELMS. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. DOLE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. MATTINGLY addressed the Chair.

The PRESIDING OFFICER. May we have order?

The Senator from Georgia is recognized.

Mr. MATTINGLY. Thank you, Mr. President.

AMENDMENT NO. 891

(Purpose: To enhance the effort of adding to the Strategic Petroleum Reserve and simultaneously stimulating foreign purchases of current-crop U.S. agricultural products by making surplus Commodity Credit Corporation stocks available to the Secretary of Energy for barter purposes)

Mr. MATTINGLY. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Georgia [Mr. MATTINGLY] proposes an amendment numbered 891.

Mr. MATTINGLY. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 30 of the bill, strike lines 16 through line 24, and insert in lieu thereof the following: "Corporation shall, to the maximum extent practicable and with the approval of the Secretary of Agriculture, make available annually to the Secretary of Energy, upon the request of the Secretary of Energy, a quantity of agricultural products owned by the Corporation with a market value at the time of such request of at least $300,000,000 for use by the Secretary of Energy in acquiring petroleum products (including crude oil) produced abroad for placement in the Strategic Petroleum Reserve through an exchange of such agricultural products. The terms and conditions of each such exchange shall be determined by the Secretary of Energy in consultation with the Secretary of Agriculture; *Provided*, That if the volume of agricultural products to be exchanged has a value in excess of the then established market price of the petroleum products (including crude oil) acquired by such exchange, then the Secretary of Energy shall require as a part of the terms and conditions of the exchange that the party or entity providing such petroleum products shall agree to purchase, within six months following the exchange, current-crop commodities or value-added food products from the United States producers or processors in an amount equal to at least one-half of the difference between the value of the commodities received in the exchange and the market price of the petroleum products acquired for the Strategic Petroleum Reserve in such transaction.".

Mr. MATTINGLY. Mr. President, the amendment which I am presenting today is one which is designed to accomplish several important objectives. It will allow us to continue filling our strategic petroleum reserve at a reasonable rate, while also reducing cash outlays from the Treasury. More importantly, the amendment which I propose may enable us to also stimulate a modest increase in export sales of agriculture-related products into markets which have been stolen from our producers through the use of unfair, predatory subsidies by foreign competitors.

Very briefly, the amendment would require the Secretary of Agriculture to make available to the Secretary of Energy a volume of Commodity Credit Corporation surplus stocks with a present value of $300 million. The Energy Secretary could then use these commodities—either alone or in combination with cash—to purchase, by barter or exchange, crude oil or other petroleum products needed for the petroleum reserve.

Now this alone is really not a new idea, and in fact there is a provision in the farm bill we are considering which expressly grants the authority for such barter exchanges to acquire addi-

tions for the petroleum reserve. However, what is new in my amendment is the concept that the Secretary of Energy can pay a "commodity bonus" to the country from whom we are acquiring the oil, but only if that country agrees to make an additional purchase of U.S. agricultural products in an amount equal to at least one-half of the value of the "commodity bonus" which they received. Such a purchase would have to be made within 6 months of the oil transaction. This subsequent purchase would have to be made in the open market from current-crop commodities or value-added food products. Thus, we accomplish several objectives. We reduce our current-crop commodities surpluses—we save some money by reducing storage costs—we reduce cash outlays for the purchase of strategic petroleum reserve additions—and we stimulate a further cash export sale of U.S. products which generates economic activity and Treasury revenues.

Another important aspect of my amendment is that it leaves the determination of the terms and conditions regarding the acquisition of the petroleum products in the hands of the Secretary of Energy, who will consult with the Secretary of Agriculture. I have the highest regard for my friends at USDA, but I believe that they probably do not have any great expertise when it comes to determining whether or not crude oil is or is not of the proper quality to be fit for addition to the reserve.

Mr. President, I strongly urge my colleagues to adopt this amendment.

Mr. HELMS. Mr. President, I inquire does the Senator desire a rollcall vote?

Mr. MATTINGLY. Yes. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. HELMS. Mr. President, I thank the Chair.

This is a good amendment, and I intend to support it with enthusiasm.

It is consistent with what we did in the farm bill in that it provides for the exchange of agricultural commodities owned by the Commodity Credit Corporation for petroleum products produced abroad, which would be placed in the strategic petroleum reserve. The terms and conditions of the exchange, of course, would be determined by the Secretary of Energy under the Senator's amendment and in consultation with the Secretary of Agriculture.

As I say, I support the amendment.

Mr. ZORINSKY. Mr. President, the amendment modifies the committee-reported provision relating to the use of the Commodity Credit Corporation surplus stocks in filling the strategic petroleum reserve. The amendment will allow greater use of the surplus stocks in acquiring petroleum stocks, and I think it has merit. However, the extent to which CCC stocks are used for this purpose will be subject to the approval of the Secretary of Agriculture.

With that understanding, I urge my colleagues to support the amendment.

Mr. MATTINGLY. That is correct.

Mr. ZORINSKY. I thank the Senator.

Mr. McCLURE. Mr. President, I have discussed this amendment with the distinguished Senator from Georgia over the last several days, as he has been developing not only the language but the support of the necessary officials who have the responsibility for administering this program.

I hope the amendment is adopted.

I understand that the amendment does not mandate a substitution of this program for the regular purchases. It gives the Secretary of Energy an option which he does not now have with respect to the acquisition of crude for the strategic reserves.

Mr. MATTINGLY. That is correct.

Mr. McCLURE. I understand it to be that option and not a mandatory program and it is not a mandatory substitution.

I also urge my colleagues to adopt this amendment for another reason. One of the problems we have with the Interior and related agencies appropriation bill is that the strategic petroleum reserve acquisitions were placed off budget in actions taken by Congress, and over my objection, I might add, and have persisted in that for the last several years.

This year as we begin to try to control outlays as well as budget authority in the budget process, we have been confronted with a great difficulty because those strategic petroleum reserve acquisitions not only are counted in the outlays but they have been put back on budget according to the budget reconciliation process for scorekeeping purposes at least. We are suddenly confronted with an entirely different mix of expenditures under that bill.

The result of that will be some pressure, I am certain, before we get finished with that appropriation bill to reduce all of the expenditures in the Interior and related agencies legislation.

This can reduce that pressure.

Therefore, for those of you who have any interest in all of the programs that are funded in the Interior and related agencies bill, this may provide some measure of relief to that pressure.

I urge the adoption of the amendment.

Mr. MATTINGLY. I thank the Senator.

I might add to my good friend that hopefully for the taxpayers it will be the Treasury Department printing presses can slow down also to where that the outlays of dollars will be reduced, therefore, the deficit will be reduced, since we will be using something other than hard cash.

Mr. McCLURE. If the Senator will yield, I have urged for many years that we adopt this kind of a program in order to help market our agricultural surplus. It makes eminent good sense to me to be able to use something that we have in surplus rather than using dollars which, as the Senator notes, are in short supply.

Mr. MATTINGLY. Let common sense prevail on the vote.

Mr. HART. Mr. President, will the Senator from North Carolina yield for a question?

Mr. HELMS. I beg the Senator's pardon?

Mr. HART. Will the distinguished Senator yield for a procedural question?

Mr. HELMS. I yield.

Mr. HART. For those of us trying to make urgent travel arrangements, does the Senator contemplate rollcall votes after this?

Mr. HELMS. I say to the distinguished Senator, yes. We do expect at least one rollcall vote, perhaps two or three more.

Mr. HART. Does the Senator know how long we will be in session on this bill?

Mr. HELMS. That will be up to the majority leader, of course, but I expect it will be late in the afternoon because we were a little delayed getting started on the amendments. But I will be glad to inquire of the majority leader and let the Senator know.

Mr. HART. That will be extremely helpful for this Senator if he does.

Mr. HELMS. I am glad to do that.

Mr. GLENN. Mr. President, if the Senator will yield, I have a question here. In reading through this for the first time, I am not sure I understand the language, and I wish to have it clarified before we vote on this, if I might.

It says that the Secretary of Energy can exchange market value at the time of such request of at least $300 million.

Was that the intent of this, because that would mean that the upper end of it would be unlimited, as I read this? He could go up to billions and billions of dollars worth of exchange with no further approval required from Congress. Is that the correct language on that?

This would say he would have to do at least $300 million but he could go to $300 billion legally and we would be backing him, if I read this correctly. Or am I misinterpreting this?

Mr. McCLURE. If the Senator will permit me to attempt to answer that, first of all, it is a permissive program. It is not mandatory. Second, I view it

as being subject to the same acquisition authority for the strategic petroleum reserve as is now in current law. We have an acquisition rate stated in law.

Mr. GLENN. The upper limit would be, then, whatever the acquisition rate is or what the price per barrel would be on the exchange at that time?

Mr. McCLURE. The Senator is correct.

Mr. GLENN. The $300 million would be a minimum. Do you have any estimate of what the upper limit could be?

Mr. McCLURE. The upper limit is $561 million, roughly.

Mr. GLENN. That would be at the current price level?

Mr. McCLURE. Yes.

Mr. GLENN. I thank the Senator.

Mr. MATTINGLY. That is also conditioned on the Secretary of Agriculture approving it.

The PRESIDING OFFICER. Is there further discussion on the amendment? If there is no further discussion, the question is on agreeing to the amendment of the Senator from Georgia [Mr. MATTINGLY]. The yeas and nays have been ordered and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from Colorado [Mr. ARMSTRONG], the Senator from Arizona [Mr. GOLDWATER], the Senator from Oregon [Mr. HATFIELD], the Senator from Maryland [Mr. MATHIAS], the Senator from Oregon [Mr. PACKWOOD], the Senator from Alaska [Mr. STEVENS], and the Senator from Wyoming [Mr. WALLOP] are necessarily absent.

I also announce that the Senator from California [Mr. WILSON] is absent on official business.

Mr. BYRD. I announce that the Senator from Texas [Mr. BENTSEN], the Senator from Florida [Mr. CHILES], the Senator from California [Mr. CRANSTON], and the Senator from West Virginia [Mr. ROCKEFELLER] are necessarily absent.

I further announce that the Senator from Massachusetts [Mr. KENNEDY] is absent on official business.

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 83, nays 4, as follows:

[Rollcall Vote No. 257 Leg.]

Goldwater	Rockefeller	

So the amendment (No. 891) was agreed to.

Mr. MATTINGLY. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. MATTINGLY. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. GRASSLEY addressed the Chair.

The PRESIDING OFFICER. The Senator from Iowa is recognized.

Mr. GRASSLEY. Mr. President, I have some remarks that I want to make on the farm bill. Before I do that, there are a couple of points I would like to raise for the benefit of all my colleagues. One is that I was just informed this morning that the area offices for the USDA—I presume that would be the area office that covered Iowa—called the Iowa State Agricultural Stabilization Conservation Service Office, the ASCS Office, 2 days ago. They wanted to know this about Senator HARKIN and about Senator GRASSLEY. They wanted to know how many acres we farmed, they wanted to know whether or not we were participating in this year's feed grain program, and they wanted to know what payments we received.

For my part, I am willing to tell the Senate what my State ASCS people there in Iowa, who are civil servants, said in return. I do not want to say anything for Senator HARKIN. I will let him find out for himself and then he probably will want to report his own findings.

They reported that I had cash rented my land. They reported that as a result of that cash rent, in the truest sense of their definition of being in the program, I was not in the program and that I had received $368 sometime in the last 4 or 5 years on some sort of payment from the Federal Government. Off the top of my head right now, I really do not know what that was for, but I do not question that it was given.

The point that I am making here is that I think each one of my colleagues in this body ought to call their State ASCS office and see if that same inquiry was made by the USDA here in Washington about whether the Senators from the various States participate in the program, how many acres they own as a farmer, and how much payment they receive.

I am not sure I know the purpose of those questions being asked. I do happen to know, because there was contact between my State ASCS office and another State ASCS office, that at least one other inquiry has been made in the 50 States about two other Senators in this body.

I would think if they wanted to know this information they would come directly to us and ask us. Maybe it is a normal thing to be done. Maybe it is a normal inquiry that they make every year.

But I do know this, it was made 2 days ago, just prior to our going on this farm bill. I can also say that the same inquiry was not made of my State ASCS office in regard to the various participations of our colleagues in the other body.

My point in using this method, as opposed to sending a "Dear Colleague" letter is to alert my colleagues of this inquiry if they are interested, and, second, and I will do this more directly, I am going to ask Secretary Block what this information is used for.

That is the end of that part of my remarks. That was not part of what I was prepared to talk about this morning. I just received that call a couple of hours ago.

Mr. HELMS. Will the Senator yield?

Mr. GRASSLEY. Yes.

Mr. HELMS. Did the Senator say the USDA called his State?

Mr. GRASSLEY. Yes.

Mr. HELMS. Do you know who made the call?

Mr. GRASSLEY. I do not know the person's name, but I know it is from what is referred to as the area office. That would be the supervisory office here in Washington of the region where Iowa is one of the States. The call was made from that office to our State ASCS office. That was reported to me. I do not want to speak for the other State that I know was involved. I have alerted one of the two Senators from that other State of the fact that a call was made and I told him that he could call his State ASCS director. I told him where I got my information.

Mr. GRASSLEY. The second point I would like to make, and this point has not yet been raised in this debate, is I am sure when we are talking about aspects of this bill that are budgeted items, specifically how much this bill is going to cost, we are going to have the word given to us by some of our colleagues that this bill is so many dol-

lars over budget and that it ought to be reduced. The reason for this is because there will be a threat of a veto hanging over our heads.

I cannot say that anybody has told me directly from the White House or from the USDA that a bill of this cost which is now before us is going to be vetoed, but that is all you have read in the paper, that is all you have seen on television. Every aspect of this farm bill downtown deals simply with dollars, with cost.

I think this is a legitimate question to pose before we get very far into this debate, not only for the colleagues of mine who might share the position of the administration that we might pass something that is too costly, but also if someone comes to the conclusion that the budget items are not that big, we can get that behind us and out of the way.

I would like to put this proposition to my colleagues and the administration: Of all the bills that I know we are going to have before us for consideration, none of those costs in budget are as costly as what the farm program of 1949 would be. If we do not pass farm legislation, there is a reversion to the 1949 legislation. It is my understanding that that would cost two to three times anything we are talking about in this debate. In many respects, again referring to something the administration has said they do not like about some of the legislation being proposed up here, that there is too much regimentation in it, I believe we would all agree that the 1949 law has more regimentation in it and more cost than we are going to send downtown for this President to review.

So if the President is concerned just about cost, and that is basically all we have heard from downtown, then I would ask, if he vetoes this, how can he legitimatize his judgment of cost if what is left on the books is three times more expensive than anything we send down there?

I would suggest that if the President would veto a bill and he would figure that some other bill would pass, that may be legitimate strategy, but I would also suggest that if Congress would bow its back and pass no legislation, that the President of the United States, because of his veto of this farm bill, is stuck with a farm program more costly than anything we are going to send to him.

I think that is the way it has to work out. I think that is the way it will work out. I think if those are the facts, then I suggest two things: The President review and stop making the public comments on costs of legislation, and, second, he consider where we might end up if he does veto a bill. He should look positively at what is going to be presented here. On the bottom line, this would not be as costly as the 1949 legislation we could end up with.

Mr. MELCHER. Mr. President, will the Senator yield?

Mr. GRASSLEY. I will yield in the sense of whatever the rules are, that I hold the floor.

The PRESIDING OFFICER. Does the Senator yield for a question?

Mr. GRASSLEY. Yes, I yield.

Mr. MELCHER. The Senator from Iowa has been laying out the honest to God truth. The Senator from Iowa is reflecting what the Governor of Iowa has recently stated and I might add the Governor is of the same party as the distinguished Senator from Iowa.

My question is simply this: Some of us believe that in the rush of concluding the committee action on the bill, there were some points that were overlooked by the committee that are possible actual savings. In other words, if the committee had looked directly at some of the possibilities of savings, the committee, I feel certain, would have adopted some of those savings. We have been comparing the Senate bill with the House-passed bill. We see things in that bill that are actual savings and not detrimental to the farm procedures of this country.

My question is this: Would the Senator agree, that should we make all the possible savings that are not detrimental to the producers and their ability to continue operation? And in doing so improve the farm bill by making such savings, but not to go beyond those savings that would be detrimental to the producers themselves?

Mr. GRASSLEY. If the Senator from Montana is asking me if I would agree with that, obviously, the answer is yes. I think we ought to try to save wherever we can and be concerned about the cost. I am only trying to make the point that I am getting a little tired of veto threats when even the Secretary of Agriculture admitted on a major television program a couple of weekends ago that the 1949 legislation was much more expensive. If they are just worried about budget items, they ought to be thinking in terms of what the result of the veto can be.

I hope that we have people downtown who are that forward-looking in the process, that they know that this is a fact.

Mr. MELCHER. I believe that the Senator from Iowa makes a very rational and practical point. I suspect that we shall have to have a rather thorough discussion of this very point in some detail so that people in the Department of Agriculture and the people in the White House and the people in the Office of Management and Budget are aware of these very points, because they are very valid.

To return to the 1949 basic law is not very practical. To return to what we are doing right now in the current year is not very practical as far as costs are concerned.

I commend the Senator for his statement. I also advise the Senator that there are some cuts that can be made that are practical, that will not damage the agriculture producers, and that will nevertheless save some money and they do run into the billions of dollars. I ask him if he would like to work with me on developing those types of cuts.

Mr. GRASSLEY. Yes, Mr. President.

Mr. ANDREWS. Mr. President, will my colleague yield?

Mr. GRASSLEY. I yield to the Senator from North Dakota.

Mr. ANDREWS. I appreciate my colleague's yielding. I was listening to my colleague from Iowa on the floor. I picked up my phone to call my State ASCS director to find out if I have had a similar call on my farm. And I have.

I do not know what kind of Big Brother-Gestapo tactics have all of a sudden come into the Department of Agriculture. Let us face it: The Senator from Iowa and I are both farmers. Our constituents know we are farmers. Everybody knows how many acres we have, they know how many head of four-legged losers I have in my feed lot.

I find it personally objectionable for Big Brother to sit down in Washington and call out behind my back and suddenly say, what does the Senator get in payments on this program, that program, and the other program? These are all public records. As I say, everybody in North Dakota and everybody in Iowa knows how much farmland CHUCK GRASSLEY and MARK ANDREWS have. They know whether I have wild oats growing or whether my 2,4.D applications work. In fact, they drive by my farm, probably, more often than I do. That is what is known as total disclosure.

Let me also point out for the Record if they are interested down there that I do not have any loans at low-interest rates from Government entities.

Let me also point out, and I think it ought to be said, as long as they want to find out about my farm operation or Senator GRASSLEY's farm operation, that I do not owe any entity of the Federal Government pass-through loans, and I am not looking for any special deals, and I do not have partners that are in on things going on.

My farm is open, as it has been for a hundred years, to anybody—our neighbors, our State, our people. They know we are farmers, they appreciate the fact that we are farmers.

I know, Mr. President, I sort of think they elect us to come down here because they are proud to have farmers representing them. And all of a sudden to find out—I would not have known it if any colleague had not brought it

up—that Big Brother over in the Department of Agriculture does not have enough to do so they are picking up the phone to call up and find out what kind of farm operation we run, what kind of program payments—I wonder if my colleague from Iowa could enlighten me on this: Would he suppose that there might be some idea of some threat or something, that they are going to call and say that they are going to somehow cut off these farm program payments? Or are they somehow or other saying that we should not participate in the farm programs that we inflict on other farmers?

I always figured that farm programs force you to cut back production and do all the rest and you are not doing your dead-level best if you do not cooperate with programs you have passed and foist on other farmers. Is that not essentially the way my friend and colleague from Iowa feels?

Mr. GRASSLEY. Yes, Mr. President, and it is not too different from the intimidation that you might get from the IRS or the Defense Department or a lot of those other agencies that we have involvement with over a long period of time.

Mr. ANDREWS. I wonder also, Mr. President, if when they were calling up the different State ASCS offices, they would call up the State of California or—is it Arizona—to find out John Norton's figures, and if they would call some of the other States to find out about people in the department?

These are matters of public record. This administration, without that kind of Gestapo threat, blackmail, or whatever kind of tactic it is—I am wondering. I do not think the general public likes it. These are public figures that they can have. But let me make this point in agreement totally with my friend from Iowa.

I wish they would spend their talents on giving us honest figures on these various parts of the farm bill we put together around that table in the Senate committee room. I recall when we had a marketing loan concept—and I know my friend from Iowa supports it because it is a new idea, it will let us be competitive in the marketplace—that they phonied up the figures that they gave to us. On the next day, when we came back at them and said, "Look, you are $100 an acre off on these figures," they were forced to admit they were. But by then, the damage had been done.

I wish they would spend a little more of their time, if they have so much of it, in giving us accurate figures on budget impact, giving us accurate figures on the budget impact if we do not put together a sensible Farm Program, and get this information to us so that we can do our work based on honest figures.

If they want to know about my farm, they can just ask any one of my neighbors. They know about it. I am sure if they want to know about Senator GRASSLEY's farm, they can ask any one of his neighbors. I think farmers in North Dakota, farmers in Iowa, and farmers generally around this country resent the fact that while they are complaining about the money we are spending in agriculture, we have people who are so unemployed in the department that major figures can spend their time to call up behind our backs and want to know what kind of farm program payments we are getting.

I appreciate the Senator bringing it to the floor, and I share his, shall we say, disgust and, let me add, surprise that this is the kind of tactic that is going on in the Department of Agriculture.

(Later the following occurred:)

Mr. GRASSLEY. Mr. President, I ask to have inserted in the RECORD further explanation of the first point I made in my remarks today; that is, that there has been some followup communication with the Department of Agriculture as a result of my statement which I made about the Agriculture Department making requests about Senators' participation in the Farm Program. We have been told by the U.S. Department of Agriculture that a Member of Congress had requested that information. Under the Freedom of Information Act, we have not found out who that Member is. It seems to me like if the USDA is making that request at the behest of a Member of Congress, they ought to tell us who that Member is. But I did want to say to my colleagues that I do have that additional information now at 3 o'clock in the afternoon that I did not have at 1 o'clock in the afternoon. I would like to have what I just now said inserted in the RECORD as a clarification at that point in the RECORD.

I yield to the Senator from Iowa.

The PRESIDING OFFICER. Without objection, the request is granted.

Mr. HARKIN. I thank my colleague for yielding.

I understand the Senator to say this was requested by a Member of Congress. Does the Senator mean a Member of the other body, or this body, or do you have any information on that, and also does not the Freedom of Information Act allow us to find out who made that request? That ought to be public information.

Mr. GRASSLEY. The information that I have now given was information my staff has given me, their communication with the Secretary's office, and then some information that Senator ANDREWS from North Dakota had spoken with the USDA about. The first instance was there was an indication it was a Member of the Senate. Then there was retraction, saying it was a Member of Congress. Then as a result of several requests, not only by Members of this body, but also by members of the press, that the information will not be given out, or at least the questions have not been answered as to what Members of Congress requested it. I would suggest the Freedom of Information Act should allow us to have that information, but I presume, too, that the redtape of getting it under Freedom of Information Act would be so great we might not know it soon enough to do us much good. I would call upon the U.S. Department of Agriculture to be forthcoming with that information.

Mr. HARKIN. If my colleague will yield further, I would think if any Member of this body or the other body would want that information on any of us from Iowa or any other State they can come and ask us. We would tell them. It is public information. They do not have to surreptitiously try to go get it anywhere. It is on the record. There is nothing wrong with anyone finding out that information. I find it curious, I guess, that someone would be, at this point in time, delving into something like it.

Mr. GRASSLEY. Very curious. I would associate myself with the conclusions drawn by may colleague from Iowa.

Mr. HARKIN. I thank my friend from Iowa.

(Conclusion of later proceedings.)

Mr. PRESSLER. Mr. President, I was going to speak to the points of the farm bill, but I have been told that the Senator from Tennessee is under a tight schedule. I will relinguish the floor for whatever the normal order of business would be and then I will try to get the floor back at a later time.

AMENDMENT NO. 892

(Purpose: To prohibit the importation of any tobacco produced or processed with the use of a pesticide that is not registered under the Federal insecticide, Fungicide, and Rodenticide Act)

Mr. GORE. Madam President, I deeply appreciate the courtesy of the Senator from Iowa. I have an amendment which I send to the desk and ask for its immediate consideration.

The PRESIDING OFFICER (Mrs. KASSEBAUM). The clerk will report.

The legislative clerk read as follows:

The Senator from Tennessee [Mr. GORE] proposes an amendment numbered 892.

Mr. GORE. Madam President, I ask unanimous consent that further reading of the amendment be dispensed with.

The amendment is as follows:

On page 459, between lines 18 and 19, insert the following new section:

TOBACCO PESTICIDE RESIDUES

SEC. . (a) Section 213 of the Dairy and Tobacco Adjustment Act of 1983 (7 U.S.C. 511r) is amended by adding at the end thereof the following new subsection:

"(e)(1) Notwithstanding any other provision of law, any tobacco offered for importation into the United States shall be accompanied by a certification by the importer, in such form as the Secretary of Agriculture shall prescribe, that the tobacco has not been produced or processed with the use of a pesticide that is not registered under the Federal Insecticide, Fungicide, and Rodenticide Act (7 U.S.C. 135 et seq.).

"(2) Any tobacco that is not accompanied by the certification required by paragraph (1) shall not be permitted entry into the United States.

"(3) The Secretary, to such extent and at such times as the Secretary determines appropriate, shall sample and test tobacco offered for importation on entry into the United States to determine whether that tobacco conforms with the certification required under this subsection.

"(4) The Secretary shall by regulation provide that domestically produced tobacco is subject to substantially the same requirements with respect to residues of any pesticide as apply to tobacco offered for importation.

"(5)(A) Subject to subparagraph (B), if the Secretary determines that Flue-cured or Burley tobacco does not meet the requirements of this section, such tobacco may not be moved in commerce among the States and shall be destroyed by the Secretary.

"(B) This paragraph shall apply only to tobacco produced after the date of enactment of this provision that receives price support under the Agricultural Adjustment Act of 1938 (7 U.S.C. 1281 et seq.) or the Agricutural Act of 1949 (7 U.S.C. 1421 et seq.).".

"(b)(1) The second sentence of section 213(c) of such Act is amended by striking out "such subsection" and inserting in lieu thereof "this section".

(2) The second sentence of section 213(d) of such Act is amended by inserting "and subsection (e)" after "subsection (a)(1)".

Mr. GORE. Madam President, let me briefly explain this amendment. I would hope that every single Senator on both sides of the aisle would vote in favor of this amendment. It is a farmer issue, and it is simultaneously a consumer issue. Briefly, all domestic tobacco has to be certified free of pesticides banned for use in the United States. This is to protect the consumers of tobacco against residue in the tobacco and also the farmers who use the substances involved. But foreign tobacco imported into the United States does not have to be so certified, and now the volume of imported tobacco has grown to where it is one-third of the total tobacco consumed.

So we have a situation where American tobacco farmers are prevented from using these chemicals and yet their competitors overseas are allowed to use the same chemicals. That puts the American tobacco farmer at a competitive disadvantage and is one among several factors that has led to the dramatic increase in the amount of imported tobacco sold in the United States.

Second, the American consumers of tobacco, who believe that they are protected by the chemical pesticide laws that prevent American tobacco farmers from using these banned substances, are exposed to the very same chemicals because one-third of all the tobacco they consume has these residues. If you are in favor of the tobacco farmer in Bulgaria, then vote against this amendment because Bulgarian farmers can use these banned pesticides and send them into the United States. If you are in favor of the tobacco farmer in Zimbabwe and want to give that tobacco farmer an additional advantage over the American tobacco farmer, then vote against the amendment. If you want to expose the American tobacco consumer to these chemicals that are judged to be so harmful they have to be banned in the United States, then vote against this amendment.

This amendment has been endorsed by the North Carolina Farm Bureau. It has been endorsed by the American Farm Bureau Federation. And I might say the North Carolina Farm Bureau Tobacco Specialist is probably one of the leading experts on this matter in the entire United States.

There are no implications for GATT. I have a study prepared by the Congressional Research Service which I will supply to any Senator who is interested. If there is enough interest, I will put it in the RECORD, but it is so lengthy that I do not want to take that step. But suffice it to say, this amendment is "GATTable," a phrase common in discussions of trade—fair trade and unfair trade.

So this amendment, Madam President, has something for everyone. It is pro farmer and pro consumer. It would accomplish the modest objective of prohibiting the importation of tobacco into this country which uses pesticides and other chemicals which are banned in the United States. Let me say this amendment is very similar to the provisions of S. 67 which I introduced earlier this year. Indeed, this was the very first bill that I introduced upon becoming a Member of this body. A few moments after I was sworn in in January, I introduced this legislation.

It is also very similar to legislation I introduced last year in the other body and legislation that has long been advocated by the Senator from Ohio [Mr. METZENBAUM]. He advocated it vigorously last year in the conference committee with some success but it fell short of final adoption as did my legislation in the other body.

This amendment would very simply require imported tobacco to comply with exactly the same pesticide certification requirements that we currently impose on American-grow tobacco. It would not impose any additional restrictions whatsoever on any American tobacco. It would simply protect American consumers from these harmful substances in foreign tobacco just as the consumer is protected now from these substances in domestic tobacco. It is designed to protect both the American farmer and the health of the American people. It is also designed to give American farmers an opportunity to compete more fairly with their foreign competitors because if there was ever an example of an unfair trade practice that ought to be immediately eliminated, this is it.

Under current law, we tie the hands of the American tobacco farmer, tell him he cannot use these substances—incidentally, I agree he should not use these substances because they do pose a health risk—but we leave the foreign competitor totally free to use these harmful substances and simultaneously threaten the health of American consumers and drive more American tobacco farmers out of business.

In recent years, as I mentioned, the amount of foreign tobacco imported into America has increased dramatically up to the point now where one-third of the tobacco in American cigarettes is imported. In 1969 our country imported only 9 million pounds of foreign tobacco. By 1983, we were importing 240,000 metric tons of tobacco annually, an increase of 1900 percent over 1969, and an increase of 30 percent over 1982 alone. By 1983 imports of unmanufactured tobacco exceeded $743 million.

Now, let me state, Madam President, what this amendment will and will not do. It will require that imported tobacco be certified as not containing unapproved pesticides before it can be brought into this country.

This is exactly the same requirement that American growers must comply with before selling their tobacco in this country. American tobacco farmers are quite aware of this issue. In fact, there are very few issues that have provoked as much concern and response from tobacco farmers as this unfairness with which they have to deal. In the United States today tobacco farmers have to abide by strict regulations. These regulations prohibit the use of a number of pesticides and other chemicals such as DDT, dieldrin, endrin, toxaphene, and others, all of which have been banned for health reasons, and yet we have absolutely no restrictions whatsoever on tobacco being imported into the United States with respect to these very same chemicals and pesticides. In fact, no agency of the Federal Government knows or keeps track of what pesticides or other chemicals are being used on tobacco being imported into the United States despite the potential health hazard imposed by this problem and despite this disadvantage to the American tobacco farmer.

Our failure to act harms America's tobacco farmers seriously and jeopardizes the 50 to 54 million Americans who smoke. Six hundred billion cigarettes a year are smoked by Ameri-

cans, one-third of the tobacco in those cigarettes comes from foreign producers, yet we have no information about what hazardous substances contaminate that tobacco. We do not even have records of the countries from which we import and have never attempted to determine what their policies are with regard to substances banned for use in the United States. How can the American farmer compete? How can American consumers protect themselves, if we do not even collect this vital information?

There is serious reason for concern. Turkey, Bulgaria, Lebanon, and Zimbabwe are all large suppliers of imported tobacco leaf; yet, the only survey ever done about the use of pesticides and other chemicals used abroad, a survey conducted by the State Department, produced no information about the chemicals used in those countries. What the survey did reveal is that many countries do permit the use of pesticides banned from use in the United States. For example, tobacco from Thailand is imported into the United States; but we know that Thailand permits the use of DDT; dieldrin, and endrin, each of which has been banned in this country for health reasons. In the Philippines, the only chemical banned is DDT. In New Zealand and Australia, DDT is used to treat the soil. And evidence is accumulating that DDT is the pesticide of choice in Brazil, a country from whom we are importing massive and increasing amount of burley tobacco. Unfortunately, what we know about this issue is still less than what we do not know, where the use of pesticides in these foreign countries is concerned. This amendment would give us that information.

To some, the bill may appear to be motivated by protectionist concerns. Nothing could be further from the truth. This bill only seeks to place foreign producers of tobacco on the same ground as our American farmers. The United States not only has a right to impose those health and safety restrictions on imported products, it has an obligation to its citizens to do so.

There is no reason whatsoever for imported tobacco to be exempt from these requirements. What this bill does with regard to tobacco, we already do for most products imported into the United States. For example, we require importers of foreign automobiles to meet our pollution and safety standards. Importers of machinery and consumer products are required to comply with health and safety standards applicable to all products sold in the United States. We already also require cigarette packages imported in the United States to comply with the labeling provisions of the Federal Cigarette Labeling and Advertising Act. The United States would not be the first country to impose the requirements I am proposing. West Germany has gone even further by prohibiting the importation of tobacco containing any chemical or additive not on an approved list.

In conclusion, the amendment represents a cautious, reasonable approach to a potentially serious problem. It is an amendment that directly benefits both the American farmer and the American consumer. And it is a classic example of action that we can take to ensure that our farmers are playing on a level field, without endangering our trade relationships.

Madam President, I am honored to offer this amendment in conjunction with the Senator from Tennessee [Mr. SASSER] and the Senator from Ohio [Mr. METZENBAUM], to whom I referred earlier and to whose efforts I referred earlier.

The amendment embodies a bill that has been introduced and is cosponsored by the Senator from Kentucky [Mr. FORD], the Senator from Maryland [Mr. SARBANES], the Senator from South Carolina [Mr. HOLLINGS], the Senator from Ohio [Mr. GLENN], the Senator from Hawaii [Mr. INOUYE], the Senator from Tennessee [Mr. SASSER], and myself. I urge my colleagues on both sides of the aisle to support this amendment.

I yield the floor, Madam President.

Mr. HELMS. Madam President, I say to the distinguished Senator from Tennessee that this is an attractive amendment, the thrust of which I support. I did not see the draft of his amendment until a few minutes ago, and I feel obliged to ask the Senator his intent, just for the purpose of legislative history.

On page 1, the Senator's amendment states:

> Notwithstanding any other provision of law, any tobacco offered for importation into the United States shall be accompanied by a certification by the importer, in such form as the Secretary of Agriculture * * *

Does the Senator contemplate that each hogshead of tobacco be certified?

Mr. GORE. Will the Senator repeat the question?

Mr. HELMS. On page 1——

Mr. GORE. I heard the last part. It was just the last sentence.

Mr. HELMS. Does the Senator contemplate that each hogshead of tobacco shall be plugged and examined?

Mr. GORE. Each what?

Mr. HELMS. Each hogshead, each container of tobacco.

Mr. GORE. In response, the importer would have to certify that each shipment of tobacco and all tobacco imported by that importer meets the requirements. The inspection process for verifying the certification would not require that each container be sampled, because they could sample and test, according to the second page, subsection 3, as follows:

> The Secretary, to such extent and at such times as the Secretary determines appropriate, shall sample and test tobacco offered for importation on entry into the United States to determine whether that tobacco conforms with the certification required under this subsection.

The process is intended to be similar to the one that is used for American farmers. They have to certify all that, but there are just samples that are tested.

Mr. HELMS. The Senator referred to the portion on page 2, beginning on line 7, that appeared to present the possibility of a contradiction. What the Senator is saying, then, in effect, is that the Secretary of Agriculture shall prescribe how this is to be done. Is that correct?

Mr. GORE. That is correct.

Mr. HELMS. And he is not saying that this amendment would mandate that every hogshead of tobacco be examined. That would be determined by the Secretary of Agriculture, to protect the health of the consumer. Is that correct?

Mr. GORE. The distinguished chairman of the committee is correct, and that is an important clarification, because the amendment should not be interpreted to require the Secretary to inspect every single leaf that is imported. Far from it. The Secretary can determine the appropriate way to set up a sample testing procedure. However, the person importing the tobacco must certify that all the tobacco that importer brings into the country is free and clear, just as an American tobacco farmer has to do the same.

Mr. HELMS. On line 21 of page 2, the Senator is saving, in effect, that this would begin with the 1986 crop.

Mr. GORE. It is intended to operate prospectively, and it applies only to tobacco produced after the date of enactment of this provision. It would not apply to any tobacco that was produced before the date of enactment.

Mr. HELMS. I thank the Senator.

Madam President, the Senator's amendment makes sense, particularly when one considers that we have a tobacco program reform proposal in the reconciliation bill, which is intended and would in fact have the effect of reducing enormously the amount of imported tobacco. I think the Senator may have a little bit of that in his mind with his amendment.

I have become disturbed over a period of several years at the growing percentage of imported tobacco, laying aside the pesticide content, and our legislation was drawn with the purpose of encouraging the tobacco companies to use more domestic tobacco.

I think the Senator, while he is very much interested in the health of the American people, and so am I, is also mindful that this may serve more than one purpose.

So, that is the upside of it. It should protect the health of the American people by prohibiting the importation of tobacco containing pesticides and other chemicals that are not permitted in this country.

The Senator is right. The farmer growing the imported tobacco is not subjected to the same pesticide restrictions as the American farmer and obviously that is not fair and that is the point the Senator made and made eloquently.

The implementation as we have just discussed of this amendment could result in a decrease in imported tobacco. That, as the Prince of Denmark once said, is a consummation devoutly to be wished.

The other side of the coin, and I feel obliged to mention it, is the Senator is certain, and I take his word for it, that it would not violate GATT or any other agreements.

Mr. GORE. If the chairman will yield on that particular point, I asked the Congressional Research Division of the Library of Congress to do a lengthy study of that legal question and what their response boiled down to, in essence, is that this amendment would not do anything that could be construed as a violation of GATT.

Mr. HELMS. That is encouraging.

Madam President, the USDA requires, as the Senator knows, as a condition of price support eligibility, that our farmers—our producers—certify that they have not used DDT, TDE, Toxaphene, or endrin in the production of their tobacco. Even if the American grower has used the restricted pesticide he is still eligible to have his tobacco graded and marketed. The importer would be denied marketing opportunity under this provision.

Madam President, if the Senator will forbear, let me consult with my staff for just a moment.

Mr. GORE. If the chairman will yield, while he is conferring here, Madam President, I ask unanimous consent that the Senator from New Mexico [Mr. BINGAMAN] be listed as a cosponsor of this amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GORE. I wish again to pay tribute to the Senator from Kentucky who is a cosponsor of the bill which led to this amendment.

Mr. GRASSLEY. Madam President, will the Senator yield?

Mr. GORE. I am delighted to yield.

Mr. GRASSLEY. No. 1, I would also like to be a cosponsor of his amendment and then, No. 2, and this is not a facetious comment but I would like to know. First of all, I obviously support his amendment or I would not cosponsor it, and I very much support the direction that the Senator is going and I could have said the same thing earlier today to Senator PRESSLER on his amendment.

But in what might appear to be a facetious comment I would like to ask if your amendment has been cleared by the State Department. And obviously the Senator probably has not even asked the State Department and I hope he has not.

Let me say why I make that point. I remember the years when I was in the other body, and the Senator from Tennessee served in that other body as well, I served on the Agriculture Committee over there and I remember many a time some of us tried to get similar amendments adopted through the House Agriculture Committee and we were very unsuccessful. Maybe the environment is different. I hope it is, because I want the Senator's amendment to become law.

But I remember at some of the negotiations right in markup sessions we not only had people from the Agriculture Department there but we had people from the State Department called in, and they very much oppose this sort of an amendment. Somehow it was treading on their turf. It would maybe bring about bad relationships between the United States and other countries, just as if that ought to be the primary purpose or primary consideration as opposed to the Senator's primary consideration of putting the consumer of America first.

So, I hope the Senator's amendment would call to attention for my colleagues another point, a point in a larger setting. What I would like to have my colleagues consider in the next 2 weeks of debate on farm legislation is the extent to which so many things have affected agriculture adversely. To a large extent we have had a preeminence of the State Department in those policy decisions and to that extent it has hurt agriculture tremendously.

In consideration of this, I am sure the points are going to be made that the reason agriculture is in bad shape is that we had high support prices. But there are a lot of things done by nonagricultural interests and policy decisions in that area that have been very detrimental to agriculture. One of those has been that we have had an inconsistent policy for the consumers of this country that somehow some pesticides and other additives would be bad if those additives were put on domestic crops but they were OK in the case of imports from foreign countries.

That has been very costly but most important it has been very unfair and it has been unfair both to the farmer and it has been unfair to our consumer.

I thank the Senator from Tennessee for yielding.

Mr. GORE. Madam President, with the indulgence of the Senator from North Carolina, I apologize for presuming to yield earlier. It is the time of the Senator from North Carolina.

Mr. HELMS. That is quite all right. I enjoyed what the Senator from Iowa said. I shall tell the Senate what the Senator from Iowa is saying. He is saying that the State Department has an African desk, a South American desk, a European desk, an Asian desk. The Senator said it is about time the State Department had an American desk. Is that right?

Mr. GRASSLEY. Yes.

Mr. HELMS. OK.

I yield to the Senator.

Mr. GORE. Madam President, I ask unanimous consent that the Senator from Iowa [Mr. GRASSLEY] be added as a cosponsor of the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GORE. In response to the question that he assures me is not facetious I will say to the Senator from Iowa that I did not take the step of asking the State Department for formal clearance on the amendment. Perhaps I should have shown them that courtesy, but it is a matter of public record. I introduced it as legislation in January. I introduced it last year. It has been debated by many Senators and Members of the other body who have long favored an idea similar to this one.

The State Department has had ample opportunity to register its objections to this particular amendment if it wishes to.

The only thing that I could conceive of them objecting to would be its intersection with GATT and, as I mentioned earlier because it imposes on imported tobacco only exactly those requirements imposed on our domestic producers, it poses no problems under GATT.

I appreciate the distinguished chairman yielding to me for that interchange.

Mr. HELMS. Very well.

I apologize for the delay but, as I say, I just saw the amendment right after the Senator offered it. I feel obliged to have as much legislative history as I can.

On page 2, line 18, the Senator's amendment states: "Such tobacco may not be moved in commerce among the States and shall be destroyed by the Secretary."

Just for the record, who pays for the destroyed tobacco? What is the intent of the Senator with respect to that?

Mr. GORE. The source of the funding for that would be the same as the source of funding for destroying American tobacco which is found to be in violation of that same requirement.

Mr. HELMS. What is that?

Mr. GORE. I apologize to the chairman in saying that I presume that that source of funding is the Tobacco Program, but I do not have the precise answer to the chairman's question on the tip of my tongue.

Mr. HELMS. Frankly, neither do I. I will tell the Senator that I think it may be a good idea if perhaps we could have a colloquy subsequent to the consideration of the the amendment just to make the legislative history clear as to the Senator's intent. If he will agree to that, we could get together, or our representatives can get together and take care of that.

Mr. GORE. Does the Senator mean, have a colloquy after the amendment is adopted?

Mr. HELMS. Yes.

Mr. GORE. That would be fine.

Mr. HELMS. The important thing is the thrust of the amendment but it is also important to have the Senator's intent and, thereby, the Senate's intent, presuming that the amendment will be approved.

Mr. GORE. I will be delighted to do that.

Mr. HELMS. I thank the Senator.

Madam President, I am predisposed to accept the amendment and take it to conference.

Mr. MELCHER. Madam President, we have no objection to the amendment on this side.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Tennessee [Mr. GORE].

The amendment (No. 892) was agreed to.

(Later the following occurred:)

Mr. GORE. Mr. President, I ask unanimous consent that notwithstanding the pending business, I be allowed to make a motion to reconsider the vote on amendment No. 892.

The PRESIDING OFFICER. Is there objection? The Chair hears none and it is so ordered.

Mr. GORE. I move to reconsider the vote by which the amendment was agreed to.

Mr. MATSUNAGA. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

(Conclusions of later proceedings.)

AMENDMENT NO. 893

(Purpose: To extend the authorization for appropriations for the Federal Insecticide, Fungicide, and Rodenticide Act through fiscal year 1986)

Mr. PROXMIRE. Madam President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Wisconsin [Mr. PROXMIRE] proposes an amendment numbered 893.

Mr. PROXMIRE. Madam President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 445, beginning on line 10, strike out the comma after "57,067,300" and all that follows through "necessary" on line 12.

Mr. PROXMIRE. Madam President, I understand the managers of the bill are favorable to the amendment. This amendment would substitute a 1-year reauthorization of the Federal Insecticide, Fungicide, and Rodenticide Act for the 2-year reauthorization currently contained in the farm bill. As principal author of the FIFRA reform amendments, S. 1303, I am pleased that the campaign for pesticide reform, representing over 40 consumer, environmental and labor organizations, and the National Agricultural Chemicals Association, with 100 members, have recently reached basic agreement on FIFRA amendments which they intend to submit soon for our consideration. For more than a decade, the need for FIFRA reform has been the subject of substantial controversy between industry and environmentalists. This agreement between traditional antagonists is a substantial breakthrough. A 1-year reauthorization will permit the committee to consider this consensus legislation promptly.

Mr. HELMS. Madam President, on behalf of this side of the aisle, I am willing to accept the Senator from Wisconsin's amendment to substitute a 1-year reauthorization of FIFRA for the 2-year reauthorization that is presently contained in this legislation. A 1-year reauthorization for fiscal year 1986 will preserve FIFRA's legal authority, while allowing the Senate Agriculture Committee sufficient time to consider and review the so-called compromise agreement.

We expect to receive recommended statutory language soon which reflects the industry-environmental agreement. I am encouraged that negotiations on controversial FIFRA amendments have produced such a consensus, and believe this compromise language will provide a sound basis for the Agriculture Committee's review of the FIFRA statute next year.

Mr. STAFFORD. I am pleased that the distinguished chairman of the Agriculture Committee intends to review the FIFRA law next year. It is the view of this Senator that this law is vital to protection of public health and the environment from adverse effects of pesticides. Unfortunately, the Pesticide Regulatory Program has not worked as well as it should in some areas. This Senator believes that there is room for improvement in the law.

It is encouraging that representatives of the agricultural chemicals industry and the environmental community have agreed with one another on certain amendments. I commend them for their efforts. Whether the areas of agreement will expand, or even survive to debate over issues not yet agreed, remain to be seen. Whatever the outcome of those discussions, this Senator wishes to commend the distinguished chairman for his willingness to take on this important task. The job will not be easy, but it needs to be done.

Mr. DURENBERGER. I wish to associate myself with the remarks of the distinguished Senator from Vermont. As chairman of the Subcommittee on Toxic Substances and Environmental Oversight, I too am concerned about the problems that pesticide chemicals can cause. Numerous witnesses at subcommittee hearings have described problems with contaminated ground water, contaminated foodstuffs, and inadequate or incorrect data on pesticide toxicity. The time is right to being a review of the pesticide law in order to see whether it can be strengthened in appropriate places.

Mr. MELCHER. Madam President, we have no objection to the amendment on this side.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Wisconsin [Mr. PROXMIRE].

The amendment (No. 893) was agreed to.

Mr. PROXMIRE. Madam President, I wish to thank the distinguished chairman of the committee very much for accepting the amendment, and the distinguished ranking minority member.

Mr. HELMS. It is always a pleasure to work with the Senator from Wisconsin.

AMENDMENT NO. 894

(Purpose: To exempt REA financed electric and telephone systems from eligibility restrictions on borrowing from the banks for cooperatives)

Mr. ANDREWS. Madam President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from North Dakota [Mr. ANDREWS] proposes an amendment numbered 894.

Mr. ANDREWS. Madam President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

SEC. —. Section 3.8 of Farm Credit Act of 1971 (12 U.S.C. 2129) is amended by—

(1) inserting "(1)" immediately before "Any association"; and

(2) adding at the end thereof a new subsection (2) as follows:

"(2) Notwithstanding any other provision of this title, cooperatives and other entities which have received a loan, loan commitment, or loan guarantee from the Rural Electrification Administration, or a loan or loan commitment from the Rural Telephone Bank, or which have been certified by the Administrator of the Rural Electrifi-

cation Administration to be eligible for such a loan, loan commitment, or loan guarantee, and subsidiaries of such cooperatives or other entities, shall also be eligible to borrow from a bank for cooperatives."

Mr. ANDREWS. Madam President, the pending amendment would authorize the Farm Credit System's Banks for Cooperatives to extend credit to all rural utilities that participate in the programs administered by the Rural Electrification Administration.

Under current law, 60 percent of the members of a rural utility cooperative must be farmers for the cooperative to be eligible for financing through the Banks for Cooperatives. This restrictive eligiblity requirement eliminates the Banks for Cooperatives as a supplemental source of credit for most of the 2,000 rural utilities that participate in the Rural Electrification Administration programs.

By amending current law to modify the restrictive eligibility requirement, rural utilities will be provided an additional nongovernmental source of credit. However, I want to emphasize that this authority will not be used as a substitute for financing provided by the Rural Electrification Administration as authorized under the Rural Electrification Act.

Rather, this authority will be used primarily to provide supplemental financing in conjunction with low-interest REA loans to electric cooperatives under criteria approved by Congress. Under current law, REA can require electric borrowers to obtain up to 30 percent of their financing from supplemental sources. In addition, this authority will enable rural telephone systems and their subsidiaries to obtain financing for certain projects that contribute to the economic well-being of the telephone system's service area. Many of these projects undertaken by rural telephone systems involve so-called nonact purposes—meaning that such projects are ineligible for REA financing under the Rural Electrification Act. These nonact purposes usually involve providing of communications services—such as cable television facilities and cellular radio facilities that serve both rural and nonrural users.

As a result of divestiture and deregulation, many essential communication services involve both unregulated and regulated services. Generally, the Federal Communications Commission and State regulatory agencies require unregulated operations to be kept separate from regulated activities. This is to ensure that telephone users are not subsidizing unregulated commercial ventures.

Many rural telephone systems establish subsidiary companies to satisfy State and Federal regulators that revenues from regulated operations are not mixed with revenues from unregulated operations. In many cases, these unregulated subsidiary operations provide valuable services to rural consumers and essential revenues for rural telephone systems although such subsidiaries generally do not qualify for REA loans.

As indicated, the amendment has been designed to enable the Banks for Cooperatives to provide for the unmet credit needs of rural electric and telephone utilities and related subsidiaries. In addition, I believe rural consumers will receive a significant benefit in the form of more reasonable utility rates if this amendment is approved.

Finally, I will note that the amendment is supported by the National Rural Electric Cooperative Association, the National Telephone Cooperative Association, and the Rural Telecom Association.

I urge my colleagues to join me in supporting the amendment.

Mr. HELMS. Madam President, the Senator's amendment is a good one. It would amend the Farm Credit Act to authorize all borrowers who participate in the loan programs administered by the Rural Electrification Administration to obtain credit from the Farm Credit System's Banks for Cooperatives.

This amendment, by authorizing all rural utilities that participate in REA programs to obtain credit from the Banks for Cooperatives, will provide an alternative source of unsubsidized credit for borrowers who might otherwise be tempted to rely on Federal credit programs. I believe that is a desirable objective. We need to encourage greater reliance on nongovernmental sources of credit.

I want to emphasize two additional points about this amendment.

First, the amendment deals only with rural utility financing. This proposal is not designed, I ask the Senator from North Dakota, to be part of an emergency farm credit assistance package?

Mr. ANDREWS. No; it is not.

Mr. HELMS. I would say to my good friend that legislation of that nature will be considered as a separate bill after the Agriculture Committee has conducted hearings.

Second, this amendment will not get the Farm Credit System into a new line of business. That is correct, is it not?

Mr. ANDREWS. The Senator is absolutely correct.

Mr. HELMS. For nearly 15 years, the Banks for Cooperatives have been authorized to extend credit to rural utilities that meet certain eligibility requirements. The Banks for Cooperatives currently have outstanding loans or loan commitments in excess of $2.4 billion to rural utilities.

In 1971, the Banks for Cooperatives were authorized to provide financing to those rural electric and telephone cooperatives in which 80 percent of the voting control was held by farmers and ranchers. In 1975, that threshold was reduced to 70 percent of the voting control. With the Farm Credit Act Amendments of 1980, it was further reduced to 60 percent of the voting control.

Despite these periodic adjustments, the restrictive eligibility requirement has proved to be increasingly unworkable for most rural utility cooperatives—given the ever changing demographics of rural America. Urban sprawl, the diminishing number of farms, and the increasing number of nonfarm residents in rural areas will continue to decrease the number of rural utilities eligible to borrow from the Banks for Cooperatives.

These points were brought up during the farm bill hearings that were conducted in the spring of 1985 and the amendment is designed to address that issue.

As indicated, the amendment does not require the expenditure of tax dollars, nor does it create any new bureaucracies. In addition, it is my understanding that the administration and the Farm Credit Administration support the amendment.

For the reasons I have stated, I urge the adoption of the amendment.

(Mr. ABDNOR assumed the chair.)

Mr. ZORINSKY. Mr. President, I support the pending amendment because it would better enable the Farm Credit System's Banks for Cooperatives to serve the needs of rural electric and telephone systems and the consumers those systems serve.

Specifically, the amendment would authorize the Banks for Cooperatives to extend credit to all cooperatives and other entities which have received a loan, loan commitment, or loan guarantee from the Rural Electrification Administration, or a loan or loan commitment from the Rural Telephone Bank, or which have been certified by the Administrator of the Rural Electrification Administration to be eligible for such a loan, loan commitment, or loan guarantee, and subsidiaries of such cooperatives or other entities.

This authority would be in addition to the authority provided under current law.

Under current law, Banks for Cooperatives are authorized to extend credit to rural electric and telephone cooperatives in which farmers account for at least 60 percent of the voting members. This restrictive eligibility requirement eliminates the Banks for Cooperatives as a source of credit for most of the utility systems that serve rural areas.

Because of the restrictive eligibility requirement, rural utilities are denied access to a source of credit based on circumstances beyond the control of

the utilities or lenders. A utility becomes ineligible for Bank for Cooperative financing when service is extended to the household that causes the fraction of farmers in the service area to drop one person below 60 percent. Since most States require utilities to serve every customer in the service area, rural utilities have no control over the proportion of farmers to nonfarmers served.

In addition, by conforming the Banks for Cooperatives' eligibility requirement for utility lending to that of the Rural Electrification Administration, an unnecessary restriction on the marketplace will be eliminated. This will ensure that rural consumers receive the benefits of competition—in the form of lower utility rates.

In recent years, rural electric and telephone systems financed through the Rural Electrification Administration have found it necessary to diversify operations to replace revenues lost as a revenue of conservation practices in the electric industry and divestiture and deregulation in the telephone industry. Financing for those diversified operations is generally not available under programs administered by the Rural Electrification Administration. This amendment is intended to supplement, but not supplant, Rural Electrification Administration financing.

To ensure that rural utilities are able to fully benefit from the authority provided under this amendment, the administration should work with the Banks for Cooperatives and other lenders in developing a responsible lien accommodation policy. This amendment and a workable lien accommodation policy will protect the Government's interest and provide rural utilities access to financing that is needed but not currently available through Rural Electrification Administration programs.

It should be noted that under this amendment, the Banks for Cooperatives, like the Rural Electrification Administration, will be authorized to extend credit to certain rural utilities that are not organized as cooperatives. This is particularly important to Nebraska since the electric utility systems that serve my State are publicly owned and are not organized as cooperatives. In addition, about 750 rural telephone companies that are not organized as cooperatives but that are eligible for the programs administered by the Rural Electrification Administration would become eligible for Bank for Cooperative financing under this amendment.

Since 1971, when the Banks for Cooperatives were first authorized to extend credit to utility cooperatives that could meet the restrictive eligibility requirement, the Banks for Cooperatives have demonstrated a firm commitment to serving the needs of rural utilities. The Banks for Cooperatives have many strengths to offer: Established large funding capacity, industry knowledge, favorable interest rates, diverse loan portfolios, a commitment to serving the needs of rural America, as well as a service-oriented cooperative philosophy.

This proposal is supported by the National Rural Electric Cooperative Association and the National Telephone Cooperative Association. In addition, the Farm Credit Administration has testified in support of this type of legislation and I understand the administration has no objection to the amendment.

I urge my colleagues to join me in supporting the amendment.

The PRESIDING OFFICER (Mr. EAST). Is there further debate on the amendment? If not, the question is on agreeing to the amendment of the Senator from North Dakota.

The amendment (No. 894) was agreed to.

Mr. HELMS. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. ZORINSKY. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HELMS addressed the Chair.

The PRESIDING OFFICER. The Senator from North Carolina.

Mr. HELMS. Mr. President, I yield to the distinguished Senator from Kansas.

Mrs. KASSEBAUM. Mr. President, I appreciate the Senator from North Carolina yielding.

AMENDMENT NO. 895

(Purpose: To extend the National Agricultural Cost of Production Standards Review Board and provide that a member may serve on such Board for one or more terms)

Mrs. KASSEBAUM. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Kansas [Mrs. KASSEBAUM], for herself and Mr. DOLE, proposes an amendment numbered 895.

Mrs. KASSEBAUM. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 459, between lines 18 and 19, insert the following new section:

NATIONAL AGRICULTURAL COST OF PRODUCTION STANDARDS REVIEW BOARD

SEC. . (a) Subsection (c) of section 1006 of the Agriculture and Food Act of 1981 (7 U.S.C. 4102(c)) is amended to read as follows:

"(c) A person may serve as a member of the Board for one or more terms.".

(b) Section 1014 of such Act (7 U.S.C. 4110) is amended by striking out "1985" and inserting in lieu thereof "1989".

Mrs. KASSEBAUM. Mr. President, I offer this amendment on behalf of myself and Senator DOLE. The purpose of the amendment is to reauthorize the National Agricultural Cost of Production Standards Review Board. This advisory board was first established by the 1981 farm bill to review the accuracy and adequacy of the cost-of-production methodology used by the Department of Agriculture. This Board has been instrumental in determining specific costs associated with production agriculture and seeing that USDA's figures accurately reflect these costs.

This amendment would eliminate the limits that Board members may only serve two terms. Currently many experienced Board members would have to be removed from the Board in a short period of time.

Mr. President, I think it is important to have consistency of those who would continue to serve with the background of information they have garnered through the service they have already given from the infancy, so to speak, of this newborn. I understand that this same provision has been accepted in the House farm bill, H.R. 2100, and I appreciate the support of the majority leader. I believe it has also been cleared by the managers on both sides of the aisle.

I move its adoption, Mr. President.

Mr. DOLE. Mr. President, I support Senator KASSEBAUM's amendment regarding the National Agricultural Cost of Production Standards Review Board which she was instrumental in establishing as part of the 1981 farm bill. I understand the House has taken similar action and it is appropriate to confirm the important mission this Board undertakes by approving reauthorization language in the Senate farm bill as well.

PURPOSE

The makeup of the Board consists of seven farmers, three general members with the education and background needed to assess the production costs associated with the major agricultural commodities and a designee of the Department of Agriculture. Hopefully this mix of farmers working with agricultural professionals will provide a practical "hands on" approach to determining national average cost of production figures and provide useful advice to the Secretary of Agriculture regarding such methodology.

IMPROVED LANGUAGE

This amendment also removes the cap on the number of terms each member can serve. Since much of the data reviewed by Board members is of a technical nature, it is necessary to maintain a consistent level of expertise among members in order to com-

plete the Board's review of cost of production data.

Mr. President, adopting the amendment will benefit farmers through the development of more accurate methodologies reflective of today's agricultural economy.

Mr. HELMS. Mr. President, the majority has reviewed the amendment and has no objection to it. As a matter of fact, we support it. The amendment, as the distinguished Senator from Kansas has said, will simply extend the National Agricultural Cost-of-Production Standards Review Board through 1989. It would also eliminate the two-term limitation for Board members. As Senator MELCHER said this morning, it is very important that we have accurate cost estimates on production. This amendment will certainly take us a step in that direction.

Mr. ZORINSKY. Mr. President, we have examined the amendment. I compliment the Senator from Kansas for introducing this amendment. I urge my colleagues to support its adoption.

Mrs. KASSEBAUM. Thank you very much. I appreciate that support.

The PRESIDING OFFICER. Is there further debate on the amendment? If not, the question is on agreeing to the amendment of the Senator from Kansas.

The amendment (No. 895) was agreed to.

Mr. ZORINSKY. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. HELMS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 896

(Purpose: To require the development of new means of establishing grain classifications)

Mrs. KASSEBAUM. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Kansas [Mrs. KASSEBAUM], for herself, Mr. DOLE, and Mr. NICKLES, proposes an amendment numbered 896.

Mrs. KASSEBAUM. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 459, between lines 18 and 19, insert the following new section:

NEW GRAIN CLASSIFICATIONS

SEC. . (a) The Secretary of Agriculture shall direct the Federal Grain Inspection Service and the Agricultural Research Service to cooperate in developing new means of establishing grain classifications taking into account characteristics other than those visually evident.

(b) The Secretary shall report to the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate, semiannually, with the first report due not later than December 31, 1985, on the status of cooperative efforts required under subsection (a), as such efforts relate to more accurately classifying types of wheat and other grains currently in use.

Mrs. KASSEBAUM. Mr. President, I offer this amendment on behalf of myself, Senator DOLE, and Senator NICKLES in the hope that it will bring a change to existing procedures for the classification of wheat. Wheat is traded in five official classifications: Hard Red Winter, Hard Red Spring, Soft Red Winter, White, and Durum. The Federal Grain Inspection Service is responsible for this classification and uses visual appearance as the criterion. Since its inception, this classification has been based solely on the physical characteristics of the kernel.

In the past, visual appearance was not a problem in deciding classifications, However, recent efforts to improve yields have combined the best qualities of different classes of wheat. These new varieties and wheat hybrids are more productive and resistant to disease.

The problem is that we now have wheat that resembles one class in appearance but has the milling and baking qualities of another class. Since grain millers, exporters, and elevator operators must be able to purchase wheat of known quality, the new type of wheat has run into problems in our present classification system. To address this problem, we must find ways to improve the way wheat classification rules are implemented.

This amendment, which I offer along with Senator DOLE and Senator NICKLES, directs the Federal Grain Inspection Service and the Agriculture Research Service to cooperate in developing new means of establishing wheat classifications taking into account characteristics other than those visually evident. It also requires reports to the House Committee on Agriculture and the Senate Committee on Agriculture and Forestry prior to December 31, 1986, and semiannually thereafter until a new classification method is developed and approved.

Mr. DOLE. Mr. President, I support Senator KASSEBAUM's amendment which would require the Federal Grain Inspection Service [FGIS] to report to the House and Senate Agriculture Committees on the status of improved grain classification techniques.

Language adopted in the House farm bill would require FGIS to make such a report by December 31, 1985. Our amendment would require FGIS to make semiannual status reports following the initial report until an improved means of classifying grain has been adopted by FGIS.

NEED

This amendment would focus the attention of FGIS upon a new and growing problem within our grain marketing system. FGIS has always classified wheat by visually examining the shape and texture of kernels and this method has become universally recognized by the grain trade. As technology has advanced, researchers have been able to cross wheat varieties to develop higher yielding strains less susceptible to the adversities of weather and insects. This holds the potential for significantly increasing the profit margin of many farmers.

However, some new varieties do not exhibit the uniform kernel characteristics which visual criteria are based on. For example, a wheat variety that exhibits characteristics of Soft Red Winter kernels may actually have milling and baking qualities of a Hard Red Winter wheat.

A COOPERATIVE EFFORT

Mr. President, it will be in the interest of farmers and agriculture in general to develop a better way to speedily classify such new varieties. This amendment will provide the ongoing information needed to assist us in our efforts toward this goal.

Mrs. KASSEBAUM. Mr. President, I urge its adoption.

Mr. President, I ask unanimous consent that Senator BOREN be added as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HELMS addressed the Chair.

The PRESIDING OFFICER. The Senator from North Carolina.

Mr. HELMS. I thank the Chair.

Mr. President, the amendment is a good one. I commend the Senator from Kansas for it. I certainly support it. As the Senator from Kansas has stated, the amendment would require the USDA Federal Grain Inspection Service and the Agricultural Research Service to develop an objective means to classify grain.

A report on the status of these efforts is required by December 31, 1985.

It is my understanding that many major grain exporting countries use standards that classify grain based on visual characteristics—including the United States.

However, new wheat varieties that exhibit altered functional properties and atypical appearances are making it difficult to use visual classification standards.

The industry is supportive of the amendment as well as the administration.

I am pleased to accept it on behalf of the majority.

Mr. HELMS. Mr. President, we approve of the amendment on this side.

Mr. ZORINSKY. Mr. President, we have examined the amendment on this

side of the aisle. I urge my colleagues to support its adoption.

The PRESIDING OFFICER. Is there further debate on the amendment? If not, the question is on agreeing to the amendment of the Senator from Kansas.

The amendment (No. 896) was agreed to.

Mr. ZORINSKY. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. HELMS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENTS NOS. 897 AND 898

(Purpose: (No. 897) To revise provisions relating to the assessment of scientific literature concerning the relationship of dietary and blood cholesterol)

(Purpose: (No. 898) To revise provisions relating to the assessment of research and scientific literature concerning dietary calcium)

Mr. HELMS. Mr. President on behalf of the distinguished Senator from Utah [Mr. HATCH] and his cosponsors, I send two amendments to the desk and ask for their immediate consideration. I ask unanimous consent that they be considered and agreed to en bloc.

The PRESIDING OFFICER. Without objecton, it is so ordered.

Without objection, the amendments will be considered en bloc.

The clerk will report.

The assistant legislative clerk read as follows:

The Senator from North Carolina [Mr. HELMS], on behalf of the Senator from Utah [Mr. HATCH], for himself and Mr. KENNEDY, propose amendments numbered 897 and 898.

Mr. HELMS. Mr. President, I ask unanimous consent that further reading of the amendments be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendments are as follows:

AMENDMENT No. 897

On Page 311, line 21, insert "and the Secretary of Health and Human Services" after "Secretary".

On page 312, line 1, insert "and the Secretary of Health and Human Services" after "Secretary".

On page 312, line 4, insert "and the Secretary of Health and Human Services" after "Secretary".

On page 312, line 8, insert "and the Secretary of Health and Human Services" after "Secretary".

On page 312, line 9, insert "and the Secretary of Health and Human Services" after "Secretary".

On page 312, line 11, strike out "the Secretary considers" and insert "such Secretaries consider".

On page 312, line 13, strike out "Secretary shall submit to the Committee" and insert "Secretary and the Secretary of Health and Human Services shall submit to the Committees".

On page 312, line 14, insert "and Energy and Commerce" after "Agriculture".

On page 312, lines 14 and 15, strike out "Committee" and insert "Committees".

On page 312, line 15, insert "and Labor and Human Resources" after "Forestry".

On page 312, line 16, strike out "Secretary" and insert in lieu thereof "Secretaries".

AMENDMENT No. 898

On page 310, line 10, insert "and the Secretary of Health and Human Services" after "Secretary".

On page 310, line 16, insert "and the Secretary of Health and Human Services" after "Secretary".

On page 310, line 19, insert "and the Secretary of Health and Human Services" after "Secretary".

On page 311, line 2, insert "and the Secretary of Health and Human Services" before the period.

On page 311, line 3, insert "and the Secretary of Health and Human Services" after "Secretary".

On page 311, line 5, strike out "the Secretary considers" and insert "such Secretaries consider".

On page 311, line 8, strike out "Secretary shall submit to the Committee" and insert "Secretary and Secretary of Health and Human Services shall submit to the Committees".

On page 311, line 9, insert "and Energy and Commerce" after "Agriculture".

On page 311, lines 9 and 10, strike out "Committee" and insert "Committees".

On page 311, line 10, insert "and Labor and Human Resources" after "Forestry".

On page 311, line 11, insert "and the Secretary of Health and Human Services" after "Secretary".

Mr. HATCH. Mr. President, I have two amendments at the desk on behalf of myself and Mr. KENNEDY and ask for their immediate consideration.

Mr. President, I am offering two amendments to provisions of the bill which call for studies of cholesterol and calcium and health.

The original language of the bill makes these studies mandatory for the Department of Agriculture. Senator KENNEDY and I wrote to Senator HELMS several weeks ago, expressing concern about the fact that the Department of Health and Human Services, which already has considerable research effort in these areas, and which has the scientific expertise for studies of the relationship between nutrients and health or disease, was not included as a participant in these studies. I am delighted that Senator HELMS and the ranking minority member, Senator ZORINSKY, have agreed that the studies should be done jointly by the Department of Health and Human Services and the Department of Agriculture.

My amendments would simply provide that the Secretary of Health and Human Services will work with the Secretary of Agriculture, first in conducting an assessment of existing literature and data relevant to the questions of the relationship between dietary and blood cholesterol and the relationship between calcium and health; and, then, in designing and conducting appropriate additional studies.

Mr. President, I think it is a classic example of serendipity that we are discussing dietary cholesterol in the Senate at the same time as the Nobel Prize for Medicine is awarded to two of the premier heart disease researchers in the world, Drs. Joseph Goldstein and Michael Brown of the University of Texas, whose work has been to determine the mechanism by which the body metabolizes cholesterol. Their elegant work, and the important work of others, will surely comprise a part of the assessment and study of dietary cholesterol which USDA and HHS are asked to do under these provisions. Indeed, as Drs. Brown and Goldstein themselves put it, in an article in the Scientific American, the kind of research that they are doing, and the kind that we are looking to USDA and HHS to review and continue, may one day allow Americans to "have their steak and live to eat it too."

Again, I want to thank Senators HELMS and ZORINSKY for their willingness to work with me on this matter.

Mr. HELMS. Mr. President, I am prepared to accept the two amendments offered by the distinguished Senator from Utah.

These amendments simply clarify that the Secretary of Agriculture must coordinate and work closely with the Secretary of Health and Human Services in developing the assessment of literature and data relevant to the questions of the relationship between dietary and blood cholesterol and the relationship between calcium and health. The Senate Agriculture Committee voted to include these programs in S. 1714.

I am not aware of any opposition to this amendment. Speaking for the majority, I approve of them.

Mr. ZORINSKY. Mr. President, we have examined the amendments, and are wholeheartedly in support of them.

I urge my colleagues to support their adoption. I move adoption of the amendments.

The PRESIDING OFFICER. Is there further debate on the amendments? If not, the question is on agreeing to the amendments of the Senator from Utah.

The amendments (Nos. 897 and 898) were agreed to.

Mr. ZORINSKY. Mr. President, I move to reconsider the vote by which the amendments were agreed to.

Mr. HELMS. I move to lay that motion on the table.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HELMS. Mr. President, am I correct that those amendments were approved en bloc?

The PRESIDING OFFICER. That is correct.

Mr. ZORINSKY addressed the Chair.

The PRESIDING OFFICER. The Senator from Nebraska.

Mr. ZORINSKY. Mr. President, the Department of Agriculture is distributing statements concerning the costs of S. 1714. In a recent letter to the chairman, Assistant Secretary of Agriculture, Secretary Thompson states that the Department has analyzed, evidently at the chairman's request, the cost of the bill.

According to the Department, the cost of the bill exceeds the congressional budget target by billions of dollars.

Mr. President, this brings to mind a story that illustrates Government bureaucracy and politics.

The story goes that three individuals were seeking public office. The first individual seeking public office went to a place where they gave a test to see if you would qualify for public office.

All of these three individuals went to the same place for the same test.

That test consisted of one question. That one question was, What is 2 and 2?

The first individual wanting to hold public office was an engineer. He went in and was asked, "What is 2 and 2?"

He took out a slide rule and calculated it. He said, "The answer to that question is precisely 4."

They said, "Fine. You qualify."

The next fellow was an accountant and was asked the same question, "What is 2 and 2?"

He took all the papers out and laid them across the table, scrutinizing them very meticulously. He thought for a moment and said, "The answer to that question lies somewhere in the area between 2 and 6."

They thought, "Well, that is close enough. You will make an excellent candidate."

The third fellow was a bureaucrat. In fact, he may have had something to do with the USDA. They asked him the same question, "What is 2 and 2?"

He looked over both shoulders first and then said, "Are we alone?" They said, "Yes, we are alone."

He said, "What do you want it to be?"

I think that is the essence, possibly, of how some of these numbers are being arrived at concerning the cost of this budget and how much S. 1714 supposedly exceeds the congressional budget targets. The Department's estimates may or may not be accurate. To make an informed judgment concerning the accuracy of the estimates, we need to examine the current, detailed assumptions upon which those estimates are based. To date, the Department of Agriculture has not responded to any request for such detailed information.

To be able to reasonably evaluate the Department's cost estimates, the following information, at a minimum, is needed. And the Department must have such information concerning the estimates in order to prepare cost projections.

What are the projected prices of wheat, feed grains, upland cotton, rice, and soybeans for each of the crop years under the bill?

What are the production levels for those crops under the bill?

What are the export levels of those crops for each year under the bill?

What are the ending stocks of those crops each year under the bill?

How much of the ending stocks would be under price support loans in each of those years? In the case of grains, how much of the ending stocks would be in a reserve program?

What amounts of what crops, in each of the years under the bill, are assumed to be made available and shipped under the Food for Peace Program, especially under title II of Public Law 480 and section 416 of the Agricultural Act of 1949?

What is the projected farm income under the bill in each of the years covered by the bill? How do those estimates compare with farm income in those years under an extension of current law?

What assumptions are used with respect to the use of set-aside or acreage reduction programs in the Department's analysis? Does the analysis assume that paid land diversion or payment-in-kind programs are used? If so, what are the terms of such programs?

What amount of acreage is assumed to be placed in the conservation reserve program under the Department's estimates? How much acreage in the reserve, under the assumptions, would be withdrawn from the production of wheat, corn, cotton, and rice?

What interest rates are projected in the Department's analysis of the bill?

What assumptions are made concerning the cost and availability of farm credit? What would be the level of farm debt and average farmland values under the bill, as compared to an extension of current law?

Does the Department assume any change in the exchange rate for the dollar, as compared to the currency of major competitors or major foreign purchasers?

What would be the effect of S. 1714, as compared to an extension of current programs, on consumer food prices?

What are the projected costs of production for commodities under S. 1714 in each of the years under the bill?

In short, Mr. President, to evaluate the Department's cost estimates and their accuracy, it is essential that we receive more detailed information. I am requesting the Secretary of Agriculture to furnish this information and I will share it with my colleagues as soon as I receive it.

But until then, I remain very dubious about USDA estimates. The previous story I told illustrates the point: What do you want the number to be, and someone will make it that way.

Mr. DOLE addressed the Chair.

The PRESIDING OFFICER. The majority leader.

Mr. DOLE. Mr. President, I want to thank the managers for their expeditious handling of the farm bill so far. I know we are going to be bogged down later on with major amendments, but I think we have covered a lot of territory today. Some amendments have been accepted. At least that much is done. We will do more on Monday and then on Tuesday, Wednesday, and Thursday probably get into the heavy, more contraversial amendments.

There is no doubt about it, we have to have a farm bill. I am still hopeful that somewhere in this Chamber we can put together a majority, keeping in mind the questions just raised by the distinguished Senator from Nebraska. There has to be a majority in this Chamber on both sides of the aisle to put together some kind of a farm bill that we can pass and that will not be vetoed by the President.

I ask unanimous consent to have printed in the RECORD at this point a letter from the President which I received some weeks ago, indicating the President wants to sign a farm bill if certain guidelines are met.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

THE WHITE HOUSE,
Washington, September 10, 1985.

Hon. ROBERT DOLE,
Majority Leader, Committee on Agriculture, U.S. Senate, Washington, DC.

DEAR BOB: One of the most important issues facing the Congress this year is the writing of the 1985 Farm Bill. In this legislation, the Congress will have the opportunity to make the fundamental reforms necessary to assure long-term farm prosperity.

We are in a period of difficulty for America's farmers. Prices for the major crops are weak. Demand for exports has fallen as foreign suppliers fill markets once ours alone. Although the successful effort to control inflation has helped farmers greatly by putting an end to double-digit increases in the cost of fuel, fertilizer, and other supplies, at the same time it weakened many farmers financially by dampening inflation-fueled speculation that had been causing land prices to rise sharply.

Farming and ranching are hard work, maybe the hardest. And the strength of our farmers and ranchers has always been the strength of their hopes for the future, seeing a young son or daughter working the fields or tending the herd, hoping they will stay on the farm or ranch and be able to make a go of it.

Those hopes are threatened today. We hear that there is no future for our farmers

and ranchers, only a faster or slower slide into failure.

Only by working together can we plant the seed of hope for America's agriculture community.

In writing the laws that will govern Federal farm programs in the coming years, I believe that we can find agreement on objectives to guide us:

Establishment of commodity price supports that allow export-dependent commodities to become competitive in international markets;

Gradual reductions in the level of income support each year;

Reductions in the dairy support price as long as surpluses exist;

A phaseout of acreage reduction programs; and

Targeting of income benefits to legitimate family farm operations.

In addition, we must develop agricultural policies that do not harm our overall fiscal policy. In this regard, the budget levels adopted by the House and Senate in the First Concurrent Resolution on the Budget should serve as the appropriate balance between the funding needs of farm programs and the need to reduce the deficit.

The farm problem is as important as any challenge we face. We must, therefore, approach it with a spirit of cooperation and consensus. A way of life is at risk, one too previous to our national heritage to be the subject of politically inspired machinations.

I have asked Secretary John Block to renew the Administration's effort to arrive at a farm bill that will achieve the objectives outlined above. He will work with those in the Congress who share these objectives.

I look forward to signing a farm bill that provides hope, not measured doses of despair. But I must note that I am prepared to disapprove legislation that repeats the mistakes of the past.

We must work together to fulfill our responsibility to this Nation's farmers.

Sincerely,

RONALD REAGAN.

Mr. DOLE. It is my hope that, as we debate the various issues—a mandatory program, voluntary program, 1 year, 2 year, 3 year or 4 year target price freeze, plus the hundred other issues—that we can put together some kind of package that will have broad support.

AMENDMENT NO. 904

(Purpose: To amend the Animal Welfare Act to ensure the proper treatment of laboratory animals)

Mr. DOLE. Mr. President, I send an amendment to the desk, which is not on commodities, and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Kansas [Mr. DOLE], for himself, Mr. HEINZ, Mr. ROTH, Mr. STEVENS, Mr. LEAHY, Mr. COHEN, Mr. STAFFORD, Mr. MATSUNAGA, Mr. BINGAMAN, Mr. ZORINSKY, Mr. GORTON, Mr. D'AMATO, Mr. BURDICK, Mr. KASTEN, Mr. PROXMIRE, Mr. SIMON, Mr. FORD, Mr. DURENBERGER, Mr. BAUCUS, Mr. DOMENICI, Mr. SPECTER, Mr. CHAFEE, Mr. PELL, Mr. GOLDWATER, Mr. BOSCHWITZ, Mr. MOYNIHAN, Mr. MURKOWSKI, Mr. MITCHELL, Mr. WILSON, Mr. STENNIS, Mr. HUMPHREY, Mr. HECHT, Mr. BUMPERS, Mr. CRANSTON, Mr. METZENBAUM, Mr. MATTINGLY, Mr. HEINZ, and Mr. BIDEN proposes an amendment numbered 904.

Mr. DOLE. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the bill insert the following:

TITLE —AMENDMENTS TO ANIMAL WELFARE ACT

SEC. . This title may be cited as the "Improved Standards for Laboratory Animals Act".

FINDINGS

SEC. . The Congress finds that—

(1) the use of animals is instrumental in certain research and education for advancing knowledge of cures and treatments for diseases and injuries which afflict both humans and animals;

(2) methods of testing that do not use animals are being and continue to be developed which are faster, less expensive, and more accurate than traditional animal experiments for some purposes and further opportunities exist for the development of these methods of testing;

(3) measures which eliminate or minimize the unnecessary duplication of experiments on animals can result in more productive use of Federal funds; and

(4) measures which help meet the public concern for laboratory animal care and treatment are important in assuring that research will continue to progress.

STANDARDS AND CERTIFICATION PROCESS

SEC. . (a) Section 13 of the Animal Welfare Act (7 U.S.C. 2143) is amended—

(1) by redesignating subsections (b) through (d) as subsections (f) through (h), respectively; and

(2) by striking out the first two sentences of subsection (a) and inserting in lieu thereof the following:

"(1) The Secretary shall promulgate standards to govern the humane handling, care, treatment, and transportation of animals by dealers, research facilities, and exhibitors.

"(2) The standards described in paragraph (1) shall include requirements—

"(A) for handling, housing, feeding, watering, sanitation, ventilation, shelter from extremes of weather and temperatures, adequate veterinary care, and separation by species where the Secretary finds necessary for humane handling, care, or treatment of animals; and

"(B) for exercise of dogs and primates.

"(3) In addition to the requirements under paragraph (2), the standards described in paragraph (1) shall, with respect to animals in research facilities, include requirements—

"(A) for animal care, treatment, and practices in experimental procedures to ensure that animal pain and distress are minimized, including adequate veterinary care with the appropriate use of anesthetic, analgesic, tranquilizing drugs, or euthanasia;

"(B) that the principal investigator considers alternatives to any procedure likely to produce pain to or distress in an experimental animal;

"(C) in any practice which could cause pain to animals—

"(i) that a doctor of veterinary medicine is consulted in the planning of such procedures;

"(ii) for the use of tranquilizers, analgesics, and anesthetics;

"(iii) for pre-surgical and post-surgical care by laboratory workers in accordance with established veterinary medical and nursing procedures;

"(iv) against the use of paralytics without anesthesia; and

"(v) that the withholding of tranquilizers, anesthesia, analgesia, or euthanasia when scientifically necessary shall continue for only the necessary period of time;

"(D) that no animal is used in more than one major operative experiment from which it is allowed to recover except in cases of—

"(i) scientific necessity; or

"(ii) other special circumstances as determined by the Secretary; and

"(E) that exceptions to such standards may be made only when specified by research protocol and that any such exception shall be detailed and justified in a report outlined under paragraph (7) and filed with the Institutional Animal Committee.".

(b) Section 13(a) of such Act is further amended—

(1) by designating the third and fourth sentences as paragraph (4);

(2) by designating the fifth sentence as paragraph (5); and

(3) by striking out the last sentence and inserting in lieu thereof the following:

"(6) Nothing in this Act shall be construed as authorizing the Secretary to promulgate rules, regulations, or orders with regard to the design, outlines, or guidelines of actual research or experimentation by a research facility: *Provided*, That the Secretary shall require every research facility to show that professionally acceptable standards governing the care, treatment, and practices on animals are being followed by the research facility during research and experimentation.

"(7)(A) The Secretary shall require, at least annually, every research facility to report that the provisions of this Act are being followed.

"(B) In complying with subparagraph (A), the research facility shall provide—

"(i) the details of any procedure which was likely to produce pain or distress in any animal and assurances demonstrating that the principal investigator considered alternatives to those procedures;

"(ii) assurances satisfactory to the Secretary that such facility is adhering to the standards described in this section; and

"(iii) an explanation for any deviation from the standards promulgated under this section.

"(8) Paragraph (1) shall not prohibit any State (or a political subdivision of such State) from promulgating standards in addition to those standards promulgated by the Secretary under paragraph (1).".

(c) Section 13 of such Act is further amended by inserting after subsection (a) the following new subsections:

"(b)(1) The Secretary shall require that each research facility establish at least one Institutional Animal Committee. Each Committee shall be appointed by the chief executive officer of each such research facility and shall be composed of not fewer than three members. Such members shall possess sufficient ability to assess animal care, treatment, and practices in experimental research as determined by the needs of the research facility and shall represent society's concerns regarding the welfare of animal subjects used in such facility. Of the members of the Committee—

"(A) at least one member shall be a doctor of veterinary medicine;

"(B) at least one member shall not be affiliated in any way with such facility other than as a member of the Committee, shall not be a member of the immediate family of a person who is affiliated with such facility, and shall be charged with primary responsibility for representing society's concerns regarding the welfare of the animal subjects; and

"(C) in those cases where the Committee consists of more than three members, not more than three members shall be from the same administrative unit of such facility.

"(2) A quorum shall be required for all formal actions of the Committee, including inspections under paragraph (3).

"(3) The Committee shall inspect at least semiannually all animal study areas and animal facilities of such research facility and review as part of the inspection—

"(A) practices involving pain to animals, and

"(B) the condition of animals,

to ensure compliance with the provisions of this Act and that pain and distress to animals is minimized. Exceptions to the requirement of inspection of such study areas may be made by the Secretary if animals are studied in their natural environment and the study area is prohibitive to easy access. Nothing in this Act shall be construed to require research facilities to grant access to Institutional Animal Committees during inspections to any area in which research is being conducted involving confidential or proprietary information, which would be subject to compromise or inadvertent disclosure. Such exclusion shall not preclude access to USDA inspectors. Instances of excluding Institutional Animal Committees from access to a facility's confidential or proprietary research shall be reported by the facility to the Secretary of Agriculture in the facility's annual report and included in the records of the Institutional Animal Committee.

"(4)(A) The Committee shall file an inspection certification report of each inspection at the research facility. Such report shall—

"(i) be signed by a majority of the Committee members involved in the inspection;

"(ii) include reports of any violation of the standards promulgated, or assurances required, by the Secretary, including any deficient conditions of animal care or treatment, any deviations of research practices from originally approved proposals that adversely affect animal welfare, any notification to the facility regarding such conditions, and any corrections made thereafter;

"(iii) include any minority views of the Committee; and

"(iv) include any other information pertinent to the activities of the Committee.

"(B) Such report shall remain on file for at least three years at the research facility and shall be available for inspection by the Animal and Plant Health Inspection Service of the Department of Agriculture and any funding Federal agency.

"(C) In order to give the research facility an opportunity to correct any deficiencies or deviations discovered by reason of paragraph (3), the Committee shall notify the administrative representative of the research facility of any deficiencies or deviations from the provisions of this Act. If, after notification and an opportunity for correction, such deficiencies or deviations remain uncorrected, the Committee shall notify (in writing) the Animal and Plant Health Inspection Service of the Department of Agriculture and the funding Federal agency of such deficiencies or deviations.

"(5) The inspection results shall be available to Department of Agriculture inspectors for review during inspections. Department of Agriculture inspectors shall forward any Committee inspection records which include reports of uncorrected deficiencies or deviations to the Animal and Plant Health Inspection Service of the Department of Agriculture and any funding Federal agency of the project with respect to which such uncorrected deficiencies and deviations occurred.

"(c)(1) The research facility shall provide for annual training for scientists, animal technicians, and other personnel involved with animal care and treatment in such facility. Such training shall include instruction on—

"(A) the humane practice of animal maintenance and experimentation;

"(B) research or testing methods that minimize or eliminate the use of animals or limit animal pain or distress; and

"(C) utilization of the information service at the National Agricultural Library, established under subsection (d).

"(2) Research facilities shall inform their employees of the provisions of this Act and shall inform such employees to report any violations of such provisions. Any such employee may not be discriminated against on grounds that such employee reported a violation of such provisions.

"(d) The Secretary shall establish an information service at the National Agricultural Library. Such service shall, in cooperation with the National Library of Medicine, provide information—

"(1) pertinent to employee training;

"(2) which could prevent unintended duplication of animal experimentation as determined by the needs of the research facility; and

"(3) on improved methods of animal experimentation, including methods which could—

"(A) reduce or replace animal use; and

"(B) minimize pain and distress to animals, such as anesthetic and analgesic procedures.

"(e) In any case in which the funding Federal agency determines that conditions of animal care, treatment, or practice in a particular project have not been in compliance with standards promulgated under this Act, despite notification by the Secretary or the funding Federal agency to the research facility and an opportunity for correction, such agency shall suspend or revoke Federal support for the project. Any research facility losing Federal support as a result of actions taken under the preceding sentence shall have the right of appeal as provided in sections 701 through 706 of title 5, United States Code.".

INSPECTIONS

SEC. . Section 16(a) of the Animal Welfare Act (7 U.S.C. 2146(a)) is amended by inserting after the first sentence the following:

"The Secretary shall inspect each research facility at least once each year and, in the case of deficiencies or deviations from the standards promulgated under this Act, shall conduct such follow-up inspections as may be necessary until all deficiencies or deviations from such standards are corrected.".

PENALTY FOR RELEASE OF TRADE SECRETS

SEC. . The Animal Welfare Act (7 U.S.C. 2131-2156) is amended by adding at the end thereof the following section:

"SEC. 27. (a) It shall be unlawful for any member of the Institutional Animal Committee to release any confidential information of the research facility, including any information that concerns or relates to—

"(1) the trade secrets, processes, operations, style of work, or apparatus, or

"(2) to the identity, confidential statistical data, amount or source of any income, profits, losses, or expenditures of the research facility.

"(b) It shall be unlawful for any member of such Committee—

"(1) to use or attempt to use to his advantage, or

"(2) to reveal to any other persons,

any information which is entitled to protection as confidential information under subsection (a).

"(c) A violation of subsection (a) or (b) is punishable by—

"(1) removal from such Committee, and

"(2)(A) a fine of not more than $1,000 and imprisonment of not more than one year, or

"(B) if such violation is willful, a fine of not more than $10,000 and imprisonment of not more than three years.

"(d) Any person, including any research facility, injured in its business or property by reason of a violation of this section may recover all actual and consequential damages sustained by such person and the cost of the suit including a reasonable attorney's fee.

"(e) Nothing in this section shall be construed to affect any other rights that any such person may have, nor shall subsection (d) be construed to limit the exercise of any such rights arising out of or relating to a violation of subsections (a) and (b).".

INCREASED PENALTIES FOR VIOLATION OF THE ACT

SEC. . Subsection (b) of section 19 of the Animal Welfare Act (7 U.S.C. 2149(b)) is amended—

(1) in the first sentence by striking out "$1,000 for each such violation" and inserting in lieu thereof "$2,500 for each such violation"; and

(2) in the sixth sentence by striking out "$500 for each offense" and inserting in lieu thereof "$1,000 for each offense".

DEFINITIONS

SEC. . (a) Section 2(e) of the Animal Welfare Act (7 U.S.C. 2132(e)) is amended by adding after "The term 'research facility' means" the following: "each department, agency, or instrumentality of the United States which uses live animals for research or experimentation,".

(b) Section 2 of such Act is further amended by redesignating subsections (f) through (j) as subsections (j) through (n), respectively and by inserting after subsection (e) the following new subsections:

"(f) The term 'Federal agency' means an Executive agency as such term is defined in section 105 of title 5, United States Code, and with respect to any research facility means the agency from which the research facility receives a Federal award for the conduct of research, experimentation, or testing, involving the use of animals;

"(g) The term 'Federal award for the conduct of research, experimentation, or testing, involving the use of animals' means any mechanism (grant, award, loan, contract, or cooperative agreement) under which Feder-

al funds are provided to support the conduct of such research;

"(h) The term 'quorum' means a majority of the Committee members;

"(i) The term "Committee" means the Institutional Animal Committee established under section 13(c);".

(c) For purposes of this Act, the term "animal" shall have the same meaning as defined in section 2(j) of the Animal Welfare Act (7 U.S.C. 2132(j)), as redesignated by subsection (b) of this section.

EFFECTIVE DATE

SEC. . This title shall take effect one year after the date of the enactment of this title.

Mr. DOLE. Mr. President, for the last several years we have been trying to figure out some way to improve the standards for laboratory animals so that in some way we can avoid the pain and suffering inflicted on animals and still carry out legitimate research. There is no question about it, in many areas research on animals over the years has been invaluable. We have had a number of discussions with the U.S. Department of Agriculture and with others in the Congress. There are about 35 cosponsors of this amendment. I know it is opposed by the distinguished chairman of the Labor Committee, Senator HATCH, who will be here later to explain his objections.

Mr. President, I would like to explain what the bill does. It is not very complicated.

The amendment amends the Animal Welfare Act. It is similar to legislation introduced during the 98th session. We had hearings in the Senate Agriculture Committee and the House Subcommittee on Departmental Operations, Research, and Foreign Agriculture.

It has been pointed out that experimentation and testing on animals has benefited our society by yielding medical breakthroughs that have aided the development of new knowledge, new drugs, and better surgical techniques which have saved countless lives. It is also true that we need to ensure the public that adequate safeguards are in place to prevent unnecessary abuses to animals, and that everything possible is being done to decrease the pain of animals during experimentation and testing. S. 1233 would establish principles already recognized by responsible scientists and administrators.

What we have done is try to gather the views of a lot of responsible people and to codify those views.

We require a number of things. Let me indicate some of them.

PROVISIONS

Facilities would report annually that they are in compliance with the AWA and provide in their justification of the research; in their description of painful procedures, an indication that standards to minimize pain are being adhered to and an explanation of any deviations from the standards. The Secretary of Agriculture would also promulgate standards for the exercise of dogs. All standards including exercise would defer to scientific protocol. The Secretary is not authorized to set any standards with respect to the design of experiments.

PAIN RELIEF

To minimize pain and distress, this bill requires use of anesthesia if paralyzing drugs are used. It calls for veterinary medicine and nursing care. It requires pain-relieving drugs or euthanasia for animals suffering at the conclusion of experiments.

RESEARCH REVIEW

This bill also would require each institution to form an animal committee, including a veterinarian and at least one member not associated with the institution. Such member would be primarily responsible for society's concerns for the welfare of animals although all members would be expected to represent such concerns.

The committee will conduct semiannual inspections; file reports with the research facility; and notify the institutions and appropriate Federal authorities of violations. If a facility, given the opportunity to correct violations, does not adhere to the Animal Welfare Act Federal agencies are directed to suspend or revoke funding. The USDA APHIS inspectors would be required to inspect facilities at least once a year, with followup visits until violations are corrected. APHIS would be required to inspect Federal facilities.

INFORMATION SERVICE

To assist in putting these humane principles into practice, S. 1233 would provide an information service at the National Agricultural Library, to work in consultation with the National Library of Medicine, in order to prevent unnecessary duplication of experiments or tests and to give information on alternatives to laboratory researches who request the information.

WHISTLEBLOWER

The bill also contains a whistleblower provision to prevent discrimination against personnel who report violations to the committee.

GROWING SUPPORT

Mr. President, laboratory animals deserve humane treatment. Their contribution to human health can only be repaid by ensuring that the pain and distress they suffer is minimized. S. 1233 has been carefully drafted to achieve this purpose without impeding research.

This is a bill which has brought an unusual degree of consensus in a field that has, in the past, been fraught with controversy. Not only do the animal welfare organizations support it, but the American Physiological Society, the largest users of experimental animals, approve it, too.

Mr. President, I ask unanimous consent to have printed in the RECORD a number of editorials. I know editorials sometimes are good and sometimes bad. But my point is they give some idea of the widespread support for what we are attempting to do. The following papers carried editorials on the dates indicated:

The Chicago Tribune, September 19, 1985.

The Buffalo (NY) News), September 21, 1985.

The Arlington (IL), September 30, 1985.

The Santa (CA) Barbara News Press, October 8, 1985.

The Asbury Park (NJ) Press, October 1985.

The Waterford (OK) Daily News, October 6, 1985.

The Hartford (CN) Courant, September 21, 1985.

The Anchorage (AK) Daily News, September 1985.

The New York Times, July 31, 1985.

The Oregonian, July 24, 1985.

The Marquette (MI) Mining Journal, August 19, 1985.

Las Cruces (NM) Sun-News, September 17, 1985.

Tallahassee (FL) Democrat, September 7, 1985.

Ashland (OH) Times-Gazette, August 21, 1985.

Dallas (TX) Times Herald, August 26, 1985.

Minneapolis (MN) Star and Tribune, August 15, 1985.

Greenville (TN) Sun, August 17, 1985.

The Press (Atlantic City, NJ), August 15, 1985.

The News Tribune (Tacoma, WA), August 18, 1985.

Times Tribune (Palo Alto, CA), August 25, 1985.

Honolulu (HI) Star-Bulletin, August 23, 1985.

Newsday (Long Island, NY), August 16, 1985.

Warren (OH) Tribune Chronicle, August 9, 1985.

Mansfield (OH) News Journal, August 24, 1985.

Mr. President, I shall select a representative group of these editorials so they will not extend the RECORD.

There being no objection, the editorials were ordered to be printed in the RECORD, as follows:

[From the Washington Post, July 28, 1985]

TORTURING ANIMALS

Laboratory experimentation with animals has yielded and will continue to yield many important benefits to human health. Still, there is no case for continuing to tolerate inhumane treatment of the sort that columnist James J. Kilpatrick described on the opposite page last week.

The 13 years of baboon brain-bashing that Mr. Kilpatrick reported—now suspended by order of Health and Human Services Secretary Margaret Heckler—came to light because some angry people made off with more than 60 hours of videotapes from a University of Pennsylvania clinical research

center. It would be comforting to think that neither the gruesome experiments nor the ghoulish behavior of the researchers who performed it was characteristic of the treatment given many of the 100 million animals used in research every year. But reports of unnecessary research, avoidable suffering and callous researchers recur with disturbing frequency.

Responsible scientists admit that these reports cannot all be dismissed as propaganda by antivivisectionists. When you find well-documented examples of maltreatment at a center that the director of the National Institutes of Health has called "one of the best laboratories in the world," you are entitled to be suspicious about what goes on at satellite laboratories where supervision and standards are often lax.

Neither does the attitude of the medical researchers generally afford grounds for complacency. Scientists are understandably fearful that heavy-handed restrictions on the use of animals might impede highly beneficial research. New techniques, such as computer simulations and bacteria and animal-cell cultures have reduced the need, but for many purposes there is no substitute for using animals for tests. But many researchers have been slow to accept necessary safeguards and are contemptuous of those who argue for some degree of protection.

Many research institutions and animal handlers have already responded to public pressure and are paying more attention to federal guidelines governing the treatment of animals. In May nine federal agencies adopted tighter guidelines for care of animals. However, new NIH policies—requiring institutions receiving federal grants to set up review committees that must include at least one outside member—will not go into effect until the end of this year and will still depend heavily on good-faith efforts by institutions, handlers and satellite laboratories. We hope those efforts are made. There is every reason to pursue necessary medical research on animals—but no reason on Earth for the U.S. government to subsidize sadism.

[From the Dallas Times Herald, Aug. 26, 1985]

CONTROL ANIMAL RESEARCH

When Congress resumes work after its summer recess, it is expected to take up the thorny issue of balancing the important needs of medical research with the humane treatment of the animals used in such experiments. The debate is not likely to produce any easy solutions. Yet by exercising good judgment, the lawmakers should be able to reach a compromise fair to both scientists and animal rights advocates.

Each group offers convincing arguments. The scientists are correct in asserting that many medical breakthroughs would have been very difficult to achieve without some experimentation on animals. But the animal rights advocates also make an excellent point in arguing that laboratory animals sometimes are treated cruelly or used as subjects unnecessarily.

The task facing Congress, then, is to ensure that medical researchers can continue their work without too many restrictions but that they also pay closer attention to their use of laboratory animals. Ideally, experiments should be conducted on animals only when the desired information cannot be obtained by other research methods.

Indications are that current government rules and guidelines dealing with research animals are being ignored in some quarters. Two research institutions—the City of Hope Medical Center in Duarte, Calif., and the University of Pennsylvania—are being investigated for alleged violations of those guidelines, and their federal grants have been suspended pending the outcome.

Two bills before Congress, introduced by Rep. George Brown, D-Calif., and Senate Majority Leader Robert Dole, R-Kan., appear to strike a proper balance. The commendable measures would increase the number of laboratory inspections, provide stricter penalties for violations, require that alternatives to painful procedures be considered and improve the supervision of animal care.

Congress already has rejected attempts by the Reagan administration to cut or eliminate funding for laboratory inspection. It now needs to take that commitment a step further by passing legislation designed to ensure that research animals are not abused in the name of scientific achievement.

[From the New York Times, July 31, 1985]

CRUELTY TO RESEARCH ANIMALS

Medical research would be impossible without experiments on animals, and most researchers treat them well, not least because badly kept animals make poor subjects. But there are distressing exceptions. Recently, the National Institutes of Health cut off funds for a University of Pennsylvania laboratory after a preliminary finding that the lab failed to treat animals humanely.

Experimentation on animals rouses strong public feeling, particularly when cats or dogs are concerned. Extremist animal rights groups have recently taken to raiding laboratories and turning animals loose. In May 1984 a group stole videotapes of experiments from the Head Injury Research Laboratory at the University of Pennsylvania. Another group, People for Ethical Treatment of Animals, has distributed excerpts of the tapes that seem to show baboons suffering from insufficient anesthesia and nonsterile surgery.

Animal rights advocates not long ago staged a sit-in at the National Institutes of Health protesting the Pennsylvania experiments. The demonstration ended when Margaret Heckler, Secretary of Health and Human Services, ordered the N.I.H. to suspend its funding.

Does the standard of animal care by researchers need improvement? Scientists currently observe voluntary codes. Their institutions have inhouse committees that monitor animal research, and are subject to Department of Agriculture inspections. This light-handed control would be ideal if it worked. It doesn't. Painful experiments aside, Agriculture's veterinary inspectors regularly find violations of minimum standards of care. According to inspectors' reports analyzed by the Society for Animal Protective Legislation, 24 percent of one sample of research institutions were found to have major, repeated violations; 22 percent had some major violations, 29 percent had minor violations and only 24 percent were in compliance.

A bill to improve the system has been introduced by Bob Dole in the Senate and George Brown in the House. It would require researchers to minimize pain by all reasonable steps that do not frustrate the experiment. Institutions' animal care committees would have to include a veterinarian and a concerned public member. Researchers would have to consult a veterinarian in planning any painful experiment.

This moderate bill is supported by the American Physiological Society, the larest user of research animals. It believes the bill would impose no hardship on its members and would not impede research. Raising the standards of animal care, and catching offenders who have fallen into callousness, has instrinsic value. It is also necessary to preserve public support against those who oppose all use of animals in research.

Mr. DOLE. Mr. President, I hope we can have some agreement to accept this amendment. I noticed that Senator HATCH does not oppose the thrust of the amendment. I do not mean to suggest for one moment that he believes that animals should be treated any way other than humanely, but he has raised some questions. Hopefully, we can dispose of those questions. It may be that he will have a substitute. If that is the case, he can come to the floor and we can have whatever votes we are going to have by 3 o'clock and move on to something else.

Mr. HEINZ. Mr. President, I commend the distinguished majority leader, Senator DOLE, for offering this fine measure, originally introduced as S. 1233, the Improved Standards for Laboratory Animals Act, as an amendment to this legislation. I was pleased to join the Senator as an original cosponsor of the bill, and would like to ask that I be listed as a cosponsor of the amendment.

The amendment before us would amend the Animal Welfare Act to require improved standards of cleanliness, and better veterinary care for laboratory animals. The suffering of these creatures, under appalling conditions, is unconscionable. Under the current law, which dates back to 1966, researchers are only required to meet minimal standards of care in research. The amendment before us would make proper standards the norm.

Quality research, Mr. President, must be conducted according to the highest standards. When Federal funding is involved, we must expect private contractors and laboratories to conduct themselves accordingly. The research community itself realizes this, and I understand that many have only a few technical objections to this amendment, which perhaps can be worked out.

Over one-third of the Senate has cosponsored Senator DOLE's bill, and I commend my colleagues for their foresight, and concern for the welfare of the helpless. I urge the adoption of the amendment.

Mr. ZORINSKY. Mr. President, Senator MELCHER has asked that I protect his rights with respect to this amendment. He would like to make some comments also. We are trying to get hold of him right now to give him the floor. Until he arrives, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. SYMMS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SYMMS. Mr. President, I ask unanimous consent that the pending amendment be temporarily set aside.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 905

(Purpose: To require U.S. representatives to international financial institutions to oppose assistance by such institutions for the production of agricultural commodities in competition with United States produced agricultural commodities, and for other purposes)

Mr. SYMMS. Mr. President, I send an amendment to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Idaho [Mr. Symms], on behalf of himself and Mr. NICKLES, proposes an amendment numbered 905.

Mr. DOLE. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 459, between lines 18 and 19, insert the following new section:

OPPOSITION TO MULTILATERAL ASSISTANCE FOR FOREIGN SURPLUS AGRICULTURAL COMMODITIES

SEC. 927. (a) The Secretary of the Treasury shall instruct the United States Executive Directors of the International Bank for Reconstruction and Development, the International Development Association, the International Finance Corporation, the Inter-American Development Bank, the International Monetary Fund, the Asian Development Bank, the Inter-American Investment Corporation, the African Development Bank, and the African Development Fund to use the voice and vote of the United States to oppose any assistance by these institutions, using funds appropriated or otherwise made available pursuant to any provision of law, for the production of any agricultural commodity for export, if—

(1) such commodity is in surplus on world markets; and

(2) the export of such commodity would cause substantial injury to the United States producers of the same, similar, or competing commodity.

(b)(1) The amount of payments which the United States may make to the paid-in capital of an international financial institution described in subsection (a) during any capital expansion or replenishment of such institution may not exceed the amount of funds which the United States agreed to pay for paid-in capital under such expansion or replenishment minus an amount which bears the same proportion to the aggregate amount of assistance described in paragraph (2) furnished by such institution as the United States share of the expansion or replenishment bears to the total amount of the expansion or replenishment.

(2)(A) The aggregate amount of assistance referred to in paragraph (1) is the amount of assistance furnished by an international financial institution to all countries during the period described in subparagraph (B)—

(i) to support the production of any agricultural commodity for export, if—

(I) such commodity is in surplus on world markets; and

(II) the export of such commodity would cause substantial injury to the United States producers of the same, similar, or competing commodity; and

(ii) to subsidize (other than under clause (i)) the exports of agricultural commodities from such countries.

(B) The period referred to in subparagraph (A) is the same number of years as the capital expansion or replenishment period, which immediately preceded the first year of the expansion or replenishment period.

(3) For purposes of paragraph (2)(A)(ii), the term "subsidize" is used within the meaning of the Agreement on Interpretation and Application of Articles V, XVI, and XXIII of the General Agreement on Tariffs and Trade and the annex relating thereto, done at Geneva on April 12, 1979.

(4) Any funds withheld from payment to an international financial institution pursuant to this section shall be used to reduce the public debt in the manner specified in section 3113 of title 31, United States Code.

Mr. SYMMS. Mr. President, I apologize to the distinguished leaders of the Agriculture Committee, Senator HELMS and Senator ZORINSKY. It was my intention to offer this amendment next Wednesday, but it seems that there is an available opportunity here, so I offered it.

The purpose of the amendment is to restrict agriculture lending to our foreign competitors so that the U.S. taxpayer and U.S. farmers are not financing foreign agricultural exports with which they directly compete.

A number of our colleagues, including the good chairman of the Senate Agriculture Committee seated here, advocate restoring American farms to the reality of world markets. The rest of the Senate argues that we simply cannot compete with foreign producers.

If we cannot compete, Mr. President, much of it may be our own fault. International financing with Federal Government dollars has encouraged foreign production directly competitive with the United States. For example, this year Hungary received a loan of $80 million for "expansion of exports of processed animal products." Uruguay received $60 million to increase export incentives in the agriculture/livestock sector. Egypt was lent $139 million to increase production of rice for export.

All of these loans were made at interest rates far less than those available to our own farmers. No nation is rich enough to subsidize its competition in this way.

Subsidizing foreign production in an already surplus market is an inexcusable waste of resources. Many of these investments are driven more by the opportunity to acquire dollars at bargain interest rates than by actual market demand. Using these same dollars to reduce our deficit would be vastly more productive.

In the past 4 years, international financing institutions in which the United States participates have loaned out more than $20 billion for agricultural development. If this money were solely to combat the tremendous hunger and underdevelopment of the Third World, there could be few better investments. Unfortunately, international financiers look first to their repayment in high valued U.S. dollars. That means the developing country must export—even if it's not in the country's best interests.

Investments of this kind hurt American farmers in two ways: First, creating competition with our own agricultural products by countries which have no comparative advantage other than the availability of cheap credit; and second, increasing the demand for U.S. dollars with which to repay the debt, thereby driving up the dollar's value.

This amendment, entitled "The Foreign Agricultural Investment Reform," "FAIR" for short, reduces such self-defeating investment. It requires the Secretary of the Treasury to instruct U.S. executive directors of international financing banks to oppose investment in production of any commodity for export which is already in surplus on the world markets, and which would directly harm the U.S. exporters of the same commodity.

This provision is very similar to an amendment sponsored by our colleague from Utah, Senator GARN, which addresses international investment in copper, a mineral commodity also in surplus on world markets. That amendment passed this body unanimously to the distinct benefit of our domestic copper industry. There is no reason why we should not extend that same benefit to America's struggling farmers.

Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. Is there further debate on the amendment? If not, the question is on agreeing to the amendment. On this question the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from Colorado [Mr. ARMSTRONG], the Senator from Mississippi [Mr. COCHRAN], the Senator from Arizona [Mr. GOLDWATER], the Senator from Oregon [Mr. HATFIELD], the Senator from Nevada [Mr. LAXALT], the Senator from Maryland [Mr. MA-

THIAS], the Senator from Oregon [Mr. PACKWOOD], the Senator from South Dakota [Mr. PRESSLER], the Senator from New Hampshire [Mr. RUDMAN], the Senator from Alaska [Mr. STEVENS], the Senator from Wyoming [Mr. WALLOP], and the Senator from Connecticut [Mr. WEICKER] are necessarily absent.

I also announce that the Senator from California [Mr. WILSON] is absent on official business.

Mr. BYRD. I announce that the Senator from Texas [Mr. BENTSEN], the Senator from Florida [Mr. CHILES], the Senator from California [Mr. CRANSTON], the Senator from New Jersey [Mr. LAUTENBERG], the Senator from Vermont [Mr. LEAHY], the Senator from Louisiana [Mr. LONG], the Senator from West Virginia [Mr. ROCKEFELLER], and the Senator from Mississippi [Mr. STENNIS] are necessarily absent.

I further announce that the Senator from Massachusetts [Mr. KENNEDY] is absent on official business.

The PRESIDING OFFICER (Mr. ANDREWS). Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 65, nays 13, as follows:

[Rollcall Vote No. 258 Leg.]

YEAS—65

Abdnor	Glenn	McConnell
Andrews	Gorton	Melcher
Baucus	Gramm	Metzenbaum
Biden	Grassley	Mitchell
Bingaman	Harkin	Murkowski
Boren	Hatch	Nickles
Boschwitz	Hawkins	Nunn
Bumpers	Hecht	Proxmire
Burdick	Heflin	Pryor
Byrd	Heinz	Quayle
Cohen	Helms	Riegle
D'Amato	Hollings	Roth
DeConcini	Humphrey	Sasser
Denton	Inouye	Simpson
Dixon	Johnston	Specter
Dole	Kassebaum	Stafford
Domenici	Kasten	Symms
Durenberger	Kerry	Thurmond
East	Levin	Trible
Exon	Matsunaga	Warner
Ford	Mattingly	Zorinsky
Garn	McClure	

NAYS—13

Bradley	Evans	Pell
Chafee	Gore	Sarbanes
Danforth	Hart	Simon
Dodd	Lugar	
Eagleton	Moynihan	

NOT VOTING—22

Armstrong	Lautenberg	Rudman
Bentsen	Laxalt	Stennis
Chiles	Leahy	Stevens
Cochran	Long	Wallop
Cranston	Mathias	Weicker
Goldwater	Packwood	Wilson
Hatfield	Pressler	
Kennedy	Rockefeller	

So the amendment (No. 905) was agreed to.

Mr. SYMMS. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. DOLE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOLE. Mr. President, there will be no more votes today, but I hope, if there are those who have amendments that could be accepted, they would remain.

I was reminded by one of the distinguished managers of the bill, Senator ZORINSKY, that from the time they started on this bill this morning there was not a single interruption, not a single quorum call until 2:30. So there has been a steady application of effort on the bill. I thank my colleagues from both sides of the aisle.

There have been at least 10 amendments disposed of. There is an amendment pending, an animal welfare amendment, that I hope Senator HATCH will agree to. We are trying to negotiate some differences on that now and will not get that done today.

So there will not be any more votes today.

Mr. KERRY. Mr. President, I wonder, since today has been a good day, if it might be agreed to stack votes until Tuesday, so that on Monday we could be able to do some of the things we were not able to do today.

Mr. DOLE. I would say this again: This is a matter of great urgency to many of us in the rural areas. I think there will be enough of us here on Monday to offer amendments.

And if we can dispose of a number of those that do not require rollcalls—it is not my desire to punish anyone—I think it is probably fair to say that Monday may be a good day to send out your laundry.

Mr. KERRY. So we understand, there will be no rollcall votes on Monday.

Mr. DOLE. I will do my best. Somebody could jump up and ask. We are going to try to continue. There are a number of noncontroversial amendments that will take most of the day. Then, I think, we will have a major amendment offered. When you get into a major amendment in the farm bill, you have several hours of debate. We are not going to hold up anything, but we are going to go forward with amendments that we achieve without rollcalls.

Mr. KERRY. Thank you.

Mr. METZENBAUM. If there should be an amendment, can we be assured at least that the rollcall would be in the afternoon?

Mr. DOLE. Yes. We will even try to do better than that.

Mr. PROXMIRE. Mr. President, can the majority leader tell us the nomination of Mr. Grundfest to the FEC will come up, and will it come up this afternoon?

Mr. DOLE. As I understand, it could come up this afternoon. I might ask. Is the Senator from Wisconsin willing to have it come up this afternoon?

Mr. PROXMIRE. Yes, indeed. I want to speak on it as soon as I can.

Mr. DOLE. We will do it as quickly as we can, I say to my friend.

Does anyone else have amendments?

Mr. GRASSLEY. Mr. President, as I had indicated earlier, I was prepared about 1 o'clock to make some remarks on the farm bill. Because the Senator from Tennessee had an amendment that he found very necessary to offer because of time constraints on his part, I gave up the floor at that point. So I would like to discuss the farm bill as we proceed to its consideration. We have even acted upon some amendments.

I think it is very important that we fully understand not only the magnitude of the problems facing agriculture, but also the reasons for these problems. Obviously, if we do not recognize and understand the underlying reasons for the financial problems facing farmers as well as the reasons for the recently high cost—budgetwise of our farm programs—there seems little hope of developing a new farm bill and farm policies that will have a chance of success.

Mr. President, I would like to share a story that I think illustrates the real problems facing agriculture. This story is also aimed at exposing the flaws in much of the reasoning that at this point appeared to represent the driving forces that will shape the characteristics of a new farm bill.

The characters in our story includes the U.S. Olympic track team, America's best and, of course, its coaches and doctors. The rules and practices of these world games are quite different as you will soon see. So bear with me.

Our Olympic track team was the best in the world. We won every race, beating our competitors at the Olympics, and at other world games.

But then one day, the official starter began using real bullets in his starting gun, and it happens that he shot our top track stars right in the foot. Of course, that was a gruesome picture.

Needless to say, they did not perform as well with the bullet holes in their feet, but another major problem this created is that our track stars began losing a great deal of blood. Fortunately, the team doctors had a good supply at the blood bank. So whenever an official shot one of our athletes, the doctors were there ready with the transfusions.

The only thing that kept our track stars going was a commitment of a good supply of blood. The doctors administered transfusion after transfusion and tried to patch our track stars up the best that they could so they could continue to compete.

Then one day the coaches decided that too much blood was being given to our crippled track stars. The coach consulted with our Olympic Commit-

tee, and they also agreed. Our track team had been using more blood than they had a few years ago. Not only had the team been using more blood, it was no longer winning the track meets. The coach and the Olympic Committee decided that the solution to this problem was to cut off the blood supply.

It was obvious to them that all those transfusions had not helped, and in fact, were probably the reason that our track stars could no longer compete effectively with the rest of the world.

The outcome to this major decision came as no surprise. Our team lost a good number of its very best stars. Moreover, our team was never the same after that tragic decision.

It seems quite obvious to me, and I hope this point is not lost with my colleagues, but it is obvious that what our track coach and Olympic Committee should have done is keep up the blood transfusions.

The second thing, and probably most important, they should have done is put a stop to all that bloodshed and the cause of all that bloodshed. We needed to stop shooting our athletes in the foot. Once they stopped shooting them, the need for transfusion obviously would drop off to nil. Furthermore, our athletes would then be able to compete in the world arena as they had in the past and would have continued to beat all of the top competitors around the world.

Mr. President, this story is a precise analogy to what has happened and to what is about to happen to the American farmers competing in the world market.

American farmers have been shot in the feet by the hundreds of policy decisions, both actions and inactions, that our Government has taken, many of which were in no way intended to hurt the farmers, but, nevertheless, have had a very devastating effect.

We have shot them time and time again in the foot, and guess what? They have been bleeding ever since.

Fortunately, we have had in place a blood transfusion program, better known as our farm programs. This has given farmers basic, but very basic, price support protection, protection against the idiotic actions taken by our own Government and those taken by other governments which our Government has refused to counter.

But as we have continued to shoot our farmers in the feet, and in recent years it has increased in intensity and with great frequency, the demand on our farm programs has also increased. The need for blood, or should I say for Government funding, has increased tremendously.

The point for my colleagues to understand is this: The more we shoot the farmer in the foot with misdirected Government policies, the higher the outlays, the higher the cost in budget terms, for our farm programs.

I would like to give you a recent example that illustrates this.

During this past year, just within the last few months, the U.S. Customs Department made a grievous error in issuing letter rulings that allowed ethanol importers to avoid paying the legally required 60 cents per gallon duty for imported ethanol. Several million gallons entered the United States before this loophole was discovered by our domestic producers and by some of us in Congress.

Had we not caught this, as much as 600 million gallons of foreign-produced ethanol would have been imported duty-free into this country. The impact of this policy error would have been devastating to agriculture. Two hundred forty million bushels of corn would have been displaced, reducing the price of corn by at least 15 cents per bushel and by reducing farm income by at least $1 billion.

But this shot in the foot would have also triggered a transfusion. The Commodity Credit Corporation would have been forced then to purchase more corn, this displaced corn, and it would have cost nearly $1 billion. Add to that the 30 cents per bushel per year storage payments and the 25 cents per bushel per year in interest rates and over $1 billion would have been the cost to the taxpayers of this country in one misdirected action taken by just one agency.

Do you realize what farm critics would have then said? Of course, they would have said that we are spending $1 billion too much on farm programs. They don't bother with the reasons. They simplistically argue that the farm program is costing more than it should.

None of us can afford to start casting stones. The blame can be spread around quite well among past and present administrations, and Congresses of both political parties.

Farmers have had a history of resiliency. They can take on the bad weather, perhaps a few bad policies, but farmers have their limits.

But how can the farmer survive one attack after another that shoots them in the foot? Monetary policy, squeezing out inflation, and strengthening the dollar is great for some but it devastates the farmer.

Fiscal policies aimed at revitalizing America have helped much of the country, but controlling taxes has also contributed to a widening budget deficit because Congress has not had the nerve to cut spending as it should. This too, affects interest rates and the strong dollar, which hurts farmers.

Cheap food policies are great for consumers but it has put a lid on farm prices.

Our trade policy has turned into a one-way street that helps our trading partners but cuts off farm trade abilities.

Why do we not stand up to these unfair trade practices as a Government?

Cargo preference is great for the maritime industry but it hurts farmers and increases the cost of farm programs.

Embargoes are seductively attractive for our State Department, but they ruin our farmers. The last Soviet grain embargo by the previous administration, in 1 year alone, 1980, cost us over $11 billion in national output, $3 billion in personal income, and a staggering loss of 310,000 jobs.

The consumer activist running the Department of Agriculture in the last administration had a hey-day with the nitrite fiasco. Talk about Government policy with blinders! Scare the wits out of people about hot dogs because of the necessary preservative additives, but don't tell them the same chemicals occur naturally in vegetables. Does anyone have any idea what unnecessary cost there was to the American farmer? Well, it ran into the billions of dollars.

Some might argue that if responsible and fiscal monetary policies are the solution to the farm prices, the place to begin with is by slashing the spending levels in this bill. But deficit cutting must be done responsibly and fairly, not austerely.

Did we act "responsibly" by holding the defense increase to just $109 billion in outlays over the next 3 years above the 1985 level. Did we act responsibly by holding the entitlements increase to just $88 billion over the last year's level. If you add energy, education, and the interest account to all of that before mentioned, you have 91 percent of the Federal budget increasing responsibly.

I think we have to raise questions about how responsibly that really is.

Meanwhile, the 1.9 percent of the budget which is the agriculture budget, is being cut below the previous year's level.

So not only is there is a crisis going on in the farm sector, but our solution to it is austerity. What kind of policy is that? We don't even prescribe austerity, that type of austerity, in an economic recession. Why do we prescribe that sort of austerity for the farm sector?

It is not austerity we need but it is responsibility. Before you put a car in reverse, you obviously have to slow it down and then stop it. But we have been slowing down 91 percent of the Federal budget for 4 years and it is still rolling along. As if to compensate, we are asking 2 percent of the budget, the agriculture portion of the budget, to not only slow down and stop, but

also to reverse, all at the same time. Ever try to drive down the highway and slap it in reverse? It's not too good for your transmission, is it?

We are going to find that same effort if this administration were to get away with trimming the Senate Agriculture Committee bill the way they desire to trim it. So, Mr. President, we have to get responsible, before we reverse, we have to stop. Before we stop, we have to slow down. The farm programs have done their fair share of slowing down. Now we are willing to stop. We are asking for a freeze in target prices.

I do not know whether everybody realizes that, but this bill came out of the Agriculture Committee with a freeze in target prices. The bill affects the farmers. In a lot of ways other segments of the budget are not touched because they are not frozen, particularly the Defense Department. Let me remind my colleagues that 2 years ago, when target prices were supposed to go up to I think $3.15, farmers took a target price freeze they have already done their share. If we are willing to give the defense budget 3 percent real growth from now until eternity, we can certainly freeze target prices for only 4 years for only 1.9 percent of the budget.

People are finding fault with the fact target prices are frozen, calling it a budget buster. That is why I said previously today that I do not see where this administration is coming from when they say this budget is too expensive. On a relative basis, agriculture has already done more than its fair share of getting this deficit under control.

Also, a point I made previously: if they think this bill is expensive and Congress decides not to pass anything if this bill were to be vetoed, the President ought to be made cognizant of the fact that the 1949 legislation we would revert to would be three times more expensive than anything we are going to spend here. So he ought to think twice about even talking about that. It is not going to fool us any more.

Mr. President, the answer to our farm problems is not found in cutting off the blood supply to our farmers, unless we also take dramatic action to stop Government interference into the affairs of agriculture—all those embargoes, all those irresponsible fiscal policies that have brought high interest and high-valued dollar, all of those timid efforts on the part of our Government to enforce our trade laws, and all those other policies that we would consider nonagricultural that have hurt agriculture.

The best way to approach this problem is to freeze our budget, and then correct the problems that are causing the hemorhaging and creating the need for transfusions. I will not take a back seat to anyone when it comes to working for a balanced budget.

That is why for the last 4 years I have worked hard for an across-the-board budget freeze including farm programs. Had we followed this approach, Congress would not now be facing its deficit problems, and our farmers and farm programs would not be in such a mess.

We would not be waiting 6 years for a balanced budget under the Gramm-Rudman proposal. We would have had it by today. We would have had lower interest rates. We would have had a lower valued dollar.

Again, it has been suggested that the President may veto our farm bill if it is too expensive, but I want to remind my colleagues that Secretary Block admitted himself, on "Meet the Press" that permanent law would be far more expensive. I'm skeptical that when the reality of this is brought home to the President, he would veto it.

Mr. President, I hope my colleagues give very serious consideration to the points I have discussed this first day of what will be a long series of debates on the farm bill. It should help them better to understand what our problems really are, particularly all the governmental policies that adversely affect agriculture, drive down prices, and raise the budget costs of the farm programs, resulting in all the focus of attention being unfairly directed at the cost of the 1.5 percent of the budget representing farm programs. This unfair focus allows us to ignore the blame for that high cost of farm programs because of the other ill-conceived policies that have been for a long period of time hurting agriculture.

Mr. President, I hope this consideration of a broadened review of the farm problems, beyond this farm bill, gives people a little more moderate view of this very important piece of legislation.

Again, I urge my colleagues to approach this farm bill in a bipartisan manner.

Mr. President, when I am out in Iowa, and I think I have heard my other colleagues say it, there is not any partisanship brought up in our grassroots meetings in the sense of what sort of farm bill we ought to have. I never hear people say that we ought to have a Republican farm bill or a Democratic farm bill. People out there, because things are so economically bad in the heartland of America, are asking us to pull together to find a solution to this problem. Our farmers deserve better than to be exploited for political reasons. Nobody has done that so far and I do not expect that it will be done.

Moreover, the severity of this farm problem, more serious than it has ever been since the 1930's, absolutely requires that we work together to find a solution to this problem.

AMENDMENT NO. 906

(Purpose: To exclude liquidation proceeds from the income of farmers and other families if the proceeds result from foreclosure, forefeiture, or bankruptcy for the purpose of certain family contribution computations)

Mr. ABDNOR. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. An amendment by Senator DOLE is pending.

Mr. HELMS. Mr. President, I ask unanimous consent that the pending amendment be laid aside temporarily in order that the Senator from South Dakota may offer an amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will state the amendment.

The bill clerk read as follows:

The Senator from South Dakota [Mr. ABDNOR] proposes an amendment numbered 906.

On page 459, between lines 18 and 19, insert the following new section:

EXCLUSION OF LIQUIDATION PROCEEDS FROM FAMILY CONTRIBUTION COMPUTATIONS

SEC. . Section 482 of the Higher Education Act of 1965 is amended by adding at the end thereof the following new subsection:

"(f) The Secretary shall, within 30 days after the date of enactment of this subsection, promulgate special regulations to permit, in the computation of family contributions for the programs under subpart 1 of part A and part B of this title for any academic year beginning on or after July 1, 1985, the exclusion from family income of any proceeds of a sale of farm or business assets of that family if such sale results from a voluntary or involuntary foreclosure, forfeiture, or bankruptcy.".

Mr. ABDNOR. Mr. President, this is an amendment to ensure postsecondary students whose families face farm or business foreclosure or bankruptcy access to Federal financial assistance.

Mr. President, under current law and regulations, the proceeds from the sale of assets is included in the computation of the family contribution, even when those proceeds are used to retire outstanding debts.

Earlier this year, the son of a South Dakota rancher who has filed bankruptcy was denied student aid due to proceeds from the sale of land and livestock. Another young man, whose father sustained severe chest injuries in a farm-related accident, has had difficulty obtaining necessary financial aid as a direct result of the sale of the family farm. Prior to the accident which has left his father unable to operate the farm, this student qualified for financial assistance. Following the sale of the family's farm assets, he is no longer eligible even though the proceeds were used to pay outstanding debts.

Mr. President, these are tragic situations. I do not believe Congress intend-

ed to deny student aid to families facing foreclosure or bankruptcy. I ask my colleagues to join me in rectifying this serious inequity.

My amendment directs the Secretary of Education to promulgate regulations to permit in the computation of family contributions for the Pell grant and guaranteed student loan [GSL] programs, the exclusion from family income any proceeds from the sale of farm or business assets, in the event the sale resulted from a foreclosure, forfeiture, or bankruptcy. The amendment applies to academic years beginning on or after July 1, 1985, allowing students who are currently enrolled to file a correction to their existing applications.

Mr. President, many of our Nation's farm families are experiencing severe financial difficulties. My amendment simply corrects an inequity which precludes families in greatest financial need from obtaining student assistance. I know of no opposition to my amendment and I wish to point out to my colleagues that this same provision was adopted by the House Education and Labor Committee as a part of its reconciliation package. I believe it has been cleared on both sides of the aisle. It is imperative that this provision be adopted, and I urge my colleagues to support my amendment.

Mr. HELMS. Mr. President, there is no Member of this body more knowledgeable of the way the Senate operates than the distinguished Senator from South Dakota. He is a real pro. This is evident from the way he developed this amendment to the point of bringing it up for consideration by the Senate this afternoon. He has checked this amendment with the relevant committee, and it has been cleared by that committee, I have been assured. But more than anything else, I would emphasize that Senator ABDNOR is being very consistent today in terms of his interest in equity and fairness and his zeal to make sure that the small family farmer gets fair treatment. I commend the Senator and I commend him on his amendment. I assure him that on this side of the aisle it is acceptable.

Mr. ABDNOR. If the Senator will yield, I certainly thank him. I appreciate his kind words. Certainly this is an equitable amendment, one that rectifies a great injustice. We must not perpetuate a policy under which a student is eligible for financial aid a month before his family declares bankruptcy, but afterward is not because his family has been forced to sell its lifetime assets, and at that particular moment shows a great abundance of income until the proceeds are used to retire outstanding debts. My amendment will correct this inequity, thereby helping our Nation's farm families.

Mr. HELMS. It certainly will, and I commend the Senator again on his amendment.

Mr. HARKIN. Mr. President, I do not have any objections to the amendment. I believe it has been cleared on this side of the aisle. I say to my friend from South Dakota I had an amendment similar to this in the Agriculture Committee. While it did not speak to the exact purpose which the Senator from South Dakota speaks, that is, to the provision of support for the family through student loans and student aid for higher education, my amendment spoke to the fact that a lot of farmers go through involuntary foreclosure or bankruptcy and, because of the operation of the food stamp laws, they are not allowed to receive food stamps. We have farmers who have been growing food to feed the hungry for a long time, but because of involuntary foreclosure, because of the way they figure the food stamp provisions in that they take into account perhaps what their assets were, then they cannot get food stamps.

I do not have any problems with the amendment. I think it is a correct one. I think it speaks to an inequity. I hope the Senator will support an amendment which will come along later that would do similar kinds of things for those farmers who have been involuntarily foreclosed upon and are in bankruptcy proceedings so that they could be considered under the food stamp and other assistance provisions like many people in our society.

Mr. ABDNOR. Mr. President, I have no quarrel with the junior Senator from Iowa. As a matter of fact, I have run into situations where farmers must pay a big income tax on assets sold to pay their debts. It is tragic to see someone forced out of a business, forced to sell off all his assets to pay off his debts and then see him hit with a huge income tax because of that one sale.

Our Nation's farmers are facing real problems. I can well appreciate what the Senator is saying and that is why I am offering this amendment to assist our Nation's neediest farm and business families in obtaining necessary student aid.

Mr. HELMS. I suggest we vote, Mr. President.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from South Dakota.

The amendment (No. 906) was agreed to.

Mr. HELMS. I move to reconsider the vote by which the amendment was agreed to.

Mr. McCLURE. I move to lay that motion on the table.

Mr. HELMS. Mr. President, I do not see Senators anxious to offer amendments. I notice around this place that when the majority leader says there will be no more rollcall votes, it is almost a traffic jam leaving the parking facility downstairs. I suppose that is true right now, and I believe Senator HARKIN wants to join them. I wish him a nice weekend.

Mr. HARKIN. Mr. President, if the chairman might indulge me, I do not intend to keep everyone here for a long statement, but I wish to make some comments on the farm bill.

Mr. HELMS. Of course. Very well.

Mr. HARKIN. I have not yet had an opportunity to do that today.

The PRESIDING OFFICER. The Senator from Iowa is recognized.

Mr. HARKIN. Mr. President, the debate has finally started on the farm bill—long overdue, but better late than never. I believe we have seen the first minor skirmishes today, although the votes have been overwhelming. Some minor amendments have been adopted. But the real intense debate and the real crucial votes will be coming up hopefully next week as we continue debate on the bill.

I wish at this point to indicate for the RECORD why I voted against the bill, S. 1714, when it came out of committee. As a new member of the Senate Agriculture Committee this year, I first want to pay my respects to the distinguished chairman, the Senator from North Carolina, for his conduct in operating the committee in an open and very fair manner throughout the entire debate from the beginning of this year. As I have said before, at no time was any member cut off from debate or was anyone ever precluded from offering any amendment that any member of the committee wanted. So the debate in the committee was full and open and very fair.

I voted against the bill when it came out of committee—I think I was probably the only person on my side of the aisle to do so—basically for three reasons, but one in particular.

Mr. President, even with the target price freeze in the bill, the fact remains that if this bill were adopted in its present form and signed by the President, it would indeed reduce farm income in the Midwest in each of the next 4 years. I have stated from the beginning of this year that in no way will I vote for any farm bill or any amendment to any farm bill that will reduce farm income. That is basically what we have here even with a freeze.

There was an amendment in committee offered by the distinguished Senator from Oklahoma [Mr. BOREN] that tiered the target price payments for wheat. It would increase somewhat the income for family-sized farmers in the wheat-producing areas. A similar amendment was not adopted for feed grains, and I will be offering that amendment next week. I am hopeful that it will be adopted to at least bring

51-059 O-87-22 (Pt. 21)

feed grains on a par with wheat and to target farm program benefits to family-sized farms. But because the bill in freezing target prices would in reality reduce income in each of the next 4 years, I have found that I could not vote for it.

Another reason I could not vote for it was because there were some amendments adopted in the committee that I believe went against what we have been trying to do as a nation, as a Government for many years in meeting the needs of poor people who require food stamps or require feeding assistance, either for those who are poor or for those who are elderly or perhaps those who belong in both of those categories. There were amendments offered and adopted in the committee which I felt were overly harsh on that segment of our population. Again, I am hopeful that we can rectify it on the floor next week.

Lastly, I voted against the bill because it continues the failed policies of the past. I hear from my people back home that they want two things done: they want the deficit reduced and farm income increased. Well, this farm bill does just the opposite; it increases the deficit and reduces farm income.

So, Mr. President, for those reasons I found I could not in good conscience vote for the bill when it came out of committee.

There are some good provisions in the bill that I am supportive of, and I am especially proud of the strong conservation measures adopted by the committee which are now in this bill. I hope those measures will stand the test of floor debate and will come to the floor as they come out of the committee.

In short, the bill does need to be strengthened and not weakened. So votes will be taken next week, and the votes will fall on whether or not Senators want to increase or decrease farm income.

I will pick up where my distinguished colleague from Iowa, Senator GRASSLEY, pointed out a few minutes ago, that there are a lot of forces affecting agriculture. Many outside of agriculture and outside the farmers' power to do anything about it—a strong dollar, about 30 percent overvalued against most other currencies of the countries to whom we sell our grain; about a 30-percent tax on everything we export; and a 30-percent subsidy on everything we import.

So we are pricing ourselves out of the world market in grain, not because our grain is overpriced or our support prices too high, but because the dollar is overvalued. So I see the administration saying to the farmers, "Take a lower price," but the problem is the value of the dollar.

I do not know why the farmers of Nebraska, Kansas, Iowa, Georgia, Florida, Alabama, or anywhere else in this country have to take it in the neck because of the misguided economic policies of this administration. If they want to sell more abroad, I suggest the answer is not to reduce farm income but to reduce the value of the dollar, and that is what the administration has within its power to do. The farmer cannot do it, but the administration can do it. That would do more for selling our products abroad than anything else.

By just reducing farm prices, I ask how low does the price of a bushel of corn or wheat have to go before we can be competitive on the world market? I suggest that it would go so low that it would bankrupt our wheat and grain farmers all over this country, if we continue to play that kind of game.

Farmers are also faced with high interest rates, high real interest rates. They have no control over that. That is caused by the misguided economic policies of this administration in squeezing down the money supply and increasing the real interest rates. Our farmers are still paying some of the highest real interest rates they have every paid.

There are two other reasons why our farmers face these difficulties beyond their control. One is that other countries subsidize their farmers. We hear a lot of talk about a free market, but there is no free market out there, not when all these other countries subsidize their agriculture, as they have always done and will continue to do.

I have pointed out in the debate on this matter that we are the only Government in the world that sells its grain abroad through private companies. Every other country uses a grain board which sets the price of their grain. They have done it for years and will continue to do so.

If we are going to continue this game, we will drive down our prices, they will drive down their prices, we will bankrupt our farmers, and our Government and they will bankrupt theirs. That is a formula for increased chaos and increased hardship in this country and abroad, particularly in the developing third world countries.

Last—and the reason why our farmers are having a problem overseas with selling products—is that there is a normal growth in agriculture production in other countries. I refer here to a recent editorial in the Des Moines Register by a distinguished former editor of that paper, Lauren Soth. Mr. Soth is perhaps one of the foremost agriculture experts and observers of agricultural policy in this country. He has been writing about and observing agricultural policy, I think, for the last 30 to 40 years. In a recent editorial, he pointed out all the different factors that are influencing agriculture which are beyond the farmers' individual or collective power to do anything about. I especially talk about this last point, that other countries are increasing their production. I read from his editorial:

So, add up the factors. In the long run, we're bound to lose our share of the world food market, because less-developed countries (and the developed ones, too) are adopting our advanced farm technology and growing more of their own food. Monetary and fiscal policies far overshadow farm-price policy in foreign trade.

So, in writing new farm legislation, let's not overemphasize the foreign market by subsidizing exports and subsidizing farmers for overproducing. It should be sounder economics to hold production more nearly in line with real market demand. That is true market orientation."

Mr. President, I ask unanimous consent that the editorial be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

[From the Des Moines Register, Oct. 21, 1985]

CLUES TO CRISIS IN AGRICULTURE FOUND IN WORLD-TRADE SITUATION

(By Lauren Soth)

You might get the idea from debate on the new farm bill that high price supports have ruined the foreign market for U.S. farmers. Ag. Secretary John Block gives that impression; he harps on the subject every time he makes a speech. He argues that "market orientation" is the answer—plus, contradictorily, his Bonus Incentive Commodity Export Program, an export subsidy, although that has been almost a complete bust.

Reducing commodity-price supports might also prove to be a bust in boosting grain exports. There are a few other factors affecting U.S. farm exports. The level of farm-price supports seems far less significant when you examine the others. John Block's economists have done so and it would pay him to read their stuff.

Increasing world production. World grain production has been increasing faster than consumption. India and China no longer import grain and in some years are exporters. The U.S. share of world grain trade would be expected to decline because of greater production elsewhere, aside from other factors. However, the U.S. share of combined wheat and coarse-grain exports has fallen only moderately to about 50 percent from 55 percent in the 1980-81 marketing year.

The world recession. After the soaring inflation of the 1970's the leading industrial countries acted in concert, or almost in concert, to slow the rate of money growth and put a brake on inflation. The annual rate of growth of money supply in these countries was 10 percent from 1974 to 1980. In 1980-1984 it was 6 percent. The Reagan administration led the money restriction. This brought about a sharp and prolonged global recession.

That curtailed foreign trade in general and brought down agricultural prices. Countries with large debts couldn't meet payments and cut imports. Also, the value of the dollar rose in foreign exchange. A study by the USDA Economic Research Service indicates the United States lost about $10 billion in farm exports from 1981 to 1985 from this cause. That is nearly equal to the

total decline in farm-export value, leaving little to be explained by high price support.

The much-cursed Carter grain embargo against Russia in 1980-1981, was inconsequential. Grain exports increased in that period.

Poor quality grain in export shipments. The Farm Journal ran a review of complaints about the foreign material and mixture of low-quality grain in some wheat, corn and soybean exports. I don't know how much weight to place on these complaints. Buyers often complain about such things, as the Japanese and Soviets did about embargoes, as a weapon in bargaining for better deals.

However, the Farm Journal report is convincing that our export grain is often not up to the quality of the Australian and Canadian wheats and Argentine corn. In the late 1970s I served on an advisory panel for the Federal Grain Inspection Service, and I thought at that time F.G.I.S. was making progress toward tighter inspection. But, our grain standards apparently are looser than those of other exporting countries.

The world market is not a free market. A good deal of the international trade in grain takes place not on the basis of market pricing, quality and service but on the basis of subsidies, tariffs and other kinds of inventions. That includes the United States with its BICEP and other export subsidies. Most important, a substantial amount of the business is by state trading, direct or indirect, notably by Russia, the biggest importer.

France and other European countries subsidize exports to maintain high internal prices. They also assess countervailing tariffs to limit imports of many food and farm products. So do we: recent example, the duties on hogs and pork from Canada.

Of course, sugar is the extreme example of non-free trade. We maintain prices for our sugar growers at about four times the world price. We could pay off every sugar grower's investment in land and equipment and save money for taxpayer-consumers within a few years by importing from lower-cost foreign producers.

That policy would knock the tar out of the corn-sweetener business of Archer-Daniels-Midland and other processors. Corngrowers' lobbyists wouldn't like that, but it would be a move in the direction of free world trade, which they claim to want.

So, add up the factors. In the long run, we're bound to lose our share of the world food market, because less-developed countries (and he developed ones, too) are adopting our advanced farm technology and growing more of their own food. Monetary and fiscal policies far overshadow farm-price policy in foreign trade.

So, in writing new farm legislation, let's not overemphasize the foreign market by subsidizing exports and subsidizing farmers for overproducing. It should be sounder economics to hold production more nearly in line with real market demand. That is true "market orientation."

Mr. HARKIN. Mr. President, we have two courses we can follow.

One, we can reduce farm income and reduce it drastically as proposed by this administration and then suffer the consequences—devastation in our rural countryside, the loss of small towns, communities and small businesses, bankruptcies of farms, businesses, and banks all over the country, as well as the entire collapse of our Farm Credit System and perhaps of our rural commercial banks.

We have about $220 billion in farm debt in this country. Some are saying that perhaps 50 percent of that has to be written off. If that is so, what is going to happen when that $100 billion that has to be written off?

I suggest that if you think Continental Illinois Bank would have caused problems in this country had it failed, wait until the bad debt in agriculture, which may approach $100 billion, has to be discharged. Then I think you will see Wall Street down in Washington lobbying for a farm bill that will increase farm income. I do not think we have to wait that long, and I hope we do not.

I hope we will take the other course, that is to recognize that farmers simply are overproducing. They have the capacity to do that and have been encouraged to do so because of the policies of this administration. But the way to increase farm income is to get supply in line with demand, and that means getting our production in line with what the demand is. If we go down that road, we can increase farm income.

If we increase farm income, we will save the Farm Credit System and we will not have to come back here next month or next year to bail out, to the tune of perhaps $5 or $10 billion, a Farm Credit System that is already facing bankruptcy.

So those are the two distinct courses of action.

I hope that in the wisdom and judgment of the Senate all next week, as we continue with this farm bill, we will find it in our power to enact amendments to this bill that will not continue the failed policies of the past, but will strike out on a new course which will allow farmers themselves to be able to control their production, to get the supply in line with the demand, so that we can reduce the amount of Government payments going to farmers, and let the farmers make the profit they need and deserve from the marketplace and not as Government payments.

Mr. President, I commend to the Senate that we take a look at a new course of action and not continue the failed policy of the past.

I thank the distinguished chairman of the Agriculture Committee for permitting me this opportunity to deliver my remarks on the opening day of the debate on the farm bill.

The PRESIDING OFFICER. The assistant majority leader.

Mr. SIMPSON. Mr. President, while the Senator from Iowa is here, I do want to commend him on his extraordinary knowledge of the issue of agriculture. He has previously served in the House of Representatives from the State of Iowa.

Our House brethren have more opportunity, as has the occupant of the chair also—in serving in the House of Representatives, of having more opportunity to direct their attention and knowledge to a certain singular area, and certainly Senator HARKIN brings to this Chamber a great deal of information and knowledge about agriculture and the farm bill. That is something I have watched with great interest. He does a very fine job on that.

I just wanted to indicate that certainly the farm bill will be one of the most vexing things before us. We have all heard today how that will be.

I must just share with Senators and take one moment and not longer to indicate that I recently had a call from a very lovely friend of mine who has ranched for 40 years in Wyoming and raised cattle and wool and also purchased a farm in Iowa of 1,500 acres to raise corn there. Then he might take the corn to the cattle in Wyoming or take the cattle to Iowa to feed them the corn and it worked very well, except that he called the other day and he said: "I am gone, I am broke, I am bankrupt."

I said, "I can't believe that, not you, anybody but you."

He said: "Well, it is true." And you know what? I did it to myself. "There is no one to blame. I overextended myself. I overleveraged myself. I did it, and I am gone."

I had not heard anyone in the farm crisis say that before like he did because when we say that the farmer himself is powerless and it is beyond his power to do anything about the issue I must say that I do not believe that. I am not being hardhearted but I do not believe that. Because greed is controllable, and in many instances they overreached themselves; with the assistance of their land-grant colleges, telling them to build and plant fence to fence, and their newsletters out of the Midwest, telling them what to do and the commodity credit market making them wizards in "puts and calls" instead of water and grain; and so there it is.

We do not want to lose sight of the fact that we do have a problem and we will not solve it at all with money. That farm money goes to some of the biggest, heavy hitters in the United States, and I have said it before and I will not belabor the body again. It is late and we are here on Friday afternoon and we are going to close up and we are going to do that in 1 minute.

But when in 1984, 14.5 percent of the wheat money goes to 1.4 percent of the wheat growers, something is goofy. When 16 percent of the corn money goes to 2 percent of the corn growers, something is sick. And the whole rest of it is sick right down the line—62 percent of the dairy money goes to 25 percent of dairymen; 56 per-

cent of cotton money goes to 12 percent of cotton producers; and 65 percent of rice payments go to 22 percent of rice producers.

So we continue on and we will have a marvelous debate about the poor old guy in the Oshkosh B'Gosh overalls out there with hoe in his hand looking out into the sunset; and he does not get hardly a nickel.

Until we deal with target prices, which are putting us completely out of the international market, we will not get anywhere. Until we cut the deficiency payments, which are a marvelous advantage for those who know how to work the programs, then we are not going to get out of the box.

So if we are all just going to sit back and overproduce and overproduce and wait for the Feds to bail everybody out, I must say I am not too sympathetic about that.

OK, the mail will begin to flow on Monday after this statement, so I will now repair to some other issue!

So, now my friend the Democratic leader is present and we do have a bit of business here to do.

POSSIBLE AMENDMENT TO STRIKE AGRICULTURE COMMITTEE'S ENERGY ASSISTANCE PROVISION

Mr. HELMS. Mr. President, I am concerned by the possible offering of an amendment to strike the Agriculture Committee's provision reforming a complicated problem dealing with the deductibility of certain energy expenses in the Food Stamp Program. As I understand it, the amendment may be offered to the farm bill (S. 1714) or to the same provision in the reconciliation bill (S. 1730).

The amendment would have the effect of increasing food stamp benefits to reflect energy expenses which are already being paid by another Federal program. The adoption of such an amendment to the reconciliation bill would reduce the savings in the Agriculture Committee's portion of the bill to the point that the committee would be out of compliance with its reconciliation instructions. Since time constraints may preclude a thorough discussion of the subject on the budget reconciliation bill, I am taking this opportunity to outline some of the facts surrounding the committee's provision.

I regret that the situation involved is rather complicated, but I will attempt to outline in the most succinct manner possible both the committee provision and the consequences of striking it.

The committee adopted a provision which corrects an anomaly that presently exists, which the proposed amendment would reinstate, whereby food stamp recipients are eligible for deductible shelter expenses even when those costs were paid for by federally funded energy assistance payments.

The Agriculture Committee's provision establishes the straightforward principle that deductions for shelter expenses in the Food Stamp Program should not be allowed for expenses that are paid for by payments, direct or indirect, that are excluded as income. The provision was adopted by a unanimous 17-to-0 vote during Agriculture Committee consideration as a part of a bipartisan package offered by Senators BOSCHWITZ and LEAHY and sponsored by Senator HARKIN.

I want to stress that the committee in no way changes the longstanding policy that federally funded energy assistance payments are not counted as income for purposes of determining either food stamp eligibility or benefit levels. The only issue addressed by the Agriculture Committee was how to treat expenses paid for by payments—from the Low-Income Home Energy Assistance Program—that are excluded from being counted as income.

There are generally two types of low income energy assistance payments—direct payments made to individuals and indirect, so-called vendor, payments made to energy companies on behalf of individuals. Food stamp policy currently states that food stamp recipients who are also recipients of energy assistance vendor payments may not count energy costs paid to an energy company on behalf of the household as an expense for purposes of determining the household's deductible shelter expenses in the Food Stamp Program. This is a logical position because the household incurred no "out-of-pocket" expense of its own. Rather, the Low-Income Energy Assistance Program paid for those expenses. A recent court ruling in the eighth circuit court of appeals has overturned this interpretation and stated that such vendor payments must be counted as part of the household's expenses when determining the household's deductible shelter expenses. The ramifications of the court ruling are quite expensive if applied nationally. The committee's bill explicitly puts into law the present regulatory policy in order to reverse the court ruling.

The committee bill goes a step further. The present treatment of direct energy assistance payments is as illogical as the vendor payment policy is logical. While vendor payments do not count toward the household's deductible shelter expenses, direct payments made under the Low-Income Home Energy Assistance Program are permitted to count as deductible expenses. There is no reasonable rationale for this divergent treatment of such payments. The underlying principle should remain the same—that is, that expenses paid from excluded income should not be counted as deductible shelter expenses. To remedy this situation, the committee has taken the step of providing that both direct and indirect payments for energy assistance may not be included by the household in determining permissible shelter expenses.

I think I should emphasize that the committee bill does not restrict the States' ability to use standard utility allowances. The only provision in this regard is that standard utility allowances—which reflect average utility expenses instead of using each recipient's actual utility bills—must reflect only "out-of-pocket" expenses, not any Federal energy assistance payments received by the household. It is also important to note that under current law—unchanged by the committee—recipients may deduct actual expenses for energy costs rather than using the standard utility allowance.

The amendment would eliminate $65 million in annual savings resulting from the Agriculture Committee's provision and potentially add another $57 million annually—if the eighth circuit court ruling were to be applied nationally. Indeed, it should be stressed that the adoption of the amendment would throw the Agriculture Committee out of compliance with its budget reconciliation instructions.

I should also emphasize that some figures which have been circulated greatly exaggerate the impact of the committee's provision. One such listing purported to demonstrate the State-by-State impact of the committee's action. However, a careful analysis of the figures indicates that the cumulative impact adds up to almost five times the total impact estimated by the Congressional Budget Office.

Some of the overstatements seem to result from miscalculations or misunderstandings of the existing Food Stamp Program deduction procedures. Opponents of the committee's provision neglect the fact that an estimated one-half of all energy assistance is provided in vendor payments directly to the energy company; the committee's provision merely reinforces current regulatory requirements. These analyses also miss the fact that because some States have significantly high energy costs and standard utility allowances, the committee's provision would have less impact in those States. Indeed, one of the States cited as an example, Vermont, likely would have little or no impact from the provision. Among other shortcomings, opponents neglect to calculate that not all shelter costs are deductible now, a factor which is not changed by the committee provision.

The committee's provision addresses a complicated issue. However, the committee arrived at what was universally regarded as a fair and reasonable solution which I would urge the Senate to uphold.

POSSIBLE AMENDMENT ON FOOD STAMP OVERPAYMENTS

Mr. President, it is my understanding that an amendment may be of-

fered to the food stamp portion of either the farm bill, S. 1714, or the reconciliation bill, S. 1730, which would seriously undermine the effectiveness of the error rate sanction system in the Food Stamp Program.

Inasmuch at the amount of debate remaining on the reconciliation bill is greatly restricted, I thought it best that I take this opportunity to alert my colleagues to some of the shortcomings of the amendment. While I have been unable to see the precise language of the amendment, I understand that the amendment would:

First. Eliminate the committee's improved error rate sanction provision which was added to strengthen the program's administration and reduce overissuances.

Second. Establish a study of the error rate sanction system.

Third. Suspend for 2 years the collection of sanctions imposed on States that have an unacceptably high percentage of benefits misspent.

BACKGROUND

Error rates are determined periodically through a quality control system in which a valid sample of the program's participant caseload in each State is reviewed thoroughly by State and Federal officials to verify the accuracy of the participants' eligibility and the amount of food stamp benefits provided to them. Overpayments to eligible recipients and payments to totally ineligible individuals amount to about $900 million annually, and have been a serious problem in the Food Stamp Program for many years.

In 1982, the Congress adopted a tightened error rate system, sponsored by Senator DOLE, that included a sanction aspect whereby States are required to reimburse the Federal Government for a portion of overpayment errors above a specified target. That program now requires that States pay a portion of overissuances above 5 percent based on the amount of administrative costs being paid to the State by the Federal Government.

Under current law, States that fail to meet this error rate target of 5 percent will incur a penalty based on a reduction of the percentage of the Federal reimbursement for administrative costs for the program. The Federal Government pays for all benefit costs of the program and, generally, for 50 percent of administrative costs.

Under the present system, the Federal share of administrative costs is reduced by 5 percent for each 1 percentage point, or fraction thereof, by which the State's overpayment rate exceeds the 5-percent target. If the State's overpayment rate exceeds the target by more than 3 percentage points, it would lose an additional 5 percent—for a total of 10 percent—of its Federal administrative funding for each percentage point or fraction thereof exceeding the 3-percentage point difference.

To illustrate, overpayment rates above the target by 1, 2, and 3 percent now result in sanctions equal to a reduction of 5, 10, and 15 percent of administrative costs, respectively; overpayment rates above the target by 4, 5, and 6 percent result in sanctions of 25, 35, and 45 percent, respectively.

COMMITTEE PROVISION

While error rates have improved somewhat, apparently in response to the initial error rate system established in 1982, overissuances remain unacceptably high, and are projected to remain so. In response to this situation, the committee has adopted a provision to tighten further the error rate sanction system in the Food Stamp Program. Specifically, the bill provides that States will reimburse the Federal Government for the full benefit cost of all errors which exceed 7 percent. For error rates between 5 to 7 percent, the States would reimburse the Federal Government for 75 percent of the value of the benefits issued in error.

Thus, a State with an error rate of 6.5 percent would be liable for an amount equal to 75 percent of 1.5 percent of the benefits issued in the State. A State with an error rate of 8.0 percent would be sanctioned an amount equal to 75 percent of 2 percent of the benefits issued in the State and 100 percent of 1 percent of the benefits issued in the State.

The new sanction formula established by the committee is more equitable in that it bases liability strictly on losses to the Federal Government without regard to the level of administrative spending.

It should be emphasized that neither the system now in effect, nor that proposed in the committee bill, provides for full reimbursement of the benefit amounts erroneously issued. Rather, the error rate sanction system establishes thresholds for erroneous payments and imposes financial sanctions for a portion of the errors that exceed such thresholds. I should emphasize that the portion represented by the actual sanction is a mere fraction of the $900 million annually which is misspent through overissuances in the Food Stamp Program. Indeed, what we are talking about is that States have been held financially liable for under 10 percent of the cost of all overissuances, with the Federal Government absorbing 90 percent.

Frankly, it has long been my view that we should require greater State responsibility for overissuances. Indeed, that was the recommendation of the President's Task Force on Food Assistance as reported in January 1984.

I should emphasize, as the committee has emphasized, that the sanction system does not affect the benefits of legitimate recipients. Obviously, the sanction system does not affect recipient benefits at all.

It is the committee's expectation that States will respond to the new incentives of the committee's bill—just as they have responded to the initial Dole error rate sanction system. In all probability, not all States would be subjected to actual fiscal sanctions under the error rate sanction system recommended by the committee. Rather, it is hoped that States would respond to this new incentive by improving their administration of the Food Stamp Program. Federal taxpayers would be advantaged by the reduction in otherwise anticipated error rates and the consequent reduction in misspent Federal funds these error rates represent.

SUSPENSION OF SANCTIONS FOR OVERPAYMENTS

Frankly, the desire for a moratorium comes as something of a surprise to me. Prior to the amendment, there has been no legislation introduced in the Senate addressing any alleged shortcomings in the food stamp quality control system, nor recommending any sort of moratorium on collection for past overpayments made by the States that administer the program. Neither this provision, nor the alleged problems, have been the subject of hearings or other Agriculture Committee deliberations.

A suspension on the collection of sanctions would seriously undermine the efforts being undertaken to improve the administration of the Food Stamp Program at the very time we are finally beginning to see some results from the States in terms of lowering their overissuances.

If a moratorium were imposed, there is no longer any guarantee that the Federal Government would ever collect the sanctions owed. Indeed, the moratorium may be the first step toward that result.

Proponents of a moratorium point out that such a moratorium is already included in the reconciliation bill for the AFDC and Medicaid Programs. However, it should be noted that the Office of Management and Budget has already cited that moratorium as one cause for a possible Presidential veto and there may be attempts to make the bill more acceptable by striking that moratorium from the Senate bill. There are also significant differences between the AFDC/Medicaid Programs and the Food Stamp Program. A moratorium weakening the Food Stamp Program error rate sanction system would only weight down the reconciliation bill, further imperilling its ultimate enactment.

The majority leader, who also serves as the chairman of the Nutrition Subcommittee of the Committee on Agriculture, Nutrition, and Forestry, and Senator DOMENICI, the chairman of the Budget Committee, have outlined

in a recent "Dear Colleague" letter some of the rationale for maintaining the committee's error rate provision. Additionally, Secretary of Agriculture John Block has also outlined the administration's support for the committee provision in a recent letter to the majority leader.

I ask unanimous consent that these letters be printed at the conclusion of my remarks.

Mr. President, I hope this information will prove useful to my colleagues in understanding the importance of an effective error rate sanction system in the Food Stamp Program. The error rate sanction system is the only method the Federal Government has to ensure that the States will maintain an interest in good program administration and reduce the $900 million in annual losses caused by food stamp overpayments.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

U.S. SENATE,
Washington, DC, October 10, 1985.

DEAR COLLEAGUE: We are very concerned about the possibility that an amendment may be offered to the food stamp title of the Budget Reconciliation Bill (S. 1730), or the 1985 Farm Bill (S. 1714), which would effectively undermine the effectiveness of the error rate sanction system in the Food Stmp Program.

Since 1982, States have been required to reduce their overissuance errors or face sanctions reflecting the partial value of their overissuance errors. This system, originally proposed by Senator Dole, phased in a 5 percent error rate target over a period of three years. States are now responsible for a portion of the overissuances which exceed this 5 percent target, and must pay sanctions through an administrative funding mechanism.

When this system was originally developed, it was designed to meet the legitimate concerns of the Governors, state program administrators, U.S. Department of Agriculture, Congressional Budget Office, bipartisan members of the Senate Committee on Agriculture. Nutrition and Forestry, and certain advocacy groups—all of whom were represented and actively involved in the process. The final outcome (current law) represents a careful balancing of all of these interests. Therefore, we strongly oppose any effort to undermine this error rate sanction system now that it is having results.

Much progress has been made in reducing State overissuance error rates since the implementation of the Dole sanction system. This year's reconciliation bill contains a further strengthening of this system to provide slightly higher sanctions for States that continue to have unacceptably high error rates.

Although States are responsible for the administration of the Food Stamp Program, they have been reluctant to apply their own resources to improve program administration. Apparently, a contributing factor in the States' inaction is that food stamp benefits are totally federally funded. Therefore, for years prior to the sanction system, States had little incentive to strengthen their administrative procedures in the Food Stamp Program, because no loss of State funds was involved.

Suspension of the error rate sanction system in the Food Stamp Program would send a misleading signal to the States. Such a suspension would seem to indicate Congressional waivering with respect to the commitment to require greater accountability in the determination of food stamp eligibility and benefit levels.

Any proposal to weaken the error rate sanction system would be a serious blow against good program management, and we strongly feel that the Senate should reject this type of amendment. The error rate sanction issues as they relate to the Food Stamp Program differ from the AFDC and Medicaid programs and should be dealt with in their own context.

We are also concerned about the exaggeration that some States and their governors have engaged in to demonstrate support for a suspension. The contention has been made that States will have to pay significant sanctions; many Governors complain that their States cannot afford the sanctions. It is not the goal of the error rate sanction system to require heavy-handed payments to the Federal government. Rather, it was the intent that States invest in better management practices to achieve greater accountability in their administration of the Food Stamp Program. Only if certain States fail to take such corrective action will sanctions actually be levied by the Federal government. Based on the comparative financial conditions of the States (many of which have significant budget surpluses) and the Federal government (which has continuing massive deficits), it seems clear to us that the States can afford to invest in improved administrative techiques, or pay for part of the costs of overissuances. Currently, the Federal government absorbs the cost of over-issuances which consistently total about $900 million annually, only a portion of which is recovered through the error rate sanction system.

For these reasons, we hope that you will oppose any effort to weaken or suspend the effectiveness of the error rate sanction system in the Food Stamp Program.

Sincerely,

PETE DOMENICI,
Chairman, Budget Committee.
BOB DOLE,
Chairman, Subcommittee on Nutrition.

DEPARTMENT OF AGRICULTURE,
OFFICE OF THE SECRETARY,
Washington, DC, October 18, 1985.

Hon. ROBERT DOLE,
Majority Leader, U.S. Senate, Washington, DC.

DEAR SENATOR BOB DOLE: An amendment may be offered to the Consolidated Omnibus Budget Reconciliation Act of 1985 that would seriously undermine progress in reducing Food Stamp Program error rates. The amendment would declare a two-year moratorium on the collection of sanctions levied against states with high food stamp error rates. In the interim, a study would be done. Also, the Senate Agriculture Committee's improvements in the accountability of that system would be stricken.

The food stamp quality control system is not perfect, but it does work. It reduces error in the program by establishing a modest fiscal incentive for states to tighten administration of the program. The system does this by holding states responsible for a small percentage of the costs of errors they make.

So far, over $200 million has been saved through food stamp error reduction because of the quality control system. It has proven that it works. This quality control system assists low-income persons in need of food assistance by preventing waste and abuse. By reducing misexpenditures, more funds are available to aid those most in need, and fewer needy people are denied benefits because of sloppy administration.

This amendment must be defeated. It would signal to the states a lack of federal commitment to program accountability. The quality control system, initially proposed by President Carter, is required due to the nature of the Food Stamp Program. Food stamp benefits are funded by the Federal government without state contribution. States pay less than 450 percent of the program administrative costs. In light of this funding structure, the food stamp quality control system stands as the sole fiscal incentive for responsible program management.

In our view, states should pay the entire cost of errors they make in excess of the 5 percent error rate that the federal government underwrites completely. The Senate Committee on Agriculture, Nutrition and Forestry moderated our suggestion by requiring states to pay only 75 percent of their errors in excess of 5 percent unless they have error rates above the 7 percent level. Though we would have preferred a more aggressive approach, the Senate Agriculture Committee has wisely moved to strengthen food stamp accountability. This is a reasonable intitiative. It would be a grave error to strike this initiative and undermine the progress we have already made, particularly in light of the House Bill.

We appreciate your support of sound management and your opposition to this amendment.

Sincerely,

JOHN R. BLOCK,
Secretary.

ORDERS FOR MONDAY, OCTOBER 28, 1985

Mr. SIMPSON. Mr. President, I inquire of the minority leader and ask him if he is in a position to adopt the following:

Mr. President, I ask unanimous consent that when the Senate convenes on Monday, October 28, 1985, the reading of the Journal be dispensed with, no resolutions come over under the rule, the call of the calendar be dispensed with, and, following the recognition of the two leaders under the standing order, there be special orders in favor of the Senator from Wisconsin, Mr. PROXMIRE and the Senator from Alabama Mr. HEFLIN, for not to exceed 15 minutes each to be followed by a period for the transaction of routine morning business not to extend beyond the hour of 11:45 a.m., with Senators permitted to speak therein for not more than 5 minutes each, and provided further that the morning hour be deemed to have expired.

The PRESIDING OFFICER (Mr. BOSCHWITZ). Is there objection? Without objection, it is so ordered.

EXECUTIVE SESSION

THE EXECUTIVE CALENDAR

Mr. SIMPSON. Mr. President, after inquiry with the Democratic leader, I ask unanimous consent that the Senate go into executive session to consider the following nominations on the Executive Calendar: Calendar Order No. 469, John S. Erthein; Calendar Order No. 470, Joseph A. Grundfest; Calendar Order No. 472, Natale H. Bellocchi; Calendar Order No. 473, Michael Sotirhos; Calendar Order No. 474, Clyde D. Taylor; Calendar Order No. 475, Robert G. Houdek; Calendar Order No. 476, Malcolm Richard Wilkey; Calendar Order No. 477, Richard Schifter; Calendar Order No. 478, Adele Langston Rogers; Calendar Order Nos. 479 through 482, Executive Office of the President; Calendar Order No. 483, Dwight A. Ink; Calendar Order No. 484, Dennis Eugene Whitfield; Calendar Order No. 485, Joyce A. Doyle; Calendar Order No. 486, Laurence H. Silberman; Calendar No. 487, John S. Rhoades, Sr.; Calendar Order No. 488, Lyle E. Strom; Calendar Order No. 489, Jose Antonio Fuste; Calendar Order No. 490, Richard H. Battey; Calendar Order No. 491, Roy C. Hayes, Jr.; Calendar Order No. 492, Donald R. Brookshier; and Calendar Order No. 493, Roger A. Yurchuck.

I believe the Senator from Wisconsin has a comment to make on one of the calendar nominations.

Mr. BYRD. Mr. President, may I just briefly respond to the distinguished majority whip. All of the nominees enumerated by the distinguished majority whip have been cleared on this side.

Mr. PROXMIRE. I have not cleared one nomination. I want to speak on that nomination.

Mr. BYRD. Mr. President, I correct the RECORD. All but one of the nominees enumerated by the distinguished majority whip have been cleared, the one to which name the distinguished Senator from Wisconsin will now address.

NOMINATION OF JOSEPH A. GRUNDFEST, TO BE A MEMBER OF THE SECURITIES AND EXCHANGE COMMISSION

Mr. PROXMIRE. Mr. President, I anticipate that the Senate will approve this nomination. I am not going to ask for a rollcall, but I do want to speak on it because I think it is a very important nomination and I think it is a tragic mistake that the President has made this nomination.

I say this because so often the Senate simply rolls over and goes to sleep on the nominations by the President. We have a constitutional responsibility to advise and consent. It is a solemn responsibility, and anybody who has read the Federalist Papers knows that the Founding Fathers intended for the Senate to take that very seriously. In fact, at one point, the Founding Fathers provided early in the deliberations that the Senate would make many of these appointments.

This is an appointment to the SEC, the Securities and Exchange Commission, an agency which I felt for a long time was the best agency in Government. It is independent, it is bipartisan, by law it is required to have both Democratic and Republican members, and it is one where I think the Senate should exercise particular concern.

Now, to say that this candidate is qualified, it seems to me, is like saying that a candidate for a basketball team would be qualified, in spite of the fact that he was slow, a lousy shot, has no defensive skills, is lazy, refuses to pass the ball to anyone else, is a dumb player, and, in addition to that, is 5 feet 2.

I think if such a candidate were offered to play on a professional team, they would say, "Are you kidding?" And the response would be, "Well, nobody is perfect." That would be applied to this candidate, unfortunately.

Recently, the Legal Times had this to report about Mr. Grundfest. The Legal Times is an objective, professional, careful publication. This is what it said about him in its September 30, 1985 edition.

> A sampling of securities lawyers around the country revealed that most had not even heard of Grundfest—currently a senior staff economist at the Council of Economic Advisers—until his name appeared in newspapers as a rumored frontrunner to get the nod.
>
> With hearings on his nomination set for October 2, the skepticism of the securities bar regarding Grundfest's nomination has been further fueled by learning that his securities law training apparently takes a back seat to his interest and training in economics.
>
> "It is interesting that very few people know much about him," observed Meyer Eisenberg, who is a professor of law at the University of California at Berkeley School of Law and a partner at Rosenman Colin Freund Lewis & Cohen. "You want someone who is experienced and you don't want the commissionership to be a training ground for someone to learn the ropes," continued Eisenberg.
>
> Eisenberg, whose comments were echoed by other securities lawyers who asked not to be identified, further observed, "You don't appoint someone to the commission just because he has the right ideology. That is one issue, but the position (also should be filled by) someone with a depth of experience as a lawyer or academic or in the (investment) industry."

I say this is tragic because the SEC has been a great agency.

I could not agree more with these sentiments. At the outset I want to point out that the article I am referring to about Mr. Grundfest is a balanced one and says many nice things about him. As the article points out, people who have worked with him in the past "attest to his intelligence, his penchant for hard work and even his charm, although they too acknowledge that he is not steeped in the practice of securities law."

But I believe that a brief stint as a staff counsel and economist on President Reagan's Council of Economic Advisers, and the authorship of one chapter in the 1985 Economic Report of the President on "The Market for Corporate Control" and corporate takeovers is not sufficient training to qualify Mr. Grundfest for one of the two vacant seats on the Securities and Exchange Commission.

Mr. President, this is why I made the analogy to a 5 foot 2 center in basketball. The qualifications are absent to begin with. The one qualification that made them select him was that he favors takeovers. I want to speak about that in just a minute.

It is clear that if Mr. Grundfest has any influence in the SEC it will be to push it toward easy approval of corporate takeovers. I can just see Carl Icahn, Boone Pickens, Saul Steinberg smiling. I am not smiling. I think one of the most serious economic problems that confronts this country is corporate debt. We talk around here about Federal debt. Federal debt is almost $2 trillion. Consumer debt is a problem. That is over $2 trillion. Corporate debt is $3 trillion and rising very rapidly.

Mr. President, one of the reasons it is rising rapidly and a major reason is because corporate takeovers push corporations into debt in two ways. Corporate takeover the way it is financed is by borrowing.

If the distinguished Presiding Officer who is a veteran businessman who is interested in taking over a corporation, even with his net worth, it would be necessary for him to borrow money. He would have to borrow a lot of it. Of course, when he borrowed that money what would he do when he got the corporation? What is done is the corporation itself bails out the people who take it over. It goes to debt. That is only part of the problem. The other part of the problem is that in order for a corporation to avoid being taken over, what do they do? They convert their equity into debt. They do it by borrowing money, enormous amounts of money, and buying stock from their stockholders and putting it in their treasury. This makes the corporation unattractive because it is already leveraged so heavily that it is very, very difficult for a corporation to take it over and expect to profit in any way, shape, or form.

Mr. President, I asked the nominee about this problem at the hearing. I ask unanimous consent that my question of Mr. Grundfest and his answer be printed in the RECORD at this point. They appear on pages 30 through 32 of the hearing record.

There being no objection, the information was ordered to be printed in the RECORD, as follows:

Senator PROXMIRE. On that debt situation, is that favorable? It seems to this Senator that there's no question that the takeovers have resulted in an enormous increase in debt by the targets, both whether they're successful or unsuccessful, and the result is that in many cases firms have transferred equity capital into debt capital. They're more fragile in the event of a recession. That doesn't seem to me to be an advantage for the economy or for the particular firm, the employees of the firm, or the community where the firm is located.

Mr. GRUNDFEST. Well, let me try to combine the response to both questions and look at the situation of what happened in the context of Phillips and also to consider the question about the consequences of increased leverage that result in certain situations as a consequence of takeover contests or of defensive strategies to takeover contests.

In the case of Phillips, in order to understand what's happening there, I believe it's important to understand what's happening in the petroleum industry in general, not just the United States but also worldwide. We have the situation where the price of the underlying commodity is declining. In the context where the price of the underlying commodity is declining, it makes less sense to invest more money in attempting to search out and produce more of the commodity whose value is on the decline.

To take a simple analogy from the case of the real estate market, if the price of condominiums is decreasing one doesn't want to go and build a new condominium in that kind of a situation.

Many oil companies are in situations where, despite the fact that the price of oil is declining, they continue to expend massive quantities of money in search of more oil. A question is raised often as to whether that would be a rational expenditure of the company's resources.

In a situation where a company enters into debt convenants and debt agreements where alternative use of those funds would be for expending them on exploration to find oil whose price is currently declining, we have a situation where the company is essentially dedicating its cash flow through to its stockholders, thereby increasing value to the stockholders, taking money that might otherwise have been spent in exploration for oil whose price is declining, and allowing the investors to turn elsewhere in the economy and invest that money in other projects—new computer companies, for example, or whatever else appears to have more attractive rate of return than might be available in the petroleum market at that time.

Mr. PROXMIRE. Mr. President, in that answer I think you can see why I am troubled with the Grundfest nomination. He said almost nothing about corporate debt. He said, something toward the end which did not seem very logical. In this great statement that he made in the President's economic report that was the basis for his being selected, he says nothing at all about what is the No. 1 economic problem of our country so severely affected by takeovers; that is, corporate debt, and the product of takeovers being a situation in our country where our corporations are far more vulnerable than they ever have been to recession. If people think we had trouble in the 1930's with a debt that we had at that time, the trouble we are going to have in the next recession is going to be much more serious because we have this combination of a huge Federal debt, a massive consumer debt, and a much bigger corporate debt.

Mr. Grundfest is 33 years old. During his working career he has held a variety of challenging jobs. He has worked summers at the Federal Communications Commission; U.S. Department of State; worked for a law firm; he worked at the Aspen Institute for Humanistic Studies, Rand Corp.; Peat, Marwich & Mitchell; and at Wilmer, Cutler & Pickering, in addition to his current position at the Council. those jobs are for impressive law firms. They do not show any particular sustained activity or pattern of interest in the securities industry or corporate finance.

As he pointed out in his confirmation statement before the Commission today "must address increasingly complex problems" and there is a danger that if the right individual is not selected as a Commissioner, "the Commission will become incapable of properly regulating a rapidly evolving and increasingly complex securities market."

Mr. President, I do not believe that Mr. Grundfest has the hands-on experience or background to be the kind of solid commissioner the SEC needs at a time like this. Even his former employer at Wilmer, Cutler & Pickering, has conceded that Mr. Grundfest doesn't have a great deal of business or securities law experience that is substantial. The job of an SEC Commissioner should not in fact be used as a training ground or academic exercise for someone to learn the ropes or test his or her theories. I will vote against Mr. Grundfest because, in my judgment, he does not have the depth of experience as a lawyer, an economist, an academic or a securities practitioner that I believe is currently required given the complexity and volume of important issues pending before the Commission.

Mr. President, let me finally say that the SEC is under the jurisdiction of the Banking Committee in the Senate. For 28 years I have served on that committee, including 6 years as chairman. We on the committee have acted on all of scores of nominations to the SEC during those 28 years. I have been deeply impressed with the quality of the SEC which has an outstanding reputation. In fact, until recently as I say, I did consider it literally the most efficient, the most competent, and the most aggressive in the public interest in Washington.

Mr. President, the SEC is only as good as its commissioners. In the judgment of this Senator, the SEC will take a sad step backward with the appointment of Joseph Grundfest. Failure of the Banking Committee and the Senate to challenge this appointment is unfortunately typical of the serious delinquency of the Senate in fulfilling its constitutional responsibilities under the advise and consent clause. The SEC is not and should not be part of the President's family. It is separate and distinct. It is independent. It is by law bipartisan. Mr. Grundfest has been appointed simply because he, like the Reagan administration, favors a permissive policy in corporate takeovers. He will be the SEC guru on takeovers. So here we go with a big boost from the administration to encouage a national takeover policy that has the most serious adverse implications for the American economy.

Mr. President, I yield the floor.

The PRESIDING OFFICER. Without objection the Senate will proceed to executive session.

Mr. SIMPSON. Mr. President, I ask unanimous consent that the calendar items just identified be considered en bloc and confirmed en bloc.

The PRESIDING OFFICER. Is there objection? Without objection, the nominees are confirmed en bloc.

The nominees confirmed en bloc are as follows:

NATIONAL COUNCIL ON THE HANDICAPPED

John S. Erthein, of California, to be a member of the National Council on the Handicapped for a term expiring September 17, 1987, reappointment.

SECURITIES AND EXCHANGE COMMISSION

Joseph A. Grundfest, of the District of Columbia, to be a member of the Securities and Exchange Commission for the term expiring June 5, 1990.

DEPARTMENT OF STATE

Natale H. Bellocchi, of New York, a career member of the Senior Foreign Service, class of Minister-Counselor, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Republic of Botswana.

Michael Sotirhos, of the District of Columbia, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Jamaica.

Clyde D. Taylor, of Maryland, a career member of the Senior Foreign Service, class of Minister-Counselor, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Republic of Paraguay.

Robert G. Houdek, of Illinois, a career member of the Senior Foreign Service, class of Minister-Counselor, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Republic of Uganda.

Malcolm Richard Wilkey, of Texas, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Oriental Republic of Uruguay.

Richard Schifter, of Maryland, to be Assistant Secretary of State for Human Rights and Humanitarian Affairs, vice Elliot Abrams, resigned.

UNITED NATIONS

Adele Langston Rogers, of Maryland, to be an Alternate Representative of the United States of America to the 40th session

of the General Assembly of the United Nations.

EXECUTIVE OFFICE OF THE PRESIDENT

The following-named persons to be members of the Advisory Board of Radio Broadcasting to Cuba for the terms indicated:

For a term of 2 years:

Jose Luis Rodriquez, of Florida.

For terms of 3 years:

Joseph Francis Glennon, of Florida.

Danford L. Sawyer, Jr., of Florida.

Midge Decter, of New York, to be a member of the Advisory Board for Radio Broadcasting to Cuba for a term of 1 year.

John R. Silber, of Massachusetts, to be a member of the Advisory Board for Radio Broadcasting to Cuba for a term of 1 year.

Antonio Navarro, of New York, to be a member of the Advisory Board for Radio Broadcasting to Cuba for a term of 3 years.

U.S. INTERNATIONAL DEVELOPMENT COOPERATION AGENCY

Dwight A. Ink, of Maryland, to be an Assistant Administrator of the Agency for International Development.

DEPARTMENT OF LABOR

Dennis Eugene Whitfield, of Virginia, to be Under Secretary of Labor.

FEDERAL MINE SAFETY AND HEALTH REVIEW COMMISSION

Joyce A. Doyle, of New York, to be a member of the Federal Mine Safety and Health Review Commission for the remainder of the term expiring August 30, 1986.

THE JUDICIARY

Laurence H. Silberman, of the District of Columbia, to be U.S. circuit judge for the District of Columbia circuit.

John S. Rhoades, Sr., of California, to be U.S. district judge for the southern district of California.

Lyle E. Strom, of Nebraska, to be U.S. district judge for the district of Nebraska.

Jose Antonio Fuste, of Puerto Rico, to be U.S. district judge for the district of Puerto Rico.

Richard H. Battey, of South Dakota, to be U.S. district judge for the district of South Dakota.

DEPARTMENT OF JUSTICE

Roy C. Hayes, Jr., of Michigan, to be U.S. attorney for the eastern district of Michigan for the term of 4 years.

Donald R. Brookshier, of Illinois, to be U.S. Marshal for the southern district of Illinois for the term of 4 years.

SECURITIES INVESTOR PROTECTION CORPORATION

Roger A. Yurchuck, of Ohio, to be a Director of the Securities Investor Protection Corporation for a term expiring December 31, 1987.

Mr. SIMPSON. Mr. President, I move to reconsider the vote by which the nominees were confirmed.

Mr. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

NOMINATION OF LYLE E. STROM, OF NEBRASKA TO BE U.S. DISTRICT JUDGE FOR THE DISTRICT OF NEBRASKA

Mr. ZORINSKY. Mr. President, I am pleased to support as nominee for the U.S. District Court Mr. Lyle Strom, a distinguished attorney from my home State of Nebraska.

Mr. Strom was born and raised in Omaha, NE. He received both his undergraduate and law degrees from Creighton University in Omaha, and has practiced law with distinction for over 30 years. Mr. Strom's election to the prestigious position of fellow to both the American College of Trial Lawyers and the International Academy of Trial Lawyers reflects the depth of respect he has earned from his peers in the legal community.

Lyle Strom has proven himself to be an outstanding attorney and clearly possesses the requisite professional qualifications to join the judiciary. In addition, I believe that Mr. Strom has the type of personal qualities that will enable him to become a truly outstanding district judge. Many of his colleagues have taken it upon themselves to praise Mr. Strom. They particularly cite his integrity, patience, compassion, and dedication to his family and community.

Mr. President, I am a small businessman by profession, not a lawyer. But from my vantage point, Lyle Strom appears to have the background, ability, and enthusiasm to uphold the commonsense, even-handed legal traditions of the State of Nebraska.

I urge the Senate to confirm Mr. Strom's nomination.

Mr. SIMPSON. Mr. President, I ask unanimous consent that the President be immediately notified that the Senate has given its consent to these nominations.

The PRESIDING OFFICER. Without objection, it is so ordered.

LEGISLATIVE SESSION

Mr. SIMPSON. Mr. President, I ask unanimous consent that the Senate now return to legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

THE CALENDAR

Mr. SIMPSON. Mr. President, I would inquire of the Democratic leader if he is in a position to adopt any of the following resolutions: Calendar No. 360 (S.J. Res. 227); Calendar No. 361 (S. Con. Res. 76); Calendar No. 362 (S. Res. 237); Calendar No. 363 (S.J. Res. 207); Calendar No. 364 (S. Res. 96); Calendar No. 365 (H.J. Res. 308); and Calendar No. 366 (H.J. Res. 322).

If so, I would then ask unanimous consent that the calendar items just identified be considered en bloc and agreed to en bloc, and all reported preambles be agreed to en bloc.

The PRESIDING OFFICER. Is there objection?

Mr. BYRD. Mr. President, there is no objection on this side.

Mr. SIMPSON. Mr. President, I renew my unanimous-consent request.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMENDING THE PEOPLE OF SWITZERLAND ON THE OCCASION OF HOSTING THE MEETING BETWEEN THE LEADERS OF THE UNITED STATES AND THE SOVIET UNION IN GENEVA, SWITZERLAND

The joint resolution (S.J. Res. 227) to commend the people and the sovereign conferation of the neutral nation of Switzerland for their contributions to freedom, international peace, and understanding on the occasion of the meeting between the leaders of the United States and the Soviet Union on November 19-20, 1985, in Geneva, Switzerland, was considered, ordered to be engrossed for a third reading, read the third time and passed.

The preamble was agreed to.

The joint resolution, and the preamble, are as follows:

S.J. RES. 227

Whereas Switzerland has long played a leading role among nations in the search for international peace and understanding, has generously provided its territory and assistance for international organizations and conferences, and its diplomatic services for arbitration and mediation of disputes among states; and

Whereas the government of Switzerland has for many years generously represented the diplomatic interests of other nations, including the United States, in lands where these nations have no relations; and

Whereas the United States and Switzerland share a common heritage, based on a commitment to political and religious freedom of expression, on our shared legacy of a constitutional and federal government, on our commitment to human rights and the dignity of the individual, and on our firm belief that a free-enterprise economy provides the greatest prosperity for the greatest number of people; and

Whereas Switzerland, and the beautiful and historic city of Geneva, ever mindful of their tradition and vocation in the search for international peace, have once again offered their territory and facilities for a major international meeting, on this occasion between the leaders of the United States and the Soviet Union, on November 19-20, 1985: Now, therefore, be it

Resolved by the Senate and the House of Representatives of the United States of America in Congress assembled, That it is the sense of the Congress that, in recognition of their many contributions and as an expression of the warm gratitude of the American people for the strong bonds of friendship which have long existed between our two great democracies, the people and nation of Switzerland are to be commended for all they have done throughout this century in the search for freedom, international peace, and understanding.

ASKING THE PRESIDENT TO BRING THE RIGHTS OF THE POLISH PEOPLE TO THE ATTENTION OF THE SOVIET GOVERNMENT

The Senate proceeded to consider concurrent resolution (S. Con. Res. 76) asking that the President bring the

rights of the Polish people to the attention of the Soviet Government.

Mr. HART. Mr. President, just a few days ago Poland's military regime held a one-party election that excluded all opposition. That symbol of continued agression makes this a most fitting time for the U.S. Senate to declare its solidarity with the Polish people in their struggle for human rights.

The Solidarity movement and the Polish free underground is today declaring, in the words of the national anthem, "As long as we are alive. Poland is not yet lost." Poland lives on despite a military machine that fulfills the will of Moscow. It lives on despite a secret police that murders priests in cold blood. Poland lives on in the men and women of the Polish working class, the intellectuals, and the clergy who are not afraid to confront dictatorship with the dignity of a free people.

We in the U.S. Senate are privileged to stand in support of these people as they struggle peacefully to change a regime which does not represent their national aspirations for freedom. In support of this democratic struggle which has inspired the whole world, I urge my colleagues to vote in favor of this resolution.

The concurrent resolution (S. Con. Res. 76) was agreed to.

The preamble was agreed to.

The concurrent resolution, and the preamble, are as follows:

S. CON. RES. 76

Whereas the successive governments of the Polish People's Republic have continued their repression of the natural rights of the people of that country, and have done so largely because the police and military powers of the Soviet Union require it;

Whereas the Polish regime, notwithstanding the pledges it made by signing the Helsinki accords of 1975, has done little for "the promotion of human rights", but has instead harassed and arrested citizens whose offense was to make attempts to monitor the Government's fulfillment of its international obligations under the accords;

Whereas few, if any, of the scores of formal agreements the Government signed with the Solidarity Free Trade Union have been honored; and this union which Government spokesmen in February 1981 called a permanent part of the Government structure has been declared illegal; and every kind of legal and illegal pressure is being applied to workers to join state unions organized by the Communist government;

Whereas some fifteen political and religious activists have died in police custody or under suspicious circumstances since the end of martial law, while many others have been beaten or tortured, and some who were freed in much publicized amnesties have since been reinterned; and

Whereas the Government of Poland has adapted new legal measures that make Polish civil law increasingly difficult to distinguish from martial law, including new police rights to search without a warrant, and the empowerment of courts to arrest, convict, sentence, and jail anyone for political or other crimes all within a forty-eight-hour period and without a trial; Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring), That it is the sense of this Congress that the President of the United States should raise with Soviet authorities at the highest level the matter of the continuing and thorough suppression of independent speech and peaceful political activity in Poland, and that by so doing the President raises and defends the principles of human rights as embodied in the Helsinki accords.

SUPPORTING THE INTENT OF THE PRESIDENT TO DISCUSS WITH LEADERS OF THE SOVIET UNION AMERICAN CONCERNS WITH THE SOVIET PRESENCE IN AFGHANISTAN

The Senate proceeded to consider the resolution (S. Res. 237) supporting the intent of the President to discuss with leaders of the Soviet Union American concerns with the Soviet presence in Afghanistan, and for other purposes.

Mr. HUMPHREY. Mr. President, in 2 months the Soviet Union will mark the sixth anniversary of the brutal invasion of Afghanistan. The Soviets have been engaged in the struggle for Afghanistan longer than they fought during the Second World War. The past 6 years have been calamitous for the innocent people of Afghanistan who have been subjected to Nazi-like atrocities perpetrated by 115,000 Soviet troops that are now occupying their country. Over 1 million Afghans have died as a direct result of the Soviet invasion, and almost one-third of the prewar population has fled Afghanistan. The most defenseless element of the Afghan society—children—have not been spared the Soviet barbarities. Thousands of children have been kidnaped from their parents and shipped to Soviet indoctrination camps where they are taught to fight on behalf of the Soviets. Children who escape such a fate, face being maimed or killed by toy butterfly bombs, murdered by Soviet incursions in villages, or a childhood in Pakistani refugee camps.

Despite international condemnations for their murderous policies in Afghanistan, the Soviets have pursued a business as usual approach. The frightening and disturbing reality however is that this has gone largely unnoticed by the vast majority of the world. This is no accident. The Soviet Union has succeeded in bringing down a dark curtain which masks their barbarities from the rest of the world. Consequently, they have escaped the various pressures, both diplomatic and political, which otherwise may have convinced them that a policy of genocide, perpetrated against a defenseless people, is not in their interest.

Last week, several hundred people, many of them Holocaust survivors, gathered here in Washington for the groundbreaking of the U.S. Holocaust Memorial Museum. Holocaust survivor Elie Wiesel addressed that gathering and urged that we all use the museum to learn what "human beings can do to other people" for if we forget, "despair is inevitable." This year, 40 years after the liberation of Auschwitz, we are confronted with a nation which is perpetrating policies similar to those of the Nazis. As a nation, we must decide if we will ignore the massive human rights violations, or if we will spread the Afghan story—so the world can make its own judgement on Soviet ambitions and tactics in Afghanistan. Mr. President, the Soviet Union has employed every tactic possible to conceal this story from the rest of the world. Soviet Ambassador to Pakistan Vitaly Smirnov has gone so far as to warn journalists: "Stop trying to penetrate Afghanistan with the so-called Mujahedin. From now on, the bandits and the so-called journalists—French, American, British and others—accompanying them will be killed." The barbarous murder of Arizona Republic Journalist Charles Thornton underscores how far the Soviets will go to keep the world from knowing the truth in Afghanistan.

Mr. President, American and Soviet leaders have met at many critical times in the past 40 years. However, an American President has never met with a Soviet leader while the Soviets were occupying and destroying the population of a foreign country on a scale similar to that in Afghanistan. We know too well the history of Soviet expansionism since the conclusion of the Second World War. However, in Afghanistan the Soviet Union is engaged in more than the subjugation of a foreign nation, they are engaged in the physical annihilation of a nation.

Mr. President, this country has always maintained that we favored and would only accept, a negotiated settlement to the conflict in Afghanistan that was agreeable to all interested parties and that fulfilled the four points as laid out in the annual United Nations resolutions on Afghanistan. These conditions are first, the complete withdrawal of all foreign troops, second, the restoration of the independent and nonaligned status of Afghanistan, third, the return of the refugees in safety and honor and, fourth, the right to self-determination for the Afghan people.

It is inconceivable that the United States would expect an agreement that did not take into consideration the needs and views of the resistance to effectively bring about true peace and self-determination for the Afghan people. Given repeated statements by the administration supporting democratic resistance movements around the world, and reemphasized by President Reagan's speech to the General

Assembly that "until such time as these negotiations result in definitive progress, America's support for struggling democratic resistance forces must not and shall not cease," how could the United States guarantee any agreement that was not the product of negotiations between all interested parties including the Afghan resistance. Only in this way will a negotiated settlement truly give that Afghans what they have demanded and what the United States has always maintained is their right, to determine their own destiny free from outside interference and coercion.

This resolution should send a clear message to the President and to the people of Afghanistan that the U.S. Senate unanimously supports a strict adherence to the four points endorsed by U.N. Resolutions 35/37, 36/34, 37/37, 38/29 and 39/13. Only by insuring that all the parties to the conflict, including the resistance, are included in any agreeable settlement, will this brutal conflict be brought to an end. No other agreement is workable. No other agreement serves the interests of the Afghans. And no other agreement is in the best interests of the American people.

The Senate resolution (S. Res. 237) was agreed to.

The preamble was agreed to.

The resolution, and the preamble, as as follows:

S. RES. 237

Whereas military forces of the Union of Soviet Socialist Republics invaded Afghanistan in December 1979;

Whereas there are at present more than 115,000 Soviet troops engaged in the systematic destruction of Afghanistan through a scorched earth policy which includes the destruction of crops, water and food supplies, the agricultural infrastructure, and villages, and includes the widespread killing of innocent civilians;

Whereas Soviet tactics in Afghanistan have directly caused the following: a refugee population in Iran and Pakistan of more than three million, the largest refugee population in the world; hundreds of thousands of war-related casualties; deprivation and suffering for most Afghan citizens; and the possibility of large-scale famine;

Whereas Soviet troops and their Afghan proxies have employed the use of chemical weapons against innocent Afghans;

Whereas the human rights abuses perpetrated by Soviet troops against the Afghan population, including women, children, and the elderly, have been thoroughly documented by the report from Helsinki Watch entitled "Tears, Blood and Cries" and by the report on the situation of human rights in Afghanistan prepared for the Economic and Social Council of the United Nations;

Whereas both the United States and the United Nations have repeatedly called for a peaceful, negotiated settlement of the conflict, including the immediate withdrawal of all foreign troops from Afghanistan; and

Whereas no President of the United States has met directly with the head of the Soviet Union since the invasion of Afghanistan in December 1979: Now, therefore, be it

Resolved, That the Senate, in an effort to bring about an end to the massive human rights abuses and murderous policies which the Soviet Union is perpetrating against the population of Afghanistan—

(1) strongly supports President Reagan's intent to discuss directly with Soviet leaders American concerns with the Soviet presence in Afghanistan; and

(2) calls upon the President to reiterate the desire of the United States to achieve a negotiated political settlement agreeable to all interested parties in Afghanistan, which settlement should include—

(A) the complete withdrawal of all foreign troops;

(B) the restoration of the independent and nonaligned status of Afghanistan;

(C) self-determination for the Afghan people; and

(D) the return of Afghan refugees with safety and honor.

SEC. 2. The Secretary of the Senate shall transmit a copy of this resolution to the President.

NATIONAL PHILANTHROPY DAY

The Senate proceeded to consider the joint resolution (S.J. Res. 207) to designate November 1, 1985, as "National Philanthropy Day."

Mr. WILSON. Mr. President, I rise today in support of Senate Joint Resolution 207, a resolution that I introduced on September 26, 1985, that would honor one of America's greatest resources—the American philanthropic community. This resolution would designate November 1, 1985 as National Philanthropy Day. It is endorsed by this Nation's philanthropic community and will serve as a way for America to rally behind and express its appreciation for its philanthropies.

America's philanthropic community consists of some 800,000 organizations and million employees and volunteers. These organizations are supported by private gifts that, since 1981, have exceeded $70 billion per year from more than 30 million Americans. This community includes our churches and synagogues, hospitals and research centers, colleges and universities, Boy Scouts and Brownies, little league and YMCA, and the myriad of associations that care and protect the elderly and the young, the poor and the hungry, and the abused and the neglected.

The private sector involvement in philanthropy represents the most positive approach to tackling social programs. Without such support, the Government would be compelled to increase direct aid to help feed, clothe, house, and care for the needy in America and throughout the world. Medicine, education, and the arts are also among the vital institutions which depend on philanthropic support.

Philanthropic organizations are devoted to not only improving the lives of all Americans, but also to enhancing the quality of life for people throughout the world. American philanthropic organizations are the backstop of our society. When an individual has nowhere left to turn, there is always a philanthropic organization there to lend assistance. Whether you recognize it or not, these organizations have touched all of us.

It has been said that "the resources of our civilization are never exhausted." I hope that all Americans will not only join in with Congress in this tribute, but also look into their hearts to see what they can do to improve the lives of others.

I am pleased that so many of my colleagues have chosen to cosponsor Senate Joint Resolution 207. These cosponsors are Senators BOSCHWITZ, BRADLEY, BUMPERS, BURDICK, CRANSTON, DECONCINI, DOLE, DOMENICI, EVANS, EXON, GOLDWATER, HATCH, HAWKINS, KASSEBAUM, LAUTENBERG, LAXALT, LEVIN, MATSUNAGA, NUNN, PELL, PRYOR, RIEGLE, ROCKEFELLER, SIMON, STENNIS, THURMOND, WEICKER, and ZORINSKY.

I hope all of my colleagues will join me in honoring this Nation's philanthropies, and those individuals that participate in, and contribute to, philanthropic endeavors, by supporting this legislation. Certainly, this honor is well deserved and long overdue.

The joint resolution (S.J. Res. 207) ordered to be engrossed for a third reading, read the third time and passed.

The preamble was agreed to.

The joint resolution, and the preamble, are as follows:

S.J. RES. 207

Whereas there are more than eight hundred thousand nonprofit philanthropic organizations in the United States, employing more than ten million individuals, including approximately four million five hundred thousand volunteers;

Whereas contributions by people of the United States to support such organizations amounted to approximately $70,000,000,000 in 1984;

Whereas philanthropic organizations are largely responsible for enhancing the quality of life for Americans and other people throughout the world;

Whereas our Nation owes a great debt to the schools, churches, museums, art and music centers, youth groups, hospitals, research institutions, and other institutions and organizations which aid and comfort the elderly, the disadvantaged, and the sick; and

Whereas the people of the United States should demonstrate their gratitude and support for philanthropic organizations and the efforts, skills, and resources of individuals who carry out their missions: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That November 1, 1985, is designated as "National Philanthropy Day", and the President is authorized and requested to issue a proclamation calling upon the people of the United States to observe such day with appropriate ceremonies and activities.

CENTENNIAL OBSERVANCE OF THE UNIVERSITY OF ARIZONA

The resolution (S. Res. 96) relating to the centennial observance of the University of Arizona, was considered, and agreed to.

The preamble was agreed to.

The resolution, and the preamble, are as follows:

S. RES. 96

Whereas the Arizona Territory's thirteenth legislature established the University of Arizona at Tucson in 1885;

Whereas the early accomplishments of the University of Arizona in mining and agriculture led the development of the Arizona Territory;

Whereas the University of Arizona has made valuable contributions to the national defense;

Whereas the University of Arizona has continued and improved its excellent service to the people of Arizona;

Whereas the University of Arizona has grown to be one of the major academic and research universities in the world, upholding the highest standards of academic excellence, and achieving leadership in every field of research; and

Whereas the University of Arizona is prepared to apply the pride and knowledge of its first century to challenges of the second: Now, therefore, be it

Resolved, That the United States Senate hereby recognizes the achievements of the University of Arizona in honor of its centennial observance.

BENIGN ESSENTIAL BLEPHAROSPASM AWARENESS WEEK

The joint resolution (H.J. Res. 308) designating the week beginning on October 20, 1985, as "Benign Essential Blepharospasm Awareness Week," was considered, ordered to a third reading, read the third time, and passed.

The preamble was agreed to.

NATIONAL SUDDEN INFANT DEATH SYNDROME AWARENESS MONTH

The Senate proceeded to consider the joint resolution (H.J. Res. 322) to provide for the designation of October 1985 as "National Sudden Infant Death Syndrome Awareness Month."

Mr. DURENBERGER. Mr. President, I would like to thank my distinguished colleagues, Senators ZORINSKY, BURDICK, HOLLINGS, KASSEBAUM, BOSCHWITZ, DOLE, PROXMIRE, ABDNOR, MATHIAS, WEICKER, FORD, MCCLURE, LEAHY, CHAFEE, CRANSTON, PACKWOOD, DANFORTH, HEINZ, BAUCUS, LEVIN, MURKOWSKI, METZENBAUM, BYRD, LUGAR, and SARBANES, for lending their support to this most important issue.

Mr. President, each year more than 7,000 American infants succumb to sudden infant death syndrome. Normal and healthy infants between the ages of 1 week and 1 year are stricken by SIDS without any regard to social class, ethnic group, economic stratum, or region of the country.

Most infants die unobserved during a normal sleep period without warning and without prior medical indicators. Mr. President, sudden infant death syndrome has become known as the leading cause of post-neo-natal death in the United States. A SIDS death or crib death often causes unique and particularly traumatic problems for the families of victims. Because SIDS is neither well known nor understood among the general public, families of SIDS victims often survive the initial shock of the death of their child, only to find themselves suspected of child abuse or neglect. Even when an autopsy results in a formal finding of SIDS as the cause of death, the veil of suspicion can result in an additional burden of guilt to the lives of these families.

The death of any child is a terrible tragedy which can totally disrupt the lives of parents and siblings. Greater public awareness and understanding would be invaluable in helping the parents of victims avoid the added mental anguish of guilt and despair.

Indeed, my own experience with SID has had a profound effect on my commitment to eliminating this pernicious killer. It was less than 3 years ago when I received a phone call about 5 o'clock in the morning from one of my legislative assistants who said only, "Something terrible has happened, our baby is dead." SIDS is an issue we struggle to understand and resolve, and certainly an issue which needs our support and resources.

Mr. President, I call attention to the fact that in 1974, Congress passed legislation to provide for counseling projects and medical protocols in SIDS cases. Our commitment to SIDS has strengthened during the 11 years since this legislation was passed. There continues to be however, a clear need for greater awareness of Sudden Infant Death Syndrome.

The National Institute of Child Health and Human Development [NICHD] has the primary Federal responsibility for SIDS research. Due to the suspected implication of the nervous system as well as the circulatory and respiratory systems as the cause of death, the National Institute of Neurological and Communicative Disorders and Stroke, and the National Heart, Lung and, Blood Institute have pooled their resources with NICHD in order to find the cause of SIDS.

Although there are no specific line-item appropriations or authorizations for SIDS—funding for 1984 was $18,603,000; is estimated $21,217,000 in 1985; and it is estimated that funding may exceed $20,116,000 for 1986. Although significant progress has been made over the last few years, still more research needs to be conducted in order to discover ways to prevent losses due to sudden infant death.

Mr. President, it is important to recognize the unselfish contributions made by thousands of individuals who have devoted their own personal resources to the discovery of infants at risk. Mr. President, I am proud to bring to the attention of my colleagues and the American public a SIDS conference which brought doctors, researchers and parents from around the country to Baylor University Medical Center, Dallas, TX, on October 9, 1985.

The conference was sponsored by the Dallas/Fort Worth area SIDS chapters and the north Texas SIDS Information and Counseling Project. The conference is made possible through a grant in aid from the Meed Johnson nutrition division.

Dr. Ralph Franciosi, medical director of Minnesota SIDS Center and chief of pediatric pathology at Children's Medical Center in Minneapolis, MN, was the main speaker at this conference. For the 10 years I have known Dr. Franciosi, he has dedicated his life to the study of SIDS and to generating greater public education and community resources.

A great deal has been accomplished by the willingness of volunteers who cared the most about this issue. It is imperative that we continue to broaden public knowledge and recommit national resources to the development of technology needed to eradicate SIDS in our lifetime.

The joint resolution (H.J. Res. 322) was ordered to a third reading, read the third time, and passed.

The preamble was agreed to.

Mr. SIMPSON. Mr. President, I move to reconsider the vote by which the resolutions and joint resolutions were agreed to or passed.

Mr. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

FLEXIBLE AND COMPRESSIVE WORK SCHEDULES FOR FEDERAL EMPLOYEES

Mr. SIMPSON. Mr. President, after inquiring of the Democratic leader, I ask unanimous consent that the Senate now turn to calendar item No. 367, H.R. 3605, a bill to extend flexitime through December 31, 1985.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

A bill (H.R. 3605) to provide that the authority to establish and administer flexible and compressive work schedules for Federal Government employees be extended through December 31, 1985.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the bill?

There being no objection, the bill (H.R. 3605) was considered, ordered to

a third reading, read the third time, and passed.

ROUTINE MORNING BUSINESS

Mr. SIMPSON. Mr. President, I ask unanimous consent that there now be a period for the transaction of routine morning business.

The PRESIDING OFFICER. Without objection, it is so ordered.

TELEVISION AND RADIO COVERAGE OF SENATE PROCEEDINGS

Mr. BYRD. Mr. President, I submit a resolution to provide television and radio coverage of Senate debates. I ask unanimous consent that the resolution be printed in the RECORD and, of course, that it be referred to the appropriate committees.

The PRESIDING OFFICER. Without objection, it is so ordered.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

S. RES. 245

Resolved, That (a) the Senate hereby authorizes and directs that there be both television and radio broadcast coverage (together with videotape and audio recordings) of proceedings in the Senate Chamber.

(b) Such broadcast coverage shall be—

(1) provided in accordance with provisions of this resolution;

(2) provided continuously except for any time when a meeting with closed doors is ordered; and

(3) provided that during any television and/or radio broadcasts, time shall be divided and controlled in such way as to assure equal time to both the Majority and Minority Parties; and

(4) provided subject to the provisions pertaining to the Senate gallery contained in the following Standing Rules of the Senate: rule XIX, paragraphs 6 and 7; rule XXV, paragraph 1(n); and rule XXXIII, paragraph 2; and

(5) provided that the Senate shall be in session on Mondays, Tuesdays, and Thursdays, with committee meetings scheduled on days and/or times the Senate is not to be in session.

SEC. 2. The radio and television broadcast of Senate proceedings shall be—

(a) supervised and operated by the Senate, and

(b) made available on a "live" basis and free of charge to (1) any accredited member of the Senate Radio and Television Correspondents Gallery, (2) the coaxial cable system of the Architect of the Capitol, and (3) such other news gathering, educational, or information distributing entity as may be authorized by the Committee on Rules and Administration to receive such broadcasts.

SEC. 3. The television broadcast of Senate proceedings shall follow the Presiding Officer and Senators who are recognized to speak by the Presiding Officer (including Senators who are so recognized with the consent of another Senator to interrupt such other Senator).

SEC. 4. (a) The broadcast coverage by radio and television of the proceedings of the Senate shall be implemented as provided in this section.

(b) The Architect of the Capitol, in consultation with the Sergeant at Arms and Doorkeeper of the Senate, shall—

(1) construct necessary broadcasting facilities for both radio and television (including a control room and the modification of Senate sound and lighting fixtures);

(2) employ necessary expert consultants; and

(3) acquire and install all necessary equipment and facilities to (A) produce a broadcast-quality "live" audio and color video signal of such proceedings, and (B) provide an archive-quality audio and color video tape recording of such proceedings:

Provided, That the Architect of the Capitol, in carrying out the duties specified in clauses (1) through (3) of this subsection, shall not enter into any contract for the purchase or installation of equipment, for the employment of any consultant, or for the provision of training to any person, unless the same shall first have been approved by the Committee on Rules and Administration.

(c) The Sergeant at Arms and Doorkeeper of the Senate shall (1) employ such staff as may be necessary, working in conjunction with the Senate Recording and Photographic Studios, to operate and maintain all broadcast audio and color video equipment installed pursuant to this resolution, (2) make audio and video tape recordings of Senate proceedings, (3) make copies of such recordings available, upon payment to him of a fee fixed therefor by the Committee on Rules and Administration, to Members of the Senate and to each person described in subsection (b) (1) and (3) of section 2 of this resolution, and (4) retain for ninety days after the day any Senate proceedings took place, such recordings thereof, and as soon thereafter as possible, transmit to the Librarian of Congress and to the Archivist of the United States copies of such recordings: *Provided*, That the Sergeant at Arms and Doorkeeper of the Senate, in carrying out the duties specified in clauses (1) and (2) of this subsection, shall comply with appropriate Senate procurement and other regulations.

(d) The Librarian of Congress and the Archivist of the United States shall each receive, store, and make available to the public, at no cost for viewing or listening on the premises where stored and upon payment of a fee equal to the cost involved through distribution of taped copies, recordings of Senate proceedings transmitted to them by the Sergeant at Arms and Doorkeeper of the Senate.

SEC. 5. (a) As soon as practicable after the necessary equipment has been installed, there shall begin a test period during which tests of radio and television coverage of Senate proceedings shall be conducted by the staffs of the Committee on Rules and Administration and of the Office of the Sergeant at Arms and Doorkeeper of the Senate. Such test period shall end on such date as may be agreed upon by the majority leader, the minority leader, the chairman of the Committee on Rules and Administration, and the ranking minority member of such committee.

(b) During such test period—

(1) final procedures for camera direction control shall be established;

(2) coverage of Senate proceedings shall not be transmitted to any outside source, and

(3) recordings of Senate proceedings shall be made and retained by the Sergeant at Arms and Doorkeeper of the Senate.

SEC. 6. The use of tape duplications of broadcast coverage of the proceedings of the Senate for political or commercial purposes is strictly prohibited; and any such tape duplication furnished to any person shall be made on the condition that it not be used for political or commercial purposes.

SEC. 7. Any changes in the regulations made by this resolution shall be made only by Senate resolution. However, the Committee on Rules and Administration may adopt such procedures and such regulations, which do not contravene the regulations made by this resolution, as it deems necessary to assure the proper implementation of the purposes of this resolution.

SEC. 8. Such funds as may be ncecessary (but not in excess of $2,500,000) to carry out this resolution shall be expended from the contingent fund of the Senate.

SEC. 9. Rule XXVI, paragraph 7. (a)(1), is amended to read as follows:

"7. (a)(1) Except as provided in this paragraph, each committee, and each subcommittee thereof is authorized to fix the number of its members (but not less than one-third of its entire membership) who shall constitute a quorum thereof for the transaction of such business as may be considered by said committee, except that no measure or matter or recommendation shall be reported from any committee unless a majority of the committee are physically present, and no report or legislative or executive measure or matter from a committee shall be accepted at the desk except on the representation of the committee chairman that it was not reported by polling."

SEC. 10. Rule XXX, paragraph 1(b), is amended to read as follows:

"(b) When a treaty is reported from a committee with or without amendment, it shall, unless the Senate unanimously otherwise direct, lie over one day for consideration; after which it may be read a second time, after which amendments may be proposed. At any stage of such proceedings the Senate may remove the injunction of secrecy from the treaty."

SEC. 11. Rule XII, paragraph 1, is amended by striking the first clause thereof and inserting in lieu thereof the following:

"Except as provided in subparagraph 5 of this rule, when the yeas and nays are ordered,".

SEC. 12. Rule XII is amended by adding at the end thereof the following new paragraphs:

"5. Whenever the Majority Leader, with concurrence of the Minority Leader, shall determine, the names of Senators voting upon any roll call shall be recorded by electronic device. Senators shall have not more than fifteen minutes from the beginning of the roll call to have their vote recorded.

"6. The Majority Leader, with concurrence of the Minority Leader, may announce that any recorded vote that is scheduled to or does occur immediately after another recorded vote shall be no longer than five minutes in duration.".

SEC. 13. Paragraph 4 of rule XVI of the Standing Rules of the Senate is amended—

(1) by inserting "(a)" after "4"; and

(2) by adding at the end of such paragraph the following new subparagraph:

"(b) If a point of order is made by any Senator against an amendment to a general appropriations bill on the ground that such amendment proposes general legislation or proposes a limitation or restriction not authorized by law and is to take effect or cease to be effective upon the happening of a con-

tingency, it shall not be in order to raise the defense of germaneness unless there is House legislative language on that subject contained in the bill."

SEC. 14. Rule XVII, par. 5, of the Standing Rules of the Senate is amended to read as follows:

"5. Any measure or matter reported by any standing committee shall not be considered in the Senate unless the report of that committee upon that measure or matter has been available to Members for at least two calendar days (excluding Sundays and legal holidays) prior to the consideration of that measure or matter. If hearings have been held on any such measure or matter so reported, the committee reporting the measure or matter shall make every reasonable effort to have such hearings printed and available for distribution to the Members of the Senate prior to the consideration of such measure or matter in the Senate. This paragraph—

(1) may be waived by joint agreement of the Majority Leader and the Minority Leader of the Senate; and

(2) shall not apply to—

(A) any measure for the declaration of war, or the declaration of a national emergency, by the Congress, and

(B) any executive decision, determination, or action which would become, or continue to be, effective unless disapproved or otherwise invalidated by one or both Houses of Congress."

SEC. 15. Rule XV of the Standing Rules of the Senate is amended—

(1) by inserting after "Motions" in the caption a semicolon and the following: "GERMANENESS";

(2) by adding at the end thereof the following new paragraph:

"6. (a) At any time during the consideration of a bill or resolution, it shall twice be in order during a calendar day to move that no amendment, other than the reported committee amendments, which is not germane or relevant to the subject matter of the bill or resolution, or to the subject matter of an amendment proposed by the committee which reported the bill or resolution, shall thereafter be in order. The motion shall be privileged and shall be decided after one hour of debate, without intervening action to be equally divided and controlled by the Majority Leader and the Minority Leader or their designees.

"(b) If a motion made under subparagraph (a) is agreed to by an affirmative vote of three-fifths of the Senators present and voting, then any floor amendment not already agreed to (except amendments proposed by the Committee which reported the bill or resolution) which is not germane or relevant to the subject matter of the bill or resolution, or the subject matter of an amendment proposed by the committee which reported the bill or resolution, shall not be in order.

"(c) When a motion made under subparagraph (a) has been agreed to as provided in subparagraph (b) with respect to a bill or resolution, points of order with respect to questions of germaneness or relevancy of amendments shall be decided without debate, except that the Presiding Officer may entertain debate for his own guidance prior to ruling on the point of order. Appeals from the decision of the Presiding Officer on such points of order shall be decided without debate.

"(d) Whenever an appeal is taken from a decision of the Presiding Officer on the question of germaneness of an amendment, or whenever the Presiding Officer submits the question of germaneness or relevancy of an amendment to the Senate, the vote necessary to overturn the decision of the Presiding Officer or hold the amendment germane or relevant shall be two-thirds of the Senators present and voting. No amendment proposing sense of the Senate or sense of the Congress language that does not directly relate to the measure or matter before the Senate shall be considered germane."

SEC. 16. Paragraph 2 of Rule XXII of the Standing Rules of the Senate is amended to read as follows:

"2. Notwithstanding the provisions of Rule II or Rule IV or any other rule of the Senate, at any time a motion signed by sixteen Senators, to bring to a close the debate upon any measure, motion, other matter pending before the Senate, or the unfinished business, is presented to the Senate, the Presiding Officer, or clerk at the direction of the Presiding Officer, shall at once state the motion to the Senate, and one hour after the Senate meets on the following calendar day but two, he shall lay the motion before the Senate and direct that the clerk call the roll, and upon the ascertainment that a quorum is present, the Presiding Officer shall, without debate, submit to the Senate by a yea-and-nay vote the question:

"Is it the sense of the Senate that the debate shall be brought to a close?"

"And if that question shall be decided in the affirmative by two-thirds of the Senators present and voting—except on a measure or motion to amend the Senate rules, in which case the necessary affirmative vote shall be two-thirds of the Senators duly chosen and sworn—then said measure, motion, or other matter pending before the Senate, or the unfinished business, shall be the unfinished business to the exclusion of all other business until disposed of.

"Except by unanimous consent, no amendment shall be proposed after the vote to bring the debate to a close, unless it had been submitted in writing to the Journal Clerk by 1 o'clock p.m. on the day following the filing of the cloture motion if a complete substitute, and by 1 o'clock p.m. two days following the filing of the cloture motion if an amendment in the first degree, or beginning of the cloture vote if an amendment in the second degree. No dilatory motion, or dilatory amendment, or amendment not germane shall be in order. Points of order, including questions of relevancy, and appeals from the decision of the Presiding Officer, shall be decided without debate. Whenever an appeal is taken under this rule from a decision of the Presiding Officer on the question of germaneness of an amendment, the vote necessary to overturn the decision of the Presiding Officer shall be two-thirds of the Senators, present and voting.

"After no more than twenty hours of consideration of the measure, motion, or other matter on which cloture has been invoked, the time to be equally divided and controlled by the Majority and Minority Leaders or their designees, the Senate shall proceed, without any further debate on any question, to vote on the final disposition thereof to the exclusion of all amendments not then actually pending before the Senate at that time and to the exclusion of all motions, except a motion to table, or to reconsider and one quorum call on demand to establish the presence of a quorum (and motions required to establish a quorum) immediately before the final vote begins.

"If, for any reason, a measure or matter is reprinted after cloture has been invoked, amendments which were in order prior to the reprinting of the measure or matter will continue to be in order and may be conformed and reprinted at the request of the amendment's sponsor. The conforming changes must be limited to lineation and pagination.

"No Senator shall call up more than two amendments until every other Senator shall have had the opportunity to do likewise.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Saunders, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Presiding Officer laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC-1918. A communication from the chairman of the Federal Home Loan Bank Board transmitting, pursuant to law, a report on a 1982 violation of the Antideficiency Act; to the Committee on Appropriations.

EC-1919. A communication from the Administrator of the National Aeronautics and Space Administration transmitting, pursuant to law, a report on the determination to reprogram certain appropriated funds for certain project modifications; to the Committee on Commerce, Science, and Transportation.

EC-1920. A communication from the Director of the Office of Management and Budget transmitting, pursuant to law, a Soil Conservation Service Plan for the English Coulee Watershed, North Dakota; to the Committee on Environment and Public Works.

EC-1921. A communication from the President of the United States transmitting, pursuant to law, notice of his intention to remove Portugal from the list of beneficiary developing countries under the GSP Program; to the Committee on Finance.

EC-1922. A communication from the general counsel of the Department of the Treasury transmitting a draft of proposed legislation to establish an orderly system for payment of Treasury checks, issuance of replacements, and for other purposes; to the Committee on Finance.

EC-1923. A communication from the Assistant Secretary of State transmitting, pursuant to law, a report on the Emigration and Human Rights Policies of the Govern-

ment of Haiti; to the Committee on Foreign Relations.

EC-1924. A communication from the special counsel of the U.S. Merit Systems Protection Board transmitting, pursuant to law, a report on allegations of violations of law and abuse of authority in the misuse of a government-owned vehicle; to the Committee on Governmental Affairs.

EC-1925. A communication from the chairman of the D.C. Council transmitting, pursuant to law, a copy of DC Act 6-89; to the Committee on Governmental Affairs.

EC-1926. A communication from the special counsel of the U.S. Merit Systems Protection Board transmitting, pursuant to law, a report on allegations of an abuse of authority by the Police Chief, James A. Haley, Veterans' Hospital, Tampa, FL; to the Committee on Governmental Affairs.

EC-1927. A communication from the chairman of the D.C. Council, transmitting, pursuant to law, a copy of DC Act 6-97; to the Committee on Governmental Affairs.

EC-1928. A communication from the chairman of the D.C. Council transmitting, pursuant to law, a copy of DC Act 6-94; to the Committee on Governmental Affairs.

EC-1929. A communication from the chairman of the D.C. Council transmitting, pursuant to law, a copy of DC Act 6-96; to the Committee on Governmental Affairs.

EC-1930. A communication from the chairman of the D.C. Council transmitting, pursuant to law, a copy of DC Act 6-95; to the Committee on Governmental Affairs.

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. ROTH, from the Committee on Governmental Affairs:

Julius W. Becton, Jr., of Virginia, to be Director of the Federal Emergency Management Agency;

James P. McNeill, of Maryland, to be an Associate Director of the Federal Emergency Management Agency; and

William R. Barton, of Virginia, to be inspector general, General Services Administration.

(The above nominations were reported from the Committee on Governmental Affairs with the recommendation that they be confirmed, subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

By Mr. HATCH, from the Committee on Labor and Human Resources:

Francis S.M. Hodsoll, of Virginia, to be chairman of the National Endowment for the Arts for a term of 4 years.

(The above nominations were reported from the Committee on Labor and Human Resources with the recommendation that it be confirmed, subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. BAUCUS:

S. 1790. A bill to amend the Farm Credit Act of 1971 to improve the long-term stability and assure the private control of the banking entities of the Farm Credit System; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. GARN (by request):

S. 1791. A bill to authorize the Secretary of the Treasury to adopt distinctive counterfeit deterrents for exclusive use in the manufacture of U.S. securities and obligations and to clarify existing authority to combat counterfeiting; to the Committee on Banking, Housing, and Urban Affairs.

By Mr. MELCHER:

S. 1792. A bill to amend the Animal Welfare Act to ensure the proper treatment of laboratory animals; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. KENNEDY (for himself and Mr. HATCH):

S. 1793. A bill to amend the Public Health Service Act to establish a grant program to develop improved systems of caring for medical technology dependent children in the home, and for other purposes.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. BYRD:

S. Res. 245. Resolution to improve Senate procedures; to the Committee on Rules and Administration.

By Mr. D'AMATO (for himself, Mr. DODD, and Mrs. HAWKINS):

S. Con. Res. 83. Concurrent resolution expressing the sense of the Congress that Federal tax reform legislation not take effect until its date of enactment, but in no case earlier than July 1, 1986; to the Committee on Finance.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. BAUCUS:

S. 1790. A bill to amend the Farm Credit Act of 1971 to improve the long-term stability and assure the private control of the banking entities of the Farm Credit System; to the Committee on Agriculture, Nutrition, and Forestry.

FARM CREDIT SOUNDNESS, STABILITY, AND PRIVATE OWNERSHIP RESTORATION ACT

Mr. BAUCUS. Mr. President, Wednesday we learned that the 37 banks of the Farm Credit System lost $522.5 million in the third quarter of this year—and that doesn't count the hundreds of PCA's.

The Farm Credit System holds one-third of total farm debt, making it the single largest lender to farmers. Its problems are in part a reflection of the problems facing farmers and ranchers in a time of falling farm income and falling land values.

Sometime soon we in the Congress will take steps to respond to the agricultural debt crisis in this country. The Farm Credit System will come to us seeking Federal financial assistance—perhaps as much as $10 billion in a line of credit.

I believe that Congress should provide the necessary emergency assistance. However, immediate short-term problems should not blind us to the need for long-term structural reform. We owe our farmers a sound, stable, and well-run Farm Credit System. Structural reforms will be necessary to assure the long-term viability of that system.

Steps must be taken to restore the confidence of the system's borrowers and the confidence of capital markets. The legislation I am introducing today is designed to improve the Farm Credit System's ability to keep the confidence of its borrowers and to marshal its own resources. The legislation would also bring greater discipline and accountability to the system's lending practices. I believe it is best to take a comprehensive approach to these goals. This bill seeks to do that. It may not be perfect, but it can serve as a basis for discussion and action.

This proposal originated with borrower groups. Often overlooked in the growing debate over the Farm Credit System are the system's borrowers—who are also the stockholders in these lending cooperatives—the essential backbone of the system. If those farmers and ranchers still able to serve their loans are driven from the system—either by high interest rates or by a belief the system lacks commitment to serve their needs—no amount of Federal aid will keep the system viable. In a growing number of farm credit regions, there is rebellion at the grassroots. Many farmers and ranchers fear that recent Farm Credit System actions may signal future attempts to consolidate and centralize operations and control at the expense of local associations and local control. I believe that actions to diminish significantly local control would be shortsighted and ultimately self-defeating since they would drive good borrowers out of the system. Local control and responsible regulation are both necessary.

This bill contains a number of needed reforms. First, to restore the accountability of system banks to their stockholder-borrowers, the bill provides that each system bank shall have a board of directors elected by its borrowers.

Second, to facilitate that efficient movement of the system's own resources to its lending institutions most in need, the bill creates a central insurance fund with an initial capitalization drawn from present reserves of the system's lending institutions. The amount the system has available to address its own problems is not yet clear; the bill provides initial capitalization of the insurance fund at ap-

proximately $2.3 billion, with provision for additional assessments if necessary.

Third, to impose some needed discipline upon loan practices in the system, the bill directs all of the system's lending institutions to publish financial statements, employing generally accepted accounting principles, at least once a year.

Fourth, the bill sunsets the Farm Credit Administration and substitutes for it a true bank regulatory agency with the full panoply of cease and desist powers and other authorities enjoyed by the FDIC and similar Federal agencies.

Finally, as an additional tool to help keep defaulting farmers on the land, the bill provides lease-back authority to system primary lenders that foreclose upon a bank. I want to emphasize that this authority can only be exercised with the consent of the defaulting farmer, who would also be given a right of first refusal to repurchase the land if it is leased back to him.

I encourage my colleagues to study this proposal, to join me in discussing any improvements, and in seeking action as swiftly as possible to bring about these much needed reforms.

I ask unanimous consent that a summary of the contents of the bill and a more detailed section-by-section analysis be printed immediately following my remarks.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

SUMMARY

A. LOCAL LEVEL GOVERNANCE CHANGES

1. Give each of the 36 banks in the system its own five-member board of directors elected by the shareholders of that bank (leaving the Central Bank for Cooperatives unchanged).

2. Make the district farm credit boards advisory and reduce the number of directors to five: one from each of the three bank boards and two elected directly from the farmer-rancher borrowers.

3. Require use of generally accepted accounting principles (GAAP accounting) by the banks and associations in the system, require certified public accountant audits at least yearly, and require publication of the financial statements of each of the banks and associations.

4. Restore to the banks and associations management responsibility, by returning to them most of the "prior approval powers" now vested in the FCA.

B. REFORM AT THE NATIONAL REGULATORY LEVEL

5. Create a Federal Farm Credit Insurance Corporation ("FFCIC") with a three-member board appointed by the President with the advice and consent of the Senate, which would have

(a) cease and desist powers against unsafe and unsound agricultural banking practices,

(b) a fund created by an initial transfer of reserve assets from present system institutions to the FFCIC in exchange for non-voting shares (at an initial level of $2.25 billion, with further assessment rights if needed), and

(c) the responsibility to insure the 37 banks and the existing associations against illiquidity and against impairment of capital, through use of the fund, by means of loans, grants or guarantees to system banks and associations, but with ultimate responsibility to liquidate system institutions (as a Congressionally disfavored last resort) in order to avoid severe impairment of the FFCIC fund.

6. Eliminate non-banking activities from the Farm Credit System, leaving in place the 37 banks, the existing land bank associations and production credit associations and the Federal Farm Credit Banks Funding Corporation.

7. Statutorily prohibit forced merger of associations or banks (while retaining the right of associations voluntarily to propose mergers of like associations).

8. Make the Federal Farm Credit Board advisory, with its chairman to be appointed by the President.

9. Sunset the Farm Credit Administration (having (a) returned much of FCA's "prior approval" involvement in management to the banks and the associations, and (b) transferred to a new FDIC type regulatory/insurance agency FCA's residual regulatory power).

C. ADDED TOOLS TO HELP AGRICULTURE

10. *At the FFCIC level:* statutorily permit the FFCIC to lower the capital requirements for system institutions across the board to not less than ½ of 1 percent more than the capital requirements applicable to national banks.

11. *At the Local Bank and Association Level:* Grant authority to the primary lending institutions in the System, as an alternative to foreclosure, to take title to collateral and lease it back to the debtor, or other viable operator, with the value of the collateral to be includable in the statutory collateral requirement for the issuance of bonds, this function to be specially subject to regulation by the FFCIC which may charge differential premiums in connection with risks growing out of this function.

D. TRANSITION PROVISIONS

12. Provide appropriate transition provisions including (a) an effective date for sunset of FCA and creation of FFCIC ninety days after enactment, (b) continuation of FCA regulations for a temporary period of six months or until promulgation of interim or final FFCIC regulations, whichever is earlier, and (c) asset transfers to FFCIC from sunsetted entities.

SECTION-BY-SECTION ANALYSIS

The following is an explanation of each section of the Act.

TITLE I—ESTABLISHMENT OF THE FEDERAL FARM CREDIT INSURANCE CORPORATION AND SUNSET OF THE FARM CREDIT ADMINISTRATION

Section 101

This section amends section 1.2 of the present Farm Credit Act to redefine the Farm Credit System as consisting only of the Federal Land Banks, the Federal land bank associations, the Federal intermediate credit banks, the production credit associations, the banks for cooperatives, the Central Bank for Cooperatives, the Federal Farm Credit Insurance Corporation (created under this Act), and the Federal Farm Credit Banks Funding Corporation. This amended definition deletes the reference in current law to "other institutions . . . chartered by and subject to the supervision of the Farm Credit Administration." Together with other sections of this Act, this section eliminates the authority under which business non-essential, non-banking activities have been engaged in by the Farm Credit Administration.

Section 102

This section adds eight new sections to the present Farm Credit Act, creating a new regulatory agency for the Farm Credit System to be known as the Federal Farm Credit Insurance Corporation (FFCIC). This new agency is patterned after the present Federal Deposit Insurance Corporation (FDIC) with powers and responsibilities adapted to the special needs of the System and the agricultural community. This section also provides for the funding of the FFCIC, which will come exclusively from present Farm Credit System entities.

Subsection (a) adds new sections 5.40 through 5.42 to the present Act, which provide for the establishment of the FFCIC, its organization, and its general powers.

Section 5.40 creates the FFCIC.

Section 5.41 provides that the management of the FFCIC shall be vested in a Board of Directors consisting of three members, with staggered terms of six years, appointed by the President by and with the advice and consent of the Senate. The President shall also have the power to designate one of the three members as Chairman, who shall serve at the pleasure of the President. This new section of the Act also establishes certain qualifications for appointment to the Board and makes applicable to Board members the power of the President under current law to remove the Governor of the Farm Credit Administration at will during any period in which the revolving funds and government deposits subject to sections 4.0 and 4.1 of the current Act are in use. Except for this removal provision, which is derived from section 5.10 of the present Act, the provisions of this new section 5.41 are patterned after those made applicable to the FDIC by 12 U.S.C. § 1812.

Section 5.42 provides for the general powers of the FFCIC. The first nine of the listed powers, and the last one, reproduce the ten powers granted by 12 U.S.C. § 1819 to the FDIC. In addition, this new section 5.42 specifically empowers the FFCIC: to approve the issuance of obligations, both system-wide and by individual banks, and to prescribe collateral therefor; to review the voluntary merger of districts or like institutions and to approve such mergers unless the FFCIC can establish that such mergers would result in a non-viable institution within the System or would lessen the long-term financial stability of the System; to review the voluntary division of associations and to approve such divisions except as the FFCIC can establish the prohibitory conditions for mergers as listed above; to review the voluntary consolidation of the managements of unlike banks within a district, or of the managements of like or unlike associations within a district (subject to the conditions set out in new section 4.10A), and to approve such consolidations except as the FFCIC can establish the prohibitory conditions for mergers as listed above; to review the charter of new associations and to approve such charters as provided in other sections of the Farm Credit Act; to execute such charters or charter amendments as are made necessary by mergers or divisions; to prescribe rules and regulations for the exercise by primary lenders in the System of all new lease-back authority granted under this Act; to prescribe rules and regulations to re-

quire each System bank to establish a system of internal audit and examination and for System banks to adopt procedures to require the associations of the System to establish systems of internal credit review; to make reports to the President and to the Congress; and to make investments in stock of the institutions of the System under the terms of section 4.0 of the Farm credit Act with respect to the revolving funds.

Subsection (b) adds a new secton 5.43 to the present Act, which provides for regular System examinations and reports, for special examinations by the FFCIC, and for FFCIC powers to enforce its special examination provisions.

New subsection 5.43(b) provides that the FFCIC shall require each institution of the System to prepare, at least once each year and more frequently if determined by the FFCIC, financial statements in accordance with generally accepted accounting principles. The use of GAAP accounting is intended to ensure that the shareholder-borrowers of the System, as well as investors in System obligations will have a secure means of comparing the worth and stability of System institutions with the worth and stability of similar institutions outside of the System. This subsection also provides that the FFCIC shall prepare for public distribution financial reports on farm credit institutions, on single and consolidated bases, at least annually.

New subsections 5.43(a) and (c) create a two-tiered audit and examination regime for System institutions. Subsection 5.43(a) provides that the FFCIC shall require each institution to submit, at least once each year and more frequently if determined by the FFCIC, to examination and audit. These regular examinations and audits are to be performed by independent certified public accountants of the institution's choice, in accordance with generally accepted accounting standards, and each association in the System shall be regarded as a stand-alone entity for this purpose. The FFCIC shall have access to all such reports, as well as to all other examinations, audits, and financial reports of all System institutions, whether performed or prepared by or at the direction of a System institution or by or at the direction of any agency of the Government, including the General Accounting Office. Subsection 5.43(c) provides for the second tier of the regime, empowering the FFCIC whenever it is not satisfied that an independent audit performed pursuant to subsection (a) is accurate or sufficient, or whenever the FFCIC has reasonable cause to believe that the finances of an institution are not sound, to require such institution to submit to a special audit and examination. As drawn, these provisions place initial reliance for System scrutiny on independent examiners and auditors using generally accepted auditing standards applicable to the financial community at large. This is intended to promote the conformance of System institution lending practices with the lending practices of similar institutions outside of the System, as adapted to the special needs of agriculture. Special examination and audit powers are given to the FFCIC under subsection (c) as an ultimate check on the true financial condition of any given System institution. For such purpose the Board of Directors of the FFCIC shall have the power, to appoint and employ examiners who shall have the power, on behalf of the FFCIC, to make a thorough examination of all of the affairs of the subject institution. These powers are adapted from those given to the FDIC by 12 U.S.C. § 1820(b). In connection with such special examinations, the Board of Directors of the FFCIC, or its designated representatives, are granted the same powers to administer oaths and to take evidence as are given to the FDIC by 12 U.S.C. §§ 1820(c) and 1818(n). Moreover, the FFCIC may cause any and all evidence to be preserved in accordance with the powers given to the FDIC by 12 U.S.C. § 1820(e).

Subsection (c) adds a new section 5.44 to the present Act, which provides for a new insurance fund for the Farm Credit System, for the conditions on its use, for its maintenance at an optimum operating level, and for power in the FFCIC to adjust insurance premiums for institutions taking advantage of the new lease-back authority created by this Act.

These insurance provisions must be read in conjunction with the cease-and-desist authority, the removal/suspension authority, and the receivership authority granted to the FFCIC by section 102(d) of this Act. Together, they establish a regime of full authority in the FFCIC to mandate changes in the financial practices of an institution and to suspend and remove any or all of its directors or officers, if appropriate, while making mandatory on the FFCIC that the insurance fund be used to correct such difficulty. This is intended, in all but extreme circumstances, to allow the FFCIC to reform a troubled System institution completely while retaining it in corporate structure to serve its geographic territory. Thus, the strongest of the System's borrowers will have less reason to leave the System than they do now, under the present fear of increasingly widespread System institution liquidations. In extreme circumstances, however, the Act provides that the insurance fund shall not be used and that the FFCIC may place a System institution into receivership.

In particular, new subsection 5.44(a) provides that when the FFCIC has reasonable cause to believe, based on regular audits, special audits, or on other information available to it, that a System institution will experience a period of illiquidity or will experience impairment of capital, the FFCIC shall take such action as is necessary to maintain the liquidity or unimpaired capital structure of the institution. Such action shall take the form of loans to, guarantees of the obligations of, purchase of the non-voting securities of, or contributions to the capital of, such System institution. Loans, guarantees, purchases of non-voting securities, and contributions to capital may be on such terms and conditions as the FFCIC determines, pursuant to its rules and regulations. The FFCIC shall also have the power to prescribe such rules and regulations regarding the institution's use of disbursed funds as the FFCIC determines are appropriate to carry out the purposes of the present Farm Credit Act, as amended by this Act, and may provide in such rules and regulations that funds disbursed under a guarantee of such institution's obligations must be repaid by such institution under certain circumstances. The FFCIC shall not have the power to purchase the assets or directly assume the liabilities of any System institution. The FFCIC is not intended to become a warehouse for such assets or liabilities.

New subsection 5.44(b) provides that when the FFCIC has otherwise established that financial assistance to a System institution is reasonably necessary to protect the financial soundness of the System as a whole, and that the conditions for FFCIC action under subsection (a) are not likely to occur with respect to such institution until past the time when the soundness of the System may be compromised, the FFCIC shall also have the power to take such emergency action with respect to such institution as is appropriate. The forms of such action and the power of the FFCIC to prescribe rules and regulations in connection therewith are as set out under subsection (a).

New subsection 5.44 (c), (d), (e), and (f) provide for the initial funding of the insurance fund and for its maintenance at an optimum operational level. Initial funding is in subsection (e), which requires that each primary lender in the Farm Credit System (the Federal land banks, the production credit associations, and the banks for cooperatives), within thirty days after the date on which the FFCIC becomes a body corporate (as provided in the preamble of new section 5.42), shall pay to the FFCIC an amount equal to three percentum of the total volume of loans outstanding through such primary lender. The intent of tying the funding of the insurance fund to the volume of loans outstanding through the System's primary lenders is to create the closest possible correspondence between the cost of this insurance and the sources of those risks which the insurance fund spreads. Moreover, to the extent that the System's primary lenders normally share their loan risks with other System institutions as part of their regular loan servicing or discounting arrangements, nothing in this Act shall prevent the System's primary lenders from sharing their initial insurance fund assessment with such other institutions on the same basis. In return for the payment of this one-time assessment, the FFCIC shall issue non-voting stock to be held by System primary lenders, or by other institutions to the extent that this initial assessment is shared, as an asset. Such bookkeeping is in conformity with generally accepted accounting principles. Subsection (c) provides for a yearly insurance premium assessed by the FFCIC against System primary lenders on or before January 31 of each year in an amount equal to one-twelfth of one percentum of the volume of loans outstanding from that primary lender, as calculated at the close of the preceding year. Deficiencies are made up under subsection (d), which provides that if in any year the amount of the insurance fund becomes less than one-half of one percentum of the total loan volume of institutions in the Farm Credit System, the FFCIC may make a special assessment on each primary lender, in proportion to its share of the total loan volume, to increase the amount of the insurance fund to an amount equal to one percentum of the total loan volume of institutions in the Farm Credit System. Fund surpluses are distributed under subsection (f), which provides that the FFCIC may rebate to primary lenders amounts in proportion to the premiums paid by them during the period determined by the FFCIC as having generated the excess which will reduce the fund to a reasonable operating level, as determined by the FFCIC. Premiums, special assessments, and rebates may be shared on the same basis as the initial assessment. Premiums shall be accounted for as operating expenses of the payors; special assessments shall be made in return for non-voting stock to be held by the payors as an asset; and rebates shall be accounted for by the recipients as operating income unless

the FFCIC declares such rebate to be a retirement of a proportionate volume of the non-voting shares issued in return for the initial assessment or for a special assessment.

Subsection 5.44(g) allows the FFCIC, for any primary lender who has taken advantage of the lease-back authority created by this Act, to charge additional insurance premiums to such institutions with regard to the holding of such properties, on the basis of rules and regulations promulgated pursuant to new section 5.42(1), as applied by the FFCIC to such property holdings of the institution.

Subsection (d) adds new sections 5.45 and 5.46 to the present Act, which grant to the FFCIC full cease-and-desist powers, removal/suspension powers over System institution directors and officers, and receivership authority.

New section 5.45 is patterned directly after the cease-and-desist and removal/suspension provisions (including provisions for administrative and judicial review) of the FDIC, as set out in 12 U.S.C. § 1818, and it specifically grants to the FFCIC all such FDIC powers as are appropriate. The only significant modifications respond to the unique nature of agricultural lending and to the relative simplicity of the operations of farm credit institutions, as compared with commerical banks, due to the more focused scope of their activities and the fact that they have no depositors. Thus, the use of cease-and-desist powers under subsection 5.45(a)(1) is conditioned on a determination by the FFCIC that any System institution, or any director, officer, employee, agent, or other person participating in the conduct of the affairs of such institution is engaging or has engaged, or that the FFCIC has reasonable cause to believe that the institution or any director, officer, employee, agent, or other person participating in the conduct of the affairs of such institution is about to engage, in any unsafe or unsound "agricultural" banking practice. Moreover, such practice must be one that directly affects, or would directly affect, the institution's financial stability, incorporating the recent judicial interpretation of the FDIC's powers in *First National Bank of Bellaire v. Comptroller,* 697 F.2d 674 (5th Cir. 1983), or such practice must be one that could cause, or has caused, a disbursement of funds or other action by the FFCIC under new section 5.44(a). Otherwise, cease-and-desist authority is unnecessary as a corrective measure and unwarranted where there is full, System-wide financial reporting and scrutiny under GAAP accounting, and no depositors. Similarly, although the FDIC's removal/suspension powers are supplemented for the FFCIC by a provision that allows such action when a disbursement of funds or other action by the FFCIC under new section 5.44(a) could be or has been caused, this supplemental provision further states that removal or suspension would not be proper unless the institution's difficulty was not due primarily to general economic or agricultural conditions beyond the reasonable expectation of the director or officer to be removed or suspended. Otherwise, the director or officer was not at fault. Once the cease-and-desist powers and the removal/suspension powers mature, however, they operate in the same way as the FDIC's powers under 12 U.S.C. § 1818. Provisions for administrative and judicial review are also the same.

New section 5.46 provides that in order to avert a situation which could cause a disbursement of funds or other action by the FFCIC under new section 5.44(a), as a Congressionally disfavored option exercisable only to prevent severe impairment of the insurance fund, the FFCIC shall have the power to place a System bank or association in receivership, and to liquidate it. As noted in conjunction with section 102(c) of this Act, it is the intent of the new insurance and regulatory regime that the FFCIC generally make all necessary reforms to a troubled System institution short of liquidation, thus removing the present fear of increasingly wide-spread liquidations which is causing some of the System's strongest borrowers to leave it. Liquidation powers are thus restricted. When such authority does mature, however, the FFCIC may exercise powers that are patterned after those granted to the FDIC by 12 U.S.C. 1821(d).

Subsection (e) adds new section 5.47 to the present Act, which provides for the investment of money of the FFCIC, not otherwise employed, in obligations of the United States or in obligations guaranteed as to principal and interest by the United States, and for the manner in which the banking or checking accounts of the FFCIC shall be kept. This new section is patterned after 12 U.S.C. 1823 (a) and (b) for the FDIC and place on the FFCIC the same restrictions as are placed on the FDIC.

Subsection (f) is a supplementary provision to the initial assessment provision for the insurance fund (set out in Section 102(c)) and provides that the proceeds of the liquidation of all service corporations liquidated pursuant to section 402(b) of this Act shall be transferred to the FFCIC. In conjunction with section 402(b) and other sections of this Act, this subsection is intended to streamline the Farm Credit System to its efficient and essential parts.

Section 103

This section provides for the sunset of the present Farm Credit Administration and for the orderly assumption by the FFCIC of its duties and responsibilities under the present Farm Credit Act and the amendments made by this Act.

Subsection (a) adds a new section 5.31 to the present Act, which provides that all but two of the operative provisions of that Act that create and empower the Farm Credit Administration shall cease to be in effect on the ninetieth day after the effective date of this Act. The two exceptions are present section 5.8, pertaining to the Federal Farm Credit Board, which is amended separately by section 104 of this Act, and section 5.16, pertaining to the present assessments made by the Farm Credit Administration on System institutions to fund its operations, which is amended to apply to the FFCIC by section 501(111) of this Act.

Subsection (b) provides that until the ninetieth day after the effective date of this Act, no amendment to the Farm Credit Act of 1971, made by this Act, shall operate to deprive the Farm Credit Administration of its statutory or regulatory authority existing on the effective date of this Act, except that the Farm Credit Administration shall not have the power to take any action after the effective date of this Act which could not be taken by the FFCIC after it becomes a body corporate.

Subsection (c) provides that each Federal land bank, Federal land bank association, Federal intermediate credit bank, production credit association, bank for cooperatives, and the Central Bank for Cooperatives, federally chartered and operating on the ninetieth day after the effective date of this Act, shall continue as a federally chartered institution under this Act.

Subsection (d) provides that there shall be no transfer of functions or personnel from the Farm Credit Administration to the FFCIC except as the FFCIC may determine at its discretion will facilitate the transition of regulatory authority or continuity. The FFCIC shall succeed to all services, facilities, equipment, and funds of the Farm Credit Administration.

Subsection (e) provides that in the six months following the date on which it becomes a body corporate, the FFCIC, by its Board of Directors or by a duly authorized person or committee: (1) shall review all rules and regulations promulgated by the Farm Credit Administration and effective on the date that the Farm Credit Administration is sunsetted, which shall remain effective as the regulations of the FFCIC for a period not longer than six months after the date on which the FFCIC becomes a body corporate unless earlier superseded on an interim or permanent basis by new regulations of the FFCIC, except that the continuing effectiveness of such regulations shall not operate to permit the FFCIC to take any action inconsistent with its statutory authority as set out in this Act or otherwise; (2) review the authority granted to the FFCIC by this Act and otherwise; (3) amend, eliminate, or replace any Farm Credit Administration regulation on an interim basis; (4) promulgate any new regulations on an interim basis; and (5) by the end of such six-month period, promulgate a new set of regulations and report to the President and to the Congress on the status of transition at that time. The FFCIC shall continue to make such transition reports on a month-by-month basis until transition is complete.

Section 104

This section amends section 5.8 of the present Act, pertaining to the Federal Farm Credit Board, and transfers the Board from the Farm Credit Administration to the FFCIC. The Board's role is made advisory by the addition of a new subsection 5.8(j), which provides that the Federal Farm Credit Board shall act in an advisory capacity to the Board of Directors of the FFCIC on auditing, examining, and regulating the Farm Credit System, and to the board of directors of each System bank on coordinating plans and procedures to promote operational and administrative efficiencies.

TITLE II—REPRESENTATIVE BOARDS OF DIRECTORS

Section 201

This section amends section 5.3 of the present Act to provide for a separate board of directors for each system bank. This is intended to correct a fundamental structural defect in current law under which each present Farm Credit District Board is deemed as well to be the board of directors of each of the three district banks in its district, even though the shareholders of each district bank elect only two-sevenths of the district board members. Under the amendments made by this section, the shareholders of a district bank will elect all of their bank's board, in conformity with standard practice in the national banking system and corporate governance in general. The amendments made by this section to present section 5.3 are patterned after present sections 5.1, 5.2, and 5.4, pertaining to the eligibility, nomination, election, terms, membership, and selection of officers on the present

Farm Credit District Boards. Unlike the present district boards, however, each separate bank board shall have only five members, and there is no provision for any appointed members.

Section 202

This section amends sections 5.1, 5.2, 5.5, and 5.6 of the present Act pertaining to the Farm Credit District Boards, reducing those boards in size and making them advisory. Thus, this section complements section 201 by completing a regime under which the four present functions of each district board are separated among four distinct boards. Section 201 transfers their district bank board functions to the three newly constituted district bank boards in each district, and this section reconfirms the fourth district board role, as district coordinator, as its remaining advisory role.

Subsection (a) reduces each district board to five members.

Subsection (b) provides that three of the five members on each district board shall be selected, one each, from among the three separate boards of directors of the district banks in the district. The two remaining members shall be elected at large by all eligible voters in the district.

Subsection (c) amends section 5.6(a) of the present Act, pertaining to district board powers, by striking out the present powers and by inserting in lieu thereof that the district boards shall: (1) coordinate and administer such joint undertakings and joint properties of the banks of the System as may be authorized from time to time by each of the respective boards of directors of such banks; (2) advise the respective boards of directors of each of the banks of the district which are institutions of the System on coordination of policies designed to promote operational and administrative efficiencies; and (3) provide a forum and the means of communication for System bank boards in the district to monitor the collective financial soundness of all of the System institutions in the district, and to alert the FFCIC of any need for closer supervision.

Subsection (d) is a conforming amendment.

TITLE III—FARM CREDIT SYSTEM SELF-HELP POWERS

Section 301

This section adds three new sections to the present Act to give new authority to the primary lenders in the System to deal flexibly with viable farm operators who are undergoing short-term difficulty, and with good farmland, ranchland, or equipment that could be run profitably if operated by someone other than a non-viable operator. This new authority is a permissive alternative to foreclosure (and as such would prevent further depression of land and equipment values due to oversupply in the market) and is not intended to be used as an artificial prop for operators who are not viable or for farmland or ranchland that should not be in use.

Subsection (a) adds a new section 1.4A to the present Act, which provides that as an alternative to foreclosure on loan collateral, or to avoid displacement of viable agricultural operators, each Federal land bank shall have the power, with the agreement of the debtor, to take title to loan collateral and lease it back to the debtor if the debtor is still a viable operator, or to another person if the debtor is not still a viable operator. If the leasing agreement is with the debtor, it shall contain a buy-back provision exercisable by the debtor after a period not greater than three years, at a price determined at the time the repurchase agreement is exercised. The bank may re-execute lease agreements with lessors who remain viable operators, with the agreement of those lessors, but the bank may not retain title to given loan collateral for longer than ten years. The appraisal value of loan collateral to which a Federal land bank has taken title pursuant to this section may be certified by such bank for bond collateral.

Subsection (b) adds a new section 2.2A to the present Act, which grants the same powers to the production credit associations.

Subsection (c) adds a new section 3.1A to the present Act, which grants the same powers to the banks for cooperatives.

Section 302

This section amends section 4.3 of the present Act by adding a new subsection 4.3(c), which provides that the FFCIC may reduce the capital requirements of Farm Credit System institutions, collectively, to not less than one-half of one percentum more than the capital requirements (ratio of primary capital to total assets) applicable to national banks. This is intended to allow the FFCIC to adjust the capital requirements of the System, though not lower than a level that is still higher than that for national banks, as it determines will most accurately reflect the concentrated nature of farm credit institution loan portfolios, without keeping such requirements at a level that can create for certain institutions a problem of paper illiquidity.

TITLE IV—PRESERVATION OF THE INDEPENDENCE AND SEPARATE IDENTITIES OF FARM CREDIT SYSTEM INSTITUTIONS

Section 401.

This section adds a new section 4.10A to the present Act to ensure by statute that the original, decentralized plan of the Farm Credit System cannot be amended administratively through abuse or regulation. Thus, neither banks nor associations organized or operating under different titles of the present Act may be merged. Moreover, in order that Farm Credit System borrowers may preserve their intended ability to choose among the loans offered by associations organized and operating under different titles of the present Act, without being subjected to cross influences between such associations, any combination or cooperation among the managements of such associations may not result in a combination of their loan functions.

Section 402

This section eliminates the possibility of indirect System institution consolidation or merger through service corporations and streamlines the Farm Credit System to its essential elements.

Subsection (a) deletes sections 4.25 through 4.28 of the present Act, pertaining to service corporations, and adds a new section 4.25 to the present Act, which provides that the FFCIC shall not have the power to charter corporations except Federal land banks, Federal land bank associations, Federal intermediate credit banks, production credit associations, banks for cooperatives, or the Central Bank for Cooperatives, as provided in this Act or otherwise.

Subsection (b) provides that all corporations established pursuant to section 4.25 of the present Act, before the effective date of this Act, except the Federal Farm Credit Banks Funding Corporation, shall, within ninety days after the effective date of this Act, be liquidated. The Federal Farm Credit Banks Funding Corporation shall retain its function of assisting in the issuance of System-wide obligations, and continue as a body corporate. It shall make reports to the President and Congress not later than April 1 of each calendar year, and at such other times as the Congress may determine, summarizing its operations and setting forth such information as is necessary for the President and the Congress to review its financial condition. However, the Federal Farm Credit Banks Funding Corporation shall have no authority to extend credit, to set policy, to prescribe lending limits or standards, to make any lending decisions, to hold any primary System capital, to assume in any manner the primary responsibility of System institutions to service System borrowers, or to provide insurance services for borrowers from Farm Credit System institutions.

TITLE V—CONFORMING AMENDMENTS

Section 501

This section sets out each of the conforming amendments to the present Act that are necessary to amend the present references to the Farm Credit Administration.

By Mr. MELCHER:

S. 1792. A bill to amend the Animal Welfare Act to ensure the proper treatment of laboratory animals; to the Committee on Agriculture, Nutrition, and Forestry.

ANIMALS IN LABORATORIES PROTECTION ACT

Mr. MELCHER. Mr. President, I am today introducing the Animals in Laboratories Protection Act for appropriate referral. I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1792

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. Short title.

The Animals in Laboratories Protection Act.

" 'SEC. 2. The Congress finds that—

(1) the use of animals is instrumental in certain research and education for advancing knowledge of cures and treatment for diseases and injuries which afflict both humans and animals;

(2) methods of testing that do not use animals are being and continue to be developed which are faster, less expensive, and more accurate than traditional animal experiments for some purposes and further opportunities exist for the development of these methods of testing;

(3) measures which eliminate or minimize the unnecessary duplication of experiments on animals can result in more productive use of Federal funds; and

(4) measures which help meet the public concern for laboratory animal care and treatment are important in assuring that research will continue to progress.'

SEC. 3. (a) Section 13 of the Animal Welfare Act (7 U.S.C. 2143) is amended—

(1) by redesignating subsections (b) through (d) as subsections (f) through (h) respectively; and

(2) by striking out the first two sentences of subsection (a) and inserting in lieu thereof the following:

'(1) The Secretary shall promulgate standards to govern the humane handling, care,

treatment, and transportation of animals by dealers, research facilities, and exhibitors.

'(2) The standards described in paragraph '(1) shall include minimum requirements—

'(A) for handling, housing, feeding, watering, sanitation, ventilation, shelter from extremes of weather and temperatures, adequate veterinary care, and separation by species where the Secretary finds necessary for humane handling, care, or treatment of animals; and

'(B) for physical environment adequate to promote the psychological well-being of research animals, particularly primates, including whatever apparatus the Secretary deems appropriate.

'(3) In addition to the requirements under paragraph (2), the standards described in paragraph (1) shall, with respect to animals in research facilities, include requirements—

'(A) for animal care, treatment, and practices in experimental procedures to ensure that animal pain and distress are minimized, including adequate veterinary care with the appropriate use of anesthetic, analgesic, tranquilizing drugs, or euthanasia;

'(B) that the principal investigator considers alternatives to any procedures likely to produce pain to or distress in an experimental animal;

'(C) in any practice which could cause pain to animals (other than slight or momentary pain)—

'(i) that a doctor or veterinary medicine is consulted in the planning of such procedures;

'(ii) for the use of tranquilizers, analgesics, and anesthetics;

'(iii) for pre-surgical and post-surgical care by laboratory workers in accordance with established veterinary medical and nursing procedures;

'(iv) against the use of paralytics without anesthesia; and

'(v) that the withholding of tranquilizers, anesthesia, analgesia, or euthanasia when scientifically necessary shall continue for only the necessary period of time;

'(D) that no animal is used in more than one major operative experiment from which it is allowed to recover except in cases of—

'(i) scientific necessity; or

'(ii) other special circumstances as determined by the Secretary; and

'(E) that exceptions to such standards may be made only when specified by research protocol and that any such exception shall be detailed and justified in a report outlined under paragraph (7).'.

(b) Section 13(a) of such Act is further amended—

(1) by designating the third and fourth sentences as paragraph (4);

(2) by designating the fifth sentence as paragraph (5); and

(3) by striking out the last sentence and inserting in lieu thereof the following:

'(6) Nothing in this Act shall be construed as authorizing the Secretary to promulgate, rules regulations or orders with regard to the design, outlines, or guidelines of actual research or experimentation by a research facility or Federal research facility: *Provided*, That the Secretary shall require every research facility to show that professionally acceptable standards governing the care, treatment, and practices on animals are being followed by the research facility during research and experimentation. No rule, regulation, order, or part of this Act may require a research facility to disclose to the Institutional Animal Committee during its inspection trade secrets or commercial or financial information which is privileged or confidential.

'(7)(A) The Secretary shall require, at least annually, every research facility and Federal research facility to report that the provisions of this Act are being followed.

'(B) In complying with subparagraph (A), such research facilities shall provide—

'(i) the details of any procedure which was likely to produce pain or distress in any animal and assurances demonstrating that the principal investigator considered alternatives to those procedures;

'(ii) assurances satisfactory to the Secretary that such facility is adhering to the standards described in this section; and

'(iii) an explanation for any deviation from the standards promulgated under this section.

'(8) Paragraph (1) shall not prohibit any State (or a political subdivision of such State) from promulgating standards in addition to those standards promulgated by the Secretary under paragraph (1).'.

(c) Section 13 of such Act is further amended by inserting after subsection (a) the following new subsections:

"(b)(1) The Secretary shall require that each research facility establish at least one Institutional Animal Committee. Each Institutional Animal Committee shall be appointed by the chief executive officer of each such research facility and shall be composed of not fewer than three members. Such members shall possess sufficient ability to assess animal care, treatment, and practices in experimental research as determined by the needs of the research facility. Of the members of the Institutional Animal Committee—

'(A) at least one member shall be a doctor of veterinary medicine;

'(B) at least one member shall not affiliated in any way with such facility other than as a member of the Institutional Animal Committee, shall not be a member of the immediate family of a person who is affiliated with such facility, and shall represent society's concerns regarding the welfare of the animal subjects; and

'(C) in those cases where the Institutional Animal Committee consists of more than three members, not more than three members shall be from the same administrative unit of such facility.

'(2) A quorum shall be required for all formal actions of the Institutional Animal Committee, including inspections under paragraph (3).

'(3) The Institutional Animal Committee shall inspect at least semiannually all animal study areas and animal facilities of such research facility and review as part of the inspection—

'(A) practices involving pain to animals, and

'(B) the condition of animals,

to ensure compliance with the provisions of this Act and that pain and distress to animals is minimized. Exceptions to the requirement of inspection of such study areas may be made by the Secretary if animals are studied in their natural environment and the study area is prohibitive to easy access.

'(4)(A) The Institutional Animal Committee shall file an inspection certification report of each inspection at the research facility. Such report shall—

'(i) be signed by a majority of the Institutional Animal Committee members involved in the inspection;

'(ii) include reports of any violation of the standards promulgated, or assurances required, by the Secretary, including any deficient conditions of animal care or treatment, any deviations of research practices from originally approved proposals that adversely affect animal welfare, any notification to the facility regarding such conditions and any corrections made thereafter;

'(iii) include any minority views of the Institutional Animal Committee; and

'(iv) include any other information pertinent to the activities of the Institutional Animal Committee.

'(B) Such report shall remain on file for at least three years at the research facility and shall be available for inspection by the Animal and Plant Health Inspection Service of the Department of Agriculture and any funding Federal agency.

'(C) In order to give the research facility an opportunity to correct any deficiencies or deviations discovered by reason of paragraph (3), the Institutional Animal Committee shall notify the administrative representative of the research facility of any deficiencies or deviations from the provisions of this Act. If, after notification and an opportunity for correction, such deficiencies or deviations remain uncorrected, the Institutional Animal Committee shall notify (in writing) the Animal and Plant Health Inspection Service of the Department of Agriculture and the funding Federal agency of such deficiencies or deviations.

'(5) The inspection results shall be available to Department of Agriculture inspectors for review during inspections. Department of Agriculture inspectors shall forward any Institutional Animal Committee inspection records which include reports of uncorrected deficiencies or deviations to the Animal and Plant Health Inspection Service and any funding Federal agency of the project with respect to which such uncorrected deficiencies and deviations occured.

'(c)(1) In the case of Federal research facilities, a Federal Institutional Animal Committee shall be established and shall have the same composition and responsibilities outlined in subsection (b), except that the Federal Institutional Animal Committee shall report deficiencies or deviations to the head of the Federal agency conducting the research rather than to the Animal and Plant Health Inspection Service of the Department of Agriculture. The head of the Federal agency conducting the research shall be responsible for—

'(A) all corrective action to be taken at the facility; and

'(B) the granting of all exceptions to inspection protocol.

'(d)(1) Each research facility shall provide for annual training for scientists, animal technicians, and other personnel involved with animal technicians, and other personnel involved with animal care and treatment in such facility. Such training shall include instruction on—

'(A) the humane practice of animal maintenance and experimentation;

'(B) research or testing methods that minimize or eliminate the use of animals or limit animal pain or distress; and

'(C) utilization of the information service at the National Agricultural Library, established under subsection (e).

'(2) Every research facility shall inform their employees of the provisions of this Act and shall inform such employees to report any violations of such provisions. Any such employee may not be discriminated against on grounds that such employee reported a violation of such provisions.

'(e)(1) The Secretary shall establish an information service at the National Agricultural Library. Such service shall, in coopera-

tion with the National Library of Medicare, provide information—

'(A) pertinent to employee training;

'(B) which could prevent unintended duplication of animal experimentation as determined by the needs of the research facility; and

'(C) on improved methods of animal experimentation, including methods which could—

'(i) reduce or replace animal use; and

'(ii) minimize pain and distress to animals, such as anesthetic and analgesic procedures.

'(2) No funds other than those specifically appropriated for the purpose of carrying out this subsection may be obligated for such purposes.

'(f) In any case in which the funding Federal agency determines that conditions of animal care, treatment, or practice in a particular project have not been in compliance with standards promulgated under this Act, despite notification by the Secretary or the funding Federal agency to the research facility and an opportunity for correction, such agency shall suspend or revoke Federal support for the project. Any research facility losing Federal support as a result of actions taken under the preceding sentence shall have the right of appeal as provided in sections 701 through 706 of title 5, United States Code.

SEC. 4. The Animal Welfare Act (7 U.S.C. 2131-2156) is amended by adding at the end thereof the following section:

'SEC. 27. (a) It shall be unlawful for any member of the Institutional Animal Committee to release any confidential information of the research facility including any information that concerns or relates to—

'(1) the trade secrets, processes, operations, style of work, or apparatus, or

'(2) to the identity, confidential statistical data, amount or source of any income, profits, losses, or expenditures of the research facility.

'(b) It shall be unlawful for any member of such Committee—

'(1) to use or attempt to use to his advantages, or

'(2) to reveal to any other person,

any information which is entitled to protection as confidential information under subsection (a).

'(c) A violation of subsection (a) or (b) is punishable by—

'(1) removal from such Committee, and

'(2)(A) a fine of not more than $1,000 and imprisonment of not more than one year, or

'(B) if such violation is willful, a fine of not more than $10,000 and imprisonment of not more than three years.

'(d) Any person, including any research facility, injured in its business or property by reason of a violation of this section may recover all actual and consequential damages sustained by such person and the cost of the suit including a reasonable attorney's fee.

'(e) Nothing in this section shall be construed to affect any other rights that any such person may have, nor shall subsection (d) be construed to limit the exercise of any such rights arising out of or relating to a violation of subsections (a) and (b).'.

SEC. 5. (a) Subsection (b) of section 19 of the Animal Welfare Act (7 U.S.C. 2149(b)) is amended—

(1) in the first sentence by striking out '$1,000 for each such violation' and inserting in lieu thereof '$2,500 for each such violation'; and

(2) in the sixth sentence by striking out '$500 for each offense' and inserting in lieu thereof '$1,500 for each offense'.

(b) Subsection (d) of such section is amended by striking out '$1,000' and inserting in lieu thereof '$2,500'.

SEC. 6. (a) Section 2 of the Animal Welfare Act (7 U.S.C. 2132) is amended by adding after subsection (j) the following new subsections:

'(k) The term "Federal agency" means an Executive agency as such term is defined in section 105 of title 5, United States Code, and with respect to any research facility means the agency from which the research facility receives a Federal award for the conduct of research, experimentation, or testing, involving the use of animals;

'(l) The term "quorum" means a majority of the Committee members;

'(m) The term "Federal research facility" means each department, agency, or instrumentality of the United States which uses live animals for research or experimentation.'.

SEC. 7. Section 14 of the Animal Welfare Act (7 U.S.C. 2144) is amended by changing 'section 13' to 'section 13(a)' wherever it appears.

SEC. 8. This Act shall take effect one year after the date of the enactment of this Act."

By Mr. KENNEDY (for himself and Mr. HATCH):

S. 1793. A bill to amend the Public Health Service Act to establish a grant program to develop improved systems of caring for medical technology dependent children in the home, and for other purposes; to the Committee on Labor and Human Resources.

ALTERNATIVES TO HOSPITALIZATION FOR MEDICAL TECHNOLOGY DEPENDENT CHILDREN ACT

● Mr. KENNEDY. Mr. President, I rise to introduce the Alternatives to Hospitalization for Medical Technology Dependent Children Act of 1985.

There is a relatively small group of children in America who are dependent on advanced medical technology for an extended period if they are to avoid death or serious injury. Among the children in this group are those dependent on mechanical ventilators, those requiring long-term intravenous drug therapy, and those who need to receive nutrition intravenously for lengthy periods or for life. A variety of diseases or birth defects can lead to this state of technology dependency, including osteomyelitis, cancer, neurological trauma, progressive neurological disease, and cardiac and pulmonary disorders.

Until recently, dependence on these advanced medical technologies generally required long term or permanent hospitalization. Recent improvements in technology combined with better understanding of how to organize successful home care have meant that some technology dependent children can now be cared for at home.

Hearings held by the Labor Committee this past June revealed the heroic efforts of parents to care for their technology dependent children at home and the remarkable successes that can be achieved through the miracles of modern medicine. These hearings demonstrated that home care was not only often far better in human terms for children and their families, it was far less costly financially than immensely expensive extended hospitalizations. At the same time, however, these hearings revealed the tragic and unnecessary barriers that parents struggling to care for their children at home too often face.

The record is clear that it is often a human and financial disaster to institutionalize children when home care is safe, effective, and desired by children and their families. It was shocking to learn that public and private insurance reimbursement policies have too often dictated that home care will be denied even in cases where the same care would be provided in a hospital or other institution.

These backward and inhumane policies are sometimes justified on the grounds that health care dollars should be reserved only for those who truly need care. Services in the home, it is argued, are usually for less acutely ill persons, and the availability of public or private insurance coverage for needed home services would displace the contributions families make out of their own resources.

I am skeptical of the validity of that justification in any context, but, whatever its general validity, it is clearly not applicable to the population of children needing intensive medical services that we are discussing today. Indeed, these seriously ill children have far too often been victimized by that policy.

Without assistance there is no family in America that can afford the care or provide the supervision and case management necessary to sustain children at home with these complex conditions. Federal policy to assure the availability of the services our families and children need is imperative.

There are children in America who have individually saved hundreds of thousands of dollars of public and private money by returning to the loving home environments only their families can supply. But in order to provide that loving care, families have been forced by backward, antiquated public and private policies to make cruel sacrifices. And while some children have returned to their homes, there are many others who have been sentenced to months or years of unnecessary institutionalization.

The burdens of having a severely ill child are heavy enough without the obstacles posed by outdated, public and private health policies. No family should have to move or change jobs to get fair treatment by an insurance company or a Medicaid program. No family should have to undergo lengthy struggles with public and private bureaucracies to get the care their child needs. And no child should be forced

to stay in a hospital when it is in his best interest to be cared for at home with his family.

The basic problems that prevent technology dependent children from being cared for at home were clearly revealed in our committee's hearing record.

First, private health insurance policies and Medicaid often refuse to pay for necessary treatment and services in the home for conditions that they will cover fully, at much greater cost, if they are treated in a hospital. This occurs because much lower limits are sometimes set on total insurance liability for home care than for hospital care. These lower limits are designed to prevent long-term coverage of chronic conditions, but they do not make financial sense when applied to children who must be hospitalized in the absence of home care. In addition, successful home care often depends on services such as case management, respite care, and technical assistance to family members that are not traditionally included in medical insurance plans but are essential to successful home care.

In addition to the overriding problem of appropriate insurance coverage, effective home care for children with these severe dependencies requires training of health personnel, development of technically proficient home care organizations, and coordination of a diverse variety of services. These resources are not currently present in every community.

The bill that I am introducing today addresses the private insurance coverage problem and the resource availability problem. I will introduce additional legislation in the near future designed to correct inadequacies in Medicaid's coverage of these services.

The bill I am introducing today addresses the private insurance problem by directing a study by the Office of Technology Assessment which will develop a model insurance coverage provision for home care for technology dependent children. It is my expectation that there will be broad participation in this study by representatives of the insurance industry, by medical specialists conversant with the problems of home care for technology dependent children, and by parents of technology dependent children. The study is to be completed and the model insurance coverage plan is to be promulgated within 18 months after the enactment of the legislation.

It is my hope and expectation that the insurance industry and self-insured employers will respond to the needs of technology dependent children and to the clearly cost-effective nature of home care by voluntarily including coverage substantially equivalent to the model plan in all employment based health insurance policies. If 80 percent of employment based insurance does not include such coverage within 30 months of the enactment of this legislation, a Federal requirement for inclusion of such coverage will go into effect.

The second part of the bill will establish a small Federal grant program to improve the capability of the health providers to provide the services necessary to effective home care. Grants may be made to maternal and child health agencies, academic health centers, and children's hospitals for the purpose of developing systems of home care for technology dependent children, training of medical personnel, and technical assistance to organizations providing home care.

I would like to thank Senator ORRIN HATCH, the chairman of the Committee on Labor and Human Resources, for his assistance in developing this legislation and his cosponsorship of the bill. His leadership in organizing the hearing that provided information essential in the development of the bill and his continued interest in the issues of home and community based care has been invaluable.

I urge my colleagues to support speedy passage of this bill to bring humane care and support to technology dependent children and their families.●

Mr. HATCH. Mr. President, today I am introducing along with my colleague, Senator EDWARD M. KENNEDY, legislation to provide alternatives to hospitalization for medical technology dependent children. The Labor and Human Resources Committee held hearings in June of this year and heard testimony from witnesses describing the plight of youngsters who, because of congenital disorders or injury, find themselves dependent on costly, highly technical medical care in order to live. Current reimbursement policies tend to favor providing this kind of care in hospitals. However, due to recent advances in technology, medical equipment heretofore used only in hospitals is now considerably more portable and can be utilized in the home setting. Furthermore, systems to deliver such care have also matured. Parents in some instances have been fortunate enough to have the benefit of home care services made possible only because creative and energetic health professionals have parted with past ways of doing business, and developed multidisciplinary support teams enabling these youngsters to be cared for at home.

I have long been an advocate of home and community based care. In the long run it is bound to be less expensive and it is preferred in almost every instance. Most of our committee hearings have forcused on needs for improved home care for the elderly. Although this remains a critical public health problem, and I will continue to encourage legislative reform of our current long-term care policy for our senior citizens, it's time we devote some attention to the problem faced by a limited number of our seriously and chronically ill kids. The legislation we are introducing today is designed to do just that. Although this is a modest bill, it will help in the following ways:

It authorizes grants for State health agencies, academic health centers, or children's hospitals, to develop systems of care outside of the hospital setting for chronically seriously ill medical technology dependent children. It also allows these funds to be used for training of the kinds of health professionals needed in these settings, as well as to provide technical assistance to the various organizations which must participate in these systems if the care is going to be effective; $20 million has been authorized for these efforts for fiscal year 1987, 1988, and 1989. This will complement current demonstrations which have been federally funded to develop these home based systems of care for children, eventually providing for a series of regional centers to be developed throughout the country.

In addition this bill requires the Office of Technology Assessment to conduct a study on insurance coverage for children dependent on medical technology. Although several insurance companies have been progressive in recognizing the cost savings of treating such children at home, and expanding their benefits to cover such care, others have been recalcitrant and refused to accommodate requested changes to provide home services. I believe that with the benefit of advice from economists and insurance experts, a model home care policy could be devised which would protect the financial interest of the insurance industry as well as the patient and their family. The OTA study will provide this information, and hopefully lead to voluntary changes in insurance coverage for home care. If the majority of health insurance companies do not implement the model waiver within 30 months after this bill is signed into law, then penalties could be imposed similar to those authorized under employees health benefits plans of the Health Maintenance Organizations Act. Mr. President, I urge my colleagues to join with me in supporting this legislation. I want to compliment my colleagues on the Labor and Human Resources Committee who have helped in drafting this legislation. Senator KENNEDY has been particularly interested in this issue and willing to delay introduction much broader and more costly legislation and cosponsored this more modest effort to provide assistance for these chronic seriously ill children. I urge all of my colleagues to join with us in supporting this bill.

ADDITIONAL COSPONSORS

S. 12

At the request of Mr. MOYNIHAN, the names of the Senator from Maryland [Mr. SARBANES], the Senator from Arkansas [Mr. BUMPERS], and the Senator from West Virginia [Mr. ROCKEFELLER] were added as cosponsors of S. 12, a bill to protect communications among Americans from interception by foreign governments, and for other purposes.

S. 524

At the request of Mr. ARMSTRONG, the name of the Senator from Maine [Mr. COHEN] was added as a cosponsor of S. 524, a bill to recognize the organization known as the Retired Enlisted Association, Inc.

S. 1116

At the request of Mr. HOLLINGS, the names of the Senator from South Carolina [Mr. THURMOND], the Senator from Connecticut [Mr. DODD], the Senator from Ohio [Mr. METZENBAUM], and the Senator from Massachusetts [Mr. KENNEDY] were added as cosponsors of S. 1116, a bill to amend the act of October 15, 1982, entitled "An act to designate the Mary McLeod Bethune Council House in Washington, District of Columbia, as a national historic site, and for other purposes."

S. 1209

At the request of Mr. CHILES, the name of the Senator from New Jersey [Mr. BRADLEY] was added as a cosponsor of S. 1209, a bill to establish the National Commission to Prevent Infant Mortality.

S. 1223

At the request of Mr. ARMSTRONG, the name of the Senator from Washington [Mr. GORTON] was added as a cosponsor of S. 1223, a bill to authorize the erection of a memorial on Federal land in the District of Columbia or its environs to honor members of the Armed Forces of the United States who served in the Korean war.

S. 1364

At the request of Mrs. KASSEBAUM, the name of the Senator from Minnesota [Mr. DURENBERGER] was added as a cosponsor of S. 1364, a bill to authorize assistance for famine prevention in Africa.

S. 1456

At the request of Mr. LAUTENBERG, the name of the Senator from Massachusetts [Mr. KENNEDY] was added as a cosponsor of S. 1456, a bill to recognize the Army and Navy Union of the United States of America.

S. 1631

At the request of Mr. SIMON, the name of the Senator from New Mexico [Mr. BINGAMAN] was added as a cosponsor of S. 1631, a bill to further the national security and improve the economy of the United States by providing grants for the improvement of proficiency in critical languages, for the improvement of elementary and secondary foreign language instruction, and for per capita grants to reimburse institutions of higher education to promote the growth and improve the quality of postsecondary foreign language instruction.

S. 1640

At the request of Mr. GRASSLEY, the name of the Senator from Massachusetts [Mr. KERRY] was added as a cosponsor of S. 1640, a bill to amend title XVIII of the Social Security Act to provide for coverage under the Medicare Program of services performed by a physician assistant.

S. 1707

At the request of Mr. SIMON, the names of the Senator from Massachusetts [Mr. KERRY], and the Senator from Massachusetts [Mr. KENNEDY] were added as cosponsors of S. 1707, a bill to authorize the President to present a gold medal to the parents of Father Jerzy Popieluszko.

S. 1710

At the request of Mr. HOLLINGS, the name of the Senator from Arkansas [Mr. BUMPERS] was added as a cosponsor of S. 1710, a bill to establish a motor carrier administration in the Department of Transportation, and for other purposes.

S. 1742

At the request of Mr. TRIBLE, the name of the Senator from Pennsylvania [Mr. SPECTER] was added as a cosponsor of S. 1742, a bill to improve the enforcement of the restrictions against imported pornography.

S. 1773

At the request of Mr. LEAHY, the name of the Senator from South Carolina [Mr. HOLLINGS] was added as a cosponsor of S. 1773, a bill to express the policy of the Congress on the number of members of the Soviet mission at the United Nations headquarters.

SENATE JOINT RESOLUTION 74

At the request of Mr. THURMOND, the name of the Senator from Iowa [Mr. GRASSLEY] was added as a cosponsor of Senate Joint Resolution 74, a joint resolution to provide for the designation of the month of February 1986, as "National Black (Afro-American) History Month."

SENATE JOINT RESOLUTION 170

At the request of Mr. SIMON, the name of the Senator from Rhode Island [Mr. CHAFEE] was added as a cosponsor of Senate Joint Resolution 170, a joint resolution to designate the month of March 1986 as "Music In Our Schools Month."

SENATE JOINT RESOLUTION 190

At the request of Mr. ROTH, the name of the Senator from North Dakota [Mr. ANDREWS] was added as a cosponsor of Senate Joint Resolution 190, a joint resolution to establish greater productivity in Federal Government operations as a national goal of the United States.

SENATE JOINT RESOLUTION 208

At the request of Mr. COCHRAN, the names of the Senator from Massachusetts [Mr. KERRY], the Senator from Pennsylvania [Mr. SPECTER], the Senator from Hawaii [Mr. MATSUNAGA], and the Senator from West Virginia [Mr. ROCKEFELLER], were added as cosponsors of Senate Joint Resolution 208, a joint resolution to designate the week of October 27, 1985, through November 2, 1985, as "National Alopecia Awareness Week."

SENATE JOINT RESOLUTION 210

At the request of Mr. BENTSEN, the name of the Senator from Maine [Mr. MITCHELL], was added as a cosponsor of Senate Joint Resolution 210, a joint resolution designating the week beginning October 20, 1985, as "Benign Essential Blepharospasm Awareness Week."

SENATE CONCURRENT RESOLUTION 69

At the request of Mr. DANFORTH, the names of the Senator from New Jersey [Mr. LAUTENBERG], the Senator from Alabama [Mr. HEFLIN], and the Senator from Iowa [Mr. GRASSLEY] were added as cosponsors of Senate Concurrent Resolution 69, a concurrent resolution to recognize the National Camp Fire Organization for 75 years of service.

SENATE CONCURRENT RESOLUTION 72

At the request of Mr. SIMON, the names of the Senator from Wisconsin [Mr. PROXMIRE], the Senator from Minnesota [Mr. DURENBERGER], the Senator from Massachusetts [Mr. KERRY], the Senator from Massachusetts [Mr. KENNEDY], and the Senator from South Carolina [Mr. HOLLINGS] were added as cosponsors of Senate Concurrent Resolution 72, a concurrent resolution expressing the sense of Congress concerning human rights in Poland.

SENATE CONCURRENT RESOLUTION 76

At the request of Mr. HART, the name of the Senator from Massachusetts [Mr. KENNEDY] was added as a cosponsor of Senate Concurrent Resolution 76, a concurrent resolution asking that the President bring the rights of the Polish people to the attention of the Soviet Government.

SENATE CONCURRENT RESOLUTION 78

At the request of Mr. BRADLEY, the names of the Senator from Arizona [Mr. DECONCINI] and the Senator from Hawaii [Mr. INOUYE] were added as cosponsors of Senate Concurrent Resolution 78, a concurrent resolution in support of universal access to immunization by 1990 and accelerated efforts to eradicate childhood diseases.

SENATE CONCURRENT RESOLUTION 83—RELATING TO THE EFFECTIVE DATE OF ANY FEDERAL TAX REFORM LEGISLATION

Mr. D'AMATO (for himself, Mr. DODD, and Mrs. HAWKINS) submitted the following concurrent resolution; which was referred to the Committee on Finance:

S. RES. 83

Whereas major Federal tax reform is essential;

Whereas current proposals pending before Congress are generally effective on January 1, 1986;

Whereas final enactment of major tax reform is not likely to occur in 1985;

Whereas current Federal tax law will become uncertain between January 1, 1986 and enactment of tax reform, unless the effective date of pending tax reform proposals is extended; and

Whereas a myriad of individual and corporate economic decisions will be postponed or altered during the time between the end of the 1st session of the 99th Congress and enactment of tax reform in 1986, including, but not limited to, decision on whether to—

(1) make individual charitable contributions to philanthropic, research, and educational institutions;

(2) offer employer provided fringe benefits to employees that are tax-free under current law, but may become taxable to the employee and require FICA contributions by the employee and employer;

(3) sell stocks, bonds, or other investments qualifying for capital gains taxation;

(4) invest in plant and equipment which may or may not qualify for accelerated depreciation and the investment tax credit, or which may be subject to recapture of tax benefits;

(5) develop real estate reliant on tax-exempt bonds, depreciation, at-risk rules, and rehabilitation tax credits; and

(6) issue general obligation and industrial development bonds essential to the smooth functioning of State and local governments: Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring), That it is the sense of the Congress that no provision of, and no amendment made by, any Federal tax reform legislation based on the President's tax reform proposal submitted to the Congress on May 29, 1985, shall—

(1) take effect before its date of enactment, but in no case earlier than July 1, 1986, and

(2) apply to transactions occurring after its date of enactment, pursuant to a binding contract in effect prior to its date of enactment, and at all time thereafter.

● Mr. D'AMATO. Mr. President, I rise today to reiterate my support for Federal tax reform. I believe it is absolutely imperative that we both simplify the Federal Tax Code and increase its equity and fairness. I hope Congress can pass such legislation in the 99th Congress.

Nevertheless, it is increasingly apparent that Congress is unlikely to complete action on tax reform in 1985. This creates a series of problems, because most tax reform proposals pending in Congress would generally take effect on January 1, 1986.

For instance, nonprofit entities—confronted with uncertainty over the tax consequences of charitable contributions—will have serious difficulty raising money in 1986. Under current law, nonitemizers can fully deduct contributions made to nonprofit institutions. Under Treasury II, however, the charitable deduction for nonitemizers would be repealed effective January 1, 1986. If tax reform is not enacted or is eventually made effective in mid-1986, then institutions such as colleges and universities will have lost precious fundraising opportunties beginning on January 1, 1986.

Is this fair to colleges, universities, and other nonprofit entities? Absolutely not.

Another example of this distortion of economic activity, which will result from coupling a January 1, 1986, effective date with mid-1986 passage of the tax bill, is the effect retroactivity will have on the issuing of Government obligation bonds. Many State and local governments that want to issue general obligation bonds after January 1, 1986, will be forced to postpone these issues—or to rush to market this year. Even if a bond issue is completely appropriate under current law, the threat of tax reform being enacted during 1986 with a retroactive effective date would kill the deal.

Why? Because the Treasury's tax plan would make many general obligation bonds taxable effective January 1, 1986. No investor will dare buy a tax-exempt bond that may become taxable on a later date.

Is this fair to State and local governments? It is not.

After January 1, 1986, the current Federal Tax Code will, in a sense, become irrelevant. Individuals, nonprofit entities, and corporations will not know whether to abide by current law or by the proposed tax reform legislation. In the end, many economic transactions will be postponed until tax reform is enacted or is indefinitely laid aside.

From real estate development to employer-provided health benefits, the whole economy will be left in limbo unless action is taken to resolve this situation. Therefore, Congress must state clearly before adjournment in 1985 that the effective date of major tax reform will not be January 1, 1986.

Thus, Mr. President, I am submitting this concurrent resolution expressing the sense of the Congress that any major tax reform legislation should generally be effective on its date of enactment, but in no case earlier than July 1, 1986. My resolution, if passed, would allow the marketplace to continue to operate somewhat smoothly while Congress continues to debate tax reform in 1986.

Mr. President, support of my concurrent resolution is support for an effective marketplace. This concurrent resolution is not an expression of support or opposition for either tax reform, in general, or for any one specific tax reform plan.

My concurrent resolution is just plain common sense. Individuals and companies should be allowed to operate freely under current law until that time when tax reform is enacted. It is my hope, therefore, that Congress take action on this important concurrent resolution before we adjourn this year. To do otherwise would be grossly irresponsible.●

● Mrs. HAWKINS. Mr. President, the concurrent resolution that I am sponsoring today with my colleague from New York, Mr. D'AMATO and my colleague from Connecticut, Mr. DODD, is an important one.

It is quite obvious, I believe, that Congress will adjourn this year without enacting tax reform legislation. With current proposals having an effective date of January 1, 1986, investment is almost certain to dry up between January 1 and the date legislation is finally adopted (if it is adopted). Even now, with tax reform only pending, some investment has come to a screeching halt. This type of financial freeze is totally unacceptable to this Senator and I want to send a clear, definite message to Americans so that they will know where they stand.

I have received numerous phone calls from Floridians who are radically affected by the pending proposals and have requested a sign from Congress indicating our intentions. One man in particular has invested $800,000 in a project, but due to the uncertainty of tax reform, the financial arrangements for his project are pending the outcome of tax reform legislation.

This concurrent resolution is clearly warranted. The debate on tax reform is far from over and already people are losing money because deals are suddenly frozen. This is not only unfair, but it is unwise for the Congress to force investors to play a guessing game.

The real estate industry is an example of just one industry that is suffering from the mere proposal of tax reform. The proposed changes in depreciation for both real property and personal property and the extension of the at-risk rules to real estate could have a drastic effect on this industry. These are very controversial proposals that could take literally months to resolve, but until they are resolved, much of the real estate sector is in limbo, unable to close many of its deals.

The concurrent resolution we are submitting today is designed to keep America's investment moving. We are trying to indicate to those who have proceeded under the current set of rules that they can continue to do so,

and that any changes will not be effective on January 1, 1986, but rather July 1, 1986, when the bill is more likely to be finalized. Too many times we have changed the rules on people in the middle of the game. I think it is time that we started playing fair, and set a prospective rather than retroactive effective date to any tax reform legislation that is adopted.

I urge my colleagues to join us in this effort and hope the Senate will act on this measure without delay.●

SENATE RESOLUTION 245—TO IMPROVE SENATE PROCEDURES

Mr. BYRD submitted the following resolution; which was referred to the Committee on Rules and Administration:

S. RES. 245

Resolved, That (a) the Senate hereby authorizes and directs that there be both television and radio broadcast coverage (together with videotape and audio recordings) of proceedings in the Senate Chamber.

(b) Such broadcast coverage shall be—

(1) provided in accordance with provisions of this resolution;

(2) provided continuously except for any time when a meeting with closed doors is ordered; and

(3) provided that during any television and/or radio broadcasts, time shall be divided and controlled in such way as to assure equal time to both the Majority and Minority Parties; and

(4) provided subject to the provisions pertaining to the Senate gallery contained in the following Standing Rules of the Senate: rule XIX, paragraphs 6 and 7; rule XXV, paragraph 1(n); and rule XXXIII, paragraph 2; and

(5) provided that the Senate shall be in session on Mondays, Tuesdays, and Thursdays, with committee meetings scheduled on days and/or times the Senate is not to be in session.

SEC. 2. The radio and televison broadcast of Senate proceedings shall be—

(a) supervised and operated by the Senate, and

(b) made available on a "live" basis and free of charge to (1) any accredited member of the Senate Radio and Television Correspondents Gallery, (2) the coaxial cable system of the Architect of the Capitol, and (3) such other news gathering, educational, or information distributing entity as may be authorized by the Committee on Rules and Administration to receive such broadcasts.

SEC. 3. The television broadcast of Senate proceedings shall follow the Presiding Officer and Senators who are recognized to speak by the Presiding Officer (including Senators who are so recognized with the consent of another Senator to interrupt such other Senator).

SEC. 4. (a) The broadcast coverage by radio and television of the proceedings of the Senate shall be implemented as provided in this section.

(b) The Architect of the Capitol, in consultation with the Sergeant at Arms and Doorkeeper of the Senate, shall—

(1) construct necessary broadcasting facilities for both radio and television (including a control room and the modification of Senate sound and lighting fixtures);

(2) employ necessary expert consultants; and

(3) acquire and install all necessary equipment and facilities to (A) produce a broadcast-quality "live" audio and color video signal of such proceedings, and (B) provide an archive-quality audio and color video tape recording of such proceedings:

Provided, That the Architect of the Capitol, in carrying out the duties specified in clauses (1) through (3) of this subsection, shall not enter into any contract for the purchase or installation of equipment, for the employment of any consultant, or for the provision of training to any person, unless the same shall first have been approved by the Committee on Rules and Administration.

(c) The Sergeant at Arms and Doorkeeper of the Senate shall (1) employ such staff as may be necessary, working in conjunction with the Senate Recording and Photographic Studios, to operate and maintain all broadcast audio and color video equipment installed pursuant to this resolution, (2) make audio and video tape recordings of Senate proceedings, (3) make copies of such recordings available, upon payment to him of a fee fixed therefor by the Committee on Rules and Administration, to Members of the Senate and to each person described in subsection (b) (1) and (3) of section 2 of this resolution, and (4) retain for ninety days after the day any Senate proceedings took place, such recordings thereof, and as soon thereafter as possible, transmit to the Librarian of Congress and to the Archivist of the United States copies of such recordings: Provided, That the Sergeant at Arms and Doorkeeper of the Senate, in carrying out the duties specified in clauses (1) and (2) of this subsection, shall comply with appropriate Senate procurement and other regulations.

(d) The Librarian of Congress and the Archivist of the United States shall each receive, store, and make available to the public, at no cost for viewing or listening on the premises where stored and upon payment of a fee equal to the cost involved through distribution of taped copies, recordings of Senate proceedings transmitted to them by the Sergeant at Arms and Doorkeeper of the Senate.

SEC. 5. (a) As soon as practicable after the necessary equipment has been installed, there shall begin a test period during which tests of radio and television coverage of Senate proceedings shall be conducted by the staffs of the Committee on Rules and Administration and of the Office of the Sergeant at Arms and Doorkeeper of the Senate. Such test period shall end on such date as may be agreed upon by the majority leader, the minority leader, the chairman of the Committee on Rules and Administration, and the ranking minority member of such committee.

(b) During such test period—

(1) final procedures for camera direction control shall be established;

(2) coverage of Senate proceedings shall not be transmitted to any outside source; and

(3) recordings of Senate proceedings shall be made and retained by the Sergeant at Arms and Doorkeeper of the Senate.

SEC. 6. The use of tape duplications of broadcast coverage of the proceedings of the Senate for political or commercial purposes is strictly prohibited; and any such tape duplication furnished to any person shall be made on the condition that it not be used for political or commercial purposes.

SEC. 7. Any changes in the regulations made by this resolution shall be made only by Senate resolution. However, the Committee on Rules and Administration may adopt such procedures and such regulations, which do not contravene the regulations made by this resolution, as it deems necessary to assure the proper implementation of the purposes of this resolution.

SEC. 8. Such funds as may be necessary (but not in excess of $2,500,000) to carry out this resolution shall be expended from the contingent fund of the Senate.

SEC. 9. Rule XXVI, paragraph 7.(a)(1), is amended to read as follows:

"7. (a)(1) Except as provided in this paragraph, each committee, and each subcommittee thereof is authorized to fix the number of its members (but not less than one-third of its entire membership) who shall constitute a quorum thereof for the transaction of such business as may be considered by said committee, except that no measure or matter or recommendation shall be reported from any committee unless a majority of the committee are physically present, and no report or legislative or executive measure or matter from a committee shall be accepted at the desk except on the representation of the committee chairman that it was not reported by polling.".

SEC. 10. Rule XXX, paragraph 1(b), is amended to read as follows:

"(b) When a treaty is reported from a committee with or without amendment, it shall, unless the Senate unanimously otherwise direct, lie over one day for consideration; after which it may be read a second time, after which amendments may be proposed. At any stage of such proceedings the Senate may remove the injunction of secrecy from the treaty."

SEC. 11. Rule XII, paragraph 1, is amended by striking the first clause thereof and inserting in lieu thereof the following:

"Except as pr~vided in subparagraph 5 of this rule, when the yeas and nays are ordered,".

SEC. 12. Rule XII is amended by adding at the end thereof the following new paragraphs:

"5. Whenever the Majority Leader, with concurrence of the Minority Leader, shall determine, the names and Senators voting upon any roll call shall be recorded by electronic device. Senators shall have not more than fifteen minutes from the beginning of the roll call to have their vote recorded.

"6. The Majority Leader, with concurrence of the Minority Leader, may announced that any recorded vote that is scheduled to or does occur immediately after another recorded vote shall be no longer than five minutes in duration.".

SEC. 13. Paragraph 4 of rule XVI of the Standing Rules of the Senate is amended—

(1) by inserting "(a)" after "4"; and

(2) by adding at the end of such paragraph the following new subparagraph:

"(b) If a point of order is made by any Senator against an amendment to a general appropriations bill on the ground that such amendment proposes general legislation or proposes a limitation or restriction not authorized by law and is to take effect or cease to be effective upon the happening of a contingency, it shall not be in order to raise the defense of germaneness unless there is House legislative language on that subject contained in the bill.".

SEC. 14. Rule XVII, par. 5, of the Standing Rules of the Senate is amended to read as follows:

"5. Any measure or matter reported by any standing committee shall not be considered in the Senate unless the report of that committee upon that measure or matter has been available to Members for at least two calendar days (excluding Sundays and legal holidays) prior to the consideration of that measure or matter. If hearings have been held on any such measure or matter so reported, the committee reporting the measure or matter shall make every reasonable effort to have such hearings printed and available for distribution to the Members of the Senate prior to the consideration of such measure or matter in the Senate. This paragraph—

"(1) may be waived by joint agreement of the Majority Leader and the Minority Leader of the Senate, and

"(2) shall not apply to—

"(A) any measure for the declaration of war, or the declaration of a national emergency, by the Congress, and

"(B) any executive decision, determination, or action which would become, or continue to be, effective unless disapproved or otherwise invalidated by one or both Houses of Congress.".

SEC. 15. Rule XV of the Standing Rules of the Senate is amended—

(1) by inserting after "Motions" in the caption a semicolon and the following: "GERMANENESS";

(2) by adding at the end thereof the following new paragraph:

"6. (a) At any time during the consideration of a bill or resolution, it shall twice be in order during a calendar day to wave that no amendment, other than the reported committee amendments, which is not germane or relevant to the subject matter of the bill or resolution, or to the subject matter of an amendment proposed by the committee which reported the bill or resolution, shall thereafter be in order. The motion shall be privileged and shall be decided after one hour of debate, without intervening action, to be equally divided and controlled by the Majority Leader and the Minority Leader or their designees.

"(b) If a motion made under subparagraph (a) is agreed to by an affirmative vote of three-fifths of the Senators present and voting, then any floor amendment not already agreed to (except amendments proposed by the Committee which reported the bill or resolution) which is not germane or relevant to the bill or resolution, or the subject matter of an amendment proposed by the committee which reported the bill or resolution, shall not be in order.

"(c) When a motion made under subparagraph (a) has been agreed to as provided in subparagraph (b) with respect to a bill or resolution, points of order with respect to questions of germaneness or relevancy of amendments shall be decided without debate, except that the Presiding Officer may entertain debate for his own guidance prior to ruling on the point of order. Appeals from the decision of the Presiding Officer on such points of order shall be decided without debate.

"(d) Whenever an appeal is taken from a decision of the Presiding Officer on the question of germaneness of an amendment, or whenever the Presiding Officer submits the question of germaneness or relevancy of an amendment to the Senate, the vote necessary to overturn the decision of the Presiding Officer or hold the amendment germane or relevant shall be two-thirds of the Senators present and voting. No amendment proposing sense of the Senate or sense of the Congress language that does not directly relate to the measure or matter before the Senate shall be considered germane.".

SEC. 16. Paragraph 2 of Rule XXII of the Standing Rules of the Senate is amended to read as follows:

"2. Notwithstanding the provisions of Rule II or Rule IV or any other rule of the Senate, at any time a motion signed by sixteen Senators, to bring to a close the debate upon any measure, motion, other matter pending before the Senate, or the unfinished business, is presented to the Senate, the Presiding Officer, or clerk at the direction of the Presiding Officer, shall at once state the motion to the Senate, and one hour after the Senate meets on the following calendar day but two, he shall lay the motion before the Senate and direct that the clerk call the roll, and upon the ascertainment that a quorum is present, the Presiding Officer shall, without debate, submit to the Senate by a yea-and-nay vote the question.

"Is it the sense of the Senate that the debate shall be brought to a close?

"And if that question shall be decided in the affirmative by two-thirds of the Senators present and voting—except on a measure or motion to amend the Senate rules, in which case the necessary affirmative vote shall be two-thirds of the Senators duly chosen and sworn—then said measure, motion, or other matter pending before the Senate, or the unfinished business, shall be the unfinished business to the exclusion of all other business until disposed of.

"Except by unanimous consent, no amendment shall be proposed after the vote to bring the debate to a close, unless it had been submitted in writing to the Journal Clerk by 1 o'clock p.m. on the day following the filing of the cloture motion if a complete substitute, and by 1 o'clock p.m. two days following the filing of the cloture motion if an amendment in the first degree, or beginning of the cloture vote if an amendment in the second degree. No dilatory motion, or dilatory amendment, or amendment not germane shall be in order. Points of order, including questions of relevancy, and appeals from the decision of the Presiding Officer, shall be decided without debate. Whenever an appeal is taken under this rule from a decision of the Presiding Officer on the question of germaneness of an amendment, the vote necessary to overturn the decision of the Presiding Officer shall be two-thirds of the Senators, present and voting.

"After no more than twenty hours of consideration of the measure, motion, or other matter on which cloture has been invoked, the time to be equally divided and controlled by the Majority and Minority Leaders or their designees, the Senate shall proceed, without any further debate on any question, to vote on the final disposition thereof to the exclusion of all amendments not then actually pending before the Senate at that time and to the exclusion of all motions, except a motion to table, or to reconsider and one quorum call on demand to establish the presence of a quorum (and motions required to establish a quorum) immediately before the final vote begins.

"If, for any reason, a measure or matter is reprinted after cloture has been invoked, amendments which were in order prior to the reprinting of the measure or matter will continue to be in order and may be conformed and reprinted at the request of the amendment's sponsor. The conforming changes must be limited to lineation and pagination.

"No Senator shall call up more than two amendments until every other Senator shall have had the opportunity to do likewise.".

AMENDMENTS SUBMITTED

AGRICULTURE, FOOD, TRADE, AND CONSERVATION ACT

PRESSLER (AND ABDNOR) AMENDMENT NO. 886

Mr. PRESSLER (for himself and Mr. ABDNOR) proposed an amendment to the bill (S. 1714) to expand export markets for United States agricultural commodities, provide price and income protection for farmers, assure consumers an abundance of food and fiber at reasonable prices, continue food assistance to low-income households, and for other purposes; as follows:

On page 459, between lines 18 and 19, insert the following:

IMPORTATION OF LIVESTOCK AND MEAT

SEC. 1927. Section 20 of the Federal Meat Inspection Act (20 U.S.C. 620) is amended by adding at the end thereof the following new subsection:

"(g) The Secretary may prohibit the importation into the United States of—

"(1) any livestock, or

"(2) any carcass, meat, or meat products of any livestock,

if the Secretary determines that such livestock may have been administered any drug (including any antibiotic drug) which has been banned for use in livestock in the United States: *Provided*, That

"(A) the Secretary determines that residues of that particular drug (including any antibiotic drug) threaten the health and safety of U.S. consumers;

"(B) the use of that particular drug (including any antibiotic drug) gives foreign producers of livestock an unfair competitive advantage over U.S. producers.".

PRESSLER AMENDMENT NO. 887

Mr. PRESSLER proposed an amendment to the bill S. 1714, supra; as follows:

On page 130, after line 22, insert the following:

STUDY OF OAT IMPORTS

SEC. 503. (a) The Secretary of Agriculture shall conduct a study of the impact on domestic farm programs of the increased importation of oats into the United States.

(b) By no later than 1 year after the date of enactment of this Act, the Secretary of Agriculture shall submit to the Congress a report on the study conducted under subsection (a).

PRESSLER AMENDMENT NOS. 888 AND 889

(Ordered to lie on the table.)

Mr. PRESSLER submitted two amendments intended to be proposed by him to the bill S. 1714, supra; as follows:

AMENDMENT No. 888

On page 114, strike out lines 20 and 21 and insert in lieu thereof the following:

"(E) The established price for corn shall be not less than—

"(I) $3.13 per bushel for any quantity of corn not in excess of 10,000 bushels,

"(II) $2.98 per bushel for any quantity of corn in excess of 10,001 bushels, but not in excess of 20,000 bushels, and

"(III) $2.83 per bushel for any quantity of corn in excess of 20,001 bushels.".

On page 88, strike out lines 18 through 23 and insert in lieu thereof the following:

"(E) The established price for wheat shall not be less than—

"(I) $4.48 per bushel for any quantity of wheat not in excess of 7,500 bushels.

"(II) $4.33 per bushel for any quantity of wheat in excess of 7,501 bushels, but not in excess of 15,000 bushels, and

"(III) $4.18 per bushel for any quantity of wheat in excess of 15,001 bushels.".

AMENDMENT No. 889

At the end of section 206, after line 20, insert the following new section:

SEC. 207. For purposes of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 321 et seq.), any food which is an imitation of cheese and which does not comply with any standard of identity in effect under section 401 of such Act for any cheese shall be deemed to be misbranded if its label contains the word "cheese".

DIXON AMENDMENT NO. 890

Mr. DIXON proposed an amendment to the bill S. 1714, supra; as follows:

On page 459, between lines 18 and 19, insert the following new section:

TRANSFER OF AGRICULTURAL PRODUCTS STORED IN WAREHOUSES

SEC. . Section 17 of the United States Warehouse Act (7 U.S.C. 259) is amended—

(1) by striking out "That" and inserting in lieu thereof "(a) Except as provided in subsection (b),"; and

(2) by adding at the end thereof the following new subsection:

"(b)(1) Notwithstanding any other provision of this Act, if a warehouseman lacks sufficient space to store the agricultural products of all depositors in a licensed warehouse, the warehouseman may, in accordance with regulations issued by the Secretary of Agriculture and subject to such terms and conditions as the Secretary may prescribe, transfer stored agricultural products for which receipts have or have not been issued out of such warehouse to another licensed warehouse for continued storage.

"(2) The warehouseman of a licensed warehouse to which agricultural products have been transferred under paragraph (1) shall deliver to the rightful owner of such products, on request, at the licensed warehouse where first deposited, such products in the amount, and of the kind, quality, and grade, called for by the receipts or other evidence of storage of such owner.".

MATTINGLY (AND NICKLES) AMENDMENT NO. 891

Mr. MATTINGLY (for himself and Mr. NICKLES) proposed an amendment to the bill S. 1714, supra; as follows:

On page 30 of the bill, strike lines 16 through line 24, and insert in lieu thereof the following: "Corporation shall, to the maximum extent practicable and with the approval of the Secretary of Agriculture, make available annually to the Secretary of Energy, upon the request of the Secretary of Energy a quantity of agricultural products owned by the Corporation with a market value at the time of such request of at least $300,000,000 for use by the Secretary of Energy in acquiring petroleum products (including crude oil) produced abroad for placement in the Strategic Petroleum Reserve through an exchange of such agricultural products. The terms and conditions of each such exchange shall be determined by the Secretary of Energy in consultation with the Secretary of Agriculture: *Provided* That if the volume of agricultural products to be exchanged has a value in excess of the then established market price of the petroleum products (including crude oil) acquired by such exchange, then the Secretary of Energy shall require as a part of the terms and conditions of the exchange that the party or entity providing such petroleum products shall agree to purchase, within six months following the exchange, current-crop commodities or value-added food products from United States producers or processors in an amount equal to at least one-half of the difference between the value of the commodities received in the exchange and the market price of the petroleum products acquired for the Strategic Petroleum Reserve in such transaction.".

GORE (AND OTHERS) AMENDMENT NO. 892

Mr. GORE (for himself, Mr. BINGAMAN, and Mr. GRASSLEY) proposed an amendment to the bill S. 1714, supra; as follows:

On page 459, between lines 18 and 19, insert the following new section:

TOBACCO PESTICIDE RESIDUES

SEC. . (a) Section 213 of the Dairy and Tobacco Adjustment Act of 1983 (7 U.S.C. 511r) is amended by adding at the end thereof the following new subsection:

"(e)(1) Notwithstanding any other provision of law, any tobacco offered for importation into the United States shall be accompanied by a certification by the importer, in such form as the Secretary of Agriculture shall prescribe, that the tobacco has not been produced or processed with the use of a pesticide that is not registered under the Federal Insecticide, Fungicide, and Rodenticide Act (7 U.S.C. 135 et seq.).

"(2) Any tobacco that is not accompanied by the certification required by paragraph (1) shall not be permitted entry into the United States.

"(3) The Secretary, to such extent and at such times as the Secretary determines appropriate, shall sample and test tobacco offered for importation on entry into the United States to determine whether that tobacco conforms with the certification required under this subsection.

"(4) The Secretary shall by regulation provide that domestically produced tobacco is subject to substantially the same requirements with respect to residues of any pesticide as apply to tobacco offered for importation.

"(5)(A) Subject to subparagraph (B), if the Secretary determines that Flue-cured or Burley tobacco does not meet the requirements of this section, such tobacco may not be moved in commerce among the States and shall be destroyed by the Secretary.

"(B) This paragraph shall apply only to tobacco produced after the date of enactment of this provision that receives price support under the Agricultural Adjustment Act of 1938 (7 U.S.C. 1281 et seq.) or the Agricultural Act of 1949 (7 U.S.C. 1421 et seq.).".

(b)(1) The second sentence of section 213(c) of such Act is amended by striking out "such subsection" and inserting in lieu thereof "this section".

(2) The second sentence of section 213(d) of such Act is amended by inserting "and subsection (e)" after "subsection (a)(1)".

PROXMIRE AMENDMENT NO. 893

Mr. PROXMIRE proposed an amendment to the bill S. 1714, supra; as follows:

On page 445, beginning on line 10, strike out the comma after "57,067,300" and all that follows through "necessary" on line 12.

ANDREWS AMENDMENT NO. 894

Mr. ANDREWS proposed an amendment to the bill S. 1714, supra; as follows:

PROPOSED AMENDMENT TO EXEMPT REA FINANCED ELECTRIC AND TELEPHONE SYSTEMS FROM ELIGIBILITY RESTRICTIONS ON BORROWING FROM THE BANKS FOR COOPERATIVES

SEC. . Section 3.8 of the Farm Credit Act of 1971 (12 U.S.C. 2129) is amended by—

(1) inserting "(1)" immediately before "Any association"; and

(2) adding at the end thereof a new subsection (2) as follows:

"(2) Notwithstanding any other provision of this title, cooperatives and other entities which have received a loan, loan commitment, or loan guarantee from the Rural Electrification Administration, or a loan or loan commitment from the Rural Telephone Bank, or which have been certified by the Administrator of the Rural Electrification Administration to be eligible for such a loan, loan commitment, or loan guarantee, and subsidiaries of such cooperatives or other entities, shall also be eligible to borrow from a bank for cooperatives."

KASSEBAUM-DOLE AMENDMENT NO. 895

Mrs. KASSEBAUM (for herself and Mr. DOLE) proposed an amendment to the bill S. 1714, supra, as follows:

On page 459, between lines 18 and 19, insert the following new section:

NATIONAL AGRICULTURAL COST OF PRODUCTION STANDARDS REVIEW BOARD

SEC. . (a) Subsection (c) of section 1006 of the Agriculture and Food Act of 1981 (7 U.S.C. 4102(c)) is amended to read as follows:

"(c) A person may serve as a member of the Board for one or more terms.".

(b) Section 1014 of such Act (7 U.S.C. 4110) is amended by striking out "1985" and inserting in lieu thereof "1989".

KASSEBAUM (AND OTHERS) AMENDMENT NO. 896

Mrs. KASSEBAUM (for herself, Mr. DOLE, Mr. NICKLES, and Mr. BOREN) proposed an amendment to the bill S. 1714, supra, as follows:

On page 459, between lines 18 and 19, insert the following new section:

NEW GRAIN CLASSIFICATIONS

SEC. . (a) The Secretary of Agriculture shall direct the Federal Grain Inspection Service and the Agricultural Research Service to cooperate in developing new means of establishing grain classifications taking into account characteristics other than those visually evident.

(b) The Secretary shall report to the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate, semiannually, with the first report due not later than December 31, 1985, on the status of cooperative efforts required under subsection (a), as such efforts relate to more accurately classifying types of wheat and other grains currently in use.

HATCH-KENNEDY AMENDMENT NO. 897

Mr. HELMS for Mr. HATCH (for himself and Mr. KENNEDY) proposed an amendment to the bill S. 1714, supra, as follows:

On page 311, line 21, insert "and the Secretary of Health and Human Services" after "Secretary".

On page 312, line 1, insert "and the Secretary of Health and Human Services" after "Secretary".

On page 312, line 4, insert "and the Secretary of Health and Human Services" after "Secretary".

On page 312, line 8, insert "and the Secretary of Health and Human Services" after "Secretary".

On page 312, line 9, insert "and the Secretary of Health and Human Services" after "Secretary".

On page 312, line 11, strike out "the Secretary considers" and insert "such Secretaries consider".

On page 312, line 13, strike out "Secretary shall submit to the Committee" and insert "Secretary and the Secretary of Health and Human Services shall submit to the Committees".

On page 312, line 14, insert "and Energy and Commerce" after "Agriculture".

On page 312, lines 14 and 15, strike out "Committee" and insert "Committees".

On page 312, line 15, insert "and Labor and Human Resources" after "Forestry".

On page 312, line 16, strike out "Secretary" and insert in lieu thereof "Secretaries".

HATCH-KENNEDY AMENDMENT NO. 898

Mr. HELMS for Mr. HATCH (for himself and Mr. KENNEDY) proposed an amendment to the bill S. 1714, supra, as follows:

On page 310, line 10, insert "and the Secretary of Health and Human Services" after "Secretary".

On page 310, line 16, insert "and the Secretary of Health and Human Services" after "Secretary".

On page 310, line 19, insert "and the Secretary of Health and Human Services" after "Secretary".

On page 311, line 2, insert "and the Secretary of Health and Human Services" before the period.

On page 311, line 3, insert "and the Secretay of Health and Human Services" after "Secretary".

On page 311, line 5, strike out "the Secretary considers" and insert "such Secretaries consider".

On page 311, line 8, strike out "Secretary shall submit to the Committee" and insert "Secretary and Secretary of Health and Human Services shall submit to the Committees".

On page 311, line 9, insert "and Energy and Commerce" after "Agriculture".

On page 311, lines 9 and 10, strike out "Committee" and insert "Committees".

On page 311, line 10, insert "and Labor and Human Resources" after "Forestry".

On page 311, line 11, insert "and the Secretary of Health and Human Services" after "Secretary".

ABDNOR AMENDMENT NOS. 899 THROUGH 903

(Ordered to lie on the table.)

Mr. ABDNOR submitted five amendments intended to be proposed by him to the bill S. 1714, supra; as follows:

AMENDMENT NO. 899

On page 459, between lines 18 and 19, insert the following new subtitle:

Subtitle D—Grain Inspection

GRAIN STANDARDS

SEC. 1930. Section 4 of the United States Grain Standards Act (7 U.S.C. 76) is amended by adding at the end thereof the following new subsections:

"(c) If the Government of any country requests that moisture content remain a criterion in the official grade designations of grain, such criterion shall be included in determining the official grade designation of grain shipped to such country.

"(d) The Administrator shall issue regulations establishing a new grade for each type of grain that exceeds the standards in effect on September 30, 1985, for United States No. 1 grade of such grain.".

IMPROVED QUALITY STANDARDS FOR EXPORTED GRAIN

SEC. 1931. Section 6 of the United States Grain Standards Act (7 U.S.C. 78) is amended by adding at the end thereof the following new subsection:

"(c)(1) Subject to paragraphs (2) and (3), to protect the quality of grain exported from the United States—

"(A) no dockage or foreign material (including but not limited to dust or particles of whatever origin) once removed from grain shall be recombined with any grain if there is a possibility that the recombined product may be exported from the United States; and

"(B) no dockage or foreign material of any origin may be added to any grain that may be exported if the result will reduce the ability of the grain to resist spoilage.

"(2) Nothing in paragraph (1) shall be construed to prohibit—

"(A) the treatment of grain to suppress, destroy, or prevent insects and fungi injurious to stored grain;

"(B) the export of dockage or foreign material removed from grain if such dockage or foreign material is pelletized or a part of a processed ration for livestock, poultry, or fish and is exported separately and uncombined with any whole grain;

"(C) the blending of grain with similar grain of a different grade to adjust the quality of the resulting mixture;

"(D) the addition to grain of confetti, or any other material that serves the same purpose, in an amount necessary to facilitate identification of ownership or origin of a particular lot of grain; and

"(E) the addition of any other foreign material that may be determined by the Secretary to be in the interest of grain producers and to be neutral or constructive in achieving the goal of protecting the quality of grain exported from the United States.

"(3)(A) Except as provided in subparagraph (B), adjustment of the moisture content of grain that may be exported is permitted by the blending of such grain with a similar grain of different moisture content if the difference between the moisture contents of the grains being blended does not exceed 4 percent.

"(B) The addition of water to grain that may be exported is prohibited except by aeration of such grain with natural air.".

NEW GRAIN CLASSIFICATIONS

SEC. 1932. (a) The Secretary of Agriculture shall direct the Federal Grain Inspection Service and the Agricultural Research Service to cooperate in developing new means of establishing grain classifications taking into account characteristics other than those visually evident.

(b) Not later than December 31, 1985, the Secretary shall report to the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate on the status of cooperative efforts required under subsection (a), as such efforts relate to more accurately classifying types of wheat and other grains currently in use.

AMENDMENT NO. 900

On page 459, between lines 18 and 19, add the following new section:

RESTRICTION ON PUBLICATION OF CROP AND LIVESTOCK REPORTS

SEC. 1927. Notwithstanding any other provision of law, the Secretary of Agriculture may not, more than once during any consecutive twelve-month period, publish or otherwise provide for the public dissemination of any information which projects or forecasts the supply, demand, or price for any particular agricultural commodity.

AMENDMENT NO. 901

On page 376, beginning with line 19, strike out all down through line 20 on page 377 and insert in lieu thereof the following:

SEC. 1718. (a) The Governor of the Federal Reserve System, in consultation with the Secretary of Agriculture and the Governor of the Farm Credit System shall conduct a study of methods to ensure the availability of adequate credit, on reasonable terms and conditions, for farmers of the United States.

(b) In conducting such study, the Governor of the Federal Reserve System shall—

(1) evaluate the financial circumstances relative to both lenders and borrowers of farm credit; and

(2) evaluate the structure, performance, and conduct of the Farm Credit System.

(c) Not later than 180 days after the date of enactment of this Act, the Governor of the Federal Reserve System shall submit to the Committee on Agriculture, Nutrition, and Forestry of the Senate and the Committee on Agriculture of the House of Representatives a report containing the results of the study provided for in this section together with such comments and recommendations for providing a sound and reasona-

ble credit program for farmers as the Governor considers appropriate.

AMENDMENT No. 902

On page 71, line 22, strike out "one" and insert in lieu thereof "three".

On page 80, line 5, strike out "one" and insert in lieu thereof "three".

AMENDMENT No. 903

On page 13, line 10, insert "(1)" after "(b)".

On page 13, line 13, insert "(adjusted in accordance with paragraph (2))" after "$5,000,000,000".

On page 13, between lines 17 and 18, insert the following:

(2) The minimum amount that the Commodity Credit Corporation shall make available in credit guarantees under its export credit guarantee program for short-term credit under paragraph (1) shall be adjusted by the Secretary of Agriculture on October 1, 1986 by such amount as is necessary to reflect any increase during the preceding fiscal year in the exchange rate of the United States dollar against other major currencies (as determined under regulations prescribed by the Secretary of the Treasury). Such an adjustment shall also be made on October 1, 1987, October 1, 1988, and on October 1, 1989, to reflect any increase in the preceding fiscal year in such exchange rate and the adjustment on each such date shall be cumulative from the adjustment made the preceding year.

DOLE (AND OTHERS) AMENDMENT NO. 904

Mr. DOLE (for himself, Mr. HEINZ, Mr. ROTH, Mr. STEVENS, Mr. LEAHY, Mr. COHEN, Mr. STAFFORD, Mr. MATSUNAGA, Mr. BINGAMAN, Mr. ZORINSKY, Mr. GORTON, Mr. D'AMATO, Mr. BURDICK, Mr. KASTEN, Mr. PROXMIRE, Mr. SIMON, Mr. FORD, Mr. DURENBERGER, Mr. BAUCUS, Mr. DOMENICI, Mr. SPECTER, Mr. CHAFEE, Mr. PELL, Mr. GOLDWATER, Mr. BOSCHWITZ, Mr. MOYNIHAN, Mr. MURKOWSKI, Mr. MITCHELL, Mr. WILSON, Mr. STENNIS, Mr. HUMPHREY, Mr. HECHT, Mr. BUMPERS, Mr. CRANSTON, Mr. METZENBAUM, and Mr. MATTINGLY) proposed an amendment to the bill S. 1714, supra, as follows:

At the end of the bill insert the following:

TITLE .—AMENDMENTS TO ANIMAL WELFARE ACT

SEC. . This title may be cited as the "Improved Standards for Laboratory Animals Act".

FINDINGS

SEC. . The Congress finds that—

(1) the use of animals is instrumental in certain research and education for advancing knowledge of cures and treatments for diseases and injuries which afflict both humans and animals;

(2) methods of testing that do not use animals are being and continue to be developed which are faster, less expensive, and more accurate than traditional animal experiments for some purposes and further opportunities exist for the development of these methods of testing;

(3) measures which eliminate or minimize the unnecessary duplication of experiments on animals can result in more productive use of Federal funds; and

(4) measure which help meet the public concern for laboratory animal care and treatment are important in assuring that research will continue to progress.

STANDARDS AND CERTIFICATION PROCESS

SEC. . (a) Section 13 of the Animal Welfare Act (7 U.S.C. 2143) is amended—

(1) by redesignating subsections (b) through (d) as subsections (f) through (h), respectively; and

(2) by striking out the first two sentences of subsection (a) and inserting in lieu thereof the following:

"(1) The Secretary shall promulgate standards to govern the humane handling, care, treatment, and transportation of animals by dealers, research facilities, and exhibitors.

"(2) The standards described in paragraph (1) shall include requirements—

"(A) for handling, housing, feeding, watering, sanitation, ventilation, shelter from extremes of weather and temperatures, adequate veterinary care, and separation by species where the Secretary finds necessary for humane handling, care, or treatment of animals; and

"(B) for exercise of dogs and primates.

"(3) In addition to the requirements under paragraph (2), the standards described in paragraph (1) shall, with respect to animals in research facilities, include requirements—

"(A) for animal care, treatment, and practices in experimental procedures to ensure that animal pain and distress are minimized, including adequate veterinary care with the appropriate use of anesthetic, analgesic, tranquilizing drugs, or euthanasia:

"(B) that the principal investigator considers alternatives to any procedure likely to produce pain to or distress in an experimental animal;

"(C) in any practice which could cause pain to animals—

"(i) that a doctor of veterinary medicine is consulted in the planning of such procedures;

"(ii) for the use of tranquilizers, analgesics, and anesthetics;

"(iii) for pre-surgical and post-surgical care by laboratory workers in accordance with established veterinary medical and nursing procedures;

"(iv) against the use of paralytics without anesthesia; and

"(v) that the witholding of tranquilizers, anesthesia, analgesia, or euthanasia when scientifically necessary shall continue for only the necessary period of time;

"(D) that no animal is used in more than one major operative experiment from which it is allowed to recover except in cases of—

"(i) scientific necessity; or

"(ii) other special circumstances as determined by the Secretary; and

"(E) that exceptions to such standards may be made only when specified by research protocol and that any such exception shall be detailed and justified in a report outlined under paragraph (7) and filed with the Institutional Animal Committee.".

(b) Section 13(a) of such Act is further amended—

(1) by designating the third and fourth sentences as paragraph (4);

(2) by designating the fifth sentence as paragraph (5); and

(3) by striking out the last sentence and inserting in lieu thereof the following:

"(6) Nothing in this Act shall be construed as authorizing the Secretary to promulgate rules, regulations, or orders with regard to the design, outlines, or guidelines of actual research or experimentation by a research facility: *Provided*, that the Secretary shall require every research facility to show that professionally acceptable standards governing the care, treatment, and practices on animals are being followed by the research facility during research and experimentation.

"(7)(A) The Secretary shall require, at least annually, every research facility to report that the provisions of this Act are being followed.

"(B) In complying with subparagraph (A), the research facility shall provide—

"(i) the details of any procedure which was likely to produce pain or distress in any animal and assurances demonstrating that the principal investigator considered alternatives to those procedures;

"(ii) assurances satisfactory to the Secretary that such facility is adhering to the standards described in this section; and

"(iii) an explanation for any deviation from the standards promulgated under this section.

"(8) Paragraph (1) shall not prohibit any state (or a political subdivision of such State) from promulgating standards in addition to those standards promulgated by the Secretary under paragraph (1).".

(c) Section 13 of such act is further amended by inserting after subsection (a) the following new subsections:

"(b)(1) The Secretary shall require that each research facility establish at least one Institutional Animal Committee. Each Committee shall be appointed by the chief executive officer of each such research facility and shall be composed of not fewer than three members. Such members shall possess sufficient ability to assess animal care, treatment, and practices in experimental research as determined by the needs of the research facility and shall represent society's concerns regarding the welfare of animal subjects used in such facility. Of the members of the Committee—

"(A) at least one member shall be a doctor of veterinary medicine;

"(B) at least one member shall not be affiliated in any way with such facility other than as a member of the Committee, shall not be a member of the immediate family of a person who is affiliated with such facility, and shall be charged with primary responsibility for representing society's concerns regarding the welfare of the animal subjects; and

"(C) in those cases where the Committee consists of more than three members, not more than three members shall be from the same administrative unit of such facility.

"(2) A quorum shall be required for all formal actions of the Committee, including inspections under paragraph (3).

"(3) The Committee shall inspect at least semiannually all animal study areas and animal facilities of such research facility and review as part of the inspection—

"(A) practices involving pain to animals, and

"(B) the condition of animals,

to ensure compliance with the provisions of this Act and that pain and distress to animals is minimized. Exceptions to the requirement of inspection of such study areas may be made by the Secretary if animals are studied in their natural environment and the study area is prohibitive to easy access. Nothing in this Act shall be construed to require research facilities to grant access to Institutional Animal Committees during inspections to any area in which research is being conducted involving confidential or proprietary information, which

would be subject to compromise or inadvertent disclosure. Such exclusion shall not preclude access ot USDA inspectors. Instances of excluding Institutional Animal Committees from access to a facility's confidential or proprietary research shall be reported by the facility to the Secretary of Agriculture in the facility's annual report and included in the records of the Institutional Animal Committee.

"(4)(A) The Committee shall file an inspection certification report of each inspection at the research facility. Such report shall—

"(i) be signed by a majority of the Committee members involved in the inspection;

"(ii) include reports of any violation of the standards promulgated, or assurances required, by the Secretary, including any deficient conditions of animal care or treatment, any deviations of research practices from originally approved proposals that adversely affect animal welfare, any notification to the facility regarding such conditions, and any corrections made thereafter;

"(iii) include any minority views of the Committee; and

"(iv) include any other information pertinent to the activities of the Committee.

"(B) Such report shall remain on file for at least three years at the research facility and shall be available for inspection by the Animal and Plant Health Inspection Service of the Department of Agriculture and any funding Federal agency.

"(C) In order to give the research facility an opportunity to correct any deficiencies or deviations discovered by reason of paragraph (3), the Committee shall notify the administrative representative of the research facility of any deficiencies or deviations from the provisions of this Act. If, after notification and an opportunity for correction, such deficiencies or deviations remain uncorrected, the Committee shall notify (in writing) the Animal and Plant Health Inspection Service of the Department of Agriculture and the funding Federal agency of such deficiencies or deviations.

"(5) The inspection results shall be available to Department of Agriculture inspectors for review during inspections. Department of Agriculture inspectors shall forward any Committee inspection records which include reports of uncorrected deficiencies or deviations to the Animal and Plant Health Inspection Service of the Department of Agriculture and any funding Federal agency of the project with respect to which such uncorrected deficiencies and deviations occurred.

"(c)(1) The research facility shall provide for annual training for scientists, animal technicians, and other personnel involved with animal care and treatment in such facility. Such training shall include instruction on—

"(A) the humane practice of animal maintenance and experimentation;

"(B) research or testing methods that minimize or eliminate the use of animals or limit animal pain or distress; and

"(C) utilization of the information service at the National Agricultural Library, established under subsection (d).

"(2) Research facilities shall inform their employees of the provisions of this Act and shall inform such employees to report any violations of such provisions. Any such employee may not be discriminated against on grounds that such employee reported a violation of such provisions.

"(d) The Secretary shall establish an information service at the National Agricultural Library. Such service shall, in cooperation with the National Library of Medicine, provide information—

"(1) pertinent to employee training;

"(2) which could prevent unintended duplication of animal experimentation as determined by the needs of the research facility; and

"(3) on improved methods of animal experimentation, including methods which could—

"(A) reduce or replace animal use; and

"(B) minimize pain and distress to animals, such as anesthetic and analgesic procedures.

"(e) In any case in which the funding Federal agency determines that conditions of animal care, treatment, or practice in a particular project have not been in compliance with standards promulgated under this Act, despite notification by the Secretary or the funding Federal agency to the research facility and an opportunity for correction, such agency shall suspend or revoke Federal support for the project. Any research facility losing Federal support as a result of actions taken under the preceding sentence shall have the right of appeal as provided in sections 701 through 706 of title 5, United States Code.".

INSPECTIONS

SEC. . Section 16(a) of the Animal Welfare Act (7 U.S.C. 2146(a)) is amended by inserting after the first sentence the following:

"The Secretary shall inspect each research facility at least once each year and, in the case of deficiencies or deviations from the standards promulgated under this Act, shall conduct such follow-up inspections as may be necessary until all deficiencies or deviations from such standards are corrected.".

PENALTY FOR RELEASE OF TRADE SECRETS

SEC. . The Animal Welfare Act (7 U.S.C. 2131-2156) is amended by adding at the end thereof the following section:

"SEC. 27. (a) It shall be unlawful for any member of the Institutional Animal Committee to release any confidential information of the research facility, including any information that concerns or relates to—

"(1) the trade secrets, processes, operations, style of work, or apparatus, or

"(2) to the identity, confidential statistical data, amount or source of any income, profits, losses, or expenditures of the research facility.

"(b) It shall be unlawful for any member of such Committee—

"(1) to use or attempt to use to his advantage, or

"(2) to reveal to any other person, any information which is entitled to protection as confidential information under subsection (a).

"(c) A violation of subsection (a) or (b) is punishable by—

"(1) removal from such Committee, and

"(2)(A) a fine of not more than $1,000 and imprisonment of not more than one year, or

"(B) if such violation is willful, a fine of not more than $10,000 and imprisonment of not more than three years.

"(d) Any person, including any research facility, injured in its business or property by reason of a violation of this section may recover all actual and consequential damages sustained by such person and the cost of the suit including a reasonable attorney's fee.

"(e) Nothing in this section shall be construed to affect any other rights that any such person may have, nor shall subsection (d) be construed to limit the exercise of any such rights arising out of or relating to a violation of subsections (a) and (b).".

INCREASED PENALTIES FOR VIOLATION OF THE ACT

SEC. . Subsection (b) of section 19 of the Animal Welfare Act (7 U.S.C. 2149(b)) is amended—

(1) in the first sentence by striking out "$1,000 for each such violation" and inserting in lieu thereof "$2,500 for each such violation"; and

(2) in the sixth sentence by striking out "$500 for each offense" and inserting in lieu thereof "$1,000 for each offense".

DEFINITIONS

SEC. . (a) Section 2(e) of the Animal Welfare Act (7 U.S.C. 2132(e)) is amended by adding after "The term 'research facility' means" the following: "each department, agency, or instrumentality of the United States which uses live animals for research or experimentation,".

(b) Section 2 of such Act is further amended by redesignating subsections (f) through (j) as subsections (j) through (n), respectively and by inserting after subsection (e) the following new subsections:

"(f) The term 'Federal agency' means an Executive agency as such term is defined in section 105 of title 5, United States Code, and with respect to any research facility means the agency from which the research facility receives a Federal award for the conduct of research, experimentation, or testing, involving the use of animals;

"(g) The term 'Federal award for the conduct of research, experimentation, or testing, involving the use of animals' means any mechanism (grant, award, loan, contract, or cooperative agreement) under which Federal funds are provided to support the conduct of such research;

"(h) The term 'quorum' means a majority of the Committee members;

"(i) The term 'Committee' means the Institutional Animal Committee established under section 13(c);".

(c) For purposes of this Act, the term "animal" shall have the same meaning as defined in section 2(j) of the Animal Welfare Act (7 U.S.C. 2132(j)), as redesignated by subsection (b) of this section.

EFFECTIVE DATE

SEC. . This title shall take effect one year after the date of the enactment of this title.

SYMMS (AND NICKLES) AMENDMENT NO. 905

Mr. SYMMS (for himself and Mr. NICKLES) proposed an amendment to the bill S. 1714, supra; as follows:

On page 459, between lines 18 and 19, insert the following new section:

OPPOSITION TO MULTILATERAL ASSISTANCE FOR FOREIGN SURPLUS AGRICULTURAL COMMODITIES

SEC. 927. (a) The Secretary of the Treasury shall instruct the United States Executive Directors of the International Bank for Reconstruction and Development, the International Development Association, the International Finance Corporation, the Inter-American Development Bank, the International Monetary Fund, the Asian Development Bank, the Inter-American Investment Corporation, the African Development Bank, and the African Development Fund to use the voice and vote of the

United States to oppose any assistance by these institutions, using funds appropriated or otherwise made available pursuant to any provision of law, for the production of any agricultural commodity for export, if—

(1) such commodity is in surplus on world markets; and

(2) the export of such commodity would cause substantial injury to the United States producers of the same, similar, or competing commodity.

(b)(1) The amount of payments which the United States may make to the paid-in capital of an international financial institution described in subsection (a) during any capital expansion or replenishment of such institution may not exceed the amount of funds which the United States agreed to pay for paid-in capital under such expansion or replenishment minus an amount which bears the same proportion to the aggregate amount of assistance described in paragraph (2) furnished by such institution as the United States share of the expansion or replenishment bears to the total amount of the expansion or replenishment.

(2)(A) The aggregate amount of assistance referred to in paragraph (1) is the amount of assistance furnished by an international financial institution to all countries during the period described in subparagraph (B)—

(i) to support the production of any agricultural commodity for export, if—

(I) such commodity is in surplus on world markets; and

(II) the export of such commodity would cause substantial injury to the United States producers of the same, similar, or competing commodity; and

(ii) to subsidize (other than under clause (i)) the exports of agricultural commodities from such countries.

(B) The period referred to in subparagraph (A) is the same number of years as the capital expansion or replenishment period, which immediately preceded the first year of the expansion or replenishment period.

(3) For purposes of paragraph (2)(A)(ii), the term "subsidize" is used within the meaning of the Agreement on Interpretation and Application of Articles V, XVI, and XXIII of the General Agreement on Tariffs and Trade and the annex relating thereto, done at Geneva on April 12, 1979.

(4) Any funds withheld from payment to an international financial institution pursuant to this section shall be used to reduce the public debt in the manner specified in section 3113 of title 31, United States Code.

ABDNOR AMENDMENT NO. 906

Mr. ABDNOR proposed an amendment to the bill S. 1714, supra; as follows:

On page 459, between lines 18 and 19, insert the following new section:

EXCLUSION OF LIQUIDATION PROCEEDS FROM FAMILY CONTRIBUTION COMPUTATIONS

SEC. . Section 482 of the Higher Education Act of 1965 is amended by adding at the end thereof the following new subsection:

"(f) The Secretary shall, within 30 days after the date of enactment of this subsection, promulgate special regulations to permit, in the computation of family contributions for the programs under subpart 1 of part A and part B of this title for any academic year beginning on or after July 1, 1985, the exclusion from family income of any proceeds of a sale of farm or business assets of that family if such sale results from a voluntary or involuntary foreclosure, forfeiture, or bankruptcy.".

MELCHER AMENDMENT NO. 907

(Ordered to lie on the table.)

Mr. MELCHER proposed an amendment to the bill S. 1714, supra; as follows:

After the end of the bill insert the following:

" 'SEC. 2. The Congress finds that—

(1) the use of animals is instrumental in certain research and education for advancing knowledge of cures and treatment for diseases and injuries which afflict both humans and animals;

(2) methods of testing that do not use animals are being and continue to be developed which are faster, less expensive, and more accurate than traditional animal experiments for some purposes and further opportunities exist for the development of these methods of testing;

(3) measures which eliminate or minimize the unnecessary duplication of experiments on animals can result in more productive use of Federal funds; and

(4) measures which help meet the public concern for laboratory animal care and treatment are important in assuring that research will continue to progress.' "

SEC. 3. (a) Section 13 of the Animal Welfare Act (7 U.S.C. 2134 is amended—

(1) by redesignating subsections (b) through (d) as subsections (f) through (h) respectively; and

(2) by striking out the first two sentences of subsection (a) and inserting in lieu thereof the following:

'(1) The Secretary shall promulgate standards to govern the humane handling, care, treatment, and transportation of animals by dealers, research facilities, and exhibitors.

'(2) The standards described in paragraph (1) shall include minimum requirements—

'(A) for handling, housing, feeding, watering, sanitation, ventilation, shelter from extremes of weather and temperatures, adequate veterinary care, and separation by species where the Secretary finds necessary for humane handling, care, or treatment of animals; and

'(B) for physical environment adequate to promote the psychological well-being of research animals, particularly primates, including whatever apparatus the Secretary deems appropriate.

'(3) In addition to the requirements under paragraph (2), the standards described in paragraph (1) shall, with respect to animals in research facilities, include requirements—

'(A) for animal care, treatment, and practices in experimental procedures to ensure that animal pain and distress are minimized, including adequate veterinary care with the appropriate use of anesthetic, analgesic, tranquilizing drugs, or euthanasia;

'(B) that the principal investigator considers alternatives to any procedure likely to produce pain to or distress in an experimental animal;

'(C) in any practice which could cause pain to animals (other than slight or momentary pain)—

'(i) that a doctor of veterinary medicine is consulted in the planning of such procedures;

'(ii) for the use of tranquilizers, analgesics, and anesthetics;

'(iii) for pre-surgical and post-surgical care by laboratory workers in accordance with established veterinary medical and nursing procedures;

'(iv) against the use of paralytics without anesthesia; and

'(v) that the withholding of tranquilizers, anesthesia, analgesia, or euthanasia when scientifically necessary shall continue for only the necessary period of time;

'(D) that no animal is used in more than one major operative experiment from which it is allowed to recover except in cases of—

'(i) scientific necessity; or

'(ii) other special circumstances as determined by the Secretary; and

'(E) that exceptions to such standards may be made only when specified by research protocol and that any such exception shall be detailed and justified in a report outlined under paragraph (7).'.

(b) Section 13(a) of such Act is further amended—

(1) by designating the third and fourth sentences as paragraph (4);

(2) by designating the fifth sentence as paragraph (5); and

(3) by striking out the last sentence and inserting in lieu thereof the following:

'(6) Nothing in this Act shall be construed as authorizing the Secretary to promulgate, rules regulations or orders with regard to the design, outlines, or guidelines of actual research or experimentation by a research facility or Federal research facility: *Provided*, that the Secretary shall require every research facility to show that professionally acceptable standards governing the care, treatment, and practices on animals are being followed by the research facility during research and experimentation. No rule, regulation, order, or part of this Act may require a research facility to disclose to the Institutional Animal Committee during its inspection trade secrets or commercial or financial information which is privileged or confidential.

'(7)(A) The Secretary shall require, at least annually, every research facility and Federal research facility to report that the provisions of this Act are being followed.

'(B) In complying with subparagraph (A), such research facilities shall provide—

'(i) the details of any procedure which was likely to produce pain or distress in any animal and assurances demonstrating that the principal investigator considered alternatives to those procedures;

'(ii) assurances satisfactory to the Secretary that such facility is adhering to the standards described in this section; and

'(iii) an explanation for any deviation from the standards promulgated under this section.

'(8) Paragraph (1) shall not prohibit any State (or a political subdivision of such State) from promulgating standards in addition to those standards promulgated by the Secretary under paragraph (1).'.

'(c) Section 13 of such Act is further amended by inserting after subsection (a) the following new subsections:

'(b)(1) The Secretary shall require that each research facility establish at least one Institutional Animal Committee. Each Institutional Animal Committee shall be appointed by the chief executive officer of each such research facility and shall be composed of not fewer than three members. Such members shall possess sufficient ability to assess animal care, treatment, and practices in experimental research as determined by the needs of the research facility. Of the members of the Institutional Animal Committee—

'(A) at least one member shall be a doctor of veterinary medicine;

'(B) at least one member shall not be affiliated in any way with such facility other than as a member of the immediate family of a person who is affiliated with such facility, and shall represent society's concerns regarding the welfare of the animal subjects; and

'(C) in those cases where the Institutional Animal Committee consists of more than three members, not more than three members shall be from the same administrative unit of such facility.

'(2) A quorum shall be required for all formal actions of the Institutional Animal Committee, including inspections under paragraph (3).

'(3) The Institutional Animal Committee shall inspect at least semiannually all animal study areas and animal facilities of such research facility and review as part of the inspection—

'(A) practices involving pain to animals, and

'(B) the condition of animals,

to ensure compliance with the provisions of this Act and that pain and distress to animals is minimized. Exceptions to the requirement of inspection of such study areas may be made by the Secretary if animals are studied in their natural environment and the study area is prohibitive to easy access.

'(4)(A) The Institutional Animal Committee shall file an inspection certification report of each inspection at the research facility. Such report shall—

'(i) be signed by a majority of the Institutional Animal Committee members involved in the inspection;

'(ii) include reports of any violation of the standards promulgated, or assurances required, by the Secretary, including any deficient conditions of animal care or treatment, any deviations of research practices from originally approved proposals that adversely affect animal welfare, any notification to the facility regarding such conditions and any corrections made thereafter;

'(iii) include any minority views of the Institutional Animal Committee; and

'(iv) include any other information pertinent to the activities of the Institutional Animal Committee.

'(B) Such report shall remain on file for at least three years at the research facility and shall be available for inspection by the Animal and Plant Health Inspection Service of the Department of Agriculture and any funding Federal agency.

'(C) In order to give the research facility an opportunity to correct any deficiencies or deviations discovered by reason of paragraph (3), the Institutional Animal Committee shall notify the administrative representative of the research facility of any deficiencies or deviations from the provisions of this act. If, after notification and an opportunity for correction, such deficiencies or deviations remain uncorrected, the Institutional Animal Committee shall notify (in writing) the Animal and Plant Health Inspection Service of the Department of Agriculture and the funding Federal agency of such deficiencies or deviations.

'(5) The inspection results shall be available to Department of Agriculture inspectors for review during inspections. Department of Agriculture inspectors shall forward any Institutional Animal Committee inspection records which include reports of uncorrected deficiencies or deviations to the Animal and Plant Health Inspection Service and any funding Federal agency of the project with respect to which such uncorrected deficiencies and deviations occurred.

'(c)(1) In the case of Federal research facilities, a Federal Institutional Animal Committee shall be established and shall have the same composition and responsibilities outlined in subsection (b), except that the Federal Institutional Animal Committee shall report deficiencies or deviations to the head of the Federal agency conducting the research rather than to the Animal Plant Health Inspection Service of the Department of Agriculture. The head of the Federal agency conducting the research shall be responsible for—

'(A) all corrective action to be taken at the facility; and

'(B) the granting of all exceptions to inspection protocol.

'(d)(1) Each research facility shall provide for annual training for scientists, animal technicians, and other personnel involved with animal technicians, and other personnel involved with animal care and treatment in such facility. Such training shall include instruction on—

'(A) the humane practice of animal maintenance and experimentation;

'(B) research or testing methods that minimize or eliminate the use of animals or limit animal pain or distress; and

'(C) utilization of the information service at the National Agricultural Library, established under subsection (e).

'(2) Every research facilities shall inform their employees of the provisions of this Act and shall inform such employees to report any violations of such provisions. Any such employee may not be discriminated against on grounds that such employee reported a violation of such provisions.

'(e)(1) The Secretary shall establish an information service at the National Agricultural Library. Such service shall, in cooperation with the National Library of Medicine, provide information—

'(A) pertinent to employee training;

'(B) which could prevent unintended duplication of animal experimentation as determined by the needs of the research facility; and

'(C) on improved methods of animal experimentation, including methods which could—

'(i) reduce or replace animal use; and

'(ii) minimize pain and distress to animals, such as anesthetic and analgesic procedures.

'(2) No funds other than those specifically appropriated for the purpose of carrying out this subsection may be obligated for such purposes.

'(f) In any case in which the funding Federal agency determines that conditions of animal care, treatment, or practice in a particular project have not been in compliance with standards promulgated under this Act, despite notification by the Secretary or the funding Federal agency to the research facility and an opportunity for correction, such agency shall suspend or revoke Federal support for the project. Any research facility losing Federal support as a result of actions taken under the preceding sentence shall have the right of appeal as provided in sections 701 through 706 of title 5, United States Code.'.

SEC. 4. The Animal Welfare Act (7 U.S.C. 2131-2156) is amended by adding at the end thereof the following section:

'SEC. 27. (a) It shall be unlawful for any member of the Institutional Animal Committee to release any confidential information of the research facility including any information that concerns or relates to—

'(1) the trade secrets, processes, operations, style of work, or apparatus, or

'(2) to the identity, confidential statistical data, amount or source of any income, profits, losses, or expenditures of the research facility.

'(b) It shall be unlawful for any member of such Committee—

'(1) to use or attempt to use to his advantages, or

'(2) to reveal to any other person,

any information which is entitled to protection as confidential information under subsection (a).

'(c) A violation of subsection (a) or (b) is punishable by—

'(1) removal from such Committee, and

'(2)(A) a fine of not more than $1,000 and imprisonment of not more than one year, or

'(B) if such violation is willful, a fine of not more than $10,000 and imprisonment of not more than three years.

'(d) any person, including any research facility, injured in its business or property by reason of a violation of this section may recover all actual and consequential damages sustained by such person and the cost of the suit including a reasonable attorney's fee.

'(e) Nothing in this section shall be construed to affect any other rights that any such person may have, nor shall subsection (d) be construed to limit the exercise of any such rights arising out of or relating to a violating of subsections (a) and (b).'.

SEC. 5. (a) Subsection (b) of section 19 of the Animal Welfare Act (7 U.S.C. 2149(b)) is amended—

(1) in the first sentence by striking out '$1,000 for each such violation' and inserting in lieu thereof '$2,500 for each such violation'; and

(2) in the sixth sentence by striking out '$500 for each offense' and inserting in lieu thereof '$1,500 for each offense'.

(b) Subsection (d) of such section is amended by striking out '$1,000' and inserting in lieu thereof '$2,500'.

SEC. 6. (a) Section 2 of the Animal Welfare Act (7 U.S.C. 2132) is amended by adding after subsection (j) the following new subsections:

'(k) The term "Federal agency" means an Executive agency as such term is defined in section 105 of title 5, United States Code, and with respect to any research facility means the agency from which the research facility receives a Federal award for the conduct of research, experimentation, or testing, involving the use of animals;

'(l) The term "quorum" means a majority of the Committee members;

'(m) The term "Federal research facility" means each department, agency, or instrumentality of the United States which uses live animals for research or experimentation.'.

SEC. 7. Section 14 of the Animal Welfare Act (7 U.S.C. 2144) is amended by changing 'section 13' to 'section 13(a)' wherever it appears.

SEC. 8. This Act shall take effect one year after the date of the enactment of this Act."

NOTICES OF HEARINGS

COMMITTEE ON GOVERNMENTAL AFFAIRS

Mr. ROTH. Mr. President, on Tuesday, November 5, at 10 a.m., in SD-342, the Committee on Governmental Affairs will hold a hearing on matters relating to the Deputy Director at OMB. For further information, please

contact the committee office at 224-4751.

ADDITIONAL STATEMENTS

GARCIA DECISION EXEMPTION

● Mr. ABDNOR. Mr. President, the legislation to exempt State and local governments from the implications of the Garcia decision has progressed quickly and effectively over the last few months. We have now passed this legislation and alleviated local governments, employees, and the general public from the ill-effects of this Supreme Court decision.

Over these past few months, I have heard from just about every small community and county in South Dakota urging that this legislation be passed. I worked with these communities and with my distinguished colleagues in the Senate to push this legislation to point of where it is today.

I heard of community problems and individual problems. Towns would have had to cut back services; individuals would have had to lose their comp time; and, in one instance, a person with cerebral palsy could have lost his job. The effects of the Garcia decision are far reaching and hard hitting.

I supported my Senate colleagues' efforts from the very beginning and encouraged communities in South Dakota to get involved immediately in writing their Congressman and Senators. I am pleased with the passage of this vital legislation. It is important to the stability and livelihood of every State and local government across the United States. I now urge the House to act in a similar manner.●

AUSTRIA'S NATIONAL DAY

● Mr. SIMON. Mr. President, today, on Austria's National Day, I would like to congratulate the Austrian people on 30 years of peace and neutrality. On October 26, 1955, the Austrian Parliament passed the Federal Constitutional Law on the Neutrality of Austria. Article 1 reads:

(1) For the purpose of the permanent maintenance of her external independence and for the purpose of the inviolability of her territory, Austria of her own free will declares herewith her permanent neutrality which she is resolved to maintain and defend with all the means at her disposal.

(2) In order to secure these purposes Austria will never in the future accede to any military alliances nor permit the establishment of military bases of foreign States on her territory.

I salute Austria's success in independently guaranteeing her neutral status, and using her unique position in the world to work toward peace for all nations.

This celebration of Austria's 30th national day is a heartening testament to the possibility of finding lasting solutions to difficult problems through peaceful discussion and negotiation.●

SOVIET HUMAN RIGHTS

● Mr. SIMON. Mr. President, I want to address the issue of Soviet human rights. With the summit between Mr. Reagan and Mr. Gorbachev less than 1 month away, this would seem to be the most opportune time for the Soviets to demonstrate that they are serious about improving relations.

Instead, I just received word that a Jewish man, Leonid Volvovsky of Gorky, has been sentenced to 3 years in a labor camp. Mr. Volvovsky's crime was practicing his religion. This case has even more far-reaching implications; the Soviets used illegally obtained letters from a woman in Chicago as evidence against Mr. Volvovsky. The letters were tailored to serve the designs of the Soviet prosecutor. Pam Cohen's letters were personal correspondence of a conversational nature. The letters contained nothing subversive or illicit.

When I was in the Soviet Union this past July, I had the opportunity to meet with a number of Jewish refuseniks. Some were activists who spoke freely about their desires to practice their religion without governmental interference. Others took the boldest step of their lives by applying to emigrate to Israel. When Soviet citizens apply to leave, they run the risk of losing their jobs, becoming subjected to harassment and having their mail or telephones cut off.

I sent the following list of refuseniks and dissidents to Secretary Gorbachev following my visit to his country. I ask that the list be printed in the RECORD.

The list follows:

Professor Naum Meiman; wife, Inna. This case is urgent. Professor Meiman is 74 years old, and his wife is dying of cancer. She probably has less than a year to live. Professor Meiman, himself, is not in good health. They wish to emigrate to Israel. There are several of us at high levels in the U.S. Government who have had the chance to visit with him, and compassion is needed for him and his wife at this point. The theory is that he is not permitted to leave because of the scientific work he did. That scientific work was concluded in 1955, and any graduate student in that field today has much more current knowledge than Professor Meiman has. Action should be taken immediately.

Abe Stolar, his wife, son and daughter-in-law want to emigrate to the United States. Abe Stolar is a U.S. citizen. Permission has been granted for him and his wife and his son to emigrate to the United States, but his daughter-in-law has been denied permission; and the family is understandably unwilling to be separated in that way. Granting permission to the daughter-in-law to leave will solve this case, which is causing adverse publicity in the United States.

Roman Kuperman. He is married to Fran Pergericht of Chicago, Illinois. This is a case of divided spouses. They simply want to live together in the United States.

Tamara Tretyakova. She is married to Simon Levin of Deerfield, Illinois. They have a six-year-old son and she is desperate to be with him and his father.

Mr. and Mrs. Arkady (Helen) Mai. These two people want to emigrate to Israel. He is retired, and her mother is in her eighties, living in Israel. They want to see their family. Almost all of their family lives in Israel. It is clearly a family repatriation case. The theoretical excuse is security, but if you'll examine the facts, you will find there is no substance to that at all.

Yakhov Gorodetsky of Leningrad. He wants to emigrate to Israel. He is deeply committed to that, and because of his religious commitment, he is not likely to change. Both he and the Soviet Union would be better off if he were permitted to go to Israel.

Mr. and Mrs. Boris Elkin of Leningrad. His father lives in Israel, as do other of his relatives, and he wants to join his family.

Mrs. Tat'yana Zunshayn of Riga, Latvia. Her husband, Zachar Zunshayn, is in prison, and the two of them want to emigrate to Israel. I do not recall the details, but their feeling is strong, and I would hope they could be accommodated.

SOVIET DISSIDENTS—PRISONERS

Dr. Yury Orlov—60-year-old physicist arrested in February, 1977 and sentenced to 7 years strict-regime in a Siberian labor camp and five years in internal exile. Founder of Moscow Helsinki Watch.

Mr. Leonid Borodin—47-year-old writer arrested in 1982 and sentenced to ten years in a Ural prison camp and 5 years banishment.

Mrs. Oksana Meshko—80-year-old prisoner of conscience serving out her exile term in Ayan, a remote village of the USSR's Far East region. She was sentenced, having risked her personal freedom, because she protested the brutal repressions against her family and friends.

Mr. SIMON. Mr. President, all of the refuseniks deserve to live their lives in freedom. The case of my friends, Naum and Inna Meiman, is particularly compelling. Naum is 74 years old. Inna has had four operations for cancer. Their only desire is to live out their remaining days in Israel.

Many of my colleagues have raised the issue of human rights on trips to the Soviet Union. Letters have been written, speeches have been made. Despite the increase in anti-Semitism and the continued abuses, we must never stop working for the release of people in bondage. We cannot ever give up hope.●

SALUTE TO WILLIAM O. WHITE

● Mr. DURENBERGER. Mr. President, on October 2, the people of St. Paul lost a valued community leader with the passing of William O. White.

Bill White began his professional career as an educator in the St. Paul school system and as a supervisor of student teachers at the University of Minnesota. He later served as director of the St. Paul Human Rights Commission and St. Paul Urban Coalition.

Bill White was, in words of the Rev. Earl F. Miller of Pilgrim Baptists

Church, "an excellent model in his attitudes and just in the way he carried himself. He was a good mediator, an excellent leader."

I had the privilege of working closely with Bill White both in his capacity as executive director of the St. Paul Urban Coalition and later when he served as an assistant vice president and public affairs officer at the Norwest Bank of St. Paul. During that time—and in political work and community projects we worked on together—Bill always had the interests of the people of his community at heart. He knew his community and was not afraid to sacrifice himself in its behalf.

Because of the outstanding contributions made by Bill White during his lifetime of public service, I ask that an article by Joe Soucheray which recently appeared in the St. Paul Dispatch and Pioneer Press be printed in the RECORD.

The article follows:

[From the St. Paul Pioneer Press and Dispatch, Oct. 13, 1985]

WINNING WAS THE BOTTOM LINE FOR BILL WHITE

(By Joe Soucheray)

It most likely wasn't driven home loudly enough when William O. White died Oct. 2 just who it was who died and what his death meant to St. Paul, a quieter place now by default. His obituary made only brief references to his astonishing variety of community involvements and civil rights work and scarcely touched at all the notion that Bill White was St. Paul's first professional militant black man.

The last is in no way meant to be derogatory or undiplomatic, or should it ever suggest that Bill White was stereotypically a 1960s media cliche of black militancy. It should suggest instead that if Bill White did not exist in his time and place, he would have to have been invented.

"He was exactly that, a professional black man in the trail-blazing sense of the phrase," council member Bill Wilson said the other day. "Bill White was a point man, a leader. He came along at a time when a guy like him was needed and he was the guy."

To reverse the slang, Bill White was the man. He was always on the run, his head literally held high in an example of excellent posture that often was mistaken for his being standoffish. Maybe he was. From reading library clippings about him and talking to people about him, one learns White was capable of the full range of emotions.

His death at 50, to make an obviously hard point, might even have been the result of White finally suffering exhaustion, or a broken heart, if there is a distinction.

After years of fighting—you name it, Bill White fought for it—White died suddenly, shocking his friends and family. A few months ago, White left his job at Norwest Bank in St. Paul. His friends said he felt that it was too late for him to start over, that somehow he felt defeated at a point in life when his energies were spent from that posture he had carried so well.

"I could never imagine how angry Bill might have been inside," White's wife, Pat, said the other day. "but I would use the term militant cautiously. Bill was militant, but he was convinced that violence was not the answer to anything. His anger was a feeling, though, an emotion. I'm sure that it took its toll over the years."

It took its toll over all the years that White led by example. Many blacks thought White wasn't verbal enough, or visible enough. But White was bringing discrimination complaints in housing and employment in this town when the ink on such matters was still wet in the lawbooks.

"He was tough and he was defiant if he had to be," Bill Sumner, the former editor of the St. Paul newspapers, said the other day. "I liked him a great deal. I don't know if that was returned, but I think I gained his respect. I wish I knew him better."

Sumner was referring most specifically to the controversy surrounding White's application to join the St. Paul Athletic Club in 1970. Sumner defended White in a couple of eloquent editorial page columns that called the Athletic Club about as exclusive as the telephone book and the Aqua Velva After Shave Club. At the time, White was the 34-year-old director of the St. Paul Urban Coalition, a man with degrees in education and law, and, not so incidentally, an athlete.

It diminishes White's larger accomplishments to dwell too long on the Athletic Club chapter in his life, but it was a famous and highly visible example of how White shook St. Paul loose from some of its most ridiculous and antiquated conventions.

White was the first black to apply for membership in the club. He was rejected at first, presumably because he was black, although the club's board of directors in the Pliocene Age of 1970 occasionally played political games to accept and reject applicants.

Pat O'Halloran, a member of the Athletic Club's board in 1970, said the other day that he remembers blackballing a particular business executive—all it took to get blackballed was one vote—to make a point on another fellow whom he favored for acceptance.

Mike Galvin, another member of the board of directors in 1970, recollected that maneuvering took place behind the scenes, that the club enjoyed a great deal of license with its constitution. It was possible White's initial rejection was the result of political chicanery and that his acceptance might have been inevitable.

O'Halloran and Galvin, for the record, were in White's corner. Many people were, including Ralph Biebighauser, the men's locker room attendant at the club who was so accustomed to years of bad shower singing that he found himself investigating one day when he heard the most delightful voice he ever heard coming from the shower. It was White.

"What a wonderful voice," Biebighauser said.

"Thank you," White said.

All that mattered to White was that he won. It was another barrier, important to break down. He accepted the membership when many blacks might have turned away after an initial rejection. But winning was White's bottom line in a life that flamed out too soon.

"Bill White earned the respect of everyone he met," Hubert W. White, the clothier, who also was on the Athletic Club board in 1970, said the other day. Hubert White, known as Bill, became friends with Bill White to the extent that the two Whites were distinguished around town as the black Mr. White and the white Mr. White.

The black Mr. White moved to the Twin Cities from Selma, Ala., in the 1950s. He attended the University of Minnesota. He attended William Mitchell College of Law. He was living in Minneapolis and teaching at Como Junior High School when he was asked in 1965 to become the assistant executive secretary of the St. Paul Human and Civil Rights Commission. Fine. But first he had to move to St. Paul. When he did, he brought complaints of discrimination against the proprietors of the building where he tried to rent an apartment. His complaint eventually was dismissed in court, but White had demonstrated what would become his trademark in public life. He worked within the system to protect his rights.

"He was never determined to break the system," Sumner said. "He just wanted to be part of it, to make it work."

Even before the housing discrimination complaint, White brought charges of discrimination against a security firm he insisted refused to hire him because he was black. He won that one.

White's appointment to become the first president of the St. Paul Urban Coalition was unanimously approved in 1969. He left that job in 1976 to take a position with Northwestern National Bank, to finally enter the world of private business.

"He remained visible," Pat White said, "but only when it was time to be visible. In his own way, he always remained a man of action."

Bill White will be missed in this town, most certainly because he never advertised that he would be. There are a lot of people who now wish they had known him better.●

LOAN ASSET SALES

● Mr. MOYNIHAN. Mr. President, yesterday, by a vote of 228 to 199, the House of Representatives passed H.R. 3500, the Omnibus Budget Reconciliation Act of 1985.

I rise today to speak about a provision of that bill based on a proposal I have offered the Senate on three separate occasions: On March 13 during the Senate Budget Committee's markup of the first concurrent budget resolution; on May 7 during the Senate's deliberations on that budget resolution; and, on July 16 during Senate consideration of the Small Business Reauthorization (S. 408).

The Federal Government currently holds about $245 billion in loan assets—obligations for Federal loans to private businesses and individuals. Our loan asset portfolio is greater than the combined loan assets of Chase Manhattan and Bank of America. In March, and May, and July, I urged that the Government sell a portion of its loan portfolio, as a way to reduce the deficit. The Federal Government holds loans backed by the assets of electric utilities, by newly constructed homes, by aircraft, ships, even by the assets of some of the best known Fortune 500 firms. I suggested we begin by selling loans in the Rural Housing Program of the Farmers Home Administration. The General Accounting Office has already analyzed these loans and found them to be of suffi-

ciently high quality for efficient and prompt sale.

While the Senate rejected my proposal three times, the House of Representatives has thought better of it. Language in H.R. 3500 specifies that all new rural housing loans by the Farmers Home Administration available for sale shall be sold to the public, rather than the Federal Financing Bank. The Congressional Budget Office estimates that $2.5 billion of loans would be sold in fiscal year 1986–88 under this provision, and that these sales would raise some $1.8 billion to reduce deficits over the 3 fiscal years.

I should like to commend the House of Representatives for this initiative, especially Representative LUNDINE for his efforts on its behalf.

Recent actions by the Senate—passage of the Gramm-Rudman amendment, in particular—have shown a certain not so quiet desparation to solve the crisis caused by the massive, sustained deficits of the last 4 years. CBO has estimated that the sale of part of the Government's loan portfolio, as I have proposed, could reduce deficits by some $150 billion over 3 years. The Senate ought to consider, once again, loan sales as part of the solution to the deficit dilemma.●

SEVENTY-FIFTH ANNIVERSARY OF THE BUREAU OF MINES

● Mr. McCLURE. Mr. President, I would like to remind my colleagues of the Department of the Interior Bureau of Mines 75th anniversary celebration to be held October 30, from 11 a.m. to 6 p.m. in room 106 of the Dirksen Senate Office Building. The Bureau of Mines has principal responsibility for conducting research and for collecting, interpreting, and analyzing information involving mineral reserves and the production, consumption, and recycling of mineral materials. It does so to help assure the Nation, at low human, social, and environmental cost, the mineral supplies necessary to maintain national security, employment, and continued economic growth; and to help stimuate the private sector in the production of minerals so that an appropriate and substantial share of national needs can be supplied from domestic sources. The Bureau of Mines will have exhibits on display to illustrate many facets of its program. I plan to be there, and urge my colleagues to attend also. Thank you.●

SALUTE TO MARK TOOGOOD AND RESULTS

● Mr. DURENBERGER. Mr. President, no single source of human misery has generated more international concern and generosity in recent months than has the news of drought and starvation in Africa.

I am proud to say that countless Minnesotans have made substantial contributions of human and material resources that address both the short- and long-term nutritional needs of Africans.

One of those Minnesotans is Mark Toogood who was one of only nine Americans honored recently for his work by the Congressional Select Committee on Hunger. Mark is involved in several hunger-related organizations in Minnesota including Twin Cities "Results," a national hunger lobby.

One of the things that has impressed me most about Mark's work, and the work of the "Results" organization, is their focus on longer-term solutions to world hunger and world health problems through nutritional and preventative health programs.

Because of the outstanding contributions made by Mark Toogood and others involved in the "Results" organization in Minnesota, I ask that the following editorial from the Minneapolis Star and Tribune and article from the St. Paul Dispatch and Pioneer Press be printed at this point in the RECORD:

The articles follow:

[From the St. Paul Dispatch and Pioneer Press]

FRONTLINE HUNGER FIGHTER

Mark Toogood realized what it was like to be without food in a land of plenty when he paid a visit to a Minneapolis soup kitchen. The visit wasn't a goodwill stop: Toogood needed to eat.

He was educated, with a degree in philosophy. But he was unemployed when he decided to take that step a year ago into the safety net provided by governments and charities for the homeless and hungry.

Toogood discovered the safety net for the vulnerable wasn't very safe. He also discovered he wasn't alone.

"If it weren't for a lot of support from family and friends, I'd have been on the street," Toogood said. "I just began to realize how extremely fragile and non-existent the so-called government safety net is."

But instead of retreating into his background of support—his family in Roseville, the friends who offered to help—Toogood took steps in another direction. He became an activist for the hungry.

On Tuesday—World Food Day—Toogood will be honored at a ceremony sponsored by the U.S. House Select Committee on Hunger in Washington, D.C. He is one of nine recipients selected for recognition at the ceremony which coincides with the issuance of a new U.S. Postal Service stamp bearing the legend "Help End Hunger."

Toogood, 28, was selected for his leadership on hunger issues in the Twin Cities, especially for his coordination of the "African Relief Hotline," a referral service that directed people concerned about the famine in Africa to 33 different agencies.

Timed to coincide with a WCCO-TV broadcast of its series on hunger in Africa, the hotline is credited with helping to raise more than $300,000. Toogood ran the hotline for a month through the end of March from a Bloomington office, after that he moved the hotline to his home.

He received calls—at least one or two a day—into June.

"I had been pretty seriously disillusioned for a long time about the prospect of people caring enough about what was going on in the world," he said.

But for Toogood, the hotline "was a break-through of this sort of wall of cynicism around me."

During the first week or so, when the phone bank was always lit and he often had a phone at each ear, he found himself sometimes so overwhelmed that he couldn't speak.

"I was barely able to talk," he said. "I was just crying. I was overwhelmed by the compassion of people. I think people just need an opportunity to express their compassion. They need an opportunity to feel as though they can make a difference."

And that, essentially, is what Toogood has made his job. He lives in a Minneapolis boarding house room provided by friends; he exists on the salary he makes working with the homeless at the Elim Transitional Housing project in northeast Minneapolis.

But he is occupied—physically, intellectually and, in many ways, spiritually—with the war on hunger.

He is a member of the board of directors of the Hunger Action Coalition, a resource and education center on hunger in south Minneapolis.

He first went to the center about a year ago, often stopping by to study in his free time, recalled Dee Elwood, administrative officer for the coalition.

"You see a lot of flexibility in his work," Elwood said, "instead of one blanket solution applied to everything."

Toogood also is the co-leader of the local chapter of RESULTS, a nationwide grassroots lobbying group. RESULTS operates on the philosophy that worldwide hunger is not the result of a lack of food on the earth, but a lack of political will.

It's through RESULTS work that Toogood uses his continuing education on hunger—whether it's telling an editorial writer about the need to immunize Third World children against disease or convincing politicians of the need for prompt U.S. backing on the refunding of the United Nations' International fund for Agricultural Development.

"Mark is a spokesperson for awakening people," said Paul Thompson, who founded the Twin Cities RESULTS chapter and leads it with Toogood.

Toogood's own awakening to social issues started long before he decided to walk into a soup kitchen rather than go to friends for food. He credits his parents as the most instructive models for his life.

He is the eldest child of Roger and Maryls Toogood; his mother is a nurse and his father, long a social worker, has headed the Children's Home Society for 16 years.

As a consquence, his father said, Toogood grew up in an environment where the needs of others were often discussed.

Not that Toogood was pushed into social work. After his graduation from high school in 1974, he roamed for eight years through a variety of college courses and other pursuits—such as a year in the U.S. Army, a stint at an archeological dig in London, a try at homesteading a farm in Wisconsin.

But after his graduation in 1984 from the University of Minnesota and after his personal experience of what it was like to be

hungry, he worked for a short time at a Minneapolis food shelf.

Then he started listening to the stories of people without food and without homes.

"When you begin to really listen to people's stories, you realize their position is not that extreme," he said. "The loss of a job, of your heath, of a loved one—any one of us could be dependent on the charity of strangers."

[From the Minneapolis Star and Tribune]

THE HEROES OF WORLD FOOD DAY

One year ago, news of drought and starvation in Africa mobilized a worldwide relief effort. In the ensuing year, an estimated one million people died, but millions more were saved by the outpouring of food and money from across the world. Many people were honored on World Food Day last Wednesday for their heroic contributions to that life-saving effort.

Although every donor, private and government is a hero, a few individuals had the leadership, ingenuity and persistence to get people to dig deeper, to prompt government action above and beyond the obvious solutions. One such individual is Mark Toogood of Minneapolis.

One of nine Americans honored by the Congressional Select Committee on Hunger, Toogood works with Twin Cities RESULTS, a national citizen's lobby against hunger. We know from direct experience that he is a dedicated lobbyist: Toogood has argued well for U.S. support of relief efforts that not only relieve immediate hunger, but that nurture future health and development.

Toogood has been effective because his zeal for good causes has not blinded him to other needs. He understands that not every worthwhile program can be funded because Congress must reduce the federal budget deficit—which hurts Third World purchasing power by driving up interest rates and the value of the dollar. Instead Toogood lobbies for better priorities. He argued against the Reagan administration tactic of holding up money for the highly effective U.N. International Fund for Agricultural Development because of a funding dispute with OPEC. He argued against increasing U.S. foreign aid for military and political purposes while child-immunization programs were being cut.

Now the rains have returned to most of Africa. Instead of 27 countries suffering from drought and starvation, only five have severe problems. But a hero's work is never done. Even with rain, Africa will need $1.5 billion over the next seven months to keep people alive while agricultural capacity is restored. Improving the continent's resilience to famine will require much more. We know Mark Toogood is in for the long run.●

REGARDING STAFFING OF THE AIR TRAFFIC CONTROL SYSTEM

● Mr. LAUTENBERG. Mr. President, I rise to bring to the attention of my colleagues an alarming article which appeared in this morning's Washington Post. Carl Rowan reports on the recent near tragedy at National Airport in which an Eastern Airlines jetliner nearly collided with a helicopter.

Mr. Rowan reports that the tower at National, at the time of the near collision, was undermanned due to a golf outing. In addition, the experienced air traffic controller on duty was distracted from her duties by the need to instruct a new recruit.

Mr. President, I do not know if Mr. Rowan is absolutely correct in his reporting on the situation. But I have seen and heard enough about the problems of our air traffic control system, to find his story entirely plausible.

In August, the House Committee on Public Works and Transportation released a lengthy report on the air traffic control system. The chief investigator for the House Committee confirmed Mr. Rowan's account of the National near disaster. The House report paints a very troubling picture of the FAA and the effort to revitalize the agency and the air traffic control system.

Mr. President, no one action by the FAA or Congress is going to fully solve the FAA's problems. One action, however, could go far to restoring the confidence of the traveling public that the skies are as safe as they can be. That action is the immediate rehiring of air traffic controllers, fired in 1981, who can meet a reasonable screening test.

Our Nation is spending billions of dollars to modernize the air traffic control system. We are bringing in new recruits to the air traffic control system. According to the FAA, those recruits are being "checked out" of basic controller training in 2 years, as compared to the past practice of training new recruits for 4 years. Air traffic control towers are being manned by controllers receiving on-the-job training. These controllers, under the strain imposed by higher and higher levels of air traffic, often prove to be as much a burden as a help to towers under great pressure to safely route traffic.

In short, Mr. President, we do not have enough air traffic controllers to handle the air traffic we see today. We must have more and we must have them soon. We need fully experienced controllers who can handle the full range of controller duties. The only way we are going to get them is to find and employ those who were fired in 1981. Both the cost and time to train these controllers will be far less than that required to train new recruits. When these controllers get back in the towers, they will be ready to take on this difficult job without additional on-the-job training.

As a legal matter, the President may have been within his rights to fire those who struck in 1981. The President obviously had the power to take that action. But sometimes, wisdom and leadership dictate that we do not use all the power we have. Leadership requires a refined use of power and a wise use of discretion. The President would exhibit wisdom by bringing back vitally needed air traffic controllers as soon as possible.

Mr. President, I ask that a copy of Carl Rowan's article on the near miss at National Airport appear at this point in the RECORD.

The article follows:

[From the Washinton Post, Oct. 25, 1985]

THAT NEAR MISS AT NATIONAL

(By Carl T. Rowan)

This is the behind-the-cover-up story of why an Eastern Airlines jetliner carrying 175 people almost collided with a helicopter at Washington's National Airport on Sept. 24. The Eastern pilot had to abort his takeoff because the airport control tower was undermanned in favor of a golf outing.

Air control officials at National had permitted 20 air controllers to leave their jobs at 11 a.m. to play golf at the Enterprise Golf Course in Largo. Controllers who had worked the evening before were outraged when asked to come in early that Tuesday to "cover" for the golfers. Five controllers called in sick. A sixth controller was browbeaten into coming to work, but later left with a toothache.

So Fred Bolster, the supervisor in the control tower, was handling air traffic while trying to train a new controller at the time the Eastern jet requested clearance to take off. In his frenetic triple role, Bolster apparently never heard veteran air controller Pat Dew tell him that she had cleared the helicopter to take off. So Bolster sent the Eastern jet into what might have been the same tragic bit of air space.

The golfing controllers came off the Enterprise course about 5:30 p.m. to be told that TV was full of stories of a near disaster at National. Some controllers decided to rush back to the airport to make the tower numbers look good. Others said they didn't want to be within miles of that embarrassment and went home.

In the ensuing furor, some Federal Aviation Administration bureaucrats decided to make Dew the scapegoat, without ever revealing her name. The press simply was told that a woman controller had been transferred to other duties.

But other controllers at National say that Dew, whom I've never met or talked to, is one of the very best. The bureaucrats knew they couldn't get away with blaming her. So hours after the public was told that "a woman controller" had been taken out of the tower, Dew was recertified and back at work. She is probably in the National Airport tower as you read this.

Rep. James L. Oberstar (D-Minn.) tells me that the chief investigator of his investigations and oversight subcommittee of the House Public Works and Transportation Committee has confirmed every detail of what I have written above. Oberstar says he will hold hearings on this and other incidents.

Why do I come back to this story of apparent FAA lying, of bureaucratic arrogance, of playing games with the lives of Americans who must fly? Because the danger doesn't end with that near disaster of Sept. 24. The close scrapes recur, day after day, airport after airport, because our air control system is not staffed or organized to do a proper job.

On Wednesday afternoon, USAir Flight 312, bound from National to Louisville, was rolling toward takeoff when the pilot aborted, concerned about helicopter traffic in front of him. Harry Hubbard, chief of the control facility at National, says that the only helicopter traffic was "way up the

river" and no danger to the USAir flight and that he has no idea why the pilot aborted that takeoff.

On Oct. 17 a Northwest Airline jet, taking off for Detroit, was at 1,300 feet when a Cessna that had made a wrong turn flew under it. A Northwest official tells me that when the pilot got to Detroit he telephoned Hubbard and "blew his top." Hubbard confirms that the pilot called him, but says everything was okay once he assured the pilot that there was adequate "separation" between the Cessna and the Northwest aircraft.

Pilots, controllers and others in the industry tell me that these potentially tragic boners at National can be multiplied by the hundreds for the nation as a whole. They say that the skies will be unsafe until someone can get the FAA to admit it is not doing an adequate job, one reason being that it does not have enough skilled controllers—on or off the golf course.●

CLARENCE JACKSON: COMMITTED CITIZEN OF DETROIT

● Mr. RIEGLE. Mr. President, recently the Virginia Park community of Detroit honored one of its premier citizens, Clarence Jackson. For more than 30 years, Mr. Jackson has devoted countless hours of his life and energies to the improvement of his community and the assistance of his neighbors.

Clarence Jackson has been involved in many activities all community service oriented. These activities, which range from the Virginia Park Citizens Council, which he founded in 1945, to 50 years of membership in the Second Baptist Church in Detroit all have been marked with his dedication and giving spirit. It is difficult to determine which of his many associations were most important to his neighbors, but I would suspect that his role in the establishment and growth of the Virginia Park Citizens Council would rank high on any list. That organization has been so very important in providing the people of Virginia Park with a focus to build and improve their community.

It is fitting that the Virginia Park Citizens Council has honored and thanked Clarence Jackson for his achievements but more so for his dedication, and I would like to join them in this tribute.●

SALUTE TO GOV. HAROLD E. STASSEN

● Mr. DURENBERGER. Mr. President, this week marks the 40th anniversary of the founding of the United Nations in San Francisco.

As world leaders gather in New York, it is important to reflect on the contributions to the founding of this important world institution by a fellow Minnesotan—former Gov. Harold E. Stassen.

In honor of this outstanding American, and in honor of his contributions to the founding of the United Nations, I ask that the following article on Governor Stassen which appeared recently in the St. Paul Dispatch and Pioneer Press be printed at this point in the RECORD:

The article follows:

AS TIME PASSES, MANY MAY FORGET STASSEN'S REMARKABLE FEATS

(By Robert E. Matteson)

Former Gov. Harold E. Stassen has just celebrated another birthday. As he marks another year, the United Nations Charter marks its 40th anniversary year. Many Minnesotans who are much younger undoubtedly do not realize that he is the sole surviving U.S. signer of the historic U.N. Charter.

In 1945, at the age of 38, he was called from active duty in the Pacific by President Franklin Roosevelt to be a U.S. representative at the United Nations Charter Conference in San Francisco. Luminaries on the world foreign policy scene—such as Foreign Minister Molotov from the Soviet Union, Secretary of State Edward Stettinius and Foreign Secretary Anthony Eden from Great Britain—attended that conference. Despite their presence, Stassen was singled out by correspondents from around the world as one of the two delegates who made the greatest contribution to formulating the charter.

Harold Stassen, 78 on April 13, still is making an important contribution in many public and private areas of service to the country. However, for 20 years, from 1938 to 1958, he was one of the great forces in American and world politics and one of the great public servants of our time. Most Minnesotans are too young to remember his precedent shattering election to the governship of Minnesota in 1938. At age 31, he was the youngest governor in the history of the United States.

During three terms, he initiated far reaching reforms in labor relations, civil service, budget and government organization. He was twice elected chairman of the National Governor's Conference. At 33, in 1940, he was the keynoter of the Republican National Convention in Philadelphia. Then, in an unprecedented move, he stepped down from the rostrum and led the Wendell Willkie forces on the convention floor to Willkie's nomination for president.

In 1946, he was invited by Harvard University to give the renowned Godkind Lecture on Human Rights. My old mentor, Professor William Y. Elliott of the Harvard School of Public Administration (now the Kennedy School of Government), told me later that the Harvard faculty felt Stassen's was the greatest Godkind lecture that had yet been given.

It was in March of that year, 1946, that I, at age 31, joined Stassen as his research associate. I had just finished my service in Europe with the 80th Infantry Division of Patton's 3rd Army and assignment to the Nuremberg Trial. Stassen, 39, was beginning his first and strongest bid for the Republican nomination for president. As part of his campaign, I went with him on a tour of the capitals of Europe, which included a dramatic midnight interview with Joseph Stalin in the Kremlin. Stassen more than held his own in taking the offensive against Soviet censorship, the Soviet doctrine of the inevitability of war and Soviet attacks on what Stassen called our "people's capitalism."

In the spring of 1948, Stassen reeled off a succession of upset victories in the Wisconsin, Nebraska and Pennsylvania primaries against Sen. Robert Taft of Ohio; Gov. Thomas Dewey of New York; his old boss in the Pacific, Gen. Douglas MacArthur; and even more interesting in the Pennsylvania primary, his later boss Gen. Dwight Eisenhower, who finished seventh. As Stassen moved through the final primary in Oregon, he was leading all candidates in the Gallup Poll. But, then, bone-weary from a long one-man campaign, he lost the key, nationally broadcast debate with Dewey on outlawing the Communist Party.

After this, the polls flipped. He lost the Oregon primary and then the GOP nomination. Dewey lost the November election to Harry Truman by a narrow margin. He deserved to lose, for he was overconfident and had not campaigned strongly. I believe that if Stassen had won the Oregon debate and then the primary, he would have won the nomination and beaten Truman. He would have staged a much stronger campaign than Gov. Dewey.

Later in 1948, Gov. Stassen, again at the young age of 41, was chosen president of the University of Pennsylvania. It was the first time in the history of that great university founded by Benjamin Franklin that it had gone outside of Pennslyvania for a president or had chosen one from political life. There has been some criticism of Stassen's four-year tenure there, on the grounds that he was out around the world and the country too much and that he was too heavily involved in politics. But the fact was that he had accepted the job on the condition that he would participate in "public affairs" in the tradition of its founder Franklin.

As a matter of fact, Stassen did everything he was asked to do and more. He balanced the budget, reduced the deficit, reorganized the administration, raised the money for several new buildings, lowered racial barriers and brought many world and national leaders to the campus.

Finally, Harold Stassen for five years was a leading member of President Eisenhower's Cabinet and National Security Council. From 1953 until 1955, he was director of the Mutual Security Agency and the Foreign Operations Administration. The last three years of his tenure, from 1955 to 1958, he held a key position never before created in any government—Special Assistant to the President for Disarmament, with Cabinet and NSC status. He performed admirably in both assignments, bringing in fresh ideas and exhibiting a boldness of execution that was seldom if ever matched by any of his many successors.

As I found in a long conversation with President Eisenhower at his farm in Gettysburg in 1964, Eisenhower had great admiration for Stassen's ability. He welcomed Stassen's often different views in the Cabinet and National Security Council sessions.

But Secretary of State John Foster Dulles did not. One of the later final strains in their relationship was when the New York Times, in a lead editorial acclaiming Stassen's appointment as Special Assistant for Disarmament, called him "Secretary for Peace." As I was told later by Livingston Merchant, one of Dulles' assistant secretaries, Dulles on reading this exploded and said, "If he is Secretary for Peace what am I? Secretary for War?!"

The fact was, as I pointed out in a speech at the University of Minnesota in February 1958, just as Stassen was being frozen out of the Eisenhower administration by Dulles, the two men believed in two very different emphases in foreign policy. A shorthand way of expressing the difference was that Dulles believed in a policy of "increased

pressure" on the Soviet Union, hoping for its collapse, while Stassen—and I think also Eisenhower—stressed a "bolder exploration of the relaxation of tension" concept. Following this policy, Stassen came very close in 1957 to masterminding the first significant arms control agreement in U.S.-Soviet history. His pioneer work set the standard and the stage for much that has since followed—the agreements on the Limited Test Ban, The Peaceful Use of Outer Space, Nuclear-Free Zones, Non-Proliferation of Nuclear Weapons, and Salt I and II agreements.

Minnesota can feel proud of its native son and know that he has served well his state, the nation and the interests of world peace. It is fitting that at his own University of Minnesota there is being established under the able leadership of Harlan Cleveland, director of the Hubert Humphrey Institute of Public Affairs, a bi-partisan Harold Stassen Center for World Peace.

Likewise it is fitting that on June 26, the 40th anniversary of the signing of the United Nations Charter, Harold Stassen, the last remaining U.S. signer, should present for public scrutiny his own redraft and update of that Charter, which he played such a key role in drafting.●

IRV KUPCINET

● Mr. DIXON. Mr. President, I rise to call to the attention of my colleagues a most happy anniversary being observed in the city of Chicago today, October 25, 1985.

Fifty years ago today, Mr. Irv Kupcinet began his journalistic career with the predecessor newspaper of the one he is today so closely associated with, the Chicago Sun-Times.

In Chicago, in Hollywood, in Washington, everyone knows him as Kup, and Kup knows everyone.

As a resolution passed in his honor by the Cook County Board of Commisioners says:

He has met and interviewed world leaders, presidents, scientists, authors, artists, celebrities and political leaders for both his Sun-Times column and for his long-running and popular television show.

In his home town, Kup is also known as a man with a big heart. His "Purple Heart Cruise" on Lake Michigan each summer for disabled veterans is one of the largest and best-known charitable efforts in the city.

His philanthropic efforts in conjunction with the Variety Club of Chicago and Weizmann Institute of Science are untiring.

In short, Mr. President, Irv Kupcinet has made a lasting impression on the city of Chicago throughout his distinguished career. He has made it a better place to be, and the best part is that he is still doing it every day.

I hope my colleagues will join me in saying congratulations to Kup and his lovely wife and associate, Essee, and in wishing them many more years of happiness and productivity.

ORDER OF PROCEDURE

Mr. SIMPSON. Mr. President, I also ask unanimous consent that the minority leader be recognized for a history of the Senate speech, which speeches are indeed very important to all of us. I, personally, have been an occupant of the chair or have been in the Chamber at the time when many of those speeches have been presented. They will be a most meaningful compilation to all of us, to historians and citizens, for decades to come. Literally so.

The minority leader will also be recognized for the presentation of a resolution for referral.

ORDER FOR ADJOURNMENT UNTIL 11 A.M., MONDAY, OCTOBER 28, 1985

Immediately following the conclusion of the minority leader's speech, the Senate will automatically stand in adjournment until 11 a.m., Monday, October 28, 1985.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. BYRD. Mr. President, I thank the distinguished assistant Republican leader for his courtesy in arranging for these remarks to be made at this time, and for my introduction of a Senate resolution to provide for TV and radio coverage of Senate debate. That resolution will be introduced only for referral.

THE UNITED STATES SENATE

TWO WEST VIRGINIA SENATORS

Mr. BYRD. Mr. President, nearly 1,800 men and women have served in the United States Senate since its creation in 1789. In my continuing series of addresses on the Senate's history, I have spoken of the most illustrious among these individuals. Most of us today would immediately recognize such names as Clay, Calhoun, Webster, Benton, Aldrich, Robinson, Barkley, and Taft—among several dozen others. These members, by virtue of their talent, their longevity, their opportunities, and their accomplishments will be remembered as long as there is a Senate of the United States.

But, Mr. President, there are others from among the ranks of former senators whose names are not so familiar to a national audience. Obviously, not all senators have the opportunity to chair major committees, or to serve for a quarter century or more. A large percentage of the Senate's 1,667 former members served for a decade or less. It is to this group that I shall turn, from time to time, for a view of these often insufficiently heralded, but nonetheless significant careers.[1]

[1] Footnote at end of history.

Today, I shall discuss two senators—one a Democrat from the late nineteenth century and the other a Republican from the early twentieth century. Although neither of these men has an enduring national reputation, both are well remembered within their home state of West Virginia.

At noon on January 12, 1893, members assembled as usual in the Senate chamber. For those who braved that day's bleak winter weather, however, there was nothing commonplace about the session that was about to begin. Indeed, these men had come for reasons that had nothing to do with the usual end-of-session legislative rush. The object of their special attention, on this occasion, reposed in the adjacent Marble Room. There, attended by an honor guard of Capitol policemen, lay the body of Senator John Edward Kenna. At eight minutes before one o'clock, Speaker of the House Charles Crisp led a delegation of ten House members through the south door and down the center aisle to their reserved seats. Closely on the heels of the House delegation followed Chief Justice Melville Fuller and the associate justices of the Supreme Court, the diplomatic corps, and finally President Benjamin Harrison and his cabinet.

As these distinguished visitors took their places, the Senate Sergeant at Arms entered from the northeast door. Behind him followed senators and representatives, a delegation from the West Virginia legislature, the casket bearing the remains of Senator Kenna, and an escort of twenty-three Catholic clergymen. Following a dignified thirty-minute service, the body of Senator Kenna was removed to his quarters on the present-day site of the Dirksen Building and then to the Pennsylvania Railroad Station for the final trip back to his beloved West Virginia.[2]

Mr. President, all of this attention would suggest that the deceased was a man of great prominence and advanced years. Although Senator Kenna had achieved a commendable record during his ten years as a member of the Senate's minority party, he had only reached the age of 44.

John Edward Kenna was born in Kanawha County, Virginia on April 10, 1848. He was a descendant on his mother's side of General Andrew Lewis, the pioneer Indian fighter and land speculator of the Virginia frontier era. His father, a native of Ireland, had come to the United States at the age of 14. The elder Kenna developed a successful law practice and earned a reputation as a spell-binding public speaker. His life, too, ended prematurely. He died in his 39th year, leaving to his wife's care eight-year-old John and three daughters. When he was 11, John moved to Missouri with

his family. There, despite his youth, he mastered the art of sod-busting with a simple plow and four yoke of oxen. In 1864, when Kenna turned 16, he joined General Shelby's brigade in the Confederate Army. Despite a shoulder wound, he fought bravely until serious illness forced him to a hospital for six months. Shortly after he returned to duty, his unit surrenderd to Union forces at Shreveport, Louisiana. At the close of the war, young Kenna returned to Charleston in the recently established state of West Virginia. Thanks to the generosity of friends, he enrolled in St. Vincent's College at Wheeling, where he studied for three years. In 1870, following a two-year apprenticeship in a law office, he was admitted to the West Virginia bar.

Tall, handsome, and a captivating public speaker, Kenna rose rapidly through the ranks of his state's Democratic party. In 1872 he was elected prosecuting attorney for Kanawha County. Finding this position insufficiently challenging, Kenna, two years later, unsuccessfully sought his party's nomination for a seat in the House of Representatives. Again, in 1876, he made a bid for a House seat. On that occasion, a number of leading Democrats in his home county issued a circular letter in support of a more senior candidate. Undaunted, Kenna confronted his adversaries and boldly set forth his own credentials at a campaign rally. The young candidate's remarkable statement illuminates his extraordinary persistence. Referring to the signers of the circular letter he said:

I have no word of unkindness for those distinguished men. But you will pardon me when I say that if I could exchange places with any one of them; if I could stand a matured, successful, established man, in all that the terms imply, and look upon a boy left in orphanage at eight years; if I could watch the pathway of his childhood, with the obstructions confronting it, and witness his struggles, his hardships, his labors, and his prayers; if I could see him marching on through adversity until kinder stars seem to shine upon him, and he was about to attain through trial and vicissitude a position of honor to himself and of usefulness to his fellow man—before I would sign a paper whose only effect would be to break down and ruin that young man, I would be carried to one of your lonely hillsides and there laid to rest forever.[3]

That speech and others had their effect, for Kenna won a seat in the House of Representatives by a large margin. At the time he arrived in Washington, at the age of 28, he was that body's youngest member.

In the months before the start of his term in the House, Kenna was actively involved in a campaign to promote Charleston as the permanent capital of West Virginia. Four years earlier, much to the frustration of those in the State's southern region, the legislature had returned the seat of government from its temporary site in Charleston to its original location in Wheeling. Kenna insured a large turnout for the determining vote on August 7, 1877, by calling on young Booker T. Washington who spent the summer on a speaking tour of the State, appealing to the area's black population.

The story also goes that Kenna was in a tavern one evening in West Virginia after a long day in which he had been traveling and speaking on behalf of the capital being located in Charleston. As his fortunes seemed to go lower and lower and lower, Kenna was a dejected and discouraged man. He made a new acquaintance on this particular evening, however. He began talking with a man who happened to stop by at the tavern, and Kenna stated to the gentleman that he had been traveling around the State attempting to exhort audiences to vote for Charleston as the site of the capital of West Virginia. His audiences, he said, however, had been small, and he had, therefore, not been able to reach as many West Virginians as he needed if his campaign was to be an effective and successful one.

His new acquaintance invited Mr. Kenna to travel with a circus, Robinson's Circus, which at that point was in West Virginia, and the new acquaintance, stating that he was affiliated with the circus as Lowlow the Clown, told Mr. Kenna that if he would but accompany the circus on its travels throughout the State, he, Mr. Lowlow the Clown, would, for a few minutes during his act, introduce Mr. Kenna so that Mr. Kenna could then speak to the audience and persuade the voters to support Charleston as the location of the capital. Kenna took Lowlow the Clown's challenge to heart and decided that he would, indeed, travel with the circus. He did and he spoke to audience after audience throughout the State.

The effort was successful, and years later, when Kenna was serving in the United States Congress he was speaking before an audience in Washington one evening. During his speech, he related the story as to how he had traveled with the circus and had appeared during the acts of Lowlow the Clown to speak on behalf of Charleston, which was, indeed, the choice of the voters of West Virginia for State Capitol.

When Kenna sat down, a gentleman in the audience stood up, about midway from the front to the back, and stated that, indeed, Kenna's was a true story. He could vouch for it because it was he, Lowlow the Clown, who had met with Kenna on that evening in the tavern years before and had offered to help Mr. Kenna by providing a few minutes during his, Lowlow the Clown's, act daily at the circus.

So, as one prominent historian of West Virginia has concluded, "More than any other one person, Kenna was responsible for making Charleston the permanent seat of the State Government."[4]

While in the House, Kenna served with distinction on the Commerce Committee. He was instrumental in fashioning legislation to prohibit abuses in rail transportation such as railroad pools, rebates, drawbacks, and discriminatory rates. Closer to the interests of his southeastern West Virginia constituency, Kenna worked for federal aid to improve navigation on the Great Kanawha River to open up the area's rich coal, timber, and salt resources.

While serving his second term he received a letter of instruction from the West Virginia state legislature. By unanimous vote, that body requested the states's congressional delegation to support a measure that would provide a subsidy to the Texas and Pacific Railroad. Forthrightly, Kenna responded to the legislature, "To support this measure on my part would be to violate the solemn pledges which I have made a hundred times over to the people of my district. I have not denounced subsidies /only/ to come here and support them. I have not raised my voice in opposition to class legislation against the interests and rights of the masses to come here and lend my voice to the consummation of that very work."[5] In response to Kenna's courageous stand, the legislature reversed its earlier position and vindicated its determined representative. His success in these efforts earned him a secure place in the House. In 1883, as his fourth term was about to begin, the state legislature elected Kenna to a seat in the United States Senate.

In the Senate, also as that body's youngest member, Kenna continued his work for railroad reform and for navigation improvement. Highly regarded for his legislative skills, as well as for his smooth diction and sharp, penetrating intellect, Kenna quickly moved to a position of leadership within the chamber's Democratic minority. Perhaps his most notable accomplishment came as a result of a controversy between the Republican controlled Senate and the Democratic administration of President Grover Cleveland. Of the 125,000 non-military federal positions, 96,000 were postmasterships. These were generally part-time posts in small towns and they paid less than $1,000 a year. But they brought great political influence to the president who filled them. After a 25-year absence from the White House, Democrats expected to obtain as large a share of these patronage jobs as possible. And, where possible, the new president obliged them.

Senate Republicans viewed this turn of events with dismay and demanded that Cleveland give adequate explanation for each removal. Always conscious of preserving the prerogatives of his office, the president refused.[6] Kenna's brilliant and effective argument for executive independence in this matter won him a great deal of attention. In a speech that lasted three hours and twenty minutes, before a packed Senate chamber, Kenna reviewed the complex and politically explosive history of presidential appointment-making. As one observer recalled, "The constitutional feature was argued and presented with precision, clearness, and simplicity, and, withal, the speech was strongest for its dignity and fairness."[7] Following that address, Kenna enjoyed excellent relations with the Cleveland administration! Throughout his Senate service, Kenna provided intellectual fire to fellow Democrats in his defense of the president's controversial 1887 tariff message and in the subsequent indictment of the Republicans for their failure to achieve tariff reform. The state legislature reelected Kenna to the Senate in February 1889 by a vote of 46-45, attesting to his strong popularity despite bitter factional disputes within the State's political parties.[8]

Mr. President, this brief review of John Kenna's congressional service suggests a number of explanations for the universal expression of sorrow that followed his death as a result of heart disease. This one senator, who left behind a wife and six young children, combined a gentleness of spirit with a hardened courage that led him to follow his own lights, regardless of the political consequences. As one of his associates observed, "It was in the simplicity and generosity of his character that Mr. Kenna was preeminent. He was most rich in his capacity for friendship. All who came to know the man became his friends. His frank nature, his ready sympathy, his unpretentious manners, combined to make a personality so winning upon the affections that no man was more loved in life or has been more mourned in death.[9] The *Washington Star* summarized his career in words that would be gratifying to any person in public life. Its correspondent wrote, "The career of Mr. Kenna has been an unsullied success. Never has the suspicion of anything but devotion to the interests of his state and the country at large crossed his public life. He was a politician of unusual resources and ability, but he was also a politician in the highest sense of the word."[10]

Today, hundreds of thousands of visitors to the United States Capitol Building pass by a dignified marble statue of Senator John Kenna, placed here in 1901. They are, no doubt, unaware of the noble spirit and the distinguished contributions of this man whom West Virginia chose to honor in one of her two donations to the Statuary Hall collections. Perhaps my remarks today will help to reawaken that memory, as well as that of other notable men and women of whom Kenna is but one shining example.

Now, Mr. President, I turn to the second of these two former U.S. Senators from West Virginia whom I have chosen for attention in this speech in my continuing series on the United States Senate—Henry Drury Hatfield. First, however, I shall reconstruct the story of a mountain feud about which we all have heard at one time or another and which bears Henry's family name—the Hatfield-McCoy feud.

On August 7, 1882, a knife fight broke out in an apple orchard on the banks of a tributary of the Tug Fork River—that wooly, maverick stream slicing through the Cumberland Plateau and delineating West Virginia from Eastern Kentucky. Again and again, knives were plunged into one man's body. When the struggle was over, Ellison Hatfield lay dying, and the Hatfield-McCoy Feud entered American legend.

The Hatfield-McCoy Feud is one of the most famous incidents in West Virginia history.

Few themes in American folk history have received as much attention as has the Hatfield-McCoy Feud. In stage dramas, comedies, movies, television shows, songs, and romantic literature, various aspects of the feud have been emphasized, often to the detriment of the total significance of that tragic conflict. Some interpreters have dwelt on the love affair between Roseanna McCoy and Johnson Hatfield to twist the feud into a "Romeo and Juliet" yarn. As recently as 1975, a television adaptation inaccurately distorted the confrontation between large numbers of men in both families into a test of wits between just the two clan leaders, "Devil Anse" Hatfield and "Ran'l" McCoy, and concluded the account with the two patriarchs shaking hands on a gentlemen's agreement to guard the environment! Other interpretations have trivialized the mutual vendetta of the two families into a quarrel over a pig!

In fact, the Hatfield-McCoy Feud is an example of frontier culture out of place in a dawning new age. In an earlier era, a protracted, armed clash by two extended families might have gone largely unremarked. The Grangerford-Shepherdson feud in *The Adventures of Huckleberry Finn* demonstrates the relative commonplaceness of such interfamily guerrilla warfare. In an age and place in which law enforcement was meager at best and, in some places, nil at most, feuds were sometimes seen by wronged or insulted parties as the most practical, albeit inefficient, means to exact justice—speedy and sure.

And in a feuding area, even the feudists' nearest neighbors might be wholly uninvolved, careful not to take sides but certain to take cover when the shooting began. Such neighbors continued to farm, hunt, go to church, trade, and have noncommittal social contacts with both sides in the feud. When feuds broke out on the frontier, whether in the Appalachian highlands, on the Illinois plains, or along Mark Twain's Mississippi, most people went about their business and exercised a meticulously circumspect noninvolvement.

But played out mostly in the 1880's, the Hatfield-McCoy Feud caught the fancy of the Late Victorian press at a time when reporters, editors, and publishers were learning that sensation, violence, sex, and melodrama sold papers and increased circulation and advertising dollars. As the struggle wore on, the Hatfield-McCoy Feud made gripping reading for newspaper customers in far-distant New York, Chicago, or Baltimore. In a fashion familiar to modern readers and television viewers, the issues of the feud were oversimplified, the principal personalities caricatured, and the story perhaps overplayed. And then, the drama ceased. After all of the uproar, no exciting climax followed; the feud ended, as T.S. Eliot might have had it, "not with a bang, but a whimper." Only the stories remained, lingering on in the memories of the people of West Virginia, Eastern Kentucky, and other areas of the Southern Highlands, to this day.

But to understand the Hatfield-McCoy Feud—indeed, to understand Appalachia itself—one has first to understand the concept of the frontier. Often, even historians portray the advance of the American frontier as a steady, inexorable movement of European civilization right across the continent, from east to west and shore to shore, unbroken. As sometimes scripted by Hollywood, the frontier started marching on the beaches of the Atlantic westward and swept all before it; when the line of civilization passed a geographic region, everything behind was supposed to have blossomed with the expected accoutrements of settled culture—neat cottages, picket fences, Colonial-style churches, uniformed policemen on the corner, and well-behaved citizens.

That, too, is an oversimplification.

West Virginia was part of the original eighteenth-century frontier. Before the Revolutionary War, George Washington penetrated deeply into the West Virginia wilderness, saw and proclaimed its potential, and set about establishing a large plantation settlement on the river banks of the lower Kanawha Valley.

But following independence from Britain, the westward movement of

American settlers advanced across the Appalachian barrier—not in a massive frontal assault, but in probing columns searching out the least formidable routes. To outflank the mountains of West Virginia, the National Road found a path from Cumberland, Maryland, to Wheeling, on the Upper Ohio. Farther south, the main pioneer route was down the Great Valley of Virginia and either northwest through the Cumberland Gap in Kentucky, or southwest down the Holston River into the Tennessee Valley. In any case, the vast West Virginia wilderness—as well as immeasurable stretches of Eastern Kentucky, Tennessee, and the mountains of Georgia and the Carolinas—lay largely undisturbed by the influx of settlers sprawling out across the Midwest and into the Old Southwest.

Particularly for that reason, the great watershed of the Tug Fork and Big Sandy Rivers remained virgin territory long after the Daniel Boones and Davy Crocketts had moved on—a frozen frontier of hunters and trappers living in log houses and far away from the legal sophistications of Richmond, Frankfort, or Cincinnati. Even in the 1830's, finished goods or refined foods such as sugar or coffee transported into a town like Logan, West Virginia, were commonly bartered for beaver pelts, beeswax, honey, ginseng, sassafras, ramps, or venison. Most homesteads were still built of handhewn logs cut from the primeval forests surrounding and chinked with mud to keep out bitter winter winds. Folk crafts, now again prized especially by young Americans searching for the pristine heritage—cloth-weaving, quilting, applebutter-making, meat curing, herb science, country fiddling and dancing, and a host of other examples of Americana—were daily resources on which sturdy men and women depended, not only for their amusement, but also sometimes for their very survival. In such a world as that, even common political and geographic nomenclatures like West Virginia, Kentucky, and Virginia had little meaning for people who had for generations had to be a law unto themselves. Judges, preachers, and school teachers were rare figures in the Tug Fork Valley, and even the ceremony of marriage might be a relatively informal arrangement between the families involved.

The War Between the States *did* reach into the narrow hollows of the Tug Fork and its tributaries, however, and men on both shores of that river chose their sides. In those decisions lay the initial roots of the Hatfield-McCoy clash.

One complication in West Virginia history is the pro-Confederate sentiment of many of that state's people that West Virginia's separation from the Old Dominion often glosses over. At that time, more than one-third of the voters in what is present-day West Virginia approved Virginia's secession from the Union in the 1861 referendum ordered by the Richmond secession convention that same year. And Confederate sentiments were particularly strong in some rustic areas of southern and southwestern, as well as in northeastern sections of what is now West Virginia.

Swept along in that sentiment, William Anderson Hatfield and his brother Ellison enlisted in the Confederate army, eventually becoming members of a unit called the "Logan Wildcats," named for their home county.

That county, incidentally, was one of the four counties in the old 6th Congressional District, which I represented in the United States House of Representatives from January 3, 1953 to January 3, 1959.

Traditionally, the Hatfields are interpreted as being Confederate sympathizers, as oppose to the McCoys, most of whom at the time lived across the Tug Fork River in Eastern Kentucky and are usually portrayed as Unionists, though, in fact, more McCoys were Confederate sympathizers than Union supporters.

One of the Unionist McCoys, Asa Harmon McCoy, was at his Eastern Kentucky home on furlough from the Federal army in 1863 when he was sought out and murdered by local Confederates. Though not directly implicated in Harmon McCoy's death, Anderson—or "Devil Anse" Hatfield, as he was known—suffered, because of his Confederate connections and friendship with local Confederate sympathizers, from the McCoys' indignation at the death of one of their own. Consequently, relations between the two families cooled into an uneasy truce at best.

Roughly thirteen years after Harmon McCoy's death, another event added to the McCoys' grievences. As late as the 1880's in the Tug Fork watershed, privately owned hogs were allowed to range freely in the woods to forage for themselves, much as they had done in the Middle Ages in Europe. As with cattle in the West, the hogs were supposed to bear the brand of their owners, and at "roundup" time in the fall, any little pigs in a sow's litter were branded with the same mark.

In Pike County, Kentucky, one autumn in the late 1870's, however, Randolph McCoy—popularly called "Ran'l"—failed to locate one of his sows and her offspring, and after a lengthy search with the aid of his sons, concluded that his property had been stolen.

Several days later, Ran'l's son Bill spotted a sow and piglets answering the description of his father's lost livestock, on the land of Floyd Hatfield, and Ran'l obtained a warrant charging Floyd Hatfield with hog theft. In a short time, kinsmen of both men throughout the area lined up behind their relatives.

A jury of six Hatfields and six McCoys, with a Hatfield judge, decided 7-5 in favor of Floyd Hatfield, even though the disputed sow bore a McCoy brand. Aside from rankled pride and understandable muttering, that might have ended the disagreement. But harsh words between "Squirrel-huntin' Sam" McCoy and one of the Hatfield witnesses, Bill Staton, led to Staton's death on the West Virginia side of the Tug Fork some weeks later, and another rivet was in place in the feud's prelude.

In 1880, the direct collision between Devil Anse Hatfield and Ran'l McCoy began, though some experts contend that the two patriarchs never met face to face. At an election site in Pike County, Kentucky, Johnson Hatfield—"Johnse," Devil Anse's son—spied Ran'l's daughter Roseanna, escorted her for a walk in the woods, fell in love with her, and took her back with him to his father's home in West Virginia, all without Ran'l's knowledge or permission.

The following morning, "Johnse" told his father "Devil Anse" that he intended to marry Roseanna McCoy, but the Hatfield chieftain refused to bless the union of his son with Randolph McCoy's daughter. Nevertheless, Roseanna stayed on with "Johnse" at "Devil Anse's" home, and left only after the inevitable occurred, going to live at a relative's home, three months pregnant. There, during a rendezvous with Roseanna, "Johnse" was captured and kidnapped by Ran'l and three of his sons, who started off with him back across the Tug Fork toward Pikeville, Kentucky.

Fearing that "Johnse" was going to be killed by her father and brothers, Roseanna rode ten miles on horseback across mountainous country to warn "Devil Anse" of his son's predicament. With forty Hatfields traveling in his cohort, "Devil Anse" galloped off to "Johnse's" rescue, a feat accomplished without bloodshed, but not without added rancor in the growing confrontation between the Hatfields and McCoys.

"Johnse" Hatfield is said to have attempted one more time to gain Roseanna's hand in marriage, but fearing more conflict between their families, Roseanna refused. With that, the "Johnse"-Roseanna romance angle ceased to be a contributing factor to events. The sad Roseanna faded from the drama, never to be wed by her beloved "Johnse" and dying before her time—some claim from a broken heart.

For his part, "Johnse" went on to marry four times, the first time to Nancy McCoy, Roseanna's sister. Thus ended the "Romeo-Juliet" scenario.

But not the enmity between the two extended families.

On August 7, 1882, at another election day gathering, this time in Toler, Kentucky, a fight broke out between Ellison Hatfield—"Devil Anse's" brother—and three of Ran'l McCoy's sons—Tolbert, Pharmer, and Bud. During the fight, Ellison, as I said at the beginning of my remarks was severely knifed and was carried by attending Hatfields back to Matewan on the West Virginia side of the Tug Fork.

Two local Pike County peace officers took three McCoys into custody for the wounding, but on the way to Pikeville, a group of Hatfields ambushed the party and took the three McCoys away from the lawmen. Once back in West Virginia, the Hatfields incarcerated their hostages in a schoolhouse near Matewan. The Hatfields then announced that if Ellison survived his wounds, the captured McCoys would be turned over to the authorities in Kentucky for trial; but if Ellison died, the Hatfields would exact their own justice.

On August 9, 1882, Ellison Hatfield did die, whereupon the three McCoys in Hatfield custody were taken back across the Tug Fork into Kentucky, tied to a paw paw bush, and shot to death.

From that date, the Hatfield-McCoy Feud continued for the next nearly half-dozen years. From time to time, authorities in both West Virginia and Kentucky tried to quell the violence, largely to no avail and sometimes at the price of interstate relations. At one point, a grand jury in Pike County returned some twenty indictments against "Devil Anse" and his kinsmen for the death of the McCoy brothers. Since the Hatfields were securely off in West Virginia, however, nothing was done to implement the indictments. Likewise, indictments were handed down in Logan County, West Virginia, against various McCoys, but again no practical results followed. Eventually, the governors of West Virginia and Kentucky were drawn into a widening legal morass, with little success on either side.

Not to be thwarted, however, the swashbuckling Pike County deputy Frank Phillips—now married, incidentally, to "Johnse" Hatfield's former wife, Nancy McCoy—began slipping across into West Virginia with posse bands to spirit back suspected Hatfields without benefit of legal process. On January 19, 1888, a West Virginia Posse staged a shoot-out with the Phillips posse, bringing another direct clash between West Virginia and Kentucky, as well as intense national interest. Some expected to see the militias of the two states exchanging fire at any moment.

One of the saddest incidents of the feud occurred on New Year's Eve, December 31, 1887. A band of Hatfields crossed the Tug Fork into Kentucky, besieging and setting fire to Ran'l McCoy's home. In the fracas, Ran'l's daughter Alifair and Son Calvin were shot to death, and their mother Sarah was beaten within an inch of her life.

Likewise, if to a lesser degree, "Devil Anse's" tranquility was permanently destroyed by the feud, with raids and the turmoil of the conflict forcing him away from the familiar Tug Fork area deeper into the West Virginia hills near Logan Courthouse.

In 1888, Pikeville was finally the scene of the trials of several Hatfields for the murders at the burning of Ran'l McCoy's home. Though several men were tried, but one—Ellison "Cotton Top" Mounts—was convicted and hanged for the deaths of Alifair and Calvin McCoy. Another man—Valentine "Wall" Hatfield—was convicted and sentenced to prison, where he died after two years. Others, though convicted, were pardoned and never served time in prison, among them "Johnse" Hatfield himself.

National press coverage of the feud at that point bordered on the hysterical. Unremarked, however, was the fact that the feud killings ended in 1888.

Socio-economic changes had been going on in the Tug Fork Valley throughout the 1880's—changes that brought the Industrial Revolution to the Cumberland Plateau with a fury. The United States was undergoing an industrial boom—shipbuilding, bridge-building, steel-frame skyscraper building, railroad construction, and new homes being put up everywhere. Dry docks in Baltimore, Brooklyn, and Boston needed steel plates; Chicago and St. Louis wanted steel girders; Pittsburgh demanded more and more coal and coke; lumber yards hungered for sturdy trees to turn into housing joists and floor boards. Into Southern West Virginia and up and down the Tug Fork Valley, coal prospectors, timber hunters, land agents, and railroad surveyors scrambled, clambering over the rugged terrain in search of wealth and rail routes, and bringing with them an influx of construction teams, lumberjacks, miners, engineers, and a new way of life.

That new way of life spelled the real end of the Hatfield-McCoy Feud. The new residents of the Tug Fork Valley wanted peace, order, and safety from flying bullets and nighttime raids. Also, many of those born into and reared in the old frontier ways that had tolerated feuding lost patience with bushwhacking and clannish vengeance.

Change extended to the Hatfields and McCoys as well. "Johnse" Hatfield, for example, lay down his rifle to become a white-collar-wearing land agent for the Island Creek Coal Company. "Devil Anse's" nephew Greenway Hatfield became first a deputy U.S. marshal and then the three-time elected sheriff of the newly formed Mingo County, West Virginia. McCoys on both banks of the Tug Fork were also elected to public offices, became merchants or professional men, or themselves gained wealth as local coal operators.

Perhaps the most obvious example of the changing status of people along the Tug Fork is the case of Henry Drury Hatfield.

Henry Hatfield was born in Mate Creek in southern West Virginia's Logan County on September 15, 1875. He was the eldest son of Elias Hatfield whose brother, William Anderson ("Devil Anse") Hatfield, was considered the patriarch of this family of Hatfield-McCoy legend. Henry's father was the most serious and peaceable of the Hatfield brothers. Early in his young sons' life, he stressed the supreme importance of obtaining a good education. Consequently, Henry decided at an early age to become a physician. He realized that, as a doctor, he could make a significant contribution to his community, where the unbridled growth of the mining and railroad industries brought the unwelcome side effects of serious and debilitating accidents. The closest hospitals were many miles away in Richmond, Virginia and Columbus, Ohio.[11]

In common with John Kenna, Henry Hatfield possessed an almost unlimited capacity for long hours of concentrated labor. He graduated from Franklin College in 1887 at the age of 12! Seven years later, when only 19, Hatfield earned his medical degree from the University of Louisville medical school. Hatfield then returned to the Pocahontas coal fields in southern West Virginia. As there were no hospitals in that part of the State, Dr. Hatfield frequently performed his operations on kitchen tables in the homes of the coal miners by oil-lamp light and sterilized his medical instruments in bubbling kettles over log fires.

Early in life, Hatfield had developed a strong sense of social responsibility. He recognized that the best remedy for the deplorable health care situation lay within the power of State legislature. As a result of his determined and skillful lobbying, the legislature in 1899 appropriated $20,000 to establish three miners' hospitals—the only three in the State. For the next thirteen years, Hatfield served as the chief surgeon at the hospital in Welch, West Virginia. During that period he treated more than 18,000 miners without compensation from either the miners or the State. He even drew on his own financial resources to furnish the operating room and to purchase an x-ray machine.[12]

At the end of his life, he would look back at the establishment of these

hospitals as the most satisfying accomplishment of a long career.[13] His pioneering work in bone surgery brought him State-wide and national recognition. As Hatfield expanded his contacts throughout the State, he realized, as biographer Carolyn Karr has observed, that "politics could be an instrument, much like the ones he used in surgery. As a physician he could treat only isolated cases, and, while the satisfaction was immense, it could not solve the health problems of the entire State. Politics has been the instrument which established the hospitals; it could also be the instrument with which he could operate on the other ills which infected the State." [14]

Once Hatfield came to this realization, he climbed rapidly up the political ladder. As a member of the Hatfield clan, he had many kinsmen in West Virginia. As a medical doctor, he automatically enjoyed the respect accorded at the time to a man of such learning. As the company doctor for the Norfolk and Western Railway, which ran from one end of his county to another, his fame was assured. In 1904, Hatfield earned a second medical degree, this time from New York University. Two years later he won a three-way race, as a Republican in heavily Democratic McDowell County, for a position on the County Court.

During all of the 39 years I have been in politics in West Virginia, McDowell County has been an overwhelmingly Democratic county, as it was in Dr. Hatfield's day.

As president of the court, he launched a series of reforms that grew out of his medical experience. These included an improved road system and an end to the overcrowing and poor sanitation of the county's jail. In 1908, the voters of his district sent him to the State senate with an impressive electoral margin.[15]

In 1911, as Hatfield began his second term in the West Virginia State senate, he became embroiled in one of West Virginia's greatest political confrontations. Ending more than fifteen years of Republican domination in State political life, the voters had sent a greater number of Democrats to the legislature. In the house of delegates, they took over the majority. In the senate, however, there were fifteen Republicans and fifteen Democrats—a deadlock! Consequently, the party that could capture the post of senate president would thereby gain control of that chamber's significant legislative and patronage powers.

A particularly significant agenda awaited the senators of that session. The senate would oversee a redistricting of the State's political units based on the 1910 Census and it would fill two seats in the United States Senate—one for a full term and one for 2-years of an unexpired term. Because the Democrats held a numerical majority of the total number of State legislators, they had the votes to elect both United States Senators in the customary joint legislative session to be called for that purpose.

Hatfield emerged as one of the leading Republican candidates for the president's post. Given the great stakes, neither party was willing to yield to the other's demand to elect their candidate. The situation deteriorated quickly. The Republicans informed the Democrats that unless they received the presidency, they would not return to the senate chamber. When other pleas failed, the Democrats voted to issue warrants for the Republicans' arrest. The governor, Republican William Glasscock, dismissed the legitimacy of the Democrats' action, observing that they lacked authority as the legislature had not yet been formally organized to conduct business. The fifteen Republican senators, not easily reassured by the governor's decision, hastily boarded a train for Cincinnati at 3:00 o'clock in the morning.[16] They remained there for several days until the Democrats struck a deal. Two Democrats had emerged, in their party's caucus, as the leading contenders for the United States Senate vacancies. Before they could travel to Washington, they needed to be formally elected and certified by the State legislature. This would not be possible as long as the stalemate continued. Consequently, the Democrats agreed to support a Republican for the senate presidency as long as they could choose which Republican would be the candidate. They jointly selected Hatfield.[17]

From this position, Hatfield enhanced his reputation as a progressive reformer and as a vigorously partisan Republican. He fought efforts to limit the voting rights of blacks and to place property restrictions on voting. Despite his best efforts, the 1911 senate session ended in frustration. He believed that only the governorship offered him the power with which to address his State's many problems. In November 1912, following a grueling campaign, that reinforced his progressive stance, Hatfield won the governorship by a comfortable margin.

Henry Hatfield took the oath of office as West Virginia's fourteenth Governor on March 4, 1913, the same day that Woodrow Wilson became President of the United States. Each man immediately, in his own sphere, set out to deal with pressing social and economic ills. Within seven weeks, Governor Hatfield brought to an end an extended and bitter strike in the Paint Creek and Cabin Creek coal fields. On balance the settlement benefited the workers, for their union won recognition as the bargaining agent for the miners of Kanawha County.[17]

During his 4 years as Governor, Hatfield championed mine safety and health legislation, worker's compensation reform, woman suffrage and a host of other progressive reforms that associated him with similar activities within the administration of Woodrow Wilson. His strong, dominating, and sometimes vindictive personality led him into endless confrontations with the State legislature and the major business interests. He seldom hesitated to apply his influence, regardless of whose prerogative it usurped.[18] Despite some reverses, Governor Hatfield guided an impressive reform program into being. One historian summarized his term in office as follows. "In less than three years, he turned West Virginia from one of the most reactionary States dominated by machine and corporation politics into a leader in the forefront of the progressive movement."[19] Another scholar described Hatifield's attitude as follows. "The lack of personal political ambitions combined with a highly successful non-political profession allowed Hatield to fight his political battles on the principles and concepts that he chose himself and not those dictated by others. He could not and would not be controlled by anyone."[20]

Shortly after stepping down as Governor, Hatifield entered the Army Medical Corps and served as a military surgeon in France. At the end of World War I, he returned to the practice of medicine in Huntington, West Virginia. After a decade out of the political arena, however, he yielded to the urgings of state Republican party leaders and launched a campaign to unseat Democratic United States Senator Matthew Mansfield Neely. In the 1928 elections, the voters treated the Republicans well. They put Herbert Hoover in the White House and added seven Republicans to the Senate, including Henry Hatfield, who defeated Neely by a margin of nearly ten thousand votes.

In the Senate he drew good committee assignments, serving with prominent progressives such as George Norris on Agriculture, Hiram Johnson on Immigration, and Robert La Follette, Jr. on Manufactures. There he assiduously looked after the interests of his home State with amendments to the Hawley-Smoot tariff to protect the coal, glass, woolen, chemical, and lumber industries.[21] As always, he took a particular interest in health care issues.

In West Virginia, during that year, 2,000 war veterans waited with little hope of being admitted to the State's overcrowded hospitals. When the veterans' lobby approached Hatfield for assistance in obtaining a $2-million appropriation to build a veterans' hospital, Hatfield sought out Finance Committee chairman Reed Smoot. The

senior Senator from Utah paid little attention to the pleadings of West Virginia's freshman Senator. Not about to be put off, Hatfield reminded him that West Virginia had provided a greater percentage of soldiers to the war effort than any other State in the Union. The chairman curtly informed the Senator that it was too late in the session to be adding amendments to appropriations bills. To this, Hatfield responded by threatening an extended floor debate. He promised that he would "deliver an address that would take the Senate back to the birth of the State of West Virginia." [22]

When Senator James Watson, the second-ranking majority member of the Finance Committee brought the Veterans' Appropriation bill up for floor debate, he asked Hatfield not to offer his amendment. Hatfield later recalled, "He was most cordial, but did not make the least impression on me. I informed him that I was not only going to introduce the amendment, but discuss it over a long period of days." Watson conferred with Smoot. Several hours later, he returned to Hatfield and asked for the amendment. Shortly thereafter the bill passed the Senate with Hatfield's amendment intact. Soon, Huntington, West Virginia had a new veterans' hospital.

The autumn of 1929 brought the great stock market crash. Overnight, this economic cataclysm, which profoundly affected the lives of millions of Americans, dramatically transformed the Senate's agenda. Supporting President Hoover, Hatfield blamed the depression on faulty economic policies of European nations and, although he supported indirect relief measures, he resisted legislative remedies that would provide assistance directly to individuals.

Senator Hatfield found himself at odds with the administration of Franklin Roosevelt, and its congressional supporters, during the so-called "One Hundred Days" at the beginning of the 1933 session. He observed that "the 'must' bills went through like magic. I saw bills passed," he noted, "when a majority at times scarcely took the pains to read them. It was a hysterical, pliant, and submissive /climate/." The West Virginia Senator discovered the futility of his determined opposition to the Roosevelt program. "My voice," he said, "was a voice crying in the wilderness. Our scant minority was ruthlessly overridden on a wave of public hysteria." [23]

Hatfield particularly took aim at the proposed National Industrial Recovery Act. This measure was designed to revive industrial and business activity and to reduce unemployment. It would establish a system of industrial self-regulation relying on fair competition codes. Hatfield believed the bill would provide unwelcome national regulation of labor, despite the insertion of Section 7a guaranteeing labor's right to organize and "bargain collectively through representatives of their own choosing." Even United Mine Workers' Union chief John L. Lewis, who threatened, begged and cajoled the Senator, was unsuccessful in changing Hatfield's position. When Lewis exhausted all direct powers of persuasion, he told Hatfield that he would turn the full force of his union against the Senator in his 1934 bid for reelection. The Senator reacted with his customary toughness in telling a constitutent, "I consider /the NIRA/ an issue that far transcends mere political expediency." [24]

Hatfield demonstrated the same assertive stance in matters of foreign policy. Throughout many of his public speeches ran the theme of the "Red Menace." As he had considered the NIRA to be Russian-inspired, so too did he see dangerous consequences in President Roosevelt's plan to extend formal diplomatic recognition to the Soviet Union. After several meetings with the president, Hatfield went public with his opposition.

> It becomes apparent . . . from negotiations of President Roosevelt and Commissioner Litvinoff, who have been speaking the same economic language for some time—as evidenced by the similarity between America's NIRA and Russia's NEP—that the establishment of a Soviet Embassy in Washington is imminent. That is to be deplored. It is stated that recognition involves no approval of the Russian way of life. That is arrant sophistry. The issue as between democracy and communism can no more be compromised than Henry Clay could compromise the issues that found their solution at Gettysburg and Appomattox. There is no halfway house.[25]

Mr. President, Henry Hatfield's strident opposition to New Deal programs has struck some observers as inconsistent with his record of progressivism as state senator and governor. We must remember, however, that this opposition did not occur independently of the political climate in which he worked. As a devoted party loyalist, operating in a time of great political upheaval, Hatfield realistically could be expected to define policy issues to strengthen the severely weakened Republican party. His party colleagues acknowledge his aptitude for effective partisan combat by electing him chairman of the National Republican Senatorial Campaign Committee.

Henry Hatfield may have harbored aspirations for his party's 1936 presidential nomination. Unlike his earlier political career, however, he was no longer the right man at the right place at the right time. He recognized that reelection in 1934, at a time when Democrats controlled the rest of the state's congressional delegation and the governorship, would require a political miracle. As he feared, the midterm congressional elections did not provide the customary gains for the minority party. In fact, Senate Democrats picked up nine seats, giving them an impressive margin against the Republicans of 69 to 25 with two Independents. In a hopeless race, he lost his seat to 29-year-old Rush D. Holt, with whom, incidentally, I served in the West Virginia House of Delegates in the late 1940's. In explaining his defeat, Hatfield said, "Mr. /John L./ Lewis lined up labor agaisnt me for reelection for the reason that I had opposed the New Deal all the way through." [26]

Mr. President, timing is just about everything in political life. Henry Hatfield's rapid rise from county health commissioner to governor of West Virginia to U.S. Senator amply demonstrates the truth behind that statement. His biographer has written that "Hatfield came into the Governor's office at a time when the mood of the public was committed to reform. By the adroit use of proper techniques at the appropriate times he was able to keep the progressive tide from being diverted. He succeeded not only because he was a competent party leader, but above all because public opinion had been agitated to the point where it accepted innovation." [27]

Midway through Hatfield's single term in the Senate the tides shifted against him. He sought to tie his progressive legislative agenda to a party that, fairly or not, suffered the political consequences for allowing the Nation to drift into a calamitous economic despression. Thus, in 1935, Henry Hatfield set aside his political career and resumed the practice of medicine. He continued that practice for another two decades, well past the age of 80. On October 23, 1962, at the age of 87, Henry Hatfield died at his home in Huntington, West Virginia.[28]

In those eighty-seven years, Henry Drury Hatfield had witnessed unimaginable changes in the Tug Fork Valley, in West Virginia, and in the United States. As a child and as Devil Anse Hatfield's nephew, he had endured the direct, undiluted passions and violence of a frontier civilization; as an aged and respected public figure, he marveled with the rest of us at the space orbit of our distinguished colleague from Ohio, Senator JOHN GLENN, and at the exploits of other early American space pioneers. Certainly, Henry Drury Hatfield—physician, Governor, U.S. Senator, and nephew of a former Confederate Army sharpshooter—must have reflected on the revolutions that had taken place in his lifetime.

Henry Hatfield had adjusted phenomenally to the new conditions that spelled an end to the famous Hatfield-McCoy feud. Others, however, were neither so flexible nor so sanguine in

the face of the new world that burst in upon them.

In 1891, "Devil Anse" Hatfield was quoted as saying, "The war spirit in me has abated, and I sincerely rejoice at the prospect of peace." But the memories and the hurts were there, nonetheless. Having been forced by mounting violence out of his Tug Fork Valley home at the height of the feud, by the turn of the century, "Devil Anse" Hatfield had forever abandoned his old homesite and moved to Island Creek near Logan, West Virginia. There he spent the rest of his days in relative peace, being baptized a few years before his death in 1921 at age 82. In 1932, the Hatfield family erected a life-sized statue of him at his grave—perhaps significantly—turned facing away from the direction of the Tug Fork and all of those bitter remembrances that must have been his of death and outrage. "Devil Anse's" last living son, Willis Wilson Hatfield, passed away in 1978 at age 90.

Randolph McCoy's last years were more poignant. the feud left him a broken man. His home had been burned down. Two of his children had been murdered on the spot. His wife has been severely injured. In all, the conflict cost Ran'l McCoy six of his offspring, including the heart-crushed and beautiful Roseanna. For years, people say, Ran'l McCoy haunted the streets of Pikeville, Kentucky, mourning the world and the precious human treasures that had been snatched from him. Randolph McCoy died, 88 years of age, in 1914.

In 1976, perhaps the last chapter in the Hatfield-McCoy Feud was etched. In a cemetery in hilly Eastern Kentucky, a McCoy monument was dedicated to the members of that honored family lost in the feud. On that day, Willis Hatfield—"Devil Anse's" sole living son—shook hands with Jim McCoy—nephew of Ran'l McCoy. Willis Hatfield was age 88, and Jim McCoy was 91. In the warmth—and maybe the regret—of that human gesture, a colorful, tragic saga in American history came to an end. And in that moment of sincere unity, the last vestiges of a way of life vanished forever.

Mr. President, in recounting the lives of these two U.S. Senators, one cut off in his prime and the other who lived to a ripe old age, I recall the lines from Longfellow's "Psalm of Life:"

Art is long, and Time is fleeting,
And our hearts, though stout and brave,
Still, like muffled drums, are beating
Funeral marches to the grave.

I hope these two vignettes that I have presented today have illuminated the contributions of two diligent and colorful members of the Senate who have otherwise faded into the mists of history. They are perhaps more representative of the great majority of former senators, prominent in their generations but not so well remembered today. They do not stand in the ranks of the Webster's, Clay's, and Calhoun's, but in their time and in their way they served their State and Nation, and made this institution run. These are honorable accomplishments to which every senator, no matter what his status in history, should aspire.

Mr. BYRD. Mr. President, I ask unanimous consent to include at this point in the RECORD the footnotes to Two West Virginia Senators.

There being no objection, the footnotes were ordered to be printed in the RECORD, as follows:

FOOTNOTES TO "TWO WEST VIRGINIA SENATORS"

Mr. BYRD. Mr. President, I yield the floor.

PROGRAM

Mr. SIMPSON. Mr. President, just to recap the matters for Monday, the Senate will convene at 11 a.m. Under the standing order, the two leaders will be recognized for not to exceed 10 minutes each.

There is a special order in favor of the Senatcr from Wisconsin [Mr. PROXMIRE] for not to exceed 15 minutes to be followed by a special order for the Senator from Alabama [Mr. HEFLIN] for not to exceed 15 minutes.

Following the execution of these special orders, there will be a period for the transaction of routine morning business not to extend beyond the hour of 11:45 a.m., with Senators permitted to speak therein for not to exceed 5 minutes each.

Following routine morning business, the Senate will resume consideration of S. 1714, the 1985 farm bill. Votes can be expected during Monday's session.

ADJOURNMENT UNTIL MONDAY, OCTOBER 28, 1985, AT 11 A.M.

The PRESIDING OFFICER. Under the previous order, the Senate stands in adjournment until 11 a.m., Monday, October 28, 1985.

Thereupon, at 5:43 p.m., the Senate adjourned until Monday, October 28, 1985, at 11 a.m.

NOMINATIONS

Executive nominations received by the Senate October 25, 1985:

DEPARTMENT OF JUSTICE

John R. Bolton, of Virginia, to be an Assistant Attorney General, vice Robert A. McConnell, resigned.

IN THE NAVY

The following-named officer to be placed on the retired list in the grade indicated under the provisions of title 10, United States Code, section 1370:

To be admiral

Adm. Wesley L. McDonald, [redacted] /1310, U.S. Navy.

The following-named officer, under the provisions of title 10, United States Code, section 601, to be assigned to a position of importance and responsibility designated by the President under title 10, United States Code, section 601:

To be vice admiral

Vice Adm. Kendall E. Moranville, [redacted] /1310, U.S. Navy.

CONFIRMATIONS

Executive nominations confirmed by the Senate October 25, 1985:

NATIONAL COUNCIL ON THE HANDICAPPED

John S. Erthein, of California, to be a member of the National Council on the Handicapped for a term expiring September 17, 1987.

SECURITIES AND EXCHANGE COMMISSION

Joseph A. Grundfest, of the District of Columbia, to be a member of the Securities and Exchange Commission for the term expiring June 5, 1990.

DEPARTMENT OF STATE

Natale H. Bellocchi, of New York, a career member of the Senior Foreign Service, class of Minister-Counselor, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Republic of Botswana.

Michael Sotirhos, of the District of Columbia, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Jamaica.

Clyde D. Taylor, a Maryland, a career member of the Senior Foreign Service, class of Minister-Counselor, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Republic of Paraguay.

Robert G. Houdek, of Illinois, a career member of the Senior Foreign Service, class of Minister-Counselor, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Republic of Uganda.

Malcolm Richard Wilkey, of Texas, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Oriental Republic of Uruguay.

Richard Schifter, of Maryland, to be Assistant Secretary of State for Human Rights and Humanitarian Affairs.

UNITED NATIONS

Adele Langston Rogers, of Maryland, to be an Alternate Representative of the United States of America to the 40th session of the General Assembly of the United Nations.

EXECUTIVE OFFICE OF THE PRESIDENT

The following-named persons to be members of the Advisory Board for Radio Broadcasting to Cuba for the terms indicated:

For a term of 2 years:

Jose Luis Rodriquez, of Florida.

For terms of 3 years:

Joseph Francis Glennon, of Florida.

Danford L. Sawyer, Jr., of Florida.

Midge Decter, of New York, to be a member of the Advisory Board for Radio Broadcasting to Cuba for a term of 1 year.

John R. Silber, of Massachusetts, to be a member of the Advisory Board for Radio Broadcasting to Cuba for a term of 1 year.

Antonio Navarro, of New York, to be a member of the Advisory Board for Radio Broadcasting to Cuba for a term of 3 years.

U.S. INTERNATIONAL DEVELOPMENT COOPERATION AGENCY

Dwight A. Ink, of Maryland, to be an Assistant Administrator of the Agency for International Development.

DEPARTMENT OF LABOR

Dennis Eugene Whitfield, of Virginia, to be Under Secretary of Labor.

FEDERAL MINE SAFETY AND HEALTH REVIEW COMMISSION

Joyce A. Doyle, of New York, to be a member of the Federal Mine Safety and Health Review Commission for the remainder of the term expiring August 30, 1986.

SECURITIES INVESTOR PROTECTION CORPORATION

Roger A. Yurchuck, of Ohio, to be a Director of Securities Investor Protection Corporation for a term expiring December 31, 1987.

The above nominations were approved subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.

THE JUDICIARY

Laurence H. Silberman, of the District of Columbia, to be U.S. district judge for the District of Columbia circuit.

John S. Rhoades, Sr., of California, to be U.S. district judge for the southern district of California.

Lyle E. Strom, of Nebraska, to be U.S. circuit judge for the district of Nebraska.

Jose Antonio Fuste, of Puerto Rico, to be U.S. circuit judge for the district of Puerto Rico.

Richard H. Battey, of South Dakota, to be U.S. circuit judge for the district of South Dakota.

DEPARTMENT OF JUSTICE

Roy C. Hayes, Jr., of Michigan, to be U.S. attorney for the eastern district of Michigan for the term of 4 years.

Donald R. Brookshier, of Illinois, to be U.S. Marshal for the southern district of Illinois for the term of 4 years.

HOUSE OF REPRESENTATIVES—*Monday, October 28, 1985*

The House met at 12 o'clock noon.

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

Let the favor of the Lord our God be upon us, and establish Thou the work of our hands upon us; yea, the work of our hands establish Thou it.—Psalm 90:17.

Gracious God, bless the work of our hands that it may be pleasing in Your sight. May what we do contribute to justice between peoples and peace between the nations. May our hands and hearts, our strength and our witness, be used to Your glory and as an expression of good will to all the people of Your creation. In Your holy name, we pray. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate had passed without amendment a bill and joint resolutions of the House of the followng titles:

H.R. 3605. An act to provide that the authority to establish and administer flexible and compressed work schedules for Federal Government employees be extended through December 31, 1985;

H.J. Res. 308. Joint resolution designating the week beginning on October 20, 1985, as "Benign Essential Blepharospasm Awareness Week"; and

H.J. Res. 322. Joint resolution to provide for the designation of October 1985, as "National Sudden Infant Death Syndrome Awareness Month".

The message also announced that the Senate had passed with amendments in which the concurrence of the House is requested, a bill of the House of the following title:

H.R. 3244. An act making appropriations for the Department of Transportation and related agencies for the fiscal year ending September 30, 1986, and for other purposes.

The message also announced that the Senate insists upon its amendments to the bill (H.R. 3244) "An act making appropriations for the Department of Transportation and related agencies for the fiscal year ending September 30, 1986, and for other purposes," requests a conference with the House on the disagreeing votes of the two Houses thereon, and appoints Mr. ANDREWS, Mr. COCHRAN, Mr. ABDNOR, Mr. KASTEN, Mr. D'AMATO, Mr. HATFIELD, Mr. CHILES, Mr. STENNIS, Mr. BYRD, and Mr. LAUTENBERG to be the conferees on the part of the Senate.

The message also announced that the Senate had passed a bill, joint resolutions, and a concurrent resolution of the following titles, in which the concurrence of the House is requested:

S. 1570. An act to amend the Fair Labor Standards Act of 1938 to provide rules for overtime compensatory time off for certain public agency employees, to clarify the application of that act to volunteers, and for other purposes;

S.J. Res. 207. Joint resolution to designate November 1, 1985, as "National Philanthropy Day";

S.J. Res. 227. Joint resolution to commend the people and the sovereign confederation of the neutral nation of Switzerland for their contributions to freedom, international peace, and understanding on the occasion of the meeting between the leaders of the United States and the Soviet Union on November 19-20, 1985, in Geneva, Switzerland;

S.J. Res. 228. Joint resolution relating to the proposed sales of arms to Jordan; and

S. Con. Res. 76. Concurrent resolution asking that the President bring the rights of the Polish people to the attention of the Soviet Government.

UNITED STATES NEEDS NEW POLICY TOWARD PHILIPPINES

(Mr. RICHARDSON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RICHARDSON. Mr. Speaker, the deteriorating situation in the Philippines and the subsequent press reports this weekend that President Marcos has an incurable disease, with perhaps only 1 year to live, suggests that the United States needs a new policy towards the Philippines in order to avoid another Iran.

The Reagan administration has acted properly in dispatching Senator LAXALT to convey our concerns. But a stronger policy is needed to avoid a Communist takeover and preserve American security interests, specifically, Subic and Clark bases. Specifically, we need to attach strong conditions to our assistance to that country. First of all, we need to press for fair and immediate Presidential elections so that an orderly democratic transition can take place. Second, we must press the Philippine Government to make urgently needed military and economic reforms and wage a war on the endemic corruption in that economy. Third, we should stress to President Marcos that Chief of Staff Fabian Ver should not be reappointed, given his involvement in the Aquino assassination and his inability to lead the Philippine military insurgency.

Mr. Speaker, like the Shah, President Marcos has lost touch with his people and with reality. Let us act now before we are forced to pull the rug from under him. Let us act now so that our security interests are preserved and the Philippine people, our friends and allies, do not fall under Communist hands.

FEDERAL TRUST FUNDS

(Ms. OAKAR asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. OAKAR. Mr. Speaker, today I am introducing legislation that would mandate the Treasury pay back the interest lost because of the loss of investment of trust fund moneys from civil service retirement, military retirement, Social Security retirement, and the highway trust funds.

Mr. Speaker, we have not passed the debt ceiling with the Gramm-Latta Senate amendment and are thus holding these trust funds hostage. We are losing millions of dollars of interest that these trust funds normally invest, and it is very, very, very wrong to do this, grossly unfair to the senior citizens, and some estimate that we will be losing up to $300 million in interest money that belongs to those trust funds because of our failure to act.

I hope Members will take a look at this legislation which would restore that money.

GRAMM-RUDMAN

(Mr. ALEXANDER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ALEXANDER. Mr. Speaker, supporters of the so-called Gramm-Rudman proposal are like a man jumping off the Empire State Building and, on passing the fifth floor, announces, "So far so good."

The House is on record in support of strengthening the budgetmaking process, as of last week; and in passing Gramm-Rudman, the other body has made the same commitment. Unfortunately, when one takes a closer look at Gramm-Rudman, it becomes clear that, rather than cutting the deficit, the proposal would bring havoc to

Federal spending and plunge the Government into chaos.

The fears are expressed by those such as the Nobel Prize winners, the Secretary of Defense, the President's own economic advisers, and the chairman of the Armed Services Committee. The chairman of the Judiciary Committee even advises that the matter is probably unconstitutional.

Mr. Speaker, one must wonder how it would happen that such a prescription for chaos and disaster so poorly designed could ever pass either body of this Congress. Perhaps the answer lies in the small print in that it does not take effect until after the 1986 elections.

ANNOUNCEMENT BY THE SPEAKER

The SPEAKER. Pursuant to the provisions of clause 5 of rule I, the Chair announces that he will postpone further proceedings today on each question on passing bills or on each motion to suspend the rules on which a recorded vote or the yeas and nays are ordered, or on which the vote is objected to under clause 4 of rule XV.

Such rollcall votes, if postponed, will be taken on Tuesday, October 29, 1985.

DISTRICT OF COLUMBIA BUSINESS

The SPEAKER. The Chair recognizes the gentleman from California [Mr. DELLUMS], chairman of the Committee on the District of Columbia.

TRANSFER OF PAROLE AUTHORITY TO THE DISTRICT OF COLUMBIA PAROLE BOARD

Mr. DELLUMS. Mr. Speaker, by direction of the Committee on the District of Columbia, I call up the bill (H.R. 2050) to give to the Board of Parole for the District of Columbia exclusive power and authority to make parole determinations concerning prisoners convicted of violating any law of the District of Columbia, or any law of the United States applicable exclusively to the District, and ask unanimous consent that the bill be considered in the House as in the Committee of the Whole.

The Clerk read the title of the bill.

The SPEAKER pro tempore (Mr. GRAY of Illinois). Is there objection to the request of the gentleman from California?

There was no objection.

The Clerk read the bill, as follows:

H.R. 2050

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. The first sentence of the first section of the Act entitled "An Act to reorganize the system of parole of prisoners convicted in the District of Columbia", approved July 17, 1947 (D.C. Code, sec. 24-201a; 61 Stat. 378), is amended by striking out "for the penal and correctional institutions of the District of Columbia" and inserting in lieu thereof "for prisoners convicted of violating any law of the District of Columbia or any law of the United States applicable exclusively to the District of Columbia".

SEC. 2. The Act entitled "An Act to establish a Board of Indeterminate Sentence and Parole for the District of Columbia and to determine its functions, and for other purposes", approved July 15, 1932 (D.C. Code, sec. 24-203 through sec. 24-209; 47 Stat. 696-699), is amended—

(1) in section 6 (D.C. Code, sec. 24-206)—

(A) by striking out "(a)" in subsection (a); and

(B) by striking out subsection (b); and

(2) by striking out section 10 (D.C. Code, sec. 24-209) and inserting in lieu thereof the following new section:

"SEC. 10. The Board of Parole for prisoners convicted of violating any law of the District of Columbia or any law of the United States applicable exclusively to the District of Columbia (created pursuant to the first section of the Act entitled 'An Act to reorganize the system of parole of prisoners convicted in the District of Columbia', approved July 17, 1947 (D.C. Code, sec. 24-201a; 61 Stat. 378) has exclusive power and authority, subject to the provisions of this Act, to release on parole, to terminate the parole of, and to modify the terms and conditions of the parole of, any prisoner convicted of violating a law of the District of Columbia, or a law of the United States applicable exclusively to the District of Columbia, regardless of the institution in which the prisoner is confined.".

SEC. 3. Section 304(a) of the District of Columbia Law Enforcement Act of 1953 (D.C. Code, sec. 4-134(a); 67 Stat. 100) is amended by striking out ", or the United States Board of Parole has authorized the release of a prisoner under section 6 of that Act, as amended (D.C. Code, sec. 24-206),".

SEC. 4. (a) After the date of enactment of this Act, individual convicted of violating both a law of the District of Columbia (including any law of the United States applicable exclusively to the District) and a law of the United States shall be given separate and distinct sentences for such convictions.

(b) The United States Parole Commission shall retain parole authority over individuals who, prior to the date of enactment of this Act, received unified sentences for violations of both a law of the District of Columbia (including any law of the United States applicable exclusively to the District of Columbia) and a law of the United States.

SEC. 5. Within one year after the date of the enactment of this Act, the Board of Parole for the District of Columbia, under applicable guidelines, shall make parole eligibility determinations and shall set a date certain for full parole hearings for all individuals brought within the parole authority of such Board under this Act. Each such individual shall be notified in writing of any determinations made under this section.

SEC. 6. (a) Except as provided in subsection (b), the provisions of this Act shall take effect on the date of the enactment of this Act.

(b) The amendments made by sections 1, 2, and 3 of this Act shall take effect one year after the date of the enactment of this Act.

Mr. DELLUMS. Mr. Speaker, I move to strike the last word.

Mr. Speaker, this is the third Congress in which this question has been before the body. Two years ago, the House on a voice vote adopted the change in the law, but no action was taken by the other body. Under present law in effect for 50 years or more, the vast majority of offenders convicted of violating either a local District of Columbia law or Federal law that applies only in the District served their sentences in facilities operated by the District of Columbia, and if they are granted parole, it is by the local D.C. Parole Board. One thousand seven-hundred offenders, however, serve in Federal facilities and are reviewed by the U.S. Board of Parole.

H.R. 2050, Mr. Speaker, merely establishes that since they are local offenders, parole jurisdiction will be with the local parole board. That is the arrangement, as you very well know, Mr. Speaker, in the 50 States and should apply here in the District of Columbia.

The chairman of our Subcommittee on Judiciary and Education that conducted the hearings on H.R. 2050 is the gentleman from California [Mr. DYMALLY], who will give a further explanation when he has the floor.

Mr. Speaker, I yield back the balance of my time.

Mr. DYMALLY. Mr. Speaker, I move to strike the last word.

Mr. Speaker, H.R. 2050, is the same bill introduced and passed by the House of Representatives in the 98th Congress. It would transfer parole over District of Columbia Code offenders in Federal prisons from the U.S. Parole Commission to the District of Columbia Parole Board.

There are over 1,700 District of Columbia Code offenders housed in Federal Bureau of Prison facilities. Male District of Columbia Code offenders are placed in Federal facilities for selective custody and various other reasons. Female District of Columbia offenders sentenced to greater than 1 year terms are routinely placed in Federal facilities as a matter of course. This is due to the absence of a local penal facility for female offenders. Most of these female offenders are confined at Alderson, WV, over 300 miles from the District of Columbia. Others are confined as far away as Texas.

Under present law, at section 24-209 of the District of Columbia Code, the place of an offender's confinement determines parole authority. This law is contrary to current Federal-State parole practices. According to the U.S. Parole Commission, the District of Columbia is the only local jurisdiction housing inmates in Federal correction institutions which does not retain its own parole authority. As a result of this practice, several Federal lawsuits by both male and female District of

Columbia Code offenders in Federal prisons have been filed.

Several points are worth noting. First, since the House passed this bill in the last Congress, the District of Columbia has revised its parole guidelines, consistent with certain recommendations made by Senator ARLEN SPECTER and U.S. attorney for the District of Columbia, Joseph diGenova. Most important, these revised guidelines are modeled closely after current Federal guidelines. Second, the overcrowding problem in the District has resulted in an increased number of District of Columbia inmates being transferred to Federal prisons. Third, Congress recently passed the Comprehensive Crime Control Act of 1983, which would abolish Federal parole and the U.S. Parole Commission in 1991. Fourth, section 24-209 became law almost 50 years ago and 40 years prior to the Home Rule Act.

Lawsuits filed in response to this provision remain unsolved and continue to consume unnecessary time and expense. This legislation provides a practical and logically sound remedy to this longstanding problem and I believe that now is the time for this body to pass this legislation and to save the local government and the local and Federal courts further time and money.

Mr. Speaker, I would add that this bill is indeed a step toward home rule. But also, it is a cost efficient step. If passed, this legislation is estimated to save the Federal Government over $1.3 million on the average for the first 5 years after its passage. Thereafter, the District government will underwrite any expenses attached to the execution of its parole authority.

Thus, for the reasons which I've outlined, I strongly urge my colleagues to adopt this measure.

□ 1215

Mr. FAUNTROY. Mr. Speaker, I move to strike the last word.

Mr. Speaker, I rise in support of all three bills that have been reported by the Committee on the District of Columbia. I want to focus now, first of all, of course, upon H.R. 2050 which transfers parole authority over the District of Columbia offenders housed in Federal prisons from the U.S. Parole Commission to the District of Columbia Parole Board.

Mr. Speaker, currently there are over 1,400 D.C. Code offenders housed in Federal Bureau of Prisons facilities. Male D.C. Code offenders are placed in Federal facilities for selective custody, and various other reasons. Female D.C. Code offenders sentenced to greater than 1-year terms are placed in Federal facilities due to the absence of a facility specifically for female offenders here in Washington. Most of these female offenders are confined at Alderson, WV, whence the chairman of the subcommittee, Mr. DYMALLY, has just come. As he has pointed out to you, it is over 300 miles away from the District of Columbia.

Mr. DYMALLY. Mr. Speaker, will the gentleman yield?

Mr. FAUNTROY. I yield to the gentleman.

Mr. DYMALLY. I thank the gentleman for yielding.

Mr. Speaker, I am pleased to inform the gentleman that some of the inmates were most appreciative of your interest in this inconvenience which their families suffer, and have asked me to convey to you the hope that you would continue this fight to have a facility constructed in the District of Columbia.

Mr. FAUNTROY. I thank the gentleman for his leadership in moving H.R. 2050 through the committee process and now to the floor. I am sure that their hopes will be realized as a result of the vote of the House today.

Mr. Speaker, at present, under the District Code, the determination of parole jurisdiction is controlled by the place of incarceration rather than the jurisdiction of conviction. The result is that the District Board of Parole makes parole decisions for District offenders when they are housed in District institutions, and the U.S. Parole Commission makes parole decisions for District Code offenders when they are housed in Federal institutions.

Mr. Speaker, H.R. 2050 expands the authority of the District of Columbia government by providing it with the right to determine paroles for District Code offenders whether held in District or Federal facilities.

Mr. Speaker, H.R. 2946 establishes an independent jury system for the District of Columbia, our local court. This legislation requested by the Superior Court of the District of Columbia and concerned groups will provide for an efficient jury system for the superior court. This change will help make jury duty for the District of Columbia citizens a more worthwhile civic duty.

The third measure, H.R. 3578, as amended, Mr. Speaker, will require criminal prosecutions concerning violations of the laws of the District of Columbia to be conducted in the name of the District. The bill further provides permanent authority for Hearing Commissioners in the District and modifies certain procedures of the District of Columbia Judicial Nomination Commission, and the District Commission on Judicial Disabilities and Tenure. Mr. Speaker, all three bills further the independence of the District of Columbia judicial and criminal justice system and thereby enhance self-government.

I wish to commend the chairman of the District Committee, Congressman RONALD DELLUMS, and the ranking minority member, Mr. MCKINNEY. I would also like to thank Mr. DYMALLY, chairman of the Subcommittee on Judiciary and Education, and Mr. BLILEY, the ranking minority member.

Mr. Speaker, as you know, I represent more people, taxpayers, than any single voting Member of the House. Indeed, I represent more people who pay taxes in this country than elect seven Senators, because there are, as you know, more citizens in the District of Columbia than reside in seven States in the Union. So I would prefer to have been here not simply to expand the parole authority of the District government with respect to those convicted of code violations in this city, but to turn the entire system over to the local citizenry inasmuch as we, alone among Americans, are continued denial of the right to representation in the U.S. House and Senate.

I would prefer to have passed a measure that would turn the entire court system over to the superior court and therefore allow us to fashion our own jury system procedures. Of course, I would certainly have preferred to have passed H.R. 3578, as amended, as a function of a locally elected mayor and city council, thus providing us the kind of permanent authority that we request here in terms of control of our criminal prosecutions.

Mr. Speaker, I yield back the balance of that time that those two Senators who would have been speaking, rather those Representatives who would have been speaking, had they been freed from the tyranny of taxation without representation here in the District of Columbia, as I am not.

Mr. BLILEY. Mr. Speaker, as the ranking minority member of the Judiciary and Education Subcommittee of the Committee on the District of Columbia, I rise in support of H.R. 2050.

As explained by the distinguished chairman of the subcommittee, Mr. DYMALLY, this bill is a question of equity. The fact is that some convicted District of Columbia criminals are sent to the District's prison at Lorton and some are sent to various Federal institutions around the country. For those people at Lorton, the District Parole Board has jurisdiction, for those men and women in Federal prisons, the Federal Parole Board and its rules and regulations apply.

Since the two parole authorities with responsibility for District prisoners have different criteria and regulations as well as the fact that different conditions may lead to different attitudes and therefore different behavior patterns affecting parole possibilities, I believe that it is a simple question of equity that the District of Columbia have sole parole authority over its own citizens.

I speak for the minority members of the committee when I say that this legislation is fair and equitable for the people and the

government of the District of Columbia and we endorse its passage.

Mr. DELLUMS. Mr. Speaker, I move the previous question on the bill.

The previous question was ordered.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. DELLUMS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

DISTRICT OF COLUMBIA JURY SYSTEM ACT

Mr. DELLUMS. Mr. Speaker, by direction of the Committee on the District of Columbia, I call up the bill (H.R. 2946) to establish an independent jury system for the Superior Court of the District of Columbia, and ask unanimous consent that the bill be considered in the House as in the Committee of the Whole.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

The Clerk read the bill, as follows:

H.R. 2946

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "District of Columbia Jury System Act".

SEC. 2. ESTABLISHMENT OF DISTRICT OF COLUMBIA JURY SYSTEM.

Chapter 19 of title 11 of the District of Columbia Code is amended to read as follows:

"CHAPTER 19. JURIES AND JURORS

Sec.
"11-1901. Declaration of policy.
"11-1902. Definitions.
"11-1903. Prohibition of discrimination.
"11-1904. Jury system plan.
"11-1905. Master juror list.
"11-1906. Qualification of jurors.
"11-1907. Summoning of prospective jurors.
"11-1908. Exclusion from jury service.
"11-1909. Deferral from jury service.
"11-1910. Challenging compliance with selection procedures.
"11-1911. Length of service.
"11-1912. Juror fees.
"11-1913. Protection of employment of jurors.
"11-1914. Preservation of records.
"11-1915. Fraud in the selection process.
"11-1916. Grand jury; additional grand jury.
"11-1917. Coordination and cooperation of courts.
"11-1918. Effect of invalidity.

"CHAPTER 19. JURIES AND JURORS

"§ 11-1901. Declaration of policy.

"A jury selection system is hereby established for the Superior Court of the District of Columbia. All litigants entitled to trial by jury shall have the right to grand and petit juries selected at random from a fair cross section of the residents of the District of Columbia. In accordance with the provisions of this chapter, all qualified individuals shall have the opportunity to be considered for service on grand and petit juries in the District of Columbia and shall be obligated to serve as jurors when summoned for that purpose.

"§ 11-1902. Definitions.

"For purposes of this chapter, the following terms have the following meanings:

"(1) The term 'Board of Judges' means the chief judge and the associate judges of the Superior Court of the District of Columbia.

"(2) The term 'chief judge' means the chief judge of the Superior Court of the District of Columbia.

"(3) The term 'clerk' means the clerk of the Superior Court of the District of Columbia or any deputy clerk.

"(4) The term 'Court' means the Superior Court of the District of Columbia and may include any judge of the Court acting in an official capacity.

"(5) The term 'juror' means (A) any individual summoned to Superior Court for the purpose of serving on a jury; (B) any individual who is on call and available to report to Court to serve on a jury upon request; and (C) any individual whose service on a jury is temporarily deferred.

"(6) The term 'jury' includes a grand or petit jury.

"(7) The term 'jury system plan' means the plan adopted by the Board of Judges of the Court, consistent with the provisions of this chapter, to govern the administration of the jury system.

"(8) The term 'master juror list' means the consolidated list or lists compiled and maintained by the Board of Judges of the District of Columbia Courts which contains the names of prospective jurors for service in the Superior Court of the District of Columbia.

"(9) The term 'random selection' means the selection of names of prospective jurors in a manner immune from the purposeful or inadvertent introduction of subjective bias, so that no recognizable class of the individuals on the list or lists from which the names are being selected can be purposefully or inadvertently included or excluded.

"(10) The term 'resident of the District of Columbia' means an individual who has resided or has been domiciled in the District of Columbia for not less than six months.

"§ 11-1903. Prohibition of discrimination.

"A citizen of the District of Columbia may not be excluded or disqualified from jury service as a grand or petit juror in the District of Columbia on account of race, color, religion, sex, national origin, ancestry, economic status, marital status, age, or (except as provided in this chapter) physical handicap.

"§ 11-1904. Jury System Plan.

"(a) The Board of Judges shall adopt, implement, and as necessary modify, a written jury system plan for the random selection and service of grand and petit jurors in the Superior Court consistent with the provisions of this chapter. The adopted plan and any modifications shall be subject to a 30-day period of review by Congress in the manner provided for an act of the Council under section 602(c)((1) of the District of Columbia Self-Government and Government Reorganization Act. The plan shall include—

"(1) detailed procedures to be followed by the clerk of the Court in the random selection of names from the master juror list;

"(2) provisions for a master jury wheel (or other device of like purpose and function) which shall be emptied and refilled at specified intervals, not to exceed 24 months;

"(3) provisions for the disclosure to the parties and the public of the names of individuals selected for jury service, except in cases in which the chief judge determines that confidentiality is required in the interest of justice; and

"(4) procedure to be followed by the clerk of the Court in assigning individuals to grand and petit juries.

"(b) The jury system plan shall be administered by the clerk of the Court under the supervision of the Board of Judges.

"§ 11-1905. Master juror list.

"(a) The jury system plan shall provide for the compilation and maintenance by the Board of Judges of a master juror list from which names of prospective jurors shall be drawn. Such master juror list shall consist of the list of District of Columbia voters, individuals who submit their names to the Court for inclusion on the master juror list, and names from such other appropriate sources and lists as may be provided in the jury system plan.

"(b) Notwithstanding any other provision of law, upon request of the Board of Judges any person having custody, possession, or control of any list required under subsection (a) shall provide such list to the Court, at cost, at all reasonable times. Each list shall contain the names and addresses of individuals on the list. Any list obtained by the Court under the provisions of this chapter may be used by the Court only for the selection of jurors pursuant to this chapter.

"(c) Not less than once each year, the Board of Judges shall give public notice to the citizens of the District of Columbia that individuals may be included on the master juror list by submission of their names and addresses to the clerk of the Court. Such public notice shall be given through such means as will reasonably assure as broad a dissemination as possible.

"§ 11-1906. Qualification of Jurors.

"(a) The jury system plan shall provide for procedures for the random selection and qualification of grand and petit jurors from the master juror list. Such plan may provide for separate or joint qualification and summoning processes.

"(b)(1) An individual shall be qualified to serve as a juror if that individual—

"(A) is a resident of the District of Columbia;

"(B) is a citizen of the United States;

"(C) has attained the age of 18 years; and

(D) is able to read, speak, and understand the English language.

"(2) An individual shall not be qualified to serve as a juror—

"(A) if determined to be incapable by reason of physical or mental infirmity of rendering satisfactory jury service; or

"(B) if that individual has been convicted of a felony or has a pending felony or misdemeanor charge, except that an individual disqualifed for jury service by reason of a felony conviction may qualify for jury service not less than one year after the completion of the term of incarceration, probation, or parole following appropriate certification under procedures set out in the jury system plan.

"(3) Any determination regarding qualification for jury service shall be made on the

basis of information provided in the juror qualification form and any other competent evidence.

"(c)(1) The jury system plan shall provide that a juror qualification form be mailed to each prospective juror. The form and content of such juror qualification form shall be determined under the plan. Notarization of the juror qualification form shall not be required.

"(2) An individual who fails to return a completed juror qualification form as instructed may be ordered by the Court to appear before the clerk to fill out such form, to appear before the Court and show cause why he or she should not be held in contempt for failure to submit the qualification form, or both. An individual who fails to show good cause for such failure, or who without good cause fails to appear pursuant to a Court order, may be punished by a fine of not more than $300, by imprisonment for not more than seven days, or both.

"(d) An individual who intentionally misrepresents a material fact on a juror qualification form for the purpose of avoiding or securing service as a juror may be punished by a fine of not more than $300, by imprisonment for not more than 90 days, or both.

"§ 11-1907. Summoning of Prospective Jurors.

"(a) At such times as are determined under the jury system plan, the Court shall summon or cause to be summoned from among qualified individuals under section 11-1906 sufficient prospective jurors to fulfill requirements for petit and grand jurors for the Court. A summons shall require a propsective juror to report for possible jury service at a specified time and place unless advised otherwise by the Court. Service of prospective jurors may be made personally or by first-class, registered, or certified mail as determined under the plan.

"(b) A prospective juror who fails to appear for jury duty may be ordered by the Court to appear and show cause why he or she should not be held in contempt for such failure to appear. A prospective juror who fails to show good cause for such failure, or who without good cause fails to appear pursuant to a Court order, may be punished by a fine of not more than $300, by imprisonment for not more than seven days, or both.

"§ 11-1908. Exclusion from jury service.

"(a) Subject to the provisions of this section and of sections 11-1903, 11-1906, and 11-1909, no individual or class of individuals may be disqualified, excluded, excused, or exempt from service as a juror.

"(b) An individual summoned for jury service may be: (1) excluded by the Court on the ground that that individual may be unable to render impartial jury service or that his or her service as a juror would be likely to disrupt the proceedings; (2) excluded upon peremptory challenge as porvided by law; (3) excluded pursuant to the procedure specified by law upon a challenge by any party for good cause shown; or (4) excluded upon determination by the Court that his or her service as a juror would be likely to threaten the secrecy of the proceedings, or otherwise adversely affect the integrity of jury deliberations. No person shall be excluded under clause (4) of this subsection unless the judge, in open Court, determines that such exclusion is warranted and that exclusion of that individual will not be inconsistent with sections 11-1901 and 11-1903 of this chapter.

"(c) An individual excluded from a jury shall be eligible to sit on another jury if the basis for the initial exclusion would not be relevant to his or her ability to serve on such other jury. The procedures for challenges to and review of exclusions from jury service shall be set forth in the jury system plan.

"§ 11-1909. Deferral from jury service.

"A qualified prospective juror may be deferred from jury service only upon a showing of undue hardship, extreme inconvenience, public necessity, or temporary physical or mental disability which would affect service as a juror. The procedure for requesting a deferral from jury service and the procedure and basis for granting a deferral shall be set forth in the master plan.

"§ 11-1910. Challenging compliance with selection procedures.

"(a) A party may challenge the composition of a jury by a motion for appropriate relief. A challenge shall be brought and decided before any individual juror is examined, unless the Court orders otherwise. The motion shall be in writing, supported by affidavit, and shall specify the facts constituting the grounds for the challenge. If the Court so determines, the motion may be decided on the basis of the affidavits filed with the challenge. If the Court orders trial of the challenge, witnesses may be examined on oath by the Court and may be so examined by either party.

"(b) If the Court determines that in selecting a grand or petit jury there has been a substantial failure to comply with this chapter, the Court shall stay the proceedings pending the selection of a jury in confirmity with this chapter, quash the indictment, or grant other appropriate relief.

"(c) The procedures prescribed by this section are the exclusive means by which a person accused of a crime, the District of Columbia, the United States, or a party in a civil case may challenge a jury on the ground that the jury was not selected in conformity with this chapter. Nothing in this section shall preclude any person from pursuing any other remedy, civil or criminal, which may be available for the vindication or enforcement of any law prohibiting discrimination on account of race, color, religion, sex, national origin, economic status, marital status, age, or physical handicap in the selection of individuals for service on grand or petit juries.

"§ 11-1911. Length of service.

"The length of service for grand and petit jurors shall be determined by the master jury plan. In any twenty-four month period an individual shall not be required to serve more than once as a grand or petit juror except as may be necessary by reason of the insufficiency of the master juror list or as ordered by the Court.

"§ 11-1912. Juror fees.

"(a) Notwithstanding section 602(a) of the District of Columbia Self-Government and Governmental Reorganization Act, grand and petit jurors serving in the Superior Court shall receive fees and expenses at rates established by the Council of the District of Columbia, except that such fees and expenses may not exceed the respective rates paid to such jurors in the federal system.

"(b) A petit or grand juror receiving benefits under the laws of employment security of the District of Columbia shall not lose such benefits on account of performance of juror service.

"(c) Employees of the United States or of any State or local government who serve as grand or petit jurors and who continue to receive regular compensation during the period of jury service shall not be compensated for jury service. Amounts representing reimbursement of expenses incurred in connection with jury service may be paid to such employees to the extent provided in the jury system plan.

"§ 11-1913. Protection of employment of jurors.

"(a) An employer shall not deprive an employee of employment, threaten, or otherwise coerce an employee with respect to employment because the employee receives a summons, responds to a summons, serves as a juror, or attends Court for prospective jury service.

"(b) An employer who violates subsection (a) is guilty of criminal contempt. Upon a finding of criminal contempt an employer may be fined not more than $300, imprisoned for not more than 30 days, or both, for a first offense, and may be fined not more than $5,000, imprisoned for not more than 180 days, or both, for any subsequent offense."

"(c) If an employer discharges an employee in violation of subsection (a), the employee within 9 months of such discharge may bring a civil action for recovery of wages lost as a result of the violation, for an order of reinstatement of employment, and for damages. If an employee prevails in an action under this subsection, that employee shall be entitled to reasonable attorney fees fixed by the court.

"§ 11-1914. Preservation of records.

"(a) All records and lists compiled and maintained in connection with the selection and service of jurors shall be preserved for the length of time specified in the jury system plan.

"(b) The contents of any records or lists used in connection with the selection process shall not be disclosed, except in connection with the preparation or presentation of a motion under § 11-1910, or until all individuals selected to serve as grand or petit jurors from such lists have been discharged.

"§ 11-1915. Fraud in the selection process.

"An individual who commits fraud in the processing or selection of jurors or prospective jurors, either by causing any name to be inserted into any list maliciously or by causing any name to be deleted from any list maliciously (including malicious data entry or the altering of any data processing machine or any set of instructions or programs which control data processing equipment for such malicious purpose), is guilty of the crime of jury tampering, and, upon conviction, may be punished by a fine of not more than $10,000, imprisonment for not more than two years, or both. This section shall not limit any other provisions of law concerning the crime of jury tampering.

"§ 11-1916. Grand jury; additional grand jury.

"(a) A grand jury serving in the District of Columbia may take cognizance of all matters brought before it regardless of whether an indictment is returnable in the Federal or District of Columbia courts.

"(b) If the United States Attorney for the District of Columbia certifies in writing to the chief judge that an additional grand jury is required, the judge may in his or her discretion order an additional grand jury summoned which shall be drawn at such time as he or she designates. Unless discharged by order of the judge, the additional grand jury shall serve until the end of the term for which it is drawn.

"§ 11-1917. Coordination and Cooperation of Courts.

"To the extent feasible, the Superior Court and the United States District Court shall consider the respective needs of each court in the qualification, selection, and service of jurors. Nothing in this chapter shall be construed to prevent such courts from entering into any agreement for sharing resources and facilities (including automated data processing hardware and software, forms, postage, and other resources).

"§ 11-1018. Effect of Invalidity.

"If any provision of this Act or the application of that provision is held invalid, such invalidity shall not affect any other provision or application of this Act which can be given effect without the invalid provision or application.".

SEC. 3 TECHNICAL AND CONFORMING AMENDMENTS.

Section 1869(f) of title 28, United States Code, is amended by striking out "except that for purposes of sections 1861, 1862, 1866(c), 1866(d), and 1867 of this chapter such terms shall include the Superior Court of the District of Columbia".

SEC. 4. EFFECTIVE DATE.

(a) Except as provided in subsection (b), the provisions of this Act shall take effect 180 days after the date of enactment of this Act.

(b) Upon enactment of this Act, the Board of Judges shall have authority to promulgate and adopt a jury system plan in accordance with this Act and the Court and the clerk of the Court shall have authority to take all necessary actions preliminary to the assumption of the administration of an independent jury system under this Act.

Mr. DELLUMS. Mr. Speaker, I move to strike the last word. Mr. Speaker, this bill relieves the U.S. courts of the task of calling jurors to serve at trials in local District of Columbia courts. The present practice is a holdover from 1970, when the U.S. court handled felony trials and appeals for local offenses. In 1970, the Congress created a trial court and appeals court especially to handle such local cases. If H.R. 2946 becomes law, the local court will handle just the local cases, and the U.S. district court would just call jurors for Federal cases.

A full explanation of the bill will be given by my distinguished colleague, the gentleman from California [Mr. DYMALLY], who chairs the Subcommittee on Judiciary and Education, when he is recognized.

Mr. Speaker, with that brief explanation, I yield back the balance of my time.

Mr. DYMALLY. Mr. Speaker, I move to strike the last word.

Mr. Speaker, this bill is quite simple. H.R. 2946 is a bill to establish an independent jury system for the Superior Court of the District of Columbia.

In 1970, this body and Congress passed the District of Columbia Court Reform Act, which became effective in 1971. We established a D.C. court system expressly analogous to State court systems. After nearly 15 years of self-management and competitive efficiency, the court is prepared to administer its own jury system, independent of the U.S. District Court for the District of Columbia.

Most important, it is quite capable of doing so and at the same time continuing to work closely and cooperate with the U.S. District Court for the District of Columbia. Hence, the local district court is "strongly supportive" of this transition. As do State courts, the local courts here have local needs which, like State courts, they should have the authority to address.

Against this backdrop, I urge my fellow Members of this august body to adopt H.R. 2946.

□ 1225

Mr. BLILEY. Mr. Speaker, I move to strike the last word.

Mr. Speaker, I rise as a cosponsor and as the ranking member of the Subcommittee on Judiciary and Education in strong support of H.R. 2946.

This legislation is needed for the District of Columbia court system to effectively and efficiently deal with the large caseload of court proceedings that it is faced with. Last year this body authorized seven new superior court judges for the District of Columbia. The addition of these positions has overstrained the limited capacity of the present jury selection system employed by the District courts.

The courts have also instituted the "one day, one trial" method of jury duty which places larger demands on the panels of jury selection than the traditional method of jury service. I support one day, one trial and I am proud of the work that the chairman of the subcommittee and I did in achieving this carefully written bipartisan bill. The gentleman from California and myself worked hard on this legislation and I feel confident that I speak for the minority on the committee when I say that we enthusiastically support this bill.

Mr. DYMALLY. Mr. Speaker, will the gentleman yield?

Mr. BLILEY. I am happy to yield to the gentleman from California.

Mr. DYMALLY. Mr. Speaker, I want to take this opportunity to express my deep gratitude to the gentleman from Virginia [Mr. BLILEY] for his support of this legislation and other legislation affecting the judiciary in the District of Columbia. The gentleman from Virginia has been most cooperative in the committee's deliberations, and I wish to express my thanks to him.

Mr. BLILEY. Mr. Speaker, I thank the gentleman from California [Mr. DYMALLY], and I yield back the balance of my time.

Mr. DELLUMS. Mr. Speaker, I move to strike the last word.

Mr. Speaker, I rise simply to compliment the gentleman from California [Mr. DYMALLY] and the gentleman from Virginia [Mr. BLILEY] for their diligent activity and their conscientious efforts as the chairperson of the Subcommittee on Judiciary and Education and the ranking minority member of that subcommittee. Both of these gentlemen are very delightful members to work with. They are conscientious, hard-working members who are very diligent about the business of trying to rectify many of the inadequacies that exist between the Federal Government and the residents of the District of Columbia.

My purpose in rising was only to make that statement, Mr. Speaker, and I yield back the balance of my time.

Mr. BLAZ. Mr. Speaker, I move to strike the last word.

Mr. Speaker, I present for inclusion in the RECORD various items of correspondence from the Department of Justice objecting to the legislation presently being considered. Those items are as follows:

U.S. DEPARTMENT OF JUSTICE,
OFFICE OF LEGISLATIVE AND INTERGOVERNMENTAL AFFAIRS,
Washington, DC, October 28, 1985.

Hon. ROBERT H. MICHEL,
Minority Leader,
U.S. House of Representatives,
Washington, DC.

DEAR CONGRESSMAN MICHEL: The following bills are scheduled for floor action on Monday, October 28, 1985 on the District Calendar:

H.R. 2050.—a bill to transfer parole authority over District of Columbia offenders housed in federal prison from the United States Parole Commission to the District of Columbia Parole Board.

H.R. 2946.—a bill to establish an independent jury system for the Superior Court of the District of Columbia.

H.R. 3578.—(We are not sure which bill H.R. 3578 or H.R. 3592 will be scheduled for floor action. Originally, H.R. 3370 was introduced on September 19, 1985. A staff markup resulted in H.R. 3578 being introduced on October 17, which the Committee reported out. Subsequent to the Committee markup, H.R. 3592, which is a clean version of H.R. 3578 with additional amendments, was introduced.)—a bill to provide permanent authority for hearing commissioners in the District of Columbia courts, to modify certain procedures of the District of Columbia courts, to modify certain procedures of the District of Columbia Judicial Nomination Commission and the District of Columbia Commission on Judicial Disabilities and Tenure, and for other purposes.

The Department of Justice has sent letters of opposition on H.R. 2050 and H.R. 2946 to the Committee on the District of Columbia (copies attached).

H.R. 2050

The Department opposes H.R. 2050 for several reasons:

(1) Place of incarceration rather than jurisdiction of correction determines parole jurisdiction under the D.C. Code.

(2) The policies and procedures of the D.C. Board of Parole were called into serious question during a hearing on similar legislation (H.R. 3369) during the 98th Congress.

(3) New guidelines established by D.C. Board of Parole in the Spring of 1985 have

not yet been analyzed for efficiency and effectiveness.

(4) The U.S. Sentencing Commission established under P.L. 98-473 (Comprehensive Crime Control Act of 1984) and recently confirmed by the Senate will have to address this issue as it determines how to phase out the U.S. Parole Commission (abolished under P.L. 98-473).

(5) A piecemeal approach to the D.C. sentencing and correctional practices is a real and direct threat to law enforcement interests in the District, especially since August of 1985 when the Federal Bureau of Prisons started to assume custody of all D.C. Code violators sentenced in D.C. Superior Court to assist the District government in responding to a court order to reduce overcrowding at its correctional facilities.

H.R. 2946

While H.R. 2946 contains significant improvements over the jury selection system now in effect in the federal courts, e.g. broadening the base of persons who can be summoned for jury duty, narrowing the number of automatic exclusions from jury service, and increasing the penalties for certain fraudulent conduct in the jury selection process, we do not believe that a bifurcated approach to the D.C. jury selection system—one for the local trial court and one for the federal trial court—is a prudent or efficient one. Such a bifurcated approach would entail administrative difficulties, duplication of effort and additional cost to the federal government. For these reasons, we oppose H.R. 2946 in its present form, but we would consider changes to the Jury Selection and Service Act to incorporate the improvements contained in H.R. 2946.

H.R. 3578

Although this Department has not been asked to comment on H.R. 3370, H.R. 3578 or H.R. 3592, we do have concerns about several provisions contained in these related bills. H.R. 3592 (introduced as a clean version of H.R. 3578 but with several technical amendments) appears to be the bill scheduled for floor action. We do object to Section 2 of this bill which requires the U.S. Attorney for District of Columbia to compile an annual report by category of offense and conviction of D.C. Code violators, and violators of U.S. law exclusive to the District of Columbia. The material is now available and a matter of public record. To have the local U.S. Attorney's office utilize the manpower and resources necessary to compile and publish this report would create serious budgetary problems for that office—an issue the Committee failed to address.

Sections 10-11 of H.R. 3592 would govern public access to materials of the Judicial Nomination Commission. It is our belief that confidentiality promotes candor in such proceedings but we recognize that there may be instances where total secrecy is unfair. Section 13 requires in part that the record and materials filed in connection with the Judicial Disability and Tenure Commission be kept confidential unless the judge whose conduct or health is at issue authorizes disclosure. It is not clear whether the judge can authorize disclosure of some of the information while suppressing the rest. If so, this could result in presenting a very one-sided picture to the public. We suggest that either of the following approaches would be preferable:

(1) requiring a judge who wants part of the record to be made public to consent to all of it being made public, or

(2) following the rule which applies in grand jury proceedings, i.e., the record is kept secret and the decision makers are sworn to secrecy, but witnesses may tell the public about their testimony and submissions if they wish.

We would appreciate any assistance you could give in making our views known on these issues.

The Office of Management and Budget has advised this Department and that there is no objection to the submission of this report from the standpoint of the Administration's program.

Sincerely,

PHILLIP D. BRADY,
Acting Assistant Attorney General.

U.S. DEPARTMENT OF JUSTICE,
OFFICE OF LEGISLATIVE AND INTERGOVERNMENTAL AFFAIRS,
Washington, DC, September 27, 1985.

Hon. RONALD DELLUMS,
Chairman, Committee on the District of Columbia, Washington, DC.

DEAR MR. CHAIRMAN: This is in response to your request for the views of the Department of Justice on H.R. 2050, a bill "to give to the Board of Parole of the District of Columbia exclusive power and authority to make parole determination concerning prisoners convicted of violating any law of the District of Columbia, or any law of the United States applicable exclusively to the District." As set forth in more detail below, the Department of Justice believes that the change sought by this bill would not improve the law enforcement and corrections programs in the District of Columbia and we therefore oppose this bill. Furthermore, we believe that Congress should not undertake piecemeal revisions of the D.C. corrections programs until completion of a thorough and comprehensive review of all sentencing and correctional practices.

At present under the D.C. Code, the determination of parole jurisdiction is controlled by the place of incarceration rather than the jurisdiction of conviction. The result is that the D.C. Board of Parole makes parole decisions for D.C. Code offenders when they are housed in D.C. institutions and the United States Parole Commission makes parole decisions for D.C. Code offenders when they are housed in federal institutions. At the present time over 1,400 D.C. Code offenders are held in Federal Bureau of Prisons facilities. This represents the designed capacity of three modern correctional institutions. Although some of these are in federal custody because of their extremely violent criminal histories or to separate them from other District of Columbia inmates, the bulk of them are in federal custody primarily because of shortages of space to house inmates in the District of Columbia system. Thus, two factors not addressed in H.R. 2050 are the real burden to the Federal Bureau of Prisons of confining this large group of local offenders and the serious problems involved in adding these geographically dispersed inmates to the D.C. Parole Board's caseload.
